kill a salmon than shoot a caribou," would tamely listen to the declaration that a worthy rival of the *Salmo salar* existed without a feeling of supreme, aye superb, contempt that this boastful braggart could never have stabbed and then played and killed the salmon! "If such there be, go mark him well," thinks the patrician—this post graduate in the quintessence of angler lore, "for the conceit hath made him mad."

Yet I think my salmon fishing incomplete, my sole ideal pleasure unfinished, like soup without a dash of cayenne, if I ended my summer outing without a cast for this not unworthy and undegenerated scion of the royal stock of *Salmo salar*, if such the learned have declared him to be. Let those who may establish his lineage as a worthy toss of his ashes, *post cineres gloria venit*. Let those who will dispute his right to the title of salmon, for if salmon be derived from *salire*, to leap, hail then the ouananiche—*le petit saumon*—the endearing term of the Montagnais—for surely does his mad rage in air and water bear testimony to his title to be deemed *saumon* and nothing but *saumon*.

This is no denizen of still and stagnant water, no poltroon of running waters, nursing his strength, in cowardly ambush, lying in wait beneath lily pads, or lurking in weeds, for the victim to pass upon which he will ruthlessly prey; no savage monster patterned after crocodile, with cruel fangs filling a gavial muzzle to devour his victim who, once impaled upon bait or spoon, cowardly comes to strand or canoe like some great bully called to stand by pure pluck and not physique. No, the ouananiche fights as if he would pluck forth the weapon that stabbed him and with it turn and attack his assailant. Up in the air six or seven times, shaking his head to expel the hook, high and low, with wit and cunning, tugging at the line deep under water until you fairly feel the barb tear the flesh at the end, rising to the surface and thrashing the water until the line is one inextricable tangle—so goes the battle on. Let no one relax his vigilance or abate one jot of effort until the ouananiche be suspended on the balance, or else a deep-drawn breath and—a great struggle with yourself attest the ignominious end.

This foe lives in the rushing floods, under falls where the rainbow forever gleams in the sun, amid eddies circling down the foaming tide—where in the whirl of tumultuous waters current neutralizes current, and there encircled by a ring of turbulent waves the pool forms; there with muscles always in motion turning into pliant steel and keenly, nay at all times, vigilant and alert, never at rest, does the ouananiche get form, color, strength and courage. Flashing through the foam, through the seething waters as they tumultuously pour down rocky gorge and pass, over precipitous falls—leaping high up the fall and ascending against its mighty power—there the "Survival of the Fittest" working to perfect end (in Natural Selection), the ouananiche gets his superb development of form and muscle, with the gift of indomitable courage.

As the salmon fisherman kills the salmon weighing from sixteen to fifteen pounds with a 26-ounce rod and

ON THE MISTASSINI.

dainty flies, so I make war on *le petit saumon* weighing from three to eight pounds, with rods weighing from four and one-half to seven ounces, and use the same dainty flies, only smaller—Jock-Scott, silver-doctor, Durham-ranger, cock-robin, etc. Yet do they again and again fail to tempt his capricious appetite, for his fancy is fickle and vacillating, worn to satiety like some old gourmet.

Down the west coast of Newfoundland—all the way from Labrador—intent only on reaching the Cinquieme Chute of the Mistassini, I sped to get my ouananiche fishing. Reaching the Hotel Roberval at five o'clock, I learned from that friend of all fishermen, that superb host, T. Kenna, Esq., that my telegram had been obeyed—guides secured and provisions packed ready for me to go that night, if necessary.

It was on this journey that, in conversation, a well-known salmon fisherman remarked to me: "After one has killed salmon, the only other pleasure that remains is to collect his literature, the "Bibliophile Salmonis."

It was better to dine, and "sleep, perchance to dream," and start at daybreak for a long and arduous day's work and get the fishing surely the following day.

Up the Mistassini to the Cinquieme Chute, which I reached with a knot in my throat as I found myself the only fisherman there. I camped in the same old place, on the island, upon either side of which the great river rushes down in falls of magnificent grandeur, covered with trees, giving protecting shelter from storm, and creating cool and pleasant shadows in the day, where the roar of the falls is never hushed, as the river, falling full thirty feet over the precipitous chutes, flows on to the sea. Here the song of the bird, undisturbed by the sound of the gun, comes vibrating through the hoarse roar of the falls like the soaring cadenza of the prima donna over the sonorous sweep of the orchestra. Upon a bed of dried balsam, the accumulation of unnumbered years, with a layer of fresh plumes, soothed by the music of the sough of the wind through the trees, one sleeps on down that makes mockery of feather or fur.

At the Cinquieme Chute I have seen the ouananiche, on his way up to Lac à Jim, leap full ten feet against the face of the falls, and with scarce a perceptible pause again leap as high, reaching the top of the chute and falling into the mirrory slide of the water be swept over the falls before he could get his head up stream and his mighty tail going like the screw of an ocean liner.

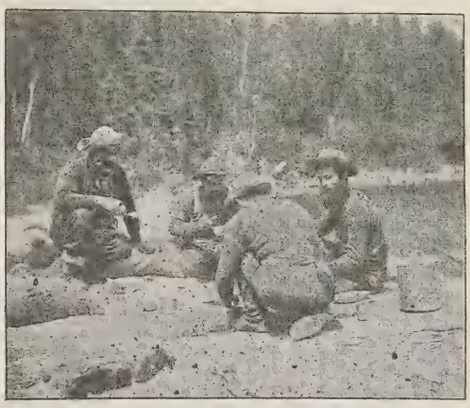
"*C'est terrib'*," says Guillaume, "*Montant la chute en route à Lac à Jim*," and I hunger to have the jumper on

LAC TSHOTAGAMA.

the end of my line on the little 4½oz. "Wood" (lancewood) rod, which again and again I loaned the Lady Cecilia Rose to land 4-pound ouananiche at the Fifth Falls.

Fly after fly cast upon the waters, dark and sober-hued in sunshine, fascinating and bright in clouded skies, flitting on the foam, swimming through the flood, leaping over the ripples, from sunrise to sunset, proved "that all is vanity," until twilight found me weary and disgusted, only then to learn the worth of the white beauty of the Parmachene-belle as she whirled out of the whiter foam into the darker, troubled water of the eddies. Then only for one brief instant I saw the fly, for out of the eddy a dark form arose, and amid a scream of the reel the fly disappeared and the frail silken line ran into the wildest foam of the rushing waters.

I have seen the leader come back with the flies, expressly tied for this fishing, torn from the snells. I have taken the best 9-foot salmon leader and looped a small salmon fly on each end (a whitewing-admiral and Parmachene-belle), and tying the leader so that the stretcher would have a flow of about 3ft., work the rod as if fishing for salmon, seen the ouananiche as if shot from a catapult, flash inthe air full 7ft. high, as the dip of the rod stabbed the fish, and then disappear in the foam; and then seen on this same cast of flies, the rushing of the line arrested and neutralized as the stretcher fly was taken, and two fish simultaneously rise in the air and the line come back to me, leader and flies gone.



Again and again I gave Guillaume the 6oz. "Wells" (split bamboo) rod, bent like a coach whip cruelly winding its lash under the maddened horse, while I tried upon my camera to get the frantic leap of the impaled fish: but never could I get a snap shot in the few instances when the dual leap of the two fish snapped the salmon leader like a thread.

Standing on a rock around which the foam seethed and whirled, admid a rain of mist (and to reach which I had to clamber like a goat), I stabbed ouananiche after ouananiche only to lose fly after fly, and in one day lost three salmon leaders and eighteen flies.

Say, how worthy must these foemen of 3lbs. be who can thus break salmon leaders? Ask Tom Conroy who smiles blandly, but as urbanely denies that the leader had any possible defect! Guillaume's exclamation is better—"*C'est incroyable.*"

Amid many exclamations, "*C'est une belle ouananiche!*" "*C'est un beau saumon!*" I had been returning the fish which I thought would survive the battle to the river, and on the evening of the third day I saw the guides engaged in earnest consultation around the camp-fire. It was evidently something serious which was being discussed with great gravity, but the hot water to remove the pennyroyal and tar from face and hands was getting cold, and so washing myself, I gave up my curiosity and dropping the mosquito canopy, turned in.

I know not when the camp-fires were carefully extinguished and the bowl of lime water was placed in the tent, but at 5 o'clock the next morning, "*Pechant, M'sieur*," and Guillaume's voice awoke me from my slumber. "*Oui, Guillaume, canot pas—à la gros roche.*"

DINNER ON THE GRAND PERIBONKA.

"*Bien, M'sieur*"—and we went to try the sport before the sun got too high.

It was a 4lbs. ouananiche that gave Guillaume his opportunity. He held the fish upon the balance for me to take the weight, and as the index marked the familiar rules, I pointed to the water, to put the fish back. "*M'sieur*," began Guillaume, in deep and earnest tones, Guillaume, chief among *voyageurs*, tireless in the canoe and on portage; always happy, aye, and able to net or gaff the salmon—no soul-exasperating slip of steel or net, no error of judgment when to strike—most willing and never lingering over meals when "*M'sieur*" wanted to go fishing—Guillaume's tones gravely went on: "*Vous êtes un beau pêcheur. Votre plaisir à prendre l'ouananiche. Nous avons le gros poisson assez pour le camp et pour manger. Don'rez vous les poissons pour notres familles.*" As he paused I said, "*Très bien, ils ont à votre disposition.*" There were no thanks uttered; it was the one bend of the head with wild grace that showed appreciation, and never had I the slightest cause for complaints.

I cannot tell how many ouananiche I stabbed, played and lost. In nine days I landed 145 fish weighing from 3 to 4½lbs. Numberless instances did I time myself, the interval between stabbing and landing the fish, and it was never less than 15 minutes, and often 45 minutes before the gamy antagonist was conquered.

It was a great trip, a fine camp, splendid provisions, superb sport, faultless guides, grand weather. It makes the heart too full for utterance to recall such an ideal trip.

If any reader of this should be one of the great party upon the piazza of Hotel Roberval when I returned with 24 ouananiche weighing from 3 to 4½lbs. caught the day before, and 47 ouananiche of like weight salted in a birch bark box, and heard Mr. Beemer ask, "What luck—show up!" he will bear witness to the admiration excited by the spectacle of the salmon stretched upon the piazza before admiring, nay covetous eyes. With difficulty I got away to get a tub and supper, and it was midnight when, with voice so hoarse I could scarce whisper, that I got to bed, so many had questions to propound as to the whereabouts of the Eden wherein I had revelled—the flies, etc.

Guillaume Tremblay, Josef Simeon and Josef Robinson, I doff my hat to "les gros guides" and revel in the thought that I have engaged you for 1893 and, *Deo volente*, we will have a great time.

### Greenwood Lake Bass.

BASS fishing at Greenwood Lake seems to be unusually good at present. Last Sunday the writer, in company with his wife, took a boat at the outlet and rowed up to the head of the lake, stopping over night at the Roe Cottage and returning the following day. Several catches of fifteen bass and upward to one boat for a half day's fishing were noted. In the live box at the Roe Cottage were two fine bass of 3½ and 3lbs. respectively, that were caught Saturday last by a boy of ten. He had been fishing from the island, on which stands the little Episcopal Church, using worms for bait, and had only succeeded in catching sunfish, when, becoming discouraged, he had cut off the tail of his most recent captive and thrown him in the water, still attached to his hook. The fish sank, and the boy tried to pull in his line, but found it fast to something—the bottom of the lake he thought at first. He soon found out, however, that he had a large fish on his line, and after quite a struggle succeeded in beaching the bass, weighing 3¾lbs. His mother was near by, and after he had committed his big fish to her safe keeping, he threw in again with another sunfish and caught the 3 lb. bass.

At the lower end of the lake, which is the shoalest, the majority of the fish are caught still-fishing, while at the upper end the most popular method just now seems to be casting with a frog from a boat in toward shore at a distance of 60 or 80ft. The upper end of the lake is an ideal bass water, with sharply shelving shores of shingle, frequently diversified by rocky points and ledges. The scenery at this end is particularly wild and attractive.

My wife and I amused ourselves on our journey up and down the lake by trolling, and hooked seven fish in all, six bass and one pickerel. Three of the bass succeeded in shaking the spoon from their jaws before they could be boated, and so escaped, but the others were not so fortunate. Our largest weighed an even 2lbs. B.

### Buzzard's Bay Fishing.

STRIPED bass continue to be taken in small numbers at Woods Holl. During the last week of August the following captures were made: Oliver Grinnell 2 weighing 8lbs. each, 1 of 14lbs., 1 of 15lbs. Charles Grinnell, Jr., 1 weighing 8lbs.; Frank Gifford took 3 weighing 12, 14 and 14½lbs. respectively. On the morning of Sept. 2 Oliver Grinnell captured a fine 16 pounder by trolling at the surface. All of the others were taken by bottom fishing with cut menhaden for bait, on the Pine Island side of the "Hole." Eel-tail, so much relied upon heretofore, proved far less killing than the oily and fragrant bonyfish, usually styled menhaden. Young menhaden are schooling around the shores in vast numbers; they range in length from two to five inches. In Acushnet River, New Bedford, the small bluefish are driving them up stream into fresh water in company with small weakfish. Adult menhaden are still remarkably scarce, so much so as almost to stop hook and line fishing. There are plenty of fine sea bass and scup in Vineyard Sound and Buzzard's Bay, not far off, if only the necessary bait could be obtained to make their capture possible. Adult bluefish are plentiful, but the absence of bait prevents anglers from taking them.—T. H. B. (Sept. 1.)

### Salmon Feeding in Fresh Water.

OFFICE OF THE PRESIDENT, Leland Stanford Junior University, Palo Alto, Cal., Aug. 29.—*Editor Forest and Stream:* Referring to the question of the salmon feeding when in the fresh-water rivers, I have received the following in a private letter from a friend who is a captain in the United States Army, an enthusiastic sportsman, and widely acquainted with the rivers of the West:

"By the way, I see that all people are not willing to believe that salmon discard their haversacks at the mouth of the Columbia. Twenty-five years ago over near the Idaho line in Oregon I made as careful an investigation as could be made with a rod and rifle. On a stretch of several hundred yards of the Malhew River the water was almost constantly broken by salmon, as I thought feeding. I worked the stream with everything I had in the way of flies, but never got a rise. In the morning I tried with a rifle and very soon succeeded in shooting a fish at least 40in. long. His stomach contained nothing excepting a little slime. I had just such an experience in 1879 in the Lemhi River in Idaho." DAVID S. JORDAN.

### Large Susquehanna Bass.

BAINBRIDGE, Pa.—What was perhaps one of the largest, if not the largest, black bass ever taken in the Susquehanna River, was caught at the Aqueduct. Juniata River, two years ago by Mr. Jacob Hess, of Harrisburg. Mr. Hess and another gentleman had been out fishing and had just pulled into the mouth of a small creek for the purpose of eating their lunch. They had left the lines trailing out into the water from their boat and had barely gotten off when one of the reels gave warning that a line was running out. Mr. H. hastened to the scene of action and after considerable difficulty succeeded in landing the monster bass. Owing to the wonderful strength of the fish it is doubtful that a capture could have been effected but for the fact that the shore gave the anglers a chance to work him in and strand him. STEHMAN HERR.

### Shenandoah Bass.

CLARK COUNTY, Va.—There is plenty of black bass in the Shenandoah River, Clark county, Va. The fishing here is very good. Very few trout are to be found, although the natural streams are present. The cause of this absence of trout comes from the habit of netting the brooks. The nets are held at the openings of the temporary fish dams ann the trout are driven into them and thus destroyed. Gray and fox squirrels are quite plentiful, and partridges (quail) afford very good sport in the proper season. SCALES.

### The Cascapedia.

I HAD two very good days fishing on the Grand Cascapedia this year, and in one afternoon, not fishing the middle of the day, I took 26 fish, 10 of the largest aggregating 30lbs. in weight. This was not a bad average. A year ago on the same stream, on Fourth of July morning, I caught a 5½lbs. trout, and soon after caught two fish (as I was fishing with two flies) that after a long struggle I brought to the beach and found to weigh 7½lbs., one 3½ and the other 4lbs. W. B. MERSHON.

## Forest and Stream's Fishing Postals.

"DROP US A LINE" ON A POSTAL CARD.

Fishing News, Place to Catch Fish, Fish Caught, Fishing Incidents.

PORT ROYAL, S. C., Sept. 2.—Says the Philosopher to the Scissors Grinder, "Do tell me your little story." Says the Grinder to the Philosopher, "Lord bless you sir, I haven't any story to tell." Says the FOREST AND STREAM to the once upon a time angler, "Drop us a line and spin us a fish story." Says the Ancient Angler, "If I do, it will be the first line I've dropped in the cause of fish and fishing for over two years. For there's nothing worthy of the name in this vicinity. In spring there was drum-fishing, which I despise; then come sheep-head and whiting, but you can only fish on turn of tide, and either it is then night or too early in the morning, or if in daytime too hot, and fun is not in it. So unless I draw on memory or imagination, I cannot fill the bill. PISECO.

PHILADELPHIA, Sept. 5.—The fishing at the banks, off Anglesea, N. J., is good at present. On Sept. 4 my catch amounted to 30lbs. in an hour's fishing, none of the fish weighing under 1½lbs. and principally sea bass. Porgies were also taken in quantity, and a few flounders. The inside fishing this year has been very poor along the Jersey coast, such places as Corson's and Townsend's Inlets, which are noted places, yielding but little. Weakfish are very scarce. W. J. F.

HUDSON, N. Y., Aug. 30.—The catch of black bass and wall-eyed pike at Copake Lake has been larger this season than ever before. The local fishermen having been on hand all the time, and among the visitors from abroad was Mr. Stillman, of Hartford, Conn., who surprised the natives by the number and size of fish taken. One remarked, "Gee, gosh, all Friday, can't he snake them in!" H.

WEST DULUTH, Minn., Aug. 30.—On Sept. 19 a party of six from here go to Fleming Lake, in Aitkin county, for a week's black bass fishing. If "O. O. S." wishes to try his luck with us on this trip he will be made welcome. We expect to take some big fish, and will go prepared for a good time. EDWARD J. LUTHER.

### Batchewang Trout.

SAULT STE. MARIE, Mich., Aug. 20.—*Editor Forest and Stream:* Peter Blue, of this place, a youth of 18 years, caught a few days ago, while fishing on the north shore of Lake Superior, twelve brook trout that averaged 5lbs. They were taken in Batchewang River, which empties into the bay of that name, and were doubtless seeking their spawning beds. I hope the merit of the capture of those large and ever beautiful game fish will not be greatly depreciated when I state they were all taken with the wriggling angle worm. The adolescent angler doubtless had a world of pleasure with these iridescent idols of the crystal stream, but if he ever learns the artistic lesson of the guild, winning his triumphs alone with the alluring fly, he will never, we opine, revert to his present capture of which he is now so very proud. Many an angler would have felt like forfeiting his chance for paradise to have coaxed such scarlet-dyed beauties to a banquet of the flies, for it would have been to him a very heaven of delight, a triumph ever filling him with endless emotions so infinitely pleasurable.

ALEX STARBUCK.

### Fishing Near Hallock.

HALLOCK, Minn., Aug. 20.—There has not been the amount of fish caught in the smaller streams of Kittson county for years that there is this season, and the principal reason is because Dr. H. F. Yorke, the game and fish warden, has invaded upon the nets that have been continually stretched across the rivers at different points. To day pickerel, pike and an occasional bass are found, and they are large, fine fellows and make a very nice change of diet for our people. The bass is a new comer since last year. His appearance is unaccountable, as none of his kind have been introduced to this part of the country.—E. H. L.

### Newfoundland Waters.

HARBOR GRACE, Newfoundland, Aug. 25.—Have just returned from a week's fishing on the Hall's Bay line railway. At Southwest Arm, Clode Sound, had grand sport—trout ranging from 1½lbs. to 4½lbs. Any of your friends wanting good sport next year should try Newfoundland. There are several grand salmon and trout rivers opened up and are easy of access now this road is built. Time for catching those large trout is from July 15 till Sept. 1, when close season commences. T. R. B.

## FIXTURES.

### DOG SHOWS.

Sept. 12 to 16.—Fourth Annual Dog Show of the Toronto Industrial Exhibition Association, at Toronto, Canada. C. A. Stone, Sec'y.

Sept. 19 to 22.—Third Annual Dog Show of the Kingston Kennel Club, at Kingston, Canada. H. C. Bates, Sec'y.

Sept. 20 to 23.—Western Michigan Kennel Club, at Grand Rapids Mich. H. Dale Adams, Galesburg, Mich., Superintendent.

Sept. 26 to 30.—Rochester Kennel Club, at Rochester, N. Y. Dr. O. S. Bamber, Sec'y.

Sept. 27 to 30.—Dog Show at Ottawa, Can. Alfred Geddes, Sec'y.

Oct. 25 to 28.—Omaha Kennel Club, at Omaha, Neb. E. L. Marston, Sec'y.

Nov. 22 to 25.—Brooklyn. H. W. Huntington, Sec'y, 148 South Eighth street.

1893.

Jan. 5.—Gloversville, N. Y. F. B. Zimmer, Sec'y.

Feb. 21 to 22.—Westminster Kennel Club, New York city. Jas. Mortimer, Supt.

June 13 to 17.—World's Fair, Chicago.

Sept. 7 to 10.—Hamilton, Ontario. A. D. Stewart, Sec'y.

### FIELD TRIALS.

Oct. 25.—Third Annual Field Trials of the National Beagle Club, at Nanuet, N. Y. Bench show of the club Oct. 24. H. V. Jamieson, Sec'y.

Nov. 7.—International Field Trials Club, third annual trials, at Chatham, Ont. Amateur Stake, Nov. 7. Open Stakes, Nov. 8. W. B Wells, Sec'y.

Nov 7.—United States Field Trials, at Elizabethtown, Ky. P. T. Madison, Indianapolis, Ind., Sec'y.

Nov. 8.—New England Field Trials, at Assonet, Mass. E. Knight Sperry, New Haven, Conn., Sec'y.

Nov. 14.—Fourth Annual Trials of the Brunswick Fur Club, at Princeton, Mass. J. H. Baird, Sec'y.

Nov. 15.—American Field Trials, at Columbus, Ind. W. J. Beck, Sec'y.

Nov. 21.—Eastern Field Trial Club Trials, at High Point, N. C. W. A. Coster, Sec'y.

Nov. 28.—Philadelphia Kennel Club Trials, at High Point, N. C. F. G. Taylor, Sec'y.

Dec. 5.—Central Field Trials, at Lexington, N. C. Col. Odell, Sec'y.

Dec. 19.—Irish Setter Field Trials, at Lexington, N. C. Dr. G. G. Davis, Philadelphia, Pa., Sec'y.

1893.

January.—Pacific Coast Field Trials, at Bakersville, Cal. J. M. Kilgarif, Sec'y.

Feb 8.—Southern Field Trials, at New Albany, Miss. T. M. Brumby, Sec'y.

## THE MANITOBA FIELD TRIALS.

### THE DERBY.

THE trials began on Wednesday, Aug. 31, at Morris, Man., as advertised. Chickens were said to be in such great abundance before the trials that but little searching was required to find them, and that therefore they were too plentiful for a trial; but during the running they were none too plentiful, and it taxed the searching and finding abilities of the dogs to make a good showing.

The grounds are excellent for the purposes of a field trial; the accommodations are comfortably good, and there are plenty of birds for field trial purposes. The town is situated about 28 miles from the boundary line, on the Canadian Pacific and Northern Pacific railroads, on the Red River. It is built on the prairie, so that the shooting begins from the outskirts, and as it is but a small town, the grounds are but a few hundred yards from the hotel.

The prairie is interspersed with growths of bushes here and there, varying in width from a mere clump to 100 or more yards in diameter, and they are favorite haunts of the birds during the midday hours. In the morning hours up to 10 or 11 o'clock, and from 4 o'clock till night, they are found on the prairie and wheat fields, some of the latter being very large, and afford good feeding grounds for the birds.

Mr. W. Tallman did the judging and gave general satisfaction. He managed the running skilfully, and his decisions were well received.

This Derby was a most difficult stake to judge, the work varying from good and bad to indifferent, and many errors of the dogs added to the complications. Hardly a single dog in the stake worked with any uniformity. Mr. Tallman gave them ample time and opportunity to exhibit their capabilities. He was very painstaking in arriving at correct decisions.

The club held a meeting on the evening of Aug. 31. It has a membership of about 100. Two more, Messrs. G. W. Harrison and J. W. Roberts, both of Souris, Man., were elected to membership. The rules were changed to make them conform to the requirements of the spotting system, instead of the heat system, which required but very little change to accomplish.

The Canadian handlers showed excellent skill, and obedient dogs which ranged with self-confidence. Their quiet and fair handling was admirable and would be an improving model for many handlers in the States to copy.

It is an utter impossibility for a judge to decide with any satisfaction on the qualities of half-broken dogs, and such dogs obstruct the interests of all competitors.

All field trials rules should give the judge power to withhold prizes on account of want of merit. No dog is a high-class dog which will not take the necessary training, and no dog is fitted for a competition which cannot be handled in the usual manner.

Although the trials were run during the close season, the club had legal permission to shoot twenty birds by a special act of Government, as the following will show:

PROVINCE OF MANITOBA.

GAME LICENSE TO THE MANITOBA FIELD TRIALS CLUB.

Under and by virtue of the authority of Section 1 of an act to amend the Game Protection Act, 1892, permission is hereby granted to the Manitoba Field Trials Club, a limited number of chickens to shoot, take, hunt and kill not to exceed twenty, within the Province of Manitoba, at their annual trial for the year 1892, in conformity with the provisions of the said act.

Given under my hand at the Department of Agriculture and Immigration in the city of Winnipeg, this 29th day of August, 1892. (Signed) THOS. GREENWAY,

Minister of Agriculture, Statistics and Health.

H. MCKELLAR, City Clerk.

The high standing and influence of the club can be no better evidenced than by such a document.

The secretary, Mr. A. Holloway, was absent in consequence of ill health. Mr. E. D. Adams, of Winnipeg, attended to the details of the office with skill and promptness.

The winners of first and third are owned by J. M. Avent and Bayard Thayer. The work of both dogs was marred by disobedience and unfinished training. Both go with dash and vim, point well, but they did not always locate their birds with the best of judgment and made many errors; their range also was faulty, being mixed, wide and close, regardless of the grounds, and often they cast back and worked behind their handlers.

The pointer dog Alberta Joe, winner of second, was by far the best worker in the stake in every respect, and really beat himself in his last heat by jealousy, persistent refusal to back and errors in work on birds. Taken all in all, I believe he was the best dog in the stake on the work done, but there were so many errors on his part toward the last that he could with good reason be placed second. On the other hand, the others had plenty of errors as well. Joe

exhibited very clean, intelligent work in his first heat, ranging wide, with excellent judgment and proved himself a good finder, and skilful in pointing the birds when found. Had his handler been more experienced in the nice points of field trial handling his dog would have won easily. Joe is nicely broken with the one exception of backing, and his handler, observing conscientiously what he thought the rules and fair play required, permitted his dog to go by the pointing dog without any effort to restrain him.

The spirit of fair play and a desire to see the best dogs win were predominant with every member. Every move was characterized by the greatest consideration for fairness to all, and every member present showed himself a gentleman sportsman.

Following is a list of the Derby entries:

J. M. Avent and Bayard Thayer's black, white and tan dog Kingston (Chance—Bessie Avent)

*with*

L. W. Smith's black, white and tan bitch Fair Chatham (Chatham—Babe W.).

---

J. M. Avent and Bayard Thayer's black and white dog Bonia (Rod—Juno A.)

*with*

F. H. Perry and John Switzer's Irish setter bitch Hawkeye Queen (Claremont Patsy—Nora of Claremont).

---

J. M. Avent and Bayard Thayer's black, white and tan dog Lochinvar (Chance—Bessie Avent)

*with*

John Sharples's liver and white pointer dog Alberta Joe (Ightfield Upson—Ightfield Blythe).

---

F. H. Perry and B. G. Odione's Irish setter bitch Claremont Clara (Claremont Patsy—Claremont Glencho)

*with*

John Sharples's liver and white ticked pointer bitch Alberta Ruby (Ightfield Upson—Ightfield Blythe).

---

The Irish setters made a most excellent showing, ranging wide at good speed, but need more experience on birds.

The starters were not so many as there would have been had there not been malicious influences at work against the club's success. Of this, more later.

Besides those mentioned hereinafter there were present at the trials Messrs. W. F. Ellis, D. M. Telford, J. Wootton and Samuel Beckett, who has judged the club's trials in previous years, and others.

### Wednesday.

Wednesday was very favorable for good work. A stiff and steady wind blew from the south. The temperature was about right for comfort and good work. Chickens were found in sufficient numbers to test the dogs satisfactorily. Taken as a whole the work done during the forenoon was of an ordinary mixed grade of good, bad and indifferent. However, a high order of skillful work was necessary to secure good results as the chickens showed some wildness and flushed easily.

An effort was made to work the dogs up wind as much as possible, but it is of no importance whatever in hunting for bevies, except at such times as a dog quarters his ground in mathematical lines. Later, the dogs were worked regardless of the wind. A dog which ranges well according to his own judgment will beat out his ground quite as well when the course of the shooter is down wind as when it is up wind.

THE DERBY—*First Series.*

KINGSTON—FAN CHATHAM.—They were started at 7:49 in the open prairie. Kingston was handled by J. M. Avent and was troubled with a sore foot which made a slight difference in his running. Fan was handled by L. W. Smith. Soon after being cast off, Fan drew accurately to a point on a bevy. She held her point for a few moments then abandoned it and worked to one side, feeling for scent. The chickens flushed wild. King had taken a cast out of sight and was not found for several minutes. Sent on, King false-pointed, and Fan backed indifferently. Fan next drew nicely to a point on a single bird which flushed wild ahead of her before the handler could walk up to her. Sent on, she roaded again and a single bird flushed wild ahead of her. King a moment afterward pointed. Fan drew to a flush on a single and soon afterward King drew to a point on one; a short distance from there he pointed another. While both were making game, a single flushed wild ahead. Fan next drew accurately to a good point on a single bird in grass. The dogs were ordered up at 8:20. There was no sharp, nice work in the heat; in fact, the work was awkward and lacked finish. King did not go to running birds with promptness, and ranged irregularly, very wide or close and beat out his ground without exercising much judgment. Fan showed a good nose and judgment in drawing and pointing, but the latter was done in a listless manner. She did not range above moderately well.

BONIA—HAWKEYE QUEEN.—They were started at 8:25, the former handled by J. M. Avent, the latter by W. Pickering. The heat was a poor one. Queen ranged wide and with judgment, but her performance on birds was limited, considering the opportunities. Bonia did not show any finished, accurate work, and was disposed to point on false scent or footscent. His first work was a flush on an outlying bird, then he took a short turn and pointed a single; as his handler walked up he moved forward a few steps and the bird flushed just as he stopped. At the same time Queen and her handler flushed the rest of the bevy. Bonia roaded and pointed, then took a turn and flushed the bird. He next false pointed and Queen backed him well. The dogs were watered. Bonia false-pointed again and Queen drew in to his point, refusing to back, which was in a measure excusable in consequence of having been deceived by a false point and indecision. Sent on, Bonia pointed a bevy and Queen backed fairly well. This was the first good piece of work done in the heat. Queen had the better range but she had no find. The heat was ordinary. The dogs were ordered up at 9:05. Bonia showed good speed, but his range was irregular and lacked judgment.

LOCHINVAR—ALBERTA JOE.—J. M. Avent handled the former, J. Sharples the latter. The heat began at 9:13. Both dogs showed range and spirit. Loch false-pointed and Joe backed apparently or stopped to scent. Sent on Joe showed decidedly the better range and judgment. He pointed three birds and Loch backed, but required cautioning to hold it. Sent on Loch took a cast down wind about 100yds., got wind of the rest of the bevy and pointed them. Sent on, he going at speed, soon flushed a bird and chased it, but stopped finally to order, then ran to the wagon close by. He was mildly punished, but it seemed to cool his ardor through the rest of the heat. Again sent on Joe was doing some grand ranging, and carried himself stylishly. He soon dropped to a point on a bevy and held it well. The birds flushed wild some yards ahead as the handlers walked up. Sent on Joe soon dropped to a point and nothing apparently was found to it. Sent on about 100yds. ahead of where Joe pointed, Loch flushed a single bird, which probably had run from Joe's point. Next, Loch roaded a bird to a flush close by the handlers. Joe taking a long cast at the same time flushed a bird across wind. At 9:47 the heat ended. The work done was the best of the forenoon. Joe showed a high class quality of Derby work and was easily ahead of everything in the stake on the work so far done. Loch showed excellent quality, but wanted more experience and finish. Joe's worst fault was in dropping to his points, a trifling matter as compared to the quality of his superior work.

CLAREMONT CLARA—ALBERTA RUBY.—The former was handled by W. Pickering, the latter by John Sharples. They were started at 9:55 and ran about twenty minutes without finding, when they were watered and again sent on. Ruby flushed two birds excusably down wind. They were taken up at 10:38, and carried to scrubs near by where a bevy had been marked down. Ruby pointed the bevy. Clara coming in close by stopped to an uncertain point, and a single flushed close to her. Both were running together a great deal and watching each other. Ruby showed the most independence and ranged the wider, in fact showed a very superior range. Some bungling work was done on scattered birds in the bushes. At 10:45 Clara was sent on working alone till 11:01. She ranged well, but found nothing and made a false point. The running was then suspended till after dinner and the party went to town.

A rest of several hours was taken on account of the midday weather.

*Second Series.*

The judge retained six dogs to try conclusions again, the work in the first series being too unsatisfactory to form an opinion of the dogs' relative standing. Those selected were Bonia, Alberta Joe, Kingston, Alberta Ruby, Hawkeye Queen and Lochinvar.

BONIA—ALBERTA JOE.—They started at 2:55. Joe started slowly at his work, but soon increased his pace and range and was taking as good casts as in the morning. Bon soon pointed a single. Joe came in down wind, refused to back and joined in the point. The bird was flushed to one side a few yards away. The weather was so warm that the dogs were taken up at 3:13. The party rested and no more work was done until 4:25, when the dogs were again started. Bonia had an unpleasant habit of turning in at the ends of his casts and working behind his handler. Joe pointed a bevy across wind, and Bonia, coming in, came through the bevy and backed. Sent on, Bonia flushed a remaining bird; and, 50yds. further on, Joe flushed a bird down wind. After some ranging, Joe struck foot scent and roaded, but his handler urged him on. He then took a cast, came back and roaded accurately to a flush. Next each flushed. They were ordered up at 4:36 to be put down again later.

KINGSTON—ALBERTA RUBY.—At 4:40 they began their heat. King soon took a long cast to the rear and beat out the ground to and fro from a quarter to a half mile or more away and quit working to the gun for fully ten minutes, ignoring the whistle, whereupon Mr. Avent mounted a horse, rode to him and brought him back. The heat was then resumed. King pointed three birds, and being urged on he flushed. At the same time Ruby, across a hollow 100yds. away, pointed; nothing found. The dogs were brought together and started. Ruby flushed one on stubble, and dropped as two more flushed. Moved on. King pointed and Ruby drew in and took the point. The bird was flushed some yards ahead. Ruby next pointed a single bird. Ruby ranged well and showed good speed. The heat was a poor one, being but ordinarily good in small parts.

HAWKEYE QUEEN—LOCHINVAR.—They started at 5:30. This, too, was a poor heat, unfinished, fragmentary work predominating. Queen pointed at the edge of a stubble and Loch coming in to call, ran into the bevy, which was down wind of Queen, and flushed it. He showed an inclination to chase but stopped to caution, which disturbed Queen and she left her point. She resumed her point afterward and roaded to a flush on a single on the stubble. Next she pointed and was backed. Her handler failing to flush ordered her on, and the bird was afterward flushed about 10yds. from where she pointed. Loch was disobedient and difficult to handle. Up at 5:24 with no chance of either winning.

BONIA—ALBERTA JOE.—They were again cast off at 5:30 Quite a long search was made before finding. Joe pointed where a bird flushed wild. Next he made a partially excusable flush on the stubble. Next, Bonia pointed and Joe refused to back and took the point. He apparently was getting more jealous and made no pretext of backing. He was not getting off his nose, if his power of recognizing scent and going to the birds was any criterion by which to judge. He was showing jealousy and carelessness, and his handler was urging him too much. Sent on, Bonia again pointed. Joe refused to back, took the point, drew on and flushed the bird. Avent killed. Up at 5:45. Joe pointed a bird just as the heat ended.

This finished the stake and the work for the day.

The judge after a few minutes' consideration announced the winners as follows:

First, Bonia; second, Alberta Joe; third, Kingston.

The prizes in the Derby were $150 to first, $90 to second, $60 to third. To non-members the entry fee was $5 to enter, $10 additional to start. To members, $3 and $5. Entries closed July 1.

---

## THE ALL-AGE STAKE.

This stake began on Thursday morning. There were 13 starters. The quality of the work done was very good as a whole, some of it superior.

Mr. Tallman handled the running with skill, and determined the winners with correctness and good judgment, giving the greatest satisfaction.

This stake was open to the world, and even first winners at the great trials were not barred. So far as the trials of this year are concerned, these liberal conditions made no difference; but there is a possibility that such a liberal policy, if followed in the future, will work against the best interests of the club and the competitors. There are certain important matters of revenue which every club has to consider and should consider, to sustain it with as little deficit as possible. With an all-aged stake open to the world, there is a possibility that there might be so many first prize winners entered in future stakes that there would not be the slightest chance for amateurs, consequently they would not enter their dogs. The necessity of barring first prize winners from all-aged stakes has been demonstrated at the larger trials. It cuts down the clubs' revenues if they are not barred.

Duke of Manitoba, the winner of first, made an excellent showing and won his honors most thoroughly. His work was regular and good. He exhibited excellent finding qualities and located his birds with judgment and promptness. He had good style, a most pleasant disposition and perfect obedience. He showed a slight degree of over-training once in awhile by looking to his handler for a signal to indicate the direction in which to hunt, a fault not habitual and very easily remedied.

Bettye S., the second prize winner, is well known in the history of field trials.

Novelist, third, showed a very superior order of ranging and good judgment in her work. She maintained a uniform rate of good speed, and performed fairly well on birds. In ranging with judgment, she was superior to Bettye S. She was the winner of the All-Aged Stakes of the club's trials last year.

The trials were a success and deserve the support of all sportsmen. A scrupulous spirit of fair play was observable in every move of the management, as could not be otherwise when such true gentlemen and true sportsmen were in charge. There can not be too many such clubs if they comprise similar memberships.

Following is the list of starters:

L. W. Smith's black, white and tan setter bitch Atlanta (Jean Val Jean— ——)

*with*

John Woolton's black and white dog Dick Bondhu II. (A. 19,061).

J. M. Avent and Bayard Thayer's black, white and tan setter bitch Novelist (Woodhull's Bruce — Llewellin's Novelty)

*with*

P. A. McDonald's white and black setter dog Roy.

---

F. H. Brydges's brown and white pointer bitch Daisy

*with*

J. M. Avent and Bayard Thayer's black, white and tan setter bitch Bettye S. (Roderigo—Bo-Peep).

---

J. D. McMurry's white and lemon bitch Belle

*with*

J. M. Avent and Bayard Thayer's black, white and tan setter dog Rupert (Roderigo—Bo Peep).

---

J. A. Telford's blue belton setter dog Grouse (Brant—Lill).

*with*

W. F. Ellis's black, white and tan setter dog Duke of Manitoba (A. 24,724).

---

W. F. Ellis's lemon and white English setter bitch Cora

*with*

J. M. Avent and Bayard Thayer's black, white and tan dog Orlando (Roderigo—Bo-Peep).

---

E. D. Adams's liver and white setter dog Shot (Frost II.—Dime), a bye.

About a dozen birds were killed during the trials. It was most conclusively demonstrated that most successful trials can be held on chickens in Manitoba. There are birds in sufficient numbers to test the dogs, there are the best of grounds and the climate is most favorable for work, conditions which did not always prevail at the chicken trials held in the States in the 70s and 80s. Such trials are very conclusive tests of a dog's merit, much more so than trials on quails commonly are. They also show that when a dog is absent a long time he is not always pointing.

### Thursday.

The day opened with some signs of rain, but as the sun rose higher the weather cleared up and the temperature gradually became warmer. A steady mild south wind blew till about midday, when it died away and the weather was then close and sultry and distressing for the dogs to work. There was a tiresome delay in getting the dogs started. Mr. Smith, in making an early start ahead of the party, by some misunderstanding got into the wrong place. Mr. Avent thought that his competition began in the third heat, when it began in the second, thus there was a delay of forty-nine minutes, added to a late start, which everybody endured as patiently or impatiently as they pleased.

*First Series.*

NOVELIST—ROY.—As the first brace could not be started owing to the absence of Mr. Smith and Atlanta, this brace was started. J. M. Avent handled Novelist and W. Pickering handled Roy. Novelist took wide casts from the start, working out her ground nicely to the gun. One, a long cast, was to a stubble, she flushed an outlying bird and dropped to wing. She remained down. Roy backed her, then moved on and flushed a single. Avent flushed the rest of the birds, shot and killed. Both dogs were steady. Roy made two flushes on the stubble. Novelist, in the meantime, pointed, drew on forty yards and pointed the birds. Roy backed, Avent killed and both dogs were steady. They were ordered up at 8:27. Novelist's work on birds was a bit faulty.

ATLANTA—DICK BONDHU.—They began at 8:31. The former was handled by L. W. Smith, the latter by John Woolton. Atlanta flushed three times in succession, twice excusably across wind and once up wind. Atlanta next pointed up wind of a single and Dick backed. Atlanta moved on and Dick went up and pointed the bird. He was steady to shot. Next he flushed across wind in stubble They were ordered up at 8:59, just as Atlanta pointed and a single bird flushed a long distance ahead. The work on birds was very imperfect. Atlanta showed a fair range only. Dick ranged too close, but was diligent and showed good judgment.

DAISY—BETTYE S.—They started at 9:30 and ran seventeen minutes when they were watered. The former was handled by W. Pickering, the latter by J. M. Avent. Each flushed a single across wind. On stubble, Bettye drew to a flush on a single bird and dropped to wing, a poor piece of work. Both ranged wide and at good speed, but showed poor judgment, and their performance on birds was also poor.

BELLE—RUPERT.—W. Pickering handled Belle, J. M. Avent handled Rupert. They were cast off at 9:30. Belle, behind a clump of bushes, flushed a bevy or pointed just as it flushed. She was concealed by the bushes and it could not be determined what she had done. Moved on after the same bevy in the open. Rupert pointed it and Belle backed or pointed. Both were steady to shot. They were worked on the scattered birds. Belle, at edge of the bushes, pointed and the bird flushed wild in the bushes. A number of opportunities were offered for good work on the scattered birds, but the handlers crowded their dogs so hard that they made errors and the work was broken and unsatisfactory. At 9:59 they were watered and sent on. Next, Belle pointed and was backed. Nothing found. The heat ended at 10:11. Rupert had a slight advantage in speed. Belle made wider casts. Both mads a poor showing on birds. They were urged too much by their handlers at times to do good work, but they fell far short of their opportunities.

GROUSE—DUKE OF MANITOBA.—J. A. Telford handled the former, W. F. Ellis the latter. They began at 5:04, the intervening time having been passed in town, the weather being close and oppressive. It was still sultry and very trying to the dogs. Duke ranged wide and well from the start. Grouse was working diligently but his range was only medium. He pointed a single nicely in grass and Duke backed or pointed near him when called in. Sent on, Grouse showed signs of distress soon and began to let up in his work. Duke pointed a bevy nicely. He broke shot when the bird was killed. Up at 5:27. Duke beat out his ground with rare judgment and worked his birds skilfully. He was perfectly obedient to command and signal and showed a sweet disposition.

CORA—ORLANDO.—Mr. Ellis handled Cora, Mr. Avent, Orlando. They began at 5:34. Orlando made a very long cast, too long for practical work, and pointed a bevy. A single bird of it flushed. He drew forward a few steps and pointed again. Some more flushed. He moved in, got identified closely with the proceedings for several minutes, flushing, over an area of several acres, different lots of chickens, utterly ruining his chances. He flushed six different times, singles and more. Rarely was such a disturbance created among peaceful chickens by a dog, and there seemed to be lots of them, although much alarmed. Sent on again, he pointed a bird about 300yds. away, drew in on it and flushed. Cora made game, pointed a single and was steady to shot. The heat ended at 6:01. Cora was not a wide ranger, but was cunning in her work on birds. Orlando was too much out of control to know much about his work otherwise.

SHOT—ATLANTA.—The former had the bye. He was handled by W. Pickering. The heat began at 6:10 and ended at 6:41. Atlanta had the wider range. Both showed faulty work on birds, though having plenty of opportunities. Atlanta was particularly faulty in locating running birds. She broke shot wildly once. This ended the running for the day.

The judge in the evening announced that six dogs would remain in, namely, Atlanta, Novelist, Bettye S., Duke of Manitoba, Rupert and Cora.

Friday.

*Second Series.*

The morning was cloudy and there was a cool northwest wind. A thunderstorm the night before had cooled the air and there was more moisture. The morning was a fine one for work on chickens, and some very good work was done. The heats were most satisfactorily and skillfully conducted.

ATLANTA—NOVELIST.—They began work at 7:23. Novelist ranged wide, beat out her ground with excellent judgment, and worked to the gun nicely and quietly. She was first to point, and Atlanta, 50yds. away, backed handsomely. Novelist drew on, pointing and roading till she established a point on the bevy. Both were steady to shot. Sent on, Novelist pointed a remaining bird. Next, she was roading when Atlanta, casting across ahead pointed the bird, which flushed wild. Searching for another bevy, Atlanta pointed and Novelist backed. The birds flushed as handler walked up. They were then cast off on stubble. Novelist roaded and flushed a bird across wind and dropped to wing. Her handler flushed a bevy ahead of her. Novelist flushed a bird across wind and Atlanta pointed one nicely. The latter showed indecision in work on birds and pottered at times. Novelist was faulty in her work on birds, although not bad. Her work otherwise was excellent.

BETTYE S.—DUKE OF MANITOBA.—They were started at 8:06. Duke made game and both stopped to a point at about the same time close to each other. Duke drew on accurately to a point on the bevy while Bettye held her point on foot scent. The birds flushed wild far ahead. Both were steady to shot. Next, Bettye and Duke both pointed a single. The birds were followed. Duke pointed the bevy, and it was flushed one or two at a time. Bettye pointed a single, after which the dogs were watered and again sent on. Bettye pointed a bird and Duke backed prettily. Duke pointed next where a single flushed wild a while before. Next, both at the same time roaded to a point on foot scent where birds had flushed wild. Sent on. Duke pointed a lark. He next roaded to a point where the bird had flushed wild. Near bushes Duke flushed a single and Bettye dropped to a point on one. Sent on, she soon pointed; nothing found. At 8:45 they were again watered. Sent on, Duke found and pointed a bevy stylishly. Sent on, he again drew nicely to a point on a bevy. Bettye flushed two remaining birds excusably and pointed one. At the same time Duke, 100 yards away, pointed a single. He showed a higher class of work in every way, handling his birds with skill and accuracy, and exhibiting excellent ranging. All his work was governed by good judgment. He looked to his handler for orders at intervals, but his general work was independent.

RUPERT—CORA.—They began at 9:16. Cora showed good judgment and roaded and pointed well. She also showed good judgment in her range, which was of medium width, and located and pointed her birds well. Her speed was fairly good. Rupert showed good speed, beat out his ground fairly well and made many errors on birds, apparently being off his nose. He required constant directing and prompting in ranging. Each backed well. The heat ended at 9:48.

BETTYE S.—DUKE OF MANITOBA.—They were cast off again at 10:30. Bettye took a long cast down wind. Duke took a cast across wind and pointed. Both roaded up wind, Duke doing the better, Bettye requiring a lot of whistling and assisting to keep her on the trail. It was thought that the dogs were roading up wind on the back trail, so they were cast back down wind. Going up wind again, Bettye flushed the birds on the stubble some yards away from where the trail had been abandoned. She dropped, and as her handler walked up others flushed wild. Sent on, Bettye next flushed a bird and dropped to wing. She pottered about and pointed a bird and was steady to shot. Duke, going across stubble, wheeled to a point as a bevy flushed and was steady. Duke made two points on singles and three flushes, one up wind, the others across wind. Duke pointed a bird, and was steady to shot. The heat then ended; time 11:06. He again beat Bettye most thoroughly in every respect, and displayed very uniform work and good judgment.

The judge soon announced: First, Duke of Manitoba; second, Bettye A.; third, Novelist.

First prize, $150; second, $90; third, $60. Entry fee same as in the Derby. Entries closed Aug. 16.

This concluded the fifth annual trial of the club, a most pleasant and successful meeting; and for the good fellowship, true gentlemanly sportsmanship, fair play and skillful managing it is worthy the emulation of all. B. WATERS.

## POINTS AND FLUSHES FROM MANITOBA.

A brief review and a few words in respect to field trial matters in Manitoba may be pertinent. The patron of the club is Sir Donald A. Smith, governor of the Hudson's Bay Co., vice-president of the Canadian Pacific R. R., and president of the Bank of Montreal. He gave $100 to the club this year, to further field trial interests. The president, Mr. W. F. Ellis, a barrister by profession, is one of the most famous hunters of the Province, famous specially as a mighty hunter of bear, elk and other big game. It was a source of keen regret that illness prevented the popular secretary, Mr. A. Holloway, from attending the trials. The duties of the office have been most efficiently attended to by Mr. E. D. Adams, of the Hudson's Bay Co., whose affability and energy were unvarying. During the running of the All-Aged Stake there were more in attendance. There were Messrs. L. W. Smith, W. F. Ellis, J. Wootton, J. M. Avent, John Sharples, D. M. Telford, E. D. Adams, Wm. Pickering, W. A. Bruette, Samuel Beckett, J. A. Telford and Mr. Ferguson. Mr. Beckett was the owner of the pointer Drake, famous in the history of the pointer and field trials in England.

The club suffered some this year in the way of insufficient support, due to the malicious opposition of parties who were inimical to its interests, the unworthy and unsportsmanlike opposition having its source with a person who was supposed to be an ardent supporter of all true sportsmanship, instead of a peevish obstructionist.

The trouble originated in the acts of the former secretary and treasurer, Mr. Thos. Johnson, of Winnipeg. In the early part of last year, he was instrumental in calling an illegal meeting, at which, in addition, no quorum was present. Some most high-handed acts in the way of cutting off members, electing officers, etc., were done. As the club has about one hundred members, it was virtually an attempt of one man to run the whole club and its business. This was the bolder as the dues of the self-constituted managers were in arrears. It was only when legal proceedings were imminent that Mr. Johnson retreated from his position and gave up the books, which were most carelessly kept and worthless as a history of the club's accounts. He resigned, but owing to some most important reasons his resignation was not accepted and he was expelled. As a result, in a great measure, of his resentment, the Northwestern Field Trial Club owes its existence. So far as forming a club is concerned it is most commendable. It is quite the contrary when persistent and malicious opposition is carried so far as personally to solicit gentlemen to withdraw from membership, to solicit others to refrain from making entries, to persuade handlers not to attend, and to revile it at every opportunity, the more so when it all originated in an injustice to the club. The latter claimed Sept. 6 for the commencement of its trials, and it was so announced through the sporting press. Immediately thereafter the secretary of the new club notified the older club that it claimed the date Sept. 5 for the commencement of its trials, thus coming in conflict with studied malice. The Manitoba Field Trial Club thereupon changed its dates rather than have any unpleasantness. The new club has many members, I am told, some of whom live in the States, and this item may be new and interesting to them, and profitable to the cause of better sportsmanship. B. WATERS.

## GORDONS AT THE NEW ENGLAND TRIALS.

*Editor Forest and Stream:*

The Gordon Setter Club has been endeavoring to arrange with the New England Field Trial Club for separate Gordon field trials and prizes at Assonet, Mass., commencing Nov. 8, but has not succeeded.

President Power, of the N. E. F. T. Club, in a letter to me dated Sept. 1, deemed such a course unwise for his club, at present, for several reasons, among others, "because it would give an unequal advantage to the Gordon setter over the English and Irish setter and pointer which must meet all comers on an equal footing." Also, because of the "necessarily increased time not being at our disposal, for which reason we have abandoned the Amateur Stake, which was strongly advocated by many of our most influential members." He adds, "Personally I am very fond of the Gordon, and hope to see a large number of them at our trials. They ought to do much better work on our New England cover and open than they could do South or West; and I hope you will join us in an effort to have the breed well represented."

So, the Gordon setter must run in the general "All-Age Stake for setters and pointers; prizes, first, $200; second, $100; third, $50. Entries close Nov. 1, 1892; $10 to nominate (which must accompany the entry) and $10 additional to start. For entry blanks, running rules, etc., address E. Knight Sperry, Secretary N. E. F. Trial Club, New Haven, Conn."

As already announced, the Gordon Setter Club has also offered a special prize of $50 cash for the Gordon setter showing the best field work at these Assonet field trials, provided that there are at least three Gordon starters. I will give a special prize of $50 cash for the Gordon setter belonging to a member of our Gordon Setter Club at the time of closing the entries, Nov. 1, which shows the best field work at the same trials. And these special prizes are likely to be increased soon.

I expect to enter two or three Gordons myself, and already hear of three others. Doubtless the list will swell as the matter becomes known to owners of Gordon setters, and there will be a good representation of our favorite at these trials.

As has been said before, "there are many Gordons in the field, in use for private shooting in the Middle and Eastern States; and, as these can be shown at Assonet without the long and expensive journey to the North Carolina trials, it is thought that many can be drawn out, especially as the kind of country calls for the manner of field work that our Northern sportsmen have been accustomed to."

I am informed that the trials will be mostly upon quail, with an occasional woodcock and partridge, and that the country around Assonet is rather more open and less hilly than is usual "up North." The running rules of the New England Field Trial Club more nearly resemble the conditions of an ordinary day's sport than those of the other clubs.

I do not know whether we Gordon owners will ever get a more favorable chance to try our dogs afield with other kinds, and it is earnestly hoped that this opportunity will be embraced by many. With the same effort that has put English and Irish setters and pointers up in public estimation we can, in a few years, put our Gordons alongside any breed. Can we not try it; drop our old animosities and work together for the good of the breed.

In that spirit and with that view the Gordon Setter Club would like to see its old members again on its rolls regardless of past differences.

Let the best Gordon win, no matter of what strain.

JAMES B. BLOSSOM,
President Gordon Setter Club of America.

NEW YORK.

## FLAPS FROM THE BEAVER'S TAIL.

TORONTO, Can.—Mr. C. H. Smith, St. Stephen, N. B., who recently had over two or three Skye terriers, has, I hear, another team on the way. He is disappointed in not having received particulars in time to enter them for Toronto.

Mr. William Brodie, of the Dunbar Kennels, Dunbar, Scotland, arrived here on Tuesday last with a team of 8 dogs. Mr. Brodie is well-known as the owner of the Irish terrier Irish Ambassador. Mr. Brodie judged Glasgow show last year and is well in the run with canine affairs in England, having been a constant visitor and exhibitor at the best shows. He has also frequently reported for the *Stock-Keeper* and has consented to act in that capacity for all classes other than spaniels and terriers at Toronto, for the *Canadian Kennel Gazette*.

On the same boat, S. S. Ontario, also arrived the wire hair fox-terrier Adswood Jim, now in his sixth year, for Mr. S. Munro, London. He will be seen at Toronto.

The secretary of the C. K. C's annual report, which will be read at the annual meeting, has been mailed to each member of the Canadian Kennel Club, and the following extract is sufficient to give the general reader an idea of the state of kennel affairs in Canada at present:

"I am happy to state that the club is flourishing, growing in importance and activity and daily increasing its membership. At this date (Sept. 2) there are 145 members in good standing, and doubtless many more will make good their membership before the close of 1892. Of these no less than eighty-nine have joined since last annual meeting. Membership is distributed over a vast territory, Ontario naturally having the greatest number, followed by Quebec, Manitoba, British Columbia, Nova Scotia, New Brunswick and a few in the United States.

"The finances have been satisfactory, the club having kept expenses within its income. The treasurer will submit his report for your approval. As the financial year begins Jan. 1 and ends Dec. 31, I would suggest that a treasurer's report (audited) from last audit to end of present year be mailed each member as early in January, 1893, as possible, and after that an annual report be mailed early in January in each year. The report of finances tendered at the annual meeting (if held in September) might be received as an interim report.

"The number of registrations, owing to the raising of the standard of qualification, has slightly decreased, but I think the deficit will be fully made up by the large number of dogs now being 'listed' to enable their owners to enter them at the fall shows.

"I regret being unable to report favorably on the removal of the duty imposed on thoroughbred dogs coming into Canada, but if each individual member would make it a point to press the matter with his legislative representative I feel sure the matter would at next adjustment of the tariff be made right. The Canadian Kennel Club is too representative a body to have its claims ignored.

"Prof. Wm. Saunders, Dominion Commissioner to the World's Columbian Exposition, has expressed a desire to be with the members of the club at the annual meeting and will there tender his views as to the terms on which Canadian exhibits will be received." H. B. DONOVAN.

## NEW ENGLAND F. T. C. MEETING.

A MEETING of the board of governors of the New England Field Trial Club was held at 266 Washington street, Boston, Mass., Sept. 1, at 2 o'clock P. M., President Power in the chair. In the absence of the secretary, Mr. George W. Lovell was appointed secretary pro tem. Messrs. Power, Hayward, Tucker, Wells, Clark and Lovell responded to roll call.

Minutes of previous meeting were read and approved. The report of treasurer Wells on the financial condition of the club was very satisfactory and accordingly approved. Messrs. Hayward and Tucker for the committee on grounds and game reported satisfactory progress; report accepted. Voted that Mr. Arthur R. Sharp be added to the committee on grounds and game. It was then voted inexpedient in the matter of petition for additional stakes for the coming trials this year. Messrs. L. Casteret Fenno and P. V. R. Ely, both of Boston, were admitted to membership. The sum of $200 was appropriated and placed at the disposal of the committee on game and grounds to be used at their discretion for the protection of game to Jan. 1, 1893, and 300 printed posters, "Warning to Trespassers" are to be ordered for use on the preserve. At the next regular quarterly meeting, Tuesday, Oct. 4, a club dinner at the Hotel Thorndike will be one of the features. Meeting adjourned at 4:30 P. M.

The question of adding an additional stake, in the above report, refers to the petition of the Gordon Setter Club. Our Gordon setter men would, we think, do well to read a paragraph in last week's "Dog Chat" headed "The Beagle Trials." If the Gordon settter is the dog that he is claimed to be, and what we know to be in some sections on the other side, let their owners ask no odds of any one, but run their dogs, properly trained, for the love of the sport and the good of the breed. There will be little advance made as long as there is this continual cry of separate classes or stakes. The New England Field Trial Club have advertised their stakes open to all without regard to any breed. If the Gordon Setter Club want separate stakes let them have separate trials in the same way that the Irish Setter Club is demonstrating the merits of the red setter.

## MASTIFF NEWS FROM PEORIA.

*Editor Forest and Stream:*

Everything very quiet in this part of the country at present; but after having sent my bitch Sinaloa to Beaufort's Black Prince last spring without result, I feel gratified to report a litter of four, three dogs, sired by Prince, from the same bitch last week. I suppose I might tell you how good they are, but for the life of me I am too much of a novice to tell what a four-day mastiff pup will be. In a year from now can tell you more about them. Ilford Cameo is due to whelp to Ormonde this week, and as she missed when bred in England to Ilford County Member, and also last spring to Ormonde, I think my luck is with me. Also have a half sister to Lady Coleus in whelp to Ormonde and Matilla was bred to Edric.

Have lately added Edric to my stud and think he will be a splendid cross on Ormonde bitches. By the way, I want to tell about the two bitches Cameo and Sinaloa. I wanted to show them at Rockford last December and, of course, fed them pretty high to get up flesh. After Rockford I decided to show at Chicago in February and consequently kept up the feed, landing them in Chicago rather fat. Immediately after the show both came in season and were bred and each bitch missed. I then cut down their feed, reduced them in flesh until both were very thin and at their next season I had no trouble, both bitches proving in whelp. I think Mr. Whitney with his bad luck might make a note of this.

My dogs have always been troubled in summer with flies biting the ears and making them sore. Acting on Ashmont's suggestion that tar soap was good I tried it and found that after the "suds" had been dry an hour or so the flies came as bad as ever; but following out the suggestion of tar I procured some common axle grease and rub it on the ears every three or four days. It works well. To be sure, it makes a gum on the ears, but that is preferable to a raw bleeding sore. CHAS. E. BUNN.

PEORIA, Ill., Aug. 29.

## TO KILL WOODCHUCKS.

*Editor Forest and Stream:*

If "O. W. D.," of Boston, wants to get his woodchucks out of their holes and kill them he had better let smoke alone. Smoke will not go where there is not a draught, and while I have now and then driven them out with smoke, it is an unsatisfactory practice. Naphtha and benzine poured into the holes are better, but they are far from sure, and are expensive.

If the object is to kill the ground hog, a small stick of rendrock attached to a limber birch withe and thrust into the hole as far as possible and there exploded will do the job. But water is the best of all. If no brooks or springs are handy, put two barrels filled with water on a dray and haul it near the hole. Then with a slim, limber withe or sapling get the location of the underground apartments. A woodchuck usually digs straight into a bank, then goes up for a foot or two, and then down at an angle of 45deg. Endeavor to find the place where the hole turns to go down, and dig through the earth to that spot. Pour in the water, and if there is a woodchuck inside he will come up as soon as the hole is full. I have tried it hundreds of times, and never failed, when the woodchuck was at "home."

After he is killed don't throw him away. Skin him and eat him. There is no animal in the world better than a good roasted woodchuck, when rightly cooked. Now, when they are fat, is the time to kill and eat them. H. A. E.

*Editor Forest and Stream:*

Mr. "O. W. D." inquired in the FOREST AND STREAM, of Aug. 25, for a way to drive woodchucks out of their holes that they might be killed by terriers.

A favorite way is to dig a ditch from a nearby pond or brook to the woodchuck's burrow and let the water run into the burrow. When the burrow is too far from water to dig a ditch, three or four barrels of water may be turned into the hole. RAYMOND S. SPEARS.

NORTHWOOD, N. Y.

## GRAND RAPIDS DOG SHOW.

*Editor Forest and Stream:*

I note your comments in last issue regarding the apportionment of prize money discriminating in favor of some classes and would state this was brought about by some of our friends who wished to have their contributions placed in the regular premiums on some classes in order to draw a large entry in those respective classes, rather than to enter them as specials.

CHAS. K. FARMER, Vice-Pres. W. M. K. C.

All entries for the Western Michigan Kennel Club's dog show at Grand Rapids, Mich., Sept. 20, that are postmarked Sept. 10, will be received, although it is hoped that all who can send entries before will do so. H. Dale Adams, Supt., Galesburg, Mich., is the secretary.

# DOG CHAT.

### Kingston Dog Show.

The energetic secretary of the Kingston K. C., Mr. Bates, writes us to this effect: "I wish to remind our friends throughout America that the entries for this dog show close on Monday night of the 12th inst. We have not had that generous response to our request for a large entry list from our American cousins that we expected, especially in view of the fact that in selecting our judges we crossed the line to secure the principal one, and selected another on account of his being one of the American Spaniel Club's judges. We expect the show at Grand Rapids to affect our entry, but if intending exhibitors carefully examine our prize list and that of Grand Rapids, they will find that they will be better off at Kingston, when the large entry fee of $2 for every dog, required at Grand Rapids, is taken into account. Another consideration that should weigh with dogmen is, that when at Kingston they are just half way between Ottawa and Rochester; if they wish to go to Ottawa it means a few hours' run by train, or if they prefer water (as all dogmen do) they can board a passenger steamer and at a nominal price enjoy a most delightful trip through a chain of lakes thickly studded with islands large and small, dressed by Mother Nature in virent garb, offering scenery seldom surpassed in America. If, on the other hand, they wish to recross the line and go to Rochester, a cheap trip across Lake Ontario in a palace steamer is at their command. An important fact that should not be lost sight of is, that Kingston has established a reputation for their dog shows and exhibitors are not running any chances incident to novice management."

### Noted Terriers Arrive in Canada.

Some time since we spoke of Mr. William Brodie, of Dunbar, Scotland, owner of the noted Dunbar Kennels, as coming to this country in the near future. He arrived in Toronto, Can., by the steamship Lake Ontario. Mr. Brodie is known to all Irish terrier men as the owner of the great little dog Irish Ambassador, as well as British Ambassador and Ambassador. He brought with him six dogs that are sure to be appreciated on this side. Two of these, Candour, an Irish terrier bitch, by Bumptious Blazer out of Irish Roll, and Black Earl, a black and tan terrier, by the celebrated sire champion Rob Roy out of Leading Light, by champion Beaconsfield, Mr. Brodie will exhibit at the coming show in Toronto. Candour comes with a big reputation as one of the best shown on other side. Black Earl is now 11 months old. In addition to these Mr. Brodie brought four puppies, two of these Irish terriers, by Irish Ambassador out of Paris; another a collie, by Duke of Clarence out of Polly Dunbar, and the other a St. Bernard of good breeding, by Sir Bedivere out of Plinlimmon stock. These will not be shown. To show what is thought of the Irish Ambassador, Mr. Brodie, it is said, has refused $1,250 for him. We understood at the time we heard of Mr. Brodie's intention to come to this country that this dog would accompany him, and this would have been a treat for our "Irishmen."

### Toronto Dog Show.

The entries for the Toronto dog show closed Sept. 1, and the result must be a gratifying one to the management and especially to the secretary, who, as usual, has left no stone unturned to make the show a success. There are in all, according to the list sent us by Mr. Stone, 578 entries, an increase of seven over last year's list. Mastiffs show an increase, but fox-terriers overtop any previous record, last year's entry being 47. Cocker spaniels show a falling off, and so do the greyhounds, but field spaniels double their number this year, beagles also number more than double. No mention is made of Irish terriers or toy spaniels, so we must consider the list incomplete, especially as Mr. Stone says there are close to 700 entries. Foxhounds show quite an increase, the other classes range about the same. The following is a list of entries by breeds: Mastiffs 23, St. Bernards 53, greyhounds 23, foxhounds 23, pointers 26, English setters 39, Irish setters 36, Gordon setters 21, collies 58, bull-terriers 26, fox-terriers 62, black and tan terriers 18, Bedlington terriers 9, Dandie Dinmont terriers 9, Scotch terriers 7, field spaniels 26, cockers 63, beagles 33, pugs 20; total 578.

### Field Trials on Grouse.

The first public field trials on grouse in Scotland were held Aug. 23 and 24 on Mr. A. P. Heywood Lonsdale's moors in Invernessshire. The trials partook largely of the old style of hunting, and in deference to the many who think that the short spins given the dogs in the English trials are by no means true tests of the dogs' merits. The National Club, therefore, limited the entries in the all-aged stake to 12 entries, so that each brace the first day could be run one hour in the morning and an hour in the afternoon. Four dogs were then to be selected and run an hour and a half each brace on the morning of the second day and an hour in the afternoon. The stake filled with eight nominations. Eventually on the second day Mr. Heywood Lonsdale's Deuce took first prize, though considered lucky; Mr. Arkwright's Aldine Fluke second, and Dom Pedro, owned by Mr. Elias Bishop, and which is said to have done the best work, was placed third.

### Good Bulldogs and Terriers Arrive.

"Don't speak above a whisper," says Frank F. Dole, and then goes on to tell us that his new bull bitch Countess of Norfolk has a litter of six, four bitches and two dogs, by Rustic Swell. At last accounts they are doing well. Mr. Brooks's Dandie Dinmont Amphion arrived safely last Monday, and is a good one, we are told. Mr. Dole also received two of his new bulldogs, Leonidas II. and Lady Venus, all right, but unfortunately his young dog Sam, by Pathfinder, died the first day out from London. Mr. Dole has imported over 300 dogs, but this is the first to die en route, and he is glad it was his own instead of a commission. He expects Sir Rudolph and the other four terriers in time for Toronto. Sir Rudolph is said to be crack-a-jack in the 30lbs. class.

### A Large Litter.

Mr. Ray D. Hill, of Trenton, N. J., writes us that his St. Bernard bitch Empress of Josephine whelped Aug. 12 sixteen puppies, twelve of which were dogs. While we do not think this is a record entry unless it be in the number of dogs, still it is worthy of note. In regard to these large litters, which to the average breeder seem to afford so much satisfaction, we may remark that a moderate litter of six to eight is far more preferable and the whole litter would stand a much better chance of developing into well furnished dogs. When an unusually large litter comes the bitch or the litter is bound to suffer.

### Philadelphia K. C. Field Trials.

The second forfeit on the Derby entries for the Philadelphia Kennel Club field trials is due Sept. 15. The entries for the All-Aged Stake at the same trial will close Oct. 15; blanks and information can be had by addressing the secretary, Francis G. Taylor, 608 Chestnut street, Philadelphia.

### Secretary Vredenburgh Resigns.

Whir-r-r-r! Hello, Central! Is this FOREST AND STREAM? "Yes." "Do you know the latest? Secretary Vredenburgh has resigned." Thus comes the news of an important move in the kennel world. For some time Mr. Vredenburgh has had under consideration an offer from Mr. Terry to enter his office in the Loan and Trust Company, and has decided to accept. His resignation was to take effect to-day at the meeting of A. K. C. delegates, but he was urged by other officers of the club to let his name continue on the roll till the annual meeting. He will, however, enter on his duties at once in Mr. Terry's company. Mr. A. D. Lewis will occupy the secretary's chair till February, but Mr. Vredenburgh will come in every day and generally supervise the work. In February the new election of officers takes place and a regularly appointed secretary will be elected. Mr. Vredenburgh has had nearly seven years of A. K. C. secretaryship, and has passed through some of the most critical periods of the club's career, and while we all may be allowed our opinions as to the manner in which the A. K. C. has been conducted in the past, we must all acknowledge that Mr. Vredenburgh leaves the club in a greater state of prosperity than it has ever known before.

### Broken-Hearted Collies.

AN interesting and touching incident occurred in Allegheny some weeks since, according to the Pittsburg *Commercial Gazette*, which goes to show that some dogs have hearts to break. Of course, it is only the more intelligent of the species that evince such human qualities. Several months ago young Mr. Iseuthal went to the mountains near Denver for his health. Recently he started home, feeling much improved, but was stricken down in Denver and died, as stated in FOREST AND STREAM at the time. The strange part of the story is that on the day of his death two fine-bred collies that he had trained and tenderly cared for ceased their playfulness, sought their kennels and then persistently refused to eat. When the remains were brought home the dogs seemed to know what it all meant and were the saddest of the sad. But when the casket was carried out on the day of the funeral their wailing was loud and most pitiful indeed. The neighbors say their manifestations of grief were pathetic beyond description. Up to July 6 neither of them had eaten a bite since the news of the death of their young and beloved master was received at his home. There is nothing improbable about this, because we have instance after instance in which dogs have shown such human traits. It is quite reasonable they should possess them, because they are intelligent and affectionate. These two collies are notably intelligent and obey instructions given either in English or German.

### Unsound St. Bernards.

Recently we spoke of Mr. Hughes-Hughes' intention to have the English St. Bernard Club legislate in favor of instructing judges to disqualify unsound St. Bernards. At the last meeting Mr. Hughes-Hughes' motion was brought up but with the result that instead of the radical measures proposed the following moderate stand was taken: "That it is highly desirable that the attention of St. Bernard judges be directed to the unsoundness of many of the St. Bernards of the present day, particularly in their legs, and that they should endeavor as far as practicable to withhold their prizes from unsound animals." Which just about leaves the matter where it was before. Mr. Hughes-Hughes, disgusted, resigned from the club.

### The Great Dane Hannibal Dead.

Hannibal, the best Great Dane ever seen in England, we regret to say, was strangled in his kennel the other day. Through the carelessness of his attendant, who chained him from the ceiling of the kennel, presumably to avoid banging his tail on the kennel side, the dog managed to hang himself. Hannibal was imported from Germany, by Mr. Wilbey, to England, and in both countries he leaves an enviable record behind both as an unbeaten winner and a great stud dog.

### Dog Show at Springfield, Ill.

The gathering of dogs at the last Springfield, Ill., Fair was such a success that it is to be repeated this year on a larger scale. Mr. Frank Gonley has been appointed superintendent. The show will be held according to A. K. C. rules. Further information can be had from the above named gentleman or Secretary Mills at Springfield, Ill.

### Eastern Field Trials Club.

The quarterly meeting of the Eastern F. T. Club will be held at 44 Broadway, New York City, in Mr. F. R. Hitchcock's office, on Tuesday, Sept. 13, at 3 o'clock P. M. The attendance of members in person is cordially requested to insure a working quorum and further business of general importance to the club.

### Rochester Dog Show.

At the suggestion of the National Greyhound Club two classes instead of one will be made for Psovois, and the Rochester Club offers one medal for best Psovoi dog or bitch, one medal for best deerhound dog or bitch and one medal for best greyhound dog or bitch.

---

Mr. W. L. Washington, now that he is relieved from the cares of managing a big kennel of red setters, is taking life easy and indulging a love of sport to its full bent. He is now located at Oden, Mich., on Crooked Lake, in his father's private car, and writes us that the fishing is immense. Nothing would suit us better than to accept his kind invitation to help him out, but this question as to whether judges should write their own reports needs personal attention, and cholera or no cholera we must see it through.

---

Mr. Waters was chosen to judge the Northwestern Field Trials in connection with the Rev. Hamilton Spence. These were to commence at Morris, Man., on Sept. 5.

---

The regular season of the Dutchess County Hunt will open Sept. 24. Mr. S. J. Colgate, of Uplands, at New Hamburg on the Hudson, is the master.

---

The executive meeting of the N. B. C., called for Aug. 27, could not take place, as only two members turned up. Considering the near approach of the trials, it is time things were put in ship-shape and all arrangements made. Probably that all-night session has taken the keen edge off some of the members.

---

Several cases of alleged hydrophobia in Massachusetts recently have given rise to a theory that this disease is more prevalent this year than usual, and foolish people are talking about an "epidemic." To quiet the apprehension, Dr. Abbott, of the State Board of Health, declares that there have been but 112 deaths from rabies in the last 50 years.

---

A week or two since we said an important deal in collies might take place. Seminole Kennels has just sold champion Roslyn Wilkes and Jakyr Deane to Mr. J. Pierrepont Morgan at a very long figure—it is said $1,500.

---

A glance at our business columns shows that there are several new kennel "ads" this week. We notice that John B. Harrison has a great Dane for sale; A. H. Moore, rough-coated St. Bernards; Fairmead Kennels, great Danes; H. B. Vondersmith, well bred English setter pups; Meadow City Kennels, a good Breeze Gladstone bitch; George Douglass, some noted cocker spaniels; F. H. Hayes, foxhounds, etc.; R. W. Pope, beagle pups; W. L. Rathbone, beagle pups, and the new advertisement of the New York St. Bernard Kennels and Seminole Kennels. Wants—Youlgreeave a foxhound and Liberty Kennels an assistant trainer.

---

Another good collie bitch will make its appearance in this country soon, as Mr. Edward Hayward, of Newcastle, Staffordshire, has sold Newcastle Peggie to some one in this country. She is by Edgbaston Marvel out of Merry Floss, and she has been in the money at good shows, *Stock-Keeper* speaking favorably of her head and type.

---

Dr. Griffin, of Hamilton, Can., sailed for his native country on the steamship Gallia Aug. 24, and brought with him the two terriers champion Principio and White Rose.

---

Eight hundred dollars for an Irish terrier is a big sum, yet *Stock-Keeper* says this has been offered for the Irish terrier Poor Pat.

---

Mr. George Raper has sent out a young bulldog for Mr. Tom Webb, an enthusiast who lives in Peoria, Ill.

---

Dr. Warner, of Bridgeport, Conn., has quietly secured a good St. Bernard in the rough-coated champion Claudius, from Mr. T. D. Dutton, of Surrey, England. Such a dog should be a great acquisition to this country, and will relieve the run on Plinlimmon blood a bit, as he is by champion Ben Lomond out of Phillis. His winnings are familiar to all St. Bernard breeders, but we may mention that the list includes firsts at Crystal Palace and the St. Bernard Club shows, and that he is a champion in England counts for something as well. His color is orange with white markings, and he was whelped July 9, 1888. He was shipped by Spratts Co. on the Teutonic.

---

Seminole Kennels we hear have purchased that noted little pug dog Bonsor from Mr. A. E. Pitts, of Columbus, O. This is a capital acquisition to this kennel, and at the low stud fee he stands at should help the breed along considerably in this section. Bonsor's record as a bench dog is well known.

---

## SHOULD JUDGES BE THEIR OWN CRITICS?

*Editor Forest and Stream:*

In answer to your request for my opinion as to whether judges should be their own critics or not, I desire to say that it has been my opinion ever since I became connected with the fancy, that the judges' duties were not more than one-half accomplished when they failed to furnish a descriptive narrative of their work. I take great pleasure in perusing the reporter's criticisms on the judge's awards, but, as a general thing, such reports as are furnished by these agencies fall far short of filling the bill, they may be all right in their way, but we cannot forget that the reporter is not the judge, and the judge is the person whom we look to with some amount of hope. I assure you, it would be mighty interesting to read the criticisms of some of the men who are employed in the capacity of judge in the present generation, to learn from their pen the reason why Mr. A's dog should be placed over Mr. B's dog. If I am an honest breeder, and am desirous of improving the breed which I may have taken a fancy to, I certainly am anxious to have the defects and shortcomings in my dog pointed out to me.

Now, the question arises, to whom and where shall I look for instruction? Is it to the reporter and his criticism? No, certainly not; he has nothing to do with my dog or my affairs. I am not supposed to be even aware that he is in existence. Is it to the judge, then, that I must look? Yes, by all means: he is the individual who renders a decision for or against my dog, and it is natural to suppose that he has some good reason why he renders such and such a decision, and by all means we should know it. It is a duty which he owes to every exhibitor and every exhibitor should insist on hearing it. I am glad to know that FOREST AND STREAM has taken the initiatory steps in agitating a much needed reform. In conclusion, permit me to say that if bench show managers insist (and I hope they will) in having the judges furnish, as I have stated before, a descriptive narrative of their doings, that they (the managers) will have a considerable less number of aspirants to wear the judge's badge than has been found heretofore.

ROBERT LESLIE.

LYNN, Mass., Sept. 1.

---

*Editor Forest and Stream:*

Every one who expects to exhibit horses or dogs or who wishes to make a success of business in this age, when competition is so keen, must be willing to accept just criticism.

The greatest source of all fault finding is the lack of education on the part of the exhibitor; if he knows his breed well he should know the defects of his entries as well as any judge or reporter, then no matter what is said he considers the source from whence it came and knows accordingly how to weigh it.

No one should have such a personal liking for any specimen till he learns to consider him perfect, but he ought to be able to look him over and judge his faults and be willing to admit to himself at least that such and such points are wrong.

It always was a source of pleasure to me to read what the judge thought of my different entries, but he should always be willing to state just why he placed his class as he did, too many reports are written, and after reading them you are at a loss to know why such an entry was given the ribbon over the others.

One great fault seems to me the willingness on the part of almost every one to say that such and such a dog has seen his best days, has gone off in head, etc. There are such cases of course, but the principal balm to the feeling of an exhibitor whose world-beating specimen has been defeated by a younger dog is the above; this is an age of progress, but more dogs are written old and out of shape than should be the case.

H. W. SMITH.

WORCESTER, Mass., Sept. 5.

---

*Editor Forest and Stream:*

As to whether judges should write reports on their own judging, I cannot better answer than by saying that I agree word for word with the answer published in last week's issue of FOREST AND STREAM by Mr. Clarence Rathbone. I do not think that I can add a word to what he has already said.

Given by a competent judge, an intelligent report on the classes which have passed under him cannot fail to be of interest. This will not prevent criticism on the part of reporters, exhibitors and others, which, when not actuated by spite or malice, is almost invariably entertaining and instructive. Indeed, without such reports only those who have been able to attend the shows would know anything about them or the animals shown at them. As far as I am concerned, by all means let us have judges' reports.

A. D. STEWART.

HAMILTON, Ont., Aug. 29.

---

*Editor Forest and Stream:*

There are two sides to this question worthy of consideration. A competent judge is, in my opinion, better qualified to report his own awards more clearly than the reporter who has not had the opportunity of making the same comparative examination. In consequence such reports would prove of great value as the reasons for the awards could then be

comprehensively explained from the judge's standpoint. But a report should also be published written by a competent critic who, after further and perhaps more deliberate and closer examination of the dogs, is able to notice certain defects or good points that have been overlooked by the judge. If such reports were published side by side in the kennel press the comparison would do a great deal toward the education of fanciers, and in many ways add to the value of bench show reports. W. L. WASHINGTON.

PITTSBURGH, Pa., Sept. 1.

*Editor Forest and Stream:*

I am strongly in favor of judges writing a report for publication. To many of us exhibitors the ways of judges are "past finding out," except as they are made known through their reports. Now I am not disposed—and never have been—to criticise the awards of judges, *i. e.*, I am confident as a general thing that they are strictly honest and sincere in their awards. I do not, however, always agree with them. I want to know why or on what grounds they make the awards which to me seem wrong. It may help me to a better understanding of the points, etc.

W. H. WALBRIDGE, Prop. Contoocock Kennels.

PETERBORO, N. H., Sept. 2.

*Editor Forest and Stream:*

In answer to the question put, "Should a judge be his own critic?" would say, that since I am determined to get out of the dog business as soon as possible, I have not my former interest in such matters, but at first thought would say that I do not think it well for a judge to be his own critic, since we know his criticism when he judges the dog.

E. B. SEARS.

MELROSE, Mass., Aug. 30.

## ABOUT BULL-TERRIERS.

*Editor Forest and Stream:*

I don't believe there will be many expressions of regret on account of your stretching the capacity of FOREST AND STREAM, especially if you fill the extra space with the sayings and doings of "Podgers." Stir him up! And now that you have lots of room I want to ask a question. What were bull-terriers made for? I have a liking for every other kind of thoroughbred dog, but I never see one of those fighting cusses without feeling a sort of inhuman desire to drop a piece of fixed-up meat before him.

If I possessed the only pair of different sexes, I might be able to get a small fortune for them; but I would never place them on the market—alive. Gen. Leslie Coombs contended that a dog was an almost infallible indication of his owner's character. Once when ventilating his knowledge on the subject he pointed to a bull-terrier that was loafing round and remarked that the owner of that dog was undoubtedly a fighting man and a rowdy. The owner of the animal happened to hear the remark and walked up to him with business in his face and fists, and pronounced it a "forcible fabrication." As the General didn't want to have anybody's feelings hurt he at once apologized, acknowledged his mistake, but said it was the first time he had ever made a mistake of that kind.

Now I don't intend to express my opinion for fear of making a similar mistake, but if a bull-terrier is of any use in the world except to fight I want somebody to tell me what it is. I have no respect for a man who will keep a bull-terrier for a watch dog, for he's a sneaking rascal who will take hold of a man without a word of warning and never let go while it's possible to hold on. A setter is a far better watch dog, for he will make some demonstration and is quite severe enough for any such purpose. DIDYMUS.

ST. AUGUSTINE, March 2.

## ANSWERS TO CORRESPONDENTS.

*There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.*

J. H., Olean, N. Y.—My setter bitch, 1yr. old, is troubled with worms. She has just been bred. What shall I give her? Ans. Any of the advertised worm remedies.

F. P., Chicago, Ill.—Will you kindly give me the pedigree of the pointer Bruce II.? Ans. Bruce II. (A.K.C.S.B. 10,017), by Hindoo (2,896, Vol. II.) out of Flight (3,037, Vol. II.), by Baw (2,853, Vol. II.) out of Madge. Hindoo by Faust (2,884, Vol. II.) out of Devonshire Lass.

R. D. H., Trenton, N. J.—Can you kindly furnish me with the name and address of some one who could teach a dog tricks? I have two customers who desire the service of a trainer. One dog is a St. Bernard, the other a spaniel. Ans. We do not know of any one; you had better advertise.

O. N. K., Brooklyn, N. Y.—Will you give pedigrees of English setters Druid and Ruby? Ans. Druid, whelped 1873, by Prince out of Dora (346); Prince by Dash II. out of Moll III.; Dora by Duke out of Rhoone. Ruby, whelped July, 1877, by Rake (212) out of Fanny (359); Rake by Dan out of Ruby; Fanny by Leicester out of Dart.

SETTER PUP, Chatham, N. Y.—I have a setter pup 5mos. old that droops, and I am quite well convinced has worms. Will you kindly advise me what is the proper dose of santonine to give a puppy of that age? 2. What is a good tonic? Ans. 1. Santonine alone would be useless, try some of the advertised worm medicines. 2. Citrate of iron and quinine in five-grain doses.

JOHN L., Newark, N. J.—Will you please tell me what a water spaniel looks like, and color of him, also the best thing to use to keep fleas off him? Ans. An Irish water spaniel stands about 22in. high; the face from the eyes to nose is smooth, on the forehead is a bunch of corded hair called the topknot; ears long and covered with curly hair; legs very straight and well covered all round, and especially in front with smallish curls; the body is covered with close curls; tail is free from feather, thick at the root and tapering to a point. Color dark liver and free from white. Persian flea powder, or wash the dog in kerosene and water—1 to 3.

J. R. P., Philadelphia, Pa.—Will you please prescribe for my Irish setter, four years old. Before the heat of summer came he had the most beautiful coat I ever saw, but with the heat came the fleas, and he scratched and bit himself sore. He has bitten his back until the blood would come, consequently he has lost all his hair from his tail (root) half way up his back, and a heavy layer of flakes like dead skin or dandruff comes from him, this does not extend any where else on him. Every morning his eyes discharge badly. I have been washing him with Packer's tar soap, at least leaving the lather on to dry in. Ans. Rub the following dressing well in all over every other day for two or three days, then wash off and repeat if necessary. Kerosene, 10oz.; oil of tar, 6 oz.; cocoanut oil, 10oz; sperm oil, add 40oz.; mix. Also treat for worms.

J. B., Jersey City, N. J.—1. I have a setter dog who for the last month has been ailing, he is very thin, eyes are running and seems to be very listless and weak. I have dosed him with turpentine and areca nut, but his condition does not seem to improve much. Would you kindly advise me? 2. Also whether the season for woodcock, grouse, quail and rabbit (for Connecticut) opens in October or Nov. 1. Ans. 1. Feed the dog well, give raw meat, cod-liver oil cakes, etc., and the following mixture:

℞ Tr. nucis vom. ..... ʒi.
Ferri et quinin citras ..... 3 iss.
Liq. arsenicalis pot. ..... ʒi.
Syr. simpl. ..... ʒi.
Aq. ad. ..... ʒvi.
Mist.

Give one tablespoonful three times a day after food. 2. Oct. 1.

*Dogs: Their Management and Treatment in Disease. By Ashmont. Price $2. Kennel Record and Account Book. Price $3. Training vs. Breaking. By S. T. Hammond. Price $1. First Lessons in Dog Training, with Points of all Breeds. Price 50 cents.*

## FIXTURES.

OCTOBER.

1. Springfield, Cup, Springfield.

AFTER the storm of indignation and ridicule which greeted our criticism of the New York C. C. regatta last year, and the announcement that such a plan as we proposed was utterly impracticable and absurd, it is not a little gratifying to us to know that this same plan has been deemed worthy of trial by the officers of the club, and that it has proved an undoubted success. We are willing to accept the regatta of Saturday last as a full apology for all the hard things said of us last year.

# THE A. C. A. MEET OF 1892.

## Willsborough Point, Lake Champlain.

[*Concluded from page 169*]

This camp has broken up slowly; though the exodus began on Thursday night with the recall of some of the men for military duty, there was still quite a spotting of white tents against the green fields and woods on Sunday. One of the most lively and animated scenes of the meet was the striking tents, packing duffle and loading all on the flat scow which was dubbed "Gloriana," when used for the same purpose last year. This has been a large camp, with more tents and canvas than last year, and the work of transporting all this stuff has been quite heavy. The "Gloriana" was poled from place to place along the beach, at each stop a motley crowd of smugglers, half in camp costume and half in "store clothes," marched down from the deserted tent-site, carrying canoes, trunks, bags, chests, sails and all sorts of odd packages, more or less contraband in appearance. The handbarrows, built by the camp carpenter, were most convenient in carrying boxes and bundles. The loading was done by the canoeists, all hands turning to, the boats and heavy stuff going aboard to the good old shanty,

"Heave away, my bully boys,
Heave away, heave away,
Heave away, and don't make a noise—
We're bound for Australia."

The baggage has come to Port Kent and Burlington, being transported to camp in the Gloriana or by steamer from the latter place, and returning in the same way to be loaded in special baggage cars for New York and other points.

Sunday was fair and warm, a moderate north wind tempting a number who were breaking camp to make a cruise up the lake, and during the morning canoe after canoe put off from Indian Bay with a farewell cheer from the shore. In the afternoon service was held in the pavilion, Rev. Dr. Savage officiating. Mr. Thomas Nelson Page, the novelist, was at the hotel from Saturday until Monday, and on Sunday after service he entertained an attentive audience by reading selections from his stories. In the evening a camp-fire service was held at Squaw Point. At night there were still twenty-four tents standing in the main camp, though half of that number were struck on Monday morning. The weather on Sunday and Monday was as nearly perfect as it could possibly be, clear, bright and sunny, but tempered with a fresh north wind. Although camp does not close formally until Thursday, the meet was over by Monday night.

The Lake Champlain Y. C., of Burlington, repeated its very hospitable invitation of 1891, the entire camp being invited to the regatta and the ball, while handsome cups were provided for special canoe races under A. C. A. rules. The rather hurried breaking up of the camp immediately after the races left but a small party, and still fewer racing men, to make the trip to Burlington on Tuesday morning. The day was fair and bright, but with too little wind for even a canoe. The canoeists were welcomed at the club house, and everything was done by the committee of the club to make their visit a pleasant one.

The first race called was the paddling, with but four starters—Messrs. W. L. Scott, Geo. P. Douglas, A. M. A. Adamson and C. W. Lansing. Mr. Scott paddled a light open racing canoe, Messrs. Douglas and Adamson paddled their heavy decked centerboard canoes, and Mr. Lansing paddled a short wide open canoe. The course was about three-quarters of a mile, with a turn, Scott taking a long lead at the word, but steering a crooked course, so that Douglas overtook him and turned the mark ahead. On the return Scott regained the lead, winning easily, with Douglas quite a distance astern and Adamson third. Scott won a handsome loving cup, the first prize, and Douglas a smaller cup.

Only two sailing canoes were present, so the second sailing prize was taken for an upset paddling race. There were four starters, Mr. L. B. Palmer taking the place of Mr. Lansing. Mr. Scott led in the paddling, but was handicapped by his open canoe in the upset, Mr. Palmer rolling his canoe entirely over without leaving it, and winning easily.

The starters in the sailing race were only Douglas and Adamson, and the race but a drift, being called before the full course was completed, Douglas then having a long lead. After the races Messrs. Scott and Douglas amused the spectators with some tricks in capsizing and canoe gymnastics. The prizes for the sailing and upset races were also handsome silver cups. The canoeists, with few of the ladies from the camp, remained to the ball in the evening, the club sending them home in a special steamer.

The day was a very quiet one for those left in camp, but toward noon some one proposed a picnic, and soon all hands were at work gathering stores and utensils. A start was made from the ladies' camp, the little fleet paddling around the Point and into Willsborough Bay, going up a couple of miles until a pleasant landing was found. Dinner and tea were prepared here, the party returning to camp about 10 P. M.

Tuesday night was clear, but about 4 A. M. the rain began, pouring hard until after 8 o'clock, regardless of the fact that this was the last day of the camp, and that wet tents are hard to pack. When colors sounded on Tuesday evening the signal halliards were unrove from all the poles and the flags packed away, and most of the remaining tents came down on Wednesday morning, the sun coming out about 10 o'clock and drying everything. A few remained in the main camp, and one or two parties in the ladies' camp, but Com. Winne and Mr. Huntington left in the afternoon with quite a party, and by Wednesday night the meet was over.

The steamer Ruth finished up her trips on Wednesday, returning next day to Albany. The service rendered by Mr. Piepenbrinck was all that could be wished for, the charges were reasonable and the boat was run with every regard for the convenience of the canoeists. Mr. Piepenbrinck undertook the venture at his own risk, with what returns we cannot say, but we hope that he found it profitable. The bad weather of the first ten days was much against him, there being no demand for the boat for special parties.

The necessity for one special launch of this kind in competent hands, and plying regularly between the camp and the nearest railway station has been long apparent, and the practicability of such an arrangement has this year been proven. The charge between the camp and the Willsborough Point dock was 25 cents per head, 20 cents each for trunks, the fare on such trips as were made to Port Kent being somewhat higher. Under favorable circumstances, with a reasonably short route and an attendance of 250 in camp, excluding transient visitors, such a launch should pay expenses at 25 cents per head, but if it does not pay at this figure, there would be no objection to a charge of 50 cents per trip, provided the service was prompt and punctual and in all ways satisfactory.

Next year the question will be somewhat more difficult should the meet be held as now seems probable in the vicinity of Stave and Grindstone islands. The Customs regulations are complicated and onerous, interfering greatly with the carriage of passengers from both sides of the line; and it will probably be necessary to have two separate boats. The regular local steamers will probably be convenient for the Canadian part of the traffic, but a special launch between the camp and Clayton is almost a necessity if the delays and annoyances of 1889 are to be avoided.

The racing this year must be set down as very unsatisfactory, in spite of the perfection of all the arrangements, the attendance of men and canoes being unusually small. Where fleets of 30 to 40 canoes started regularly a few years since, but 8 or 10 were seen this year. This decrease of entries is due to two main causes, the specialization and refinement of racing and the over development of canoes and methods; and it may reasonably be expected to correct itself to a certain degree. The novice and average canoeist realize the difficulty, to say nothing of the expense, of providing a racing outfit and winning prizes from the experts like Butler and Oxholm, who now head the racing in the most perfect racing canoes yet built; and few are willing to undertake such a task. With the racing fleet reduced, however, to a mere handful, there is a good chance for new men to win third and fourth places at the worst, and often, in absence or breaking down of the champions, to do very much better; in fact the record is always open to a fairly good all-round man who is willing to work hard for it.

Radical improvements in model or rig have been very few of late years, Wasp, built in 1889, has not yet been outbuilt, and the new Glenwood is probably but little faster for her length than Eclipse, built in 1888. The Butler rig is improved in detail, but in principle it has been in use for years, and the standing sails are all imitations of the Pecowsic rig of 1886. So far as equipment and outfit are concerned, the owners of Wasp, Glenwood and Bee have a decided advantage over new and less experienced men, and they still hold the main chances for first places in the trophy and other big sailing races; but with the present small field of starters, there is every inducement for new men to go in and do their best, looking for some chance in their favor, or at least for a good all-round record. Men are likely on reading the reports of the late races to appreciate this state of affairs, and prepare accordingly to fill up the depleted ranks of the racers.

The same state of affairs exists in paddling, this year being further emphasized by the unexpected absence of the old cracks, the only really first class paddler present being Mr Knappe. Against him in his new canoe there was no chance for any but the best, at the same time the second place was open for any good man. The falling off in the paddling this year was most remarkable, none of the Canadians being present to contest for the trophy, held for two years in Canada. With the meet in the Northern Division next year, the paddling fleet is likely to show up in goodly numbers.

With rainy weather during the first week, the proposed cruise would have been difficult; but apart from this, there was no evidence that the cruisers were prepared to avail themselves of the inviting programme prepared by Mr. Gibson. The location and the presence of Mr. Gibson's launch, gave every opportunity for an experimental cruise of this kind, that has so frequently been discussed, and had the programme been carried out in good weather the whole trip would have been a delightful one. The matter was hardly spoken of in camp however, and if a start had been called the result would have been as in some previous attempts, that no one wanted to cruise.

There were more cruising or semi-cruising canoes present than last year, and a fair cruising fleet might have been assembled, but in spite of the talk at times, there seems to be no real demand for a cruise of any kind in connection with an A. C. A. meet. After a careful observance of the division meets from their inception, we are inclined to the belief that they can best take the form of a three or four days cruise, rather than a fixed camp; and on the contrary, the regular Association meet should be a fixed camp with no attempt at cruising. It is hardly necessary to discuss these two propositions just now, but there is a good deal in each of them which is well worth the consideration of division and Association officers.

While there were few complete cruising canoes at the meet there were also fewer of the unsuccessful racers, or canoes that from model and fittings were useless as cruisers, and yet which won no races. The general tendency for some time has been to put small wells and large boards in canoes of clumsy model and rough build (compared with Wasp or the best Ruggles boats), thus spoiling to no good end what might have been a very serviceable canoe for some purposes. This year there were a number of fairly good all-around canoes, none perfectly fitted for cruising, but all capable of a wider range of use than the bucket well racer. The best by far of the cruising canoes was a new Ruggles boat, 15ft. 4in.×31in., a powerful canoe of very handsome model, owned by Mr. H. L. Quick. She had ample cruising capacity, and by the use of two bilge boards there was plenty of room in the well. It seems likely now that other of the old racing craft will follow Mr. Quick's example in adopting this class of canoe in a less expensive and more generally useful boat than the unlimited racer, and at the same time giving a chance for some racing under the "general purpose" definition.

The actual camping was this year limited to merely living in a tent, no one attempting to cook, but all taking their meals at the pavilion. The sole exceptions were two or three members of the Troy C. C. and one of the Brown University C. C., who cooked together in primitive fashion in the rear of their tents. The canoe yawl party from Brooklyn, who came in at the end of the meet, also cooked for themselves most of the time. With a reasonably good mess, the temptation is strong to avoid all cooking, but at the same time all who have tried a good club mess, a party of half a dozen with their own cook to prepare their meals in their encampment, will admit the superiority of this plan over the semi-hotel meals served by the regular caterers in a mess shed. The charm of the outdoor life is completely lost with such surroundings.

The camp outfit of which canoeists were once so proud has largely disappeared, the tents being furnished more with a view to comfort or even luxury in camp than to convenience of transportation and compact stowage of duffle. Nearly every one carried a camp cot, some of the folding varieties and not a few being regular spring cots, comfortable, but most inconvenient of carriage.

Out of the large number of tents in the present camp there were no novelties, the majority using the plain army wall tent from 7×9ft. upward, with fly in front. There were several of the new Protean tents in camp, with their adjustable fly, very compact and convenient, and a number of the old single pole square marquees, one of the best tents yet made for canoeing and camping. With a single central pole and supporting themselves firmly on their own base, with no straggling guylines, these tents are quickly and firmly pitched and may be placed on less than half the ground needed for a wall tent. A special make of enlarged size was used by the Brooklyn C.C. and was much liked.

There was not in the entire camp one well arranged club encampment, such as has been seen at times in the past, half a dozen tents of the same design neatly pitched in a semi-circle, with the club flag in front. On the other hand, several clubs contented themselves with the big, ugly and inconvenient hotel tents, wall tents whose guylines covered the ground in all directions. The headquarters tents alone were well arranged to make a picturesque effect and at the same time to be perfectly convenient.

Tent floors were a necessity rather than a mere luxury this year, the ground being like a sponge. Those who had floors in the previous year were in luck, as all tent floors and skids were stored by the Association, free of charge, and also laid down again at such a place as the owner wished. The supply of lumber and the carpenter service were both good this year; spruce battens 3 to 5in. wide and planed on one side were to be had at a low price, and skillful carpenters were at hand to make them into tent floors, tables, benches and chairs, almost at cost.

There is one thing to be learned from this year's experience in the work of the camp site committee, the French wire nail, now in general use in many parts of the country, should be rigidly excluded from all the camp carpenter work, and the common old cut nail, 8-penny and 10-penny, should be used.

The latter, while strong enough for all ordinary uses, is comparatively brittle, and may be broken off by a kick or a blow from a stone. The new wire nail on the contrary is indestructible: after its legitimate functions as a nail are ended it lurks around in every piece of old lumber, ready for a long career of destruction, and endangering the feet and clothing of all in camp. It cannot be broken off, or even bent entirely out of the way; and with each year's added rust it becomes more dangerous. One accident happened in camp, a man stepping on one of these nails, and the danger would be still greater in case of a return to the same place in the future, the logs and trees being studded with nails, while odd bits of board lie hidden in the grass.

The care of a camp ground is a matter that few canoeists concern themselves with; but where, as in the case of Willsborough Point, there is every probability of a return in coming years, the matter is an important one. The usual foot covering in camp is the light rubber-soled slipper, and men are frequently bare-footed in swimming and working about their canoes. In any camp that has been used before it is dangerous to walk without a strong shoe, owing to the broken glass and old nails; there being three accidents in the present camp, two from the former cause and one from the latter. Bottles of all sorts, soda water, root beer, sarsaparilla, moxie, mucilage and ink, have been recklessly thrown about and broken for two years, until the pebbles on the beach and the grass on the shore are filled with sharp and jagged fragments. It is an easy matter for each man or each camp to keep all empty bottles, tins, cans, etc., in one pile, back of the tents, and on breaking camp to remove all nails projecting from trees and tent floors, and to pull up all tent pegs, thus leaving the ground in good condition for future camps.

One question that has been discussed again and again during the present meet is that of a permanent or semi-permanent camp; and many are strongly in favor of such a plan. As outlined in a rough way, it would mean the selection of some suitable spot and the erection of a mess pavilion and kitchen and a good dock. All wooden buildings other than the two named would be strictly prohibited, tents only being allowed, but the tent floors and skids would be owned by clubs or individuals and stored for them in the mess pavilion from year to year at a very small charge for handling.

There would be many good points about this plan; the location would presumably be as nearly perfect as possible and in a central location, the heavy annual charges for the preparation of the camp site, in some years as high as $700, would be avoided, and good docks and a well-ordered camp ground be maintained at a very small annual outlay. The mess and transportation arrangements would be permanent instead of being made anew with different parties each year, and some good local men could probably be found who would take care of each, giving good service at reasonable rates. Any possible decrease of attendance on the part of men who do not care to visit the same spot each year would be more than compen-

sated by a larger general attendance as the result of fixed and reliable mess and transportation, and by the regular attendance of many owing to the added convenience and lessened cost, all camp duffle being stored on the ground, leaving only canoe and clothing to transport. Such a plan might be followed on leased ground, and if found to work well the money could easily be raised to purchase a permanent camp site.

## Canoe Rigs in America and England.

THE great difference in the rigs of canoes on the two sides of the Atlantic is discussed as follows in the *Field*. The hypothesis advanced to account for the success of the American rig is quite ingenious, but so far as the facts are concerned the *Field* is in error, all the races at the A. C. A. meets are started to windward, making almost a certainty of one-third windward work in every race; and even in club races every effort is made to secure a reasonable proportion of windward work:

"There is one marked peculiarity in canoe sailing in America and Canada which is contrary to the experience and accepted principles of yacht racing; and which, curiously also, has been almost exclusively proved a failure in English canoe sailing; we allude to the sail area being formed in two sails of nearly equal area.

"The latest advices from America inform us that the mizzen, in the majority of racing canoes, is of the same or even of larger area as compared with the mainsail; in fact, the canoes are schooner rigged. Everyone connected with yacht racing knows that for thirty years past schooners and yawls have received in races a time allowance for inferiority of rig from cutters of equal tonnage; schooners being reckoned at three-fifths their tonnage, and yawls at four-fifths; ketches and luggers at three fifths, or the same as schooners. In England the 'equally divided' sail plan has been tried on canoes, and on good boats too, but without success. It might be argued that possibly the model and fitment of English canoes was unsuited to the 'divided skirt' sail plan; but the answer to that is that we this year had a genuine American canoe (sister boat to the Canuck, the late trophy winner in America) racing in many of the Royal Canoe Club matches on Hendon Lake. The water is open and there is no current, and yet this canoe was not near the front rank of the big mainsail and small mizzen craft. The big lug forward and minute mizzen aft certainly carried the day in all weathers at Hendon; but on the other hand the Charm of that same breed went to America and was 'waltzed around' by all the American front rank a year or two ago, and things have not changed since. Sailing times are about the same, possibly the boats are uglier, but that is doubtful.

"Another point of curious nature clearly demonstrated by this season's racing is that, though the 'bafter' rig (*i. e.*, where the sails are slung and set all abaft the mast, and not alongside it, as in the lug rigs) has carried all before it in America, in England the balance lug has done the trick everywhere so far as reports yet to hand go.

"From a scientific point of view, the 'bafter' sails should be the perfect rig; by practice they are not. Science suggests, on the other hand, that the largest undivided surface of sail area should be the best propeller; practice in England says it is, practice in America says it is not. Apart from racing and the 'fastest rig,' it would be useful and interesting if those who cruise this autumn would make notes, at the time, of the advantages or defects of the rig they cruise under. A beautiful rig on paper may prove a beast at two miles off the land in squally weather.

"The FOREST AND STREAM of July 14 gives an interesting programme and set of charts of the courses of the American Canoe Association meet for this year, to be held between Aug. 4 and 25. The sailing course therein set out suggests a possible answer to the sail plan paradox before mentioned in relation to schooner rig being the most successful in American racing.

"It is generally accepted by seamen that a schooner is second to none at reaching, but she is before none at beating to windward; hence a triangular course, of which two sides may be reaching and one a dead run, should be the promoter of schooner rig for competitors thereon.

"The American course is an equilateral triangle, with base running north and south; so, if the wind happens to blow a dead fair run down any one of the three sides, the other two are reaching sides, with the wind about five and a half points on the bow. In such case the schooner rig runs goose-winged on the run, probably level with any other rig, and then has two thirds of the course reaching, with the advantage of superior reaching powers."

## New York C. C. Fall Regatta, Sept. 3.

BENSONHURST—GRAVESEND BAY.

THE New York C. C. has fairly astonished itself since its establishment at Bensonhurst last spring, the sailing races which once played such a prominent part having to a certain extent given way to day cruises and such expeditions as that recounted last week in our columns. The greatest change, however has been in the matter of regattas, the fall regatta of the club having been planned and carried out precisely on the lines suggested in the FOREST AND STREAM in criticising the unsuccessful regatta of 1891.

This year the sailing races were entirely omitted, the programme being made up of short but interesting races near the club house, which afforded a great deal of sport to those participating in them, and also amused the many spectators on the balcony and the Bensonhurst Pier.

The summary was as follows:

Paddling race, 300yds.: Won by Von Nordhoff; O'Shea second, Ashby third, Whitlock fourth, Stevens fifth, Mowbry sixth, McKeag seventh, Ward eighth and Daley last.

Tandem paddling, 300yds.: Won by Stevens and McKeag, Whitlock and Mowbry second, Ashby and Von Nordoff capsized at the start.

Standing paddling, 150yds.: Won by McKeag, Stevens second, Lake third, and Whitlock fourth. Mowbry entered but did not finish.

Tug-of-war, two boats in each heat and crew of two in each canoe: Daley and Lake won two successive heats over Stevens and McKeag.

Singles, unset paddling: Won by Barrington, Ward second and Stevens third.

Hurry-scurry, dive, swim and paddle: Won by Whitlock. Barrington disqualified for wrong turn of buoy.

The fancy diving contest was won by Capt. Whitlock, and the long diving by Von Nordhoff. The four paddling race did not take place. After the regular races a sailing race was started between Torment, H. C. Ward, and Kismet, C. J. Stevens; the former winning. Mr. C. B. Vaux was officer of the day.

# Yachting.

## FIXTURES.

OCTOBER.

1. Corinthian, Atlantic City.
15. Buffalo, Closing Cruise.
9. Jersey City, Ladies' Day, New York Bay.

THE remarkable thing about the New York Y. R. A. is that those things which through neglect are usually done badly in a little race of half a dozen yachts, were on this occasion done well in spite of the number of entries. The entry list, printed and sent out some days in advance, contained the official measurement and allowance of every one of the 155 yachts, and the arrangements as to numbers, signals, etc., were most perfect. The association has made use of some good advice we offered several years since, and has rid itself of all honorary and ornamental personages in the various committees, the entire management of the regatta being in the hands of three men. The successful result is very largely due to the energy and skill of one of them, Mr. George E. Gartland, an old hand at this work, through whose labors everything ran smoothly.

THE New York Y. R. A. is to be congratulated on the successful management of one of the largest fleets ever started about New York, but at the same time it has not, as some papers state, beaten the record in American yachting, and it will probably be some years before it does so. On Aug. 18, 1883, the Beverly Y. C. started a fleet of 173 yachts in one regatta, probably the largest fleet ever started.

## The Annual Cruise of the South Boston Y. C.

JULY 16.—The morning was cloudy, but promised a fine day. By 11 A. M., starting time, the wind was blowing a good nor'wester, and as it assured a quick run to Marblehead Com. Morrill ordered extra preparations. The yachts started in review at 1 P. M., saluting the flagship Recreation, and laid their courses for Marblehead.

Off Marblehead Rock Fleet Capt. Dixon hove to and received the salutes of the fleet as they arrived and hove to, awaiting orders. At 4:30 the fleet started in squadron for Salem Willows, where they arrived about 5:30 at anchorage.

The Maggie came down under close canvas, to save work, when she was hauled on the wind the captain ordered reefs shaken out, but the crew thought it was too much trouble. The way the doughty captain got even with them was to leave the wheel and turn in below, and then they had to work or drift.

The Recreation was swinging her topsails off Pig Rocks, the wind was chunky, and she got a good one. About everything went to leeward, but the commodore thought the weather rail about the right place.

After all was snugged down preparations were made for dinner and ball. After dinner the fleet was illuminated, all turned to and brightened the bay, the display was greatly admired from the shore.

At 1 A. M. all was quiet in the fleet, which numbered thirty yachts.

SALEM WILLOWS, Sunday, July 17.—In the morning many strolled ashore and others visited among the different yachts. At 11:30 receptions on board were in order, not only on the flagship and Fleet Captain Dixon's Pilgrim, but nearly all the yachts received informally.

About 12 M. Commodore Morrill took leave of the fleet with much regret. At 12:45 signals on flagship, "Prepare to get under way." At 1:15 signal read, "The fleet will proceed to Gloucester," and at 1:30 nearly all had started, the Eastern fleet as ordered, the balance on their return to City Point, each fleet with a cheery *bon voyage* to the other. The Eastern fleet ran along the Beverly shore out Salem channel and anchored in Gloucester Harbor about 4:30.

At colors the fleet comprised twelve yachts, Recreation, Coronilla, Kitty, White Cloud, Marie, Violet, Maggie, Climax, Quissett, Albertina, Awilda, Nilgiri.

At 5:15 the signal from flagship, "Captains report on board" was responded to by all and the Vice-Commodore entertained them in his own inimitable manner, assisted by Capt. McIntire with instrumental music. The first racing run to Kittery was discussed and arrangements made.

GLOUCESTER, Monday, July 18.—At sunrise orders from flagship Recreation were, "Proceed and heave to off Ten Pound Island to westward of flagship, and at gun from her proceed to anchorage off Indian Fort Kittery," The racing arrangements and prizes as arranged by the regatta committee.

FRANK FERDINAND,
Vice Com., commanding.

The fleet was under way at 5:30 and drifted out of the harbor. Coronilla, Kitty and Marie were unable to get into line, and as there was no steamer to assist them they were handicapped at the start. At the gun eight yachts got away well together and a light S.W. wind helped them around Eastern Point in the following order: Maggie, Climax, Quissett, Violet, Recreation, Awilda, White Cloud, Albertina, Marie. The Nilgiri withdrew from the fleet on this run.

The wind held well into Ipswich Bay, when it lightened somewhat and hauled westerly, increasing off Isle of Shoals to fine sailing breeze. Violet arrived first at 1:05. The features of the run were: Violet, fast time; Maggie, good work short handed; Awilda's true course; the snap Recreation had with her class, and the splendid race between Climax and Quissett, which boats were not half a mile apart at any time, and the last eight miles in a spanking breeze, with all their maneuvering and light sail work, held each other within a few seconds.

The afternoon was pleasautly spent. Vice-Com. Ferdinand took temporary leave of fleet at 4, investing Capt. H. F. McIntire with command as vice-com. pro tem. The evening was calm and many yachts added to the natural beauty of the scene by illuminations and fireworks.

Capt. Bijah's Awilda was the Electra of the fleet.

Orders at 8:30 P. M. Flagship Recreation. Sailing orders for July 19, S. B. Y. C. Fleet cruising. "At colors, heave short. At 8:15 a second gun will be fired, when the fleet will run direct to anchorage off Portland Y. C.—H. F. MCINTIRE, Acting Vice-Com., commanding; WM. ALLERTON, Acting Secretary."

During the night Maggie and Coronilla had a luffing match at anchor in the tide. The judges on the other boats were unable to decide which had the better of it there were so many fouls claimed.

KITTERY, Tuesday, July 19.—Fleet started at 8:15 for Portland and drifted out of the harbor with the tide; when off Whale's Back a light southerly wind helped them along. At 10:30 wind settled down to a good breeze from S. by W., and the fleet ran down the coast well together, all swinging spinakers and light sails. It was a beautiful day and a splendid run.

The features of the run were the fast time of Violet and Climax, and Quissett and Awilda's good work with light sails after they rounded the Sisters all the way into Portland. The yachts all made anchorage before colors, and as they rounded up and saluted each was answered from the Portland Y. C. house. It must have made lively work at their gun, but they were equal to the occasion. The evening was lovely, and again our "Electra" brightened the anchorage with her display.

PORTLAND, Wednesday, July 20.—This day begins with weather as bright as usual. Vice Com. Ferdinand resumed command at 10. Orders from flagship: "Report at this anchorage at colors;" and the most of the fleet lay quietly all day enjoying a little rest and trips in parties ashore and down the harbor in the afternoon. All were well received everywhere, but particularly at the Portland Y.C. Their hospitality gave us to understand that we owned the house, and each member helped us to enjoy its privileges.

A meeting of captains was called on board the flagship in the evening as usual.

PORTLAND, Thursday, July 21.—The sunrise was clear and beautiful, even in the inner harbor. The fleet was underway at 5:30 and passing between Hog and Peake's islands on the inside course to Harpswell, among the islands of Casco Bay. This day's sail to the fleet was a poem. All the camps and yachts passed were saluted and they responded heartily. Off Pumpkin Island the fleet hove to, awaiting orders from the flagship, and Capt. McKee gave us the Canadian boat song, and dog Chowder did the dress parade on the bowsprit. When the fleet was all together orders to proceed were given, and all squared away. From the point off Great Cheheague, Mount Washington, was in full view. Off the east end of the island the fleet again hove to, as something was the matter on board the flagship. It was discovered that the commodore and Mac were running the ship in their own quiet way, keeping the main sheet off when on the wind to save work when she was squared away again, and shaking a leg of dice to see who would draw away the jib sheet.

Yacht White Cloud, Capt. H. H. Smith, took leave off Eagle Island, and gave three cheers for the South Boston Y. C., and three more for Vice-Com. Ferdinand, which was acknowledged by the commodore and responded to by all the fleet.

The yacht Milly, of the Portland Y. C., here joined, and the fleet made merry for her.

Ran into Potts Harbor at 10:30, and made the old rocks ring with guns and cheers, and the natives on the wharf helped us, especially with three cheers for the Commodore by the fleet.

Violet here took her leave for Rockland with cheers full and hearty (as only Capt. McKee and his jolly crew can give) for club and commodore, and again the fleet responded to a man.

At 11 signal "Captains report on board" and orders to lay at anchor here until further orders were issued.

It was remarkable how quickly the worthy captains read the signal "Captains report on board" whenever hoisted, ordinary club members (and seamen) were beginning to recognize it and also the fact that they were not in it.

POTTS HARBOR, July 21.—After all had dined, some at the Merriconeag Hotel, others on board, Vice-Com. Ferdinand arranged a drive up country, and it was a jolly party that filled two large teams. We had fog horns a la Tally ho, and the bell of the U. S. Mail discovered under the seat. If the Commodore's cannon had only been lashed on behind with the windlass brake to work it, the natives of Harpswell would have experienced a second Fourth of July. As it was, about all of the inhabitants came out to welcome us. At one house all of our exertions failed, and it was only after giving it up that it was found to be vacant. Near the road, which was very dusty, a pump was discovered; the Vice-Commodore suggested that the Governor of North Carolina owned it—it was soon surrounded. This was the chance our camera captain was waiting for—he considered it a rare snap on the S. B. Y. C.

The mystery of the Vice-Commodore's satchel was soon after revealed, but he nearly poisoned the party in one carriage by serving them something quite strong in a valid looking bottle.

We stopped at a country house near a little cove called the Lookout. Here a pleasant hour was spent and our camera Captain again asked all hands to look pleasant. Bos'n M, ex-Captain and late Commodore *pro tem* here piped the line and all marched upon the pails of milk which the Vice Commodore had caused to appear. Well, the cows looked discouraged as we passed them on our return. On the way back we had songs by talent brought to light by jolly company, and arrived safely at the anchorage in good time.

At colors orders to illuminate the fleet, and in the evening a dance was given ashore for our benefit, and as the ladies have never been neglected during the cruise, although seldom mentioned in this report, it was well attended.

POTTS HARBOR, Friday, July 23.—Signals at colors to disband fleet, and each yacht saluted the flagship as they stood out of harbor for their different destinations, thus ending the cruise in squadron in the same beautiful weather that has made its entire course one long to be remembered, and separating for a time the jolly good fellowship cemented anew by one of the best cruises ever sailed eastward. Apropos of this last signal, the ordinary club member (and seaman) unkindly remarked that the reason must have been that the ten days' supplies of the "captains will report on board" must have been exhausted on the flagship, which of course was dangerous down on the coast of Maine.

Respectfully submitted to the officers and members of the South Boston Y. C.

WM. ALLERTON, Acting Secretary.

## Cleveland Y. C., Aug. 16-17.

CLEVELAND, OHIO.—LAKE ERIE.

THE Cleveland Y. C., one of the leading clubs west of Niagara, has recently held a very successful regatta, lasting for two days, at which the best yachts of Lake Erie were present. The regatta was planned and the arrangements carried out by Com. Gardner, the veteran yachtsman of the Lakes and the leader in yachting and canoeing, assisted by the members of the Cleveland Y. C. A triangular course, with six mile sides, was buoyed out on the lake abreast of the city, the yacht Say When was tendered by her owner for the use of the officials, and the following gentlemen were appointed to attend to all arrangements: Judges, C. B. Lockwood, of Sandusky; Com. Joseph Nicholson, of Detroit, and J. de Zeilinski, of Buffalo. Time keepers, W. J. Akers, W. J. White and Col. Geo. H. Worthington. Regatta committee, Messrs. Phil. P. Wright, W. R. Huntington, Edward Overbeke, Charles W. Kelly, Herman Lyman and Henry Gerlach.

In answer to the invitations yachts and yachtsmen from Detroit, Toledo and less distant parts of the Lake came in to Cleveland by the evening of Aug. 15 to find a hearty welcome awaiting them. An informal meeting was held at the Forest City House, at which the details of the programme were explained to the visitors, and they were asked to give suggestions or to make such criticisms as might occur to them. The programme called for races on Aug. 16 for Class D, 25 to 32ft. sailing length, by the Seawanhaka rule; and Class E, 25ft. and under; and on the following day for Class B, over 40ft., and Class C, 32 to 40ft., besides the naphtha launches and canoes. The principal entries were: Ida K, C. H. Krauss; Carmencita, G. T. Bliss; West Wind, F. L. Bennett; Alice Enright, Arthur Pettie; Shamrock, H. C. Kendall; Merle, F. B. Hower; Fanchon, G. W. Bliss; Minx, D. C. Cleary; Meteor, B. E. Lyman; Marietta, R. C. Moody; Iolanthe, A. M. McEachren; Iris, Charles L. Parmelee; Louise, F. W. Caulkins; Lulu B., Aleck I. McCloud; Petrel, C. H. Christie; Compeer, C. Richter; Restless, F. G. Overbeke; Mott B., J. C. Gardner; Fleetwing, J. McCormick; Surprise, Charles Boston; Argo, John Barth; Sunbeam, George W. Kolbe. Naphtha launches—Dearest, W. R. Huntington; Nellie, John Weber; Eugene, William DeMooy.

Tuesday was clear and warm, but with a light N.E. breeze. The start of Class D was made at 10:31, and for Class E at 10:40, the course for each class being 6 miles to windward and return.

Louise led over the course, but in the light air she was beaten by two of the smaller class starting later. The full times were:

CLASS D—25 TO 32FT.

| | Length. | Start. | Turn. | Finish. | Elapsed. | Corrected |
|---|---|---|---|---|---|---|
| Louise | 26.35 | 10 32 06 | 12 50 00 | 1 58 09 | 3 26 03 | 3 21 21 |
| Surprise | 30.27 | 10 33 41 | 1 02 00 | 2 04 13 | 3 30 42 | 3 30 42 |
| Iris | 27.58 | 10 33 41 | Did not finish. | | | |
| Carmencita | 29.94 | 10 34 15 | Did not finish. | | | |
| Iolanthe | 27.05 | 10 36 03 | Did not finish. | | | |

CLASS E—25FT. AND UNDER

| | | | | | | |
|---|---|---|---|---|---|---|
| Argo | 23.30 | 10 42 11 | 12 58 00 | 2 00 25 | 3 13 14 | 3 18 14 |
| Ida K | 21.27 | 10 42 34 | 1 03 00 | 2 07 35 | 3 25 01 | 3 21 38 |
| Petrel | 24.94 | 10 43 12 | Broke gaff—withdrew. | | | |
| Mott B | 20 09 | 10 45 11 | Not timed. | | | |

There was a thick fog on Wednesday morning, but the sun broke through it in time for a start at 11 A. M., though there was no wind for sailing. The only two entries in Class A were Wasp and Minx, neither trying to start in the light wind. The naphtha race was called at noon, with five starters, the course being the complete 18 mile triangle. The race was timed:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Eugene | 12 02 08 | 2 49 30 | 2 47 22 | 2 18 50 |
| Douglas C | 12 02 08 | 3 01 10 | 2 59 02 | 2 16 06 |
| Nellie | 12 02 08 | 3 05 05 | 3 02 57 | 3 02 57 |
| Dearest | 12 02 08 | 3 05 11 | 3 09 52 | 2 26 56 |
| Le Voyageur | 12 02 08 | 3 12 00 | 3 03 03 | 2 20 07 |

Dearest, the favorite, met with several mishaps, having been in constant use in the service of the committee for two days, up to the time of the start. The allowances were under the Isherwood table. The first attempt to start the launches was spoiled by bad conduct of some men in a sailboat, who refused to remove her from the starting line at the request of the committee.

The wind sprung up about noon, and at 12:18:30 Class B was sent away, the following yachts crossing the line: Merle, of Buffalo, F. B. Hower; Marietta, of Fairport, R. C. Moody; Sunbeam, of Cleveland, G. W. Colby; Alice Enright, of Detroit, Arthur Pettie; Lulu B., of Detroit, F. Senter. Merle won easily, the elapsed times being:

| | | | |
|---|---|---|---|
| Merle | 4 00 07 | Lulu B | 5 09 51 |
| Alice Enright | 4 08 19 | | |

Class C was started at 12:28:30. The entries were: Compeer, of Cleveland, C. Richter; Restless, of Cleveland, F. G. Oberbeke; Fleetwing, of Cleveland, James McCormack; Westwind, of Buffalo F. L. Bennet; Shamrock, of Detroit, H. C. Kendall; Fanchon, of Toledo, G. W. Bills; Meteor, of Cleveland, B. E. Lyman; Grayling, of Cleveland, H. Gerlach.

The times for the class were:

| | Start | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Shamrock | 12 38 20 | 4 51 00 | 4 12 40 | 4 10 19 |
| Meteor | 12 31 26 | 4 58 10 | 4 26 44 | 4 20 28 |
| Restless | 12 34 48 | 5 08 38 | 4 33 50 | 4 33 20 |
| West Wind | 12 30 17 | 5 11 47 | 4 41 30 | 4 30 40 |
| Fanchon | 12 32 02 | 5 16 27 | 4 44 25 | 4 44 25 |
| Compeer | 12 36 15 | 5 35 20 | 3 59 05 | . . . . |
| Fleetwing | 12 35 32 | . . . . | . . . . | . . . . |
| Grayling | 12 33 06 | . . . . | . . . . | . . . . |

Meteor, the second yacht, is a new craft, this race being her trial trip.

In the evening a banquet was tendered by the Cleveland Y. C. to the visiting yachtsmen. The regatta was a great success in all ways, and the meeting of yachtsmen from all parts of the lake is likely to do much to promote the work now in hand, of establishing a strong permanent organization composed of all the clubs on Lake Erie and as far west as Detroit. An energetic and progressive organization of this kind has long been needed to develop the vast possibilities of pleasure sailing on this portion of the Great Lakes, and the present attempt promises to fully meet this need.

## Corinthian Y. C., of Marblehead.

MIDSUMMER series for 21-footers. First race, Aug. 18, course No. 3, distance 11 miles, weather moderate, fair, wind S.E.:

| | Length. | Start. | Finish. | Elapsed. | Cor. |
|---|---|---|---|---|---|
| Catspaw, W. Abbott | 26.04 | 1 16 10 | 3 09 30 | 1 53 20 | 1 52 25 |
| Tadpole, W. E. Waterhouse | 25.05 | 1 16 12 | Disabled. | | |
| Vanessa, A. Bigelow, Jr. | 24.03 | 1 16 16 | 3 11 29 | 1 55 13 | 1 51 50 |
| Kocrali, R. C. Robbins | 23.04 | 1 16 52 | Withdrew. | | |
| Reaper, H. P. Benson | 24.00 | 1 17 12 | 3 09 41 | 1 52 29 | 1 48 47 |
| Exile, J. F. Small | 26 06 | 1 17 17 | 3 08 15 | 1 50 58 | 1 50 08 |
| Freak, John B. Paine | 25.10 | 1 18 02 | 3 10 41 | 1 52 39 | 1 51 11 |
| Sirocco, Wm. P. Fowle | 26.05 | 1 18 16 | 3 23 30 | 2 05 14 | 2 04 25 |
| Typhoon, J. I. Taylor | 23.09 | 1 18 58 | 3 25 44 | 2 06 46 | 2 02 45 |
| Thrush, C. A. Prince | 27.02 | 1 18 58 | 3 13 30 | 1 54 32 | 1 54 32 |

Winners—Class 1, first prize, Reaper; second prize, Exile; third prize, Freak; fourth prize, Vanessa. Judges—Daniel Appleton, Geo. W. Mansfield.

Second race, Aug. 19, course No. 3, distance 11 miles, strong wind, heavy sea, wind S.E.:

| | Start | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Freak | 1 11 22 | 3 01 30 | 1 50 08 | 1 48 40 |
| Catspaw | 1 11 35 | 3 15 12 | 2 03 37 | 2 02 47 |
| Thrush | 1 12 01 | 3 06 58 | 1 54 57 | 1 54 57 |
| Vanessa | 1 12 14 | 3 07 26 | 1 55 12 | 1 51 30 |
| Exile | 1 12 28 | 3 05 13 | 1 52 45 | 1 52 01 |
| Kocrali | 1 12 32 | 3 21 26 | 2 08 51 | 2 04 17 |
| Reaper | 1 12 43 | 3 05 11 | 1 52 28 | 1 48 46 |
| Typhoon | 1 13 10 | Disabled. | | |
| Tadpole | 1 14 00 | 3 17 10 | 2 03 10 | 2 01 12 |

Winners—Class 1, first prize, Freak; second prize, Reaper; third prize, Vanessa; fourth prize, Exile.

Third race, Aug. 20; Course No. 3, distance 11 miles, weather cloudy, strong sea, wind N.N.E., strong:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Sirocco | 1 10 13 | 3 25 | 15 12 | 2 15 12 |
| Freak | 1 10 15 | 3 17 | 07 34 | 2 06 50 |
| Vanessa | 1 10 31 | 3? | 06 25 | 2 03 27 |
| Reaper | 1 11 16 | 3 12 28 | 2 05 12 | 2 03 14 |
| Exile | 1 11 43 | 3 33 45 | 2 12 06 | 2 12 02 |

Winners—Class 1, first prize, Reaper; second prize, Vanessa; third prize, Freak; fourth prize, Exile. In addition to prizes as above, Reaper wins $100 cup for best 2 out of 3.

## The Gloucester Races, Aug. 26.

THE sturdy old fishing port of Gloucester, Mass., celebrated her 250th anniversary on Aug. 26, the chief feature of the day's sports being the racing of the yachts and fishing schooners in weather of exceptional severity. A heavy northeast gale howled down the coast, raising a terrible sea in Massachusetts Bay and making sailing anything but a pleasure; but the hardy fishermen scorned to reef on such an occasion, and carried whole sail over the 41-mile course under conditions which made their conduct little less than foolhardy. The yachts very sensibly reefed down; in fact, they could otherwise have done nothing, even over the partly sheltered course which was finally selected for them by the committee. The schooners were divided into two classes, the first prize for the larger class being a $300 silver cup presented by ex-Com. Hovey, of the schooner Fortuna, a Gloucester yacht; and the second being $150. The prizes in the smaller class were $150 and $75. The course was from off the Whistling Buoy, Eastern Point, past Half-Way Rock, a markboat off Nahant, around Davis Ledge Buoy, near Minot's Light, and return, 41 nautical miles. The starters, limited to vessels hailing from Gloucester, were: First class, Nannie C., Bohlin, James S. Steele, James G. Blaine, Harry L. Belden, Joseph H. Rowe, Ethel B. Jacobs and Grayling, second class, Lottie Haskins, Caviare and Elsie F. Rowe.

The Jacobs led the fleet for a time pushed by the Rowe, but in the fog she overstood the Nahant mark, losing ground, and on the jibe her main gaff broke. She held on for a time, though now second to the Rowe, but afterward gave up. On the reach to the outer mark the Belden came to the front, being first around and holding first place to the finish. The Haskins led her class over the course. The Harry L. Belden wins the Hovey cup and the Nannie C. Bohlen the second prize. In the smaller class the Lottie S. Haskins wins first prize and the Caviare second.

The weather in the morning was much too bad for the small yachts and a postponement was made until noon, at which time the outside course was abandoned and the following substituted:

Course for first, second and third classes: From starting line, leaving Dog Bar Buoy and Eastern Point Ledge Buoy on port, to and around Whistling Buoy off Eastern Point, leaving it on starboard; thence to and around Bell Buoy off Norman's Woe, leaving it on starboard to starting line, rounding flag at starting line, leaving it on starboard and repeat the course; allowance for ten miles.

Course for fourth, fifth and sixth classes: From starting line, leaving Round Rock Buoy on port hand, flag on starting line on starboard hand, Round Rock Buoy on port hand to finish line; allowance for six miles.

The times were as follows:

FIRST CLASS—30 TO 36FT.

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Chieftain | 2 30 00 | 4 20 08 | 1 40 08 | 1 46 00 |
| King Philip | 2 30 00 | 4 20 19 | 1 50 19 | 1 50 19 |

SECOND CLASS CENTERBOARDS—25 TO 30FT.

| Ida May | 2 55 00 | Withdrew. | | |
| Wizard | 2 55 00 | Withdrew. | | |

The judges were William S. Eaton, Jr., Louis M. Clark, Barclay Tilton, F. E Cabot, George A. Stewart, Frank A. Shute.

## Royal Canadian Y. C., Aug. 20.

TORONTO—LAKE ONTARIO.

THE Royal Canadian Y. C. sailed a cruising race on Aug. 20 for the 40 and 46ft. classes combined, and the 30ft. class., with a race around the island for the 25ft. class. The larger yachts, Condor, Vreda and Zelma, sailed to Hamilton, the 30-footers, Cyprus and Vedette to Oakville. The five were started together at 3 P. M. in a very light south wind, the start being off the town club house, thence out around the island buoy and thence to the lake through the western passage. The times were:

| | | | |
|---|---|---|---|
| Vedette | 3 00 10 | Condor | 3 01 15 |
| Zelma | 3 00 46 | Cyprus | 3 02 50 |
| Vreda | 3 00 49 | Oriole | 3 05 38 |

Zelma soon took the lead and steadily increased it. In the lake the wind was light from the west, and the yachts made slow progress, Vedette with her lug rig being under-canvased. The race was slow and fluky, but Zelma kept going through the calm streaks, finishing at 9:40 P. M. Cyprus sailed well, making Oakville at 8:48;10 P. M. Condor withdrew. The times were:

| | Finish. | Elapsed. | Corrected. |
|---|---|---|---|
| Zelma | 9 49 00 | 6 49 00 | 6 66 25 |
| Vreda | 10 24 20 | 7 24 20 | 7 24 20 |
| Condor | | Withdrew. | |

The 25-footers started at 3:15, Wa Wa being a little late over the line, but soon running ahead and winning easily. The race was a slow one owing to the light airs. The times were, start 3:15:

| | Finish. | Elapsed. | Corrected. |
|---|---|---|---|
| Wa Wa | 7 07 17 | 3 52 17 | 3 47 40 |
| Caprice | 7 15 00 | 4 00 00 | 3 58 47 |
| Ariel | 7 22 20 | 4 07 20 | 4 06 40 |
| Brenda | Not timed. | | |
| Kelpie | Not timed. | | |

Next day Lenore joined Zelma and Vreda for the sail home with a moderate S.W. wind. Vedette took the ground near Long Branch, but was finally hauled off by the steam yacht Electric.

## Lake Champlain Y. C., Aug. 23-24.

BURLINGTON, VT.—LAKE CHAMPLAIN.

THE house of the Lake Champlain Y. C. at Burlington, Vt., one of the handsomest club houses on fresh water, was gaily decorated on Aug. 23, the occasion being the annual regatta of the club, one of the events of the summer on Lake Champlain. The club is noted from Albany to Montreal for its hospitality, and many visiting steam yachts were present, bringing yachtsmen to witness the races and take part in the grand ball of the evening. The programme of events was as follows:

I. First race, open to all sailing yachts of 33ft. and upward. First prize, silver cup; second, silver cup.

II. Second race, open to all yachts of 20ft. and less than 33ft. First prize, silver cup: second, silver cup.

III. Third race, open to all yachts under 20ft. First prize, silver cup; second, silver cup.

IV. Fourth race, for the "ladies' cup," value $500, open to all yachts whose owners are members of the club.

V. Canoe sailing race, to be sailed under the rules, regulations and supervision of the American Canoe Association. First prize, silver cup; second, silver cup.

VI. Canoe paddling race, to be contested under the rules, regulations and supervision of the American Canoe Association. First prize, silver cup; second, silver cup.

VII. Seventh race, open to all steam yachts and naphtha launches under 50ft. waterline, to be steamed for under the Isherwood rules, distance 6¼ miles, the course to be covered in 1½ hours, and three launches to start or no race. First prize, silver cup; second, silver cup.

VIII. Rowing race, single scull or rowing boats—no outriggers allowed. First prize, $5; second, $3.

IX. Tub race, First prize, $3; second, $2.

The weather of Tuesday was poorly fitting for yacht racing, being warm with hardly a draft of wind over the still surface of the lake, but the first race was started at 11 A. M. and the second a little later. The yachts sailed slowly out the harbor and well into the lake, and then lay idly drifting before the eyes of the guests who crowded the wide piazzas of the club house. The Lake Champlain Y. C. has both this year and last offered most liberal prizes to the canoeists camping opposite on Willsborough Point, and though this year there were few competitors, owing to the rapid breaking up of the camp after the finish of the races, those canoeists who attended the regatta did their best to amuse the spectators during the calm, in four races which are described in another column.

After a spirited paddling race a steam yacht race was started, being won by the Sibyl, of Plattsburg, after which followed a rowing race in service boats, won by F. Gokey, with Edwin Conley second. A tub race afforded the usual amount of amusement to the spectators. The sailing yachts were finally compelled to give up, the wind declining to aid them. A canoe sailing race was started when a light breeze came in after lunch time, but it, too, was a failure, though the other canoe races that followed were more successful.

In the evening the Howard Opera House orchestra was present, playing for a promenade concert from 8 to 9 o'clock, the rest of the night being devoted to the annual ball, a very brilliant affair.

Wednesday was more favorable for racing than Tuesday had been in spite of a hard rain in the early morning, and three of the postponed races were sailed, as follows:

SECOND CLASS.

| | Length. | Start. | Finish. | Elapsed. |
|---|---|---|---|---|
| Gleam, W. T. Foote | 28.00 | 9 41 20 | 10 52 40 | 1 11 25 |
| Undine, J. S. De Selding | 26.00 | 9 40 45 | 10 48 50 | 1 08 05 |

THIRD CLASS.

| | | | | |
|---|---|---|---|---|
| Alpha, G. Witherbee | 21.02 | 9 40 05 | 10 51 01 | 1 10 56 |
| Cute, F. Butterfield | 21.04 | 9 40 45 | Did not finish. | |
| Gypsie, H. L. Bingham | 18.00 | 9 45 15 | 11 05 03 | 1 20 08 |
| Lulu, John Merriam | 14.06 | 9 40 40 | Did not finish. | |

LADIES' CHALLENGE CUP.

| | | | | |
|---|---|---|---|---|
| Nautilus, H. Hickok | 49.02 | 11 26 15 | 12 52 17 | 1 26 02 |
| Gleam, W. F. Foote | 28.00 | 11 27 01 | 1 27 00 | 2 00 01 |

Winners: Second class, Undine, Gleam; third class, Alpha, Gypsie; ladies' challenge cup, Nautilus.

Regatta committee—L. C. Grant, A. C. Whiting, A. Adsit, J. G. Hincus. Judges—A. C. Tuttle, A. G. Whittemore, T. G. Buddington.

## Horseshoe Harbor Club, Sept. 3-5.

LARCHMONT—LONG ISLAND SOUND.

THE Horseshoe Harbor Club, of Larchmont, celebrated Saturday and Monday by two races, the first for naphtha launches and the second for sailing yachts.

The naphtha launch race, on Saturday, was open to all launches operated by naphtha vapor, steam launches being excluded. The classes were 30ft. l. w. l. and over, 23 to 30ft. and under 23ft.; a first prize of a $50 cup and a second of a $25 cup in each class, with a $50 cup offered by Mr. Clement Gould for the best corrected time.

The allowances were on size and power together, 3s. per foot of l.w.l. and 10s. per H. P. per nautical mile. The course was a 3 mile triangle off Larchmont, 3 rounds, 9 nautical miles. The classes were started at 8m. intervals. The times were: class A, Satan, corrected time 1h. 4m. 32s. Daisy second, corrected time 1h. 7m. 5s. Class B, Kraken, corrected time 59m. 18s. The Wake second, corrected time 1h. 1m. 9s. Class C, Susie, corrected 1h. 1m. 54s. Olive second, corrected time 1h. 4m. 53s. Kraken won the Gould cup.

The regatta committee included Messrs. Pierre Noel L. H. Spence, John Neilson and W. A. Beddoe.

Monday's race had 18 starters, the course being around Execution Reef and Constable Point Buoys. The wind was strong S. W., with some sea. The times were:

CLASS I.—SLOOPS, YAWL RIGGED.

| | Corrected. |
|---|---|
| Kwasind, Oliver Adams | 1 23 16 |
| Rajah, H. W. Eaton | 1 24 40 |

CLASS A—SLOOPS NOT OVER 30FT.

| | |
|---|---|
| White Wings, J. N. Spalding | 1 46 19 |
| Laureame, Rufus King | 2 05 36 |
| Nora, G. M. Barretto | Withdrew. |
| Brenda, F. M. Scott | Withdrew. |

CLASS B—CABIN CATBOATS NOT OVER 25FT.

| | |
|---|---|
| Elfin, F. E. Towle | 1 29 29 |
| Wonder, E. W. Wales | 1 33 52 |
| Ray, W. Thomas | Withdrew. |

CLASS C—OPEN CATBOATS NOT OVER 21FT.

| | |
|---|---|
| Fairy, F. E. Towle, Jr. | 1 32 52 |
| Phyllis, F. B. Jones | Withdrew. |

CLASS D—OPEN CATBOATS NOT OVER 19FT.

| | |
|---|---|
| It, Sedgwick | 1 45 04 |
| Spindrift, Locket | 1 45 33½ |
| Ione, Andresen | 1 46 03 |
| Sunshine, Bishoprick | 1 55 04½ |
| Caprice, Bird | 1 56 11½ |
| Lark, Eddy | 2 08 16½ |
| Skip, Moon | 2 16 05½ |

## Corinthian Y. C. Sept. 3.

MARBLEHEAD—MASSACHUSETS BAY.

The Corinthian Y. C. sailed its 68th regatta, the 3d championship with a special handicap for cruisers, on Saturday in a strong southeast wind. The times being:

SECOND CLASS.

| | Finish. | Elapsed. | Corrected. |
|---|---|---|---|
| Susie, W. W. Keith | 4 11 48 | 2 01 48 | 1 59 48 |
| Ione, J. S. Poyen | 4 48 40 | 2 38 40 | 2 38 40 |

THIRD CLASS.

| | | | |
|---|---|---|---|
| Freak, J. B. Paine | 4 07 13 | 1 52 13 | 1 52 13 |
| Reaper, H. P. Benson | 4 14 24 | 1 59 23 | 1 57 09 |

FOURTH CLASS.

| | | | |
|---|---|---|---|
| Koorali, R. C. Robbins | 3 50 58 | 1 30 58 | 1 30 38 |
| Typhoon, J. I. Taylor | Disabled. | | |

CLASS A.

| | | | |
|---|---|---|---|
| Kelpie, Wm. Bassett, Jr. | 3 55 40 | 1 30 40 | 1 18 40 |
| Orinda, W. H. Winslow | 3 51 44 | 1 26 44 | 1 26 44 |
| Lorita, I. L. Butler | 4 04 59 | 1 39 59 | 1 30 59 |
| Modoc, A. P. Loring | 4 09 40 | 1 44 40 | 1 32 40 |

CLASS B.

| | | | |
|---|---|---|---|
| Bob, E. Harding | 4 08 10 | 1 38 10 | 1 25 10 |
| Oimara, D. C. Holden, Jr. | 4 11 10 | 1 40 10 | 1 25 10 |
| Jane, C. W. Parker | 4 08 41 | 1 36 41 | 1 26 41 |
| Nancy, H. Taggard | 4 07 00 | 1 37 00 | 1 27 00 |
| Bath Bun, Jordan | 4 15 20 | 1 45 20 | 1 29 20 |
| Kraken, P. Chase | 4 03 58 | 1 33 58 | 1 33 58 |
| Tadpole, W. Waterhouse | Disabled. | | |

Susie won in her class, Freak in hers, and Koorali in hers. Orinda led the cruiser class, but Kelpie beat her on handicap. Bob and Oimara tied in the smaller class. The judges were Messrs. Daniel Appleton and G. W. Mansfield.

## Rockaway Beach Yachts.

ON Aug. 28 a race was sailed off Rockaway Beach, Long Island, in a strong N. W. wind, the times being:

CLASS A—SLOOPS BETWEEN 25 AND 35FT.

| | Elapsed. | Corrected. |
|---|---|---|
| Princey | 2 05 05 | 2 05 05 |
| Agate | 2 09 28 | 2 09 28 |
| Carrie | 2 14 00 | 2 14 00 |
| Arthur W | 2 04 46 | 2 04 46 |

CLASS B—CATS BETWEEN 20 AND 25FT.

| | | |
|---|---|---|
| Marquis | 2 15 05 | 2 11 05 |
| Duchess | 2 19 05 | 2 19 35 |
| Anna A | 2 14 30 | 2 15 00 |
| P. D. Q | 2 09 28 | 2 09 00 |
| Come Along | 2 11 35 | 2 10 00 |

CLASS C—FLAT-BOTTOMED SKIFFS UNDER 20FT.

| | | |
|---|---|---|
| Lottie C | 2 16 35 | 2 16 35 |
| Kat | 2 19 43 | 2 11 40 |

Skid, Lily and Our Own capsized. The prizes were as follows: Class A $100, Class B $75, Class C $50. The judges were Messrs. Jas. Daly, John Cunningham, and Edward McAvoy.

## Hull Corinthian Y. C., Sept. 3.

HULL, MASS.—BOSTON HARBOR.

THE open regatta of the Hull Corinthian Y. C. on Saturday was sailed in a light S.W. Breeze, the times being:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Alpha | 3 15 00 | 4 47 18 | 1 32 18 | 1 11 59 |
| Exile | 3 15 00 | 4 50 03 | 1 35 03 | 1 16 42 |
| Romance | 3 15 00 | 3 52 04 | 1 37 04 | 1 18 09 |
| Vanessa | 3 15 00 | 4 54 24 | 1 39 29 | 1 19 29 |
| Asp | 3 15 00 | 4 57 39 | 1 42 33 | Not meas. |

First prize, Alpha, $20; second, Exile, $15; third, Romance, $10.

The judges were Com. H. O. Stetson, Messrs. G. W. Bouve, C. V. Souther and F. H. Smith, Jr.

## New York Yacht Racing Association, Sept. 5

NEW YORK—NEW YORK HARBOR.

THE fourth annual regatta of the New York Y. R. A., sailed on Monday, was a success from start to finish, the weather being favorable and all the arrangements as nearly perfect as it is possible to have them, the fleet of 102 starters being handled without the least delay or confusion. The officers have profited by past experience, and this year all superfluous judges, referees and other useless appendages of the average regatta were dispensed with, the entire work and responsibility being assumed by the regatta committee, Messrs. George E. Gartland, Wm. Cagger and Chas. E. Simms, Jr. As these three gentleman were old hands and thoroughly competent, everything ran smoothly. The entry list included 155 yachts, but as usual, a number entered with no intention of starting, though a very large fleet, 102 yachts, crossed the starting line off Bedloe's Island.

The courses were:

Course 1—For Classes A, B, C, D, E and F.—From the starting line around Red Nun Buoy No. 12 (Perch and Ball) and return, 27 statute miles.

Course 2—For Classes G, H, 1, 2, 4, 6 and 7.—From the starting line around Swash Channel (red) Bell Buoy and return, 21 statute miles.

Course 3—Classes 3, 5, 8 and 9.—From the starting line around Black Buoy No. 9 and return, 15 statute miles.

Course 4—Class 10.—From starting line around Black Buoy No. 11 and return, 12 statute miles.

All turning buoys to be left to port.

Monday was clear and warm, with a moderate S.E. breeze and a roll to the sea in the Lower Bay. The tide was ebb during the morning, aiding the fleet down and up. The start was made at 11:50, the fleet starting in three divisions, with intervals of 10 minutes. The course was to windward and return, the times being:

CLASS A—COURSE I.—SCHOONERS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Florida, Com. A. J. Prime | 75.00 | 3 52 41 | 3 34 00 |
| Beatrice, Geo. F. Shaver | 48.06 | 5 12 41 | 4 30 01 |
| Edith, 1, Geo. W. Poucher | 43.11 | 5 13 29 | 4 57 00 |

CLASS C—COURSE II.—CABIN SLOOPS AND CUTTERS, 53FT. AND OVER 45FT.

| | | | |

Avalon, Christine and Cameron lost their topmasts. Clara S. and C. J. Moore were disqualified for turning the wrong buoy, and Florida sailed without a number.

The fast steam yacht Yankee Doodle, originally the Buzz, was destroyed on Saturday morning at 4 o'clock, while on a shooting trip down the Delaware River. The yacht caught fire near the boiler and was totally destroyed, her owners, Messrs. William and Thomas Mc Bride, and their friends, Richard Fisher and Wm Naulty, escaping in two gunning skiffs. The Buzz was built in 1887 by C. D. Mosher, and has made a record for very fast running.

THE KRAG-JORGENSEN RIFLE, SELECTED FOR THE UNITED STATES ARMY.

## Eastern Y. C. Fall Regatta, Sept. 3.

MARBLEHEAD—MASSACHUSETTS BAY.

THE fall regatta of the Eastern Y. C., on Saturday, found only Gloriana, Harpoon and Barbara at the line; Wasp being at Newport and Marguerite and Mayflower away cruising. The wind was fresh from the south, and the course chosen was from Halfway Rock past Nahant Mark, then around a mark off Minots and return, 32 miles, a reach on first leg, to windward on the second, free on the third and a reach home.

The start was made at 11:15, the yachts being timed:

Harpoon.....11 15 14 Barbara .....11 17 11
Gloriana.....11 15 19

Harpoon started to leeward of Gloriana, and footed there for a long time, both luffing out, but near the Nahant Mark she luffed out ahead, and was first around, the times being:

Harpoon.....12 10 50 Barbara.....12 13 52
Gloriana.....12 10 58

Harpoon held the port tack on passing the mark, but Gloriana went on starboard tack seaward, so she followed, Barbara going in shore on port tack. The leaders soon came about and headed on Barbara's course, leaving her shortly under their lees. Harpoon was doing better work than Gloriana to windward, and had gained on her at the outer mark, the times being:

Harpoon.....2 10 00 Barbara.....2 14 42
Gloriana.....2 11 02

Off the wind Harpoon made a big gain, while Barbara, too, gained on Gloriana, the times at Nahant being:

Harpoon.....3 29 02 Barbara.....3 36 22
Gloriana.....3 34 02

The reach in was made under clubtopsails and small jibtopsails, the three well heeled down. The times at the Rock were:

Harpoon.....4 16 31 Barbara.....4 25 22
Gloriana.....4 21 22

The full times were:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Harpoon | 11 15 54 | 4 16 31 | 5 01 31 | 5 01 31 |
| Gloriana | 11 15 19 | 4 21 22 | 5 06 22 | 5 05 37 |
| Barbara | 11 17 11 | 4 25 22 | 5 10 22 | 5 07 19 |

Harpoon wins $75.

The race was managed by Messrs. W. S. Eaton, Jr., P. T. Jackson and H. H. Buck, on the tug G. M. Winslow.

## Far Rockaway Y. C., Y. C.

FAR ROCKAWAY, L. I.—JAMAICA BAY.

THE regatta of the Far Rockaway Y. C. on Aug. 28 was sailed in a strong N.W. wind. The course was a triangle of 3½ miles, sailed three times. The times were:

| | Elapsed. | Corrected. |
|---|---|---|
| Ettie | 1 59 15 | 2 00 50 |
| Elfin | 1 50 40 | 1 56 00 |
| Delphin | 2 00 20 | 2 01 20 |
| Sea Bird | 2 00 44 | 2 01 44 |
| Punchey | Withdrew. | |
| Rush | 2 05 50 | 2 05 50 |
| Gull | Withdrew. | |
| May S. | 1 52 30 | 1 52 30 |
| Maybe | 2 10 45 | 2 10 45 |
| So Long | 2 04 10 | 2 03 10 |

May S. was the winner.

## The Rocking-Chair Fleet.

THE following clever skit appeared lately in the New York *Times*, and though it was directed specially at one of the larger New York clubs there is much in it of such general application that we re-print it for the perusal of all yachtsmen, most of whom will be able to fill out the cast from within their own clubs:

"There appeared recently on the bulletin board of the —— Yacht Club, at its club house, the following:

"'The annual meeting of the Rocking-Chair Fleet was held on the club piazza at —— at 2 A. M., June 21. The Oracle and Windjammer were unanimously re elected to their respective positions for the ensuing year. The members then repaired to the flagship, and the club pennant was promptly half-masted with the usual honors. The club then adjourned.'

"This notice appeared one morning, and as soon as it was discovered there was a sensation in the handsome club house. When the yachtsmen went out on the piazza to take a look at things their curiosity was greatly enhanced by the sight of a Long Island Sound brick sloop at anchor in the pretty harbor close to shore. No one was aboard the craft, but that somebody had been aboard was made evident by one of the big rocking chairs that belonged on the piazza being lashed to the mast half way up to the masthead.

"That the job had not been done by a land lubber was evident. Whoever hoisted the chair with halyards had shinned up the mast, fastened the halyards above the chair, and returned to the deck by the shrouds. There was no way to get the rocking chair down except by shinning up the mast, and the ropes were tied in so many knots that it took over an hour for a sailor to lower the colors of the Rocking-Chair Fleet.

"It was hard telling at first what was in the wind, but it finally dawned on the minds of several club house fixtures that fun was being poked at them.

"Every yacht club has in its membership list a set of jolly old chaps who have lots of sport about the club house on race days and then tell you all about it when you come ashore. The —— club probably has the jolliest set of all. One rarely goes up to the club house without seeing a portion of what is now known as the Rocking-Chair Fleet holding down comfortable chairs and making itself generally cheerful.

"It is not known generally who sprung the 'fleet' upon the club, but suspicion points to a well known Wall street broker. The writing on the bulletin board looked very much like the writing of this yachtsman, and there was a great similarity between it and that of another notice which appeared a few days after the first. The second was as follows:

"'There is trouble in the Rocking Chair Fleet and extreme danger of its being hopelessly wrecked. The Oracle, upon calling the regular weekly meeting to order at the usual time (2 A. M.), stated that owing to the growth and importance of the organization it was absolutely necessary in order to properly conduct its business that a new office should be added, that of Know-it-all, and that he would offer that suggestion in the shape of a motion. It was promptly seconded, and upon being put by the Oracle unanimously adopted. The Chair then stated that nominations were in order, and that from his long and varied experience with the Rocking Chair Fleet he felt himself to be pre-eminently fitted to fill the position. He had no hesitation in nominating himself for the position.

"'Then followed a time. Wind Jammer was upon his feet in an instant and declared that his long standing and well-established familiarity with B. & S spinakers, as well as his knowledge of tank topsails, made him the only man who should be entitled to the position of Know-it-all.

"'At this juncture up jumped Hardtack, who said he had been rocking with the fleet long enough to be recognized. "I can rock with any of you, and rye, too, for that matter," said Hardtack, earnestly. "and if you don't ante up that position I'll call myself out of the fleet."

"'Here was a pretty mess. It was after 3 A. M. when the meeting adjourned, to come together again at the call of the Oracle. The Know-it-all matter was put down under the head of "unfinished business," and will soon be taken up.'"

## The Steam Yacht Truant.

THE steel cruising steam yacht Truant, designed and built by the Herreshoff Manufacturing Company, for Mrs. Helen H. Newberry, of Detroit, Mich., was successfully launched from the building ways of the main shop at Bristol on Aug. 24. The yacht is 131ft. over all, 110ft. l.w.l., 17ft. 10in. beam, 11ft. hold and 6ft. draft, with triple compound engines, designed for a cruising speed of 16 knots. The owner's apartments and saloon are forward of the machinery, the saloon being 16ft. long; all finished in prima vera. Abaft the engine space is the ladies' cabin, 10ft. long, with staterooms, bathroom, etc. The crew is berthed in the bow and the engineer's stateroom is in the engine room. The deck house has a long saloon, from which the stairway leads to the ladies' cabin. The electrical equipmadt includes incandescent lights throughout the vessel, with a search light of 20,000 candle power. The deck work is of manogany. The yacht was christened Truant by Miss Newberry. She will probably leave Bristol this week for the Lakes, by way of the St. Lawrence, her home port being Detroit.

## Hull Y. C., Aug. 31.

NAHANT—MASSACHUSETTS BAY.

THE special race of the Hull Y. C. for the 21ft. class on Aug. 31 was sailed in a fresh southerly wind, the course being around the Winthrop Bar Buoy and Graves Whistling Buoy, start and finish off Nahant, 10 miles. The times were:

| | Elapsed. | Corrected. |
|---|---|---|
| Alpha, Dunne & Hunt | 1 34 33 | 1 00 40 |
| Exile, J. F. Small | 1 38 28 | 1 07 53 |
| Vanessa, A. Bigelow, Jr. | 1 39 52 | 1 06 57 |
| Reaper, H. P. Benson | 1 44 38 | 1 11 26 |
| Romance, Loring Sears | 1 47 44 | 1 16 12 |
| R. D., James McIntyre | 1 53 46 | 1 22 04 |
| Korben, E. M. Horton | 1 54 24 | 1 20 49 |
| Yankee Maid, E. P. Stanley | 1 57 08 | 1 22 08 |

Alpha wins $80, Vanessa $50, Exile $35, Reaper $25 and Romance $10.

The judges were: James R. Chadwick, Com. J. Souther, Com. John Sietson, of the Boston Y. C., and W. E. Sheriffs.

Freak was present with number up, but did not start.

## YACHT NEWS NOTES.

THE autumn sweepstakes of the New York Y. C. will be sailed on Sept. 15, over a triangular course, ten miles to a leg, outside of Sandy Hook. Time limit, seven hours; but if the race is not finished within the time it will be started on the following day without time limit. The start will be made at 10:30 A. M. wind and weather permitting. Opened June 1 to class 3 (80 to 90ft. l.w.l.) of schooners belonging to the club and closed, according to notice, Aug. 5, with the following entries: Algea, Alert, Iroquois, Lasca and Marguerite. Entries $200 each with half forfeit. If only two start the winner will take the stakes. If three or more start the second will save her entrance money. The club adds a $500 cup for the winner if two or more start, and a $150 cup for the second if three or more start. The Ocean King or other seagoing tug will be the committee boat and will leave Pier No. 3, East River, at 8 A. M. punctually. Members can obtain tickets, $2 each, including lunch and limited to 75 in number, from the superintendent at the club house. Guests' tickets, at the same price, will be issued after Sept. 10 if any regular tickets remain over. Regatta committee, S. Nicholson Kane, Chester Griswold, Irving Grinnell.

Sorceress, sloop, James Clifford, was run down while at anchor off College Point by the tug Thomas Smith, with a tow of barges. The yacht lost her mast, bowsprit and all of rail, while her bows were stove in.

Sybil, sloop, Ervin Hopkins, Jr., was dismasted near Whitestone on Monday, also losing her bowsprir. A tug towed her into Whitestone.

*Small Yachts. By C. P. Kunhardt. Price $10. Steam Yachts and Launches. By C. P. Kunhardt. Price $3. Yachts, Boats and Canoes. By C. Stansfield-Hicks. Price $3.50. Steam Machinery. By Donaldson. Price $1.50.*

# Rifle Range and Gallery.

## Revolver Scores.

NEW YORK, Sept. 5.—The following are the scores of the New York Revolver and Pistol Club, Washington Park, Saturday Aug 27, 50 shots per man, 50yds.:

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| H Oehl | | | | | | | | | | | 70 87 82 87 76—402 |
| G E Jantzer | | | | | | | | | | | 81 79 86 80 79—402 |
| C Bishop | | | | | | | | | | | 86 76 81 71 80—394 |
| Scores of Sept. 3: | | | | | | | | | | | |
| G E Jantzer | 7 | 7 | 8 | 8 | 10 | 10 | 9 | 8 | 8 | 7 | —82 |
| | 10 | 8 | 9 | 7 | 10 | 8 | 10 | 9 | 8 | 8 | —87 |
| | 10 | 8 | 7 | 7 | 9 | 9 | 10 | 9 | 9 | 9 | —87 |
| | 8 | 8 | 10 | 9 | 8 | 8 | 8 | 8 | 10 | 9 | —86 |
| | 9 | 7 | 9 | 9 | 7 | 7 | 8 | 6 | 7 | 8 | —77—419 |
| G L Hoffman | 7 | 8 | 7 | 10 | 7 | 8 | 10 | 10 | 9 | 9 | —85 |
| | 10 | 7 | 9 | 10 | 7 | 7 | 7 | 10 | 8 | 9 | —84 |
| | 8 | 8 | 8 | 10 | 7 | 8 | 10 | 10 | 8 | 10 | —88 |
| | 8 | 9 | 8 | 9 | 8 | 8 | 9 | 7 | 8 | 9 | —83 |
| | 7 | 10 | 7 | 8 | 7 | 8 | 7 | 8 | 8 | 7 | —77—417 |
| C Bishop | 8 | 8 | 7 | 9 | 6 | 7 | 6 | 8 | 7 | 19 | —76 |
| | 7 | 7 | 8 | 7 | 8 | 10 | 8 | 6 | 9 | 7 | —77 |
| | 7 | 8 | 9 | 8 | 7 | 10 | 9 | 8 | 8 | 7 | —81 |
| | 9 | 8 | 8 | 9 | 8 | 10 | 8 | 8 | 10 | 9 | —88 |
| | 8 | 8 | 10 | 8 | 9 | 8 | 7 | 9 | 7 | 7 | —81—403 |
| Henry Oehl | 9 | 7 | 8 | 10 | 8 | 7 | 6 | 10 | 6 | 6 | —76 |
| | 9 | 6 | 10 | 7 | 10 | 7 | 9 | 8 | 10 | 7 | —82 |
| | 8 | 8 | 8 | 7 | 8 | 7 | 7 | 7 | 8 | 7 | —75 |
| | 6 | 8 | 9 | 8 | 6 | 8 | 9 | 9 | 8 | 7 | —78 |
| | 7 | 8 | 8 | 8 | 7 | 9 | 8 | 10 | 8 | 9 | —82—394 |
| J F Schultheis | 6 | 7 | 8 | 5 | 7 | 7 | 6 | 8 | 9 | 7 | —70 |
| | 6 | 7 | 5 | 7 | 7 | 8 | 2 | 7 | 6 | 8 | —63—133 |

All used .44 S. & W. except Mr. Hoffman who used .38-44.

## Lischke Rifle Scores.

JERSEY CITY, Sept. 2.—The following scores were made by some of the members of the A. Lischke Rifle Club, 17 Milton avenue, at their last shoot, Aug. 26:

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| A Lischke | 25 | 25 | 24 | 24 | 23 | 23 | 21 | 21 | 21 | 21 | —228 |
| Scharli | 24 | 24 | 24 | 24 | 23 | 23 | 22 | 22 | 20 | 19 | —225 |
| Schulte | 25 | 24 | 23 | 23 | 22 | 22 | 21 | 21 | 19 | 19 | —219 |
| Steidel | 24 | 24 | 23 | 22 | 22 | 22 | 21 | 21 | 20 | 19 | —218 |
| Strater | 25 | 25 | 23 | 23 | 21 | 21 | 20 | 17 | 17 | 17 | —209 |

## The New Army Magazine Rifle.

THE Small-Arm Magazine Rifle Board of the U. S. Army has made its report, and it turns out that of the large number of weapons submitted for examination choice has fallen upon the Danish Krag-Jorgensen rifle. This is not a new arm nor in previous tests by other boards abroad has it taken a high or leading place. The result is that the decision has already created no small surprise, and in the future it is more than likely that much criticism will be directed at the ordnance judges who dominated the board.

The Krag-Jorgensen is the composite name to show that it was the joint invention of Capt. Krag, director of the Konigsberg Rifle Factory, in Norway, and of Battalion Armorer Jorgensen. It is of the bolt type, as the Gras, Mauser, Vetterli and Berdan, in use in several of the continental armies of Europe. It has a capacity for five cartridges in the receiver, this receiver hugs the lower side of the breech mechanism, the latch door in which the cartridges are fed being on the right-hand side, while the loads enter the breech block from the left side. The shells are of the bottle-neck variety, and in the tests were from a lot of 100,000 made specially for the tests of this board. They were loaded with a nitro compound from the Wetterlin Armory, in Belgium, and use 35grs. of this powder behind a 230gr. bullet, 9 lead to 1 tin, and cased in a copper jacket. When made up the new cartridge is longer than the present Government cartridge, and in weight 100 of the old just balance 175 of the new.

The new Krag-Jorgensen arm (and the sooner it gets a new name the better) is not a light arm; it weighs 9.4 pounds and is, without bayonet, 4.35 feet. It has six grooves with a full twist in 11.8 inches. With the bayonet set the total length is 5.21 feet. The first impression on seeing the weapon is not a favorable one to old gun lovers. It looks clumsy and thick about the barrel, and the magazine looks out of proportion to the mass of the arm. This thickness of the barrel comes from the sleeve of thin steel in which the real barrel is inclosed. The idea of this is to prevent over-heating the handling part in rapid firing and to leave the true barrel free to expand and contract unhampered by any binding wood or bands, etc. The sights are attached to the steel sleeve, there being a low fore-sight for short range and another for long distance. The sleeve is attached to the barrel at the rear end, but the muzzle is left free to move at varying temperatures.

The bolt in the selected arm is a cylindrical tube sliding in the receiver. It is pierced for the firing pin and one side projects to form a locking lug when pushed home and the lever turned down. When drawn back there is another lug to check the motion and fasten it open. There is this single motion, which operates the extractor, flinging the empty shell out to the right while another shell is admitted to the left, the last part of the pull-back sets the firing-pin spring, and the trigger is then set ready for a discharge, a small thumb-piece on the magazine top enables the cartridge in the magazine to be retained there and the arm becomes at once a single loader, taking the cartridge from the top in very similar fashion to the present Springfield. The magazine may be charged to its capacity when partially empty, and it may be readily emptied without firing. It was this ready adaptability of the arm which probably won the favor of the ordnance men on the board. It is also reported that the weapon passed through the dust and rust proof successfully.

Really the choice of a new magazine arm for the U. S. Army is going forward in a sort of installment plan. The two important points of a powder and a caliber are still in abeyance. No American has yet offered a competent high velocity, compact, enduring powder, and on the caliber question there are varying opinions on every hundredth of an inch from a quarter to a half inch. The Krag-Jorgensen is now a .315cal. arm, and it is likely that the new U. S. weapons will be of that size bore.

At present a majority of the nations of Europe, etc., have adopted a magazine arm, as the following list will show:

| Nation. | Arm. | Cal. | Sighted to. |
|---|---|---|---|
| Austria. | Mannlicher. | .315 | 2,125 yds. |
| Bulgaria. | Mannlicher. | .315 | 2,125 yds. |
| England. | Lee-Metford. | .303 | 3,500 yds. |
| France. | Lebel. | .315 | 2,187 yds. |
| Germany. | "Infantry '88." | .311 | 2 242 yds. |
| Holland. | Beaumont-Vitali. | .433 | 1,968 yds. |
| Italy. | Vetterli-Vitali. | .407 | 1,749 yds. |
| Japan. | Murata. | .312 | 2,187 yds. |
| Portugal. | Kropatschek. | .315 | 2,400 yds. |
| Switzerland. | Schmidt-Rubin '89, | .295 | 2,187 yds. |
| Belgium. | Mauser. | .301 | ..... |
| China, | Lee. | .433 | ..... |
| Denmark. | Kray-Jorgensen. | .315 | ..... |
| Turkey. | New Mauser. | .301 | ..... |

The single-loader weapons in use are: Egypt and Roumania with the "Martini-Henry" .45cal. sighted to 1,460yds.; Greece, the "Gras" .433cal. sighted to 1,300yds.; Spain, the "Remington" .433cal. sighted to 1,190yds.; Servia, the "Koka-Mauser" .395cal. In France the Lebel is being replaced by the Berthier for use in the navy, and the new arm outside of France is to be made by the Hotchkiss Company.

## Garden City Rifle Team.

THE Garden City Rifle Team met for their weekly contest Tuesday evening, Aug. 30, at Burley & Erickson's shooting gallery, 146 South Halsted street, Chicago. Conditions were 25yds., 25 shots each, open sights, free off-hand position, Massachusetts paper target, possible 300 points:

W J Gibbs.....267 G O Misja.....257 E A Pierce.....252
H B Burley.....262 John Polites.....256 F Erickson.....250
Mrs L Thornton..260 Roy Taylor.....254

After the regular shoot a sweepstake was shot for and won by Mr. Misja, making a score of 111 out of possible 120. B.

## New York State Matches.

GEN. R. M. WHITLOCK announces the postponement of the State and First and Second Brigade matches from Sept. 3 to Sept. 28. For the latter date Gov. Flower has announced his intention of being present. The reason for the postponement was to give a chance for practice after the Buffalo campaign.

## Fond du Lac.

FOND DU LAC, Sept. 3.—Below are scores of the Fond du Lac Gun Club's regular shoot to-day, 25 bluerocks, high wind blowing across traps: S. B. Amory 21, Laut Lewis 19, F. L. McLain 15, A. R. Keating 14. Small attendance out, as the boys have not got over the opening of duck season at the Horicon Shooting Club. The water was high and ducks plenty, but somehow the strings of ducks were not as large as formerly. There were over fifty shooters at the club house at Horicon Marsh. A. R. K.

## A Labor Day Feat.

NORWICH, Conn., Sept. 6.—Quite a good-sized crowd on Labor Day witnessed the attempt of F. J. Smith to break the 1,000-ball record with a rifle. Mr. Smith used a Colt's repeating rifle and scored 931, this being better than Dr. Booth's score of 979, shot in Ohio in 1884. FRANK STERRY.

# Trap Shooting.

All ties divided unless otherwise reported.

## FIXTURES.

If you want your shoot to be announced here send in notice like the following:

Sept. 13-15.—Sangamond Valley Gun Club tournament, at Chandlerville, Ill.
Sept. 14.—New Jersey Trap Shooter's League, ninth monthly team shoot, at Harrison, N. J.
Sept. 14-15.—West Side Sportsmen's Association tournament, at Rochester, Ind.
Sept. 15.—East Liverpool (Ohio) Gun Club tournament.
Sept. 15-16.—Vienna (Ill.) Gun Club tournament.
Sept. 20-21.—Auburn Interstate Tournament.
Sept. 20 23.—Saratoga (N. Y.) Gun Club, annual tournament.
Sept. 23.—White Plains (N. Y.) Gun Club tournament. L. C. Platt, Jr., Treas.
Sept. 27-Oct. 1.—Grand five days' tournament at Mt. Sterling, Ky.
Sept. 28-29.—Womelsdorf (Pa.) tournament.
Sept. 29-Oct. 1.—Peekskill (N. Y.) Gun Club tournament.
Oct. 5-6.—West End Gun Club tournament, at Ottumwa, Iowa.
Oct. 4-7.—Chas. Polster's tournament, Indianapolis, Ind.
Oct. 5-7.—First annual tournament of the Riverside Gun Club, at Red Bank, N. J. First two days targets, last day live birds John P. Cooper, Sec'y.
Oct. 11.—Eastern New York League kingbird tournament, with Cruttendens & Cords new trap and pull, at Canajoharie, N. Y. T. C. Pegnim, Sec'y.
Oct. 13-15.—Wilmington (Del.) Rod and Gun Club tournament.
Oct. 18-20.—Highland Gun Club annual fall tournament, at Des Moines, Iowa.
Oct. 19-20.—Somerville Gun Club tournament, Somerville, N. J.
Nov. 23-26.—Milwaukee (Wis.) tournament, targets and live birds.
May 23-25, 1893.—Knoxville Gun Club tournament, $1,000 added to purses. Also valuable merchandise prizes.

## DRIVERS AND TWISTERS.

Mr. Penrose writes us from New London, Conn., Sept. 5: "All the tournament fixtures of the association have been shipped to-day to Auburn, N. Y. Programmes are now being distributed, and every event on the programme will be shot out. The Home Club are making great preparations for this shoot, and we are positive that it will be one of the most successful interstate shoots of the season. There will be plenty of traps on hand, and if it is the pleasure of the attending sportsmen extra events will be shot under the popular novelty rule. In shooting this rule will be no handicap; every one will shoot on an equal footing."

The East Orange Gun Club has made great preparatians for the eighth monthly team contest of the New Jersey Trap Shooters' League, to take place on the club's grounds in Harrison, N. J., on Sept 14. The East Orange Gun Club, with its characteristic enterprise, will give an all day tournament in connection with the league contest. The grounds are situated within easy reach of the Harrison depots of the Pennsylvania and the D., L. & W. railroads, and can be reached from Newark via the Newark and Harrison horse car line. The traps will be in position at 8:30 A. M., and the team shoot will begin at 2 P. M.

A good plan for the World's Fair shoot is that suggested in E. Hough's letter last week. Let the eastern shooters begin to pour contributions into the fund. FOREST AND STREAM will receive any money that shooters wish to contribute.

The Harrison (N. J.) Gun Club has appointed Thomas Grogan, George Wild, William Fein and Charles Vanbeck a committee to arrange for the club's annual clam bake.

Programmes for the Sangamon Valley Gun Club tournament to be held at Chandlerville, Ill., Sept. 13-15, may be procured from S. C. Fielden, Chandlerville, Ill.

The West Side Sportsmen's Association will hold its tournament at Rochester, Ind., on Sept. 14 and 15, and has published a very attractive programme.

A pretty fight was the one between Wolstencroft and Post for the Peters trophy. And the "Jersey Farmer" gave the Frankford favorite a good pace to beat.

Don't forget the Interstate at Auburn on Sept. 20-21. Kingbird targets will be used, and "Crutty" will be there. So will the Big Four.

Schultze and Francotte, manipulated by Ferd. Van Dyke, were too much for Wolstencroft and Edgerton during the diamond ring contest.

When will the Western team's score of 147 breaks out of 150 targets shot at be approached? And echo answers "When?"

The Essex Gun Club will hold its monthly live bird shoot on Al. Heritage's Marion grounds, on Thursday.

What a team Jersey would have had if Riggot, J. L. and J. W. Smith and Brantingham had materialized.

Trap-shooters are beginning to assert that "black powder men" should shoot in squads by themselves.

Targets on the first day and live birds on the second day at the tournament in Womelsdorf, Pa., Sept. 28-29.

The White Plains Gun Club will have a tournament at their grounds in White Plains, N. Y., Friday, Sept. 23.

Several visitors to New London were treated to rides on Messrs. Penrose and Cady's yachts.

Milt Lindsley should have had his wood-powder-Des-chree-shos-kakazzoo hand at New London.

Gus. Greiff held up a winning average with E. C. powder on the first at New London.

H. A. Penrose was so full of hustle at New York that he had no chance to shoot.

"Dutchy" Smith left a sick bed to shoot on the Jersey team at New London.

Saratoga, Sept. 20 to 23 inclusive, will draw a big crowd of shooters.

The news-gatherers were well looked after at the Keystone shoot.

John Erb intends to keep a big supply of good birds this season.

Apgar and Collins were a little off their form at New London.

Wm. Wagner, of Washington, D. C., was in town last week.

We will have a World's Fair shoot after all.

C. H. TOWNSEND.

### Hartner's Fourth.

BALTIMORE, Md., Aug. 31.—J. A. Hartner's fourth live bird and target shooting at Beagles, Md., was attended by J. Fitzpatrick, from Pittsburgh, Pa.; H. Ducker, Chas. Bonday and J. Hunt, from Weislerstown; R. Bond, from Jessups; Franklin and Dr. H. Smith, of Baltimore, and others:

No. 1, 10 standard Keystones, $1.20 entrance: Bonday 10, Hunt 9, Dr. Smith 8, Ducker 7, Franklin 7, Stevans 9, Jones 8, Dr. Lawder 7, Fitzpatrick 6, Frick 6, Hughes 8.

No. 2, 3 live birds, $2.75, two moneys: Ducker 2, Bonday 3, Hunt 3, Dr. Smith 3, Dock 2.

No. 3, 15 standard Keystone $1.50: Franklin 10, Bonday 12, Ducker 13, Stevans 10, Dukhardt 3, Hunt 10.

No. 4, 10 Keystone targets: Bonday 9, Hunt 9, Stevans 9, Ducker 8, Franklin 9, King 6, Dock 7, Jones 8, T. Hughes 8, Dukhardt 6.

No. 5, 4 live birds, $3 entrance, two moneys: Bonday 4, Stevans 4, Franklin 4, Ducker 3, Hunt 4, Dr. Smith 4, Jones 3, Dukhardt 2.

No. 6, 15 standard Keystones, $1.50: Bonday 15, Hunt 13, Franklin 11, Stevans 11, Ducker 13, Jones 12, Hughes 11, Dukhardt 10, Dock 10, Sanders 8, Spitznagle 5.

No. 7, 3 live birds, $2.75: Ducker 3, Stevans 2, Franklin 3, Hunt 3, Jones 3, Dr. Smith 2, Dukhardt 1, Bonday 2.

No. 8, 10 standard Keystones: Bonday 7, Dr. Smith 8, Hunt 10, Ducker 5, Jones 7, Stevans 6, Hughes 7, Dock 6

No. 9, 4 live birds, $3 entrance: Ducker 4, Bond 4, Stevans 3, Jones 3, Malone 3.

No. 10, 10 standard Keystones: Ducker 8, Malone 6, Bond 10, Linday 4, Stevans 7, Jones 8.

No. 11, 3 live birds, $2.75 entrance: Stevans 2, Ducker 3, Bond 3, T. Hughes 3, B. Hughes 2.

No. 12, 15 standard Keystones: Bonday 13, Dr. Smith 12, Hunt 13, Ducker 10, Jones 11, Stevans 11.

No. 13, 3 live birds: Franklin 3, Bonday 3, Ducker 2, Stevans 2, Hunt 3, T. Hughes 3, Dukhardt 3, Schauffle 1.

No. 14, 10 standard Keystones, $1.20 entrance: Franklin 7, Bonday 7, Dr. Smith 8, Hunt 9, Ducker 6, Jones 7, Hughes 6, Stevans 8.

No. 15, 3 live birds, $3 entrance: Franklin 3, Ducker 3, Dukhardt 2, Bonday 2, Stevans 2, Jones 2, Hunt 2, Dr. Smith 3.

### Chicago and Thereabouts.

CHICAGO, Ill., Sept. 3.—John Watson's new shooting park will be opened with a loud report next Tuesday, Sept. 6, under circumstances so auspicious as to insure for it a future full of glory. Upon that occasion there will be shot a match, "50 and fifty," between Col. J. Hall and 'Sieur R. C. "Stevens." The birds are to be selected ones.

"What kind of selected ones?" asked John Watson, when this wish was made known.

"Selected good ones," said 'Sieur "Stevens," a proud gleam of determination glittering the while in his bright, blue eye. This event is expected to draw out quite a crowd of spectators.

We understand here that Jack Winston, of St. Louis, manufacturer of the celebrated Wiener brand of shells, is daily receiving by mail large numbers of inquiries for prices on his Wienerwurst grade of hand-loaded match shells. Most of these inquiries add, "I am going to shoot a match, 'and you know I never make a mistake.'"

Mr. A. E. Thomas, of this city, was taken sick two weeks ago while on a visit to his old grounds at Kansas City, but writes that he will soon be well again, ready for the fall trap season.

Mr. A. G. Courtney, agent for the Lefever Arms Co., is billed to appear for a few evenings of next week.

Mr. Thos. L. Stevenson, of England, yesterday arrived from across the sea, and so soon as a vacancy arises in the Garfield Club he will be two Stevensons in that organization, where the new comer's father has long been domiciled.

Central Illinois Association shoot, Sept. 6 8, at Jacksonville, will draw out a strong contingent from the smaller cities and several shooters from Chicago.

The Michigan trap shooters meet at Saginaw, Mich., also on Sept. 6-8, will levy on Detroit and a good body of shooters in the South Peninsula.

St. Paul Gun Club tournament, St. Paul, Minn., has the same dates—Sept. 6-8. Thus we have three very considerable shoots in the middle West, all in one week. This is a great big country of ours, and great are the trap shooters thereof. E. HOUGH.

### Oneida County S. A.

UTICA, N. Y., Sept. 2.—Oneida County Shooting Association club shoot:

### Great Work at New London.

THE fifth annual tournament of the Standard-Keystone Target and Trap Company, held at New London, Conn., on Aug. 30 to Sept. 2 inclusive, was one of the most successful and enjoyable affairs of the season, both as regards the attendance, management and the treatment accorded the visitors. The grounds of the company, which are also used by the New London Gun Club, are situated within view of the magnificent harbor for which this place is famous and on the placid waters of which were hundreds of steam and sailing yachts. Among these was the pretty steam yacht of H. A. Penrose, president of the Keystone Company and of the Interstate Association, and the natty-looking schooner yacht of Walter Cady, treasurer of the Keystone Company. Directly opposite the grounds on a line with Fort Trumbull were anchored three of the vessels of Uncle Sam's "White Squadron," one of them being the frigate Philadelphia and another the monitor Miantonomah.

The weather on the opening day was beautiful and the attendance good. The arrangements, which were under the personal supervision of H. A. Penrose, were simply perfection, and from start to finish not a break was made in the smooth-running of the affair.

Among those present on the opening day were: Neaf Apgar, R. H. Breintnall, Wm. Sigler, Ferd. Van Dyke, Dan Terry, E. D. Miller, E. Collins, Al Heritage, Jacob Pentz, Frank Post, Gus Greiff, M. H. Ruppell and M. F. Lindsley, all of New Jersey; W. H. Wolstencroft and Jas. Wolstencroft, of Philadelphia; O. R. Dickey, of Boston; Le Roy Woodward, of Campello, Mass.; J. B. Savage, F. J. Potter and H. O. Whitney, of New Haven; H. L. Edgerton, of Willimantic; S. A. Tucker, of Meridian; Allen Willey and C. H. Burbidge, of Hartford and Wm. Wagner, of Washington, D. C. The local shooters turned out in good force and shot strong.

The event of the day was the contest for the handsome trophy presented by the Standard Keystone Company, which was won by Geo. A. Strong, of New Haven, on 49 breaks out of 50 targets shot at. The averages for the day were won as follows:

Expert Class.—William Wolstencroft, first, 87 4-11 per cent.; Ferd. Van Dyke, second, 84 5-11 per cent.

Semi-Expert Class.—W. Cady, first, 71 per cent.; James Wolstencroft, second, 69 per cent.

Amateur Class.—F. Post, first, 96 4-11 per cent.; Gus Greiff and B. Leroy, second, 94 5-11 per cent.

Below are the scores of the day in detail:

*The First Day.*

No. 1, 10 singles, novelty rule, no handicap, entrance $1.00; No. 2, 15 singles, Interstate Association, handicap, $2.00, $40 guar.; No. 3, 10 singles, Novelty rule, no handicap, $1.50. $30 guaranteed; No. 4, 15 singles, Interstate Association, handicap, $1.50; No. 5, 20 singles, novelty rule, no handicap, $2 50, $50 guaranteed; No. 6, 10 singles, Interstate Association, handicap, $1.00; No. 7, 15 singles, novelty rule, no handicap, $2.00, $40 guaranteed; No. 8, 50 singles, trophy contest, $3.00; No. 9, 15 singles, Interstate Association, handicap, $2.00, $40 guaranteed. No. 10, 10 singles, novelty rule, no handicap, $1 00.

No. 1, 10 singles: Seigler 7, Collins 6, Dickey 7, Climax 7, Van Dyke 9, Le Roy 10, Greiff 8, Savage 10, Whitney 10, F. Potter 10, Dana 3, F. Post 8, Cady 5, M. H. R. 8, W. W. Wolstencroft 6, E. D. *The Second Day.*

The attendance on Wednesday was better even than on Tuesday, another large contingent from Connecticut appearing on the scene. The weather was favorable for the sport. In the contest for the L. C. Smith trophy, at 50 Keystone targets, E. D. Miller broke 49 and captured the pretty silver affair.

Below are the scores:

L. C. Smith trophy day, $200 guaranteed, No. 1, 10 singles, novelty rule, no handicap, entrance $1; No. 2, 5 pairs, open to all, no handicap, $2, $40 guar.; No. 3, 20 singles, novelty rule, no handicap, $2.50, $50 guar.; No. 4, 15 singles, Interstate Ass'n handicap, $1.50; No. 5, 20 singles, novelty rule, no handicap, $2.50, $50 guar.; No. 6, 10 singles, Interstate Ass'n handicap, $1; No. 7, 50 singles, trophy contest, $3; No. 8, 15 singles, novelty rule, no handicap, $1.50, $30 guar.; No. 9, 10 singles, Interstate Ass'n handicap, $1.50, $30 guar.; No. 10, 10 singles, novelty rule, no handicap, $1.

No. 1, 10 singles: Breintnall 8, Van Dyke 7, Climax 5, M. H. R. 7, Miller 7, W. Wolstencroft 7, Dickey 9, Mizpah 6, Greiff 8, Collins 8. Siegler 8. Strong 9, Wagner 6, Bristol 7. Mills 5, Daley 5, Post 6, Cowee 8, Eddington 5. Sterry 7, Bates 9, Rockwell 6, Burbidge 4, Savage 9, Meade 4, Merrill 4, Le Roy 9, Brat 5, Longdon 9, Folsom 4, Davis 4, Lindsley 8, Apgar 6.

No. 2, 5 pairs doubles: Savage 8, Le Roy 6, Davis 5, Bush 4, Daly Field 4, Sterry 7, Lindsley 5, Folsom 6, Burbidge 6, Bell 7, Greiff 6, Rockwell 8, Wagner 9, Edgarton 8, Cowee 5, Bates 8, Bristol 5, Breintnall 9, Van Dyke 7, Climax 6, M. H. R. 7, Miller 8, W. Wolstencroft 7, Apgar 6, Dickey 5, Mizpah 8, Post 7, Cowee 5, Sigler 5.

## Second Grand International.

DES-CHREE-SHOS-KA, Mich., Aug. 28.—*Editor Forest and Stream:* Your correspondent having been prevented attending the first international tournament given by that prince of good fellows, John Parker, at Des-chree-shos-ka, resolved that nothing short of death would prevent his presence at this. In accordance with this resolution I took the night train east and arrived in Detroit at 7:10 A.M., and a few minutes later boarded one of the little steamers plying between Detroit and this famous island, situated eight miles down the river, and after a most delightful ride arrived in time to breakfast with the sportsmen already there, many of whom arrived the previous evening.

Des-chree-shos-ka (pronounced Dezreshoska) is a bit of Indian nomenclature, meaning "Here is everthing." It is one of the most lovely summer resorts on the great lakes to-day and bids fair to excel all of its competitors in the near future. It contains 2,500 acres, the upper half with over a hundred of beautiful lawns, walks, drives and tennis courts, together with a grand old forest covering about 50 acres, and all within about 30 minutes ride from Detroit, making it one of the most desireable resorts for families, excursionists and sportsmen of the continent.

The hotel and its accessories are situated on a bluff at the head of the island (formerly known as "Fighting Island"), facing Detroit and the grand exposition buildings about midway. Broad verandas encircle the hotel on the first and second floors, from which the most charming views greet the eye in every direction. The hotel and other buildings are brilliantly illuminated by electricity.

The tournament began on Tuesday. Ideal weather prevailed, and as the eye wandered far out over the broad expanse of land and water, arrayed in all the brilliancy of art and nature, we were forced to exclaim this is, indeed, the proper place in which to hold the international tournament.

The roster shows the following arrivals the first day: J. A. Penn, J. A. Bell and wife, John Wright, W. E. Walton and Dr. E. C. Myers, Wheeling, W. Va.; H. Warof, B. A. Busbaw, E. E. Thresher, Kalamazoo, Mich.; J. E. Nichols, Lansing, Mich.; M. C. Sanford, Townsend, O.; F. D. Alkire, Woodlyn, O.; Dick Smith, Toledo.; Mr. Eastman, Monroeville, O.; C. A. Young, Springfield, O.; N. W. Holt and wife, Manchester, Mich.; F. E. Cooley and family, Lansing, Mich.; Wm. Thompson, Jackson, Mich.; D. J. J. Valade and J. Neidermeir, Newport, Mich.; Al Heritage (Old South Paw) and wife, Jersey City, N. J.; C. Schelling, Lansing, Mich.; Milt F. Lindsley and his accomplished wife (Wanda); John O. Cadman, San Francisco, Cal.; Rolla Heikes, Chicago, Ill.; J. R. Cotter and C. F. Floes, Bay City, Mich.; J. A. Roble (White), Chicago, Ill.; L. T. Duryea (Davenport) and Dr. Wynn, Brooklyn, N. Y.; Louis Erhardt, Atchison, Kan.; Harvey McMurchy, Capt. Money, Brooklyn.

The entries were light in the first events, as many of the shooters preferred to rest after their long journey, and view the many attractions of the island before commencing work at the traps. Two sets of expert traps with Paul North's pull were arranged facing the south with sky and water for a background, while the woods immediately behind the shooters made a cool and shady retreat for the visitors and shooters when away from the score. The first event was called at 10:30, and from this time on the shooting was fast and furious.

| Young | 13 |
| Smith | 15 |
| Bell | 10 |
| Avery | 10 |
| Ford | 11 |
| Cotter | 13 |

Drew won the medal (second time). Heikes won first average. Sanford won second average. Seven firsts were distributed to winners respectively.

### *The Second Day.*

The morning of the second day was uncomfortably warm, and the sultry atmosphere gave promise of approaching storm, yet the shooting continued as fast and furious as though the most delightful conditions prevailed. The crew of the yacht Josephine—the jolliest crew we ever saw—visited the grounds this day and participated in several events. These gentlemen are good sailors, fine singers and artistic performers on the piano and other instruments. Their band music was simply immense, and kept the large concourse of shooters and visitors in a continuous uproar of applause. Their instruments were of their own handiwork, and each exhibited some peculiar design in mechanism which probably originated in the brain of the player and manufacturer. These gentlemen played an important part in the entertainment of the visitors, not only at the shooting grounds, but at the hotel, where there music was one of the chief attractions, especially to the ladies, many of whom had accompanied their husbands and graced the tournament by their presence. A heavy storm drove every shooter from the score for about an hour in the afternoon, but the "Josephine band" more than compensated for the loss at the traps.

Mr. Sanford won the medal.

Sanford and White tied for first and Penn won second average.

Some of the shooters left on the early evening boat in order to reach home Saturday, yet before they left they repeated the oft expressed opinion that the second "Grand International Tournament" was a little ahead of any shoot ever held in the West, at least especially in the matter of a general good time, unexcelled accommodations, courteous attention, and last but not least, good management of the shoot. We all look forward to the next meet with anticipations of pleasure. E. E. T.

KALAMAZOO, Mich.

## Answers to Correspondents.

F. L. R., Boston.—"Sport with the Gun and Rod" is edited by Prof. Mayer. The price is $5.

D. L. S., Newark, N. J.—The gun is a good one and brass shells can be used in it. Also the largest buckshot.

SPORT.—Please answer through your valuable paper what part of Pennsylvania is best for deer and bear hunting. Ans. Try Pike county.

R. E. R., Los Angeles, Cal.—The open season for wild duck in California begins Oct. 1, but I do not know when the ducks begin to come in from the north. Could "Arefar" enlighten me on the subject?

J. R. P., Philadelphia.—1. Please inform me if there is a law in Tyrrell county, N. C., that prohibits non-residents from exporting game out of the State? 2. Is a .40 82-260 Winchester rifle heavy enough for deer and bear? Ans. 1. The North Carolina law forbids exportation of quail. 2. Yes.

**MEPHISTO**

331-333 BOWERY, BET. 2d & 3d STREETS.

NEW YORK, July, 1892.

Our "ONDINA" all Havana tobacco **NEW YORK made** cigar, our world-renowned "MEPHISTO" and all other finer grades of cigars made by us are superior in many ways to those made in the tropics. In addition to all the tobacco markets of the earth to which we have access, New York City always commands the best of every material as well as labor. **OUR** New York factory is a perfectly ventilated, clean abode. No sort of uncleanliness is permitted, and our cigars, therefore, are not liable to contain matters other than tobacco, and smokers may confidently and safely use our cigars, not needing a mouth-piece or a cigar holder to prevent unpleasant consequences. **To protect consumers from imposition, every "MEPHISTO" cigar is banded.**

D. HIRSCH & COMPANY.

**Forest and Stream's Amateur Photography Competition.**

AS a due recognition of the important place of amateur photography in its relation to sports of field and forest and stream and prairie and mountain, the FOREST AND STREAM offers a series of prizes for meritorious work with the camera.

There are ten prizes: First $25. Second $20. Third $15. Fourth $10. Six of $5 each.

The competition is open to amateurs only.

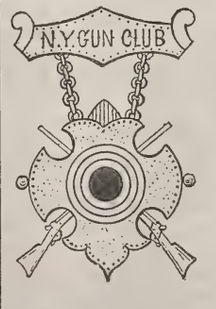
The subjects must relate to FOREST AND STREAM'S field—game and fish (alive or dead), shooting and fishing, the camp, campers and camp life, sportsman travel by land or water, yachting, canoeing, the dog.

There is no restriction as to the time when the pictures may have been or may be made—whether in 1892 or previous years. Pictures will be received to Dec. 31, 1892.

All work must be original; that is to say, it must not have been submitted in any other competition, nor have been published.

There are no restrictions as to make or style of camera, nor as to size of plate; nor as to number of pictures sent by one person.

A competitor need not be a subscriber of FOREST AND STREAM.



All photographs will be submitted to a committee.

Photographs should be marked with initials or pseudonym for identification. With each photograph should be given name of sender, title of view, locality, date, and name of camera.

The photographs shall be the property of the FOREST AND STREAM. This applies only to the particular prints sent us.

From time to time we shall reproduce in FOREST AND STREAM by the half-tone process samples of the work submitted.

Is a fine field dog and an A 1 retriever. Will be allowed all the bitches he can get. Fee $15. Address for cut and stud card, V. L. BOSSA, New Canaan, Conn.

## Scientific Education of Dogs FOR THE GUN.

**A new work by an English writer, "H. H."**

The instructions here given are the result of the author's amateur practical experience of thirty-seven years. A review in FOREST AND STREAM says:

"This work is a very well written treatise upon the subject, containing some new ideas and much that is interesting and instructive to the new beginner as well as not a little that will be beneficial to even old hands to study. The chapter devoted to kennel management is a short one, but it is very nearly complete, and is alone worth many times the price of the work to any one that will heed its teachings."

Price $2.50, postpaid, by the
FOREST AND STREAM PUBLISHING CO.,
318 Broadway, New York.

## Teufel the Terrier;

OR,

**The Life and Adventures of an Artist's Dog.**

Told and illustrated by J. YATES CARRINGTON, and written by CHARLES MORLEY, a friend of Teufel's.

A book which has had wonderful popularity in England. Paper. Price, 75 cents.
FOREST AND STREAM PUBLISHING CO.,
Broadway, New York.

## Modern Training,

**Handling and Kennel Management.**

By B. WATERS.

A comprehensive and practical guide to the training, care, management and breeding of old dogs. Cloth, 373 pages. Price $2.50
FOREST AND STREAM PUBLISHING CO.,
318 Broadway, New York.

# FOREST AND STREAM.

### *OUR COLUMBUS NUMBER.*

THE FOREST AND STREAM of Oct. 20 (the day before the Columbus celebration) will be a special Columbus number. The contents, both text and illustrations, will relate largely to the age of Columbus, and will be as interesting as unique.

### *WOOD FOR THE FIRE.*

To the traveler on the plains or in the mountains there are three essentials to a good camp. These are wood, water and grass. The water is necessary to men and animals alike, while the wood is required for cooking, and grass for the animals.

It is not always possible to obtain all three of these. In the old days on the plains "dry camps" were not unusual, though oftener one had to camp by alkali pools, whose acrid water gave little relief to the thirsty stock, and which the men could hardly drink, even in their coffee. So, too, it was often necessary to camp where there was little or no grass. In such cases there was nothing to do but tie up the poor animals to the wagon-wheels, and let them starve till daylight. If turned loose they would be sure to wander away in search of food, and in the morning might not be found.

In the old times on the prairie travelers were sometimes obliged to camp without wood; but this did not occur very often. Usually bushes would be found along the streams—a few dried willow twigs—or there would be sage brush, or the almost universal *bois de vaches*—cow wood—the buffalo chip. Any of these would do to cook with.

In the mountains good wood, water and grass are almost always to be had. As a rule, the steep slopes are timber clad, and the stream bottoms wooded. There is sage brush on the prairie, and groves of aspens scattered among the foothills. Even in the midst of this abundance, the careful traveler does not go about collecting his wood at haphazard. He knows that there are different degrees of excellence among the sorts that he has to choose from, and he selects that kind which experience has shown him to be best suited to his needs. He remembers that pine, while excellent for a camp fire, owing to the brightness with which it burns, is not the best wood in the world to cook with, since it is likely to smoke his viands and give them an unpleasant taste. Fir, he will not have at all, if any other wood can be secured. It is continually snapping and fills the frying-pan with coals. If it is used for a fire by which to sleep, it covers one's blankets with coals and sparks, burning many a hole in them, and obliging the man when he first lies down to sit up at frequent intervals and brush off the fire from his bed or clothing. This, if he is tired and sleepy, leads to the use of language entirely unscriptural. Sage brush makes a good fire for cooking and a pleasant, bright blaze to sit by, but it is too unsubstantial, and a fire of sage brush has to be constantly renewed. The same is true of any light brush that flares up for a moment and then burns down.

The ideal wood for the fire, whether it be for cooking, or to sit by after the meal is over, is dry aspen. It burns with a bright, clear flame and with little smoke, and when it has died down to coals makes the best possible fire to cook over. And then after the meal is over, as we light our pipes and stretch out our feet toward the fire, some one of the party lays on two or three sticks from the pile of split wood near at hand, the cheerful blaze rises, and we do indeed take our ease, if not in our inn, at least in our lodge. Each man provides himself with a splinter from the sticks, or with a slender branch, which he can light at the blaze if he needs it, or with which he can easily rake out a coal from the ashes to renew the light in his pipe, which has perhaps gone out while he was earnestly talking. With this fire there is no snapping. No need now to dodge a shower of sparks, which, bursting with a loud report from a blazing log, fly in all directions, or to jump up and brush off a live coal, which has been thrown on a piece of canvas which is likely to char and smoulder until a great hole is burned in it.

An aspen fire gives no trouble, only warmth, cheeriness and a bright light by which one may read, write or sew. Blessed be the aspen.

### *DOG TAXES AND DOG DESTRUCTION.*

MR. A. C. COLLINS, of Hartford, Conn., has been studying up the dog killing question, and in a letter in the Hartford *Times* contends that those statutes are unconstitutional which provide for the summary destruction of dogs upon which taxes have not been paid. The subject is one which may well receive attention. In many States the dog is recognized as property, and the owner's property rights in it may be enforced in the courts of law against dog thieves or dog killers. Yet in these same States the law provides that if the tax on the same dog go unpaid the constable or dog killer or some other public official may club or shoot on sight. This, it is contended, constitutes confiscation and destruction of property without "due process of law." Other property is destroyed in a like manner, notably unlawful fishing nets. The Legislature of this State declared nets set contrary to law to be public nuisances and as such subject to summary seizure and burning. This course has been followed by the game protectors. In one case, however, a protector who had destroyed unlawful nets was sued for their value, on the very ground that their destruction had not been after due process of law; and it was also contended that the Legislature had no power to provide for such destruction. The courts of the State sustained the law, and the case is now before the United States Supreme Court. Some of our kennel clubs might do a public service by testing the constitutionality of the dog law. There is slight probability that any individual will take this up, for the average man will not go to the trouble and expense of fighting in the courts over a dead dog.

### *THE RAIL SHOOTING.*

NOW, according to the seasons and the signs we should all be going rail shooting. The nights are growing cooler; the corn grass, or wild rice, is heading out; the woods along the marshes are showing the red and yellow tints of autumn; golden rod and aster brighten the roadsides, and cardinal flowers flame in the edge of the marsh. Over the water and along the distant hillsides hangs, morning and evening, the light haze of early autumn. Along the shore may be heard the mellow whistle of the beach bird, and from the little pond holes in the wet meadows we may now and then start a black duck or two or a little bunch of blue-winged teal. The time is at hand. The rail should be here. For the last three or four years, however, there have been no birds. On grounds where it was formerly no unusual thing to kill ninety rail in a tide, the gunner may now count himself fortunate if he secures one-fourth that number. The season opens early and all the birds bred on those marshes which are most accessible are shot long before any flight-birds arrive. When the flight birds come they are killed as soon as they reach the ground, and so there is no good shooting.

The extermination of the rail may well be viewed with alarm by gunners. There is perhaps no kind of shooting which affords greater attractions or variety than this at so light a cost in the shape of effort, and it is sad to see the sport diminishing year by year, merely because it is overdone. What remedy—if any—can be suggested which will appeal to shooters generally it is hard to say. One thing, however, is certain, that nothing would be easier than to protect the grounds where rail are shot. And if a general close time extending over several years should be agreed on by a number of adjacent States, and enforced during the month of September, we might after a few years see something like the old-fashioned flights and the "boats" of twenty years ago.

But this state of things is not likely to come about. We are most of us too anxious to get the last bird that flies, too much afraid that if we do not kill it some one else will. There is too much human nature and too little public spirit in each one of us. If it were not so, game would be more plenty everywhere.

It is to be feared that at the close of the present rail season it will be found that the marshes have again been bare of birds, and that the youngsters of to-day can shoot rail only by getting their fathers and their uncles to tell them of the good old days of twenty years ago.

### *SCHOONER RACING.*

ONE of the unexpected things which has lately happened in yachting is the marked revival of schooner racing, a revival as unaccountable as the sudden decline a few years since. The success of Sachem in 1886 and '87, followed by the rebuilding and improvement of the former champion Grayling, created an interest in schooner racing that was only second to that in the great single-stickers. With the addition of Miranda, Sea Fox, Elma, Quickstep, Iroquois, Marguerite, Œnone, Mayflower, Atlantic, Constellation, and later the rebuilt Volunteer, a very strong racing fleet was built up between 1887 and 1891. In spite of this building the racing fell off rapidly until at the end of last season the schooner classes were to all appearances as dead as the 90 and 70ft. single-stick classes.

Just what has started them into new life it is hard to say, the purchase of Constellation by Mr. Bayard Thayer has helped, and the building of the steel 90-footers Lasca and Alcæa has done still more, but it has often been proved that the building of new boats does not of necessity mean more racing.

Whatever the cause or causes may be, the result is eminently satisfactory; there has been good racing through the whole season in all classes, from the 60ft. upward to the largest, and this racing has not been limited to new and modern yachts alone, but such older craft as Azalea, Ramona and Montauk have started repeatedly, and in many cases with gratifying results to their owners. The season closes quite brilliantly with three races within a week, the final one being that of the New York Y. C. to-day. Better than this is the fact that the large schooner fleet in commission and in active racing this year is likely to be augmented by at least one 90 footer this winter, and possibly one or two of the Quickstep class.

### *THE NAVAL RESERVE.*

THE New York yachtsmen who make up the majority of the first battalion of the State Naval Reserve, have been called on for actual service for the first time since their enlistment, and some 300 of them are now doing duty at Fire Island, being called on to protect the cabin passengers of the quarantined steamer Normannia in their occupancy of the Surf Hotel, on property just purchased by the State. As was to be expected the men turned out promptly for a service that was, at the best, hard and disagreeable, in the face of an easterly gale, and that also promised to be serious, though the opposing force of baymen has since dispersed peaceably.

THE Supreme Court of Arkansas has sustained the law which forbids the export of game and fish. The statute of 1889 declared game and fish to be the property of the State, and the taking of them to be a privilege granted by the State to individuals; and the privilege was limited to taking for consumption within the State. The decision, printed elsewhere, affirms the power of the State to impose such limitations; and indeed this is the only logical conclusion. That the case has been carried through with success is largely due to the able attorney for the State, J. M. Rose, Esq., of Little Rock.

THE first quarterly meeting of the executive committee of the New York State Association for the Protection of Fish and Game will be held in Syracuse, Oct. 13. As the purpose of the meeting will be in large measure for organization, it is important that all clubs should be represented.

# The Sportsman Tourist.

## IN MEMORIAM—JOHN G. WHITTIER.

SEPTEMBER 8, 1892.

POET of freedom! on thy grave
I lay this modest wreath;
In tribute to the fearless, brave,
True heart that sleeps beneath.

Nurtured amongst New England's hills,
Thou felt their influence strong,
Her granite cliffs, her mountain rills,
Still sparkle in thy song.

Still through thy verse shall Bearcamp flow,
Or grim Chocorua rise,
While Agiochook's* crown of snow
Shall pierce the northern skies.

Well hadst thou Nature's secrets scanned,
Explored her every nook
Who gleaned from mountain, lake and stream
The "Feast of Penacook."

Thy "Barefoot Boy" goes whistling on,
As lightsome as the day,
While clad in simple homespun gown,
"Maud Muller" rakes the hay.

"Snowbound" with thee we hug the fire,
Gaze on the Tented Bay;
Awake with Barbara Freitchie's ire,
Hear Lucknow's bagpipes play!

Still "Cobbler Kezar's" lapstone rolls
Adown the hills of time;
Still faintly sound the evening tolls
Of Norumbegas' chime.

Yet through, above, and over all,
Sounds Freedom's clarion clear;
Knight-like, thou answered to her call
Without reproach or fear!

For Freedom's cause, with steadfast toil,
Thy voice and song thou gave,
Nor ceased, till on Columbia's soil
There trod no negro slave.

Come to thy rest! O seer and sage,
At last "Our Master" calls,
And from thy shoulders, bent with age,
The prophet's mantle falls.

Oh! that some younger bard may spring,
To seize thy fallen lyre,
And touch again each sounding string
With Truth's Eternal fire!

Gone to thy rest! Thy own sweet "Psalm"
Points out the hidden way!
"The Eternal Goodness," from its calm,
Unfolds Eternal day! VON W.

*Agiochook, the Indian name for Mt. Washington.

## THE OLD CAMP.

THE following lines written by an old Adirondacker, when camping out was not, as now, seemingly camping, but a matter of fact and real pleasure and solid comfort; when one recalls the Brick Club, the Walton Club, the Black Eye Club, when Martin's (on the Lower Saranac) and Bartlett's (on the Upper Saranac) entertained Silas Arnold, I. G. Baldwin, Mr. Krum, P. McLean, Julius Catlin, M. Solomon, I. G. Wilson, L. Starbuck, Dr. J. R. Romeyn, Mr. McGregor, J. P. Willard, Col. T. J. Hoyt, S. F. Hoyt, Wm. A. Wheeler, John Ware, M. S. Colburn, A. B. Street, John A. Griswold, Geo. E. Hart, H. J. Lowe, L. B. Reed, Rev. Drs. Van Dyke, Sr., and Jr., Wm. J. Stillman, John H. Reynolds, E. A. Morrison and many other true and worthy sportsmen, and as guides, Lute Evans, S. Martin, Geo. Ring, Scott Peck, Tom Haley, John King, Dug Kingman, Jesse Corey, the Moodys—not omitting Cortez Moody especially. Oh, those were glorious days. But, alas! now with railroads, fashion and folly and mascalonge and pickerel, how changed, never again to return. There only remain to those who survive and can recall the old camp, so graphically described by L. S., the recollections of our pleasant ways together and joyous companionship. I might write much more of the good old times but will not now trespass more on your columns, but may some other time if agreeable to you. S. S. N.

### The Old Camp.

We landed once more at the old camp after many years' absence, and looked around at its familiar yet strange appearance. Many that camped with us there are not living; others from various circumstances have drifted out of our daily lives.

The camp shows a larger area of "clearing," telling that many a tall tree has been felled with its peculiar echoing fall, to make bright fires which have been lighted, burned out, and those who sat around the cheerful blaze departed. Raspberry bushes breast high, loaded with ripe fruit, occupy the place we remember was covered by large trees. Dead and brown hemlock boughs, once green and fragrant, lie on the ground, showing where the tents have stood. An old birch bark jack with its burnt out candle leans against a tree stump. On the top of the stump is a forgotten piece of soap and a trout-fly with the gut chafed off at the top, telling that the owner had good sport. On another stump are broken bottles and rifle balls beneath them. There are empty bottles on the ground bearing familiar labels. The spring with its cold water where we kept our butter is unchanged. The river, though man may come and man may go, flows on forever. It is like a thing of life; the same rocks are there where we stood and cast our flies for trout. There are not so many trout in the river as in our younger days, or as much of anything, unless it be memories. The marsh in front that the guide would insist upon calling a "slew" is unchanged in its green surface. When we watch it at nightfall we expect again to see the deer creep cautiously out to feed.

There are but two sounds that break the stillness of the old camp—the buzzing of the bluebottle fly, about whom we wonder what he finds to live on when no one is there, and the weird but beautiful song of the hermit thrush. Mr. Street called it the "Saranac nightingale," doubtless because he may first have heard it on the river below Harrietstown. Nothing in the woods illustrates its cheerful solitude equal to its song. Like the cry of the sea gull amid the roar of the ocean, the hermit thrush speaks the language of its surroundings. For years, I was told, no one ever saw it. Subsequently I saw it in the old camp every day. It sang from the top of a stump while I was lighting my fire at the bottom. It may have been friendly with me, recognizing an ungifted brother—the hermit without the song.

We take our seat in the boat from the shore of the old camp for the last time. We shall not see it again, but when in after years in far off lands we think of the love of the beautiful women and good men who sat with us around the camp-fire, we can at least say the happiness was even greater than we then knew. L. S.

## A CAMPER'S DIARY.—II.

*Aug. 15.*—Stateroom, 10:30 P. M. We got delayed about starting so it was not till to-night we found ourselves aboard steamer in Boston harbor. Sam and I arrived first and by and by came Mack and Valentine marching up the plank. Valentine wore a soft hat and carried all the luggage, so his long length was slightly sprung. He had an awful big extension bag. No doubt Mack's things were in there, too. Mack came after. Less of stature and lightly encumbered, he looked the gentleman all over. I said, "What you got there Mack, in the gun bag?"

Mack looked suspiciously all around and then reprovingly at me and shook his head and changed the subject. He said, "Sssh! Where you been Sam?" "Been looking up luggage. Got it all located—tent bag, provisions, camp freight and all, so now we're ready for this canoe to start."

By and by we got up on the high deck among the walking beams and smoke stacks and looked off and told each other what a good start it was, and denied that we were in a slightly boyish, exalted state of mind, and argued about the distant lights appearing in the gloom, and applauded softly the singing, and got sleepy watching the suds floating down the wake toward the moon, and turned in. I'm bunking with Sam. He says, "Oh, come to bed, Jeff."

*Aug. 16.*—Portland. A restaurant. Waiting for breakfast. All smiling but Valentine. Rings under his eyes. His room was too near the engine. He says he tossed and tumbled and finally dreamed he was tied all night to the wheel and every paddle stroke took him in the back. Sam and I looked sympathetic, but Mack said, "Marine Mazeppa—sort of."

*Aug. 17.*—Lakeside Inn. 5:30 P. M. Just got here. The view slopes down through the fields to the lake and there lies the little steamer we shall take in the morning. Left Bethel this morning at 8:30. Ah! that was a ride, a thirty-mile ride on a buckboard stage with a canopy top, and mud on the wheels, and baggage strapped on like a peddler's pack. The road lay along the course of a headstrong stream, just near enough to watch its adventurous career and in a measure to share its vicissitudes. There were clouds at first, but they went off and left the sun to make a view of mottled mountain sides and dazzling water and green intervals and warm clumps of raspberry and golden rod beside us, crunching along through the Bear River valley. Half way through we stopped at the Blacksmith's house for dinner. The returning stage was already there, unhitched, and its passengers, two young men, were going in, so we all sat down at table to size each other up. They were nice-looking fellows, but their creased clothes and mosquito ravages on wrist and forehead stamped them. They were campers. So they told all about their trip up Cupsuptic and down Magalloway and all over. There were three of them, and had been out four weeks, but the third fellow had refused to tramp ten miles to catch the steamer, so they left him at his leisure.

*Aug. 18.*—On the Lake. This is a little steamer. One man for captain and one for crew. I judge her average load is about one man and a gun, so we four with our baggage are a sort of Coney Island excursion. Valentine sits back in the shade with a college text book. Mack and Sam are lolling on bags of meal in the bow. Sam's eyes are steadfast on the distant peak, Aziscohos, from which we shall view the promised land. Mack's sleeves are rolled up and he's idly watching his arms grow red. He looks around and says, "What you doing Jeff?" I say, "Taking your picture, Mack."

This is later.—By and by Mack felt his chin and says, "By George, Sam, I'm not going to shave this trip."

"Why not?"

"Why not! I guess you didn't see that fellow at the house last night; looked fine. Somebody drove him up about nine o'clock. All tanned up black; hadn't shaved at all. Had a paddle and a rifle and things, too. By George, I hope my corduroys 'll look as bad as his when I come out."

"Yes," says Valentine, "Mack was stuck on him. You know that fellow sat there dangling his legs and telling the landlord about his trip when Mack came along and happened to hear something about 'Magalloway' and 'Cupsuptic' and he broke right in and stuck out his hand and says, 'Oh,' he says, 'we know you,' he says, 'we know you; you're the Third Fellow.'"

"Maybe I did," says Mack, "but I notice you've got a couple of flies twisted around your hat to-day, and that's a wrinkle you got from him."

*Same date. 9 P. M.*—At Flint's. Well, the little steamer paddled out of the lake and down the Androscoggin and into the Magalloway a little way, to the end of her journey at Upper Settlement. The settlement was not visible and we landed on a grassy bank. The wharf consisted of a couple of floating logs over which an active fellow with a bag of meal on his shoulder went with much rocking but quick and sure recovery. Then the men turned to, to "wood up," and we disappeared down the road toward Flint's. At 2 o'clock we found ourselves here with the long-sought mountain looming before us. At 3, in climbing rig, we filed across the pasture and disappeared in the woods at the base. Then it was up, up, up, for an hour or more, till we felt ourselves growing smaller and more insignificant, and the trees dwindled to scrub, and then to huckleberries, and then to moss as we merged on top and craned our necks for the first grand view, the vision the eagle gets. For just a moment we steadied against the wind and held our breath at the immensity of the view, and that was the last. The storm that had been on the horizon flanked us after we started and now closed in and the rain descended. Mack held his coat collar and made himself a profile on the highest rock. Sam stood dejectedly on the site of the old cairn. A vandal had been there. The little flag was gone, the pile torn down and scattered and the box of records taken. The clouds grew blacker. The sky was filled with rain. The drops sparkled on the rocks and on us, and every drop was a cold pint. Sam says, "This is a sad and sorrowful moment. Let's go down." So we went. A mountain torrent had appropriated the pathway, so we went down in company.

Well, our clothes are all down in the kitchen now drying around the stove. To-morrow morning we breakfast early, don our camping rig complete, leave our city clothes behind and take wagon across a spur of the mountain, down to the river again at the head of the falls. I expect there's a couple of canoes there hauled up on the bank in waiting. JEFFERSON SCRIBB.

# Natural History.

## "LIFE HISTORIES OF N. A. BIRDS."

ALL ornithologists and most sportsmen are aware that Capt. Bendire has for some time been engaged on a work on North American birds, with special reference to their breeding habits, nests and eggs. Last winter we announced the completion of the author's labor on the first volume of the work, and said that only the manufacturing remained to be done. This has now been completed and the first edition of Part I. of the work has been issued by the U. S. National Museum.

Capt. Bendire has long been known as standing in the first rank among America's practical ornithologists and oölogists. His wide experience has given him a personal knowledge of North American birds which is probably not equalled by that of any other man in the world. Besides this, his wide acquaintance among collectors gives him the benefit of an unusually large circle of observers, upon whose experience he can draw. Many writers on birds, or indeed on other natural history subjects, when they have exhausted their own knowledge of any species, are satisfied to go to the books and quote from the observations of other writers what has been printed by them. This has not been Capt. Bendire's method. By direct personal correspondence with a great number of men interested in our birds he has supplemented his own extended knowledge by that of hundreds of others, and the result is a mass of material which is very full, wholly fresh and abounding in novel points. How extremely interesting his "Life Histories" are is shown by the examples already printed in FOREST AND STREAM giving the account of the bald eagle and Gambel's partridge.

Little has been done in oölogy in this country since the publication of the "History of North American Birds" in 1874, and even in that great work the breeding habits of the birds were not treated with any great fullness of detail. Since that time large collections of nests and eggs have been brought together and great advances made in our knowledge of this subject. It is high time, therefore, that a work should be brought out in which the breeding habits of our birds should receive especial attention. It was Professor Baird's desire that Captain Bendire should undertake this work, and this desire was shared by Professor Langley and Dr. Goode. The wish was a natural one when we consider Captain Bendire's standing in his special field of science, and the further fact that no inconsiderable portion of the Smithsonian collections were made by him.

Although the present work has "special reference to their breeding habits and eggs," it is by no means confined to this aspect of the life of our birds. The migratory and breeding ranges, the food, habits, and generally the life history of each species is given very fully. Each species and sub-species is treated separately, and an especial effort is made to accurately define the breeding range of each. Only a naturalist can have any conception of the painstaking industry and care involved in this one branch of the work.

The present volume treats only of the gallinaceous and rapacious birds, species which may be supposed to have an especial interest for the readers of FOREST AND STREAM. The grouse, partridges, turkeys, curassows and doves occupy 156 of the large quarto pages, and the remainder of the 414 are devoted to the vultures, hawks and owls.

The twelve plates, representing the eggs of about 100 species, are beautiful specimens of the lithographer's art, and we should imagine must satisfy even the critical eye of the author.

In his treatment of each species, Captain Bendire gives first its number in this work, and its scientific name; then follow two or three lines of synonymy, giving the first name applied and the last, together with the numbers which designate the species in the works of recent authors. Geographical and breeding ranges follow separately, and then comes the life history of the species, the observations of the author and of other observers. The nest is fully described and careful measurements given of eggs from designated localities.

In the account of almost every species may be found some fact which is new, and the whole work is written with a freshness and enthusiasm which can hardly fail to charm the reader.

To give anything like a just idea of the interesting material contained in this volume is beyond the limits of our space, but taking up some of the gallinaceous birds we select a few paragraphs almost at random. Speaking of the Texas Bob White, Capt. Bendire says:

Mr. William Lloyd, of Marfa, Texas, informs me, "The Texan Bob White is a bird of the lowlands, and is not found above an altitude of 2,000ft. Their food consists of small berries, acorns, grain, buds and leaves of aromatic herbs and small shrubs, varied with occasional beetles, grasshoppers and ants, especially the winged females, of which they seem to be very fond. They are very unsuspicious, and their low notes, uttered while feeding, attract a good many enemies. I have seen foxes on the watch, and the marsh harrier perched in a clump of grass on the lookout, waiting for them to pass. But the many large rattlesnakes found here are their worst enemies. One killed in May had swallowed five of these birds at one meal; another, a female evidently caught on her nest and a half dozen of her eggs; a third, four Bob Whites and a scaled partridge. The young are also greatly affected and many killed by heavy rains in June and July; numbers perish then from cold and protracted wet weather. When alarmed by a hawk sailing overhead they run under the mother for protection, as domestic chickens do."

The confidence and familiarity shown by birds which

are protected is illustrated by this note on the valley quail of California:

Mr. William Proud, who is quite familiar with the habits of the valley ypartridge, writes me from Butte county, California, regarding them as follows: "Hundreds of these birds roost every night in the shrubbery around my house. Some of them are very tame, feeding among the chickens and coming on the verandah. They appear to know that they are protected. They mostly roost in thick brush, and on the ground when the brush is not at hand. In early seasons they begin to pair in the last week of February, but the time varies somewhat according to the season. During this period there is considerable fighting among the males for the favor of the coveted female. This is kept up until they are suitably mated and the nesting season arrives. This usually begins here about the last week in March, when the pairs scatter about the shrubbery along the banks of creeks and in adjacent ravines, along hedgerows and brush fences and on the borders of cultivated fields. The earliest nest I have ever found was on March 15, and on April 15 I met young birds probably a couple of days old. I consider fourteen eggs to be about the average number laid by these birds, and have found as many as twenty-four in a nest. The large sets I attribute to other hens laying in the nest, probably young birds which have failed to make preparation for their own eggs. On May 21 my dog pointed a valley partridge on her nest, which contained twenty-two eggs, and every one hatched."

The packing of the Canada grouse, which will be new to most readers, is referred to as follows:

Mr. Manly Hardy, of Brewer, Maine, a reliable and careful observer, writes me as follows: "I have been over every part of this State where this bird is likely to be abundant, east from Penobscot, from the sea to the North Corner Monument, but I have always found the Canada grouse very scarce everywhere. Five once and six at another time are the largest number I ever saw together. I have many times traveled a month, and sometimes two months outstandin in the woods, where they ought to be, without seeing over one or two.

"A Micmac Indian, whom I consider reliable, tells me of having seen a pack of many thousands somewhere east of Halifax, Nova Scotia, on which their whole village lived for weeks, moving after them when they moved. The males greatly predominate over the females, at least two to one. They feed almost entirely on the needles of spruce and fir, also hackmatack and berries in summer. They show a preference for some fir trees over others, as I have seen them return to the same tree until it was nearly stripped. When disturbed they always take to the trees, walking about in them, from one branch to another. My father, who had opportunities to see them drum, told me they drummed in the air while descending from a tree. They would fly up on a tree, then start off and drum on the way to the ground, like a Quaker grasshopper. When on the ground they scratch a great deal more than other grouse do."

We know so little of the habits of ptarmigan that the following notes on *Lagopus lagopus* are very welcome:

Mr. L. M. Turner, in his manuscript on the birds of Labrador and Ungava, makes the following statement regarding this species: "In the spring these birds repair, as the snow melts, to the lower grounds and prepare for the nuptial season. About April 10, they may be heard croaking or barking on all sides. A male selects a favorable tract of territory for the location of the nest, and endeavors to induce a female to resort to that place. He usually selects the highest portion of the tract, whence he launches into the air uttering a barking sound of nearly a dozen separate notes, thence sails or flutters in a circle to alight at the place whence he started, or to alight on another high place, from which he repeats the act while flying to his former place. Immediately on alighting he utters a sound similar to the Indian word *chu xwan* (what is it?) and repeats it several times, and in the course of a few minutes again launches in the air. Early in the morning hundreds of these birds may be heard, continuing until near 11 o'clock, when the bird then becomes silent until after 3 o'clock, when he again goes through the same performance, though with less vigor than in the morning. In the course of a few days a female may be found in the vicinity. The actions of the male are now redoubled, and woe be to any bird of his kind which attempts to even cross his chosen locality. Battles ensue, which for fierceness are seldom equaled by birds of larger size.

"In the vicinity of Fort Chimo the nesting of this species begins during the latter part of May. The nest is usually placed in a dry spot among the swamps or on the hillsides where straggling bushes grow. The nest is merely a depression in the mosses, and contains a few blades and stalks of grass, together with a few feathers from the parent bird, which is now in the height of the moult from the winter to the summer plumage.

"The first eggs obtained were two on June 1, 1884, this being the earliest record at Fort Chimo. The number laid for a set varies greatly in different localities. At Fort Chimo seven to nine is the usual number, although in exceptional instances as many as eleven and rarely thirteen may be found. While I was at St. Michael (Norton Sound, Alaska) I frequently found nests containing as many as fifteen and several times found seventeen. I was there informed that over twenty eggs had been taken from a single nest. On neither side of the continent did I hear that more than one female deposited eggs in the same nest. I can affirm that a clutch of seven eggs may be taken, and, if the nest be not disturbed, the female will deposit nearly the same number again. These may again be taken, and not over three eggs will be deposited, and if disturbed a third time she will lay no more unless she selects a new location, which, of course, would be difficult to ascertain.

"I cannot speak accurately on the subject, but think that seventeen days are required to incubate the eggs. On June 20 I obtained a young bird of this species, which was less than forty-eight hours out of the shell. This was the earliest record. Thousands of these young birds must perish annually, either from the cold rains or from their parents being killed for food. The Indians consider the downy young of the ptarmigan a special delicacy, even if taken from the shell; the bird serves in lieu of an oyster. I once had occasion to require the services of several Indian women to blow some eggs, which, during a pressure of other work, I had no time to do. I set them to work and frequently went to see if the work was progressing satisfactorily. I observed a pile of birds without, and some with feathers on, lying on a board. I inquired why they were being reserved. An old woman picked up one of the birds by the leg, and throwing back her head opened her mouth and indicated the purpose plainer than words could tell. After the middle of August the birds have acquired a good size, and are then feeding on berries of various kinds. They are then quite tender, of nearly white flesh, and when properly prepared form a pleasant food for the table. The young birds of the year attain their full growth by Nov. 1."

The very full account given of the habits of one form of the sharp-tailed grouse will be read with interest by the many who are familiar with the species during the autumn shooting and at no other season of the year:

Mr. Ernest E. Thompson has also kindly placed some of his notes on this race, made in southern Manitoba, at my disposal, and I made the following extracts from them: "The sharp-tailed grouse, while eminently a prairie bird in the summer time, usually retires to the woods and sand hills on the approach of winter; but in the spring, before the snow is gone, they again perform a partial migration and scatter over the prairies, where alone they are to be found during the summer. They are very shy at all times, but during the winter the comparatively heedless individuals have been so thoroughly weeded out by their numerous enemies, that it requires no slight amount of stalking to get within the range of a flock in the spring time.

"The advent of the grouse on the still snow-covered plains might prove premature but that they find a good friend in the wild prairie rose (*Rosa blanda*), which is abundant everywhere; and the ruddy hips, unlike most fruits, do not fall when ripe, but continue to hang on the stiff stems until they are dislodged by the coming of the next season's crop. On the 'Big Plain' stones of any kind are unknown, and in nearly all parts of Manitoba gravel is unattainable during the winter; so that the sharptails and other birds, that require these aids to digestion, would be at a loss were it not that the friendly rose also supplies this need, for the hips, besides being sweet and nutritious, contain a number of small angular seeds which answer perfectly the purpose of the gravel.

"To illustrate the importance of this shrub in this regard, I append a table of observations on the contents of crops and gizzards of grouse killed during the various months as indicated:

"January—Rose-hips, browse, and *Equisetum* tops.
"February—Rose-hips and browse.
"March—Rose-hips and browse.
"April—Rose-hips and browse of birch and willow.
"May—Rose-hips and sand-flowers (*Anemone patens*).
"June—Rose-hips, grass, grasshoppers and *Proconia costalis*.
"July—Rose-hips, seeds of star-grass, and *P. costalis*.
"August—Rose-hips, grass, strawberries, and *P. costalis*.
"September—Rose-hips, grass, berries, and *P. costalis*.
"October—Rose-hips, grass, and various berries.
"November—Rose-hips, birch and willow browse, and berries of arbutus.
"December—Rose-hips, juniper berries, and browse.

"This is of course a mere list of staples, as in reality nothing of the nature of grain, fruit, leaves or insects comes amiss to this nearly omnivorous bird, but it illustrates the importance of the rose-hips, which are always obtainable, as they grow everywhere, and do not fall when ripe. In the course of my experience I have examined some hundreds of gizzards of the prairie chicken, and do not recollect ever finding one devoid of the stony seeds of the wild rose.

"After the disappearance of the snow, and the coming of warmer weather, the chickens meet every morning at gray dawn in companies of from 6 to 20, on some selected hillock, or knoll, and indulge in what is called 'the dance.' This performance I have often watched, and it presents the most amusing spectacle I have yet witnessed in bird life. At first the birds may be seen standing about in ordinary attitudes, when suddenly one of them lowers its head, spreads out its wings nearly horizontally and its tail perpendicularly, distends its air sacs and erects its feathers, then rushes across the 'floor,' taking the shortest of steps, but stamping its feet so hard and rapidly that the sound is like that of a kettle drum; at the same time it utters a sort of bubbling crow, which seems to come from the air sacs, beats the air with its wings and vibrates its tail, so that it produces a loud, rustling noise, and thus contrives at once to make as extraordinary a spectacle of itself as possible. As soon as one commences, all join in, rattling, stamping, drumming, crowing and dancing together furiously; louder and louder the noise, faster and faster the dance becomes, until at last as they madly whirl about, the birds leap over each other in their excitement. After a brief spell the energy of the dancers begins to abate, and shortly afterward they cease, and stand or move about very quietly, until they are again started by one of their number leading off.

"The whole performance reminds one so strongly of a 'Cree dance' as to suggest the possibility of its being the prototype of the Indian exercise. The space occupied by the dancers is from 50 to 100ft. across, and as it is returned to year after year, the grass is usually worn off, and the ground trampled down hard and smooth. The 'dancing' is indulged in at any time of the morning or evening in May, but it is usually at its height before sunrise. Its erotic character can hardly be questioned, but I cannot fix its place or value in the nuptial ceremonies. The fact that I have several times noticed the birds join for a brief 'set-to' in the late fall, merely emphasizes its parallelism to the drumming and strutting of the ruffed grouse, as well as the singing of small birds.

"The whole affair bears a close resemblance to the maneuvering of the European ruff, and from this and other reasons I am inclined to suspect the sharptail of polygamy. When the birds are disturbed on the hill they immediately take wing and scatter, uttering as they arise their ordinary alarm note, a peculiar vibratory 'cack, cack, cack.' This is almost always uttered simultaneously with the beating of the wings, and so rarely, except under these circumstances, that at first I supposed it was caused by the wings alone, but since then I have heard the sound both when the birds were sailing and when they were on the ground, besides seeing them fly off silently. They have also a call, a soft, clear whistle of three slurred notes, E, A, D, and a sort of grunt of alarm, which is joined in by the pack as they fly off. Their mode of flight is to flap and sail by turns every 40 or 50yds., and so rapid and strong are they on the wing that I have seen a chicken save itself by its swiftness from the first swoop of a Peregrine falcon, while another was seen to escape by flight from a snowy owl."

Enough has already been said to indicate the great interest and value of this first volume of Capt. Bendire's work. It is to be hoped that no great amount of time will elapse before the second volume is got under way.

### Relation of Phosphoresence to Color in Marine Forms.

IN my various cruises along the Pacific coast I have been much interested in the abnormal profusion of phosphoresence in the water, and I have often wondered if this phenomenon were not in some way intimately associated with the brilliant colors and exuberant growth of vegetables and ichthyc forms, which are more various all larger, and more abundant and dissimilar in flavor and color from cognate forms on the Atlantic side of the continent.

Whatever the cause may be which thus affects the animal and vegetable life, it must in time manifest itself in the characteristics of the people when sufficient time shall have elapsed to impress the influence of this environment upon them. Here is an interesting field for scientific investigation lying wide open.

CHARLES HALLOCK.

## Camp-Fire Flickerings.

"That reminds me."

YEARS ago, when Professor Otis T. Mason was training the young and before he had entered upon the comprehensive ethnological studies which have made his name famous in the publications of the Smithsonian Institute, he required each of his pupils, at a certain stage of progress in study, to write a letter. One of his youngest boys had constantly failed to accomplish this task, and was finally told that he must do his duty or be sent home to his mother. The boy at last said through his tears: "Professor, I can't write a letter, but I think I can write a story." He was allowed to substitute this for the letter, and here is what he wrote:

"Wunst ther was a precher and he got onto a ship and he saled and saled and saled and bime by he come near a iland and when he come near the iland a big storm come up and it blode and blode and blode and the precher and all the peepel on the ship thought they was goin to git drownded and a littel bird got blode of the iland and tride to git onto the ship but evry time he tride to git onto the ship the ship leaned over the other way and the littel bird got left but he didnt set down in the water and cry he just kep peggin away and bime by he lit down into a sale and a saler went up and got the littel bird out of the sale and giv him some bred and water and bime by when the storm blode away the sun come out and the ship come to land and the precher and all the peepel was glad and the bird flude away.

"Morel.—If you dont git what you want first jest you keep peggin away and youl git it bime by."

## NOTES FROM THE GAME FIELDS.

### The Flathead Valley.

KALISPELL, Mont., Sept. 10.—A party of New York gentlemen, including Julian T. Davis and son, General Burnett and Judge Wallace, of the U. S. Supreme Court, are on a hunting and fishing expedition in the Rockies. They occupy a private car, and will spend a week or two in the Flathead Valley. The surprise was universal to find a town of 1,500 people in what was so recently an unknown part of the country. The surprise was not confined to the fact of discovering a town with newspapers, banks, churches, schools and every modern comfort and convenience, and only a year old, but that at its very doors were such splendid opportunities for fishing and hunting. The scenery and climate, too, pleased them, and one gentleman enthusiastically summed up the situation by declaring the Flathead to be "a place of healing for the sick and lazy; a recuperating place for the weary and overworked; the trysting place for disciples of Nimrod and Walton, and a pleasure resort for the rest of mankind." M. F.

### Central New York.

WATERVILLE, Oneida County, Sept. 10.—The sporting season opened here on Aug. 15, with a scarcity of birds. A resident market hunter was out three days and only killed four birds. He then gave it up as a bad job. I have been out nine afternoons and have killed nineteen grouse and woodcock, mostly the former. In an experience of thirty years shooting in this vicinity I have never found the birds so scarce. I noticed that the grouse were afflicted with the partridge fly, or whatever it is called, which may account in a measure for their scarcity. But I cannot tell what has become of the woodcock. I have hunted summer ground and fall ground, high ground and low ground, swamps and corn fields. Three woodcock are the most I have found any afternoon, and that after tramping anywhere from five to ten miles. There are no gray squirrels here, nor have there been for several years. H. N. C.

### California.

SAN FRANCISCO, Aug. 31.—The close season on quail shooting terminates in a few days, and the sportsmen are resurrecting their No. 12s from closets and getting them in condition. The birds are numerous and quail on toast will soon be on the bill of fare of every restaurant. The law prohibiting deer shooting for three years has another year to run yet, and the good effect of the law is evident by the great numbers seen in their usual haunts, as the law has been pretty generally observed, although I saw a good many antlers and skins hanging on the log cabins "up country" when recently in the Sierras on my trout fishing expedition. They claim that they only kill a deer now and then for fresh meat. The number I saw indicates remarkable appetites on the part of the herders and lumber men; but the law is too rigid to admit of the former wanton destruction. PODGERS.

### Newfoundland Caribou.

BOSTON, Mass., April 10.—Next month begins the caribou season in Newfoundland. No place in the island offers such inducements to the hunter as the Hall's Bay district. Large herds were seen in that locality last season, and with the extended facilities for reaching that place the number of sportsmen this year will be largely augmented. The largest deer in the colony are found here. The scenery surrounding Hall's Bay will repay any traveler. And the climate, it is not too much to say, is the finest in the world. There are large rivers well stocked with salmon and trout, and any sportsman who likes this kind of sport (and who does not) should bring his angling gear along with his shooting equipments. M. W. DOOLEY.

### Eastern Indiana.

WILLIAMSBURG, Ind., Sept. 4.—Prospects for quail shooting in eastern Indiana are unusually poor. Excessive rains all through May and June drowned the first layings of eggs. On Aug. 17 I noticed that the male birds were still whistling "Bob White," and on that date a nest of eggs almost ready to hatch was found on my farm. The mother bird was on the nest, and the mowing-machine clipped a few of her feathers before she left it. yesterday I bagged 13 gray squirrels in 5 hours, an unusual bag for this section. They seem quite plenty just now, but in a week they will eat what few hickory nuts and buckeyes there are in the woods and depart for some place where food is plentier. O. H. HAMPION.

### Arkansas.

LITTLE ROCK, Ark., Sept. 5.—We have had a great season up to date with the black bass and all other game fish with which our streams and lakes abound. They have been taking the fly in Big Lake, ten miles from this city, for the past three weeks. The writer has just returned from a chicken hunt in the Creek Nation, bagging sixty chickens to three guns in two days. We are going to have excellent shooting this fall in Arkansas. A bear weighing 300lbs. was recently killed in the town of Du Valls Bluff by J. M. Richardson, fifty miles from Little Rock. Quail are late, but will be very plentiful in the country not visited by the great overflow. ARKANSAW.

### Connecticut.

HADDAM, Conn., Sept. 5.—Indications now are that quail and partridge will be fairly plenty here this fall. Many woodcock were hatched here during the spring and summer, and I hope will return later. There is more than the usual quantity of wild rice along the river banks, and rail birds should be plenty, though our best shooting is generally in the second or third week of September, and sometimes the very last of the month. I think they get the birds earlier near the mouth of the river than we do here. A.

### New Jersey Meadows.

PERTH AMBOY, N. J., Sept. 12.—In spite of the moon being full and in perigee last week, the tides, owing to contrary winds, were not high enough to enable the rail shooters to get on the South River meadows, so that few birds were killed. Neither has there been a flight of snipe to speak of, though some have been bagged here and there. The meadows are too dry. J. L. K.

## CHICAGO AND THE WEST.

*[By a Staff Correspondent.]*

CHICAGO, Ill., Sept. 10.—It was mentioned earlier that in response to the letter of Mr. Organ, president of the State Association, and also of Warden Bortree, certain of the express companies had issued circulars to their local agents forbidding the receipt of illegal game. In order to give this matter wider publicity it is thought well to give here the text of two of these circulars issued by companies running into country from which much game is shipped. The American Express Co. circular is as follows:

AMERICAN EXPRESS COMPANY.—Office of Assistant General Manager, Western Department.—Chicago, Ill., Aug. 17, 1892.—*Agents Western Department:* The Game Warden of this city has recently called our attention to the fact that more or less game, killed out of season, is being shipped into Chicago contaary to law, and he has given notice that hereafter express companies will be prosecuted for each and every violation. This company has repeatedly issued instructions regarding the violation of game laws. It is our intention to comply with the law in each and every State in which we do business. A copy of said laws has been furnished you and there is no excuse for violating same. You must be more watchful than ever, and refuse to receive for transportation any game, the shipment of which is in violation of the game laws of your State. Agents will be held personally responsible for any loss growing out of a violation of this order.

A. ANTISDEL, Ass't Gen'l Manager.

The Northern Pacific Express Company's circular is in substance as follows:

NORTHERN PACIFIC EXPRESS COMPANY.—General Manager's Office, Game Laws.—Chicago, Aug. 22, 1892.—*To Agents:* The attention of all agents of this company is called to the game laws, as published in tariff circulars from time to time for the different States as follows: The taking of game or fish at any time embraced within the "close season," as set forth in tariff circulars, is a violation of the law. Any person violating the law will be subject to fine or imprisonment, or both. Agents must strictly live up to the game laws and refuse to handle or ship game out of season, as it is the policy of this company to uphold the law. It is known that agents of this and other express companies have accepted game and way-billed the shipments under the guise of "fish" and vice versa. It is our earnest desire to put a stop to this evasion of the law and not handle illicit game under fictitious names. With a view to end this practice, agents must promptly refuse to accept or handle game of any kind during the close season. Offenders of the law are being successfully prosecuted, and should penalties be imposed upon this company for such offenses the amount in each case will be charged to the offending agent.

H. H. BROWNING, General Manager.

This action of the carriers ought to have some little effect, though it takes a trusting and confiding soul to believe that the local agents will be scared into absolute carefulness by the above communications. If the companies would send out a circular showing the names of a few agents who had suffered for violating the terms of the circulars they would do something toward taking this matter out of the red tape precinct.

To-day I hear that yesterday afternoon Messrs. Organ and Bortree found two firkins and one barrel of illegal prairie chickens on South Water street. Particulars are not at hand about this latest roughening of the way of the transgressor.

### TRAVELING SHOOTERS.

The Bloomington (Ill.) Hunting Club issues a neat itinerary of the trip to be taken this fall in their special hunting car "Cleopatra." The personnel of the party is given as follows: Dr. C. O. Burke, A. S. Eddy, Deane N. Funk, H. L. Smith, Frank H. Funk, J. F. Glenn, J. C. Stevenson, J. Deeraismes, J. B. Stevenson, Linc. Funk, H. O. Wheeler, Eugene D. Funk, H. O. Hoffman, W. H. Creber, Isaac G. Funk, C. T. Stevenson, E. C. Roush, Ed Butler, O. T. Reeves, Jr. and A. C. Eddy. J. B. Stevenson, Manager; H. L. Smith, Captain; W. H. Creber, Sec'y-Treas.

The trip begins to-day, Sept. 10, and the party will arrive at St. Paul to-morrow morning, and at Winnipeg, Man., Sept 12. The journey is thence west *via* C. P. R. R. A stay of two weeks is billed for Revelstoke, and thence the journey leads to the northwest coast, San Francisco, and home by way of Salt Lake and Denver, the trip to end Oct. 18. This will leave small time for actual hunting, but will make a grand tour for these fortunates.

Somewhere I have lately seen it stated that the cost of a special car is not so appalling as might be supposed. A parlor special costs $50 a day, a hunting car only $35 a day. Over most roads eighteen full fares must be paid, and board must be paid extra, though a cook and two servants are furnished with the car.

Mr. Chas. Grubbs, of Montgomery Ward & Co.'s gun department, starts this week on an extended trip of rest and sport in Dakota and the West, which may take him to the Rockies and keep him away a couple of months. Mr. Grubbs goes for his health primarily.

Mr. L. M. Stone, representing a New York commission firm, made inquiry this week for chicken country, and has started for North Dakota and Minnesota. He will probably make his main stay at Alexandria, Minn.

Mr. W. H. Reddington, of this city, starts early for Trout Lake, near Reynolds, Wis., for some fall fishing; not for deer shooting I hope. His camp will be on Crooked Lake most of the time.

Messrs. W. W. Ash and Geo. B. Washburne have just completed a boat trip through the Fox Lake system, starting from Long Lake. They had fair fishing, and report seeing some few ducks, but not a great many.

A party of half a dozen or more will go up to Horicon Marsh, Wis., next Tuesday. They should just about meet the teal flight, which is a little early this fall. Ducks are reported more abundant now on the marsh than last week.

It appears that they have law in Dakota, and that with a vengeance, as Messrs. E. R. Sheldon and Dwight Lawrence, of this city, and their two companions can testify. On their recent trip they one day killed 84 chickens, the law allowing only 25 birds to the gun. A constable arrested them and they were taken before a J. P. Another section of the law forbids shipping over 12 birds a day. A little juggling of the two sections convinced them that they had broken the law, and they paid $100 and costs. If these gentlemen kept faith with the law, and killed not over 25 birds to the gun, they were unjustly fined. If they did not they were not fined enough. Any shooter going into a strange country to shoot should look up the law thoroughly and then observe it implicitly. This done, there is small danger of unjust fines, for the shooter will be clear in his own mind as to his rights in the matter.

Mr. B. Waters, of the FOREST AND STREAM staff, is back from the field trials at Morris, Manitoba. He reports that prairie chickens and sharp-tails were very abundant in that section, and just beginning to pack. They often put up 30 or 40 birds on a few acres of ground. He thought that two good dogs might find 20 or 25 coveys a day easily, and that one gun could easily bag 100 birds a day on some of the best country. Morris is only 28 miles above the Dakota line.

Mr. Waters says also that along a new road north of Winnipeg, caribou are seen in herds resembling, in miniature at least, those of the buffalo in days gone by. This fabulous statement came from an old Manitoba hunter of big game. Moose are also obtainable in the same region, which is easily accessible from Winnipeg.

### ILLINOIS BIRDS.

It still seems the case that, while the Northwest is unusually blessed this fall with the prairie chicken crop, Illinois is sadly short. Around Jacksonville there are usually some birds, but they are scarce for even the illegal shooters this year. I was told that there are more chickens southeast of Springfield than anywhere else, though illegal shooting has been common there also. I was also told that there was fair shooting about sixteen miles north of Prentice, on the C. & A., though that country is much posted.

A prominent shooter who lives at Virginia, Ill., about twelve miles above Jacksonville, writes me the following interesting note:

"Last Sunday as I was walking around my pond, I saw a sight that I never before witnessed. The cows had waded out in water almost mid-side deep, and the little fish at once surrounded them, jumping as much as a foot out of the water after flies which lit on the cows. They did not seem to be in the least frightened by the movements of the cows. Most all were small sunfish. Such an occurrence may be very common, but it is the first time I have ever seen it.

"Last week while in attendance at the Springfield, Ill., tournament, I heard quite a number talking about the killing of prairie chickens, and from what I could learn, there were already being many killed in that vicinity. There seems to be much difference of opinion regarding the law on shooting chickens, since the blunder in the Legislature a few years ago. I think that that has been the cause of much illegal shooting. Of course, nearly all the shooters, or rather sportsmen, acknowledge Sept. 15 to be the legal time for killing chickens in this State, but there are a few lawyers scattered through the country who claim there is no valid law at present in regard to chicken shooting, and that they will defend any one who kills them. This also I think, has had its effect. No doubt it would be an easy matter to find out some of the offending ones. REX."

The state of affairs referred to is unfortunately in existence. There seems to be, however, a growing respect for the law in many of the country districts of this State, and "early shooting" comes more and more into criticism. The writer of the above is a young farmer and could easily soothe his conscience over a few early birds, but I know that he would not in any circumstances violate the law. The Springfield men might well note the example.

### DR. THOMAS AND HIS DEER.

Last week I gave space to the current report that Dr. H. W. Thomas, pastor of the People's Church, of this city, had, during his summer vaction in Wisconsin, killed three deer. I stated that I had written Dr. Thomas for the facts, and hoped a full denial of the charge. Now I have Dr. Thomas's reply, and it is with genuine regret I see that the denial is wanting, and that there can no longer be even the most charitable doubt as to the truth of the original accusation. Summer deer shooting, openly carried on and openly admitted by a minister of the gospel, a man whose conscience should be tender and alive to natural justice—that is something we had no right to expect. We should have expected that from the brutal, the reckless, the low and the unreasoning, not from a man of education, of intelligence and of a position bearing need of self-respect in even the most minute particular. The facts, however, are stubborn, and here is the letter, which I give *verbatim et literatim:*

535 MONROE ST., Sept. 7.—Your kind letter recd., and I appreciate its spirit and courtesy.

Yes, it is true I killed three big deer in Wisconsin, and whilst I had never examined the statutes of the State, I knew there was a law protecting the game out of season.

But the nearest meat market was some 40 miles away; we had to have fresh meat, and the easiest and most enjoyable way to get it was to kill it; and this, as I understand, is the custom, and allowable under such circumstances, and does not really violate the *intent* of the law. The few people who live in those wild timber lands seem to have about the same right to the game that a farmer has to his herds, and hence I felt a clear conscience in the matter. I killed for immediate use, and we ate the whole animals—forequarters all. I left the hides with the residents. Of course, no *hunter* would shoot a doe before the weaning time of the fawns. And we caught and ate trout; and we killed and ate partridges, but not till near the last of August, when the young ones were well grown. And I shot a porcupine on a tree, thinking in haste it was a coon. But I did not call the deer *sheep*, as some do in the Rocky Mountains.

Now, if in all this I offended the spirit of the law, I am ready to pay the good State of Wisconsin for the damage done.

Resp'y, H. W. THOMAS.

There is one quality about this letter which is not often shown by some of our so-called "sportsmen" who kill deer in the summer, and that is a manliness equal to acknowledging the fault. There is no use getting savage over this matter, and abusing or deriding Dr. Thomas for what he admits he has done. It will be better to be cool and reasonable, and so to show Dr. Thomas and others that such an act is both a wrong and a risky one. So far as treating Dr. Thomas any better than anybody else is concerned, there is no reason for that. He is no better, by virtue of his position, than anybody else, and moreover he steps quite aside from his position when he goes into the woods and kills deer in the summer time. Yet we will cling to that position for a moment, and from that point show the fallacy of the reverend gentleman's excuses to his conscience.

A minister of the Gospel should have in his heart a belief in the principles of love, justice and unselfishness, and he should practice them. If Dr. Thomas can be shown that on the basis of his letter he has been unloving, unjust and selfish, it should be enough, and should be the easiest way to show him that he should recede from the position there maintained, and should make atonement for his fault. This is good religion, and moreover it's good logic.

Dr. Thomas says, "The few people who live in those wild timber lands seem to have about the same right to the game that a farmer has to his herds." Well now, this isn't so in the first place, because these people are exactly like Dr. Thomas, and Dr. Thomas is exactly like them. They are either citizens or outlaws. If they are citizens, one is as good as another before the law. In the social compact we give up many individual privileges for the common good. For many reasons, it is pleasanter to do as one likes, but when one goes into society he agrees to give up this doctrine. He has his chance when he votes for a man to represent him in making laws. He has his chance again when he votes for a man to represent him in interpreting the laws. But he has no longer any chance to make law, interpret law, and carry out laws to suit himself. He gave that up to the State when he became a citizen. He is one of the many, now. The citizen of Wisconsin, or the hunter of Wisconsin, whether he lives in the wild timber lands or in the heart of the busiest city, is no better than his neighbor, and he has no right to think himself so. Dr. Thomas is no glittering exception. It is not his business to construe the law. If he can construe the game law, he can just as well be outlaw enough to construe the laws relating to any other form of theft, and take what suits his fancy, because he "needs" it. He, in effect, stole the property of the people of Wisconsin, knowing that the faithful citizens of that State could not raise a hand to take of that property except in certain ways and after a certain date. In this he was selfish, unjust and unloving. He cannot do these things and be a goood citizens, or a good minister. He cannot do these things and retain the respect of many men who now have respect and admiration for him in their hearts. When he has thought the matter over, he will know that he cannot do these things and retain his own self-respect. And the loss of that is the worst thing a man can suffer.

The plea that the natives of the pine lands own the deer is a specious one, but it is wrong and bears no scrutiny, far less when urged by Dr. Thomas as an excuse. If the deer belong to this restricted portion of the population, then Dr. Thomas stole from that restricted portion. If the deer belong to the natives as the farmer's herds to him, Dr. Thomas had no more right to kill a deer, without the consent of all those natives living in that region, than he would have to kill an animal out of the farmer's herd without his consent. Dr. Thomas certainly does not live in "those wild timber lands himself." He doesn't own those deer as a farmer does his herds. He isn't a native. He has not, on his own statement, any right to go in there and rob those poor people of the animals of their herds, which they may need for food. When he does that, he is selfish, unloving and unjust. A good minister whom I once heard—I will not tell Dr. Thomas who he was—told us, "It is very easy to find excuses for doing a thing we want to do." That is just what Dr. Thomas did. He did what he wanted to do, and then hustled for the excuses. He did a strictly selfish act. As to the old plea about needing meat, that is very old, very recurrent, and very thin. It always has been thin, and now it is thinner. I don't doubt for a moment that Dr. Thomas's party used all the meat, just as he says, but I do not for a moment believe that the need of meat was the controlling impulse which took him out to kill deer in the red coat. I think he felt the hunter's impulse to kill a large animal. In short, I think he wanted to kill a deer, and did so, and then ate it, and then sought to make the eating an excuse. Dr. Thomas receives several thousand dollars a year as salary. He could have taken enough provisions into the woods. He admits that he had good fishing. I have little sympathy for the men who have trout and pork and beans and a hunter's appetite, and who yet feel constrained, because nothing is good enough for them but venison, to go out and kill a deer for the sake of something to eat. The eating is no excuse. If I should steal a quarter of beef from the Government warehouse and eat the beef all up, would that be any excuse? And yet for that act I could build up a far sounder and more logical apology than this shaky one of the reverend gentleman who, bound naturally to the doctrine of loving-ness, justice and unselfishness, abandons all that wilfully, and knowingly breaks a law of man, of nature and of natural justice, because he simply feels like doing so. Who am I, that I should steal beef? Who is Dr. Thomas, that he should steal venison? I want no stolen goods. I want my self-respect, and I want to be a citizen.

For theft of this sort there are just two classes whom one could excuse, those who are actually ignorant of the law, and those residents who actually used the game for food. Any man may break a law in ignorance, and there is no real fault in that, and when one thinks of the poor devils who live up in the pine country, condemned by their hard circumstances to a life of pork and saleratus, it is hard to blame them for killing an occasional deer. But Dr. Thomas belongs to neither of these classes. He is a man who ought to know better and who did know better, and who ought to have done better. If we excuse him, what shall we say to restrain the herd of the brutal, the reckless, the low and the unintelligent? May they not as well stay as he? Suppose one hundred of these go into the woods, and kill three deer apiece? The deer of a whole region are destroyed forever. This is the conclusion of Dr. Thomas' logic. The conclusion is too severe to allow him to use such logic. He must admit himself no better than his brother citizen. He will need no sophistries then.

There is in this no mere utilization of an opportunity for a sportsman's paper to haul a minister of the Gospel over the coals. The sporting press is not at war with the pulpit in any way. It is only the importance of the offender which makes this case the most worthy of mention of any of the kind yet known—a case as interesting and noteworthy as it is unfortunate and deplorable.

I do not claim to know Dr. Thomas's business. He should not claim to know ours. Had he traveled all over this country as much as I have, and sought to learn accurately about the game supply, and had he seen, as I have, the game of every sort in this great country year by year vanishing, fading away, disappearing from even the wildest fastnesses of mountain and forest, he would feel just as I do about this to-day, and he would know there was no ghoulish malice under comment such as this, and anything but pleasure in the writing of it. There is small selfishness beneath it. I do not want merely to see these animals preserved for myself, or for the sake of my sporting friends, or the sake of the general sporting public, although that is part of the business of a genuine sportsmen's journal. I want to see these animals preserved for their own sake. They are going, Dr. Thomas does not know how fast. We of the guild of sportsmen are trying to get good laws to preserve the game, and to have all observe the laws, and to give all an equal chance on such conditions that the game will not be exterminated, and this chance so put forever out of question for us all. We want the help of just such men as Dr. Thomas. We

want the help of the great dailies. We want the help of all the higher intelligence, of all the better orders, of all the finer and clearer minds. Are you with us, Dr. Thomas, or do you see this thing plainly now?

On one point small doubt remains, and the proper course is plain. It will do good to have it widely known that a heavy fine has been imposed in a prominent instance of summer deer killing. This will do more than any other one thing to stop other men from killing deer in the summer. The Illinois State Sportsmen's Association should confer with the State game warden of Wisconsin—with whom I am well acquainted—and the warden should open correspondence with Dr. Thomas, with a view to a plea of guilty, and the imposition of the lightest fine the law permits. Unfortunately this can not be less than $50 for each deer.

Dr. Thomas also admits the deliberate killing of partridges, of course illegal. The fine for each bird is not less than $50.

Dr. Thomas declares himself willing to pay for the damage done the good State of Wisconsin, if he has violated the spirit of the law. He has violated the law both in the letter and in the spirit, as I think the good State of Wisconsin will show him as quick as it gets a chance. This spiritual argument doesn't go, even from a minister of the Gospel. It is the minister of the Gospel who needs most to keep his skirts clean, his name free from any accusation. I doubt not Dr. Thomas will realize what this necessity means in this case. He is too used to the meed of respect and admiration which comes naturally to him as one of the greatest divines and broadest thinkers of his portion of the country—he is too upright, fearless and self-respecting to care to have one in his congregation who could cynically smile as he listened, and say, "You, who teach me thus, are no better than I am, for you do what you want to do, and that is all I ever did by way of sin." E. HOUGH.

175 MONROE STREET, Chicago.

## THE ARKANSAS NON-EXPORT LAW.

LITTLE ROCK, Ark., Sept. 9.—*Editor Forest and Stream:* The Supreme Court has sustained our non-export game law and I send you herewith copy of the decision, which may be of some use to you. A notice that such laws have been sustained may help the cause along. J. M. ROSE.

SUPREME COURT OF ARKANSAS.—ORGAN v. STATE.

INTERSTATE COMMERCE—EXPORTING GAME.

Act April 12, 1889, as amended by Acts 1891, c. 88, prohibiting the exportation of fish and game from the State, does not violate the Interstate Commerce clause of the Constitution of the United States.

Appeal from the Circuit Court, Crittenden County, Hon. J. E. Riddick, Judge.

Indictment against C. H. Organ for violation of an act prohibiting the exportation of fish. Judgment of guilty and the defendant appeals.

HEMINGWAY, J. The ownership of fish is in the State for the benefit of its people in common, and the Legislature has the power to permit individuals to catch them upon such terms and conditions as it may impose, and to restrict the property acquired in them when caught to such extent as it deems proper. McCready v. Virginia, 94 U. S 391. American Express Co. v. People, 24 N. E. R. 758. Magner v. People, 97 Ill. 333. It may prohibit catching them entirely, or for a specified season; or it may permit them to be caught for the use of the person who makes the catch, and withhold the right to sell them or ship them for sale. When preserved for the common benefit of the people of the State they are not articles of commerce in any sense, and we cannot see that they become such simply because the Legislature permits them to be caught by individuals for use within the State only.

One who catches them had originally no separate property in them and no right to acquire it, except as the Legislature might provide. As all right of property in them is derived from the State, it is subject to such terms as the Legislature imposes. It saw fit in the act assailed to confer a right of property, but to so limit it that the article should not be shipped from the State, the purpose being to restrict the use to those who originally owned it in common. The restrictions are imposed by right of ownership, and not in the exercise of any assumed power to regulate the commercial uses of private property.

Under this limitation, fish never pass from the dominion of the State as proprietor, or become articles of commerce in the sense contended for by the defendant, because the qualified right is conferred upon the condition that the use shall be restricted, and shipment from the State not allowed. It follows that the act does not violate the Commerce clause of the Federal Constitution, and it could not be seriously contended that it violated any other Constitutional provision.

We are aware that a different conclusion has been reached by the courts of Kansas and Idaho. State v. Saunders, 19 Kan. 127. Territory v. Evans, 25 Pac. 115. But that announced seems to us the better one, and is sustained by the Supreme Court of Connecticut in an opinion to which we refer for a more extended discussion of the subject. State v. Geer, 22 Atl. 1012.

*Affirmed.*

### A Combination Arm.

I WANT a rifle and shotgun combined with over and under barrels, rifle barrel on top a .38 55 rifle and 12-gauge shot barrel, the barrels not to touch each other their entire length, but be screwed into breech frame, with space between, and I don't want it for nothing, but would be willing to pay well for such a gun. It would be just the gun for hunting in the South, where there are deer, turkey and quail on the same grounds. I would like two or three agreeable companions to join me in a hunt in Arkansas this winter; not game hogs, but sportsmen of the regular FOREST AND STREAM type. I think we could have some sport, I did last winter, and we did not kill all we had a chance at, either. EN AMI.

### The Portland Game Club.

PORTLAND, Conn., Sept. 1.—An association known as the Portland Game Club was organized here Aug. 31. Active membership includes only residents of the town, and already over forty have expressed a wish to join. Mr. J. B. Brainerd was elected President, and Edward D. Strong secretary. Mr. A. C. Collins, of Hartford, who has done so much for the protection of game in Connecticut, was elected an honorary member. Available land in this vicinity will be leased and an effort made to enforce the game and fish laws. Hon. J. M. Murdoch was appointed attorney for the club. J. H. S.

# Sea and River Fishing.

## ANGLING NOTES.

### Dr. Elisha Sterling and Dr. Theodatus Garlick.

IN a foot note in Supt. Mather's report to the New York Fish Commissioners in their twentieth annual report, just published, occurs this statement: "Dr. Elisha Sterling was a very celebrated surgeon and assisted Dr. Garlick in the first attempt to breed trout in America in 1852." This contains two errors that should not be allowed to pass uncorrected. Perhaps it is not so strange that Mr. Mather should have made a slip when it is considered that the Transactions of the American Fisheries Society perpetuated an error upon the same subject in a paper written by a friend and contemporary of the "Father of Fishculture in America," who witnessed some of Dr. Garlick's experiments. In 1850 Dr. Sterling was a pupil of Jean Jacques Victor Coste, in Paris, and was present during the experiments of artificially hatching trout eggs by Joseph Rémy, acting under Coste, in the cellar of the Observatory, Luxemburg Gardens. Dr. Sterling was a resident of Cleveland, Ohio, and so was Dr. Garlick, and they were life-long personal friends. In 1853 Dr. Garlick, having read in a Washington paper an account of Rémy's experiments in Paris, procured some trout from the "Soo" and spawned and impregnated eggs artificially in ponds constructed on the farm of Prof. H. A. Ackley, two miles from Cleveland. Dr. Garlick has explained that Prof. Ackley, his partner in the practice of surgery, bore a portion of the expense and built the dam on his farm while he, Garlick, was at Sault Ste. Marie for the trout; but Prof. Ackley made none of the experiments, nor did he publish anything about them. The first eggs were taken Nov. 21, 1853, and on Jan. 9, 1854, one of the eggs was placed under a microscope by Dr. Goodby and the embryo discovered. On Jan. 22 the first fish was hatched. In addition to being a pupil of Coste, in Paris, Dr. Sterling was before that time a pupil of Prof. Ackley, in Cleveland, so that it is not strange that the conclusion should be drawn from his association of Coste and Rémy, in France, at the time that they hatched trout artificially, and his friendship with Garlick and Ackley, in Ohio, that he was connected with the initial experiments of hatching fish by artificial means in the United States. In fact, he wrote me that more than one writer seemed bound to connect his name with Dr. Garlick's experiments. Really the strangest thing about it was that he was not a participant, for he was in Cleveland at the time, but on three separate occasions he has written me that he knew nothing of them. To quote his own words in one of the letters: "The credit belongs to Dr. Garlick alone. While I witnessed the experiments of Rémy and Coste, in Paris, I thought no more about the matter until I saw Dr. Garlick's embryo trout under Dr. Goodby's microscope in the winter of 1854." Certainly Dr. Sterling's testimony on this subject should be final.

### Good Fishing Means Prosperity.

New London, New Hampshire, boasts of a charming little publication, a cross between a magazine and a newspaper, called *Summer Rest*, published in the interest of "pleasure, recreation and all things restful." The staff appears to consist of visitors to that lake and mountain region. The Souvenir Annual for 1892 has a full-page colored map of New London and vicinity including Sunapee Lake; several half-tone illustrations, and embraces an illustrated article upon "New London's Interest in Fishculture," by Prof. John D. Quackenbos, in which the note upon Sunapee fish in FOREST AND STREAM, July 28, 1892, is quoted. The author adds to the FOREST AND STREAM list of fish in Sunapee, yellow perch and silver dace, but that is not why I refer to the article. Near New London is a beautiful sheet of deep clear cold water, known at Pleasant Pond, and as its outlet is the little hamlet of Scytheville of which Dr. Quackenbos writes thus: "Scytheville may have lost her prestige as a manufacturing village, but a grander future awaits her if the lake, which is the pride of her people, shall become the home of the landlocked salmon, or famous winninish, superlatively the finest game fish in the world. This prediction is based on precedents. The name of Sunapee Lake was unknown beyond the limits of New Hampshire until the fish commissioners stocked it with black bass; but to-day the fame of its Alpine trout extends the world over, and the six miles of its New London shore, undeniably its choicest shore, with a wide western outlook and a constant westerly breeze, is rapidly developing into the town's most valuable section. And what but our trout has wrought the change from tenantless wilderness to cottage clusters and crowded resorts?" It will be noticed that it is the trout (and it may be added, landlocked salmon), not the black bass, that has built up the shores of Sunapee Lake. The black bass planting called attention to the lake, but fishes of the salmon family made it famous. There are other lakes in the land that may be built up in a similar manner if planted with suitable fish, but it cannot be done unless good judgment is exercised in selecting the fish to be planted. There is far too much of hasty ill-advised fish planting going on now. Small ponds and mountain lakelets that have been excellent trout waters are planted with black bass, and thereafter the bass amount to nothing except to unfit the waters for other fish. It is a good rule not to plant black bass in waters that have maintained trout—brook trout—for they are rarely large enough to provide permanent black bass fishing. Many waters have already been planted with black bass that never will afford good fishing, and those who planted the bass would be glad to have them out, but it is easy to put them in and impossible to get them out. In some trout waters pike—the so-called pickerel—have made their appearance, either through accident or by design, and at once there is a demand for black bass to fight the pike.

The New York Fish Commissioners, in their last report, speak of the appearance of pike in some of the Adirondack lakes and say: "Where they are found in sufficient numbers the trout go to the wall. Where pickerel have gained a foothold it is almost impossible to dislodge them, and the commissioners can suggest no remedial legislation. The only course remaining, in the commissioners' opinion, is to stock these lakes with black bass." Lake trout will never be destroyed or seriously interfered with, if at all, by either pike or black bass. Where lake trout will thrive there is plenty of room for the other two fishes. It is the shallow water trout, brook trout, Loch Leven and brown trout that must suffer if any are to suffer, and in Great Britain and continental Europe some of the best waters are infested with pike. They are kept down to a minimum, or below the danger point, by netting. It is true that the pike is far more prolific than any of the trout, but they go into the creeks and marshes to spawn, and it is comparatively easy to net them in the spring; but the bass spawn in the lakes, and it would be a more difficult matter to get rid of them. In Loch Leven itself there are pike, big fellows of over 20lbs., yet the trout increase each year, and when I say increase it is not guesswork, for an accurate account is kept of all trout taken, both number and weight, as the loch is controlled by a fishing company. The trout supply is kept up by natural spawning and by planting fry, and the latter has never exceeded 300,000 annually. Mr. Fuller, of Meacham Lake, in the Adirondacks (this is one of the lakes in which the pike have gained a "foothold"), has begun a war on the pike, and he believes that he will have good trout fishing for many years to come, and I do not think he will apply for black bass as long as he can operate his trout hatchery. The New York law now provides for netting pike out of waters where there are better fish, and this is worth trying before bass are put in to fight the pike. Trout and salmon doubtless will build up certain places as favored resorts, where the black bass fishing would not pay to advertise in a single issue of FOREST AND STREAM. A. N. CHENEY.

## WHY THE FISH ARE FEW.

ONE hears numerous complaints concerning the scarcity of game fish in waters that should, from their isolation and natural surroundings, abound in the "smart set" of the fish tribe. Surely there is some explanation of this scarcity, and if it is due to illegal fishing it is the duty of the wardens to investigate more fully than they do the illegal acts which tend to the destruction of game fish.

The amounts appropriated by the several States for this object are inadequate, however, for a decent enforcement of the laws, and a great deal depends upon the activity of the amateur sportsman in discovering and reporting violations of the laws.

Sportsmen are ever ready to growl at the wanton destruction of trout, but how many of them take it upon themselves to inform the warden of such destruction? Most of them are either too lazy to do this, or else, being satisfied with their present success, they lack the foresight which should warn them of the impending death of their favorite fish; or possibly they are afraid to make such reports, fearing bodily injury from the law breakers. The last reason, however, should be overlooked, as any respectable warden would consider such communications as strictly confidential.

Sportsmen should bear in mind the fact that the few wardens now in office cannot cover the large tracts of comparatively uninhabited lands which most need their attention; also, that the wardens are usually known by the law breakers and their approach carefully watched for. The amateur sportsmen then should be the warden's detective, keeping a careful watch and reporting all circumstances in cases where his suspicions are aroused. There should be hearty co-operation between the wardens and sportsmen, and it is by this co-operation, and by it only, that the laws can be well enforced.

The greater part of the illegal fishing is done by "natives" who fish for the market, largely in supplying hotels in their immediate neighborhood, and also by so-called sportsmen who fish for a record only.

My experiences this summer have brought this matter strongly before me, and I do not think my experience differs from that of most sportsmen. I fail to see why it should.

At the White Mountains I found the hotel men eager for the enforcement of the laws, especially as regards fishing out of season, but they sadly neglect the 10lbs. limit law. I have seen many messes weighing over 10lbs., the result of one day's fishing by one man, brought in and accepted readily by the landlord. At the ——— House two market-fishers brought in eight hundred little fingerling trout, the result of a two days' tour. These trout were very small and were in all probability the result of stocking by the State, taken in small streams which are the feeding grounds for the larger streams. I do not think the State places spawn or young fish in these streams for the sake of gratifying such unconsiderate fishermen.

There is a pond not far from North Conway, where winter fishing is practiced, and the fishermen make no secret of it, but boast openly of the size of the fish so taken. Dynamiting is also carried on there. It is too bad, for this pond offers unusually good fishing and many large fish.

I know of other ponds in New Hampshire where the laws are grossly violated. One case of seining was reported, but the official lost his man by getting drunk on the way up. At the same place I examined some large trout, weighing from 1 to 2½lbs. each, but found no signs of any hook marks. On another day nine beauties were brought in by a market-fisher, which were not caught on a hook.

At another place I found a night line in the possession of a native, and also a seine some 30ft. long in a boat belonging to a man who lets his boats to amateur sportsmen.

I reported these cases to the warden, but have not yet had the satisfaction of having my report acknowledged. Perhaps he is too busy to attend to it.

On a trip in Maine I found that June fishing for small-mouthed bass was common practice, and that strangers were invited to come there and indulge in the illegal sport. No secret is made of it, and no warden has ever interfered. The majority of the strangers going there are unaware of the law restricting fishing until July 1. The bass fishing in this place is wonderfully good, but is growing poorer each season, and will soon be unworthy of any notice.

The above cases have come to my notice casually during this season's fishing. Will other sportsmen join me in an endeavor to enforce laws which were made for our benefit? MONTINUS.

## "PODGERS" TELLS OF SALMON.

SAN FRANCISCO, Aug. 21.—*Editor Forest and Stream:* Having received several letters touching upon the salmon fishing question, and sundry inquiries from the readers of the FOREST AND STREAM, notably Mr. C. B. Burnham, of St. Louis, I will "bunch" the answers in one general communication herewith.

Having been absent from California four years, I am consequently somewhat "rusty" on the subject of salmon fishing in the coast rivers, and have therefore had to rely on such vague information as I have been able to gain from parties who should know, *i. e.*, those living on the rivers most frequented by salmon—with the usual result of learning very little.

One man who lives on the bank within 10ft. of the waters of one river, thought things were "about as they used to be." He saw people catching salmon and other fish, but whether they used a fly or worms he had never inquired. We talk about the heathen and send missionaries at great expense, and yet right here in a Christian country we have a man living on a river full of salmon, and he does not fish. Can the imagination picture such a benighted condition of things in these days? It is marvelous. Fishermen travel thousands of miles to fish, and here is a man who won't travel 10ft. to catch a salmon. What are we coming to? Are we returning to our original condition of barbarism, and "evoluting" backward to the age when our ancestors lived in trees and hung by their tails—the Darwinian age? It looks like it.

Well, the result of my interviews thus far seems to imply that the salmon do come into all rivers along the coast as usual, and where there are no canneries nor nets to capture them continue in business at the old stands, and after the manner of salmon on this coast run into the rivers immediately after the first rain, the opening shower of the rainy season. After this comes an interval of often 30 or 40 days before it rains again, and perhaps it is 60 days before sufficient rain falls to cause the rivers to rise, whereupon the fish at once turn their attention to business and run up to deposit their spawn as near the headwaters as they can get. Pending this rise, the salmon, having idle time on their hands, amuse themselves by running out on the bars at ebb tide, and come tumbling in on the breakers at flood. That is their fun, and it is pending the coming of the rains to raise the rivers that they will take the fly or the feathered spoon, as the case may be. Some seasons they will take the fly readily and freely, and sometimes they will not, and why they are so fickle and notional no man has as yet been able to explain. It is a conundrum that is universally given up. But although the true salmon fisherman may lament the fact of their not taking the fly when he reaches the ground, it is no reason why he should give his soul up to grief and lamentation. Life is still worth living, for he can cast with his feathered spoon, or he can stand in the stern of a boat with a man to row, and troll with rod and reel, and have a pretty good time landing fish from 5 to 15lbs. (he will not get many larger), and my experience is that with even a 10-pounder on your hook you won't have time to light your pipe. For the space of half an hour you will be a very much occupied individual, and can properly hang out a sign reading, "Engaged."

As to the time when the salmon come into the rivers, that is indefinite. It is, as I say, immediately after the first rain. When that comes depends very much on the amount of wheat, hay and oats the granger has left out in his fields piled up awaiting the shower, for although he has had the experience of years, and knows that it is liable to rain any day after Oct. 1, he never will remove his crop until it does rain, for to remove it to shelter and thereby save it from damage would be an evidence of sense and prudence which he scorns; besides, it would deprive him of the excuse to quarrel with Divine Providence. So the coming of the rain depends upon the quantity of grain in the fields, where it has been threshed, sacked and piled up awaiting the first shower. If the quantity is great, Providence hastens to teach the granger a lesson, and it rains early (say by Oct. 10). If the grain has been pretty generally carted away and there is not much to spoil, it then is no object to hurry, and the Weather Bureau takes it easy, and sends it along somewhere about the 15th or 20th. If it is only a light shower, just for practice, the salmon are not fooled. They don't come in, and await a more earnest demonstration.

Mr. Burnham asks me in his letter whether I use the gaff or the landing net. I never use the gaff, firstly, because you may make several passes with it and miss, and when you do not you mangle your fish, and the blood gets all over you and the boat. I use a large oblong net, with an iron ring, strong mesh, and long handle, with which your boatman can reach your fish at quite a distance, or on a pinch while you hold your rod and fish with your right you can handle your net with your left hand.

The net need not necessarily be cumbersome or heavy. The bow or rim can be made to fold up and be carried in a trunk. If the handle is bamboo it can be jointed as if a fishing rod. Such sized landing nets are not kept in stock and must be ordered. The one I use is 30in. long at extremes, 20in. wide in center, oval in shape, handle of bamboo, 6ft. long, jointed; and it is an invaluable adjunct to boat-fishing; no family should be without one, and by the same token, it is singular that no fishing tackle firm has had the sense to make such a landing net. The little things they do make are fit only for trout or other light fishing—abominatians when it comes to serious business, and handling a 10 or 15-pound salmon is business that a man must give his mind to.

Now, as the case stands, I am not satisfied with the information obtained thus far, nor will the inquirers be. I have the assurance of the man living on the river that things are "about as they used to be." If things are, then it is all right, for things "used to be" very lively up there, especially on the Navaro (I see they have dropped out one "r" in the spelling of the name and I follow suit); and if salmon have not instituted new rules and regulations, everything will be lovely after the first rain. Still, I shall investigate further; for what reliance can be placed on the word or opinion of a man who don't fish? I am surprised that such should ever be allowed to testify in court.

If I can find a man who has fished there this season I may learn something. Strange to say, it will be difficult, for while the coast abounds in good sportsmen, gunning men, there are few fishermen who seem to value salmon fishing. They will go miles, climb rocks and up cañons to fish for trout, but never go after salmon, although by going on a steam lumber vessel at 6 o'clock in the evening they can land at the very spot at 6 the next evening, distance 80 miles to Navaro, and other rivers above not over 10 miles apart. Perhaps the indifference arises from the fact that salmon are so plentiful and so common.

At Santa Cruz, a watering place 90 miles down the coast, it has been quite the popular thing for parties to go out in the Italian fishing boats to troll for salmon a mile off shore. I was down there a week ago and saw boats come in with catches of from a half dozen to a dozen, running from 6 to 10lbs. As a general thing the ocean swell is not conducive to prolonged efforts on the part of amateurs. Their internals go wrong. PODGERS.

## SOME MICHIGAN TROUT STREAMS.

ON Aug. 5, 1890, we left Grand Rapids for Holton to put in a few days fishing, or as the old gentleman who was my chum on that trip explained to everybody, "We were up there to get a few blackberries." Perhaps I may be better understood by some tourist fisherman if I jot down a few particulars of the journey, etc., as I proceed.

From Grand Rapids to White Cloud, forty-seven miles, from White Cloud where we changed cars to Holton, sixteen miles, or the streams could be reached by going to Muskegon, then sixteen miles to Holton. Total cost from Grand Rapids less than $10. The scenery is not so grand as could be wished for, but it does no harm to have a change occasionally.

We played greeny's part on our arrival and got all the pointers we could from the native fishermen, who took us at our word and believed us the greenies we pretended to be, readily gave us all the information we desired, thinking, no doubt, that the trout are not going to suffer at our hands. They exchanged winks when we brought out our lancewood rods and brand new baskets. (They used, they said, stouter poles than those, and if they fished all day could catch ten or fifteen. I saw one of their rigs—a club with about six feet of trolling line tied to it.)

We tried Cedar Creek the first day and caught forty-one trout that tipped the scales for 20lbs. We left them with a friend, Mr. Nash, and on going to the hotel were interrogated by our advisers of the previous evening about our catch. "Oh!" we replied, "we got a few little fellows." Again they exchanged winks. The next day we caught forty-nine, and had less brush. The stream is quite free from brush from the old mill down as far as we went. They swapped winks again that evening. The third day we went northwest and took forty out of Skeel's Creek. This is an open stream nearly to the river, grassy banks, fine shade trees and good water.

We were told of another stream not far away where there were two trout to one in either of the other creeks, but we had enough for our neighbors and ourselves, so we went home.

Our success had got pretty well bruited about town through the agency of the small boy who had seen us empty our creels. The news had reached the men who had done the winking, and we missed them from their accustomed haunts that evening and the next morning. But we heard threats of arrest for catching small trout several times that day, and we came away happy that we would not have to answer for being the cause of several suicides in Holton.

The trout preferred a queen-of-the-waters, but took kindly to a Seth-Green or grizzly-king. Good bass fishing is found in all the lakes of that region. M. E. J.

## THE KENTUCKY FISH BILL.

FRANKFORT, Ky., Sept. 3.—*Editor Forest and Stream:* "Purified by fire" may well be said of the product of the concentrated effort of those who have earnestly desired to save the remnant of fish left in Kentucky streams, and to propagate the present food supply of that character, should eventually the fish bill now pending before the House be passed. After a hard and fierce fight in the Senate, of which your columns have taken notice, and a favorable vote on final passage of 19 to 8, the bill went to the Lower House and was referred to committee. Of this committee of seven, only one member was hostile to its passage.

The provisions of the bill, as adopted by the Senate, are substantially as follows:

1. To require fishways in all existing mill dams and similar obstructions to passage of fish; and to require all new dams to be so provided.

2. To provide penalties for all persons using seines, set nets, drag nets, and other devices for taking fish, except hook and line.

3. Providing penalties for use of dynamite and other explosive agents, medicated bait and poison, in destruction of fish.

4. Giving jurisdiction to courts for trying cases and requiring grand juries to investigate for offenses committed.

A careful poll of the Lower House developed a favorable strength in its favor of about two-thirds of the entire body, but the prevailing vice of absenteeism, whereby often but little more than a bare majority was usually present, made any attempt to pass the bill dangerous, as the new Constitution requires 49 favoring votes out of 100, a full body, before any bill should become law.

Just when the attendance at last seemed to justify action, the chairman of the committee, having the bill in charge, was called home for two weeks, and unfortunately the next on committee, Mr. Beard, of —— a bitter enemy, pocketed the bill and refused to report it, although urged by others of the committee. When the chairman finally returned, the attendance was again slim, and so continued till the last days of the session, when other measures took precedence.

When the Legislature adjourned till the 15th day of November next, the fish bill was still sleeping in committee of the house. Meantime, the destruction of fish is still going on throughout the State, spurred on to active, undisguised effort by the protection offered by apparent tacit legislative approval.

It is a singular fact that during the effort to secure a valuable fish law, a single dynamiter or habitual seiner would have more influence in procuring delay, or a negative vote, with members of the Lower House than a dozen members of fish clubs, or the petition of scores of constituents. This demonstrated, if nothing else, the necessity of popular education on the subject. Even the *Courier-Journal*, the leading newspaper of the State, manifested lamentable ignorance at times on the condition and character of pending fish legislation. And yet it had a correspondent at the capital, and devoted a weekly column to sports of the stream and field.

If the fish bill is to be passed on the reassembling of the Legislature in November, an active, concerted effort at popular education and individual support must be made by the friends of fish protection and propagation throughout the State. We suggest a meeting at Louisville of representatives of the various fish clubs at an early date, when the matter can be canvassed and proper action taken. The meeting should be for consultation, and not in the nature of a convention.

At all stages of its progress in the Legislature, the fish bill has been bitterly fought; in some cases by members who had not enough running water in their district to afford a 6in. fish. The idea seemed to be largely prevalent that a man should be allowed to do as he pleased with regard to fish and game, regardless of the community at large. S.

## NEW ENGLAND GAME AND FISH.

THERE is no use in attempting to disguise the fact, partridge shooting is likely to be poor in Maine this fall. It is true that early reports were favorable, but since the open season begun the birds have been scarce; at least, so far as heard from. Labor Day (Sept. 5) was generally spent by the lovers of grouse shooting in that sport in the southern part of the State. The day was a perfect one; slightly cloudy and with little or no wind. Such a day should have given some good bags, but they are not mentioned. On the contrary, a number of sportsmen were a good deal disappointed. In one case a couple of gentlemen, with a boy of fourteen, each thoroughly familiar with partridge shooting in the section they tried, spent the whole day in hunting without getting a single bird. Several birds were started singly, but they were invariably in the thick swamps—old male birds, without a doubt. Not a flock was seen. The section hunted should have afforded at least half a dozen birds, with several flocks started.

Other hunters were equally disappointed on that day, and they are at a loss to account for their ill success, unless it be that grouse are very scarce in southern Maine this season. A couple of Franklin county hunters, who have gunned a good deal since the season opened, have taken out four partridges, and find the birds scarce. In southern New Hampshire reports indicate better success. It is also possible that later in the season there may be more birds to be found in Maine. Guides and others accustomed to the woods say that there were a good many flocks early in the season, and they are at a loss to know what has become of them. It is possible that the great abundance of blackberries, almost all over the State, is giving the birds so abundant a supply of food close at hand that they have moved about but little, and consequently have not been seen since the berries began to ripen. Lewiston and Auburn, Me., gunners have taken some woodcock, but even these birds have not been found as abundant as a year ago.

Late in August and the first days of September there was some very good fly-fishing in the Rangeley, Me., waters. From the Upper Dam, under date of Sept. 1, Landlord J. A. Franck wrote that they were having excellent fly-fishing. Mrs. H. M. Preston, of Brooklyn, N. Y., caught a trout weighing 3lbs. The same day Mr. E. S. Osgood, of Lowell, Mass, took one weighing 3¾lbs. Aug. 30 Mr. T. S. Stewart, of New York, caught a trout that weighed 3lbs. 5oz. The same day Mrs. Preston took one weighing 5¼lbs. There are few sportswomen who have the skill in handling the rod that belongs to Mrs. Preston. At that time the water seemed to be full of trout, and a great many small ones were taken. The news spread rapidly, and report says that the hotel was soon full of guests. Mr. G. W. M. Guild, of Boston, was at the lakes about that time, and it is likely that he had his share of the sport. He has a friend with him. Artist Mark Hollingsworth, with Mrs. Hollingsworth, left Boston for the Upper Dam on Saturday. He will spend at least a couple of weeks there, and very likely stay till into October to try for a deer.

Mr. L. Dana Chapman, with Dame, Stoddard & Kendall, with his friend Mr. Dizer, of Prouty & Dizer, will leave Boston about the 24th for a hunt in the region of the lower Megantic preserve. They expect a deer or two as soon as the season opens, and will try for a moose. They also expect to try some of the waters in the wilderness for trout, previous to Oct. 1. Mr. Chapman, though reared in the city, is a good deal of a tramper in the woods, and a bed of boughs, with the stars for a covering, has no terrors for him, provided it is in a game country.

Mr. G. B. Dexter, of Dexter Bros., has just returned from a visit to Kennebago, where he was the guest of his brother Frank. He reports some very good fishing and shooting. He mentions the seeing of sixteen deer in one evening by guests at Kennebago. A sportsman from Texas, or somewhere, is reported to have paid something over $80 for the shooting of a couple of these deer. Boston sportsmen who have been there and seen them report deer very abundant in the vicinity of Kennebago.

The Maine papers have a sad account of the drowning of a Miss Marcia Thomas, daughter of Wm. H. Thomas, of Baltimore, Md., in Long Pond, near Rangeley, Me. Mr. Thomas, with his wife and three daughters, had been spending a few days at Long Pond. They were crossing the pond, with M. Carlton as guide, when the boat filled. The daughter Marcia was drowned, while the others were in the water an hour or more. The most remarkable feature about the affair is that this is the only drowning accident at the Rangeley waters for many years, notwithstanding the many hundreds that visit those waters every year and go out in generally rather light boats for fishing and shooting. Even in this case, it is claimed, that had the young lady not been thoroughly alarmed and clung to the boat, as did the others, she would have been saved.

SPECIAL.

### Nepigon Trout.

MR. MCCAUIG, manager of Molson's bank, of Woodstock, Ont., while up the Nepigon last week with a party of friends, caught a number of mammoth trout. The largest one was 25½in. long, 15in. round and weighed 8lbs., being ¾ of a pound heavier than any ever caught at that place before.—*Sault Ste. Marie News, Sept. 3.*

## CHICAGO AND THE WEST.

*[From a Staff Correspondent.]*

ON THE BRULÉ.

CHICAGO, Ill., Sept. 1.—There is a man who comes under my window every morning and announces that he has for sale, "R-r-r-rosb'urrrs, r-r-r-rosb'urrrs, nice fraishe r-r-r-rosb'urrrs!" This he does with a persistence, harshness and unvarying volume of discordant sound, which alone could easily teach me to hate him in the most cheerful manner. Beyond that he is a perjured villain, and states that which is not. There are no nice fresh raspberries except those which grow along the Brulé River, away up in Michigan. It is preposterous that this smart villain should have obtained any of these raspberries, for not one of them ever found a market. Of the truth of this I was convinced before I went up to Brulé last week, and now doubt is out of the question. There are not really any raspberries in the world except these of the Brulé, and none are nice and fresh but these, jarred into the waiting hand from the full-hanging bush, wet with cold pine-woods dew, and sweet as honey of the ancient isles. This man calls further at my window under imminent peril. I know him for a dissolute and unreliable character, careless of speech and openly abusive of the truth. Equally bitter are my feelings for his companion in crime, who sometimes comes by insisting that he has "Fraishe feesh—fraishe feesh." There are no fresh fish worth the word except trout fresh from the Brulé.

Mr. Chas. Norrris and myself had planned all the season to go up for some big trout on the Brulé, at the point where he has had such good fortune, but the summer slipped by as usual, leaving nearly all such plans unaccomplished, until last week Mr. Norris insisted I should go up with him and properly bring the season to a close. Whereupon we took a Chicago Northwestern train, clear up into the pine and iron country of the North Peninsula. At Florence we took aboard a boat and a good companion, Ole Peterson, once a cook in the logging camps, and now a resident of Florence. Thence a short run to Kearney's Spur, a mere stopping place on the trail over to the great rolling dam on the Brulé, where Mr. Norris has done most of his fishing. Here we took on a live-box, a little covered boat to keep our trout alive. Then we pulled out for Saunders, fifteen or twenty miles further up the road, a point where the Brulé comes close up to the road for the convenience of foolish persons like ourselves, who seek to run the Brulé in a water craft. Had we gone up to Basswood, twenty miles further, and fished in Cook's Pond, a mile from the station, we could have caught more fish and larger, but we wanted to run the Brulé. So, after an afternoon's pursuit of that same, omnipresent, delusive creek, "just about two miles over in the woods," where 2lb. trout were to be had in plenty—a trip which brought us only a dozen small ones—we got our boat in order for an early start in the morning. Ole Peterson was called home by wire that evening, to our regret, but he helped us portage our boat over the half-mile trail to the river. The sun was barely up next morning when Mr. Norris and I pushed out into the spinning current and began our journey of perhaps twenty miles, down to the camp of the rolling dam near Kearney's Spur, where we expected to take the train for home. How long we were to be in running the twenty miles depended first, on the fishing; second, on the number of times we got upset. The natives cheerfully allowed that, as we had no guide, the latter incident would happen with great regularity. For my part, I don't see why one should need a guide on a stream so swift as the Brulé. You can't get lost, and you are bound to keep on going if you stay on top of your boat. Besides Mr. Norris had often run the stream before, knew the rapids, and was moreover the best amateur river man I ever knew. We thought we could find all the rapids and rough places by ourselves. So we turned her loose.

Although we paddled only enough to steady the boat, or to dodge the big rocks which seemed hurrying up in procession to meet us, we soon came to "Saunder's dam," not far below town. Here we paused for an hour or so and caught six lusty trout, half a pound or so each, which we put in the live-box. We had no strikes until we got here, and took all our trout in the eddy below the dam. It began to look to us as though all the trout that could get up out of the big water had left the river and taken to the cold streams and the lakes, as is their habit at this season.

A RIVER OF SPIRITS.

We had a heavy and risky portage over this dam, and then shot down stream, our live-box in tow, now on one side and then the other, sometimes ahead of us. After we found the trout were not rising we ceased to trouble about the fish, and took it out of the pleasure of the ride. The country was picturesque in the extreme, the bluff near the upper dam especially so. The Brulé is a wild stream and always will be so. Civilization can never get near it. A hundred years from now it will have no trout in it, but it will look as if it had, and it will then be telling still its mysterious story about the spirits of these woods, and it will run then as now, through a silence and a solitude which will impress the chance voyager in a way he will feel on few other streams. Rivers have their individuality. Some are lively, cheerful, inviting, companionable. They expand you; they throw wide the gates of your nature. The Brulé is moody, mystic, brooding, not sullen, but haughty, self-intent, busy with vast, age-old problems and indifferent to small things. It does not expand, it contracts your heart. It invites you, but you chill as you feel the fascination. It is the river incurably insane, keeping apart, talking with itself, knowing things perhaps not dreamed in our philosophy. It is to be gazed upon with awe, with wonder, and with fear, and yet the gaze is fore-bound. The Brulé does not ask for you, and it does not challenge, neither does it sneer at you. It simply does not see you. You hurl yourself upon it, angered by its indifference, bound to break way into its confidence. The Brulé sees you not, and when you depart it is as cold, as careless, as uncompanionable and as fascinating as before. It is a river of spirits, and with spirits it finds its sole companionship. It knows the secrets of these woods. It knows what lies beneath these hills. The spirits tell it. The Indians know it for a haunted stream. The loggers are afraid of it. It has drowned its hundreds. It drowned two woodsmen thirty miles below us on the day we ran the stream, and I doubt not it would have drowned us, if it could, in a very careless, indifferent way, and then have gone on just the same with its mystical murmurings over the story of the centuries in the North. There is no comradery with the Brulé. But go there, and see if you do not want to go again. No man can escape the charm.

I am bound to say that the Brulé was in a fair way to incidentally add us to its list, or at least did its best in that way. When the water is high the stream is not so hard to run, but in low water the rocks are uncovered, and it requires constant watchfulness to keep afloat. We ran about six miles of lively water below the first dam with some exhilaration and no damage, and then we plunged into a long rapid and could see the water apparently dropping right out from under us, and pouring down an incline which was white with rough water and black with countless boulders. We couldn't back out and had no time to think. Taking the widest passage where the water was roughest, we shaved close to a big boulder, slid by, and a moment later were hard and fast on a sunken rock beyond. At once the boat swung broadside on, the stern catching on another rock, and then the sinister flood of the Brulé swept in a white curl barely an inch below the gunwale, the hardest pushing, angriest water I ever saw. Back of us it was something like looking up a house roof, only one that wouldn't hold still, and below us was forty yards of tumbling water which continued the incline. We pushed our best to swing the stern back, but were babies against the arm of the Brulé. We couldn't get over and we couldn't get back. An inch more of water on the upper side, and over we would go, with small chances of getting a breath for forty yards; in which case we would have been almost the wettest people in the world, and would certainly have lost all our stuff, for which a cool hundred would have been no temptation.

"How deep is she, Charlie?" I asked Norris.

"I don't know," said he, "you can't tell till you try, but you can't stand up knee deep in it, that's sure. Still, I guess we'll have to step out on these rocks here and lift her over."

Norris had on hip boots, and over the feet rubber shoes with hob-nailed leather soles—a device of his own which is worth notice for rocky wading. Over my wading stockings I wore overalls and heavy socks, and was shod with a pair of woodsmen's shoe-packs, whose bottoms were filled with soft nails—a rig which I found admirable. There seemed a reasonable certainty that we could hold our footing on the rocks where our boat was stranded, and not being able to escape the Brulé in any other way, we stepped gingerly out, one at the bow and one on the sunken rock astern, and gave a united heave. This placed us below the boat and when she started she nearly went over us. We made a flying jump aboard as she went between us, grabbed the paddles and somehow or other the first thing we knew we were below the rapids, and the Brulé was going right on, tending to its knitting just the same. At this point I noticed one thing about water. When you stand at one side and look at rapids of this sort, you think it looks jolly, and it seems that way as long as you keep moving when you are shooting them, but if you get hung out in the middle of a bad chute, the water coming down on you, looks sort of uncomfartable-like. These rapids are not as bad as those of the Menominee, but they are bad enough to be stimulating. As we knew this was the worst bit on our part of the river, we did not mind the others, which we mostly took flying, with a whoop at the top and a yell at the bottom, and some incidental slides, swerves and grinds between. In many rough places the water was too shallow to be dangerous, though there were some bad holes and swirls in water where good, quick steering was a mighty useful thing.

Finding it useless to cast, we made on down, deciding not to camp out, but to run to the Kearney dam. This we made early in the afternoon, and hailed the two damtenders, Tom Winslow and Fred Sanborn, just as they were shutting down the gates for the day. The "drive" was on in the Menominee away below, and the "head" of this dam on the Brulé was regularly used, daily advice coming up from the drive as to the hour for opening and closing the gates.

JUMPING TROUT.

"Great heavens, look there!" cried Norris, as we pulled up on the breast of the dam. "Look at the trout!"

Indeed, the great pool below the dam, some 50yds. across in either direction, and grown almost quiet after the shutting of the gates, was fairly alive with leaping trout. By dozens they were springing from the water and their crimson crests were everywhere, each painted darling of them giving the water the regulation trout spat of the tail as it went down. It was a wild and beautiful picture.

"Hurry up," cried Tom, "and get to fishing. They only jump for half an hour or so after we close the dam and they won't bite any other time."

We hurried and soon Norris was trying the eddy below the great dam, a pool 15ft. deep, with worm and chub bait, while I went to the tail of the pool and used the fly. It was easy to see that there were big trout in that pool, plenty of them over 2lbs., and probably 3 or 4lbs. Equally easy was it to see that the fishing was to be poor. The water swarmed with small minnows, and the trout were feeding on these, springing up again and again through the schools. For a long time they scorned the fly, but at length I found a gray-drake, the top fly on the leader, begin to take them. Parmachene-belle took only one trout, and out of the dozen or so I took in all, the gray-drake raised all but this one. I caught some very nice fish, but they did not rise strong or play hard. The trout season had brought itself to a close. Too much feed and the approach of the spawning season put a veto on any very great sport. Norris caught more fish than I, and larger. The catch for the whole trip ran between sixty and seventy, and while the average size was very good, we had nothing over 1½ or 2lbs. The Brulé is much fished, and has lost its ancient reputation, but there are large trout there, and had we been earlier we would, owing to Norris's familiarity with those waters, have taken some very heavy fish, as he has usually done there.

One thing we learned much to discredit of the future on this stream, and that is the Brulé is being occupied by other fish than trout. We heard of perch being taken above the rolling dam, and also heard of two pickerel caught below it. Morris caught a pickerel and I caught a perch. Chubs and large suckers were there by thousands. Under such circumstances trout fishing is not apt to stay good very long, and I fear the fate of the Brulé is sealed. It is rather hard to think of there being pickerel in that great pool, where the trout were leaping, but they were doubtless there.

A NOVEL TRAP.

We slept that night at the logging camp on the brow of the hill below the dam. The two boys, Windsor and Sanborn, pass a lonely life here, and seemed glad enough to see us. Norris often goes there, and is quite well known through the country about, even did it take long to get acquainted over a cup of hot tea and a plate of crinkling trout. We sat up late, passing part of the night in target practice with a .22 rifle by candle light. When you live in a log house you don't need a backstop, and you can shoot at about anything you like.

"We've caught five skunks in the last week, in the old camp," said Tom "and I expect we'll catch another to-night. Come in and see our trap."

We stepped out, a few yards from the door, into an abandoned log house similar to the one in which we slept, and there we saw a trap which was a new one on me. This was an invention of Fred Sanborn's, and its ingenuity deserves mention. The trap consisted of a box, a log, a board and a coffee sack. It had no trigger, no spindle, no door, no slide, and worked only on the simple principle of the law of gravity. The box was about 18in. square and 30in. deep. It was balanced lengthwise over the log, the open end pointing forward.

Up to the open end the board was inclined, so that an animal could walk up it and into the box. The open end was blocked up, so that it could not tilt down, but beyond the center of gravity, at the other end, the box was left free to fall down, and hung just on a balance on the smooth round top of the log. The front or open end of the box was safe. The back end of the box wasn't safe. A bait was tied in an upper corner of the unsafe end. Mr. Skunk comes along, and like any other fool, allows he must go in and see about that bait. He walks up into the open end of the box, and it is solid as a rock. Then he goes on back, reaches up for the bait—and being an unlettered skunk, who never heard of Sir Isaac Newton and the law of gravity, he always wonders what makes that box fall down and stand up on end, its smooth sides giving him no chance to climb out. He doesn't understand, either, what makes it so dark, not having seen the coffee sack free itself from the splinter which held it up over the door, fastened to a stick planted for that purpose. All the coffee sack did was just to obey the law of gravity also, and fall over the mouth of the box, because that was the easiest place to go when the box fell over and stood up on end.

Mr. Skunk is a philosopher, we are to suppose, and finding the box about as good as any place, settles himself down comfortably, not raising any trouble and not bothering himself very much about what is going to happen. He just waits for somebody to come and take him out. In the night we heard the box fall over and in the morning this is what happened. We pulled the cover close down over the box, slipped a pole through some bits of wire fastened on the box, carried the box down to the well-like pocket of still water in the sluice above the dam, pulled back the cover and dumped the philosophical skunk, a victim of misplaced confidence in the law of gravity, into the water. He swam a stroke or two serenely and philosophically—beats the world what confidence a skunk has in himself—when biff! a rifle ball put an end at once to him and to his unfortunate and reckless personal habits. He was a dead and deodorized skunk, and if anybody knows a slicker way to get away with the skunk bacillus than this, I'd like to hear of it.

"I just thought this trap up," said Fred. That is what makes it interesting. It shows what the man in the woods will do, out of his limited resources.

And now we lived on raspberries—actually nice fresh raspberries, and fresh fish—actually fresh fish—and tea and pork and beans, and grew strong. With bitterness of regret we closed our little visit, carried our boat out a half mile or so to the railroad, dropped it off at Florence, and came on "home," as people call the city where they stay.

I have spoken of the superstitious dread which enwraps the Brulé. Proof of this arose when we were up at the great dam.

"Has the spook been at work on the dam lately?" asked Norris of the boys.

"Indeed he has," was Tom's eager reply. "We've heard him knocking on the gate many a night lately. There was a lot of fellows from Florence fishing down on the dam, one night this summer, and when the knocking began, they started out to see what it was. It kept on, right under them, and all got scared and ran off. They said they wouldn't go there again for any money. Oscar Craig tended dam above here last summer, and he said he never would go down to the dam alone at night."

"What's all this?" I asked of Norris.

"Well," said he, "no one knows just what it is, but often at night there comes a heavy pounding noise down at the dam. It is so loud it can be heard clear up here at the camp, and sounds so much like some one working at the dam that many a watchman has gone done to see about it, and got badly scared for his pains. It is usually just three heavy jarring blows, and sounds just as if some one hit the gate with a heavy sledge hammer. It may be some secret action of the water on the timbers of the dam when the gates are down, but no one has ever found out what it is, and many a man has been scared by it. It does sound kind of awkward, in the night. We always called it the 'spook,' but what it is remains a mystery."

The sound was heard the night we were in the camp, though I was asleep and did not hear it myself. It is part of the history of the spot. What is it, the spirit of some Titan of the Titanic lumbering days, who lost his life while at some feat of reckless strength about the dam? Some victim of the cold-hearted Brulé? Some spirit of the Brulé stream itself, raging at the restraint of this vast stern fabric whose compelling hand holds back a flood unused to tarrying? What is it? Who knows? And who shall say this self-enwrapt, haughty, fearsome and yet fascinating Brulé stream is not a river of the spirits?

E. HOUGH.

175 MONROE STREET, Chicago.

## A DAY ON ASTAL LAKE.

MONTREAL, Sept. 6.—*Editor Forest and Stream:* I have just returned from a few days' fishing on Astal Lake, some five miles back of Little Metis, at which place I have been the guest of Mr. and Mrs. J. B. Letendre, of Montreal, whose cottage adorns this most popular sea-side resort; and the sport we had has been above the average.

After a day with the sea trout, that were landlocked by storm and high tide in the brooks, we started for the lake, our party consisting of my host and hostess, their irrepressible boy Freddie, myself and, last but not least, Fred Astal, to whose father the lake belongs, and whose knowledge of the fishing around here, be it sea trout, lake trout or halibut, is of much value to the lover of the rod.

After a hilly drive which would in some places make your hair stand, but which added zest to the outing, we arrived at the margin of the swamp where we stabled the horse, and after unloading our lunch started for the boats, some eighth of a mile over a zig-zag corduroy road; and a slippery one it was, as the one who carried the lunch basket can testify. However, all roads have an end, and after a few spills we got there, and were rewarded by a sight that would gladden the heart of an artist. Mirror Lake it should be called, as the water is clear for 10 or 12ft.

Having arranged our tackle and embarked, we were in a short time rewarded by a score of handsome trout, and when counting time came our total was 108, 51 falling to Mrs. Letendre's rod alone, which for four hours' fishing I think is hard to beat.

The fish were an average lot from 10 to 12 in., but what they lack in size they make up for by the gamy way they rise to the fly. The flies used were Lake-George, red-hackle, Parmachene-belle and Montreal.

The lake is only a few miles from the salmon preserve of Lord Manut Stephen, which I believe he has recently sold to an American gentleman, the account of which I read in FOREST AND STREAM.

Any ardent lover of "greenheart or bamboo" chancing to visit Metis would do well to secure the services of Fred, who is only too willing to guide the stranger, and is a host in himself.

I cannot close without referring to the way my hostess handled the ribbons going down the 45 incline, and had the world-renowned stage driver been there a jealous feeling would have crept over his rough frame.

ST. LAMBERT.

## "PICKEREL" OR "PIKE?"

FRANKFORT, Ky., Sept. 3.—*Editor Forest and Stream:* That picture and accompanying remarks of Mr. A. N. Cheney, in your issue of Aug. 25, has kicked up a deal of trouble in my mind, and is certain to make more trouble for me if lots of others, to whom I have carefully explained the difference between a pickerel and a pike, should see Mr. Cheney's screed and representation. In other words, if Mr. Cheney is right, then I'm "clean bunkoed agin."

You remember some years ago I had a little dispute about calling a pheasant a "patridge," and we—as I take it—compromised the issue upon the suggestion of your North Carolina correspondent—peace and honor to his memory—by calling the "patridge" a Bob White, his alias.

Now, I don't know whether the pickerel, as I know him, has any other alias than "the snake," or any other proper route to immortality than by the agency of a stout club, but I'm going to insist on the precedent of the "patridge" compromise, or Mr. Cheney and I will have trouble. I have hated the pickerel so long, and hit him on the spinal cord so often that I cannot consent to the thought, so full of remorse, that I have been murdering pike, and hence must—in all reason—be let down by degrees under the cooling shadows of a compromise. Ever since 1850, Kentuckians, you know, are bent on compromises. But, "I deny the allegation and defy the allegator" until a compromise becomes the only way of relieving remorseful misery.

If I am wrong in calling Mr. Cheney's picture a pickerel, there are lots of others "in the soup." Good men, honest men, live men, dead men, old men, young men, anglers all—have long called a pickerel a pickerel, and hit him in the head because of his slime and his bunch bones "all the samee." Mr. Cheney may have studied classical lore, and dwelt lovingly on the anatomical structure and the poise of the fins, but, if science don't sustain me, and the education of years is at fault, there's comfort in the thought that some love to riot where "angels fear to tread," or in other words, a lover of the woods can see a trail and follow game where science would go blind. I insist on the rights of nature.

Less than a week ago I explained to a friend who had been recently fishing at Star Island, the distinguishing features between a pickerel and a pike. And for years, we "Kingfishers" have refused to boat such "pickerel" as Mr. Cheney delineates in his wood cut. And until in Canada this summer, I never heard the nomenclature challenged. Now comes Mr. Cheney and creates more trouble. I don't see what he wants of this camping on others' trail and shooting into camp when everybody is calmly sleeping in peace and innocence. And how am I, if he is right, to explain the explanations I have been giving to others? It won't do. Mr. Cheney must take the back track. There isn't any better way to describe the difference between a pickerel and a pike than to state that the pickerel is covered with a slime, revolting to the touch; that he is filled with bunches of bones tied in a knot; that he is a voracious feeder and would eat a hatchet if big enough to swallow it; and that he haunts grassy and weedy bottoms—whereas the pike is a clean fish on the body; has no more bones than a bass; bites daintily and slowly; and seems to prefer gravel and sandy bottoms to weeds and grass.

The pickerel is "all of a kind"—he is the same always; whereas the pike merges into probably a dozen varieties. The "wall-eyed pike" is sold in the market as salmon. The pike grows into the fierce and valiant muskalong—the "wolf" of the northern waters. I have caught him in the Cumberland River as the "hickory"—the "golden"—the "lead-colored" salmon. He is taken in the Red River, of Kentucky, and other mountain streams as the "jack fish," or "jack pike." The appearance of the fish changes to suit the local descriptions, but through all he is the same clean, slow-biting, edible fish, free from bunch bones.

Several years ago, "Kingfisher" caught in a Tennessee mountain stream what was locally known as a "jack fish" or "jack pike," struck by its resemblance to the northern muskalong, he sent it to the Smithsonian scientists, or somebody that knew as much. It was pronounced a muskalong—true and genuine.

In eating qualities, in cleanliness, in respectability and decent habits, in the goodwill of mankind, the pike, whether you call him wall-eyed, or jack, is allied to the salmon and the muskalong, and no slimy, bone-infested carcass-devouring pickerel is entitled to keep him company.

Years ago, FOREST AND STREAM identified the muskalong, the pike and the pickerel by their jaws, just as some women are known by "their jaws," but the characteristics distinguishing each I forget. I trust they will show that a pickerel is a pickerel—"the same now, hence and forever." There is no salvation for a pickerel. He is hereditarily depraved and eternally doomed.

Mr. Cheney says he has written columns of descriptions to separate these fishes. We do not wonder, when he persists in calling a pickerel a pike, and *vice versa*. No man yet ever attempted to defend a bad cause without finding the task full of trouble and the road long. Mr. Cheney is no doubt a good man and means well, but he ought not to try and "bunco" people who don't eat pickerel, can't eat pickerel and won't eat pickerel.

However, as I said at the start, I'm a compromisin' being, and as Mr. Cheney seems to know more "book learnin'" than I do, and I don't want to tackle him in hieroglyphics, let's hear what sort of a compromise he is willing to offer.

OLD SAM.

## LET NATURE ALONE.

ASHFIELD, Mass.—The pickerel pond here, which is chiefly used by the guests of the Ashfield House, is one of the best I ever saw in some respects, but it is deficient in natural food supply. A grist mill adjacent keeps the water at a low stage much of the time, so that the margin becomes stiff and dry; and unless a heavy rain occurs very little food is washed into it from the surrounding fields and woods, and frogs and terrapins do not thrive on the borders. At the same time the water is clear as crystal, and a plastron of moss 2ft. deep covers the bottom, out of which filaments of pickerel weed stream upward toward the surface. There are scarcely any lily-pads to speak of, and the surface of the pond is as clear and open in July as it is in April. Some years ago the managers and the hotel men thought to increase the stock of fish by establishing a close season; but at the end of two years no increase was observable, and fish were scarce, though large ones were occasionally caught. Manifestly the big fish had eaten up the little ones in the absence of other food. So the restriction was removed, and fishing was resumed this year. This August, the day after the great storm of the 25th and 28th, an expert angler went in with a long cane pole and plunger spoon and took out sixty-five small pickerel, casting from the shore. Not one of the fish was over 10in. long and some were as short as 6in., so that it seemed a pity and a shame to kill them, for they would be hardly worth the eating. But I suppose if they had been left they would only have afforded sustenance for the larger of their kind, and the pond have become barren as before. These 8in. fish were doubtless the crop of last year's spawning, the conditions of the pond meanwhile having been favorable to a natural food supply by reason of copious rains.

I am much impressed with the killing character of the luminous bait. Its peculiar phosphoresence appears to give it an advantage over other spoons, especially in dull weather.

CHARLES HALLOCK.

### Chicago Notes.

CHICAGO, Ill., Sept. 3.—Mr. Fred Taylor is back from his second trip this summer to the Little Oconto at Norm. Johnson's camp. He had a good catch of trout.

The Chicago Fly-Casting Club meets to-day at Garfield Park, on the West Side, a goodly jump from Washington Park, on the South Side.

Mr. Chas. L. Holmes, representative of large paper mills at Appleton, Wis., was in town this week. In a conversation Mr. Holmes referred to a mention made two years ago of fish being destroyed by chemicals from a paper mill on the Fox River, and doubted the accuracy of the statement that the mill was made to reform its ways. "That was our mill," said he, "and we never killed any fish or had anything done to us." It transpires that Mr. Holmes thought the Northern Fox, the outlet of Lake Winnebago, the only Fox River there was. The Fox River best known to Chicago, and the one on which the Fox River Association has operated, is quite a different stream. It rises in southern Wisconsin, flows south and empties, not into Lake Michigan, but the Illinois River. The Northern Fox and the Wolf River, practically the same stream, carry Lake Winnebago as a mere broadening of the channel. All these waters were part of the old Indian and Père Marquette water trail from the Great Lakes to the Mississippi, the divide, as is generally known, being the narrow neck at which is now Portage City. The lower Fox never was part of the water trail, but it had mills, which killed fish.

E. H.

### A Sigh for the Crystal Streams.

CIMARRON, Gray County, Kan., Aug. 28.—This meek little ghost of a postal card has stared me in the face from my office desk for several days. The little fisherman reminds me of my boy Bill, whom I found trying to catch the postmaster's chickens with a hook and line, baited with a grain of corn the other day. He had captured one little red rooster, and tell it not in Gath (or Cimarron either), it had joined the great majority. I let him land one more, then stopped the picnic, and went down and paid the postmaster fifty cents. Fish fishing is poor in western Kansas, cats, suckers and buffalo in the Arkansas and tributaries and a few carp in the big irrigating canal that runs for forty-two miles over high prairie are all the fish we have. I go fishing two or three times every summer and get muddy fish, but I long for the crystal brooks and lovely trout of the East. I can get an occasional antelope and ducks and prairie chickens galore here, but you who can go fishing in clear water and get partridges, quail and gray squirrels, are much better off for sport than we are here.

W. J. DIXON.

### How They Got Away.

THE finest lot of fish ever caught in this section was, we regret to say, lost in a peculiar manner during one of the recent thunder squalls. It consisted of a magnificent muscalonge, weighing exactly 69¾lbs., a black bass which weighed 6¾lbs. and five others weighing over 4lbs each, seven pickerel, one a 15-pounder, and about forty comparatively smaller bass, pickerel, pike, etc. They were caught by John Lyman, of Clayton, who has been visiting in this vicinity and was then fishing near Chimney Island, about three miles below the city. The fish were loose in the bottom of the boat, and when the squall came up they were left there not secured in any way, while Mr. Lyman went under the shelter of the big butternut growing on the rampart of old Fort Levis. The rain fell in torrents, filling the atmosphere to such an extent that the fish were able to swim right off through the air, though of course with some difficulty. Seeing them swimming off above his head, Mr. Lyman stripped and swam after them, but was unable to overtake them and narrowly escaped drowning, only succeeding in diving under the shelter of the foliage of the tree, as he became absolutely exhausted. The loss of such a representative lot of fish is deeply regretted by lovers of the rod in this vicinity.—*Clayton Republican.*

### Lake Superior Set-Lines.

Of his trip to the North Shore of Lake Superior Mr. Starbuck writes: "My trip to the North Shore was an exceedingly pleasant one, but the fishing was the poorest I ever experienced. There are two causes for this, one the very warm weather and unruffled lake, it being like a mirror half the time, and the other and most destructive the illegal gill netting and line setting, in which nearly every Indian and half-breed, man and boy, from Goulais Bay to the Big Pic indulged in.

The *modus operandi* of the line fishing is simply a strong cord with a stone of a few pounds fastened at one end and a float at the other. Two snooded hooks a foot or two from the bottom are tied to the cord and then baited with live coceduces, the most taking bait for trout extant. Each tawny fisherman will set about twenty or thirty of these in choice waters and then wait near by in his canoe or boat until he sees the float go under and then give it immediate attention. It is a very destructive way to decimate the lake of the handsomely "spotted leopards" once so abundant there. It seems to be an open matter, as no concealment whatever is made of it.

ALEX STARBUCK."

### Buckshot in Chokebores.

ORLANDO, Florida, Sept. 2.—I have a fine Greener trap gun, a close, hard shooter; but, being full chokebore, it scatters buckshot all over the woods. It is a 10-gauge, and weighs upward of 9lbs. I want no better gun for fine shot. But, as there are both deer and turkeys in Florida, it is sometimes desirable to shoot large shot. Can any reader of FOREST AND STREAM tell me how to load it to cause it to throw large shot all in a bunch?

MAHLON GORE

### Large Susquehanna Bass.

UNDER the caption "Large Susquehanna Bass" in last week's issue I failed to state the weight of the fish, which was eight pounds.

S. H.

## The Kennel.

### FIXTURES.

#### DOG SHOWS.

Sept. 19 to 22.—Third Annual Dog Show of the Kingston Kennel Club, at Kingston, Canada. H. C. Bates, Sec'y.
Sept. 20 to 23.—Western Michigan Kennel Club, at Grand Rapids Mich. H. Dale Adams, Galesburg, Mich., Superintendent.
Sept. 26 to 30.—Rochester Kennel Club, at Rochester, N. Y. Dr. O. S. Bamber, Sec'y.
Sept. 27 to 30.—Dog Show at Ottawa, Can. Alfred Geddes, Sec'y.
Oct. 4 to 8.—Eleventh Annual Dog Show of the Danbury Agricultural Society, Danbury, Conn. B. C. Lynes, Sec'y.
Oct. 25 to 28.—Omaha Kennel Club, at Omaha, Neb. E. L. Marston, Sec'y.
Nov. 22 to 25.—Brooklyn. H. W. Huntington, Sec'y, 148 South Eighth street.

1893.

Jan. 5.—Gloversville, N. Y. F. B. Zimmer, Sec'y.
Feb. 21 to 22.—Westminster Kennel Club, New York city. Jas. Mortimer, Supt.
June 13 to 17.—World's Fair, Chicago.
Sept. 7 to 10.—Hamilton, Ontario. A. D. Stewart, Sec'y.

#### FIELD TRIALS.

Oct. 25.—Third Annual Field Trials of the National Beagle Club, at Nanuet, N. Y. Bench show of the club Oct. 24. H. V. Jamison, Sec'y.
Nov. 7.—International Field Trials Club, third annual trials, at Chatham, Ont. Amateur Stake, Nov. 7. Open Stakes, Nov. 8. W. B. Wells, Sec'y.
Nov. 7.—United States Field Trials, at Elizabethtown, Ky. P. T. Madison, Indianapolis, Ind., Sec'y.
Nov. 8.—New England Field Trials, at Assonet, Mass. E. Knight Sperry, New Haven, Conn., Sec'y.
Nov. 14.—Fourth Annual Trials of the Brunswick Fur Club, at Princeton, Mass. J. H. Baird, Sec'y.
Nov. 15.—American Field Trials, at Columbus, Ind. W. J. Beck, Sec'y.
Nov. 21.—Eastern Field Trial Club Trials, at High Point, N. C. W. A. Coster, Sec'y.
Nov. 28.—Philadelphia Kennel Club Trials, at High Point, N. C. F. G. Taylor, Sec'y.
Dec. 5.—Central Field Trials, at Lexington, N. C. Col. Odell, Sec'y.
Dec. 19.—Irish Setter Field Trials, at Lexington, N. C. Dr. G. G. Davis, Philadelphia, Pa., Sec'y.

### BULL-TERRIERS AGAIN.

*Editor Forest and Stream:*

Having seen in your issue of the 8th inst. the very unjust criticism of bull-terriers by "Didymus," I consider it a privilege to say a word in defense of my favorite breed. I have owned all kinds of bull-terriers, from the cheap, unpedigreed dog to first prize winner in New York, Boston and several places. "Didymus" says, "I have no respect for a man that will keep a bull-terrier for a watch dog, as he is a sneaking rascal and will take hold of a man without a word of warning."

In that he makes a great mistake. My experience teaches me that as a companion for a man or a playmate for children he is equalled by few and excelled by none.

I have in my kennel at the present time four well-bred bull-terriers. I will wager a stranger can come into the kennel and take a bone from either of them without the dog showing the least sign of ill temper.

H. FRED CHURCH.

TAUNTON, Mass., Sept. 10.

## NORTHWESTERN F. T. C. TRIALS.

THE trials began on the afternoon of Sept. 5. Some of the competitors and one of the judges did not arrive till afternoon, hence the delay in starting.

The judges were Rev. W. Hamilton Spence and myself.

The trials in the preliminary steps started unpleasantly. The management decided to adopt the Eastern Field Trials Club's rules with the following amendment:

"INSTRUCTION TO JUDGES.

"The trials will be run under the Eastern Field Trials Club's rules.

"The judges will give greater credit to the dog that works to the gun, and works obediently and cheerfully without assistance of the handlers. Handlers must not whistle and shout at their dogs in a manner that will interfere with an opponent's dog. If they do so the judges will order up the dogs and have them work alone. The desire of this club is that dogs shall have the greatest credit that go and work intelligently and industriously and show the greatest skill in handling their game. (Signed), PAUL H. GOTZIAN."

Mr. Avent objected, and held that the club had advertised to run under E. F. T. C. rules, and that they therefore had no right to make any changes. The discussion took such a turn that Mr. Johnson, the secretary, told Mr. Avent that the rule was made specially for him. Thereupon Mr. Avent paid his entry fees and refused to run his dogs, assuring the management that he would not run under a rule made specially for him. Mr. Gotzian tore in pieces the paper containing the new rule and a working harmony was restored for a time.

The rule of itself is a most excellent one and worthy the consideration of every field trial club. Mr. Johnson's idea was excellent as embodied in the rule, but it should have been made for all alike and so understood. It is a repetition in part of some things already in the E. F. T. C. rules; but the part requiring the judges to run a dog alone which has been balked or obstructed by whistling or loud orders from the opposing handler, is excellent, and the need of it has been many times observed in trials of past years. It is to be regretted that such an unpleasant incident occurred. It undoubtedly created a feeling which lasted throughout the trial and caused a great deal of carping.

Mr. Paul Gotzian resigned his office of president on the same evening.

Some of the ill feeling took a vindictive turn, and it was rumored that Mr. Avent was canvassing the company diligently for members to the Manitoba Field Trials Club, an act which is quite as reprehensible in the way of being unsportsmanlike as it could well be. The kicking seemed to be contagious, and some who had no interest in the trials whatever were as loud and free in their speech as if it were a personal grievance.

### THE DERBY.

The work was from good to ordinary and a good part of it inferior, there being but little work done in it of a uniform, good class.

Alberta Joe, the winner, was mentioned in the report last week as a winner in the Manitoba Field Trial Club's trials. In range, judgment and uniformity of work he surpassed any dog in the stake. He dropped to his points and did not go to his birds every time with perfect confidence, he apparently being overtrained in that respect.

Manitoba Shot had a wide range and worked his ground with judgment, showed a good nose, went to his birds accurately and found fairly well. He made some blunders, but showed a much higher class of work than the others, and the judges considered him an easy second.

Duff, divider of third, showed an ordinary character of work on birds, but his range in his first heat for regularity and scope was superior to the others.

Lochinvar, divider of third, showed a mixed grade of work. He was inferior in nose and range as shown by his inferior work several times in locating his birds. He also required a deal of assistance from his handler.

Following is the order of running:

Thos. Johnson's black setter dog Sut (Manitoba Toss—Pitti Sing) *with*
J. M. Avent and Bayard Thayer's black, white and tan dog Lochinvar (Chance—Bessie Avent).

John Sharples's liver and white pointer bitch (Upton—Blythe) *with*
L. W. Smith's setter bitch Fan Chatham (Chatham—Baball).

Thos. Stone's liver and white pointer dog Manitoba Shot (Coton—Psyche) *with*
J. M. Avent and Bayard Thayer's black, white and tan dog Kingston (Chance—Bessie Avent).

Thos. Johnson's liver and white pointer bitch Gem of the West (Upton—Blythe) *with*
J. M. Sneed's setter dog Gem Gladstone (Paul Gladstone—Katonia).

John Sharples's liver and white pointer dog Alberta Joe (Upton—Blythe) *with*
Thos. Johnson's liver and white pointer dog King of Manitoba (Upton—Blythe).

S. J. Gottschammer's setter dog Eagle Monk (Monk of Furness—Quail) *with*
Joe Philip's liver and white pointer dog Lonsdale (Coton—Psyche).

W. T. Hunter's black setter dog Duff (Manitoba Toss—Pitti Sing) *with*
J. M. Avent and Bayard Thayer's black, white and tan setter dog Bonia (Roderigo—Juno A).

Thos. A. Montgomery's setter bitch Varo (Bruce M—Frost III.) *with*
J. B. Kelly's liver and white pointer dog Victor (Coton—Psyche).

Thos. Shelton's liver and white dog Diamond (Upton—Blythe) *with*
Thos. Stone's liver and white pointer dog Sam (Coton—Psyche).

The judging gave a great deal of dissatisfaction in some quarters, Mr Avent being particularly loud, vehement and persistent in nursing his grievance, and he would not play any more, he refraining from making his entries in the All-Age Stake. So soon as the decision was announced he publicly gave vent to his anger and denunciation of the judges. His refusal to enter his all-age dogs did not seem to affect any one very seriously, and the trials went on pleasantly without him.

### Monday.

The afternoon was very pleasant and favorable for good work. A mild wind blew from the west, which gradually died away to calmness. Birds were found in plentiful numbers, yet the quality of the work was very inferior, some of it being really poor.

*First Series.*

SUT—LOCHINVAR.—They were started at 4:45. T. Sheldon handled Sut, and J. M. Avent handled Lochinvar. Loch ranged wide, but not with the best judgment. After beating out some ground he soon drew with a high nose with precision to a bevy of which he had every advantage and was steady to shot. A single bird was left and Loch roaded to a flush on it. Sut flushed and chased. Soon afterward he chased again. He showed no training and was wild. Mr. Johnson then requested that his dog be retired and the judges complied, and ordered the dogs up. It is an open question whether the judges had a right to order both dogs up under the Eastern Field Trials Club rules, as there is much that can be said on both sides, but the common sense of the matter was as the judges acted.

ALBERTA RUBY—FAIR CHATHAM.—W. Pickering handled the former, W. L. Smith the latter. They began at 5:02. The heat was a very poor one. Both fell far short of their opportunities on birds. Fair ranged with much better judgment, but her work on birds was ordinary, she showing hesitation and indecision, and one time abandoned warm scent close to birds. Ruby ranged with poor judgment, although covering a good deal of ground at times, but she had no success as a finder.

KINGSTON—MANITOBA SHOT.—They began at 5:43, the former handled by J. M. Avent, the latter by Thos. Johnson. Kingston had a sore foot, which interfered with his efforts, and as the heat progressed he went quite tenderly and showed some lameness. Shot started a bit slow and ranged close, but gradually widened out his range and beat his ground with good judgment. He showed a good nose and finding qualities, but he was a bit over-cautious in drawing to his birds, at times on single birds, he made a number of errors in the way of flushes from carelessness or inattention. He made six flushes in all, some excusabiy, and found three bevies. King pointed twice on birds. Both were steady to shot. King backed only moderately well, and his range was irregular and lacked judgment. A moment after the dogs were ordered up, King chased a jack rabbit about a half mile or more, which jumped up ahead of him. Shot showed the greater quality in his work and was more intelligent.

GEM OF THE WEST—CLEM GLADSTONE.—They started at 6:27, T. Shelden handled the former, F. Richards the latter. The work on birds was very poor, and abounded in errors, although there were plenty of good opportunities to display good work. Each scored points on singles, but their efforts at locating were poor. Both pottered on the footscent a great deal. The pointer made many flushes, some excusably, some not. Clem had been started soon after a long railroad ride, and probably that circumstance had something to do with his showing. The heat and work for the day ended at 7:10.

### Tuesday.

The weather was cool and cloudy and rain threatened. A gentle wind blew during the day, except during the midday hours.

ALBERTA JOE—KING OF MANITOBA.—The former was handled by J. Sharples, the latter by T. Sheldon. They began at 7:45. King roaded to a point on the bevy; Joe called in to back, took the scent. King chased when the bird flushed and his handler shot. Shortly afterward he chased again badly and led Joe off on a bad chase. At 8:04, after the chase, he was ordered up and Joe was run alone. A long search was made before finding. He dropped to a point next, then roaded, pointed, mowed on and roaded to point. Joe showed some good ranging during the heat and applied excellent judgment.

EAGLE MONK—LONSDALE.—They began at 8:50. Lonsdale was handled by T. Johnson, Eagle Monk by A. C. Anderson. Birds were soon found and Monk chased twice. Lonsdale ranged close and pottered a great deal.

DUFF—BONIA.—The former was handled by F. Richards, the latter by J. M. Avent. The heat began at 9:42. Duff pointed a bevy at the edge of stubble and Bonia coming up joined in the same point. Some said Duff stopped to a flush. Both were steady. Bon pointed and Duff backed; moved on about 50yds, and Bonia flushed a single up wind. Next, Duff drew carefully and had just stiffened in a point when the bird flushed wild. The dogs were then worked toward where the scattered birds of the bevy found first had flown. Bonia pointed; Duff backed and Bonia roaded with his handler's assistance. The heat ended at 10:27. Bonia showed a disposition to point frequently on the footscent, and ranged irregularly with little judgment.

Chickens were so scarce that the dogs were taken up and carried to other ground.

VARO—VICTOR.—The former was handled by J. Simonean; the latter by J. McCloud. The heat began at 10:05. At 11:16, Varo was ordered up for flushing and chasing repeatedly. Victor roaded extremely slow and was overcautious. He pointed stanchly. His range was very close and his pace slow. He was ordered up at 11:33.

DIAMOND—SAM.—They were started at 11.36, T. Johnson handling the former; J. McCloud the latter. Sam roaded to a false point. He next pointed close to a bevy. Diamond backed in a half-way manner; Sam drew in and flushed the bevy. On the scattered birds, both pointed about 40yds. apart at the same time. Diamond pointed a single up wind, and Sam going across wind flushed it. Up at 11:06. Diamond ranged wide and fast, worked sharp on her birds and showed good judgment.

This ended the first series.

*Second Series.*

The judges selected six dogs to run in this series. The quality of the work done, considered as a whole, was ordinary.

LOCHINVAR—SHOT.—After lunch and a rest of about three hours, the running began at 3:03. Loch took a cast and pointed a bevy nicely. Shot went up and stole the point. Both were steady to shot. Loch then pointed a remaining bird. Next he pointed, then left his point, and Avent flushed the bird a few yards ahead of where he pointed; it was a very poor piece of work. Shot flushed a bird. The dogs were watered. Loch roaded and pointed, roaded and pointed, his handler helping him and urging him on. Shot pointed at the same time; nothing was found. Loch pointed a single bird; soon afterward he pointed another, and Avent urged him on to a flush. Shot pointed, Loch backed; Shot took the trail of an old bird and roaded it well to a point, doing a most difficult piece of work. Loch crossed the trail several times without recognizing it. Up at 3:40. Shot showed the wider range, taking longer casts with better judgment, and beating out his ground with more regularity. He went to his birds without prompting or assistance from his handler, except when close to him.

ALBERTA JOE—DUFF.—They began at 3:43. Duff flushed or pointed a single, the judges did not see which. Next Joe took a long cast down wind and pointed three birds, dropping to his point and remaining staunchly while his handler went up to him and flushed. They were worked on very unfavorable grounds without finding. They were ordered up to be put down again, as it was unfair to run them to a standstill.

DIAMOND—BONIO.—They began at 4:30. Diamond soon pointed and Bonio refused to back and pointed; a false point for both. Bonio again false pointed and Diamond backed to order. Bonio pointed, roaded and pointed, his handler assisting him along; nothing found. Diamond dropped to a point or flush, the judges not being able to see the work. Bonio, 200yds. away, pointed a bird, moved in and flushed it. The heat then ended Time 4:52. Both dogs behaved poorly and ranged with no judgment.

ALBERTA JOE—DUFF.—They began at 4:57 and were run 9m., nothing being found, but Joe showed such a decided superiority in range and judgemnt that the dogs were ordered up.

ALBERTA JOE—SHOT.—They were started at 5:10. Soon Joe pointed near the edge of a stubble and Shot going up, without seeing Joe, pointed about 20yds. to one side, and his handler flushed a bird ahead of him. Shot pointed, Joe backed to a mild caution, nothing found. Sent on, Joe made a good find on a bevy of chickens which he pointed steadily, dropping to his point. Joe flushed a single down wind. The birds flew over a rise a short distance ahead and were followed. Joe soon located and pointed them. Shot pointed behind him on a single; his point apparently was a back. Both were steady to shot. The heat ended then. Time 5:29.

After a short consultation the judges announced the winners: First, Joe; second, Shot, third, Lochinvar and Duff.

The prizes were: First, $198; second, $82.50; third, $49.50, divided.

### THE ALL-AGE STAKE.

This stake was begun on Wednesday, Sept. 6. The work as a whole was very creditable, and some of it decidedly superior.

Manitoba Shot made many admirers in the running of the stake, and his excellent and well sustained work proved the correctness of the judges' estimate of him in the Derby, in which their decision had been ridiculed and commented upon in terms not flattering. Yet he was the same class dog on Wednesday that he was on Tuesday, the difference being only in the spectators' minds. They looked to the detail of the work entirely, and apparently did not consider the high class of the dog at all. His work on Tuesday was in most unfavorable ground. He was easily first in the stake.

Joe showed a little staleness in his work, due perhaps to the hard work of the previous day. He was a fairly good second.

Atlanta, third, showed good finding capabilities, ranged well and made a good showing, but she lacked courage in her work on birds once in a while.

The trials were a success, and it is to be hoped that they will be held again next year, notwithstanding the unpleasantness which several times cropped out during the last meeting.

It is probable that no meeting ever was held in which there was more kicking and bad feeling, some of it over fancied grievances and more of it from pure ill temper. The judges conducted the running and made their decisions perfectly independent of anybody's pleasure or displeasure, the only consideration being to determine the best dogs in the stake.

Quite a little crowd was present. Besides those mentioned in the report of the running, there were Paul H. Gotzian, of St. Paul; Mr. Boxer, of Winnipeg; Dr. Rowe, Messrs. Day, Hardin and others

Good weather favored the trials, and birds were found in sufficient numbers. There was game in abundance; and the reports were quite as favorable in respect to chickens and ducks in North Dakota, on the lines of the Great Northern Railway, which runs through some of the finest duck and chicken grounds of the West.

The order of running was:

Thos. Stone's liver and white pointer dog Manitoba Shot (Coton—Psyche) *with*
Thos. A. Montgomery's liver and white pointer bitch Ightfield Beauty (Ightfield Dick—Polly P.).

Thos. Johnson's blue belton setter bitch Manitoba Pet *with*
John Sharples's liver and white pointer dog Alberta Joe (Upton—Blythe).

C. M. Griggs's black, white and tan dog Click Noble (Dan Moore—————) *with*
L. W. Smith's black, white and tan bitch Atlanta (Jean Val Jean—Shena Van).

J. C. Phillips's liver and white pointer dog Coton (Ponto—Dainty) *with*
A. J. Klotlanda's black, white and tan dog Dan Noble (Gladstone's Boy—Flame).

Thos. Johnson's blue belton bitch Manitoba Patti *with*
J. H. Fuller's liver and white setter dog Sport (Don—Dolly).

Elms Kennels' blue belton bitch Minnesota (Monk of Furness—Lady Faydette) *with*
H. P. Hennett's lemon and white setter dog Lucky Druid (Ruby's Druid—Hoosier Belle).

*First Series.*

MANITOBA SHOT—BUNTY.—They began the heat at 8:13. Thos. Johnson handled the former, T. Montgomery handled the latter. Bunty was first to point. Shot, going across wind, pointed the same birds several yards ahead of Bunty, doing it nicely, though the credit of the find was Bunty's. Sent on, Bunty roaded to a point on a remaining bird. They were then worked in a circle to where a large bevy had been marked down; soon each secured a point on it. Bunty made three flushes and Shot made one. Next, Shot pointed a single bird sharply and nicely. Bunty backed, but not promptly. Mr. Johnson shot, and, thinking he had a blank cartridge, he was not cautious in aiming, and he killed the bird. Bunty broke shot. Shot pointed well; nothing found; Bunty backed well. Shot next took a long cast, beating out his ground skillfully; he drew accurately to a bevy, head well up, and pointed it. The bevy flushed wild while Shot's handler was about 150yds. away, and he remained perfectly staunch, doing an excellent piece of work. The heat ended at 8:43. Shot ranged wide and well, cutting out his work with good judgment.

MANITOBA PET—ALBERTA JOE.—T. Johnson handled Pet; J. Sharples handled Joe. They started at 8:48. Joe started slow, apparently a bit stale after the hard work of the day before. He soon increased his speed and range to his good form. Pet ranged extremely wide; too wide, as she would go out of sight. Pet made game on an old bird a long distance away, flushed it and half chased. Joe dropped to wing handsomely. Sent on, Joe dropped to a point on a bevy and remained steady when it flushed wild. Some of the birds went over Pet, a quarter mile away, and she chased them. Next, she took a long cast, ran into a bevy without checking her speed. Joe, about 30yds. away, dropped to wing. She showed excellent speed and ranging capabilities if properly applied.

CLICK NOBLE—ATLANTA.—he former was handled by G. W. Richards, the latter by W. L. Smith. Atlanta was far the wider ranger and the faster in speed. Her work on birds was better than Chick's, although she made several errors. They started at 9:20 and were down thirty minutes.

COTON—DAN NOBLE.—T. Johnson handled Coton, G. W. Richards handled Dan Noble. They started at 9:54. Dan ranged close and made many false points during the heat. Coton ranged wide at first, but narrowed down gradually till toward the last he needed urging to keep him out at his work. No work on birds was done during the heat. Up at 10:20.

MANITOBA PATTI—SPORT.—T. Shelton handled Patti, J. H. Fuller handled Sport. Each mad a bad flush on birds of the same bevy; both dropped to wing. Patti's handler flushed more birds ahead of her. The weather was getting warm and affected the dogs' work. After a long search without finding they were ordered up at 11:12 to be put down again.

MINNESOTA—LUCKY DRUID.—At 11:16 they began, the former handled by A. C. Anderson, the latter by Frank Richards. The weather was close and the conditions un-

favorable for good work. Druid showed the wider range and a good knowledge of finding and pointing birds, but his performance on them was mixed, points and flushes, and in the latter part of the heat he appeared to be getting off his nose, as shown by his work on single birds. He finished with a good piece of roading on a bevy which he pointed. Minnesota acted very puppyish, although showing a great deal of quality and will improve greatly with more age. Up at 11:47.

A long rest was taken after lunch in town till the heat of the early afternoon had passed away.

MANITOBA PATTI—SPORT.—They were started at 4:16 to complete the unfinished heat of the forenoon, and were ordered up at 4:35. Patti showed excellent speed and range, but her work on birds was mixed, good and bad. Sport was industrious, pottered betimes, and had a fair range.

This ended the first series.

*Second Series.*

The judges called up Manitoba Shot, Alberta Joe, Atlanta, Bunty and Lucky Druid to run in the second series.

MANITOBA SHOT—ALBERTA JOE.—They started at 4:41. Shot immediately took a long cast, and about 300yds. away pointed; Joe going up dropped to a back. Shot drew up to point closer. Next he pointed a single bird nicely and stanchly about 100yds from his handler, and it flushed wild. Then Joe widened his range, took a long cast and drew to a point. Shot went went by and pointed. Joe being unable to locate, Shot was started in and flushed the bird. A hawk flushed a number of birds on the prairie close by and the dogs made game afterwards on the foot scent. Joe flushed after being sent on. Up at 5. Both showed excellent range and good judgment in finding, and went to their birds well.

ATLANTA—BUNTY.—They began at 5:05. Atlanta took a cast into some scrubs and pointed a single stanchly and accurately, and was steady to wing. Bunty dropped to a point. Atlanta pointed on a bevy. Her handler, about 200yds. away, blew his whistle and caused her to move on. She took a short cast, pointed again, then came back and pointed the birds, but stood in a listless and undecided manner. Bunty was allowed to crowd in ahead and take the point. The heat then ended: time 5:25.

LUCKY DRUID—ATLANTA.—They began at 5:46, 20 minutes being allowed Atlanta for resting. Druid took a long cast, came around to the rear and pointed on footscent. Sent on, he pointed a bevy in the open. At the same time Atlanta pointed on stubble; nothing found. Sent on, Atlanta, after a few casts, pointed up wind of a bevy. Druid joined across wind on the birds flushed them. Sent on, Atlanta pointed a single well. Again sent on, she found a bevy, Druid drawing and pointing. Druid was the next to find and score. He made several inexcusable flushes, and the heat ended at 6:21. Druid was the wider ranger, ran strong and covered a great deal of ground, although he could have beaten it out with more judgment. He was rather self-willed. Atlanta proved uniformly a good finder in each heat, but did not show sufficient confidence on birds when her handler was near her or whistled to her, and she was not handled with skill. The heat ended at 6:29.

As Atlanta had been run hard during the afternoon, the judges postponed further running till the next day.

Thursday.

The morning opened cool, damp and raw. A light shower had fallen in the early morning hours. On the whole, it was not a bad morning for work.

ATLANTA—ALBERTA JOE.—They were cast off at 8:37. Both started a little slow, but soon warmed up and widened out their range. Joe pointed a bevy and was steady to wing. About 200yds. further on, Atlanta false pointed. Soon afterward, she false pointed again and Joe backed. Next she dropped to a point on an old bird which ran from her point or else she dropped on the trail. The heat ended at 9:01, Joe doing the better work and range, although Atlanta made a good showing in ranging well.

COTON.—The judges wished to see more of Coton's work. He was cast off at 9:03 and taken up at 9:15. He started slow, ranged close to his handler, and showed a disposition to potter. He worked almost entirely on one side of his handler when he did begin ranging, and returned directly to his handler at every cast watching him the while. He pottered and loafed some between casts. He was ordered up at 9:15, and the judges then announced the winners:

First, Manitoba Shot: second, Alberta Joe; Third, Atlanta.

First prize, $114; second prize, $47.50; third prize, $28.50.

## AMERICAN KENNEL CLUB MEETING.

THE regular quarterly meeting of the American Kennel Club was held at 44 Broadway, New York, on Thursday, Sept. 8, 1892 Present: Thomas H. Terry, vice-president, in the chair; J. E. Anthony, for associate members; W. C. Reick, for St. Bernard Club; H. T. Foote, for associate members; James Mortimer, for Pacific Kennel Club; W. Stewart Diffenderffer, for Maryland Kennel Club; T. Farrar Rackham, for American Pet Dog Club; A. H. Hopper, for Great Dane Club; Max Wenzel, for California Kennel Club; H. B. Cromwell, for Westminster Kennel Club; Wilson Fiske, for English Setter Club; G. Muss-Arnolt, for Pointer Club of America; F. S. Webster, for Washington City Kennel Club. The minutes of the last meeting were read and confirmed. The secretary's report was then read and accepted. It announced the election of Mr. Reick as a delegate from the St. Bernard Club, Mr. James Mortimer from the Pacific Kennel Club, and Mr. W. F. Cadugan from the Omaha Kennel Club, each of which were recognized in due course. A notice from the Chesapeake Bay Dog Club stating Mr. Lamb would substitute Mr. F. T. Norris as the delegate was laid on the table.

Then Mr. Vredenburgh mentioned a complaint that Mr. Lee, of Toledo, had against Mr. Lamb, and as this was still under inquiry there was no action taken.

The allotment of dates, as per a resolution made at the last annual meeting, was then proceeded with. The Mohawk Valley Poultry and Kennel Club, having claimed a Sunday, some discussion occured decidedly against allowing it, resulting in their having the option of any four days between Jan. 2 and 7, 1893. The South Carolina Poultry and Pet Stock Association, were allotted Jan. 10 to 14, as claimed.

The Maryland Kennel Club withdrew the application for Feb. 14 to 17. The Westminster Kennel Club was allotted Feb. 21 to 24.

The Chesapeake Bay Dog Club, The Elmira Kennel Club and The Keystone Kennel Club, each claimed four days in the succeeding week, which was voted to the Keystone Club, whose delegate (Mr. Jas. Watson) expressed a desire that it should not interfere with the Elmira Show, consequently it was agreed that the latter should have the option of using those dates.

The Mascoutah Kennel Club and the Maryland Kennel Club claimed March 7 to 11, and the Maryland gained the allotment. The Southern California Kennel Club were allotted April 19 to 22. The Pacific Kennel Club and the California Kennel Club each asked for May 3 to 6, the former being supported by the Pacific Fox-Terrier Club, received the allotment, after a contest in which Mr. Max Wenzel, Mr. Jas. Mortimer and Mr. A. H. Hepper figured.

A committee was then sanctioned to allot any vacant dates before the December meeting. The National Beagle Club's reference with regard to the absolute winner at the 1890 field trials was passed on by a decision that as there was no such contest there can be no such title or award.

The Canadian Kennel Club's application for a joint committee for fixing show dates was referred to the committee arranged for to allot unclaimed dates.

Mr. C. M. Nelles's application was taken up and it was decided that his disqualification should continue to Jan. 1, 1893.

The Michigan Kennel Club, the Burlington County Agricultural Society and the Rhode Island Poultry Association were admitted to membership.

Mr. A. P. Vredenburgh resigned the secretaryship of the American Kennel Club to take up a position requiring his immediate attention, and stated that he had arranged for Mr. Lewis to fill his place under his supervision until his successor was appointed.

The committee on express tariff handled in the correspondence without being able to announce any success.

The committee on removal and Social Club stated that considering the resignation of the secretary, it had decided to defer arrangements.

The treasurer's report showed a balance of $4,026 68. Receipts, $9,912; expenditure, $5,585; balance, $4,327. The Stud-Book showed 2,603 paid registrations, 168 associate member registrations, and 80 registrations of winners.

A vote of thanks was tendered to Hugh Dalziel for the presentation of the Fox-Terrier Stud-Book and others to the American Kennel Club. Adjournment.

Mr. Jas. Watson (as one of the committee on rules, etc.) inquired for the unofficial opinion of those present on the carrying out of a plan which should change the composition of the American Kennel Club, so that the delegates need only attend one meeting annually, the business of the club being intrusted to an executive committee, which should replace the advisory committee. He also inquired the sense of the meeting regarding a union with the Canadian Kennel Club and the creation of one club for the continent, which was opposed.

A suggestion for regulations requiring a fee from each show given under A. K. C. rules, instead of the annual fee, and the limiting of awards, received better support.

Mr. Muss-Arnolt called attention (unofficially) to the action of the Great Dane Club in refusing to accept members who were not residents of Chicago, and secured the support of the delegate of that club to a suggestion for the formation of another club with national scope.

## THE AMERICAN FIELD TRIAL DERBY.

COLUMBUS, Ind., Sept. 10.—*Editor Forest and Stream:* I send you a list of the entries for the American Field Trial Club's Derby, to be run near this place beginning Nov. 15. The All-Age is filling rapidly and promises to be much larger than the Derby. Besides these two stakes we have a puppy class for English setters, Irish setters and pointers born on or after Nov. 18, 1891.

ENGLISH SETTERS.

BENGAL AND BABY BLUE.—Geo. A. Castleman, Trenton, Tenn., enters Bengal (Joe Roderigo—Julia), and Baby Blue (Blue King—Kate).

FLING.—Bert Crane, Chicago, Ill., enters Fling (Rowdy Rod—Maud).

BORNEO RAKE.—W. W. Dunnington, Indianapolis, Ind., enters Borneo Rake (Count Roderigo—Julia).

DAN'S LADY AND NELLIE'S DOT.—Theo. Goodman, Terre Haute, Ind., enters Dan's Lady (Dan Gladstone—Lily Burgess), and Nellie's Dot (Dan Gladstone—Nellie G).

BLUE GROUSE.—L. A. Rice, Riverside, Ill., enters Blue Grouse (Don—Belle of Hatchie).

JIM DANDY.—John Roberts, Chicago, Ill., enters Jim Dandy (Braxton Bragg—Gypsy).

POINTERS.

KENT'S MIKE.—J. F. Pautler, Carrolton, Mo, enters Kent's Mike (King of Kent—Croxlill).

TRINKET'S DON.—A. A. Waddell, Coffeyville, Kas., enters Trinket's Don (Donald's Sensation—Trinket).

TRIXEY OF AXTEL, PRIDE KING DON.—W. A. Thompson, Attica, Ind., enters Trixey of Axtell (Axtell King Don—Patti M. II.) and Pride King Don (King Don—Meteor's Dell).

DON C., MAAN.—Geo. A Castleman, Trenton, Tenn., enters Don C. (Rank—Fly) and Maan (Rex—Bird),

DICK FIS-HEL.—U. R. Fishel, Hope, Ind., enters Dick Fis-Hel (Don Fis-Hel—Leos).

TOPSY PAPE.—W. W. Dunnington, Indianapolis, Ind., enters Topsy Pape (Joe Pape—Topsy W.).

LATOSKA.—John B. McGuffin, Indianapolis Ind., enters Latoska (Ossian—Pickwick).

POMME DE TERRE.—T. G. Barstow, St. Louis, Mo., enters Pomme de Terre (Ossian—Clipaway II.).

IRISH SETTERS.

REDSKIN.—Dr. E. B. Weston, Chicago, Ill., enters Redskin (Mardo—Mirtee).

BELLE OF MEXICO.—Geo. H. Kunkel, Mexico, Mo., enters Belle of Mexico (Daniel O'Connel—Lalla Rookh).

SAGAS TEARAWAY AND MASTER TEARAWAY.—George E. Gray, Appleton, Minn., enters Sagas Tearaway (Tearaway—Tillie Born) and Master Tearaway (Tearaway—Ruby Royal).

NICK OF GLENCHO.—F. L. Abbey, Detroit, Mich., enters Nick of Glencho (Pat S.—Alice K.).

ELPLIM II., GLENMORE APPIE, BAH, OWNIE, PET, JAY BIRD, WAD AND BEAU BUM.—Glenmore Irish Setter Kennels, Coffeyville, Kan., enter Elplim II. (Tyrconnell—Knivara), Glenmore Appie (Desmond II.—Nellie), Bah (Desmond II.—Nellie), Ownie (Elcho, Jr.—Romanie), Pet (Mack N.—Ruby Glenmore), Jay Bird (Mack N.—Ruby Glenmore), Wad (Mack N.—Ruby) and Beau Bum (Beau Brummel—Ruby Glenmore).

W. J. BECK, Sec'y-Treas.

## GORDONS IN THE N. E. TRIALS.

NEW YORK, Sept. 10.—*Editor Forest and Stream:* The special prizes offered to Gordon setters at the New England Field Trial Club's meeting at Assonet, Mass., Nov. 8, 1892, now are: $50 offered by me to the Gordon setter belonging to a member of the Gordon Setter Club at time of closing the entries, Nov. 1, which shows the best field work among Gordons at these trials; $30 cash offered by the Gordon Setter Club to the Gordon winning second place, and $20 to the Gordon winning third place among Gordons, and belonging to a member of the Gordon Setter Club on Nov. 1 next; $50 cash offered by the Gordon Setter Club to any Gordon showing best field work among Gordons, provided there are at least three Gordon starters.

These prizes, to Gordons only, amounting to $150 cash, are in addition to the New England Field Trial Club's open All-Age Stakes of $200 to first, $100 to second, $50 to third, which any good Gordon stands a chance to win, making $500 in cash prizes, which should draw a good lot of entries.

As already mentioned, the kind of country and the running rules used at these trials resemble the conditions of a day's hunt among sportsmen, and will enable our dogs to do better work than at the Southern trials, and at much less expense.

Annual dues to our club $5, and we would be pleased to receive applications for membership from all friends of the Gordon setter, whether intending to run their dogs or not.

JAMES B. BLOSSOM,
President Gordon Setter Club of America.

Mr. Charles Clippinger, who purchased the pointer Golden Rod from Mr. Winslow, is delighted with a litter his bitch has just had by Inspiration. There were seven in all, five dogs.

## TORONTO DOG SHOW.

[*Special to Forest and Stream.*]

TORONTO, Ont., Sept. 14.—Judging has progressed fairly well so far, and most of the regular prizes have been awarded. The weather is very bad and consequently poor attendance.

PRIZE LIST.

COLLIES.—CHALLENGE—*Dogs:* 1st, Chestnut Hill Kennels' Charleroi II. *Bitches:* 1st, Chestnut Hill Kennels' Flurry II.; 2d, Seminole Kennels' Metchley Surprise.—OPEN—*Dogs:* 1st, Chestnut Hill Kennels' Christopher; 2d, Hempstead Farm's Conrad II.; 3d and 4th, McEwen & Gibson's Samson and Drury. Reserve, Burland's Moonstone. Very high com., Corley's Bute. High com., Stansfield's Scott II., Luxton's Forest Boy, Harrison's Toronto Wonder. Com., Brown's Bonnie Charlie, Ford's Metchley Bob. *Bitches:* 1st, Harrison's Nancy; 2d, McEwen & Gibson's Dudley Chris; 3d, Stansfield's Highland Floss; 4th, Smith's Anchairnie Lassie. Reserve, Seminole Kennels' Crissey. Very high com., Carley's Vignette, Rolph's Belle. High com., Manatang Kennels' Roslyn Constance.

NOVICE.—*Dogs:* 1st, Chestnut Hill's Wellesbourne Charlie; 2d, McEwen & Gibson's Samson; 3d, Tuxton's Forest Boy. Reserve, Stansfield's Scott II. Very high com., Sanders's Glendale. High com., Seminole Kennels' Squire Sheen. Com., Williams's Ben Nevis II. *Bitches:* 1st, McEwen & Gibson's Dudley Chris; 2d, Campion's Viola; 3d, Carley's Beulah. Reserve: Smith's Anchairnie Lassie. Very high com., Seminole Kennels' Crissy. High com., Manatang Kennel's Roslyn Constance. Com., Harrison's Orange Lass.—PUPPIES.—*Dogs:* 1st, Jeffrey's Lawrie; 2d, Chestnut Hill's Roslyn Charlie; 3d, Tuxton's Forest Boy. Very high com., Ford's Metchley Lad. High com., Williams's Ben Nevis. *Bitches:* 1st, Jeffrey's Stella; 2d, McEwen & Gibson's Christian; 3d, Smith's Anchairnie Lassie.

ENGLISH FOXHOUNDS.—OPEN—*Dogs:* 1st, London Hunt Club's Finder; 2d and 3d, J. Gibbs's Genius and Banwell. Very high com., London Hunt Club's Fowler and Challenge. *Bitches:* 1st and 2d, J. Gibbs's Vexation and Gaylass; 3d and very high com., London Hunt Club's Dingwell and Bustle.

AMERICAN FOXHOUNDS.—OPEN—*Dogs:* 1st and 3d, Smith & Clark's Rally and Ringwood; 2d, J. Gibbs's Birchall. *Bitches:* 1st and 3d, Smith and Clark's Maud and Fleet; 2d, J. A. Sprackl'n's Gayge. Very high com., David Parker's Jane.

HARRIERS.—OPEN—*Dogs:* 1st and 2d, Frank Mabee's Racer and Dandy; 3d, J. Gibbs's Scamp. *Bitches:* 1st and 3d, Frank Mabee's Daisy and Fly; 3d, F. Hobart's Lott.

POINTERS.—CHALLENGE—55LBS. AND OVER—*Dogs:* 1st, Leamington Kennels' Count Graphic. *Bitches:* 1st, T. G. Davey's Revelation; 2d, Mount Royal Kennels' Devon Nell.—OPEN—*Dogs:* 1st, T. G. Davey's Westminster Drake; 2d, F. W. Shaw's Molton Banner; 3d, Leamington Kennels' Count Grosvenor. Reserve, A. J. Davies's Robert Lee Graphic. *Bitches:* 1st and 2d, T. G. Davey's Josie Bracket and Ightfield Madge.

CHALLENGE—UNDER 50LBS.—*Bitches:* 1st, T. G. Davey's Lady Gay Spanker.—OPEN—*Dogs:* 1st, Chas. Connell's Rock II.; 2d, H. M. Graydon's Donovan; 3d, Leamington Kennels' Duke Graphic. *Bitches:* 1st and very high com., T. G. Davey's Miss Rumor and Bessie's Girl; 3d, Mount Royal Kennels' Frivolity. Reserve, Leamington Kennels' Fanny Graphic.—NOVICE—*Dogs:* 1st, W. S. Smith's Brighton Don; 2d, H. M. Graydon's Donovan. *Bitches:* 1st, Mount Royal Kennels' Chaira; 2d, Shirley Stewart's Graphic Frances; 3d, W. S. Smith's Axtel's Baby. Reserve, Burritt's Rex's Belle. PUPPIES—*Dogs:* No entries. *Bitches:* 1st, G. O. Smith's Lord Graphic—Juno pup.

BULL-TERRIERS.—CHALLENGE—*Dogs:* 1st, John Moorhead's Streatham Monarch. *Bitches:* 1st, F. F. Dole's Starlight.—OPEN—*Dogs:* 1st, Dr. H. S. Griffin's Principio; 2d and 3d, H. M. Howe's Count II. and Chatham Prince. Very high com., W. Smillie's Siloree and A. F. Wilgress's Ted Pritchard. High com., W. Fox's King. *Bitches:* 1st and very high com., W. J. Higginson's Lady Dinah and Nellie Harper; 2d and very high com., Dr. H. Griffin's Kathleen and Edgewood Robin; 3d, W. Hammall's Vesper Belle. High com., H. M. Howe's Loumont Kit. *Puppies:* 1st, H. M. Howe's Chatham Prince; 2d, W. Hammel's Vesper Bells; 3d, Dr. Griffin's Vixen.

FOX-TERRIERS.—CHALLENGE—*Dogs:* 1st, A. A. Macdonald's Blemton Trump. *Bitches:* No entries.—OPEN—*Dogs:* 1st, C. Rathbone's Berrywyck Punster; 2d, L. H. Banks's Blemton Rattler; 3d, E. W. Irwin's Ruxton. Reserve, Clover Hill Kennels' Tom Tom. Very high com., P. G. Keyes's Rideau Rivet; A. D. Stewart's My Fellow, Capt. Frank Reting's Stormy. High com., F. J. Esmond's Pawnbroker *Bitches:* 1st, Chas. T. Hanks's Grouse II.; 2d, A. D. Stewart's Hillside Baroness; 3d, C. F. Frenzler's Rosa Canina. Reserve, F. R. Close's Bonaily Belle. Very high com., A. D. Stewart's Suffolk Riot, E. C. Rudinger's Blemton Su Su and E. A. Irwin's Boscobel. High com., Chas. S. Hanks's Damson.—PUPPIES—*Dogs:* 1st and very high com., A. D. Stewart's My Fellow and Silver Saint; 2d, A. A. Macdonald's Calchas; 3d, Clover Hill Kennels' Trumpet. Very high com. and high com., Arden F. T. Kennels' Arden Chimes and Arden Bendor.—WIRE-HAIRED.—*Dogs:* 1st, Fred S. Worrall's Tinderbox; 2d, Sam Munro's Adswood Jim; 3d, R. Junor's Stanly. Very high com., Hempstead Farm Kennels' Suffolk Trimmer and W. Cunningham's Flash.

WHIPPETS.—1st, Thomas Boston's Model; 2d, 3d and reserve, Campbell & Blake's Maggie, Tip and Ben.

RETRIEVERS.—1st and 2d, T. G. Davey's Loyal and Beaver.

COCKER SPANIELS.—BLACK—CHALLENGE—*Dogs:* 1st, Geo. Bell's Fascination; 2d, Luckwell & Douglass's Black Dufferin. *Bitches:* 1st and 2d, Geo. Bell's Amazement and I Say—ANY OTHER COLOR—*Dogs:* 1st, Nelles's Red Jacket; 2d, Laidlaw's Red Roland. *Bitches:* 1st, Luckwell & Douglass's King Pharo's Sister; 2d, Currier's Jossie C.—OPEN—BLACK—*Dogs:* 1st and 2d, Kennedy's Jay Kay and King Rover, Jr.; 3d, Farewell's Black Brant; 4th, Raglan Kennels' Bono. Very high com., Charlesworth's Black Graf and Blake Bendigo. High com., Sweetman's Nip and L. Kennels' Fine Furs. *Bitches:* 1st, Geo. Bell's Troublesome; 2d, Laidlaw's Rideau Rein; 4th, Keyes's Rideau Flossie. Very high com., Kennedy's Molly Bawn, Sprecklin's Ina and Volo. High com., Laidlaw's I Wonder.

DACHSHUNDS.—*Dogs:* 1st, Leidel's Fritz K. *Bitches:* 1st, Manice's Jesse Victoria; 2d, Blogg's Lena.

DANDIE DINMONT TERRIERS.—*Dogs:* 1st and 2d, Amphion and King the o' Heather; 3d, Wantess's Rodger. Very high com., Brooks's Laird of the Heather. Com., Butterfield's Go You. *Bitches:* 1st, Brooks's Heather Madge; 2d, Wantess's Kirty; 3d, Butterfield's Mona.

BEDLINGTON TERRIERS.—1st, Kingdon's Jack; 2d, Baldwin's Pica; 3d, Chapman's Daily. Very high com., Ritchie's Dash. *Bitches:* 1st, Coalmer's Jenny; 2d, Mount Royal's Tibbie; 3d, Gordon's Phœbe II. Very high com., Minto's Nibs.

SCOTCH TERRIERS.—*Dogs:* 1st and 2d, Brooks's Kilroy and Kildee; equal 3d, Fraser's Lovat and Toons & Symonds's Scotch Hot. Very high com., Gibson's Jack. *Bitches:* 1st, Brooks's Culblen; 2d, Fraser's Guy; 3d, Toon & Symonds's Gypsey Gat.

SKYE TERRIERS.—*Dogs:* 1st, Shinn's Sir Stafford; 2d, Jeffrey's Toodles. *Bitches:* 1st, Smith's Islay; 2d, Caner's Edcliffe Maggie.

BLACK AND TAN TERRIERS.—CHALLENGE—*Dogs:* 1st, Rochelle Kennels' Sultan; 2d, Elmer Sir Wallace.—OPEN—*Dogs:* 1st, F. F. Dole's Salisbury; 2d, Rochelle Kennels' Merry Monarch; 3d, Brodie's The Black Earl. Com., Wright's Rochelle Scot. *Bitches:* 1st, Cloe's Lonie; 2d and 3d, Rochelle Kennels' English Lady and Topaz. Very high com., Toons & Symonds's Rosette and Farrow's Dinah. High com., Elmer's Grace and Patterson's Broomfield Florence. Com., Geddes's Mona. *Puppies:* 1st, Elmer's Lady Don; 2d, Brodie's Black Earl; 3d, Patterson's Florence.

YORKSHIRE TERRIERS.—*Bitches:* 1st, Trebilcock's Tiny Jones; 2d, Dunnigan's Fairy.

TOY TERRIERS.—*Dogs:* 1st, Mansen's Jole; 2d, Paddy Trix. *Bitches:* 1st, Mumford's Nettie; 2d, Mansen's Tiny; equal 3d, Reid's Nettie and Milling's Daisy.

PUGS—CHALLENGE.—*Dogs:* Equal 1st, Seminole Kennels' Bonsor and Cryer's Bob Ivy. *Bitches:* Howard's Casino. OPEN—*Dogs:* 1st, Hardy's Dixie; 2d, Eberhart's Patsy Bolivar; 3d, Howard's Duke Howard. Reserve, Adams's Meddler. Very high com., Howard's Penrice Boy. High com., Falconer's Peek-a-boo. Com., Bedford Kennels' Comely, Jr. *Bitches:* 1st, Howard's Avon; 2d, Hardy's Miss Penrice; 3d, Eberhart's Virginia. Very high com., Falconer's Peek-a-boo.

MISCELLANEOUS.—1st, Hay's Leprechan; 2d, Trebilcock's Jumbo; 3d, Collins's Kate. LIGHTWEIGHTS.—Mabel Richardson's Freddy; Gray's Topsy.

These are the awards made up to time of going to press. Specials will be judged to-morrow. Mr. Jarrett has purchased Mr. Brodie's crack Irish terrier Candor.

H. W. LACY.

# DOG CHAT.

### Toronto Dog Show.

The Toronto show promises to be an unusually good one this year, and Canadians must be pleased with the fact that so many of the most important American kennels are represented. Mr. E. H. Moore sends a nice team, among them his good smooth dog Melrose. Then Col. Ruppert sends up Aristocrat and several others. Joe Lewis is here with a string of seven Irish setters from the Oak Grove Kennels, and among them the new young dog, Kildare Glenmore, that is, if we mistake not, one of the coming cracks. Seminole Kennels have a big team with several good ones in it, and Dr. Sauveur and E. Connors are both here. Ben Lewis striving for the "handler with the biggest team prize," has a number of good ones in his lot, and so has George Thomas, his nearest rival for handler honors, with his terriers and greyhounds, etc. Mr. Brooks sends James Green, of Sir Bedivere fame, up with a neat team of Scottish terriers all the way from Boston. Tom Blake has a capital lot of whippets from Detroit, and then he is running every day on the Fair track. Ben, his record dog, came to an untimely end during the summer, but he still has Maggie, who is about as fast as the other was.

The Hornell-Harmony Kennels are on deck with beagles and greyhounds galore and "Uncle Dick" and "Wix" are both on hand. Mr. Huntington also does not mean to disappoint the Canadians and has sent some choice Psovois, Argoss among them. By the way, we notice Mr. Ireson, of Toronto, is out with a capital son of Lord Neverstill out of White Lips that will make some of the greyhounds hustle, or should do. Frank Dole sends brother-in-law Fenton with a big lot of terriers, etc. Fox-terriers and especially spaniels make a grand showing, and George Bell, as usual, has a hot one appropriately named Troublesome. The big dogs are well represented, St. Bernards especially. The sporting dogs, like setters and pointers, make a great showing and the Irish setters are quite a feature of the show. The gathering this year reminds one almost of New York show, so many well-known faces are to be seen and, contrary to custom, everybody seems to have come up a day earlier; consequently Sunday was hardly the day of rest it should have been and dog chat was heard on every side.

The Toronto people have a capital building for the show and it is therefore a pity that they did not use a little whitewash on the benches, which are permanent, and as they have not been cleaned since last year some of the kennels are rather unsightly. This should be attended to another year, as besides being an eyesore the health of the dogs demand that benches should either be whitewashed anew or thoroughly disinfected.

### The Dog Catcher Again.

From time to time we have drawn attention to the many outrageous actions of that body of political heelers called dog catchers in this city. We supposed New York and Brooklyn were unique in this respect, but Chicago, as usual, shows us that even in this respect she is well up with the times. Dogmen who have visited the Chicago shows have many of them put up at the Leland Hotel and will be interested to know that the late proprietor, Mr. Warren Leland, has a grievance, and a serious one, against these brutal dog "grabbers." Recently Mr. Leland purchased a well-bred mastiff, which cost him a round sum. At the beginning of the dog year he paid for a license and a muzzle, and prepared to observe the requirements of the law. One day recently his dog was playing with the children in the garden in front of his residence and Mr. Leland stood by watching the romp. The animal, although on its own ground, was without a muzzle. The dog catchers appeared. Before his owner's eyes and on his own property his mastiff was seized and thrown roughly to the ground and carried bodily by the four men to the wagon. The dog was too big to put in the box so they tied him to the back of the cart. Mr. Leland protested, but without avail. He knew the dog should have had a muzzle on, but offered to do anything to save his dog; have the dog taken to the pound and pay the fine, anything to save the dog from rough usage. But it would not do. All day the mastiff, used to tender care, was yanked about the city in the torrid heat, half walking, half dragged by the wagon. When Mr. Leland finally got him from the pound the dog was almost dead, covered with sores and his body and legs swollen. The dog died the next day. Now Mr. Leland swears vengeance, and if there is any law by which he can hold the corporation responsible he will avail himself of it, and is preparing to file a $1,500 damage suit in the Circuit Court against the city of Chicago. Of what earthly use is it to pay a license fee if it is no protection against such ruthless outrages as this? and the sooner some public-spirited citizen undertakes to defend his dog's status and rights as personal property the sooner will these rascals be taught a lesson. Probably a little of their own medicine would instil into them a just appreciation of the limits of their powers. We think that Mr. Leland will not let the matter drop, but push the case with vigor and reach a decision that will entitle him to the thanks of a wide circle of dog lovers.

### The Greyhound—Horse Race.

The much-talked-of race between one of Col. North's greyhounds and the race horse Mrs. Butterick, owned by the Duke of Portland, will probably come off about next April. It is reported that the great Fullerton will be the dog selected, but this we can scarcely credit, as Col. North owns two greyhounds that are faster than Fullerton and a bitch whose name does not occur to us at the moment. Recently we saw a letter from Col. North's trainer, Mr. Dent, in which he said that Young Fullerton is the fastest greyhound in the world. The trouble with the race will be to make the greyhound stretch himself fully in a half mile straightaway spurt without some sort of "game enticer." It has been suggested that the artificial hare running on the wire be used to encourage the greyhound to do his best; something of this kind will have to be done or the horse will win.

### St. Bernards in California.

The St. Bernard Club, recently organized in San Francisco, is bound to stimulate interest in the breed, and the Eastern club should also do all in its power to encourage its sister club. It is to the advantage of Eastern breeders that this should be done, as for some time yet the breeders on the Pacific coast, to make much headway, must look to the East for their best breeding specimens. It therefore behooves our breeders when they have a commission from California to take every possible precaution to insure the safe transit of the dog across the continent, and that it should arrive in fair condition. A journey of six days in railroad cars requires intelligent and careful crating of the dog, and the crate so arranged that though the dog cannot escape, it will be easy for messengers to take the dog out when necessary.

### Mr. Vredenburgh's Resignation.

We had little time last week to more than barely chronicle the fact of Mr. Vredenburgh's resignation as secretary of the A. K. C. We have conversed with numerous well known kennel owners and others interested in dogs, and the opinion seems to be general that the club is losing the services of a good secretary. The position is a thankless one, and especially so has it been during several years of Mr. Vredenburgh's incumbency, when the A. K. C. was passing through the chastening fire which has evolved a club that is now firmly established and of great good in many ways to dogdom. The secretary of the A. K. C. must necessarily be a man of considerable tact and with ability to bury his own individuality and prejudices and also possess some executive ability. The late secretary has not been wanting in many of these attributes. The worst that can be said against Mr. Vredenburgh is that he was hardly sufficiently in touch with dogmen as a dogman; it was business from the start, and perhaps considering the trouble of past years, this was the best way to treat the position. We do not hesitate to say that in leaving the A. K. C. office Mr. Vredenburgh takes with him the respect of the majority of dogmen, for with the possible exception of the incidents leading to the memorable libel trial the office has been well conducted. Mr. A. D. Lewis has had considerable experience with the duties of secretary, and from what we know of him should consider him the most available man for the position. He stands well with the officers of the club, and moreover, is and has been identified with dogs and dog shows for years past, and is in touch with dogmen generally, besides being a man of genial and sociable parts.

### A Remarkable Case.

NEWTONVILLE, Mass., Sept. 11.—*Editor Forest and Stream:* On Aug. 16 my black cocker bitch Midget whelped six puppies, and the day following one more, by C. G. Browning's champion Cherry Boy. That night she refused any nourishment, and, as she was in a high fever and sinking fast, I killed off five puppies, taking two into the house to be brought up by hand. Four days later she died, in spite of the best of medical aid. On the afternoon of her death Merry T., the dam of Midget, commenced whining and going about the house from one to another, and then took charge of the two puppies, and has not left them since only to take a little exercise, and is as anxious over them as if they were her own. Four days after she adopted them they refused to take any more cow's milk, and on looking for the cause found that Merry T. was giving to them a full supply of milk, and has continued to do so ever since, and they are as strong and fat as seals. The singular part of this is that Merry T. has not given milk for over a year, as Midget was one of her last litter. I have had quite a number to see grandma and her babies, and all say they never saw anything like it. Had I known what a treasure I had I could have saved all of the puppies, as she has milk in abundance.

GEO. L. V. TYLER.

### Death of Blue Ruin.

Those who saw this beautiful collie at Boston last spring will be sorry to hear that she has met an untimely death and especially so when caused by one of her own sex and kind. Kenneled with the noted bitch Bertha, that was a conspicuous figure in the collie world a few years ago, they had a misunderstanding, and Bertha tearing out the other's windpipe put an end to a collie that had made a big reputation on the other side. Mr. Pierpont Morgan owned both of these bitches at the time. Last week we mentioned the fact of Mr. Morgan's purchase of Roslyn Wilkes and Jakyr Deane, and we hear that this gentleman intends showing extensively. The Squire and Roslyn Wilkes will meet at Kingston show, we are told, under Mr. Tallman. If Mr. Morgan will take an active part in exhibiting, the collie interests are sure to receive a much needed fillip. Mr. Armstrong, an Englishman from Mr. John Brett's bailiwick, is his kennel manager.

### Fox Hunting in England.

According to the Earl of Yarborough there are 350 packs of hounds in Great Britan, the annual expenditure on which he calculates at $2,074,250. Estimating 100 men hunting with each pack, every rider having on an average three horses, there would be in all 99,000 horses engaged; and putting the cost of each at $3.75 per week, the total charge on this account would be $17,500,000. Thus the entire cost of keeping the hounds and maintaining the hunts in that country would not be less than about $20,500,000 per annum, and this is quite independent of incidental expenses. It will therefore be seen that Englishmen have to pay a pretty penny for sly reynard, and when one considers the damage done to fields and fences, the expense all round assumes immense proportions.

### The Royal Buckhounds.

For a long time past there has been an agitation carried on against the sport of tame deer hunting with dogs in England, the opponents of this method of hunting claiming that it is cruel and inhuman. The royal buckhounds have come in for their full share of disapprobation, and now the appointment of a master of the buckhounds is taken advantage of by Mr. Gladstone to agitate the question of their continuance. It is said the Queen herself is strongly opposed to the "sport," but old customs cling with lichen-like tenacity in Olde England, and it is probable that the festive cockney will enjoy the spectacle of the tame deer being driven from its cart for some time to come yet.

### New Jersey Kennel League.

AT the meeting of the executive committee of the New Jersey Kennel Club, recently held at Newark, it was decided to give sheep dog trials and whippet races in connection with the Interstate Fair at Trenton, Sept. 26 to 30. For the sheep dogs there will be a first prize of $100 and a second prize of $50. For the whippets the first prize will be $75, second $40, third $25, fourth $10 The diploma of the league will go with each award. Competition will be open to all.

Five new members were elected and a course of usefulness started upon which will keep this live and enterprising league to the front.

### Importations.

That many dogs are imported into this country of which no record is made in the kennel press is well known, and some of these, owned by people who take no interest in dog shows, are quite able to hold their own in almost any company, though never seen in "public." The twin-screw live-stock steamer Bovic of the White Star Line, arrived here Sept. 6 with a number of dogs on board. One, a Gordon setter, was consigned to Mr. J. O. Bourne, of Mt. Vernon, N. Y.; a St. Bernard dog puppy called Dunolly for Mr. C. B. Duke, Somer street, Brooklyn, N. Y., and a bitch pup of the same breed named Lady Heaton, the grandsire of both being the late Lord Bute.

### Kingston Dog Show.

The premium list of the Kingston show reaches us rather tardily, as the entries closed Sept. 12. The list is a simple one, the prizes in all classes, excepting challenge and miscellaneous being $7 and $3, with a card for third, challenge winners will receive diplomas. The judges have been already announced. As far as we can learn among the exhibitors at Toronto, some good dogs will be seen there, many of the well known kennels going on from that show and then crossing over to Rochester. We notice that there is quite a list of specials, many of them being in the coin of the realm, and collie men should be particularly pleased to see that the butchers of Kingston offer $10 for the best kennel of collies. This is a hopeful sign.

### Wire-Hair Importation.

We stated a few weeks ago that H. W. Smith, of Worcester, had placed some commissions in England for wire-haired fox-terrier bitches, but was having slow work finding satisfactory ones, as he was most particular as regards breeding and was determined to have only natural-coated terriers. He has just received from England through Mr. T. S. Bellin, of Albany, a young bitch said to be good enough to rank up with any of our best smooths, and as she is to be shown at the fall shows, fanciers have a chance of judging for themselves. She is white with brindle marked head, a common color in wire-hairs, and is sired by champion Rustic Trick, who was owned by Mr. Bellin when in England. Rustic Trick was sired by Carrick's champion Trick, who was the crack wire-hair of all England for a long time, the dam of Rustic Trick was Leigh Daisy who was by champion Filbert out of champion Grand Dutchess, both well known winners. The young bitch which Mr. Smith has named Sister Trick, is described as having the best of head, body and legs, and being so perfect in coat that she will never need to be trimmed. Daylesford Burm has not come over as yet, but is winning in England under Mr. Smith's name. He will arrive in time for the Brooklyn show.

---

That enterprising firm, Spratts Patent, is out with a new catalogue of their specialties, included in which we also find some useful hints for the prevention and cure of some of the more common ills dogflesh is heir to.

---

We always supposed that the Mount Holly Fair people were fairly up to the times, but this year they seem to have taken the old Father by the forelock. About Sept. 3 we received several cut and dried press notices, and among them there was an account of the opening of the fair and how the exhibition of dogs "pleased men and women alike." Of course the show did not open till Sept. 12, but that was immaterial. The world do move nowadays.

---

The other day we spent a few hours down at Hempstead with Mr. Motimer looking over the new dogs, but as R. K. would say, "That's another story." In the course of conversation with Angus Cameron, the trainer for Hempstead Farm Kennels, he informed us that he was going South to put the finishing touches on his Derby and All-Age entries about Oct. 4. While he has quite as many pointers as he can handle he could easily take a few setters, and fancies that he could take an Irish setter or two and run them well up in the Irish setter trials. All who know Mr. Cameron's intelligent and quiet way of handling are assured that the impetuous red dogs would be made to show all that there is in them, and the opportunity offered is a good one.

---

While down at Hempstead we called on the only "German." Mr. Hopkins has purchased a splendid place for dogs. In the middle of a square of two acres of grass land is a range of about a dozen loose boxes that were built for Mr. E. D. Morgan's horses. The boxes are large, well lighted and panelled with oil-finished wood, in fact such quarters as dogs seldom find themselves in, and should soon be well filled with boarders. Mr. Hopkins had several fox-terriers of the right sort running round, and one pup is quite promising. The place is hardly a mile from the village.

---

Talking of St. Bernard breeding with Arthur Trickett, Mr. E. H. Moore's factotum, he told us of another peculiar instance of a bitch coming in season irregularly. Before last New York show Lady Sneerwell or Lady Melrose, we forget which, came in and was bred to Lord Melrose, in one month and six days after she came in again and was bred to the dog once more, and from this mating had a nice litter. "Arthur," as he is known to the fancy, speaks most highly of one of the Alton smooths of that wonderful litter, that has come on grandly, and will be shown at New York. He says he is a better dog than his sire, take him all round. He is now sixteen months old, weighs 175lbs., and stands 33½in., with a regular Watch head. We all know of Caution's Own Daughter, the best mastiff bitch that has been bred in this country. It seems she had a litter sister with black points that had she lived would have been even better than her illustrious sister. At four months old she was bitten in the leg and blood poisoning set in, from which she died.

---

Mr. Coleridge C. Vickery, the genial assistant manager of Spratts Patent in this country, sailed for England on the Britannic yesterday. Hard work during the past summer, owing to Mr. Cleather's absence, has made him feel that a sea voyage is the only thing that can save. Mr. Vickery, we are glad to hear, has a leaning toward Newfoundlands, and if he can see what he wants may bring some good ones back with him. There is ample room for a good fancier in this breed, and with the opportunities to exhibit them Mr. Vickery would have a nice team of these noble dogs on the spring circuit of 1893, would do much to create a general interest in a breed which in England commands, and justly so, almost as much patronage as mastiffs and St. Bernards.

---

From the *Manitoba Daily Free Press* we learn that fox hunting is carried out in the good old way in this far North country near Winnipeg. Cub hunting commenced Aug. 25, and a capital run and kill was had, but we are afraid "Nimrod," who gives an account of the runs, rather "draws" on his imagination when he tells us that, "Young Cardigan, a son of Vengeance and Cheerful, got away unseen with a fox, and much to the wonder of the casual passers, who saw him pull his game down all alone and took off the brush and brought it to his master's house, who got it on his return home." The entire pack consists of 38½ couple.

---

Dr. O. Stewart Bamber will judge beagles at the coming Rochester show.

---

Mr. W. B. Palmer, of Woodstock, being unable to judge spaniels at Ottawa, Mr. Frank E. Curtis, of Simco, will officiate in his place.

---

Here is a bit of news from Rochester: "I have just been informed by reliable parties that the Flour City Kennels is offered for sale without reserve to the highest bidder before Nov. 1. All bids to be sent to W. Wade, Hulton, Pa.—O. S. BEE."

---

The Danbury (Conn.) show will be held Oct. 4 to 8. B. C. Lynes is secretary.

---

Some time since we noted the purchase of the well-known beagle Tomboy by Western parties. We now learn that he is owned by the Milwaukee Beagle Kennels, owned by Messrs. F. G. Stigebauer and Jos. Kaenfl, of Milwaukee, Wis. They intend to breed beagles extensively.

---

In the early days of St. Bernard breeding here we used to think 50lbs. a capital weight for a three-months-old pup, but this seems quite ordinary to one Mrs. Smyth, of the Swiss Mountain Kennels, tells us of. "In August this pup was weighed in ordinary condition and tipped the beam at 85lbs., height 26½in., girth of skull 18½in., nose to tip of tail 67in." This pup is Duke of Alton, by King Regent out of Nancibel.

---

Among the new advertisements to be found in our business columns this week are the following offers for sale: Poodles, M. W. Reid; setters, A. C. Shallenberger; dachshunds, E. A. Manice; pointers, A. F. Lambert; Foxhound, Box 67. The Wyoming Kennels offer their entire stock for sale without restriction. The Westminster Kennel Club offers their stock at auction with the exception of the stud dogs. The sale to take place at the American Horse Exchange.

## SHOULD JUDGES BE THEIR OWN CRITICS?

*Editor Forest and Stream:*

You ask "Should judges be their own critics?" in other words should they write for publication reports of the classes they judge?

Were such reports solely for the *American Kennel Gazette* I should immediately answer in the affirmative, for I am of the same mind as some two years ago, when I advocated that plan. But you do not set limits, consequently the solution is not so easily reached.

Assuredly your question hinges on ability. And evidently if the kennel press is competent the work of judges can properly end at the ring sides; but if the press is incompetent, manifestly the judges should report. It does not of course follow that even then the purpose of criticism would be attained, for the judges might be as wanting as the critics, yet were the former incompetent they must soon betray the fact, and thereby their poor work as officials would be defeated, while if competent their reports would be ample testimony.

Narrowing the question to circumstances which appear to exist to-day and accepting the popular belief that all judges are not thoroughly competent, also that the purpose of criticism is to protect fanciers and possibly educate them, it would seem best that reports came only from capable, fearless critics, whose work is stamped with unmistakable evidences of honesty, great experience and unflinching determination to cut deeply, like the surgeon, when it is their duty to do so. And such critics must be the surest possible foils to incompetent judges, who without them would undoubtedly let many poor dogs to the front. Their reports must also as a rule sustain judges when competent, for good judges' awards are reached by the same means as an honest and intelligent critic's reports. Moreover, with reports and awards alike meritorious, the public could easily see from the latter how the former were reached.

There certainly should be a near approach to unanimity in this matter, for if judges and critics are at variance—members of each class failing to agree among themselves—reports must be often conflicting; and such unquestionably do very great harm by befogging exhibitors, degrading judges and press alike, and strengthening the popular prejudice that judging is only guesswork and awards are frequently biased. Such reports must also inevitably lessen the interests in dog shows and obstruct advancement of the different breeds to higher standards.

In a word, it would seem that if judges and critics are not all competent, both classes should report; that if the former alone are competent, they should bear the duty, while if the critics are competent, that it should be left solely to them.

J. FRANK PERRY.

## JUDGING BY SCORING.

*Editor Forest and Stream:*

The discussion in FOREST AND STREAM regarding judging, judges' reports, critics' reports, etc., will do good if conducted in the right spirit—*i. e.*, in a kindly temper and on the supposition that finalities and perfection have not yet been reached. It is very easy to write in the style of "After us the deluge;" but it does not advance us, but the contrary. Emerson remarks upon the foolishness of the proud man. No one suffers so much as himself, for he fails to realize his need of knowledge.

I agree with O. W. Holmes, the great American *litterateur*, when he says, "Give me your opinions, I do not want your arguments," or to this effect, as applied to the ordinary affairs of life. And I value the opinions of any man who has learned direct from nature, even if he cannot back them up with reasons; hence I should be inclined to set great value upon the mere opinion of such a Nestor in dogdom as our genial and original "Uncle Dick." But surely the same opinions, or any man's opinions on matters like those now under discussion, are of vastly greater value if accompanied by sound reasons. Man is essentially a rational animal; and while hero worship may have its uses, it certainly has retarded the progress of the world. Ours, above all other ages, is one that demands the reason why; and never before has such progress been made in getting rid of prejudices and throwing aside the *debris* of the past. Unless I greatly mistake the signs of the times in dogdom, there is an undue conservatism and a tendency to follow a few rather blindly. It is very well for able people to have followers, provided they leave them capable of advancing when they themselves are gone, which can only be when their views rest not on tradition or opinion but on reason.

Like Mr. Waters, "Uncle Dick" and others, I shall be rather busy in various ways in connection with the coming shows, and it will not be possible to enter upon the subject as it deserves now; but I propose, with the permission of the impartial editor of this journal, to do so later, when all will be better prepared to consider the subject carefully. I should do so, if only to meet the wishes of so philosophical and temperate a writer as Mr. Waters, whose work on training alone will long remain as one of the best written books that has ever appeared on the dog. And if the experienced "Uncle Dick" will in a few weeks that "tale unfold," I hope to be able to meet the difficulties he finds, or at least to show that scoring need not be "nonsense."

WESLEY MILLS, M.D.

MONTREAL, Can.

## MOUNT HOLLY DOG SHOW.

THE Burlington County Agricultural Society holds its forty-sixth annual fair at Mt. Holly this week, and for the first time a bench show for dogs has been attempted. There is everywhere a love for the dog, and the agricultural element yields to none in appreciation, because in the country there is less to divert and attract, the dog has become a part of the life at the homestead and on the farm. The owners of valuable dogs responded in a manner which was beyond the society's expectations, and though the Canadian circuit is running its course, the Mt. Holly show is a credit to any section in excellence as well as numbers.

The New York St. Bernard Kennel has Kingston Regent, Republican Belle, Refuge II. and Lady Bountiful. Mr. Fred Schmidt has Otis, Mr. E. H. Radel Wieland, and Mr. D. Foster, Leicester, making up a splendid exhibit with a number of other good specimens of the St. Bernard from far and near. Great Danes are represented by some new light of much merit. In the sporting division Lad of Kent meets Inspiration, making a contest which would insure the interest of all pointer men. Breeze Gladstone and Benzine in English setters, Larry S. and Molly's Best in Irish; and Heather York, Rexmont, Flomont and Salmont, with no less than five from the Mont Kennel of Gordon setters make them a feature of the show.

In the other sections the classes have dogs of repute, making a collection rarely seen at any but a show of the first rank, and speaking well for a United States fall circuit in the future.

Mount Holly claims Sept. 11 to 15 in 1893, before this year's success is recorded, which looks as though New Jersey intended to be "in it" if it is "out of the world."

EDWIN H. MORRIS.

At the Canadian Kennel Club meeting yesterday Dr. Wesley Mills was almost unanimously elected president.

## ANSWERS TO CORRESPONDENTS.

*There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.*

F. N., Smithtown.—Continue as you are doing. Bathe the eye with warm water two or three times a day.

H. M., New York City.—We do not know his address, but a letter to 29 So. Fifth avenue will probably reach him.

J. K., Milwaukee, Wis.—Use one of the mange remedies given in late issues. It is not likely to affect the pups. Give a small dose of castor oil a few days before whelping to keep the bowels open.

G. C. W., Augusta, Ga.—The dogs are probably pure bred as the shade of lemon is perhaps a dark one, though from the meagre description we cannot give a definte answer. I should like to hear from you on the other matter you speak of.

P. W., Northfield, Minn.—The dates are not yet chosen; watch the kennel fixtures column, it will be sometime in the middle of October. All the books on the greyhound treat fully on the subject, you can find a list in the paper sent you. The reports of the meeting will appear about the end of October.

W. H., St. Louis, Mo.—First syringe out the sheath with warm water. Then use the following lotion twice a day, taking care to hold it in the sheath for a minute or two:

| | |
|---|---|
| Zinci sulph | grs. vi. |
| Plunti acet | grs iii. |
| Water | ℥ vi. |

Mix.

R. E. E., Edwardsville, Ala.—What is meant by challenge class in dog shows? Also novice and open classes? Ans. The challenge class is for dogs that have won four first prizes in open classes under American Kennel Club rules, and a dog earns the title of champion when it has won three first prizes in the challenge classes under the same rules, and one of which wins must be at a show that has 500 entries. Novice classes are for dogs that have never won a prize in an open class in this country, Canada or England. Open classes are the regular classes in which any dog may be entered that is not eligible to the challenge classes, and for which no challenge classes have been provided in the premium list.

# Canoeing.

## FIXTURES.

OCTOBER.

1. Springfield, Cup, Springfield.

THE Passaic canoe clubs, the Arlington, Ianthe and Orange, held their annual union regattas on Sept. 3-5, the races going off very successfully, and a number of canoeists from the division being present.

THE poem which we publish this week, the work of Miss Pauline Johnson, of Toronto, has become a general favorite at every meeting and camp-fire this year, a fact due not only to its high merit, but to the manner in which it is rendered by Com. Winne, who has made it known to canoeing.

### THE SONG MY PADDLE SINGS.

WEST wind, blow from your prairie nest;
Blow from the mountains, blow from the west.
The sail is idle, the sailor too;
Oh! wind of the west, we wait for you.
Blow, blow!
I have wooed you so,
But never a favor you bestow.
You rock your cradle the hills between,
But scorn to notice my white lateen.

I stow the sail and unship the mast;
I wooed thee long, but my wooing's past:
My paddle will lull you into rest.
O! drowsy wind of the drowsy west,
Sleep, sleep!
By your mountain steep.
Or down where the prairie grasses sweep,
Now fold in slumber your laggard wings,
For soft is the song my paddle sings.

August is laughing across the sky,
Laughing while paddle, canoe and I
Drift, drift,
Where the shores uplift
On either side of the current swift.

The river rolls in its rocky bed,
My paddle is playing its way ahead,
Dip, dip,
When the waters flip
In foam as over their breast we slip.

And O, the river runs swifter now;
The eddies circle about my bow.
Swirl, swirl!
How the ripples curl
In many a dangerous pool awhirl.

And far before me the rapids roar,
Fretting their margin for evermore.
Dash, dash,
With a mighty crash
They seethe, and tumble, and bound, and splash.

Be strong, O paddle! be brave, canoe!
The reckless waves you must bear me through.
Reel, reel,
On your trembling keel,
But never a fear my craft will feel.

We've raced the rapid, we're far ahead;
The river slips through its silent bed.
Sway, sway,
As the bubbles spray
And fall in tinkling tunes away.

And up on the hills against the sky,
A fir tree rocking its lullaby
Swings, swings,
Its emerald wings,
Swelling the song that my paddle sings.

E. PAULINE JOHNSON.

## CANOE NEWS NOTES.

THE Bulwagga C. C., of Port Henry, N. Y., is one of the youngest clubs represented in the A. C. A., but at the same time one of the most vigorous and enthusiastic. Ex-Secy.-Treas. Neide is one of the founders and a charter member. The club had this year the largest encampment of the meet, and with it a fine fleet of canoes, all of the latest Rushton model. Though novices at canoe racing, the Bulwaggas entered a number of races, carrying off first in the novice race and the Jabberwock trophy. The first and second places in each of these races were won by Rushton canoes.

### Eastern Division Meet, Sept. 3-5.

THE meet of the Eastern Division of the American Canoe Association was held last week at Peddock's Island, in Boston Harbor, tents being pitched on Friday and the races taking place on Labor Day. The Puritan C. C., under Vice-Com. Cartright, took charge, being the first in camp. The club presented a silver tankard as a prize for a visitors' race. The old America was anchored off the island with Gen. Butler aboard, among his guests being Com. Winne and Messrs. Goddard, Gray and Farrington. Saturday and Sunday were spent quietly in camp.

Monday was a fine day with a good sailing breeze. The course was a 2½ mile triangle, and the naphtha launch of the America was used by the regatta committee. The first race was the unlimited sailing, the starters being: Wasp, Paul Butler, Vesper; V, Howard Gray, Vesper; Bee, D. S. Goddard, Vesper; Imp, J. W. Cartright, Puritan; Elida, E. S. Gilmore, Puritan; Oriole, John Lannon, Puritan; Ogre, A. B. Lyons, Octopus; Twig, S. M. Wales, Octopus.

V led at the line but was soon passed by Wasp, the latter gaining steadily and winning very easily, with V second and Bee third.

The starters in the tandem paddling, single blades, were F. J. Burrage and L. S. Drake, Newton B. C.; J. W. Cartwright, Jr., and Chas. F. Dodge, Puritan; N. Silsbee and C. M. Morrison, Puritan; A. B. Lyons and V. B. Johnson, Octopus C. C. The finish was in the above order, Burrage and Drake winning.

The starters in the visitors' race were Paul Butler, D. S. Goddard, Howard Gray, A. B. Lyons, V. B. Johnson, E. J. Johnson and S. M. Wales. The wind fell for a time after the first round, coming in again very light from S.W. The race was a drift, V winning after 1h. 32m.

After dinner came the decked paddling race, won by C. F. Dodge, of the Puritan C. C., with Lannon second, four starters.

The combined race had but three starters, Gray, V. B. Johnson, Atherton, Lannon and Ball. Gray won with Lannon second.

The sailing upset had four starters, won by Butler with Goddard second and Cartright third. After some canoe gymnastics came the hurry-scurry, won by Lannon, who also won the swimming race, which ended the day. Handsome silver cups were given as prizes. Messrs. Appolonio, Richards and Gilmore were the regatta committee.

Com. Winne expressed himself as well pleased with the location for a general A. C. A. meet in the future, there being a fine camping ground with good drinking water and clear sailing courses, while the spot is easily reached from Boston and yet sufficiently isolated to secure all desirable privacy. The meet, which about ends the racing in Eastern waters, was a success in every way.

### Holyoke C. C.

THE third annual regatta was held off Sans Souci club house on Labor Day, Sept. 5. The races were as follows:

1. Sailing race, 1½ miles, Holyoke C. C.; prize, challenge trophy cup, 4 entries, won by W. A. Ladd.
2. Standing paddling, 200yds., prize, cup, 5 entries, won by F. H. Metcalf.
3. Tandem paddling, ½ mile, Holyoke C. C., prize, two pair paddles, 5 entries, won by W. C. Brown and F. H. Metcalf.
4. Upset race, prize, flag, 4 entries, won by Howard Metcalf.
5. Single paddling, ½ mile, prize, cup, 2 entries, won by F. H. Metcalf.
6. Sailing race, novice, 1 mile, prize, cup, 4 entries, won by Howard Metcalf.
7. Hurry-scurry, prize, bugle, 3 entries, won by Howard Metcalf.
8. Sailing race, 1½ miles, prize cup, 5 entries, won by C. F. Shuster.
9. Hand paddling race, 100yds., prize cup, 5 entries, won by F. H. Metcalf.
10. Single paddling, novice, ½ mile (canoes to weigh 75lbs. or over), prize, pair paddles, 11 entries, won by J. F. Chase.
11. Tandem paddling, ½ mile, prize pair cups, 5 entries, won by Will and Lew Lamb, of Redcliff C. C.

Regatta committee—F. A. Smith, T. J. Morrow, W. C. Brown. Judges—J. Metcalf, Wm. Reid, E. B. Towne. Starters—W. M. Raynolds, John H. Cook, J. L. Wyckoff, H. L. Russell.

### A. C. A. Membership.

THE following gentlemen have applied for membership in the A. C. A.: Eastern Division: J. F. Lannon, R. W. Davenport, C. W. Morrison, R. Wilkinson, M. J. Atherton, A. C. Brewena, Boston; F. H. Bent, Taunton; F. Manchester, Lebanon, N. H.; A. H. Morton, Lowell, Mass; R. P. Lewis, Waterbury, Conn.; S. Johnson, 2d, Salem.

# Yachting.

## FIXTURES.

SEPTEMBER.

17. Beverly, Monument Beach.
18. Miramichi, Triang, Newcastle.
24. Chelsea.
24. Buffalo, 3d Pennant.
24. Commonwealth, Cham., Dorchester Bay.

OCTOBER.

1. Corinthian, Atlantic City.
15. Buffalo, Closing Cruise.
9. Jersey City, Ladies' Day, New York Bay.

THE report of a probable renewal of international racing through the participation of the German Emperor and Lord Dunraven marks the opening of the dull season in yachting, and as soon as the cholera scare is over and this great country has been "saved" for another four years by the victory of one or the other party in November, the epidemic of newspapers challenges will break out anew. It is not impossible that the German Emperor might do something so foolish as to challenge again with Thistle, but the whole wording of the despatch in question indicates that it is, in newspaper parlance, a "fake" by some one entirely ignorant in yachting.

THE Larchmont Y. C. has made quite a brilliant ending of its racing season with a good club regatta on Saturday and its special schooner race on Tuesday. So little confusion and trouble has attended the adoption and practical carrying out of the sailing length classification by the Larchmont Y. C. that yachtsmen hardly realize the difference between this and the old classification still used by the other clubs. The classification has been used through three seasons without any of the dire evils predicted as certain to follow it and the races have filled even better than in other large clubs.

THE special schooner cup given this year is a move in the right direction, as schooner racing, now on the mend after several very dull seasons, is a branch of the sport that is worthy of every encouragements.

### Minnetonka Y. C. Aug. 27.

LAKE MINNETONKA, MINN.

A VERY good race was sailed on Lake Minnetonka on Aug. 27, in a strong and steady south wind, the times being:

FIRST CLASS—SLOOPS.

| | Elapsed. | Corrected. |
|---|---|---|
| Volante | 1 52 16 | 1 48 22 |
| Advertiser | 1 56 08 | 1 48 37 |

| Kid | 2 10 06 | 1 58 43 |

## American Model Y. C., DeWolf Cup, Sept. 5.

PROSPECT PARK—BROOKLYN, L. I.

A LITTLE more west in the wind would have suited the model yachtsmen in their race for the above cup, it being a little too much to the south to give a good steady wind down the lake. But the wind was pretty strong, and by a little nursing to catch the slants the sailors managed to get the yachts across the finish line in quick time. Mr. DeWolfe was not able to be present, but the club was honored by the presence of Com. Biddle and Mr. Mitchell, of the Philadelphia M. Y. C.

The intention was to start the first class first; but one of the owners was unable to get to the lake early enough, so, rather than not sacrifice starters, it was concluded to leave it to the last; also an owner of a third class yacht was delayed, so second class was started, it being filled.

The discrepancies in the corrected times are caused by a fine of 5s. for every time an owner touches his yacht to trim or put about. The idea of imposing this fine is that it prevents nursing and pushing of yachts. There is a difference of opinion as to the fairness of this tax, especially where the wind comes in streaks, as it does on the present course.

The second class was called at 10 A. M., three yachts coming to the line—Comet, Mary S. and Etta; Comet winning from Mary S. by 32s, elapsed time and $48\frac{3}{10}$s. corrected. Second heat won by Mary S from Comet by 16s, elapsed and $9\frac{2}{10}$s. corrected. Third heat by Mary S. from Comet by 16s. elapsed and $19\frac{1}{10}$s. corrected. Mary S. therefore qualifying for the final.

Third Class—First heat was very close, the fin boat Mischief winning from Electra by $25\frac{1}{2}$s. corrected time. Second heat by Mischief by 2m. $23\frac{1}{2}$s. corrected.

The first class race was devoid of interest, three yachts starting, Ohyiesa winning both heats easily.

After the regatta committee and yachtsmen had lunched the final race was called, Ohyiesa getting over the line first, Mischief and Mary S following in the order named. Mary S. was in irons shortly after getting over, after getting straightened out she overhauled the others very rapidly, winning from Mischief, whom she had to allow $47\frac{1}{10}$s., by 44s. elapsed, $11\frac{7}{10}$s. corrected. In the second heat Ohyiesa did some fine work under lower sails, she having had her topmast carried away by an expert oarsman in a hired rowboat belonging to the Park. The start was postponed 10 minutes to allow repairs; the win ning this heat from Mary S. (who was unlucky enough to find all the funny winds) by 1m. 59s. elapsed, 2m. $47\frac{1}{10}$s. The corrected third and final heat was a little closer race, Ohyiesa winning from Mary S. by 1m. 20s. elapsed. $54\frac{1}{10}$s. corrected. Ohyiesa was the winner of the cup, which was presented to her owner with due ceremony. Distance sailed, $\frac{3}{10}$ mile.

FIRST CLASS—FIRST HEAT—48 TO 53FT. L.W.L.

| | Allowance. | Start. | Finish. | Elapsed. | Corr'd. |
|---|---|---|---|---|---|
| Ohyiesa, C. Van Ness | | 1 47 31 | 1 57 37 | 10 06 | 11 06 |
| Hornet, J. C. Meyer | $6\frac{2}{10}$ | 1 47 43 | 1 59 20 | 11 37 | 12 $30\frac{7}{10}$ |

## Corinthian Y. C. Sept. 5.

MARBLEHEAD, MASS.—MASSACHUSETTS BAY.

THE Labor Day sports of the Corinthian Y. C. included an open race in the morning and a sail for the ladies in the afternoon, with a concert and illumination in the evening. The wind in the morning was light N.W. The times of the race were:

FIRST CLASS.

| | Elapsed. | Corrected. |
|---|---|---|
| Hawk | 3 27 41 | 3 27 41 |
| Fancy | 3 39 13 | 3 38 44 |
| SECOND CLASS. | | |
| Susie | 4 05 14 | 4 03 09 |
| White Fawn | 3 56 01 | 3 55 01 |
| Ustane | 4 07 43 | 4 04 14 |
| THIRD CLASS. | | |
| Exile | 3 46 50 | 3 46 50 |
| Reaper | 3 50 51 | 3 47 53 |
| Freak | 3 48 58 | 3 48 14 |
| FOURTH CLASS. | | |
| Typhoon | 1 45 43 | 1 43 45 |
| Tom Cat | 2 09 01 | 2 07 53 |
| CRUISERS—CLASS A. | | |
| Orinda | 2 09 05 | 1 59 05 |
| Countess | 1 44 12 | 1 38 25 |
| Alcyone | 2 37 12 | 2 20 12 |
| Vandal | 3 54 08 | 3 30 08 |
| Clytie | 2 16 37 | 2 16 37 |
| Gypsy | 2 37 00 | 2 13 00 |
| CRUISERS—CLASS B. | | |
| Mosca | 2 30 46 | 2 17 46 |
| Josephine | 2 46 00 | 2 27 00 |
| Oimara | 2 48 33 | 2 22 33 |
| Nancy | 2 48 08 | 2 30 04 |
| Bob | 2 43 34 | 2 28 34 |
| Jane | 2 43 41 | 2 25 41 |

The rest of the programme was carried out very successfully.

## Beverly Y. C., Sept. 3-5.

MONUMENT BEACH—BUZZARD'S BAY.

THE 191st race, fourth sweepstake, was sailed at Monument Beach in a light S. W. by W. breeze. Mist won easily in second class. In third class Doris easily took the lead and held it though rather closely pressed by Sippican; Fin needed more wind and was third boat; Tycoon withdrew at Abiels Ledge, where she was about three minutes behind Sippican. In fourth class Petite beat Kitten, but Squall, who did not enter, sailed the course and easily beat both. Course, for second class $10\frac{1}{4}$, for third and fourth classes $8\frac{1}{4}$ miles. Judges, F. Elliott Cabot, W. Lloyd Jeffries. Summary:

SECOND CLASS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Mist, G. H. Lyman, B. Y. C | 27.04 | 2 37 18 | 1 27 34 |
| Gymnote, W. E. C. Eustis, B. Y. C | 27.04 | 2 42 56 | 1 33 12 |
| Success, J. F. Perry, Mon. Beach | 24.07 | 2 46 08 | 1 33 28 |
| Widgeon, M. Williams, Jr. B. Y. C | 26.10 | 2 47 23 | 1 37 08 |
| Lestris, T. Crane, Jr., B. Y. C | 26.04 | 2 47 27 | 1 36 41 |
| THIRD CLASS. | | | |
| Doris, J. Parkinson, B. Y. C | 24.02 | 2 15 59 | 2 04 25 |
| Sippican, W. H. Davis, B. Y. C | 23.03 | 2 16 23 | 2 04 54 |
| Elna, J. Parkinson, B. Y. C | 22.10 | 2 19 00 | 2 07 06 |
| Vivian, N. Hocking, Jr., Onset | 23.01 | 2 20 32 | 2 08 53 |
| Phenomenon, D. L. Whittemore, B. Y. C | 23.00 | 2 22 03 | 2 10 19 |
| Daisy, H. Stockton, B. Y. C | 21.01 | 2 23 57 | 2 09 05 |
| Fin, L. M Stockton, B. Y. C | 17.02 | 2 24 36 | 2 05 44 |
| Tycoon, J. L. Stackpole, Jr., B. Y. C | 23.01 | Withdrew. | |
| FOURTH CLASS. | | | |
| Edith, G. G. Van Rensselaer, B. Y. C | 19.04 | 2 35 22 | 2 19 29 |
| Kitten, Toby Club, B. Y. C | 20.00 | 2 39 04 | 2 24 05 |

Mist, Doris and Edith take firsts; Gymnote and Sippican seconds, Success and Elna thirds.

The 192d race, open regatta, was sailed at Monument Beach on Sept. 5. The 4th was rainy and disagreeable, and the 5th opened with a pouring rain and a northeast blow, which prevented several boats from a distance from arriving in time. Before the start the wind shifted to northwest and lightened, so that all the boats started with whole sail.

After they had been off three-quarters of an hour or more the wind shifted to southwest and increased to a reefing breeze, making it lively for the boats, most of whom hung on to whole sail.

The larger classes had a free wind race. Widgeon sprung her mast and withdrew; Violet broke her gaff short off but kept on over the course. Phenomenon crossed line with throat halliards gone and Kitten lost gaff and throat halliards just before crossing, while Algol went over line with the boom loose from mast on one side, the gaff loose on the other and sail nearly off the spars; she was rigged with patent railways and they went all round. Sippican found wind too heavy and coming home last refused to cross the line.

Before the change of wind Tycoon, Doris, Daisy and Phenomenon tacked to the south'ard and had a free sheet to Dy Ledge after the change. Elna, Sippican, Vivian and Algol went to the westward and had a dead beat. On the free reach from Scraggy Neck to Wings Cove Buoy, $2\frac{3}{4}$ nautical miles, the little Fin showed wonderful speed, making it in 17m. 15s., a rate of 9 knots, pretty good for a 17ft. waterline boat.

She is Herreshoff's latest fin and goes well in a breeze, though she has not sail enough for a light air.

Course for sloops, first and second classes, $11\frac{1}{4}$ miles; third and fourth classes, $7\frac{1}{2}$ miles. The judges were N. H. Emmons and W. Lloyd Jeffries. Summary:

SLOOP CLASS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Chapoquoit, C. H. Jones, B. Y. C | 33.11 | 1 29 55 | 1 25 26 |

| Vivian, N. Hucking, Jr, Onset | 23.01 | 1 33 54 | 1 23 19 |
| Elna, J. Parkinson, B. Y. C | 22 10 | 1 43 41 | 1 31 50 |
| Algol, J. R. Bullard, Jr, S. Y. C | 23.04 | 1 46 07 | 1 33 45 |
| Sippican, W. H. Davis, B. Y. C | 23.03 | Disabled. | |
| Daisy, H. Stockton, B. Y. C | 21.01 | Withdrew. | |
| FOURTH CLASS. | | | |
| Kitten, Toby Club, B. Y. C | 20.00 | 1 42 25 | 1 28 44 |
| Edith, G. G. Van Rensselaer, B. Y. C. | 19.04 | 1 46 45 | 1 32 19 |
| Cat, B. Clark, B. Y. C | 19.03 | 1 50 37 | 1 36 05 |
| Squall, J. G. Palfrey, B. Y. C | 19.11 | Withdrew. | |

Fin, Flight, Gymnote, Tycoon and Kitten firsts; Surprise and Doris seconds; Phenomenon and Success thirds. Elna protests Algol for fouling.

## Lynn Y. C., Open Regatta, Sept. 5.

LYNN, MASS.—NAHANT, MASSCHUSETTS BAY.

THE Lynn Y. C. held a very successful regatta on Labor Day, conditions being as follows:

Classes.—First, 26ft. and over 21ft. keels; first class, 26ft. and over 21ft., centerboards; second class, 21ft. and over 17ft., jib and mainsail, sloop and fin keel; third class, 21ft. and over 17ft., keels not fin; fourth class, 21ft. and over 17ft., catboats; fifth class, all boats under 17ft. Yachts must sail in the class to which they belong.

Prizes.—First class, keels, $20, $10, $5; first class, centerboards, $20, $10, $5; second class, jib and mainsail, sloop and fin keel, $15, $10, $5; third class, keels not fin, $15, $10, $5; fourth class, catboats, $15 10, $5; fifth class, all boats, $12, $8, $6.

Courses.—First class: From starting point whistling buoy off the Graves, leaving it on the starboard; to Winthrop spar buoy, leaving it on the starboard; to flag boat off Grover's Cliff, leaving it on the starboard; to and across the line between the judges' boat and flag boat. Distance, 10 miles.

Second, third and fourth classes: From starting point to Flip Rock Buoy, leaving it on the starboard; to flag boat off Grover's Cliff, leaving it on the starboard; to buoy off Lobster Rocks, leaving it on the starboard; leaving Fish Weir on port; to and across line between judges' boat and flag boat, and repeat. Distance, 9 miles.

Fifth class: From starting point to Flip Rock Buoy, leaving it on the starboard; to flag boat off Grover's Cliff, leaving it on the starboard; leaving Fish Weir on port; to and across line between judges' boat and flag boat. Distance, $4\frac{1}{2}$ miles.

The wind was light N.W. The times were:

FIRST CLASS CENTERBOARDS.

| Madcap, C. A. Elwell | 2 08 23 | 1 33 23 |
| Marchioness, Perry Hodges | 2 10 44 | 1 35 44 |
| Vona, J. W. Norwood | 2 12 38 | 1 37 38 |
| Dot, H. F. Douglass | 2 13 54 | 1 38 54 |
| Wild Cat, Charles Alley | 2 14 45 | 1 39 45 |
| Mab, John Shaw | 2 16 33 | 1 41 33 |
| Florrie, W. L. Leighton | 2 19 21 | 1 44 21 |
| Sunbeam, H. B. Faxon | 2 20 15 | 1 45 15 |
| Isabell, Davis & Batchelder | 2 20 55 | 1 46 55 |
| 45, E. W. W. Randall | 2 37 20 | 2 02 30 |
| Cuckoo, A. Larabee | Withdrew. | |

The judges were W. A. Estes, C. H. Crowell, G. F. Putnam, W. H. Hooper, F. E. Newhall.

No corrected times were calculated, but the first prizes go in the order of the elapsed times.

Madcap protested Marchioness for fouling the stakeboat at start, and for not rounding Lobster Rock Buoy.

## New York Y. C.

THE following general order has been issued by Fleet Captain Stephen Peabody:

FLAGSHIP ELECTRA, N. Y. Y. C., Harbor of New York, Sept. 7, 1892

General Order No. 7:

I. "The New York Columbian Celebration Committee of one hundred" having chosen Mr. S. Nicholson Kane to direct the naval parade on October 12, and so notified the club, all yachts belonging to this club who desire to take part therein will communicate directly with Mr. Kane at the office of the committee, 280 Broadway, room 115, for information concerning the same.

II. Through the courtesy of its owner, Mr. John H. Starin, the new steamboat William C. Egerton has been secured for the use of the club on the above date to view the parade, etc., and will be under the direction of the house committee. Members desiring to avail themselves of the opportunity will apply for tickets without delay to the committee at the club house. Further particulars will be furnished by that committee.

III. All yachts in commission belonging to the club, in the harbor of New York on October 11 will dress ship at colors and haul down at sunset that day.

By order of the Commodore, STEPHEN PEABODY, Fleet Captain.

## Seawanhaka Corinthian Y. C.

OYSTER BAY—LONG ISLAND.

A VERY interesting handicap race was sailed at Oyster Bay on Sept. 5, a great variety of models being represented in the list of starters. Besides the older open boats Mirth, Meteor, Indolent, Nadjy (nee Brooklyn) and Dodo, there were the 25 footers Nameless and Pyxie, with the other Gardner boats Helcia and Ola, and the new Gardner fin-keel Nemadji, recently launched. Although much smaller than such speedy open boats as Mirth and Meteor, Pyxie was given the scratch, allowing Mirth 2m., Nameless 3m., Indolent 4m., Meteor 7m., Dodo 8m. and Nadjy 8m.; Ola 11m., Vanda 21m., Martha 21m. The course was, starting from south to north on a line between Moses Point buoy and committee-boat, thence to Coldspring Light, keeping it on port hand; thence to Center Island buoy, keeping it on starboard; thence to Lloyd's Point buoy, keeping it on starboard; thence to Coldspring Light, keeping it on starboard; thence to finish, passing from north to south of line, keeping northward of black buoy at mouth of harbor going and coming.

The wind was fresh S.W. Mirth was first and Pyxie second, the latter saving her time on all but Mirth. The times were, one gun start, 11 45:

| | Finish. | Elapsed. | Corrected. |
|---|---|---|---|
| Mirth | 2 12 25 | 2 27 25 | 2 25 25 |
| Nameless | 2 24 15 | 2 39 15 | 2 36 15 |
| Indolent | 2 26 34 | 2 51 34 | 2 47 34 |
| Skrealling | 2 49 05 | 3 04 05 | 2 41 05 |
| Nadjy | 2 44 15 | 2 59 15 | 2 51 15 |
| Pyxie | 2 19 03 | 2 34 03 | 3 34 03 |
| Ola | 2 48 50 | 3 03 50 | 2 52 50 |
| Helcia | 2 31 35 | 2 46 35 | 2 44 35 |
| Dodo | 2 32 45 | 2 47 45 | 2 39 45 |
| Martha | Did not finish. | | |
| Vanda | 2 52 40 | 3 07 40 | 2 46 40 |
| Meteor | 2 41 05 | 2 56 05 | 2 49 05 |
| Pilgrim | Did not finish. | | |
| Nemadji | 2 38 42 | 2 53 42 | 2 51 42 |

The Rouse and Wetmore race was set for Sept. 10, but as the Larchmont Y. C. sailed its fall regatta on that day, the race was postponed to Sept. 24, when a start will be made at 11 A. M. off the Bell Buoy.

On Sept. 16 the annual dinner of the club will be held at the Oyster Bay club house, and a large attendance is looked for. On the following day a race will be sailed for three prizes offered by Messrs. T. S. Young, Jr., A. P. Montant and Rear Com. J. W. Beekman, for a handicap race for yachts of the S. C. Y. C. of 42ft. waterline and under, to start as near 11 A. M. as practicable. The course will be: Starting from west to east of an imaginary line between Moses Point and stakeboat, thence to Cold Spring Light, keeping it on port hand; thence to stakeboat off Moses Point, keeping it on port hand; thence to Cold Spring Light, keeping it on port hand; thence to stakeboat off Moses Point, keeping it on port hand; keeping to the north of Black Buoy at mouth of harbor. The start will be made from the gun, with a five-minute preparatory signal. The city club house will reopen for the winter on Oct. 1.

## Hull Y. C., Sept. 10.

HULL, MASS.—BOSTON HARBOR.

THE final championship race of the Hull Y. C. on Saturday, postponed from Aug. 27, was sailed in a moderate S.E. wind, the times being:

THIRD CLASS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Beatrice, John Cavanagh | | 2 11 10 | . . . |
| Ustane, S. N. Small | 27.03 | 2 20 00 | 1 53 14 |
| White Fawn, E. E. Jones | 30.11 | 2 18 25 | 1 54 26 |
| Posy, R. G. Hunt | 30.07 | 2 25 17 | 2 01 14 |
| Susie, W. W. Keith | | 2 28 45 | . . . |
| FOURTH CLASS. | | | |
| Thrush, A. McVey | | 1 45 29 | . . . |
| SPECIAL CLASS. | | | |
| Vanesa, A. Bigelow, Jr | 24.03 | 1 47 12 | 1 24 12 |
| R. D., James McIntyre | | 1 53 52 | . . . |
| FIFTH CLASS. | | | |
| Typhoon, J. I. Taylor | 23.09 | 1 47 14 | 1 23 48 |
| Koorali, R. C. Robbins | 28.00 | 1 51 53 | 1 27 59 |
| Magpie, H. G. Otis | 32.04 | 1 53 38 | 1 28 59 |
| Opechee, W. Barker | 22.03 | 1 54 30 | 1 29 42 |
| SIXTH CLASS. | | | |
| Primrose, H. M. Faxon | 17.11 | 1 36 50 | 1 10 48 |
| Don, W. H. Shaw | 20.03 | 1 40 15 | 1 17 25 |

The new catboat Typhoon, sailed by her designer, Mr. Stewart, sailed a fine race and won easily in her class, making another race necessary, which will take place next Saturday.

The championship winners in the other classes are: Second class, Handsel; third class, Beatrice; fourth class, Alpha; special class, Vanessa; sixth class, Mab.

The judges were Messrs. Franklin Adams and Norman F. Greeley.

## South Boston Mosquito Fleet, Sept. 5.

THE Mosquito boats of South Boston sailed a race on Labor Day, but in such a light N W. wind as to make it very unsatisfactory. The times were:

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Escort, W. H. Ransom | 14.11 | 1 24 58 | 1 24 53 |
| Laurel, Joseph Hutchings | 14.11 | 1 31 12 | 1 31 07 |
| Marigold, E. D. Gay | 14 09 | 1 44 00 | 1 43 45 |
| Midget, W. H. Besarick | 12.10 | 1 48 28 | 1 46 18 |
| Nellie, J. O'Leary | 14.10 | 1 48 09 | 1 47 59 |
| Spook, Noonan and Andrews | 14.11 | 1 50 43 | 1 50 40 |
| Tantrum, F. D. Perkins | 14.09 | 1 57 29 | 1 57 14 |
| Transit, S. N. Small | 14.05 | 1 59 50 | 1 59 16 |
| Water Bug, D. McKinnon | 14.00 | 2 01 41 | 2 00 41 |
| Bother, L. P. Kieser | 14.11 | 2 01 39 | 2 01 25 |
| Cutty Sark, M. Torrence | 14.08 | 2 02 25 | 2 01 45 |
| Annie, E. H. Rich | 15.08 | 2 03 14 | 2 02 56 |
| Bubble, J. P. Bullard | 12 00 | 2 07 58 | 2 04 58 |
| Bunty, J. F. Cooper | 12.11 | 2 07 40 | 2 05 35 |
| Bantam, J. S. Perkins | 12.06 | 2 09 49 | 2 07 10 |

Escort wins first prize, Laurel second and Marigold third.

## Savin Hill Y. C., Sept. 10.

SAVIN HILL—BOSTON HARBOR.

THE final championship races of the Savin Hill Y. C. was sailed on Saturday in a light east wind, the times being:

SPECIAL CLASS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Fannie, E. P. Sharpe | 22.02 | 1 37 20 | 1 12 32 |
| Romance, Loring Sears | not meas. | 1 36 05 | . . . . . |
| FIRST CLASS. | | | |
| Adolph, Henry F. Moebs | 22.06 | 1 43 32 | 1 19 01 |
| Mildred G., Loring Sears | 25.02 | 1 47 07 | 1 24 48 |
| SECOND CLASS. | | | |
| Egeria, L. T. Howard | 20.01 | 1 42 04 | 1 15 16 |
| Siko, F. A. McInnis | 19.08 | 1 49 58 | 1 22 44 |
| Arab, W. F. Scott | 19.01 | 2 00 27 | 2 33 29 |
| FOURTH CLASS. | | | |
| Midget, W. H. Besarick | 12.09 | 1 29 47 | 1 01 04 |
| Marigold, Earle D. Gray | 14.09 | 1 31 14 | 1 04 54 |

The judges were A. A. Swallow, L. A. Horton and W. H. Besarick.

The championship winners are: special class, Fannie; first class, Mildred G.; second class, Siko; third class, Marchioness; fourth class, Midget. The club cups go to Adolph, Arab, Marchioness and Midget.

## The America Cup.

THE following despatch appeared last week in a number of American newspapers, despite its obvious absurdity:

"LONDON, Sept. 8.—The German Emperor has decided to enter his yacht, the Meteor, to compete for the America Cup in 1893.

"The Meteor was formerly the Thistle, the Scotch yacht, which was defeated at New York in 1887 by the Volunteer in the races for the America Cup. It is reported that Lord Dunraven has accepted the challenge to race for the America Cup and intends to build an 80-ton cutter."

## Chelsea Y. C., Sept. 5.

CHELSEA, MASS.—BOSTON HARBOR.

THE second pennant race of the Chelsea Y. C. was sailed on Labor Day over a three-mile course, the times being: Tot, Al Barrie, 4h. 37m. 20s.; Ann R., Mathew Ryan, 4h. 41m. 45s.; Holy Smoke, George Barrie, and Gem, Bert Fisher. The Tot wins, taking a leg for the pennant. The first leg was won by the Holy Smoke.

On Sept. 17 the Chicago Yachting Association will hold a race for steam yachts. Col. Robert Rae, George Warrington and Marshall D. Wilber are in charge of the race.

## Larchmont Y. C., Sept. 10-13.

LARCHMONT—LONG ISLAND SOUND.

THE fall regatta of the Larchmont Y. C. on Saturday brought out a very good fleet of starters, thirty-six yachts, and afforded good sport to both sailormen and spectators. The day was clear and warm and the Sound perfectly smooth, the wind being light from the east, shifting to the south in the latter part of the race. The display of schooners was quite a grand one for the Sound. The official times were.

SCHOONERS—CLASS A.

| | Elapsed. | Corrected. |
|---|---|---|

Forget-me-not was in harbor, but forgot to start, so Clara sailed over, the other winners were Ramona, Shamrock, Azalea, Kathleen, Chippewa, El Chico, Kittie, Nellie, Edna and Phyllis.

The race for the $500 schooner cup was sailed on Tuesday in a strong S.E. wind, the times being:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Ramona | 11 37 38 | 3 09 41 | 3 32 03 | 3 32 03 |
| Lasca | 11 45 00 | 3 14 05 | 3 29 05 | 3 31 38 |
| Iroquois | 11 45 00 | 3 20 40 | 3 35 40 | 3 29 26 |
| Marguerite | 11 44 39 | 3 21 26 | 3 36 47 | 3 32 26 |
| Shamrock | 11 43 19 | 3 28 29 | 3 45 10 | 3 32 10 |
| Viator | 11 45 00 | 3 46 37 | 4 01 37 | 3 31 11 |
| Azalea | 11 36 59 | 3 53 00 | 4 16 01 | 3 42 53 |

Iroquois wins the cup. Viator wins a cup of $150 from Azalea in a private match.

After the race of Saturday two challenges were issued as follows: W. Brokaw of the schooner Viator challenged the schooner Azalea or the Peerless for either $500 or $1,000 a corner round Long Island, starting from Sandy Hook and ending at Larchmont; also one race to be held over the Larchmont course; another over the New York Y. C. course, twenty miles to windward and back, for the cup presented by the Cherry Diamond Y. C. and the Larchmont Y. C., no restrictions as to crew or sail (clubtopsails barred). The races to be sailed on or before Oct. 1.

J. Clinch Smith of the schooner Azalea offered to sail a series of three races with the Azalea against Viator or against Peerless owned by Messrs Mitchell and Ackley, for the sum of $500, the winner to be the victor in two of the three races. One course to be named by Mr. Smith, another by Mr. Brokaw and the third by the owners of the Peerless. Each course to be one of the courses used by the New York Y. C. or the Larchmont Y. C.

## Fall River Y. C., Sept. 5.

FALL RIVER, MASS.—MOUNT HOPE BAY.

THE regatta of the Fall River Y. C. was sailed on Labor Day in a variable S.W. breeze, the times being:

THIRD CLASS SLOOPS.

| | Elapsed. | Corrected. |
|---|---|---|
| Hattie, Fall River | 3 23 08 | 3 23 08 |
| Composite, Fall River | 3 49 34 | 3 27 55 |

| Mendota | 2 06 25 | 2 06 25 |
| Rattler | 2 08 55 | 2 06 19 |

## The Yachting Fleet at the Columbian Exhibition.

THE appointment of Capt. Arthur H. Clark, of Boston, as the commodore of the yacht fleet at the Columbian Exhibition, is not only a worthy recognition of his position among the veterans of American yachting, but a guarantee that the duties of the position will be discharged most faithfully. Capt. Clark, who has been a sailor and a yachtsman almost from his birth, is the younger son of the late Hon. Benjamin C. Clark, an old Boston merchant and ship owner and a thorough yachtsman, a member of the New York Y. C. in 1845, one of the first Eastern yachtsmen to join the club, and owner of the schooner yacht Mermaid in 1832 and Raven, winner of the first regatta in Massachusetts Bay, in 1845.

Capt. Clark started before the mast in 1857, commanding his own ship in the China Seas in 1863. In 1866 he joined the New York Y. C., and in the same year took the yacht Alice across to England in nineteen days from Boston Light to the Needles. A little later he took a steamship to China for John M. Forbes & Co., and while there commanded several steamships. In 1874, '75 and '76 he commanded the steamship Indiana, of the American Line, between Philadelphia and Liverpool, one of the few transatlantic steamers under the American flag. In 1877 he went to London as the representative of the New York and Boston underwriters, remaining there twelve years. While abroad Capt. Clark made many acquaintance among British yachtsmen and saw a great deal of yacht racing. When it was proposed to send Mayflower across in answer to Arrow's challenge in 1887, he arranged to sail her over for General Paine. For the last two years he has resided in Boston, where he is engaged in the ship and yacht brokerage business, and is also measurer of the Eastern Y. C.

Mr. Clark is an authority on everything relating to the early history of yacht building and yacht racing in America, being familiar from his boyhood with the old yachts, of which few records now remain, and having long made a special study of these interesting craft. He is the possessor of a large and valuable collection of records, drawings and photographs, being himself a skillful photographer.

## Miramichi Y. C., Sept. 1.

CHATHAM, N. B.—MIRAMICHI RIVER.

A TRIANGULAR course off Chatham was chosen for the annual match for the vice-commodore's pennant, on Thursday. There was a good breeze—all the yachts started with lower sails only. The course was a long run, a long beat and a short reach, the river not being wide enough at this point to give a large base to the triangle. The course, sailed twice around, was five miles long, and the windward legs were sailed against a strong tide. Calypso, though sailed in previous races for two seasons by professional helmsmen, had alway been beaten. In this race she was sailed by Vice-Com. Stewart, whose own boat was not in the race, and led all her opponents from start to finish. The official times, taken by the judges—Dr. Pedolin and Mr. A. A. Davidson—were as follows:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Calypso | 12 00 40 | 2 10 00 | 2 09 20 | 2 09 20 |
| Maud | 12 01 22 | 2 13 33 | 2 12 11 | 2 09 41 |
| Kittoch | 12 02 00 | 2 16 33 | 2 14 33 | 2 10 27 |
| Kilbride | 12 04 00 | 2 24 43 | 2 20 03 | 2 16 49 |

## Volunteer Sailing Club, Sept. 5.

NEW HAVEN, CONN.

THE annual fall race of the Volunteer Sailing Club, of New Haven, Conn., was sailed Sept. 5 in a fresh southerly wind, over the regular 4-mile course on New Haven Harbor. The times were:

| | Length. | Finish. | Elapsed. |
|---|---|---|---|
| Veto, Com Conklin | 17.05 | 11 32 00 | 1 12 00 |
| Norma, J. H. Jooss | 15.06 | 11 37 00 | 1 16 56 |
| Lottie, S. W. Verwholt | 14.11 | 11 42 00 | 1 21 57 |
| Lassie, J. Johnson | 15.01 | 11 55 00 | 1 34 55 |
| Belle, L. M. Cooney | 14.05 | 12 01 00 | 1 40 55 |

For the best racing record of the season Norma takes first prize, $5.50; Veto second prize, $3.50, and Lottie third prize, $2.50.

Race Committee—Webster H. Mathis, J. H. Jooss, F. F. Upson. Judge—Capt. Geo. Damon.

## YACHT NEWS NOTES.

The little cat Truant, built by V. D. Bacon on Cape Cod for San Francisco, has at last come to grief after a victorious career as a racer, as told in a San Francisco paper: "As for the vice-commodore's vessel, the Truant, what has been predicted by local yachtsmen for a year or so came to pass. This yacht was built by Turner upon Eastern designs, and Vice-Commodore Pew had a regular row on paper with the designer before the latter would consent to the reduction of the canvas 33⅓ per cent., yet under this reduced sail plan she carried away her mast, a heavy spruce stick, clean at the deck, and was towed home by the launches Norwood and Agretta. The Truant has beaten everything of her inches in light weather, but the old-timers have always wished to get a whack at her in a blow. Her mast was stepped right in her eyes, and as a consequence her shrouds had no spread and no practical resistance. Step your new mast further aft, Mr. Pew, sacrifice a little cabin room, put a decent jib on your boat instead of that anomaly you now carry, and have vessel fit for the rough waters of San Francisco Bay. Such a series of disasters has never befallen the Corinthians before, and it was only owing to good seamanship that no lives were lost. 'But all's well that ends well,' and the experience of last Sunday will do the amateurs no harm, but will increase their confidence in their abilities and in the sea-going qualities of their craft."

On Sept. 10 a 20ft. electric launch, designed and built for Mr. S. R. Bradley, of Nyack, N. Y., was launched from the works of Charles L. Seabury & Co., Nyack on Hudson, N. Y. The general dimensions are, length 30ft., beam 6ft. 6in., draft about 2½in. Hull is built of selected stock, white oak keel and frames, timbers straight grained, steam-bent white oak, planking is of white cedar, finished natural color of the wood, varnished; copper fastened and riveted throughout. The interior, seats, lockers, coaming, etc., are finished in fine quality quartered oak. The decks are of white pine, laid in narrow strips. The power consists of storage batteries and motor of the Union Electric Co.'s make, which are charged for a run of about 100 miles. These are all set under the floor of the boat, entirely out of the way. It develops five horse power, and the speed is about eight miles per hour. Messrs. Seabury & Co. have also fitted the 60ft. steam launch Camilla with a Seabury patent safety water-tube boiler a few weeks ago. This firm has also signed contracts for a number of steam yachts and launches, to be delivered this winter for Southern use, also early next spring, and the prospects for a very busy yacht-building season are good.

The yachting correspondent is an innovation of recent times, whose presence has tended to clear away the atmosphere of myths in which the earlier history of the sport has been lost. Not until the advent of the United States schooner America at Cowes to compete against English built yachts in 1851, did the press become thoroughly interested in the sport and influenced public opinion in its favor. A spirit of international rivalry was stirred that has never died out, and which has been of infinite benefit in making yacht racing popular. The accounts of the race around the Isle of Wight for the cup presented by the Royal Yacht Squadron, and for which repeated international contests have since been sailed, lent a zest to the sport which it had not previously attained. The novel build of the America, schooner, her rig and canvas, challenged English traditions and aroused a contemptuous unbelief in their value. It could hardly be borne that the prestige of England's pleasure navy should be seriously invaded by an American vessel built in defiance of time-honored prejudices.—*Dixon Kemp, in the English Illustrated Magazine for August.*

The work of raising the wrecked Alva still continues, with a fair prospect of success, although the season is advancing and heavy storms are to be looked for. The hatchways and openings in the deck are being closed up, and the gaps in the hull stopped as far as possible. When this work is completed the uninjured compartments will be pumped dry. A good deal of property has been recovered by the divers, the personal effects of Mr. Vanderbilt and his guests, clothing, jewelry, etc., the furniture, hangings and silverware, the ship's arms and the shell of the turtle that was washed aboard the ship off the Azores in 1891. It is reported that Mr. Vanderbilt will build two yachts for next year, a large one for offshore cruising and a smaller one for home cruising. The suit against the owners of the H. F. Dimock has not yet come to trial.

The daily papers are busy arranging for a number of new yachts to be built next season; besides the two new steamers for Mr. Vanderbilt to replace the Alva, one of them a small war ship, John D. Rockefeller is to have a steam yacht similar to Corsair from the designs of J. Beaver-Webb, Royal Phelps Carroll is to have a 90ft. Herreshoff schooner to bring back the Cape May and Brenton's Reef cups from England and several more 90ft. schooners are to be built, with a number of smaller craft. The prospects now are that building will be fairly brisk during the late winter, but as yet very little is known as to owners, builders or dimensions of the new yachts.

A most cruel hoax has lately been perpetrated by the discharged cook of the steam yacht Wapiti, owned by Hiram W. Sibley, of New York, and cruising on Lake Erie with the owner and his family aboard. In revenge for his discharge the cook, George Sherman, telegraphed from Collingwood, Ontario, that the yacht had sunk in a storm on Georgian Bay, with but two persons saved; and the news was spread rapidly over the country, full accounts of the disaster, with lengthy obituaries of Mr. Sibley, being published in many papers, especially in the West. The report was utterly without foundation, the yacht being safe in port at the time.

The Oak Point Y. C., of Westchester county, N. Y., has elected the following officers: Com., John Corbett; Vice-Com, William Eldridge; Treas., Edward Ward; Recording Sec., George Gent; Corresponding Sec., Charles Stickler; Financial Sec., John Lee; Steward, W. Bielach; Meas., Charles Warner, and Sergeant-at-Arms, Joseph Wakeling. The club house is at 149th street, near Port Morris. The membership is now, at the end of the first year, 105.

The Brooklyn Y. C. will build a club house this winter on Gravesend Bay, to be 75×100ft., three stories high, with a pier running out to deep water, a distance of nearly half a mile. When completed this will give the club a very fine station on the lower bay, in one of the very few locations which are available for such a purpose.

The Patchogue Y. C. has been recently organized, with the following officers: Com., George W. Burcham; Vice-Com., George L. Robinson; Rear-Com., William T. Jennings; Treas., George H. Odell, Jr.; Sec., W. A. Bolton; Treas., Wilmot M. Smith; George Odell, R. A. Budd, Daniel Sweezey and George W. Hulse, Board of Governors; Capt. A. C. Mott, Fleet captain. The club station is at Patchogue, L. I., on Great South Bay.

The odd little schooner, with a flush deck and a small steering well, that has been about New York Harbor for some weeks, is the Saucy Lass, of and from Bermuda, owned by Capt. Herman Franz, who sailed her to New York with a companion and a small dog. She was built in Bermuda, of the native cedar.

The loss of the Yankee Doodle was due to fire from a lantern which was dropped in her engine space, setting fire to the woodwork, already saturated with kerosene. The original Mosher boiler had been removed some time before and replaced by a new oil-burning boiler invented by her owners.

The boiler of the steam yacht Cora, of Elk Rapids, Mich., exploded on Sept. 4 just as the craft was leaving her dock with a party of six ladies aboard. E. S. Nobles, owner of the yacht, had a leg broken and was otherwise injured, and Miss Farrand and Mr. Owen were injured by escaping steam.

On Aug. 30 the boiler of the steam yacht H. D. Sears exploded on Rock River, near Harlem Park, Ill., and the occupants, Mr. Sears, Mrs. Lawrence and Mrs. Geo. F. Penfield and child, were thrown out into the stream, being rescued by small boats.

On Aug. 27 a race was sailed for the Vanadis cup, Tattler, Expert and Precept being cat-rigged. There was a strong wind and both Tattler and Precept lost their hollow masts at the outer mark, being then ahead of Expert, who finally won.

The Seattle Y. C. is moving for the erection of a fine club house, and the yachtsmen of Puget Sound are working to organize an international association, including the yachtsmen of the British Columbia towns.

Vice-Com. J. H. Sterling, of the Larchmont Y. C., has resigned, and Mr. Harold A. Sanderson, of the yawl Nonpariello, has been elected to fill the vacancy.

Cygnet, steam yacht, Jacob Cram, was recently seized at Oswego and fined $100 for not carrying a licensed pilot, and $500 for sailing without inspection.

The Sewaren (N. J.) Y. C. sailed its last race for the Johnston cup on Sept. 10, Nankit winning for the third time and holding the $350 trophy permanently.

We have received the second supplement of the year to Lloyd's Yacht Register, containing alterations and additions to Aug. 15.

Messrs. Stewart & Binney have another large fisherman similar to the successful Mary Powers on the stocks at Essex.

The fleet of the Massachusetts Y. C. has just returned from the annual cruise to the Maine coast.

Alert, schr., J. H. Luning, has been fitted out at Poillon's for a winter cruise to the Mediterranean.

Wadena, steam yacht, J. H. Wade, of Cleveland, Ohio, has recently reported in Norwegian waters.

The name of the newly organized Jamestown (R. I.) Y. C. has been changed to Conanicut Y. C.

Gadfly, the Sidney Burgess 21-footer, has been used about Newport of late under a cat rig.

# Rifle Range and Gallery.

## ON JERSEY'S SEA GIRT SHORE.

### Rifle Contests at Camp Abbett.

MAGNIFICENT weather from start to finish; fine accommodations for visitors; good restaurant facilities; the very best of scoring, marking and general management; a first-rate attendance, and above all the absence of even the semblance of a kick or growl were the conditions which obtained during the second fall meeting of the New Jersey State Rifle Association, which opened on Monday, Sept. 5, and closed at 3.30 P. M. on the following Saturday. The shoot was held on the ranges of the New Jersey State camp at Sea Girt, 12 miles below Long Branch, one of New Jersey's most popular and fashionable summer resorts. Between Long Branch and Sea Girt are Asbury Park, Belmar, Como, Avon, Spring Lake and a couple of other watering-places.

The camp of New Jersey's National Guard has been pronounced by military men from near and far to be the very finest camping ground in America. A parallelogram in shape, it comprises 148 acres of as level land as can be found in the State. It is bounded on the north by the Beach Road leading to the old-time Stockton House (now known as the Beach House); on the south is Squan Lake, a sheet of water abounding in crabs; on the west are the tracks of the Long Branch Railroad Company and on the east the waters of the broad Atlantic. The ground is of a porous, absorbent nature and the entire camp is provided with a perfect system of drainage. Splendid drinking water is furnished by two driven wells, each over 700ft. in depth.

The entrance to the grounds is about 500yds. from the Sea Girt depot. From this entrance is a roadway leading along parallel with the railroad to the southerly corner of the grounds, theuce east-southeast to the mid-range pits; then back to the 100yd. firing point northeast to the Beach Road fence, and southerly to the Governor's cottage, situated on the Beach Road about 200yds. southeast of the entrance above-mentioned. On the southern side of the roadway and between it and the lake are the mess halls used by the several commands during the summer encampments. During the off season the tents, cots and other camp paraphernalia are stored in these mess halls. On the opposite side of the roadway are the mess halls and kitchen for the field and staff officers. During the encampments the "A" tents for the rank and file are pitched in rows of 15 each, each tent being occupied by two men.

The rifle ranges, where all the interest of last week's visitors was centered, are situated on the southeast portion of the grounds, the lines of targets running parallel with the ocean line. Between the mid-range targets and the ocean are a number of sand dunes, those directly in line with the pits being from 20 to 30ft. high. On a line with the right target these dunes slope down to a level with the beach, while in the opposite direction they do not taper down inside of 150yds. of the line of the left target. The dunes are about 150ft. in rear of the targets. Both to the right and left of the mid-range are two heavy growths of cedars, these extending up on the northeast to the 400yds. firing point and on the southwest to the 300yds. firing point. The 200 and 500yds. firing points are on one line, the 200yds. targets being placed in an angle of the field to the northeast of the mid-ranges. It may not be thought by the uninitiated that the cedar clumps and sand dunes would have any effect upon the shooting, but that they do is plainly apparent to all who have shot over the mid-ranges. Every afternoon, when the ocean current sets in, it sweeps around between the sand dunes and the clumps of cedars on the east and cuts some very erratic capers as it meanders across the lower end of the range, and passes out to the southeast between the other dunes and cedars. The current and drift thus produced at times will get the best of the most expert marksmen and keep him guessing as to why his shots are flicking about, first right and then left, the wind-dial meanwhile failing to show the slightest variation in the direction of the wind at the 300yds. firing points. The light, too, is fitful and tricky, and taken all in all, while it is one of the finest mid-ranges in the world, it is still one on which the proverbial Philadelphia lawyer would be puzzled. The 200yds. ranges are free in a measure from the disturbances noted above, but here, too, when using the targets on the extreme right one is likely to get erratic results at times, especially when the wind is due east or northeast.

Immediately in rear of the left of the 200yds. firing points is a neat structure used as the office of the Department of Rifle Practice. Attached to this is a good-sized pavilion, and in rear of latter is an extension used by the medical officer attached to the range. Still further back is the magazine, where during the shooting season are handled upward of 200,000 rounds of ammunition.

It was Sunday evening when the FOREST AND STREAM representative arrived at the camp grounds, but he was by no means the first comer. Standing in front of the tents of the Department officers, near the Governor's cottage, and looking across the field toward the lake there could be seen a long line of snow white tents, the right of the line being within a hundred yards of the range office, the end of the line being at least 600yds. down the field. Here and there could be seen a light shining through the side of one of the canvas habitations, this being proof conclusive that some teams had already arrived. Upon inquiry we ascertained that the District of Columbia contingent, thirty odd strong, had arrived on the previous Friday, and that teams from the First, Second, Third, Fourth, Sixth and Seventh Regiments of the

New Jersey National Guard had also taken possession of their quarters. Soon after we started out to make a friendly call on our old friends of the Capital City, and were pleased to see that nearly all of those who were at Sea Girt and Creedmoor in 1891 were again members of the District team. One face, however, was missing, that of Major J. M. Pollard, the old-time short, mid and long-range shot, who for so many years had been intimately associated with the shooting world. Major Pollard, we were informed, would probably never again be able to shoot in anything like his old-time form, a severe attack of la grippe having developed itself into a chronic affliction which partially disabled the genial Major's left arm and shoulder.

After a few moments' chat, followed by a lunch at Greason's camp restaurant, we started on a tour of the camp to see what sort of accommodations the Jerseymen had provided for the teams. It was not long before we arrived at the conclusion that the State authorities in general and Gen. Spencer and Lieut.-Col. Felton in particular had ma de the camp just about as comfort-

FIRST REGIMENT D. C. M. TEAM.
Winners of Regimental Team Match. Photo by H. J. Thein, Newark, N. J.

able as such a place can possibly be. The tents, which were of the officer's wall pattern with an overhead fly and a projecting fly in front, were nicely floored and to each was issued a canvas cot, a mattress, two or three blankets, an overcoat, camp stool, wash bowl and pitcher, pail, broom, a pitcher for drinking water, a lantern, candlestick and all the candles he cared to use. It must be borne in mind that the above outfit is supplied to visiting teams and individuals free of charge. The tents were arranged in groups of eight, so that each regimental team had separate quarters.

The teams who were on the grounds at this time were as follows: District of Columbia—Capt. James E. Bell, Inspector Rifle Practice, 2d Regt.; Capt. W. L. Cash, Inspector Rifle Practice, 1st Regt.; Pvt. Walter S. Cash, Co. C, 3d Bat.; Col. Cecil Clay, 2d Regt.; Corp. C. W. Dickey, Lieut. F. L. Graham, Engineer Corps; Lieut. G. H. Harries, Inspector Rifle Practice, 2d Bat.; Pvt. C. I. Himebaugh, Co. C, 1st Bat.; Sergt. A. O. Hutterly, Engineer Corps; Com. Sergt O. H. Laird, 2 Regt.; Sergt. T. T. Page, Co. A, 6th Bat.; Pvt. S. B. Rollins, Co. D, 3d Bat.; Quartermaster Sergt. S. D. Rotramel, 4th Bat.; Sergt. Russell, Co. D, 3d Bat.; Corp. R. B. Smythe, Engineer Corps; Lieut. J. M. Stewart, Inspector Rifle Practice, 3d Bat.; Pvt. S. B. Wetherall, Engineer Corps; Pvt. G. B. Young, Engineer Corps; Corp. Maurice Appleby, Co. B, 3d Bat.; First Lieut. T. S. King, Inspector of Rifle Practice, 5th Bat; Pvt. A. S. McClain, Co. B, 6th Bat.; Pvt. S. J. Scott, Engineer Corps; Lieut. Tomlinson, Pvt. H. B. Blanton, Sergt. W. E. Buell, Pvt. P. J. Byrne, Capt. W. S. Davenport, Corp. G. D. Ellsworth, Pvt. G. W. King, Pvt. J. A. Kirk, Corp. B. F. Odell and Pvt. J. E. Swigart, all of Co. B, 6th Bat.; Lieut. W. P. Vale, Inspector of Rifle Practice, 6th Bat., and Pvt. Joseph Van Vleet, Co. A, 6th Bat.

New Jersey Teams.—First Regiment, Lieut. J. K. Walsh, Co. E; Capt. G. M. Townsend and Pvt. C. H. Townsend, Co. L; Pvt. J. T. Hogle, Co. E; Pvt. Wm. Hedden, Co. C; Pvt. F. S. Hill, Co. G.

Second Regiment, Capt. W. F. Decker, Lieut. Van Walraven and Corp. Dietrich, Co. C; Sergt. Chinn, non-com. staff; Pvt. Fairhurst, Co. A; Pvt. Ransom, Co. B.

Third Regiment, Capt. Irwin, Inspector Rifle Practice, captain; Maj. Mravlag, staff; Capt. Cook, Co. H; Lieut. Watson, Co. D; Sergt. Martin, Co. C; Sergt. Hall, Co. A; Sergt Smith, Co. H; Pvt. Gladden, Co. D.

Fourth Regiment, Capt. Graff; Capt. Lohman, staff; Lieut. Burns, Co. K; Lieut. Springsted, Co. C; Sergt. Millburn, Pvt. Graham, Co. A; Pvt. Brown, Co. C.

Sixth Regiment, Col. Cooper; Capt. Shinn, Co. A; Capt. Miller, inspectors rifle practice, Lieut. Cloud, Lieut. Kline, Sergt. Jeffries; non-com. staff, Pvt. Baxter.

Seventh Regiment, Capt. Reed, inspectors rifle practice; Capt. Stoll, Co. A; Maj. Leavitt, staff; Sergt. Lalor, non-com. staff, Pvt. Hartman, Sergt. Dalrymple, Sergt. Sherod, Pvt. Reed.

The teams all turned in about 10 P. M., the weather indications being unfavorable for the morrow. The stars were shining, it is true, but the air was hazy and raw. This camp, being situated, as it is, on the shores of the ocean, is always cool and almost invariably damp at night, no matter what the season. The sea breeze carries in with it a great amount of moisture and rubbers are always in demand between 7 P. M. and 8 or 9 A. M. Sleeping without a good supply of covering is out of the question even during July or August. On the above night all the shooters were glad to roll themselves in from two to three of the famous red blankets, 600 of which helped to carry the New Jersey provisional battalion to victory during the Yorktown Centennial, at Yorktown, Va., in 1881.

*The Opening Day.*

At 6 on Monday morning Bugler Millburn sounded "reveille" from his quarters, the Governor's cottage, but it was scarcely needed in the camp as nearly all the boys were astir before that hour and were performing their morning ablutions. At 6:45 came the first call for breakfast, the formal call sounding fifteen minutes later.

Monday being a day devoted simply to the receiving of team entries, preliminary practice at known distances and the shooting of the continuous individual matches, no one was in any hurry to get on the range, and it was considerably after 9 o'clock when the opening shot was fired. At 10 o'clock the various teams shot one or two preliminary strings of 10 shots each at 200yds.

The morning was cool and the wind kept blowing a stiff gait, its direction being from "P" to "4 o'clock," and back again. The light was changeable, and taken altogether it could not be called a good shooting day. Nevertheless the shooters put on an extra strain and some fine scores were run up. The individual matches of course drew very lightly, the shooters preferring pool and practice tickets before going in for winning tickets.

This being Labor Day, and consequently a legal holiday, a large number of sight-seers were on the grounds, these coming from all over the State. Among the visitors were Major-General Snowden, commanding the Pennsylvania National Guard; ex-Governor Green, of Elizabeth, N. J., who is an enthusiast in all shooting matters; John L. Kuser, business manager of the *Freie Zeitung*, of Newark, N. J.; G. Wisner Thorn, city editor of the *Sunday Call*, of Newark, N. J.; J. Frank Urquart, of the *Sunday Call* staff; Major E. J. Anderson, ex-comptroller of New Jersey; ex-Senator R. B. Reading, of New Jersey; Wm. Hayes, F. C. Watts, and T. E. Beck, of the Newark (N. J.) Shooting Society; Bernard Walther, president of the Zettler Rifle Club, of New York; Chas. E. Overbaugh, of New York, who was a member of the Centennial American rifle team; L. P. Hansen, of the Excelsior Rifle Club, of Jersey City; H. B. Seeds, of the Wilmington (Del.) Rifle Club, and J. R. Pierson, of Bloomfield, N. J.

About a dozen men tried their hands in the Schuetzen match but owing to the wind and light no big scores were recorded.

"Cease Firing" was sounded at 1 P. M., when an hour's respite was granted for dinner. After 2 o'clock the several teams put in preliminary practice at the mid-ranges but no phenomenal totals were rolled up. There were a fair number of entries in the Kuser all-comers and Perrine memorial matches, but the most of the shooting was on the pool targets. The nature of the weather conditions can best be judged by the statement that on the 500yd. pool targets, bullseys paid 28 cents each. On the 200yd. range they paid 30 cents each. Had the conditions been at all favorable the mid-range "bulls" would not have been worth more than one-half the above price.

All day long the visitors kept coming and going and between 10 A. M. and 6 P.M. there were certainly 1,500 people on the grounds. Some of these were the late stayers at the watering places along the coast while others were friends of the various team members. Everybody was deeply interested in the shooting.

The fun was brought to a close at 6 P. M., when all hands, after a wash-up were ready for supper. After supper the team members made fraternal calls on one another, and with chatting and smoking whiled away the time until "taps" were floated across the field, this being at 10 o'clock. The night was much warmer than the preceding one and the boys took advantage of this fact and got a good rest preparatory to the preliminary skirmish-firing to take place on Tuesday.

SECOND REGIMENT TEAM.
Winners of N. J. N. G. and Columbia Matches. Photo by H. J. Thein, Newark, N. J.

It was expected up to a late hour that Tuesday's work would comprise only the two preliminary runs, but in the evening the team captains and Brig.-Gen. Spencer, the executive officer, held a consultation and very sensibly decided upon a change. As the programme stood the members of the Jersey commands were scheduled for two runs each in the New Jersey National Guard and the regimental team matches, beside which they expected to be obliged to make on the same day four runs in the match for the Columbia trophy, presented to the State by the National Guard of the District of Columbia. During the above consultation, however, it was reasoned that eight skirmish runs were too many to impose upon a man in one day, so it was decided that the preliminary runs should be made on Tuesday morning and two of the Columbia runs in the afternoon. It can readily be imagined that this change was an agreeable one to the Jerseymen.

During the day Brig.-Gen. Spencer, Brig.-Gen. Howard, Colonels Owens, Van Valen and Righter, and Captains Decker and Reid had kept everything running in splendid order on the ranges, while A. H. Hayes, of Newark, and Jas. C. Thomas, of Trenton, the official clerks, and Col. Walker and Major Wallace, the statistical officers, kept the machinery of their respective departments running without any friction.

*Tuesday, the Second Day.*

looked rather dubious as the marksmen turned out for breakfast there being a threatening haze in the air, a mean "6 o'clock" wind blowing and a heavy mirage near the mid-range targets. By 8 o'clock, however, the wind had veered around to "10 o'clock," and the haze had disappeared. From that time until evening the wind blew a steady six-mile gait from "9" to "11 o'clock," and the light held well until the daily ocean current set in (about 4:30 on this day), after which mid-range shooting was extremely difficult. About 9:30 the preliminary skirmishing was begun, the men being told off in groups of ten men each, each man firing upon a separate target.

This system of rifle practice, which has become immensely popular among Jerseymen, is extremely hard work for the short time it lasts. The first run was conducted by Brig.-Gen. Spencer, the calls being sounded by Bugler Millburn. Each man being stationed at the firing point assigned him, was provided with twenty cartridges. All being in readiness, Bugler Millburn sounded "Attention," this being immediately followed by "Forward, guide center, march," when the line begins to move forward, each man keeping his eye on his sight in readiness to adjust it for distance when halted. But the next command swings them into "double time," and it is not until they have passed 10yds. beyond the 500-yard firing point that "halt" is sounded. Each man drops as quickly as possible, some taking the prone, some the "Texas grip" and others the kneeling position; but no matter which position they assume, you will notice that each and every man will take a quick glance to the right or left in order to verify his distance. But you have to be quick indeed with all these movements, as within from two to four seconds after "halt" is sounded you get "commence firing," and it must be remembered that you have only a bare 30 seconds for firing an average of two shots to a halt between the last note of "commence firing" and the first note of "cease firing." But while we have been giving details for the benefit of the uninitiated, the last note of "commence firing" has died away and you are looking to see each man begin to "pump" the cartridges into his gun and fire ever so many shots. Do you see it? Well, hardly! You may see the men fire two shots each at this distance, but the chances are more in favor of their taking a good, deliberate aim, fire one shot and await the next command.

"Well," you are likely to exclaim, "is that what they call 'rapid firing?'"

Oh, no! That is not rapid firing, but have patience, as the game is very young at this stage.

Now "cease firing" has been sounded, the line is moving to the front in double time and another halt is made. This time the distance is a trifle over 400yds., and the majority fire not less than two shots, some fire three and some perhaps four. But it is on the fourth, fifth and sixth halts that you will see the "pumping" done if at all, none of the skirmishers firing less than three shots on these, while others exhaust their supply of ammunition by the time they finish their firing on the fifth halt.

Going toward the target the rifle may be carried in any position provided the muzzle is kept toward the target, but on the retreat the rifle must be carried on the shoulder. There are five halts on the advance and five on the retreat, the distances being from 600 to 200yds. and back. After the tenth halt the skirmishers assemble on the left and are marched off the field by an officer or "non-com." Bugler Millburn meanwhile galloping back to "blow" for the next squad, which is all ready for his signals. This routine is kept up until each squad has made two runs, by which time all hands are in condition to eat the hearty dinner which awaits them.

After dinner each man receives from his team captain a miniature 6×9 target for each run that he has made. Each of these targets has marked on it the exact location of every shot that has been made on the mid-range target corresponding in number of target and number of run marked on the miniature. By this means the men are enabled to see where mistakes, if any, have been made and profit by the knowledge in the next run.

It was about 3 P. M. when the New Jersey teams came out again to make the two runs for the Columbia trophy, and it was considerably after 5 before they were completed. The contest had six entries, one team of six men from each the First, Second, Third, Fourth, Sixth and Seventh regiments. After the above runs the boys felt very little like doing any more shooting during the day.

About supper time there arrived at the camp a contingent from the Sixteenth, N. G. of Pennsylvania, comprising Lieut. T. F. Coneely, Inspector of Rifle Practice; Sergt. O. J. Gunning, Co. A; Corp. Joel Miller, Co. H; Pvts. H. C. Weagraff, W. B. Chapman and Thomas Albert, Co. C. Shortly after 9 o'clock along came another Keystone contingent in the persons of Lieut. Newton, Inspector of Rifle Practice, Ninth Regiment; Lieut. Burgstrasser, Eighth Regiment; Pvt. Bowers, Co. C, Ninth Regiment; Col. H. Osthaus, General Inspector of Rifle Practice of Pennsylvania; Lieut. C. B. Pratt, Inspector of Rifle Practice, Thirteenth Regiment; Capt. E. E. Chase, Lieut. F. W. Stillwell, Pvt. W. W. Young, all of Co. A.; Sergt. Cullen, Co. C, and Quartermaster-Sergeant Reese Watkins, all of the above regiment.

The members of the Sixteenth Pennsylvania looked travel-stained, and it is not surprising, considering that for sixty days they had been on field service at Homestead and came to Sea Girt on detached service, with orders to report for duty as soon as possible after the meeting was closed.

During the day the shooting in the individual matches lagged somewhat, as was to be expected when everybody was interested in watching the work of the skirmishers. Still there were some

few scores put up in the all-comers'. Perrine and Kuser matches, despite the fact that no shooting could be done at 500yds. until late in the evening.

The night was another of the cold and damp ones for which the section is noted, and everybody was particular in closing tent flaps and getting blankets enough to keep out the chill air. And they all turned in pretty early in order to get into condition for the known distance stages in the New Jersey National Guard and the regimental team matches, scheduled for

*Wednesday, the Third Day,*

which opened up beautifully. The morning was slightly cool, but the air was as clear as a crystal and there was not the suspicion of a cloud in the sky. Breakfast over, all hands overhauled their rifles to see that they were in proper working order, and by 9 o'clock all were ready and eager for business.

It was about 9:15 when Gen. Spencer called up the teams to shoot their 200yds. scores in the Regimental Team match, open to New York, Pennsylvania, Maine, Delaware, Maryland, Connecticut, District of Columbia and New Jersey. The teams that were entered were from the First and Second regiments, Sixth Battalion and the Engineer Corps, D. C. M.; Sixteenth Regiment, N. G., Pa., and from each of the six New Jersey regiments. The Sixteenth Pennsylvania did not enter until late, being short one man until Lieut.-Col. Horton arrived. Some fine off-shoulder work was done by this team, which put up 260 out of a possible 300 points. This was high score at this range, the next best being 246, made by each the First Regiment and Engineer Corps teams of the D. C. M.

Immediately after the above came the short-range shooting in the New Jersey National Guard match, the leading total being 241, made by the Second Regiment team, the team of the Seventh being next with 237.

After dinner came the shooting in these matches at 500yds., the Pennsylvanians rolling up a score of 245 to the D. C. Engineer Corps' 250, and the First D. C.'s 239. This gave the Pennsylvania

BRIG.-GEN. SPENCER.

regiment a lead with 505 to the Engineer Corps' 496 and the First D. C.'s 495.

In the New Jersey National Guard Match at the 500yds. ranges, the Second again led with a total of 244 to the Fourth's 232 and the Seventh's 221. This gave the Second an aggregate at the two distances of 485 to the Fourth's 460 and the Seventh's 458.

During the shooting at 200yds. the light was rather bright, the wind holding about a four-mile pace between "10" and "11 o'clock." When the shooting began at 500yds. the wind was identically the same as above, but the tricky current mentioned early in this article made it extremely difficult to get two shots together.

The team of the First Regiment was handicapped, having its captain crippled up so that he was unable to shoot, this necessitating the putting in of a substitute who had had no practice.

The team of the Second Regiment, which caught a lead on the two distances in the State match, also had a hard run of luck. After getting part of his shots in at 200yds. the breech-block blew out of the Springfield used by Sergt. Brooks. He was obliged to finish with a strange rifle, and the pull being entirely different from his own, gave him a ricochet on his next shot. Again at 500yds. in the same match Sergt. Chinn got in position to shoot his score, and when he attempted to close the breech of his rifle the hinge-pin snapped off. He, too, was compelled to shoot with a strange rifle with no sighting shots. Despite his hard run of luck Capt. Decker of the Second's team was as cheerful as if everything was running his way.

About 10 o'clock on Wednesday night the rain began to patter on the canvas and for a time this kept the boys guessing as to whether or not they would be obliged to make their skirmish runs in the rain. An hour later, however, their minds were made easy by the appearance of a full set of stars.

*Thursday, the Third Day,*

opened with indications for a good shooting day, the light being of the gray tint so much desired by marksmen. The wind was a trifle stronger than on Tuesday, although it held fairly steady between the "9" and "11 o'clock" figures on the dial. Everybody slept as long as possible, the Jersey team men in particular being anxious to get as much rest as they could as they were scheduled for 6 skirmish runs during the day, while the District of Columbia and Pennsylvania men had only two runs each staring them in the face. Upon reporting at the range the Jerseymen received a very agreeable surprise in the form of an announcement that their scores made in the N. J. N. G. match would be counted as two scores in the Columbia trophy match.

And what a great big sigh of relief they sighed. To make 4 runs instead of 6 is quite a difference, gentle reader, and if you don't believe it try the experiment. "We" meaning "us" of course, were "there" during the week and took part in all the shooting and can assure all parties interested that "we" were perfectly satisfied to make the 4 runs instead of 6. When contemplating the prospect of making 6 skirmish runs, "we" could not avoid noting that every once in a while (sometimes oftener), a sort of a twinge just above the muscle on the right arm would remind "us" of a carless "hold" on a shot fired in one of Tuesday's runs. But then, just think of the fun you get for your money.

On the previous evening the teams had been notified that the skirmish firing would begin promptly at 9 A. M., but it was 10:15 before the first squad was started. The first two runs were in the Regimental Team match, and the next two made in the afternoon by Jersey teams only; counted for both the N. J. N. G. matches and the Columbia Trophy match. It was almost 1:15 P. M. when the first two runs were completed, and when the Jerseymen went to dinner they were told to be on hand "promptly at 2 o'clock" for the other two runs. And they were all on hand at the appointed time, but, as in the morning, they were obliged to make a long wait, it being 3:15 before they got to work. Had they been started at the scheduled hour they could have finished long before 4 o'clock; but as it was the last squad did not leave the field until close to 5 o'clock. This delay of course made no material difference to the team men, but it did make a difference to those who had been shooting 200yds. scores in the Perrine and All-comers' matches and to those who were anxious to shoot in the Kuser match, as the 500yds. ranges were kept closed until the current and light precluded any possibility of being sure of a score.

Below will be found the detailed scores of the three matches ended on Thursday.

Late in the evening the members of the New York State team reached the camp. After paying their respects to the powers that be the majority of them went to the Beach House to spend the night. The team was in charge of Brig.-Gen. Whitlock, Inspector-General of Rifle Practice. Those who elected to spend the night in camp were Geo. Doyle, of the Seventy-first; Frank Stuart, of the Sixty-ninth; Chas. Bryant, armorer and coach for the Twenty-third, and Geo. Brown of the Seventh.

Up to this time some good figures had been rolled up in the individual matches. In the Schuetzen match T. E. Beck, of Newark, scored 188 points; Frank Robling, of the Thirteenth Pennsyl-

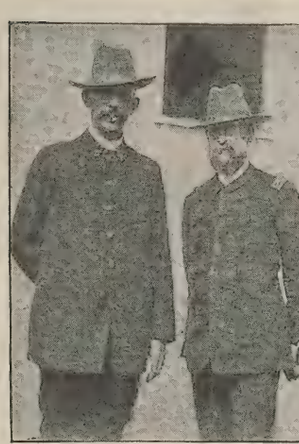
vania, had 47 in the All-comers' and 101 in the Kuser, while 46 was top score in the Perrine.

When the shooters retired they did so with the firm conviction that on Friday they would have their usual dose of bad weather in which to shoot the Interstate and Hilton trophy match. About 10 P. M. there came down a fair-sized shower lasting about a half hour, this being followed a couple of hours later by another sprinkle. After this, however, the stars began to peep through and all signs of a storm disappeared.

*Friday, the Big Day*

of the meeting, opened with a clear sky, an east-north-east breeze and a cool air, with just enough moisture to keep the rifles in good form. Early in the morning visitors began to reach camp and at 10 o'clock when the Interstate match was opened at 200yds., there was a big crowd present. The Interstate and Hilton trophy matches, those time-honored contests of the National Rifle Association, shot here for the first time, had each four entries, representing the District of Columbia, Pennsylvania, New York and New Jersey, the latter being a team chosen at half an hour's notice. The New York team also was picked on the fly on the previous day. It was expected that the contest would be hot between New York and the District team, the Jersey and Pennsylvania teams not being considered at all. This was good judgment so far as the Jersey team was concerned, but Pennsylvania proved to be "very much in it," before the day ended.



The 200yd. shooting in the Hilton followed the Interstate, Pennsylvania securing a lead in both matches. After dinner shooting was begun in the Interstate at 500yds., the Keystone contingent again showing their superiority and winning the "Soldier of Marathon" by 59 points over New York.

In the Hilton trophy match the Pennsylvania team beat New York 5 points at each range, winding up with 1,056 to New York's 1,041, District of Columbia's 982, Jersey being "out in the cold." This was the second time in the history of the Hilton that Pennsylvania had been victorious, its previous win having been in 1882 when its score was 986. The same year it won the Interstate on an aggregate of 989 points.

Below are the detailed scores of both matches:

INTER-STATE MILITARY MATCH.

Open to one team from each State or Territory in the United States, consisting of twelve members of the regularly organized and uniformed National Guard or militia of such State or Territory, including the District of Columbia. Distances 200 and 500yds. Position, at 200yds., standing; at 500yds., prone. Weapon, any military rifle which has been adopted, authorized or issued as an official arm by any State or government. Ammunition, any. Prize—To the team making the highest aggregate score, a large bronze "Soldier of Marathon," presented by the Commander-in-Chief, on behalf of the State of New York, to be shot for annually, and to be held during the year by the Adjutant-General of the

COL. VAN VALEN. BRIG.-GEN. SPENCER. COL. OWENS.

State whose team may win it. Value, $350. Also a medal to each member of the winning team.

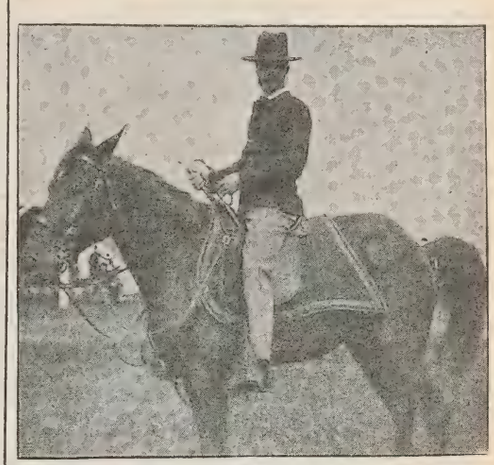
While the above contests were being fought out on the mid-ranges, half a dozen exponents of long-range work were pegging away over the thousand-yard range in the attempt to capture the coveted Wimbledon cup, which was won in 1890 and 1891 by Major Chas. H. Gaus, Inspector of Rifle Practice of the Third Brigade, N. G. N. Y., who came down to Sea Girt to defend his claim to the cup. With the existing weather conditions, on a range where cedar groves, sand dunes, ocean currents, etc., do not combine to worry the shooter, it would have required a big score to win the cup; but here they had the above combinations and Major Gaus had an easy victory with a total of 123, his nearest opponent having 112. Major Gaus used his .45-95-550 special Remington.

Among the entries in the cup match were Col. Cecil Clay, the one-armed commandant of the Second Regiment, D. C. M., who is never happy except when shooting; Capt. H. B. Cilly, also of the D. C. M.; Chas. E. Overbaugh, of New York, the old Centennial team man, who has not fired a shot at long range for many months previous to to-day; Col. A. R. Kuser, of the staff of Governor Abbett, also entered but for some reason failed to shoot his score.

WIMBLEDON CUP MATCH.

Open to all citizens and residents of the United States; distance, 1,000yds.; 30 shots; weapon, any rifle within the rules; cleaning allowed; position, any without artificial rest; entrance fee, $2. First prize: The Wimbledon Cup, presented by the National Rifle Association of Great Britain to the National Rifle Association of America, to be competed for on conditions to be decided upon by the National Rifle Association of America, and to be held by the winner till the next fall meeting, when it will be shot for on the same conditions. Value, $500:

Maj Gaus, .45-95-550 Rem.5443444453-40 4454544485-42 5382355555-41-123
H B Frey, .40-76-370 Win.4552053254-35 54r5455524-39 0454355453-38-112
Overbaugh.....27 31 withdrew on seventeenth shot.
H B Cilley, Springfield.....15 15 17—47
Col Clay, Springfield.....23 28 15—66
Hardenbrook, Springfield.....21 21 14—65



Whether it was politic or not to include the Wimbledon cup match in the programme is an open question. The shooting on the 1,000yds. target is done diagonally across the short and mid-ranges, the short ranges (ten targets) having to be closed while the match is in progress. The Wimbledon match yielded the Association $14. While match was being shot (it lasted from 1:30 to 5 P. M.) Wm. Hayes and August Begerow of Newark, L. P. Hansen of Jersey City, Ernest Fisher of Hoboken, and several others who had come down to shoot in the Schuetzen match were obliged to wait until after 5 P. M. before firing a shot, beside which, no one could shoot in the Members', Perrine or All-Comers' matches at 200yds.

In the evening, soon after the military matches were ended the New York team left for home as did the team of the First New Jersey.

The Pennsylvania boys had a quiet jollification at the Beach House, and after their return to camp they received the hearty congratulations of the other team members.

*Saturday, the Final Day,*

was rather quiet, the District team leaving for home at noon and several of the Jersey teams leaving the camp in the morning. During the afternoon W. B. Chapman, of the Thirteenth Pennsylvania, started in to fight Robling's and Horton's totals of 101 each in the Kuser match, and succeeded in getting an aggregate of 102. This gave him the handsome Maynard rifle presented by Col. A. R. Kuser. The rifle, which has a .22 and a .25cal. barrel, was packed in an elegant plush-lined case, and along with it went 100 .25cal. center-fire cartridges. Col. Kuser himself started in to win the association member's medal and succeeded by rolling up 24 points in 5 shots at 200yds. with a Springfield rifle. Capt. Stockham's 47 in the Perrine Memorial match, and Sergt. Frank Robling's 47 in the All-Comers' remained unbeaten up to 3:30, when

BUGLER MILLBURN.

"cease firing," sounded by Sergt. A. C. Millburn, announced that the meeting was at an end.

Immediately after the call was sounded Gen. Spencer and his assistants figured out the winners in the various contests, and before 5:30 every man who remained on the grounds had received whatever prize, if any, he had won. This was an entirely new experience to a number of the contestants, who were formerly obliged to wait several days before ascertaining whether they were winners or losers.

Below will be found full detailed scores of all the individual matches:

MEMBERS' MATCH.

Two hundreds yards, open only to members of the New Jersey State Rifle Association, rounds 5, position, standing, weapon, any military rifle; entrance fee $1. Prize, the members' championship gold badge, shot for annually and held by the winner during the year. To be shot at any time during the meeting. Won in 1891 by Col. A. R. Kuser.

Col A R Kuser.....55545 —24 Capt R A Reed.....44454—20
Capt Ed Gould.....54454—22

THE KUSER MATCH.

Seven shots at 500yds.; position, prone, head toward target; rifle, any military; open to all comers; entries, $1 each, or three for $2 if taken at one time. Prize—A Maynard sporting rifle with two barrels, one .22 and one .25cal., presented by Col. A. R. Kuser; second prize, 25 per cent. of the entrance money; third prize, 10 per cent. of the entrance money. All prizes to be won on the aggregate of three scores; ties in totals decided by the next best score or scores:

## Revolver Shooting in England.

AT the South London Rifle Club's competitions at Staines Aug. 25, there was a nasty gusty wind, the two revolver competitions resulted as follows: Series 1, stationary target:

Walter Winans....7 7 7 7 7 7—42 Andrews .....7 7 7 6 6 5—38

Mr. Winans's score is the first highest possible yet made at the new Risley 2in. bullseye in competition. Series 2, disappearing target:

Walter Winans....7 5 7 7 5 7—38 Major Mackerrell.2 3 4 2 5 6—22

The scores for the revolver championship of the club now stand:

| | | | |
|---|---|---|---|
| W Winans (present holder of the championship | 42 41 40—123 | Major Mackerrel | 41 37 36—114 |
| Andrews | 39 38 38—115 | C F Lowe | 36 36 36—108 |
| | | Heath | 37 35 33—105 |

## Cincinnati Rifle Association.

CINCINNATI, O., Sept. 11.—The Cincinnati Rifle Association held its regular practice shoot at its range to-day and made the scores as appended below. Conditions: 200yds., offhand, at the standard American target:

| | | | |
|---|---|---|---|
| Gindele | 80 79 77 | Brumbach | 70 70 64 |
| Best | 80 72 72 | Speth | 79 79 80 |
| Weinheimer | 71 78 70 | Stegner | 68 67 64 |
| Hauck | 61 59 53 | Topf | 63 63 62 |
| Payne | 76 76 75 | | |
| Drube | 80 72 68 | | |
| Martin | 63 58 58 | | |

## Garden City Rifle Team.

THE Garden City Rifle Team met for their weekly contest Tuesday evening, Sept. 6 at Burley & Erickson's shooting gallery, 146 South Halsted street, Chicago. Conditions were 25yds. 25 shots each, open sights, free off-hand position, Massachusetts paper target, possible 300 points:

| | | | |
|---|---|---|---|
| W J Gibbs | 264 | Roy Taylor | 258 |
| A McBean | 264 | Mrs L Thornton | 255 |
| H G Burley | 264 | M Tatroe | 255 |
| C A Hankle | 260 | F Erickson | 253 |
| Wm Frisbie | 251 | | |
| R McBean | 251 | | |
| J C Martin | 250 | | |
| John Polites | 248 | | |

After the regular shoot a sweepstake was shot for and won by M. A. McBean, scoring 111 out of possible 120. B.[illegible]

## The A. Lischke Riflemen.

JERSEY CITY, Sept. 10.—The following scores were made by some of the members of the A. Lischke Rifle Club on Sept. 2 at their range, 17 Milton avenue:

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| Lischke | 25 | 24 | 24 | 24 | 24 | 24 | 24 | 23 | 23 | 22—237 |
| Scharli | 25 | 25 | 25 | 25 | 24 | 24 | 23 | 23 | 21 | 18—233 |
| Schulte | 25 | 22 | 22 | 22 | 22 | 21 | 21 | 20 | 20 | 1[illegible]—213 |
| Dyroff | 25 | 21 | 22 | 21 | 21 | 21 | 21 | 19 | 19 | 19—211 |
| Seidel | 24 | 22 | 22 | 22 | 21 | 21 | 21 | 19 | 19 | 15—207 |

O. SCHULTE.

# Trap Shooting.

All ties divided unless otherwise reported.

## FIXTURES.

If you want your shoot to be announced here send in notice like the following:

Sept. 15-16.—Vienna (Ill.) Gun Club tournament.
Sept. 20-21.—Auburn Interstate Tournament.
Sept. 20-23.—Saratoga (N. Y.) Gun Club, annual tournament.
Sept. 23.—White Plains (N. Y.) Gun Club tournament. L. C. Platt, Jr., Treas.
Sept. 27-Oct. 1.—Grand five days' tournament at Mt. Sterling, Ky.
Sept. 28-29.—Womelsdorf (Pa.) tournament.
Sept. 29-Oct. 1.—Peekskill (N. Y.) Gun Club tournament.
Oct. 5-6.—West End Gun Club tournament, at Ottumwa, Iowa.
Oct. 4-7.—Chas. Polster's tournament, Indianapolis, Ind.
Oct. 5-7.—First annual tournament of the Riverside Gun Club, at Red Bank, N. J. First two days targets, last day live birds John P. Cooper, Sec'y.
Oct. 11.—Eastern New York League kingbird tournament, with Cruttenden & Cords new trap and pull, at Canajoharie, N. Y. T. C. Pegnim, Sec'y.
Oct. 12-13.—Wilmington (Del.) Rod and Gun Club tournament.
Oct. 18-20.—Highland Gun Club annual fall tournament, at Des Moines, Iowa.
Oct. 19-20.—Somerville Gun Club tournament, Somerville, N. J.
Oct. 21.—New Jersey Shooting Club tournament, at Claremont, N. J.
Nov. 23-26.—Milwaukee (Wis.) tournament, targets and live birds.
May 23-25, 1893.—Knoxville Gun Club tournament, $1,000 added to purses. Also valuable merchandise prizes.

## DRIVERS AND TWISTERS.

The following has been received from H. A. Penrose, president of the Interstate Manufacturers' and Dealers' Association: "Referring to the article under "Drivers and Twisters" in your issue of the 1st inst. regarding the conflicting dates of the Interstate tournament at Auburn and the Saratoga shoot we beg to say that it was impossible to change our dates when we learned that the Saratoga Club had claimed them, as the programs had been out for some time. We wired Mr. Levengston, of Saratoga, about Aug. 1, asking him if their tournament had been postponed and he informed us that it had and that it would be held the last week in September. Mr. Tuttle, of Auburn, also wrote him at the same time and received a similar reply. It was our intention then to hold the shoot at Auburn on Sept. 13-15, but we found that we could not get the fixtures there from New London and so decided on the 20th and 21st. The Saratoga people, learning that the Peekskill Club were going to hold their shoot on the last week, decided to hold their tournament on the fourth week, but did not notify us of the same. The Auburn shoot will positively take place on the 20th and 21st inst. and we have every assurance that it will be a grand success. In this connection we beg to say that last October we claimed the second week in each month for the Interstate tournaments, but as we have had so much influence brought to bear we have been compelled to change our dates almost every month in order to try and please somebody. We have received from two to twelve letters from different clubs every month asking us to change our dates and with one exception we have complied. We shall be pleased to have you make note of this in this week's issue of the FOREST AND STREAM. We regret that we are unable to change our dates to accommodate the Saratoga boys."

The daily programme during the tournament of the Saratoga (N. Y.) Gun Club, Sept. 20-23, inclusive, will be as follows: Event Nos. 1 and 10, 10 kingbird targets, $1 entry; Nos. 2, 6 and 8, 10 targets each, $50 guaranteed, $1.75 entry; Nos. 3 and 7, 15 targets each, $75 guaranteed, $2.75 entry; Nos. 4 and 9, 20 targets each, $10) guaranteed, $3.75 entry; No 5, 25 targets, expert event, $25 added to purse by the Saratoga club, $5 entry. Excepting in Event No. 5 each day, the contestants will have to shoot under Paul North's sliding handicap. In the 10 target events the moneys will be 40, 30, 20 and 10 per cent.; 15 targets, 24, 22, 20, 18 and 16 per cent.; 20 targets, 22, 20, 18, 16, 14 and 10 per cent. The following will be the average prizes for all guaranteed events during the four days: First, $22; second, $18; third, $16; fourth, $14; fifth, $12; sixth, $10; seventh, $8. The Saratoga Club has secured reduced hotel rates, and will take care of all shells or guns sent to them. In Event No. 5 each day all ties will have to be shot to a finish, ties to be shot off miss-and-out.

At the tournament of the Lundonville (N. Y.) Gun Club on Sept. 6, first average was won by Levengston, of Saratoga, on 91 per cent Gove, of Albany, was second with 90; Roberts, of Rupert, Vt., third with 89. In the match open to teams of two men from any one club, there were eight entries. The purse was divided into four moneys. First was won by the Saratoga Team No. 1, second divided by the Philmont and Trojan gun clubs, third won by the Capitol City Gun Club of Albany, fourth won by the Saratoga team No. 2. Fair weather favored the tournament though there was a puffy wind that bothered the marksmen considerably by giving the birds a crazy flight. This condition gave something of zest to the sport, however, and enhanced the praiseworthy character of the records.

The Auburn Gun Club is fully prepared for the Interstate tournament to be held there next week. Everything to insure success is being done. Keystone targets will be used and every guaranteed event will be shot, be the entries few or many. With reference to the conflict of dates between this and the Saratoga tournament, the Auburn Club desires to state that the Saratoga Club wrote that their tournament would be held during the last week of September. The date originally fixed for the Auburn shoot was Sept. 13-14, but this was changed to the then unclaimed date Sept. 20-21, to accommodate the Association in freighting its goods here. The club is sorry any misunderstanding should occur, as there are shooters who would doubtless like to attend both shoots.

Charles Polster writes us as follows anent his coming tournament to be held in Indianapolis, Ind.: "The tournament to be given under my management in this city, Oct. 4, 5, 6 and 7, promises to be more largely attended than any former Indianapolis shoot. The first two days will be given to inanimate targets. Oct. 6 and 7, to sparrows and live black birds. About $500 in guaranteed purses, cash donations and special prizes will be offered. The shoot is open to all—North handicap system. The black bird shooting will be a novel feature and the various attractions will make it an unusually interesting tournament for all participants. I can furnish programs on application."

At the semi-monthly shoot of the Union Hill Gun Club, at Guttenburg, N. J., John Waller won the gold medal by breaking 16 out of 25 bluerocks shot at by each man. J. Woolmington got the beer medal with 9 and P. Sullivan and H. Lange shot 8 and 4 respectively. In the first sweepstake J. Waller shot 7 out of 10, F. Hall and J. Woolmington 5 each, H. Lange 3, and P. Sullivan 1. In the second Hall dropped 6, J. Waller, J. Woolmington, L. Westervelt and H. Lange 5 each, and P. Sullivan 4. In the third P. Sullivan made a goose egg, Waller 7, Westervelt 6, Lange 2 and Woolmington 1.

At the Standard-Keystone Tournament, held at New London, Conn., Aug. 30 to Sept 2, Wm. Wolstencroft, of Frankford, Phila., made the best record in the trophy events, breaking 50 straight; and in shooting off the tie broke 24 out of 25; and the second time, again shooting off a tie, broke 25 straight—an aggregate score of 99 out of a possible 100, using the new U M C "smokeless" shell. Mr. Van Dyke, of Newark, N. J., won the individual championship of America, breaking 98 out of a possible 100, using the V. L & D. "lightning" shell.

The Wawaset Gun Club, Wilmington, Del., has elected the following officers for the ensuing year: President, Charles Springer; Vice-President, T. D. Buckmaster; Treasurer, Thomas Weldin; Secretary, W. J. Tussey, No 214 King street; Financial Secretary, W. E. Buckmaster; Captain, Robert Miller; Quartermaster, C. M. Buckmaster; Directors, George Miller, Fred Martin, Eric Camp.

An organization called the Mountville Gunning Club has just been formed at Mountville, Pa. The officers are: President, Edward Kready; Vice-President, Henry Deitrich; Secretary, E. L. Hambright; Treasurer, Al. Kready.

The following scores were made by members of the Auburn (N. Y.) Gun Club on Sept. 6 at 25 targets each: Class A—Tuttle 18, Carr 18, Devitt 8. Class B—Garrett 18, Vanderloo 16, St. Clare 12, Doan 10. Class C—Goodrich 14, Kerr 11, White 11.

A gun club has been formed in Linc. Lexington, Pa. George Kister is president, Amos Wismer secretary and Barry Weikel treasurer.

The National Gun Club, of Elgin, Ill., has elected D. A. Ridde secretary and Joseph Graves treasurer.

The Rochester (N. Y.) Rod and Gun Club will have a merchandise shoot on Oct. 5.

The Wenond Shooting Club has been organized in Bay City, Mich.

The Shenandoah (Pa.) Gun Club is one of the latest comers.

C. H TOWNSEND.

## The Old Stone House Grounds.

A SMALL party gathered in John Erb's Newark shooting grounds on Labor Day and tried their skill on live birds with the results appended. Event No. 15 was at 10 live birds, $10 entry; No. 16 at 5 birds, $5 entry, and each of the others at 4 birds, $3 entry:

## Oneida County Sportsmen's Association.

UTICA, N. J., Sept. 9.—The following scores were made at the shoot of the Oneida County Sporsmen's Association to-day:

Badge shoot, 25 kingbird targets from 5 K. B. traps:

| | |
|---|---|
| Mayhew | 1111111111111111111111111—25 |
| Hunter | 1111111111111111111111111—25 |
| Smyth | 0110011011111111010101101—17 |

Tie:

| | | | |
|---|---|---|---|
| Mayhew | 11110—4 | Hunter | 11111—5 |

Club shoot, same conditions: Knowlton 24, Kallies 24, Hunter 25, Mayhew 23, Pfeiffer 20, Smith 22, Henning 14, Dexter 29, Gilmore 16, Lane 15, Wheeler 18, Mizner 17, Harris 24.

## Watson's New Park.

CHICAGO, Ill., Sept. 6.—The first shooting on John Watson's new grounds, at Burnside, occurred to-day in the Stevens-Hall match, and the spectators in that event took great interest in looking over the new park. The grounds are west of the old ones, and about a quarter of a mile or less from the railroad station. The electric cars run from the station directly past the grounds, which lie on top the hill. Access by means of this street railway line will be as handy as before, and indeed will not require so long a walk.

The elevation of the new grounds is slightly more than that of those recently vacated, and there is an unimpeded sweep for the wind in every direction. The location is more sightly than the old one, being in view of the wooded ridges which lie back to the west, toward Morgan Park and Washington Heights. The ground is perfectly level. From the fact that all visible buildings lie beyond the line of the traps, while some low barns and buildings are in the left near the road, it is likely that the grounds will be as hard and fast as the old ones, for the birds will be mostly drivers and left-quartering drivers, with north or northwest wind behind them in the winter.

Mr. Watson has moved over the club house and trapping house from the old grounds, and is busy putting up the fence and laying out the grounds. The score will be parallel to the glass-front club house, and the platform from the house to the score will be covered by roof all the way. The position of the target traps will be as before, back and to the right of the house, and the general arrangement of the grounds will be much the same.

The King traps will be in in about thirty days, and the Chicago shooters will soon be at work at their old headquarters. E. H.

## The Unknown Gun Club.

THERE was a good crowd of shooters and friends at the regular monthly meeting of the Unknown Gun Club at Dexter Park, L. I., on Thursday, Sept. 8. The competition was for the best average scores for the championship cup won by the Unknowns in last year's Dexter Park League contest and the usual club prizes. Each man shot at seven birds, club handicap, modified Long Island rules. E. A. Vroome took the first money with seven straight and the others were divided. The scores:

Shoot for championship trophy and extra prizes:

| | | | |
|---|---|---|---|
| H Van Staden | 0101002—3 | C Hubbell | 1120100—4 |
| M Brown | 1121021—6 | W Merrihew | 2000122—4 |

## The Fountain Gun Club.

SOME good scores were made by the members of the Fountain Gun Club, at Woodlawn Park, Gravesend, L. I., on Wednesday, Sept. 7. It was the regular monthly meeting of the club for the best averages to count for the annual prizes. Ten members competed at 10 birds each, club handicap. "Wanda" did not shoot as well as usual, the three fast right-quartering incomers being too much for her to stop. In the sweepstake shoot that followed, Dr. Wynn, the veteran had a good race against R. Phister, Jr., the rising wing shot, the latter killing 17 straight and outshooting the doctor. The scores:

Shoot for best averages for the annual prizes, 10 birds:

| | | | |
|---|---|---|---|
| Dr Wynn (28yds) | 1101111122— 9 | "Wanda" (28) | 1121000011— 6 |
| C Plate (25) | 0110122101— 7 | C Wingert (28) | 1111111111—10 |
| W Stewart (25) | 2112012112— 9 | R Graves (28) | 1001101000— 4 |
| J E Orr (25) | 2221111111—10 | R Phister, Jr (28) | 2111211112—10 |
| M Lindsley (28) | 2221022112— 9 | W Schumacher (25) | 2010212001— |

## Woodruff Wins the Bender Medal.

THE Central Gun Club, of Elizabeth, N. J., held a shoot at Gantzler's Grove on Labor Day, there being two 10 bird events on the programme, one for the club medal and the other for the Bender medal. The scores:

Club Shoot.

| | | | |
|---|---|---|---|
| Bauman | 0111111111—9 | Ems | 1111100011— |
| Anthes | 1111110111—9 | Slater | 1111100101— |
| Angel | 1111110011— 8 | | |

Bender Medal Match.

| | Tie. | | Tie. |
|---|---|---|---|
| Woodruff | 1111111111—10 | Dackerman | 1111111110— |
| Harkard | 1111111111—10 | Anthes | 1111110011— |
| LaMoot | 1111111110— 9 | Slater | 1111011110— |
| Cement | 0111111111— 9 | | |

## Shooting at Dexter Park.

A QUIET afternoon's sport was indulged in on Friday, Sept. 9, at Dexter Park, S. I., by some prominent Long Island officials and business men in shooting at a picked lot of birds. The following score will show the result of the shoot. The lowest man to pay for the birds: The score, 25 birds each: J. Schlieman 14, L. Eppig 17, A. Eppig 21, H. McLaughlin 13, T. Kerrigan 18, C. Engelbrecht 16.

Sweepstakes at 10 bluerocks. No. 1: L. Eppig 9, J. Schlieman 2, T. Kerrigan 3, A. Eppig 9, C. Englebrecht 7. No. 2, 5 birds: L. Eppig 4, J. Schlieman 1, A. Eppig 3, C. Engelbrecht 3.

## Match Shoot at Athens.

ATHENS, Pa., Sept. 1.—Following are the scores made here on Aug. 31 in a match between Will K. Park, of the Wilkesbarre Gun Co., who was spending a few days' vacation at his home in this place, and Wm. von Wolfradt, of Athens, who is one of the best live-bird shots in the county. The match was at 50 single bluerock targets, 3 traps, unknown angles, for $10 a side. Wolfradt shot a 16-gauge gun at 14yds. rise, and black powder. Park used a 12-gauge Wilkesbarre gun of cheap grade and stood at 16yds. rise, 3drs American wood powder and 1¼oz. No. 7½ chilled shot:

| | |
|---|---|
| W K Park | 1111111111111111111101111111110111111111111110111—47 |
| W von Wolfradt | 0111111111111011111101111111011111111111111111111—45 |

## The Acme Gun Club.

THE attendance at the regular monthly shoot of the Acme Gun Club was very poor on Tuesday at Dexter Park, L. I. T. Short won the medal with a score of 12 out of 20. Several sweepstakes were shot off after the shoot, but the scores were poor. The scores were:

Club shoot for medal and best averages, 29 birds:

| | | | |
|---|---|---|---|
| C Dethloff | 0011000110110010101—10 | C Menkel | 1010000001010010111 0 — 8 |
| T Short | 1111010000011111110—12 | J Rausch | 0001010010010010110— 7 |
| W Vorb'ch | 0100010000031110101— 8 | | |

## The Manhattan Gun Club.

THE regular shoot of the Manhattan Gun Club, at Dexter Park on Wednesday, Sept. 7, was poorly attended, only five being present to compete for the club medal. Three out of the five tied with 6 each, and as D. Monsees was a previous winner he could not shoot off in the tie. H. Bord won the trophy. The scores:

| | | | |
|---|---|---|---|
| D Monsees (27) | 1012121—6 | L P Delfa (22) | 0222112—6 |
| F Lambrecht (22) | 0012210—4 | H Bord (22) | 1102211—6 |
| J A Hoffman (25) | 0010212—4 | | |

## Michigan Trap Shooters' League.

SAGINAW, Mich., Sept. 9.—The tournament of the Michigan State Trap Shooters' League, under the auspices of the West Side Gun Club, was held in this city Sept. 6, 7 and 8 The members of the Gun Club got out an attractive programme with a fine prize list and made every preparation for a large attendance of visiting shooters, but the shooters came not, and why nobody knows. The Michigan League has a large membership, any club holding a tournament under the league management must according to the by-laws of the league, send a team to each subsequent tournament given by the league or forfeit the sum of $10 as a fine imposed. With the exception of Bay City, a neighboring town, which sent several shooters, there were barely any visitors except a few, and these few had the longest journey to make of all those who comprise the league. It seems strange that such should have been the case when Saginaw's hospitality is known almost the world around. Saginaw, Oshkosh and Kalamazoo, these three, not the three graces exactly, yet he who has not heard of them must be blind and deaf, and not of the Anglo-Saxon race. The greatest of these is Saginaw; 'tis here that Wm. B. Mershon, that prince of good fellows, resides in a home palatial. As a sportsman of the very first water he ranks almost alone in his class. Many, many times have the readers of FOREST AND STREAM been entertained with bright, newsy articles from his pen. It was his generous, kind, good nature that gave them this, for it takes care and time to write an article, and to find the time must have been a great inconvenience personally, as he has an even half thousand men in his employ. For 34 years from the day he first saw the light he lived a life of single blessedness, and then one day Billy (everybody calls him Billy) surprised his friends and everybody by bringing home a wife, a pretty wife. Now there is a fair-haired youngster who says he is "Little Billy," and talks of geese and ducks, of trout and grouse, of quail and snipe, of dogs and guns, just like his noble dad. We are drifting away from the shooting tournament, but just one word more. We were, through Mr. Mershon's courtesy, shown the famous car "Saginaw," of which the readers of FOREST AND STREAM have so often heard, and which in its varied travels with hunting and fishing parties has covered a distance sufficient to encircle twice this little ball we call the earth. The car is a model. It contains everything essential for a sportsman's comfort. Soon it will start with a jolly party, bound for the immense stubble fields of far-off Dakota in pursuit of ducks and geese, and we trust that FOREST AND STREAM will give an account of same.

*The First Day.*

Nobody here to-day except John Parker of Detroit and the local shooters. About noon J. R. Cotter, F. Meidlein, E. F. Flues and Mr. Williams, of Bay City, Mich., arrived. The shoot goes on just the same, although the club is losing money on its guaranteed purses, as they do not half fill. Parker wins first average to-day and Cotter wins the second average. Scores:

No. 1, 10 singles; entrance $1.30: Parker 10, Breck 9, Flues 6, Cotter 8 Herman 5, Keller 8, Lee 9.

No. 2, 10 singles, entrance $1.30: Parker 9, Breck 8, Lee 6, Keller 9, Flues 6, Cotter 7.

No. 3, 10 singles; entrance $1.30: Parker 8, Keller 5, Breck 9, Flues 8, Cotter 8.

No. 4, 15 targets, entrance $1.75: Breck 9, Parker 13, Flues 10, Cotter 13, Lee 11, Carpenter 10.

No. 5, 20 targets, entrance $2.60: Parker 16, Cotter 10, Lee 16, Flues 17, Meidlein 16, Breck 14, Herman 11, Williams 17.

No. 6, 15 targets, entrance $1.95: Williams 10, Flues 11, Parker 13, Meidlein 11, Lee 12, Breck 9, Cotter 13, Carpenter 8, Herman 9, Delonjay 10

No. 7, 25 targets, merchandise, entrance, price of targets:

First, Williams, $10; second, Bowden and Parker, $10; third, Meidlein, $10; fourth, Cotter, $5; fifth, Breck, $5; sixth, Lee, $5; seventh, Zschoener, $5.

No. 9, 10 targets, entrance $1 30: Parker 8, Cotter 10, Williams 11, Delongjay 7, Flues 7, Meidlein 8, Breck 9, Bonden 8.

No. 10, 15 targets, entrance $1.95: Williams 12, Cotter 10, Breck 10, Parker 14, Meidlein 13, Bowden 13.

No. 11, 10 targets, entrance $1.30: Parker 8, Bowden 8, Schoemberg 6, Cotter 9, Flues 7, Breck 8, Williams 8.

Extra sweep, 10 targets, entrance $1.30: Cotter 7, Parker 10, Carpenter 6, Breck 8, Flues 5, Williams 7, Schoemberg 6, Bowden 8.

*The Second Day.*

The only fresh shooters to arrive this morning was Ben O. Bush, of Kalamazoo, and Bert Robinson, of Flint. The programme today was again carried out in full. Parker again wins first average, and Williams, of Bay City, the second average. There was to have been a business meeting of the league to-night, but there is nobody here to meet. Scores:

No. 1, 10 targets, entrance $1.30: Williams 10, Turner 9, Cotter 6, Bastian 8, Held 6, Parker 9, Herman 7, Bush 7, Flues 9, Lee 8, Bonden 6.

No. 2, 10 targets, entrance $1.30: Williams 9, Flues 8, Parker 8, Turner 7, Bang 7, Herman 7 Lee 8, Cotter 8, Bonden 8.

No. 3, 15 targets, entrance $1.95: Williams 9, Bonden 13, Flues 11, Cotter 12, Lee 11, Parker 14, Bang 9 Turner 14.

No. 4, 15 targets, entrance $1.95: Parker 12, Turner 8, Bonden 8, Williams 14, Flues 14, Kellar 15, Cotter 13, Carpenter 13, Herman 12, Held 8, Bastian 8, Merrill 6, Lee 11, Delonjay 12, Robinson 11.

No. 5, 10 targets, entrance $1.30: Kellar 9, Williams 9, Flues 10, Parker 9, Bang 9, Merrill 6, Carpenter 9, Ward 5, Bastian 6, Cotter 8, Lee 8, Bonden 6, Brick 8, Flading 6.

No. 6, 15 targets, entrance $1.95: Flues 10, Parker 13, Williams 12, Carpenter 14. Merrill 9, Cotter 12, Bastian 10, Held 8.

No. 7, 15 targets, entrance $1.95: Carpenter 14, Parker 12, Williams 11, Flues 13, Bastian 8, Krogman 9. Merrill 8, Cotter 12, Herman 8, Schoenberg 5, Keller 13, Held 11.

Twenty targets, entrance $2 60, $50 guaranteed:

No. 8, 10 singles, 50 cents: Drake 10, Van Ider 7, Fisher 5, C. Dean 7, Eager 7, Parry 7. Youmans 7. Collins 5, W. Smith 10.

No. 9, 10 singles. 75 cents: Drake 7, C. Dean 8, Van Ider 6, Youmans 8, Collins 9, W. Smith 9, Eager 8, Fisher 6, J. L. Smith 9, Parry 9, Reeve 7.

No. 10, 15 singles. $1: Hedden 11, W. Smith 15, C. Dean 9, Van Ider 9, Fisher 8. Reeve 6, J. S. Smith 13, Collins 13, Youmans 12, Parry 9, Eager 7, Drake 14.

No. 11, 15 singles: W. Smith 13, J. L. Smith 12, Van Ider 9, Hedden 13, Drake 14, C. Dean 10, Parry 10, Yeomans 11, Collins 7, Williamson 12, Dr. Fisher 13, Jackson 11.

No. 12, 10 singles: W. Smith 9, C. Dean 6, Eager 6 Van Ider 6, Reeves 5, Drake 8, Jackson 8, J. L. Smith 8, Hedden 10, Dr. Fisher 6, Yeoman 5, Collins 8, Parry 6, Williamson 9.

No. 13, 10 singles: W. Smith 8. Hedden 8, J. L. Smith 10, Van Ider 9, Yeomans 9. Dr. Fisher 8, Jackson 6, C. Dean 8, Drake 10. Collins 7, E. D. Miller 7, Eager 6.

No. 14, 10 singles: W. Smith 8, Fisher 7, Reeve 7, Van Ider 8, Yeomans 9, Hedden 10, C. Dean 9, Jackson 7, J. L Smith 5, Drake Miller 10, Parry 9.

Extra No. 1, 10 singles, 50 cents: Hedden 8, W. Smith 6, Drake 9, Jackson 7, Reeves 9, Dr. Fisher 5.

No. 2, 15 singles, 50 cents: Hedden 7, W. Smith 6, Drake 8, Fisher 2, Jackson 5. Reeves 5.

No. 3, 75 cents: Hedden 8, J. L. Smith 9, Drake 9, Yeomans 5, Sickley 8, Fisher 7, Miller 10, Connor 6, D. Connor 6, W. Smith 10, Collins 8, Dean 10.

No. 4, 10 singles: Sickley 10, Dean 7, Fischer 7, D. Connor 6, Van Ider 5, J. L. Smith 8, Hedden 9, W. Smith 8, Miller 10, Connor 8, Drake 9, Reeve 7.

No. 5, 10 singles, 75 cents: Sickley 10, Fischer 5, Reeve 9, D. Connor 9, Egger 4, J. L. Smith 6 W. Smith 8, Miller 10, J. Connor 8, Van Ider 6, Drake 7, Hedden 8.

## Wilkesbarre.

WILKESBARRE, Pa., Sept. 4.—Following are the scores made at the practice shoot on the Wilkesbarre Gun Co.'s grounds on the 3d. The attendance is increasing each week and shows the growing popularity of this sport. Some of the amateurs are beginning to show an improvement:

Score at 10 single bluerocks, known angles:

| | | | |
|---|---|---|---|
| E H K | 0100111111—7 | Dr Butler | 0101110011—5 |
| Evens | 0011101111—7 | Edwards | 0010010101—4 |
| Ash | 1111000011—7 | Barnes | 0101100001—4 |
| Crone | 0011101011—6 | Ricketts | 0010100011—4 |
| Park | 1001111001—6 | Kane | 0010000110—3 |
| Snyder | 1100110011—6 | E Butler | 0100100010—2 |
| Harris | 0110101110—6 | Arnold | 0010010000—2 |

Second match, 10 singles, unknown angles:

| | | | |
|---|---|---|---|
| E H K | 1101111111—7 | E Butler | 0001010011—4 |
| Barnes | 0010111111—7 | Caffery | 0011001001—4 |
| Park | 1101111100—7 | Evans | 0010100010—3 |
| Harris | 1110111001—7 | Kane | 0100001100—3 |
| Ash | 1010111110—7 | Snyder | 0000101100—3 |
| Crone | 0101100111—6 | K Arnold | 0001000101—3 |
| Edwards | 1010001101—5 | William | 0001000010—2 |
| Dr Butler | 1001001010—4 | Gilligan | 1000000000—1 |
| Ricketts | 0000110110—4 | | |

Third match, 10 singles, known angles:

| | | | |
|---|---|---|---|
| E Butler | 1101011111—8 | Ricketts | 1001101011—6 |
| Harris | 1111011011—8 | Ash | 1110011100—6 |
| Evans | 1001101111—7 | Dr Butler | 1101000100—4 |
| Edwards | 1110111100—7 | William | 1111000000—4 |
| Kane | 1010111101—7 | Caffery | 1100101001—5 |
| Gilligan | 0001101111—7 | | |

*Sept. 11.*—Following are the scores made Sept. 10. The crowd was not as large as usual, but those who attended thoroughly enjoyed themselves, as the day was a perfect one for trap-shooting. Although the shooters came from different parts of the city, all used Wilkes-Barr guns and American wood powder, with the exception of one man.

First match, 25 single bluerocks, known angles: E. H. K. 21, W. K. Park 20, R. Crone 20, E. Roth 19, Burdick 13, M. Brown 13, Wm. Jones 12, Cyclone 11, Griffith 6.

Second match, 25 bluerocks: E. H. Kniskern 25, W. K. Park 20, R. Crone 19, E. Roth 18, W. Jones 15, Cyclone 13, W. Brown 13.

## New Utrecht Rod and Gun Club.

THE weekly shoot of the New Utrecht Rod and Gun Club for the gold and silver medals at 20 Keystone targets, took place on Saturday, Sept. 10, at Woodlawn Park, L. I. D. Dearon, C. W. Wingert and A. A. Hegeman tied for the first with 15 each. C. Wingert was awarded the trophy as the two others were previous winners. In the sweepstake shoot that followed C. Wingert and R. R. Street divided first, and D. Blauvelt took second.

Club shoot for gold and silver medals:

| | | | |
|---|---|---|---|
| Deacon | 0101110001111101111—15 | Wingert | 1001111110101011111—15 |
| Sykes | 0010001110001010000— 6 | Wynn | 0110101000011010010— 8 |
| Street | 1100110001111111010—13 | Hekman | 1110111110110101101—15 |
| Blauvelt | 0100101011111110001111—12 | | |

## Garfield, of Chicago.

CHICAGO, Sept. 3.—*Editor Forest and Stream:* The Garfield Gun Club still preserves the even tenor of its way and a very successful season is drawing to a close, only few more shoots remaining. There will be some close finishes for the honor of possession of the class medals. The attendance at all shoots has been larger than ever before and the average percentage of marksmanship has been a marked improvement over the past. One very noticeable change has been in the gradual substitution of nitro powders in place of black powder, till not over 5 per cent. of the shooters use black powder.

The boys are dropping away one by one on their fall vacations, but it seems to make but little difference in the attendance, the cooler weather bringing out those who cannot endure the torrid summer sun. There are two or three individual matches talked of among the boys, but I do not know what will come of them yet. That is the way it goes; some one makes a good score and straightaway he dreams he is a world beater and "has it down fine," only to drop back to mediocrity the next week. Below are the scores of our medal shoot and some sweepstake shooting:

Medal shoot, at 20 U. S, pigeons, 5 traps, known angles, rapid firing:

| | | | |
|---|---|---|---|
| "Cop" | 0101101111111111111—17 | Bortree | 0011101101111100110—13 |

## The Utah Championship.

OGDEN, Utah, Sept. 3.—A. J. Dermody, of this city, won the championship medal of Utah for the second time on Aug. 28, defeating M. B. Brown, of Salt Lake City. The medal was put up by Browning Bros., one of the largest dealers in sporting goods west of Chicago. The conditions were 40 singles and 10 pairs of bluerock targets, 5 unknown traps:

W. DERMODY, Club Sec'y.

## Highland vs. Northwestern.

CHICAGO, Sept. 3 —I send you scores of the shoot held at Highland Park Gun Club grounds. This club has reorganized and is now one of our strong clubs. This shoot was a friendly contest between the Highland Park Club and the Northwestern Gun Club of Avondale. This style of shooting is becoming popular in and around Chicago and is helping to increase the attendance and membership. Match shoot No. 2:

| Highland Park Team. | | Northwestern Team. | |
|---|---|---|---|
| F Ellis | 0111111111101101101—16 | Jefferson | 1111000111110110*001—13 |

## Central Illinois Fourteenth Annual.

JACKSONVILLE, Ill., Sept. 8.—This year is the fourteenth milestone in the history of the Central Illinois Sportsmen's Association, and to-day is the last of the three days' tournament which marks the annual meeting. The "convention" is really only a meeting for the election of officers. Nothing is done in the way of game protection, and trap shooting is the only working purpose of the body, which exists for the convenience of shooters who cannot always conveniently attend the big June tournaments of the Illinois State Association in the northern part of the wide realm of Illinois. The attendance from neighboring towns was fair, though some towns, such as Jerseyville, did not send the expected contingent. The Crosby family, of O'Fallon, was well represented, the father of the family, Mr. George Crosby, being on hand with two sons, the well-known Billy "Westfield" Crosby and a younger brother. That slender but incisive youth, Billy Duer, was on hand in every shoot, though Chauncey Powers was absent, for a wonder. Mr. G. W. Rexroat, of Virginia, added to his growing reputation as a combination shooter by going through all the association and extra shoots in the front rank, and winning the association average prize, an $80 hammerless.

The strong local men, Stice, Strawn, Scott, Johnson and others, kept things very lively at the score when they were around, and were hot company, of course, for any class. The scores do not show very high records for any shooters, but this is largely accounted for by the fact that the grounds are not fast at all, lying a bit up grade as they do, and with a puzzling cross light. Only 5 traps were used, bluerocks, with Paul North electric pull, and the angles were known in nearly all shoots. It did no good, sometimes, to know which way the No. 5 left-quarterer was going, for it was a very fast and difficult bird, and responsible for far more than one-fifth of the misses.

The grounds at Jacksonville are well located, at an easy ride by electric car down a wide and very pleasant street. The little city itself is very clean and sightly, and there are many worse places to attend a shoot or pass a day. Arrangements at the grounds were all that could be asked, and a very good lunch was served by a colored gentleman in an open tent. Good weather favored the enterprise until the last day, this morning being so wet that no shooting of consequence was done until afternoon. The shooting closed with the most interesting event of the tournament, a fifty-bird sweep between Messrs. Heikes, Scott, Dick, "White" (Duer) and Strawn. This was watched closely and afforded some entertainment. It would seem that more long events like this would save time and be better and more desirable than these interminable and monotonous little ten-bird target sweeps.

There were no live birds shot this year at all, the management having lost money on birds last year, and it being difficult to get good ones now.

Veteran Jim Steel seems to be doing well in the mercantile business, and his tobacco store and hall make the headquarters for local shooters. Jim has not changed a hair in the last five years, except to grow a little smoother, and if possible more dignified. He could not get out to shoot very much, but apparently enjoyed it as much as ever when he was looking over his Parker barrels.

Rolla Heikes was the only shooter down from Chicago, and was loser on the shoot, a severe cold stiffening him up so he hardly went his gait. Rolla had the misfortune to have his pocket picked on the train going down and lost quite a sum of money.

Big Tom Marshall, of Keithsburg, left his handwriting on the wall for two days, but left at noon to-day to attend to some of his Mavoring business at home.

The Association secretary, Mr. J. B. Johnson, is to be complimented upon the prompt and convenient system used in keeping up the records, and upon his success as a manager. He and Billy Duer, the treasurer, ran the window in very satisfactory fashion indeed. Personally I wish that all tournament managements were as good. Such treatment permits one to come away with a naturally sweet disposition quite unruffled. These two men were rightly re-elected.

At the convention the following officers were elected for the ensuing year: President, Mr. Geo. Crosby, of O'Fallon; Vice-President, Mr. Thomas Marshall, of Keithsburg; Secretary, Mr. J. B. Johnson, of Jacksonville; Treasurer, Mr. W. S. Duer, of Jacksonville. The executive and other committees will be appointed by the president later. Jacksonville was selected as the place for next year's tournament.

The following are the scores as shot:

*Tuesday First Day, Sept. 6.*

No. 1, open, 10 bluerocks, $1: Taylor 8, Ransom 9, Rex 8, White 9, St. Clair 9, Harding 8, Scott 8, Wernecke 6, Dick 10, Ennis 4, Johnson 8, Westfield 10, Strawn 10, G. Crosby 8, Wright 3, Gilbert 7.

No. 3, open, 15 bluerocks, $2.50: Taylor 15, St. Clair 14, Heikes 12, Harding 14, Strawn 13, Sanders 14, Scott 13, Dick 11, Westfield 10, Gilbert 13, Johnson 11, Rex 15, Ransom 9, Wernecke 12, White 13, Hawks 12.

No. 5, open, 20 bluerocks, $3: Heikes 18, Scott 17, Wernecke 11, St. Clair 17, Westfield 18, Taylor 14, White 14, Sanders 16, Dick 12, Rex 19, Strawn 18, Ransom 15.

Extra, 15 bluerocks, $2: Stice 13, Taylor 12, Westfield 14, Heikes 14, Gilbert 11, Todd 13, Hawkes 13, Harding 13, Strawn 18, Sargent 13, Dinsmore 7, Scott 12, White 12, Tremblett 9, J. Duer 13, St. Clair 13, Wernecke 9, Sanders 11, Johnson 7, Ransom 8, Dick 10, Rex 14.

Extra, 15 bluerocks, $2: Stice 15, Harding 10, Taylor 12, Westfield 15, Heikes 12, St. Clair 12, Wernecke 4, Gilbert 10, Hawks 11, Dick 9, Scott 13, Strawn 13, Sargent 10, Todd 10, Rex 14, White 9, J. Duer 10, Johnson 9, Sanders 11.

Extra, 15 bluerocks, $2: Heikes 12, Taylor 12, Dick 13, Westfield 13, Stice 14, Strawn 14, Scott 12, Sargent 12, Rex 14, White 13, Dinsmore 11, Gilbert 12, Harding 11, St. Clair 14, Marshall 7.

Extra, 15 bluerocks, $2: Heikes 14, Westfield 14, Taylor 15, Marshall 11, Scott 13, Rex 13, Sargent 10, Dick 10, White 12, St. Clair 10, Gilbert 9.

Extra, 10 bluerocks, $1: Rex 10, Scott 8, Heikes 8, Westfield 8, Crosby 7, Taylor 8, Marshall 9, Dick 4, Wernecke 7, Dinsmore 7.

Extra, 10 bluerocks, $1: Scott 7, Crosby 5, Strawn 10, Westfield 8, Taylor 8, Wernecke 8, Ransom 8, Rex 9, White 10, St. Clair 9, Dick 8, Wright 5, Johnson 6.

No. 2, Association, 12 bluerocks, $2: Strawn 9, Dick 7, Ransom 11, Taylor 9, Scott 9, Westfield 12, Gilbert 9, Crosby 8, Rex 10, White 9, St. Clair 10, Harding 10, Johnson 9.

No. 4, Association, 15 bluerocks, $2: Ransom 12, Westfield 13, Scott 13, Harding 14, St. Clair 13, Hawks 12, Taylor 14, Gilbert 13, Todd 13, Dick 9, Sanders 12, White 15, Strawn 15.

No. 6, association, 12 bluerocks, $2: Westfield 11, Scott 11, Gilbert 9, Todd 11, Hawk 9, Spink 8, Harding 12, St. Clair 9, Heikes 10, Dick 11, R. Duer 10, Rex 12, Taylor 11, Crosby, 8, Johnson 6, Strawn 10.

No. 7, open, 10 bluerocks, unknown angles, $1.50, $10 added: Scott 5, Todd 7, St. Clair 6, Gilbert 5, Hawk 7, Sanders 5, Wernecke 4, Dick 4, Ransom 7, Harding 6, Taylor 8, White 5, Spink 6, Heikes 9, Westfield 7, Crosby 6, Rex 9, Johnson 8, Strawn 7, Stice 7, Tremblett 6.

No. 8, association, 5 pairs bluerocks, $1.50: Stice 7, Todd 6, Dick 5, Rex 10, St. Clair 7, Hawk 7, Scott 8, Taylor 7, Heikes 9, Westfield 8, Sanders 5, Crosby 4, Ransom 8, Strawn 4, Spink 4, White 6, Johnson 5, O. B. Still 0.

*Wednesday, Second Day, Sept. 7.*

Extra, 10 bluerocks, $1: Taylor 9, Dick 7, Marshall 9, Scott 9, Rex 9, Strawn 9, St. Clair 7, Westfield 9, Gilbert 8, Harding 8, White 10, Heikes 7, Crosby 5, Johnson 4.

No. 9, open, 10 singles and 3 pairs, $3: Marshall 10, Taylor 9, Westfield 13, Heikes 12, Rex 13, White 14, Dick 13, Scott 13, St. Clair 12.

No. 11, open, 15 bluerocks, $2.50: Taylor 14, Scott 11, Marshall 11, Westfield 11, Dick 13, Rex 13, Strawn 12, Harding 11, Heikes 11, White 14, Gilbert 9, St. Clair 13.

No. 13, open, 15 bluerocks, $2: Rex 15, Marshall 13, Westfield 11, Heikes 12, Dick 11, Taylor 12, St. Clair 12, Scott 15, Strawn 13, White 14, Harding 11.

No. 14, association, 10 bluerocks, known trap, unknown angles: St. Clair 9, Marshall 7, Heikes 9, Westfield 6, Dick 4, Rex 8, Taylor 10, Scott 7, Strawn 4, Gilbert 8, White 5.

No. 15, open, 15 bluerocks, $1.50: Westfield 12, Marshall 10, Rex 11, Gilbert 11, Harding 9, Taylor 10, Strawn 11, White 12, Dick 10, Coe 7, St. Clair 11, Stice 9, Heikes 10, Scott 9, Johnson 6, Crosby 8, Graves 4, Wernecke 7.

No. 16, Association, 10 singles, $1: Strawn 9, Westfield 6, White 8, Taylor 9, R. Duer 9, Vertress 3, Stice 7, Gilbert 8, Heikes 7, Coe 10, Scott 9, St. Clair 9, Harding 6, Wernecke 7, Dick 10, Marshall 10, Rex 9, Groves 7, Hines 9, Crosby 5.

Extra, 15 bluerocks, $2: Marshall 15, Rex 14, Westfield 14, Heikes 14, Harding 11, Taylor 8, Scott 13, Stice 14, Duer 13, Coe 11, Dick 12 Gilbert 11, Strawn 13, White 12, Groves 11, St. Clair 12.

Extra, 10 bluerocks, $1: Marshall 10, Scott 7, Gilbert 7, Westfield 8, Coe 9, Stice 9, St. Clair 8, Groves 7, White 8, Wernecke 7, Taylor 9, Heikes 9, R. Duer 9, Dick 9, Rex 9, Strawn 9.

Extra, 15 bluerocks, $2: Stice 12, Westfield 14, Taylor 11, Strawn 14, Rex 14, Scott 12, White 13, R. Duer 13, Marshall 13, Heikes 14, St. Clair 10, Dick 8.

Extra, 15 bluerocks, $2: Marshall 13, Scott 14 R. Duer 7, Rex 12, St. Clair 11, Stice 12, Heikes 13, White 14, Wernecke 7, Westfield 11, Dick 11, Taylor 12, Strawn 12.

Extra, 15 bluerocks, $2: Marshall 10, R. Duer 11, Heikes 12, Westfield 10, Rex 15, Dick 9, White 14, Strawn 13, Scott 13, Stice 11, Taylor 13, Coe 12.

No. 6, 10 bluerocks, $1.25: Marshall 7, Strawn 8, Dick 6 Coe 7, Rex 10, J. Strawn 0, Scott 10, Heikes 7, White 10, Henry 1, R. Duer 6, Sawyer 8, Vickery 1, Taylor 5.

Extra, same conditions: Marshall and White div. first on 10 Scott 9, Heikes, Strawn and Harris div. third on 8.

Extra, same conditions: Rex first on 10, Strawn, Crosby and Scott div. second on 9, Marshall and White div. third on 8.

Extra, 10 bluerocks, unknown angles, $1.25: Duer and Westfield div. first on 9, Marshall, Heikes, Rex and Scott div. second on 7, Dick and Crosby div. third on 6.

No. 7, Association, 12 bluerocks, $2: Taylor 10, Westfield 10, White 11, Scott 8, Strawn 10, Marshall 10, Heikes 11, Dick 12, Harding 8, Gilbert 8, Rex 10, St. Clair 10.

No. 12, Association, 9 singles and 3 pairs, $2.50: Marshall 13, Westfield 9, St. Clair 13, Strawn 10, Heikes 13, Scott 12, White 10, Rex 12, Dick 10, Taylor 8.

*Thursday, Third Day, Sept. 8.*

No. 17, open, 10 bluerocks, $1.50: Scott 9, Taylor 10, Dick 7, White 8, Strawn 8, Rex 9, Westfield 10, St. Clair 7

No. 18, Association, 20 bluerocks, $2, 15 added: Taylor 15, Westfield 15, Heikes 15, Strawn 16, Scott 18, St. Clair 18, Rex 19, Dick 17, White 18.

No. 19, Association, 15 bluerocks, $2.50, $5 added: Dick 14, Scott 14, Rex 14, Westfield 12, Heikes 13, St. Clair 13, Strawn 11, White 13.

No. 20, Association, two men teams, 16 bluerocks per man, $4 per team, 3 moneys:

| | | | |
|---|---|---|---|
| White | 15 | Scott | 14 |
| Rex | 15—30 | Dick | 12—26 |
| Strawn | 11 | St Clair | 12 |
| Heikes | 16—27 | Taylor | 12—24 |

Sweep, 25 bluerocks, $3, 3 moneys: Scott 25, Rex 25, White 24, Strawn 22, Heikes 22, Dick 21.

Sweep, 50 bluerocks, $5, 2 moneys:

This closed the tournament. E. HOUGH.

175 MONROE STREET, Chicago.

## Once a Year.

SHENDUN, Va., Aug. 31.—The Once a Year Gun Club, of this place, gave a tournament yesterday which was both largely attended and successful. Messrs John C. Wheat, J. W. Rumple and Craig, of Shendun, were the prime movers in the tournament, and Messrs. W. F. Summerson and W. O. Sydnor, of the Penrose Gun Club, of Staunton, arranged and managed the affair. To their indefatigable efforts and openhanded hospitality the successful sport and enjoyment is largely due.

About thirty gunners, representing the Winchester, Staunton, Harrisonburg and Shendun clubs, participated, and W. Tell Mitchell, the great Virginia live-bird shot, and others not members of any club. The poorer scores are due to the fact that the Harrisonburg and Shendun clubs are just organized, and the majority of their members had absolutely no experience at trap shooting. The sport is largely increasing in popularity throughout the valley and Piedmont sections of Virginia, and great things may be expected from this section next year.

Shendun is one of the new Virginia towns, and is located on a beautiful plain in the Eastern part of the valley, with scenery but little short of sublimity on every hand. Here also is Weyer's Cave or the Grottoes of the Shenandoah, a cavern more beautiful than either Luray or the Mammoth, though not so extensive. On the west of the town is the Massanutton Mountain, an eminence rising abruptly from the plain, and from which the signal corps of both armies alternately operated during the celebrated valley campaign of the civil war.

In the various events liberal purses were offered. During the entire day about 2,500 shells were fired, the tournament lasting from 9 A. M. to about 5 in the afternoon. The weather was perfect for shooting, partly cloudy in the forenoon and clear during the rest of the day, with no wind to pull down averages. The scores, including that in the shoot for the State championship cup, are appended:

## Stevens—Hall.

CHICAGO, Ill., Sept. 6.—Some say that it was because M'sieu "Stevens" bit his thumb at Col. Hall, and others insist that it was because Col. Hall accused M'sieu "Stevens" of wearing $8 pants, but at any rate, as was told last week, there had arisen between these two an enmity—which could only be wiped out in blood. The affair of honor was billed for 2 P. M. to-day, and accordingly at that hour to-day the main ingredients, accompanied by their seconds, surgeons and immediate friends, appeared at John Watson's new park, or rather, his newest park, at Burnside. John Watson hasn't any newer park than this one, and this was the first match shot on these grounds. It could hardly be said to open the park, for the park has not yet been inclosed. The fence builders were still at work to-day.

The afternoon was bright and warm, with a light wind from left to right across the traps. The birds were the best obtainable, though of course at this season they are not like the hard winter birds. The flap ropes had to be used often, all the more because the traps were laid in mowed grass, which afforded the birds more cover than a cinder bed, and made them more reluctant to start. The King automatic traps are not yet down, John Watson pulled the ropes, refereed, and occasionally gathered a bird for Col. Hall, though not often.

M'sieu "Stevens" shot a *nom de guerre*, a new Fraocotte 12-gauge, and Schultze in Kvuochs. Col. Hall shot a 12-gauge Daly and wood powder in U. M. C. smokeless cases. The highest run of the latter was 19. M'sieu "Stevens" lit right out with 27 straight, and shot a steady, veteran-like gait throughout, although the second bird he missed was an easy one drifting in, which was overshot. Col. Hall could not find his incomers very well, either.

Just before the match M'sieu "Stevens" shot 5 practice birds and Col. shot 2, of which they killed several between them.

"I want you to understand," said M'sieu "Stevens," throwing a cold, malignant look against the sunny end of the house where his opponent sat, "that the trousers I now have on cost $9 25, and they are not my good pair."

"Is that so?" Said Col. Hall, sarcastically. "Well, I can wear $4 pants and beat you, see! Youse people watch my smoke, see?"

This was the last straw, and M'sieu "Stevens" strode firmly to the score, smashed down his bird, and sank gracefully, with an *insunciant*, do-it-every-time air, into the chair near his handler, Mr. Oswald Von Lengerke. The FOREST AND STREAM graphic trap score type will do the rest, though there ought to be something to show that Roll Organ bet $4 that neither man would get 45.

Illinois State rules, 50 birds, $50. Score:

"I shall have to insult you again, Dick," said Col. Hall, as they shook hands at the close of the race, "though I'm afraid we won't get to shoot again until next summer."

"All right," said Dick with a bright smile, "I'll be getting them all then."

Mr. H. B. Foss, who has exchanged victory and defeat with the winner of to-day, looked at him rather anxiously. He was going to challenge him to another match, and then he thought he wouldn't. It was the general impression that 47 was a good many.

# Answers to Correspondents.

**☞ No Notice Taken of Anonymous Correspondents.**

D. B. C., City.—Lowville is a good point to start from, or go to No. Four. From Hawley you may reach the Pike county grounds. The rifle will answer.

A. D. E., New York.—What flies can be used with the greatest success in the Adirondacks in August? Ans. The red, brown and gray-hackles, professor, Montreal and coachman are standard flies and always reliable. When, however, trout have sought the headwaters of navigation, and the cool spring brooks it sometimes happens that only the midges can tempt them from their hiding-places.

E. M. B., Preston, Conn.—What kind of tackle shall I use and what bait is the best for trolling in September in the Rangeley Lakes, Maine? Give me a list of some of the standard flies for brook and lake trout. Ans. A strong bait rod with reel holding from 50 to 100yds. of linen or silk line of best quality will do for lake trout. For bait use a minnow or a young sucker from 3 to 6in. long, and fish in deep water, either near the bottom or by trolling with heavy sinker. Flies for lake trout are usually tied on Nos. 4 and 6 hooks, in a wonderful variety of patterns. Among the hundreds used for brook trout and lake trout listed in catalogues are the following: Abbey, black-hackle, brown-hackle, blue-professor, coachman, cowdung, grizzly-king, gray-hackle, king-of-water, Montreal, professor, queen-of-water, red-hackle, royal-coachman, stone, scarlet-ibis, silver-doctor, white-miller, yellow-sally, oriole, Parmachene-belle, Richardson, Rangeley, Cupsuptic, Jock-Scott, jungle-cock, Moosulucmeguntic, Raquette, silver-king and yellow-moose. You will find the choice of flies among anglers as varied as human character.

J. Q., Amulree, Canada.—Am contemplating the construction of a trout pond. Have powerful spring issuing from side hill, discharging water sufficent to fill continually a 2½ or 3in. pipe. Propose to make pond at foot of declivity by digging same out and running water therein through a pipe. Will such plan work? If so, how deep should pond be? what size? should bottom be filled in with gravel? if so, to what depth? ought bushes to be planted around? ought pond be banked up sufficiently high to prevent rain from running in from side hill? will trout spawn in 5 or 6ft. of water? Ans. A combination of brook and spring waters would be preferable, but trout can be reared in spring water. A single pond will not answer; better have at least three communicating ponds varying in size and depth. Young trout can be kept in shallow water and spawning fish enter the shallows, where they seek to deposit their eggs in nests excavated in gravel. Gravel should be placed in the races connecting the ponds, but not in the living ponds. Banks should be raised to prevent inflow of surface water and it will be found advantageous to line the sides and ends, but not the bottom, with planks. A good average size for ponds would be 10ft. in width, 25ft. long, and the depth varying from one foot at the inflow to 4, 5 or 6ft. at the outlet. For wintering the trout even a greater depth would be advisable. Shade is desirable, but many fishculturists secure it by introducing floating platforms into the ponds, thus avoiding trouble with falling leaves in autumn. See FOREST AND STREAM'S catalogue for works on fishculture, several of which relate chiefly to trout.

331-333 BOWERY, BET. 2d & 3d STREETS.

NEW YORK, July, 1892.

Our "**ONDINA**" all Havana tobacco **NEW YORK made** cigar, our world-renowned "**MEPHISTO**" and all other finer grades of cigars made by us are superior in many ways to those made in the tropics. In addition to all the tobacco markets of the earth to which we have access, New York City always commands the best of every material as well as labor. **OUR** New York factory is a perfectly ventilated, clean abode. No sort of uncleanliness is permitted, and our cigars, therefore, are not liable to contain matters other than tobacco, and smokers may confidently and safely use our cigars, not needing a mouth-piece or a cigar holder to prevent unpleasant consequences. **To protect consumers from imposition, every "MEPHISTO" cigar is banded.**

D. HIRSCH & COMPANY.

**"Our New Alaska." By Chas Hallock. $1.50.**

**Forest and Stream's Amateur Photography Competition.**

AS a due recognition of the important place of amateur photography in its relation to sports of field and forest and stream and prairie and mountain, the FOREST AND STREAM offers a series of prizes for meritorious work with the camera.

There are ten prizes: First $25. Second $20. Third $15. Fourth $10. Six of $5 each.

The competition is open to amateurs only.

The subjects must relate to FOREST AND STREAM's field—game and fish (alive or dead), shooting and fishing, the camp, campers and camp life, sportsman travel by land or water, yachting, canoeing, the dog.

There is no restriction as to the time when the pictures may have been or may be made—whether in 1892 or previous years. Pictures will be received to Dec. 31, 1892.

All work must be original; that is to say, it must not have been submitted in any other competition, nor have been published.

There are no restrictions as to make or style of camera, nor as to size of plate; nor as to number of pictures sent by one person.

A competitor need not be a subscriber of FOREST AND STREAM.

All photographs will be submitted to a committee.

Photographs should be marked with initials or pseudonym for identification. With each photograph should be given name of sender, title of view, locality, date, and name of camera.

The photographs shall be the property of the FOREST AND STREAM. This applies only to the particular prints sent us.

From time to time we shall reproduce in FOREST AND STREAM by the half-tone process samples of the work submitted.

Forest and Stream Publishing Company,
318 BROADWAY, NEW YORK.

**SPECIAL PRICES TO**

**SHOOTING CLUBS.**

**Our 1892 Catalogue will contain some special low quotations on FIRE ARMS, PIGEONS and TRAPS and LOADED SHELLS, Etc. It will pay every one so interested to obtain a copy, which shall be sent on receipt of 2 cents to cover postage.**

**CHAS. J. GODFREY, 11 Warren St., N. Y.**

MESSRS. MONTGOMERY WARD & Co., of Chicago, Ill., have instructed MESSRS. POND & GOLDEY, of Milwaukee, Wis., to send a copy of the 1892 edition of the "Sportsman's Directory and Year Book," with their compliments, to every shooting and Fishing Club in the U. S. west of Philadelphia.

# SPORTSMAN'S LIBRARY.

## BLACK WONDER.

A.K.C.S.B. 23,557. Whelped Jan. 30, 1890
King of black pointers, and was the king of all colors at the United States field trials, 1891, winning the Derby and All-Age Stake. He won two firsts and one second on bench. He is a dog that knows how to hunt and not afraid of briers. Fee $35. JOHN A. HUNTER, Bloomington, Monroe Iana.

## Scientific Education of Dogs FOR THE GUN.

**A new work by an English writer, "H. H."**

The instructions here given are the result of the author's amateur practical experience of thirty-seven years. A review in FOREST AND STREAM says:

"This work is a very well written treatise upon the subject, containing some new ideas and much that is interesting and instructive to the new beginner as well as not a little that will be beneficial to even old hands to study. The chapter devoted to kennel management is a short one, but it is very nearly complete, and is alone worth many times the price of the work to any one that will heed its teachings."

Price $2.50, postpaid, by the
FOREST AND STREAM PUBLISHING CO.,
318 Broadway, New York.

## Modern Training,

**Handling and Kennel Management.**

By B. WATERS.

A comprehensive and practical guide to the training, care, management and breeding of sld dogs. Cloth, 378 pages. Price $2.50

FOREST AND STREAM PUBLISHING CO.,
318 Broadway, New York.

*OUR COLUMBUS NUMBER.*

THE FOREST AND STREAM of Oct. 20 (the day before the Columbus celebration) will be a special Columbus number. The contents, both text and illustrations, will relate largely to the age of Columbus, and will be as interesting as unique.

*FAMILIAR ACQUAINTANCES.*

VIII.—THE CROW.

NOT the robin's impatient yelp not yet attuned to happy song, nor the song sparrow's thrill, nor the bluebird's serene melody, heralds the coming of spring; but attends its vanguard. These blithe musicians accompany the soft air that bares the fields, enpurples the buds and fans the bloom of the first squirrel cups and sets the hyla's shrill chime a-ringing.

Preceding these, while the fields are yet an unbroken whiteness and the coping of the drifts maintain the fantastic grace of their storm-built shapes, before a recognized waft of spring is felt or the voice of a freed stream is heard, comes that sable pursuivant, the crow, fighting his way against the fierce north wind, tossed alow and aloft, buffeted to this side and that, yet staggering bravely onward and sounding his trumpet in the face of his raging antagonist, and far in advance of its banners proclaiming spring.

It is the first audible promise of the longed-for season, and it heartens us though there be weary days of waiting for its fulfilment, while the bold herald is beset by storm and pinched with hunger as he holds his outpost and gleans his scant rations in the winter-desolated land.

He finds some friendliness in nature even now. Though her forces assail him with relentless fury, she gives him here the shelter of her evergreen tents, in windless depths of woodland; bares for him there a rood of sward or stubble whereon to find some crumb of comfort; leaves for him ungathered apples on the naked boughs, and on the unpruned tangles of vines, wild grapes—poor raisins of the frost—the remnants of autumnal feasts of the robins and partridges.

Thankful now for such meagre fare and eager for the fulness of disgusting repasts, in the bounty of other seasons he becomes an epicure whom only the choicest food will satisfy. He has the pick of the fattest grubs, he makes stealthy levies on the earliest robins' nests, and from some lofty lookout or aerial scout watches the farmer plant the corn and awaits its sprouting into the dainty tidbits, a fondness for whose sweetness is his overmastering weakness. For this he braves the terrible scarecrow and the dread mystery of the cornfield's lined boundary, for this risks life and forfeits the good name that his better deeds might give him. If he would not be tempted from grubs and carrion, what a worthy bird he might be accounted. In what good if humble repute might he live, how lamented die.

O, Appetite! thou base belly-denned demon, for what sins of birds and men art thou accouutable!

In the springtide days, he turns aside from theft and robbery to the softer game of love, whereunto you hear the harsh voice attuned in cluttering notes, and having woed his mate, the pair begin house-building and keeping.

It is the rudest and clumsiest of all bird architecture that has become the center of their cares, such a jumble of sticks and twigs as chance might pile on its forked foundations, but woe betide the hawk who ventures near, or owl, who dares to sound his hollow trumpet in the sacred precincts.

At the first alarm signal, as suddenly and mysteriously as Robin Hood's merry men appeared at winding of his horn, the black clansmen rally from every quarter of the greenwood, to assail the intruder and force him to ignominious retreat.

When at last the darlings, having clad their uncouth nakedness with full sable raiment, are abroad in the world, they, with unwary foolhardiness and incessant querulous cries of hunger or alarm, are still a constant source of anxiety to parents and kindred.

But in the late summer when the youngsters have come to months of discretion and the elders are freed from the bondage of their care, a long holiday begins for all the tribe.

The young corn has long since ceased to tempt them and the persecution of man has abated. The shorn meadows and the close-cropped pastures swarm with grass-hoppers, field and forest offer their abundant fruits.

Careless and uncared for, what happy lives they lead, sauntering on sagging wing, through the sunshine from chosen field to chosen wood, and at nightfall encamping in the fragrant tents of the pines.

At last the gray banners of autumn signal departure and the gathered clans file away in struggling columns, flecking the blue sky with pulsating dots of blackness, the green earth with wavering shadows. Sadly we watch the retreat of the sable cohorts whose desertion leaves our northern homes to the desolation of winter.

*THE LAKE KEUKA SCANDAL.*

FOR the rottenness of a fish protective service controlled by politics commend us to the Lake Keuka protector, John Sheridan. By the testimony of citizens of Penn Yan, this man is hopelessly inefficient and worthless as a public officer. His business is to enforce the laws for the protection of fish and game, to arrest the netters, to seize and destroy the unlawful nets. This, even when names, times and dates have been supplied to him, he has refused to do. His neglect of duty is notorious.

The citizens of Penn Yan and vicinity, those who are concerned to drive the gill-net fishermen out of the lake, and to save the trout from extermination by these unlawful means, have long ago wearied of trying to do anything with this man Sheridan. They have appealed to the Fish Commissioners to remove him and to put into the place some man who will do the work. The appeal has been in vain. Why? Because of "politics." This man Sheridan can control votes. He is retained in the position for political purposes only. And the chances are that for the same base reason he would be retained were he ten times as worthless as he is.

Sheridan is not specially to be blamed. Most men of his caliber and position and moral training, if given the opportunity, would willingly draw a salary of $500 a year and do nothing under the sun to earn it, save to make the most of their political pull. He is less to blame than his superiors, who, knowing his unfitness and knowing the injury to the public interests his retention is working, keep him in his place. How much longer can they afford to perpetuate this scandal?

When it was suggested to Gov. Flower, by a Long Island delegate, last week, that he would help the Democratic vote by recalling the troops sent to protect the hapless quarantine passengers of the Normannia at Fire Island, the Governor responded with warmth, "I don't care a— for the Democratic vote or any other votes in a case like this. The troops are going down to Babylon, if they come back to-morrow."

Is it only in the face of life and death peril that our public officers can afford to do their plain duty, votes or no votes? Is not the threatened ruin of Lake Keuka's fishing resources a disaster of sufficient magnitude to warrant the discharge of this man Sheridan without thought of politics?

*SNAP SHOTS.*

William King, who peacefully passed from earth last week, at the age of 75, was one of the old school of sportsmen, better known to a past generation than to the shooting men of to-day, but still, in old age, keeping up his interest in the recreations of his youth. Mr. King was a native of England. Coming to this country in his early manhood, he found abundant opportunities to gratify his taste for field shooting; and as a pigeon shot he gained wide celebrity in the years preceding the Civil War. He was a companion of Porter, Herbert ("Frank Forester") and others of the "*Spirit* crowd," and was a frequent contributor to that journal, as in later years to the FOREST AND STREAM. Mr. King was a man of striking physique, sunny disposition and strong friendships.

The sowing of wild rice is one of the sensible, practical and profitable means of increasing the game supply. A full descriptien of the rice and of the mode of sowing it was given in our issue of Aug. 25. We would be glad to receive reports from those who have had success in wild rice culture. Mr. Charles Gilchrist, of Harwood, Ontario, who has supplied so much of the wild rice grown in years gone by, writes us that the large crop he expected this season has been lost. The Indians had just begun to gather the harvest, when a tremendous shower of wind and rain, which raged for two days and nights, beat off all the rice and tore the beds to pieces. Mr. Gilchrist anticipated sending out ten tons of the rice this year; manifestly much ground is to be stocked in the future.

Commenting upon the destruction which threatens New Hampshire forests and the ruin which will surely come to White Mountain interests, the Boston *Herald* says that there is one man who, if given the opportunity, can make public opinion for the rescue of the woods. That man is Rev. J. B. Harrison, the secretary of the present State Forestry Commission. The suggestion will be seconded most heartily by all who appreciate the forestry situation in New Hampshire and who know of Mr. Harrison's pre-eminent fitness to accomplish the work of reform.

The excellence of the pictures we have reproduced from our amateur photography collection has been widely commented on, and deservedly so. It should be remembered that all amateurs, to whose notice the competition may come, are invited to contribute to the collection. The promise is that in the FOREST AND STREAM'S World's Fair exhibit the amateur photographs of the sportsman's life in the field will constitute the most entertaining and noteworthy feature.

This is a "squirrel year." Reports of the abundance of these animals come to us from widely separated parts of the country. Fluctuations of the supply of different species of game are well marked from year to year; and we are far from giving for many of them any satisfactory explanations. The food supply, the weather in breeding seasons, and other causes are assigned for the plenty or scarcity of certain birds and animals.

A note from "Stanstead," received too late for insertion in the game columns, tells us that flight woodcock are passing through Vermont and affording good sport to the knowing ones. Now that the game seasons are coming on, correspondents are invited to send us short notes of the supply in their localities, and of their fortune in the field.

Residents of New York city know less than do outsiders of a cholera scare said to be prevailing here; but one effect of the detention of infected steamships in the Lower Bay quarantine has been to diminish the business of the fishing steamers which make daily excursions to the Fishing Banks.

When a man who has just come in from camp tells you, "And I'm going back to the same place again next year," you may put it down that he has had a good time.

The United States Fish Commission is now investigating the practicability of stocking Clark's Fork of the Columbia.

# The Sportsman Tourist.

## CAMEL HUNTING IN THE ROCKIES.

WHEN Nimrod announced that for our summer's outing we would go on a camel hunt, fair visions arose in my mind of Osman's Temple, shadowed by the ancient pyramids and guarded by the Sphinx, whose inscrutable eyes ever propound the voiceless problems of life; of gaily turbaned Bedouin princes, mounted high on the obedient "ships of the desert," while the eastern star gleamed jewel-like in the blue enamel of an orient sky. But when he added, "in the Rocky Mountains," I fairly flew for the camphor, darkened the room, and catching up a FOREST AND STREAM vigorously fanned my poor Nimrod with its fluttering leaves, sure that too devout worship at the mystic shrine had turned his brain; when to my frightened imagination his eyes assumed a cold glare and he muttered something about not being idiotic, I earnestly besought him to lie down and let me rub his head, instead of which he pitched the sofa pillow into the opposite corner of the room, and concisely added, "I mean just what I say; on day after to-morrow we will start via the Great Northern Railway for Great Falls, Montana, there to outfit for White Sulphur Springs and vicinity, where, looking backward over the cycle of time, and delving in the dust of centuries, I shall doubtless find the object of my quest." "Great Cæsar's ghost!" I ejaculated, when he paused for breath. "No, only the possible ghost of a camel."

The plans of Nimrod are like the laws of the Medes and Persians. So the evening of June 8, 1892, found us in St. Paul aboard the palatial sleeper of the Great Northern, where, surrendering all care to the polite officials, we prepared to enjoy every mile of the ever changing landscape between the Twin Cities and their infant rival, which, comet-like, has risen in the western sky, with a train of brilliant possibilities following in its wake. We will give but a passing glance at the vast unframed pictures of thriving villages, embryo cities, and bonanza wheat fields of Minnesota and North Dakota; touch lightly upon our arrival at Great Falls, and drag ourselves reluctantly from the wonderfully picturesque scenery of the Missouri River at that point, scenery to which the classic Hudson and far-famed upper Mississippi, both in picturesqueness and grandeur, must yield the palm. There are 500ft. of fall from its beginning at the Black Eagle, whose enormous power has been utilized for the electric plant and huge smelters, there located through a series of five falls, each increasing in height and grandeur until with united volume and power they spring 80ft. in one straight leap over the ragged rock, whose wonderfully colored walls, toned by softest shades of chocolate and brown, tower hundreds of feet upward, confining the rushing, foaming waters of the great cataract by the power of their silent might. Neither must we stop more than to drink from the giant spring welling up from some subterranean channel; no dainty fern-fringed darling, but an angry monster, breaking resistlessly from its rocky environment with rumble and roar, covering many acres of ground, and furnishing at this point one-eighth of the volume of the Missouri River, into which it plunges, with a force that sends a trail of foam from shore to shore.

A week after our arrival in Great Falls found us en route for White Sulphur Springs, lying 100 miles south via Millegan and Fort Logan. Four sure-footed horses drew our covered wagon, compactly loaded with tent, bedding and provisions, good camp stove and cooking utensils, while an abundant supply of firearms and fishing tackle proved our faith in the streams and cañons to supply our party of four with fish, flesh and fowl.

Owing to unforeseen detentions we were late in crossing Smith River and reaching Hound Creek, its largest tributary, upon whose banks we proposed to make our first camp. On account of recent spring rains we found the creek much swollen, nevertheless we determined to cross at the nearest point, instead of driving up stream three miles to the regular ford. We were not the first to prove that "the longest way around is the shortest way home."

The sky, bright and beautiful in the morning, had become overcast and rain fell at intervals. Between us and the opposite shore was an island, with abrupt, deeply-cut banks, covered with a fresh deposit of quicksand, left by recent floods. Into such a bank we struck and stuck, the left wheel's hub deep and held as in a vise, the others in the water. The struggling horses made ineffectual efforts to gain a footing and extricate us, but the treacherous yielding sand furnished no hold; one of the wheel horses fell and everything seemed a confusion of hoofs and heels.

We climbed out into the rain, which was now heavily falling; still the horses could not budge the wagon. After repeated efforts we were compelled to unhook the team and resort to a Western contrivance called a Spanish windlass. This was made by fastening one end of the fifth chain to a convenient tree, the other to the wagon tongue, while the neck yoke, held upright in the center of the chain, answered for a pulley, around which the chain was slowly wound by means of a strong pole used as a lever; and by this simple mechanical contrivance was accomplished what the united strength of four horses was not able to do, the wagon being successfully drawn on shore, a triumph of mind over matter. The rest of the fords gave no further trouble and we camped in the foothills bordering the stream.

The following morning we were off by 8 A. M., our way leading over long, undulating hills, covered with soft green flower-dotted verdure, toward the distant mountains, that seemed to be even further away as we approached them. On and upward we journeyed until we reached the foothill divide, then downward over the long grade to Milliken's.

The mountains were nearer now, and we felt their cool, balsam-laden breath. Still away, away, over mountain-girt park, where the antelopes in twos and threes sped from danger, then circling back, watched us with shy, fateful curiosity in their eyes; coveys of sharptail grouse whirred on broad wings to safe distances, while every now and then a jack rabbit lead the dog a fruitless chase.

Nine P. M. found us at Two Creek, where we dicovered that somehow, somewhere, we had lost our tent.

On a high point of land overlooking Two-Creek Cañon, where a clear, cold stream gushes from the earth, forming a charming waterfall that tumultuously tumbles over the broken rocks and water-worn boulders into the embrace of Two Creek, a Missourian with an eye to future profit had located a horse ranch and built a one-room cabin and spring house; but evidently his heart's desire had not been fulfilled in this picturesque solitude, for both spring house and cabin had long been deserted—left to badger, ground squirrel and mountain rat. Into this cabin we were compelled by the loss of our tent to enter.

No one was very—that is to say, overwhelmingly good-natured. I looked into each long face, and remembering that food hath charms to soothe each savage breast, if the savage breast be a hungry man, I set to work preparing them some supper. Then my thoughts were intent on the slumbering bedbug and festive flea, and graybacks that lived tenaciously, and bats that dwell in houses old, and mountain rats so brave and bold, and, worst of all, the house snake gray, that hides under the logs the livelong day, silently seeking its prey at night and hiding again before daylight. Fortunately these pests proved creatures of the imagination with the exception of the mountain rats. These resented our intrusion in a manner peculiarly their own by loud squeaks and sharp raps upon the floor with their long, hairy tails. They are much larger than the house rat, and their size enables them to indulge their penchant for carrying everything in the line of knives, forks and spoons or even tin plates and pans to their holes.

We remained at the cabin several days, penetrating deeply into the cañons, taking an abundant supply of whitefish and grayling from the stream, and finding wonderful petrifactions in the limestone formation.

We watched with our field glass across the swollen waters of Smith River the clumsy antics of a she bear and her cubs, and one day had an exciting chase down the cañon after a half-grown silver-tip, fruitless owing to the extreme roughness of the country.

I was not altogether sorry when, on the following Tuesday, we moved away from such close proximity to such dangerous neighbors, and crossing Two Creek commenced the ascent of Gaddis Hill, the steepest wagon road in Montana, being a straight pull of two miles without a foot of down grade.

In noticeable contrast to these stern, aggressive mountains and lofty foothills are the exquisitively beautiful flowers, eighty-four distinct varieties were counted in a ten miles' ride.

At noon we reached Rock Creek, a wide, brawling mountain stream, fairly alive with trout and grayling. We landed seventy in two hours' time.

Night found us in camp on Spring Creek, having passed Fort Logan en route. This post, no longer needed for protection from hostile Indians, is the property of Judge Gaddis, who has set the old parade ground to shade trees, forming a delightful park, while I have seldom seen a finer vegetable garden than was proudly show by Mrs. Gaddis.

Our camp now lay equi-distant between Fort Logan and White Sulphur Springs. The latter, a beautiful town of 700 inhabitants, is charmingly situated on Smith River, encircled by the Castle and the Crazy Mountains, while Mount Edith, belonging to the Big Belts, raises her snow-crowned head 13,000ft. in the near distance.

Everything about White Sulphur indicates its volcanic origin, and its name is derived from thirteen hot mineral springs that well up from the earth in an area of thirteen acres. The waters possess wonderful curative properties, if the half that is claimed be true, rheumatism and Bright's disease need no longer be feared. The joyously bubbling springs are pleasant to the eye and not unpleasant to the taste.

I can fancy no more delightful summer asylum for the weary brain worker, suffering invalid or ambitious sportsman than is to be found in this lively Western village, situated 1,000ft. higher than Helena. The Smith River and its tributaries are filled with trout, grayling and whitefish, while ducks and geese, in their season, fairly blacken the waters. In close proximity to the haunts of antelope and black-tail deer, which appear in every balsam-covered mountain glade, to say nothing of blue grouse, which are also plentiful, and everywhere the fawn-colored curlew screams and circles over the open meadows, and just enough of danger is added by the old settlers' stories of bear and mountain lions to spice with caution the excursions into great caves, whose vaulted dome-like interiors are hung with glittering stalactites, that flash back prismatic colors in the torch light; or in making descents into the deep craters of extinct volcanoes lying a short drive from the town.

No doubt it is a selfish thought to almost dread the time when this hunter's paradise will be invaded by the railway, which has been surveyed and will soon be completed by the Great Northern Railway from Neihart, its nearest point, 35 miles distant, to White Sulphur Springs.

But to return to the object of our search. To us, the camel hunters, no point could be fraught with deeper interest than our Spring Creek camp, situated in the center of the Tichtoleptus beds of Smith River. In the Tertiary age this wide expanse of country, now dotted by comfortable ranches, must have been an extensive lake or a series of lakes, whose marginal shores were formed by the Belts, Castle and Crazy Mountains, over which roamed and fed in the semi-tropical climate, under the shade of the palm tree, the great mastodon and rhinoceros, the camel and three-toed horse—the last the prehistoric ancestor of those which at the present day feed upon the self-same hills, and oftentimes in clattering down the cañon side unwittingly uncover the fossil bones that link them to the dead and silent past.

The break through the foot-hills cut by the waters which drained the lake into Smith River, furnishes a wild, picturesque bit of scenery; the brilliant lichen-painted rocks are upheaved and set on end, the turbulent waters are still angrily plunging and swirling as if still unsatisfied with their mighty work.

Through this lake bed, running transversely to the streams, are numerous miniature cañons cut in narrow sinuous curves, rising from 20 to 100ft., entirely destitute of vegetation excepting here and there a bunch of cactii; and formed of indurated yellow clay. It was in these clay cuts that Prof. W. B. Scott, of the chair of geology, at Princeton, last season discovered the remains of twenty-three genera, comprising from thirty to forty species of extinct animals, and it was the knowledge of his interesting and successful researches that had awakened in the breast of Nimrod an ardent desire for a camel of his own.

"Why a camel?" I repeatedly questioned, as we followed the tortuous windings of the clay cuts, pick in hand, striking here and there the arenaceous lime-stone, or dislodging huge conglomerates of slate; but for my answer came mutterings of *Poebrotherium*, *Protolabus* and *Procamelus*. At last just below the brow of an almost inaccessible declivity, we discovered a fossil bone, protruding from the cliff. We fairly flew to work, and unearthed a bone measuring from the articulation to where it was broken, 42in. in length and 13in. in circumference. Still digging we brought to light an immense head, but so honeycombed and calcined, that it dissolved into impalpable powder before our disappointed eyes, but one tooth partially agatized proved by its shape and structure to belong to a mastodon. Nimrod listened sadly to my exclamations of delight, and said with mournful voice, "It is not a camel."

Day by day, in sunshine and shadow, gathering cloud or pelting hail, we labored on, and at length my eye caught a fossil shining like Chinese ivory as it protruded from the yellow clay. Cutting foot room in the cañon wall whereon to stand, we carefully commenced to pick it out, and as we excavated, bone after bone appeared. The fossils were many of them broken, but otherwise were in a perfect state of preservation. When the jaw appeared, with teeth intact, Nimrod eagerly seized it, examined it, and gloated over it. The question trembling upon my lips was about to be answered; was it a camel?

Our search was over; the object of our quest lay before us in an ivory-white heap. Tenderly we wrapped each broken bit in cotton and tissue paper, ready to be cleaned and articulated and conveyed to its destination, a voiceless messenger from the eternal hills, to teach the sons of the desert to bear their burdens well.

MRS. J. H. EMERY.

## THE WIND.

TO THE sportsman there is a deal of interest connected with the wind. Its force and direction often combine in carrying to a successful issue his well laid plans for an outing, or again in spite of all the prophets the capricious wind will head him off, and if of a bilious temperament he is very apt to remark "Kismet" or something of that sort which seems to fit the occasion.

> "A southerly wind and a cloudy sky
> Proclaim a hunting morning."

I am not so sure about "a cloudy sky," but I do know that in October days, when the wind has been in the southward over night and the young crescent of a moon adds its charm to the twilight, I make it a point on the following morning to be afield after woodcock as soon as the sun has converted the rime into diamonds and set them all a-quiver on the grass and briers.

Every duck hunter notes with satisfaction the heavy blow, and murmurs a prayer that it may hold for the morrow as he drops off asleep to dream of incomers, doubles, twisters and marvelous kills of all sorts. This nor'wester may bring on the geese! Who knows?

When after a heavy rain in late autumn there comes a calm, frosty night, how we welcome a breeze "from anywhere" that will strip off the leaves in the haunts of the ruffed grouse and allow us a better chance to gauge his lightning-like flight.

What can I say of a damp east wind, one that is unctuous with mist? Or more correctly, as the weather clerk puts it, temperature 40°, humidity 90 per cent., wind east, velocity sufficient to penetrate clothing and reach the marrow in your bones. What can I say? Well-er! It is not to be resolved into words.

A pelting rain is falling as I write, and the plink! plunk!—plink! plunk! of the drip from the eaves, as it strikes the iron catch of the shutters, is repeating with monotonous regularly its never-ceasing plaint.

What a night this for sleep! I know of no more thorough enjoyment than to lie snugly tucked away under the blankets listening to the gale as it surges around the house, now in sharp, sudden gusts, that make the windows rattle and strain in their frames, now dying away in the distance, gathering its strength for a fresh assault.

Sleep comes to me so quietly at such times, and the land of dreams is reached with a mind of such tranquillity that as a matter of course only the most pleasing visions engage its attention.

Some there are, however, whose feelings are affected in an opposite manner, a heavy storm working upon their nerves until they are really to be pitied. Sleep is out of the question with them, sudden starts, as an unusually heavy gust roars by betray their agitation, and the poor things have no relief until the storm passes.

It is interesting to note the effect of the sound of the wind upon different individuals, varying with their temperaments and with the seasons.

The same breeze that refreshes them during the August afternoons will make them uncomfortable as they hear it rustling among the leaves after nightfall.

That there is a difference in the sound of the wind at different seasons seems to be a fact.

A full sail breeze will sing through the rigging in early September, in quite a different key from that in which you find it pitched during the latter part of October.

At the former season there is a full rich undertone, which is wanting later on, when a weird and shriller pulsation, suggesting the minor strains of an Æolian harp, will cause a sense of loneliness to steal over one.

I have in mind an acquaintance who is peculiarly sensitive in this regard. A northwester at this season invariably brings a "fit of blues" that remains until a change of wind produces a corresponding change in spirits.

What a keen enjoyment it is to others of us to listen at night, in the dead of winter, to the raging tumult of the northeasters as they drift the snow and obliterate all the paths in their fury.

The leafless trees are trembling and rattling their limbs as the gale rushes through them. The snow is whirling as the circling gust catches it up, and long wreaths of white flakes stretch across the way, to vanish again in their wisps against the dark background of sky, while over all resounds the continuous roar of the tempest booming past.

Again, hear the whispers from the pines and hemlocks and the spruce as a gentle air draws through their boughs during the summer months. How suggestive of rest and coolness, what a self-contented feeling it imparts to the listener.

Hear the same sound on a gray winter evening when

a white shroud of snow covers the ground, and you are chilled into utter dreariness.

Surroundings are an important factor in producing these effects, but after all it is the wind that is chiefly responsible for the impressions one receives.

WILMOT TOWNSEND.

## A CAMPER'S DIARY.—III.

AUG. 19.—The Narrows, 5:30 P. M.—Well, we left Flint's this morning, rather late, in a mountain wagon and climbed the road to the head of Aziscohos Falls. Found the canoes all right on shore. A birch-bark and a canvas, both well seasoned and acclimated, both still staunch. The birch-bark, lithe, graceful, quite aboriginal. They seemed coy and unstable as we shoved them on the stream, but when each had got its load of property bags, camp fry, and tent paraphernalia, it settled down steady as a schooner. I stowed a small can of worms carefully in the bow and stood some chaffing from the fellow with the newest fly-rod. Had the presence of mind to abstract an extra paddle from the bank where it lay, expecting to go back in the wagon. We may need it.

Well, Mack and I stowed ourselves in the canvas, with Mack on a butter keg in the bow, and the birch-bark took the lead and disappeared round the bend with Valentine doing the galley slave in the bow, and Sam all doubled under a little gray hat peering wisely ahead like a woodsman, with his paddle dropping soft and easy in the bubbling wake.

The river here is clear and cold, wide enough to swim a little steamer and deep enough to drown her, but the shores are low, with expanse of water making in at times among the bog. There's wilderness enough, but ghastly. The trees along the shore, still standing, are drowned.

We reached this place at 3:30 and climbed the bank in the rain. No one had been here this season and the wet grass was high and untrodden. The camp stones were all right and the path to the spring faintly visible. I'm writing this in the tent with the flap open. It took some time to get the fire going, but now it holds its own and turns the rain to steam. Sam bends over, stirring a pail of rice, while the water drips from his hat brim and sizzles on the coals. Valentine looms up under his rubber blanket, with axe in hand, dignified as a policeman. Mack's canvas coat, well saturated, has lost all offensive traits of newness. One foot rests in a puddle and the other on a hot stone, toasting brown and steaming; but he's oblivious of all except the things on the fire where the hot odors come from. His eyes are fixed in a mesmeric stare and his chops are dripping. Sam says, "Supper's ready!" * * * Two hours later. I'm writing this inside the tent, the others outside. After supper it stopped raining, so we were disposed to sit round and sigh and pick our teeth and contemplate our fat stomachs, but Sam gave us no peace. He commenced picking up things.

"Well, there's a little dab o' tomatoes for some one in the morning. Cover up that condensed milk, Mack, bugs get all in. Come, Jeff, you and Mack going to wash dishes while Valentine gets another log. Get a spruce now, Val.

Jo Valentine stalks off with the axe without a word, as if he knew the difference between spruce and fir. It was light then, but it's dark and muggy now, and the fire makes a red halo, crowding back the night. They're all three hanging over it now, throwing off queer shadows, drying underwear and things. Sam has just rolled up a shirt with a good deal of smoke and soot inside. No doubt the smoke and soot are warm though. Now he's taking an observation of the sky and says, "Let's kick her out, boys, it's going to settle down for an old sockdodger."

The reason I am putting down all these little details is so I can read them about twenty-five years from now and look back and grow young. This diary shall be my Fountain of Youth. Happy thought, Old Ponce should have gone camping and kept a diary.

*Aug. 20.*—This is what I call "communing with nature." Waked this morning with my head in the grass, slightly lower than my feet and near enough for the rain to spatter in. Then I tried to count and classify a horde of insects crawling on the white roof, and reflected that most of them in the night had been taking liberties with my person, secreting themselves, and probably some were there now—in my hair, no doubt. Then Mack waked up and said he hadn't slept a wink all night on account of mosquitoes, on account of the noise they made. He commenced punching Valentine to make him wake and tell him what he dreamt last night. "He must have had some fine dreams last night; this beats the steamer all out."

So Valentine yawned and sat up in his red blanket, and finally looked intelligent and said:

"I dreamed that a thousand mosquitoes came at me last night, and that oil of lavender I put on kept them off. I dreamed it."

Then we pounded Sam into wakefulness to get his opinion of the weather. He doubled up, untied a breadth of curtain and poked his nose out. Then he tied it up and rolled back in his bag again mumbling. All we could make out was:

"Won't clear off in a week—my mind."

Mack says: "What can you expect with all the ministers in New England praying for it?"

* * * * * * Same night. There's mutiny in camp. Been here all day in the drizzle, and Sam says we'll move to-morrow, rain or shine. The worst of it is there's no trout along here—all chubs. I'm getting solicitous about my bait. Forgot and left them out in the rain last night. Mack says they'll never live to die in Parmacheme. Says they're getting languid already, and prescribed meal, so I sprinkled some.

After dinner he and I paddled off for wood and landed on a point near an old log camp. We found some good long spruce butts prone in the grass, and went at them. Mack swung the ax awhile, and said:

"By George, Jeff! look at the size of those chips, will you?" So I went off and got a chip at the foot of a stump, a regular old logger's chip, and then he wondered what kind of an ax that fellow must have had. Then he picked up a log two sizes too big for him, and staggered off with it hugging tight on his shoulder and the wet bark rubbing off on his neck. I heard it when it went into the boat. When we got back to camp Valentine was down on the bank with my rig and landing net and the precious box of bait. Said he was going to practice a little on chubs. He made bad work putting on the bait—squirmed as much as the worm did, and then said:

"No, but seriously, fellows, d'y'suppose the hook really hurts the worm?"

"No" says Mack, "just tickles um to death."

*Aug. 22.*—Camp on the Forks. Left the Narrows yesterday morning for a twelve mile paddle, intending to reach the permanent camp by night. The scenery kept improving and at last grew wholly satisfying. We started a few duck, and a heron or two, but saw no habitation of man except the log camp at the Meadows. The river held its width and volume all the way, but now the long quiet stretches are all behind and there's a deep persistence in the current. Bubbles and light debris come swiftly round the bend, and dust atoms and little things seem starting from the shore to fall in the wake and go quickly by. Paddling got monotonous, irksome, utterly tiresome, but at last brought us in the evening to the foot of the long, quick water. We tried it, but the boats, lost to all sense of buoyancy, seemed settling under their load, and behaved like schooners. Sam says "We'll camp here to-night and get out a towing line in the morning." So this morning we knotted all the ropes together, made one end fast to the Birch, with her usual baggage and crew, and Mack and I scrambled along shore to a point 50yds. above. It was here the Birch Bark developed latent depravity. When the line tightened she shot into the current, and in spite of the arguments of both paddles, hung broadside across, with the river piling against her. We leaned back for a harder pull and then came a cry from two men's voices, not blending, but discordant, "Let go! let go-ooh!" so we dropped it like a snake. I was too far back to see, but the expression on Mack's face looking down, told the story: a look of horror. When we got there, they were standing up to their middles, making grabs at floating baggage. The Birch Bark was docile in the dead water made by their obstructing the current.

That was a dismal time. Of course it was raining and the river was right up under the bushes, without a little beach or dry spot for them to land on. Mack and I offered to wade in and be miserable, too, but they said "No," so we let them dictate. The boat had gone clear over with just the extremities sticking up, and most of the baggage staid inside with the water. One paddle went away—cost a dollar, I guess—and a little ax of Sam's—his pet—was no more seen. That made him dejected, and he stood there with a mixed up lot of expressions on his face. He was trying to look the master of ceremonies, as if a thing like this was quite a matter of course in his line, and happening every day or so, but he did not succeed very well on account of the lines of daub on his face, and the shivering effect of the water. All I could make out was he was staring off absently and fiercely training his mustache. Valentine brought him to by remarking he could see something on the bottom; "something shining." His glasses were dim and he couldn't dry them, so Sam made a shade of his hand and peeped down. Then he looked round with a satisfied smile and said, "Ah! canned goods!" He poked about carefully with his shoes, "treading quahaugs," smiled again, reached down and came back dripping. "Then," said Mack, "you ought to have seen the disgusting look get on Sam's face when he discovered that box of bait."

Alas, my box of bait. It had gone into the wrong canoe in the hurry of loading. I felt wrong when I discovered it. I had a premonition then.

Alas, my box of bait. It struck the water so far away you couldn't hear it strike. You could just see the splash.

## AN INTERESTING PET.

SOME years ago, in the spring, while traveling on the Belfast Branch R.R. just before arriving at Brook Station, I chanced to be looking out the car window and saw a curious looking animal run under a pile of brush in a gravel pit near the track. I concluded at once that it must be an albino woodchuck, as my husband had told me one had been seen in that vicinity. At the station I hastily procured a basket and securing the assistance of two boys, I proceeded without loss of time to the gravel pit, and overhauling some of the brush soon found the prize. As I had conjectured it was an albino woodchuck about two-thirds grown, pure white, with pink eyes, and as saucy a little fellow as one would care to handle. Without much difficulty I dropped my basket over him, and securing him, returned to the station, boxed him up and expressed him home to my husband, with instructions to keep him on a milk diet until my return a week later.

On returning home I found my pet ensconced in a nest of cotton, purring away like a contented kitten. He seemed quite reconciled to the restraints of captivity, had already become so tame as to allow his beautiful snow-white coat to be stroked, and seemed especially to enjoy gentle stroking about the face, which I think is a characteristic of most wild animals, and one of the readiest of establishing confidential relations with them. For the first year his food consisted principally of bread and milk, with an occasional handful of plantain leaves. A most interesting sight was to watch him while being fed. He would sit up like a squirrel, holding his food in his paws. He soon learned to take his milk from a spoon; grasping it near the bowl he would hold it very gracefully until the milk was all lapped out, then with a little assistance would return it to the cup to be filled, and repeat the operation until his appetite was satisfied. Then he would go into his nest, roll himself up like a kitten and take a nap of several hours. With one exception he never showed his wild, savage nature during the two years of his life in confinement.

Early in the fall the disposition to hibernate began to show itself by his lack of activity, and he remained in his nest most of the time, his sleep becoming so profound that he could be taken from the nest without awaking. About the 1st of November his sleep for the winter began; he was placed in the cellar, where the temperature was very even—just above the freezing point—and here he remained without being disturbed until the middle of March.

During all this time his body remained cold and to all outward appearances lifeless. About the time of his awaking in March, upon visiting him and placing my hand on his body, I found it to be quite warm, and after rubbing him for a few moments he began to yawn and stretch, but did not get upon his feet. The next day I took him into a warm room in order to watch the process of awakening, rubbing his body and legs for an hour or more. He seemed quite indifferent to my solicitude on his behalf, but gradually awakened, opened his eyes, chattered his teeth and gave that peculiar whicker so characteristic of a disturbed woodchuck.

His efforts to stand upon his feet were for some hours ineffectual; he seemed to have lost the use of them. Toward night, however, he seemed to regain full control of all his faculties, and partook of a little milk. I was surprised to notice but little loss of fat during the long period of sleep. He had become excessively fat before going into his winter sleep, and expected that would be absorbed during that period. His fur had become long and of a beautiful sivery gloss, so white and silky that it was really a pleasure to stroke and pet him.

Upon his first awakening and for a day or two he seemed to have forgotten his friends, and manifested his wild nature so much as to make himself very disagreeable. He ate with a voracious appetite and began to grow thin. In a few days he became a mere skeleton of his former self, and for several weeks, until June 1, did not begin to take on flesh. He now displayed more activity than any other time during the year.

The following winter his sleep was interrupted once in two weeks. This was done by wrapping him in warm flannels and placing in a warm room; he partook of but little food, and during the period of two days of broken rest he seemed very uneasy. About the last of March, when he should have awakened to activity, he was taken sick, and died in convulsions after a sickness of two days. I now have him nicely mounted in my collection, among which are several albinos, but none so perfect as my beautiful pet.

The woodchuck has often been spoken of as a stupid and uninteresting animal, but my own experience was quite different. My husband is a great lover of pets, and possesses the rare faculty of controlling them almost at will. When in the woods I have often seen him approach a squirrel and feed it from his hand with nuts or a bit of bread. And many a long tramp have we taken to secure some coveted specimen. He is one of the few that never wantonly destroy life in bird or animal; were there more such men our forests would now abound with game.

SPECIAL.

## MINKS AND THEIR WAYS.

*Editor Forest and Stream:*

One of your correspondents has asked if minks climb trees. My observation is that there are two varieties of mink. The more common is reddish brown in color and is found on creeks and water courses feeding mostly on fish. The other variety has a very shining jet black fur, and is found in the deep forests far from creeks or any fish-bearing water.

I was walking through the woods one fine October day some miles north of Muskegon Lake in Michigan. It was an oak forest. Acorns were falling and black squirrels abundant. What I took to be a black squirrel started up a few yards in front of me and running a short distance began to climb a large oak. As he was disappearing on the opposite side of the oak as the custom of squirrels is in climbing a tree, something in his motion attracted my attention, so that, after passing the tree, I looked up to see if the supposed squirrel was yet in sight. About 40ft. up on the body of the oak was a fine large specimen of black mink. I shot it and passed on.

Again in a heavy forest about six miles from water I found where a mink had established himself by the body of a deer killed by some hunter and not found. The mink had his holes in some rotten wood a few feet from his fortunate supply of food. The men with me dug him out and it was a black specimen.

Fishing one day on a creek in Utah, my companion called my attention to a large hawk sitting on the largest of several small trees growing in a clump on the creek bank. On our approach the hawk left in unusual fright, and a mink was seen on the tree, and within reach of the hawk when he left. They were some 15ft. from the ground. I infer, therefore, that both varieties of mink climb trees in pursuit of birds like a cat, but that the black variety, from necessity, climbs most often. I have often been amused to see with what cunning minks try to conceal themselves. It is by curling up like a kitten and lying still just when they discover danger, if no cover is near. I saw one do it on top of a heap of dry brush, one on greensward by the bank of a creek. Shooting at the mink, my bullet passed through its body three times.

GEORGE H. WYMAN.

BOISE CITY, Idaho.

[Only one species of American mink is known. This varies greatly in color from reddish to almost black. Several of the mink's near relatives, as the marten and the fisher, are most expert tree climbers and pass much of their time among the branches of the trees.]

# Camp-Fire Flickerings.

"That reminds me."

Z HAD passed through the various stages from devil to associate editor on a large city paper. Feeling the weight of business cares and the need of recreation he availed himself of the invitation of a relative, A, to spend his vacation in the country. A had planned a hunting trip, and as Z had never handled a gun, A had some difficulty in teaching him the use of it. However, he soon became fairly proficient in its use, and bagged several birds. Upon returning to the house, as was his habit, A fired his muzzleloader into the air and told Z to do the same, which he did. As he did so one of the hammers blew off and struck his ear, cutting it quite severely. He never flinched, and did not notice that the hammer was missing, but very stoically remarked, "Say, A, guns make some very queer sensations in a fellow's head, don't they? At first it fairly deafened me, and made my ears ring for some time; and now when I shot it made my right ear sting as if it had been cut, and it feels as if there was blood running down my neck." A collapsed.

## WILD RICE—REEDS.

*Editor Forest and Stream:*

Recent articles in your journal on the subject of wild rice have been very interesting. We dwellers along the shores of the river Delaware have been hearing of this famous grass for years. Many of us have rather hungered and thirsted after a sight of one of those natural rice fields into which the Indian pushes his canoe and out of which the craft comes loaded with food to the rail. What sort of a looking grass is it? some of us have asked ourselves. What descendant is this of the wrestling seed of Jacob that will bob up serenely in any depth of water from two to ten feet? And some mad enthusiasts had a mind to send for a bushel of wild rice and plant it along these tide-swept shores of ours, and let it hustle for life amid the familiar, towering, bird-haunted grass we call the "reed." The reed is all right in its way. It is a pretty thing to see. Moreover, the reed bird, named after the thing he feeds upon, doth annually pause in this tall growth long enough to allow us to shoot him after he hath made himself fat beyond measure with continual stuffing of reed seeds. Yet we had a notion, look you, that wild rice would be an improvement. It might cut pranks and drive the reed out. Perhaps the reed bird would wax so very, very fat on rice that he could not fly, and in that case we could just walk up and pluck him off his perch in our plantation without the trouble of shooting him. By all means let us try this little experiment. Let us send on for a bushel or two of this wonderful rice.

And now comes the learned writer in FOREST AND STREAM who will have us to understand that wild rice is *Zizania aquatica*, and that it looks like the picture accompanying his paper. At sight of that cut I did not know whether to laugh or to smile. I finished by staring in perfect gravity—staring long and intently. For therein I saw the counterfeit presentment of the multitudinous "reed" of the Delaware River.

It is all very well to say I should have known better. But I submit that when everybody hereabouts was continually saying not only "reed" but "reed bird," and just as continually avoiding all reference to "rice" in this connection, it was altogether in order for the wayfarer to be deceived. No doubt there are people up and down the valley of the Delaware who have known that the wild rice and the reed are one and the same. And besides these there are others, "smart Alecs," who will stoutly deny they ever went astray on this point. Yet how very silent these have all been, while people in general have been talking reed, reed, at the top of their voices all day long! It is only one more illustration of what comes of relying on "common names." Surely the botanist is in the right of it when he insists, for sake of clearness, upon his "*Zizania aquatica, L.*," and will have none of "Indian rice," "wild rice," or (heaven keep us!) "reed."

CHESTER, Pa., Sept. 15. T. CHALKLEY PALMER.

[Who can give any other common name for this plant? We now have wild rice, Indian rice, wild oats, corn grass, reed. Next.]

## A BIG DEER.

A FRIEND in Essex, N. Y., writes that an unusually large buck was killed near Reber, a little town in the Adirondacks within five miles of Lake Champlain and the Delaware & Hudson Railroad, Sept. 10. He was driving from Elizabethtown to Essex, and says, "Between the Pine Woods school house and Reber there were many (hunters) hounding deer, the first day of the season. We passed a man by the road side with a tired bound lying beside him. He was so tired out he didn't open his eyes even at Varro (K's dog). Beside him was the largest buck I ever saw. It had been shot about an hour before, and was still warm. The man said he weighed 300lbs. and I have no reason to doubt it. He had a fine set of horns!"

I wonder if this is one of the "muley" deer that hunters in the eastern Adirondacks describe, and of which class the big deer reported in FOREST AND STREAM six years ago is probably an example? That deer was said to be a caribou, but one of the hunters who put out the dogs on the memorable occasion that resulted in his death, has described him to me as being low and stockily built, "like a mule," short legs and very large feet. He was a great fighter, and instead of running before the hounds, would meet them in battle in the silent depths of the forest, so that some of them would turn up missing, while others would be much the worse for wear. In the end, after he had administered many defeats to his enemies, he was at last driven out into the open and shot, through the efforts of George James and Bill Hayes, assisted by a famous dog that was "part bull" and a wonderful fighter, and who, with the backing afforded by the two hunters (who followed as closely as possible), broke through all the buck's guards and bested his subterfuges, and finally got him out of the protecting shadows of the woods—whereupon he was promptly converted into venison by the hunters lying in wait.

Two years ago, on the west side of the Giant, I myself while still-hunting, came upon some enormous deer tracks. They were defined in the black mud of a little spring, and were so large that I hesitate to tell their size for fear I should not be believed. I told George James of these tracks, and he said they belonged to a deer of the same variety as the big one he and Hays had driven out. He said that in his opinion there were two varieties of deer in the Adirondacks, the ordinary Virginia deer, and a larger kind, fearless of dogs, slow in running, but strong in fighting, short-limbed and stockily built.

I heard afterward of efforts, that terminated in every case unsuccessfully, to drive the big deer whose tracks I had seen down from his stronghold on the side of the Giant, but he always threw off the hunters and hounds and came out first best, and is probably roaming his native hillside at this present moment.

The question of these big deer is a curious one, and if any reader of FOREST AND STREAM knows anything about them, it would be interesting to hear it. B.

## DUNKINFIELD BY AVOCA.

WHEN I dwelt in North Carolina last winter and wrote my series of "Winter Sports of the Old North State" for FOREST AND STREAM, I failed to speak of Avoca, the most novel and interesting of all the places in the eastern counties. I did not get around to the locality until the middle of May, and then the only legitimate sport was fishing for large-mouth black bass in Salmon Creek near at hand. I have a photograph of the catch, which for size and condition would be hard to duplicate in any water.

When I crossed the head of Albemarle Sound from the railway terminus at Edenton, a stretch of twelve miles in width, in quest of Avoca, my impression was that the place was a fishing village, for I had heard and read much of the vast quantities of herring and shad taken there; but I discovered my mistake when the steamboat came to its landing and your whilom correspondent, Dr. Wm. R. Capehart, an ex-army surgeon, welcomed me in *propria persona* as lord of the manor. To be sure, Avoca is a post office, and there is a large general store there, with half a dozen small steam craft and seine boats tied up at the wharf and at moorings; nevertheless, the Doctor is master and proprietor of all, and Avoca is a gentleman's plantation and nothing more. Yet it is vast and impressing. So interesting is it in its details and in its magnitude, so unlike most estates on this side of the Atlantic and so like those of Old England, that I am promising to give your readers next November, when the quail shooting is on and the foxhounds take the trail, a comprehensive illustrated sketch of the whole vast menage. I had almost written *manege*, for, indeed, a ride across the country in saddle, after hounds of the finest strain, is a school of equestrianism not to be treated—shall I say cavalierly?

Dr. Capehart has blooded stock and poultry of all kinds, perhaps a hundred head of each species, and he runs fifty plows and 150 plantation hands of the old type; and he raises great crops of cotton, tobacco and corn—and melons, and in November, when the garish autumn tints begin to fade and the grass and leaves turn brown, and the pigs are let loose among the old pea vines and ground nut litter, such stampedes of partridges one is likely to see when riding across the following fields, that he can hardly believe the plantation would harbor so many birds.

Now, the Doctor is not poor, nor penurious. He spends his summer at his Newport cottage in Rhode Island, and his winter and springs at home among his pet stock and wild game of the estate. He realized $10,000 last spring from his catch of shad alone, and I guess, or reckon, that the proceeds sufficed to see him comfortably through his vacation season at the North. So I judge that it was from love of pure good fellowship and a simple desire to share his sport with worthy sportsmen, that he built, two years ago, right on the bluff which overlooks the Sound, a tasteful and commodious shooting box which he calls "Hotel Dunkinfield." It has been advertised in FOREST AND STREAM, in a business way, but modestly. It is "hotel" because the Doctor does not intend to pamper greedy gormandizers by offering them the range of his shooting grounds and free board, gratis, for nothing in addition. I wonder if any self-respecting sportsman would presume upon his largess, if he did? He employs a caterer and guides, and I believe the tariff is mentioned to be $2 per day, or $10 per week. The manager's name is S. W. Everitt, and I know him personally to be a worthy and efficient host and an intelligent all-round sportsman who can bait a trap, tree a coon, call a turkey, shine a deer, start a fox, swing a rod, and rope a bear. He is keen on anything that runs, flies or swims.

Deer and squirrel shooting are permitted by the game law during September and October, for venison is best just before the rutting season. Partridges (quail) are in order on Nov. 1, and the house opens for guests at that date, though I dare say that Mr. Everitt can take care of a party before that time, if written to.

I am sure, Mr. Editor, that you will be willing to permit this much in the common interest of us all in full assurance that a more complete and interesting description is to follow as soon as I can get on to the ground again the latter part of next month.

CHARLES HALLOCK.

## BIG GAME AND BIG FISH.

THE scenery, hunting and fishing along the Pacific extension of the Great Northern Road in northern Montana cannot be duplicated any where east of the Rockies. Having spent several months in the country through which the extension runs, I will try to give you a few facts regarding it:

The first station at the foot of the mountains on the eastern side is Midvale, near Two Medicine River and lake, in both of which are found speckled and salmon trout. The country about Midvale is par excellence all that a sportsman could wish. Birds there are, and fish, and four-footed game—bear, deer and the like, and no snakes. An hour's ride up the mountains, on a grade not noticeable and as smooth as a prairie road in Iowa or Illinois, brings us to Summit Station. This is the lowest railway pass in the Rocky Mountains. Here two streams have their sources. One, the Marias, flowing east to the Atlantic, while the other, the Flathead, a few yards away, flows west to the Pacific. Fish in them? I should say so. As soon as they get 200yds. headway fish are plentiful, and you must be a poor one with the rod if you cannot fill a bag or basket. I had with me a few dozen Irish trout flies and the first day I was there I tried them. Half a mile from Summit there is a little bridge. I began there, and between that bridge and a culvert at the mile post I caught upward of fifty speckled trout, some so big I couldn't land them for want of a net. I had a man with me, and it gave us as much as we wanted to do to get them home. Next day I tried the eastern river. It was more difficult to fish in it, but the trout were heavier. I caught three and a half dozen, and they were beauties. For whipping these streams big flies should not be used. A No. 10 hook is large enough, and green-body, brown-hackle, yellow-partridge, turkey-brown, and black-gnats are the best and surest killers.

I staid some time at Bear Creek with old "Two-Links-Ahead," the foreman of a track gang. He has a rich Munster brogue and it is a positive pleasure to hear him giving orders. There is beautiful timber here, so straight it would make excellent masts for small craft. Here, too, is the finest mountain water in America. Mountain upon mountain rise here and in the midst of all is a valley wherein lies the deserted village, the once famed McCarthyville, the track graders' home, now given over to the coyotes, save for two ranchers. From indications placer gold will probably be found here one of these days. A bald mountain rises from Bear Creek and on it can be found the finest grouse shooting in the Rockies. Seldom a train passes down the west side of the Rockies from Summit to Kalispell that passengers do not see deer and occasionally bear from the car windows. Engine firemen shy coal at wild game every day. I am told that the station agent at Java was alarmed one day by the appearance of three bears on the platform, and locking himself in telegraphed to the next station for the track gang to return and help him. From Belton Station the noted Lake McDonald is reached. This is a beautiful body of water high up in the mountains and full of fish. A snow-peaked mountain comes right down to its shores, and in the timber big game is found. Indeed, one need only to go from any station west along the line for hundreds of miles and find excellent fish and game resorts.

I cannot close without remarking on the excellent railroad work done on this extension. It is a marvel of completeness, and I think I am safe in saying it is the safest, smoothest, and best ballasted road in the West.

JOHN ATKINS.

SUMMIT, Mont., Sept. 6.

## CHICAGO AND THE WEST.

[*By a Staff Correspondent.*]

### HORICON SHOOTING CLUB.

CHICAGO, Ill., Sept. 17.—On Sept. 1, 1891, I took a trip to the Diana Shooting Club's grounds on the great Horicon Marsh, of Wisconsin, and made some mention of it later, it being my recorded belief that this was without question the greatest duck marsh now left in the section visited habitually by Chicago shooters. It was at that time stated that the Diana Club held the lower half of the marsh, and that the upper portion was leased by quite another club, the Horicon Shooting Club, better known as the "Upper Horicon Club," with headquarters at Fond du Lac. This upper club marsh I did not then visit, and intended to accept the invitation of Mr. A. R. Keating the club manager, for opening day, Sept. 1, of this year. This also became impossible, and it was only this week that I was able to carry out the long-cherished intention of completing the investigation of this interesting country and of learning more about the gentlemen who control it.

Mr. Waters and myself were met at Mayville, the pleasant village on the east side of the marsh, by Dr. G. J. Clark, the president of the club, who forthwith carried us off to his home for dinner. On the following day Dr. Clark and Mr. F. M. Lawrence, the able attorney of the club, took us over to the club house on the marsh, a pleasant drive of eleven miles through a charming rural country.

### FIELD FOR AN ARTIST.

It is hard to see why American artists and writers need go to other countries for their themes. The searcher for the quaint, the simple, the picturesque, the beautiful, has in America as wide a field as in Europe, and one much less trodden of the general. Were I an artist or a writer in search of new and fruitful country, I should not go to Europe, but to Mayville. The simple German folk who now occupy that country are odd and interesting as any old Acadians and the country itself is something unknown to the picture-makers, though with a character pleasingly distinct. On our ride we passed through a gallery of small landscapes. Each turn of the winding road brought into view some vista, some corner, some framed view some landscape wide or in little, which should be a keen joy to a natural American. I am not sure I have ever seen a country so full of pictures as this, unless it be central New Mexico, which also is unknown to artists more's the pity. Much of the charm of the Mayville country is due to the Rock River, here a swift, shallow rocky stream, winding in the most careless way among the hills; an excellent bass stream for the fly, moreover, and one well worth remembering. A week of Mayville fly-fishing—whole books have been written around less interesting themes.

### THE MARSH IN PERSPECTIVE.

Our road finally took us high up on the great rock ledge which frames this marshy basin on the east, and looking to the west, north and south we could see the great green sea stretching out, nearly twenty miles north and south and more than five miles wide from utter edge to edge. Below could be seen the wide water of the "Big Lake, on the Diana grounds, and directly west lay the main lake of Horicon Club. The east branch of the Rock River which runs through Mayville, we had now left behind us, emptying into the lower marsh. The west fork of the Rock, which expands and makes the upper marsh, we could trace in the distance beyond the marsh, to the point where it loses its identity in a wilderness of rice and weeds.

A great deal of open water was visible all over the marsh, a pleasing contrast to last year, when it was almost impossible to get about at all.

"Much of the open water is now in what we call the 'burnt holes,'" said Dr. Clark. "Last fall in the dry weather all the upper end of the marsh burned over, or at least did so in wide strips. The peat burned down two feet deep, and all the vegetation was killed. The water has now overflowed this burned region, and made a series of open ponds. This year you can go all over the marsh with boats, though all this open water you see is hardly more than two or three feet deep."

### AT THE CLUB HOUSE.

We presently arrived at the club house, a comfortable two-story building, and went directly out on the marsh to get a better notion of it, and to see if we could get some evening shooting. Both Mr. Lawrence and Dr. Clark are old-time duck shooters, and know the marsh to a dot. They told us that we were both too early and too late for good shooting, the local ducks having been shot at until they had grown wild, and the northern flight not yet having come in. Of snipe none at all were left, the mysterious early flight of August having left not a bird. As to the shooting, however, we were careless for the keen air of the coming fall put zest into mere living, and made poling a boat a pleasure bordering on luxury. We found the typical Horicon boat to be very small, sharp at both ends, and barely sitting out of the water, though undecked at either end. Compared with

one of these crafts the ordinary Green Bay boat is an ark, and it looked ticklish to see the frail craft careen as one stepped in. We realized early, however, that as usual the country had developed the boat best suited to it. All the Horicon shooter needs is bare transport for himself and shells. He has no rough water to weather, and the worst of tipping over would only be a mud bath, while every ounce he saves in weight off his tiny craft is of value when it comes to pushing through banks of rice, or pulling over a dry "carry" to a channel leading to the further recesses of the wilderness of log and solid vegetation.

We saw no one taking out decoys, and inquired about it.

"Well, the fact is," said Mr. Lawrence, "you know it is against the law to use decoys in Wisconsin. It is often done, but we do not use them here."

This was news to me. I knew the clause about building blinds beyond the natural cover, but had never heard of the decoy clause. I do not find reference to this in the *Book of the Game Laws*.

We crossed about a mile and a half of open water in the main lake and came to a point where the channel narrowed down to a couple of hundred yards in width. On the east side of these narrows is the "Center Point," the best fly-way on the marsh, as the birds following the big water above and below usually cross this point. Here our friends left us and went two miles further down the marsh. It was now toward evening and the flight began in a short time. It was not difficult to see that the birds had been educated already in their young lives. They crossed the point high and wide, and offered little shooting. West of the channel, over the wild rice, the flight was heavy and the shooting soon became steady. This was mostly on teal, which were following the long and winding "leads" of open water through the rice. We saw very few mallards, somewhat to our surprise, and but very few redheads, though the first bird I killed was a young redhead. Pintails were much more abundant and we saw some few travelers, mostly pintails, come in over the marsh toward night and circle about, after the fashion of new birds. It was evident that, though the shooting was not of the heaviest, there was abundance of birds on the marsh and more to be expected daily, until the great swarms of pintails in October and the late mallards of the last flight.

At the club house we met that evening a jolly party of nearly a dozen shooters, just in from the marsh, and ate an unconscionably large supper, with much hot coffee and a running fire of comment on the day. Other shooters had been more fortunate, some very good bags were brought in, Dr. Clark and Mr. Lawrence as usual being well represented, in spite of their long prospecting journey to the lower edge of the preserve. I looked over the records of the club for some years back, and found that the shooting here has always been of a high order. Between 600 and 700 ducks were killed on opening day of this year, and turning back the pages of the game record, bags of 62, 56, 44, 36, 76, 31, etc., caught the eye repeatedly. There were the usual blank days of course, but a bag of less than 8 or 10 ducks was below the average for the average shooter. As many as 50 gunners have shot on this range at once, and it takes a good number to keep the birds moving.

[With the conclusion of this, next week, will be given a map of the Horicon grounds.]

CHICKENS AND DUCKS.

*Sept. 18.*—The Illinois season on chickens and ducks opened last Thursday, Sept. 15. So far as the meager reports go, nothing very startling in the way of sport transpired in this immediate vicinity. Fox Lake opening day was a sublime failure. A few parties are now out after chickens. Dick Turtle has gone to a point 80 miles west, where he expects to find some birds. Chickens were fairly plentiful around Chillicothe, well down in the State, but the illegal shooting there was general. From all accounts the law has been less observed this year than ever before. Three-fourths of the Illinois chickens were dead before Aug. 15.

DR. THOMAS AND HIS DEER.

The daily papers here continue to poke up Rev. Dr. Thomas about his three illegal deer. I take the following from the *Daily News* of Sept. 13. Dr. Thomas was interviewed as follows:

By the minister's side on an easel was a handsome oil painting, representing a group of deer drinking from a sparkling mountain stream. On a table close by were two large lithographs of James J. Corbett and John L. Sullivan as they appeared in the great fight at New Orleans. Upon being told of the reporter's mission the doctor laughed heartily and said: "Yes, I did shoot three deer up in Wisconsin and if you have time I will tell you all about it.

"I took my month's vacation," resumed the divine, "in the wilderness of upper Wisconsin. There were two others in the party besides myself. Then, of course, we had our guides and a team to convey the guns and necessaries of life. Of the latter there was little variety. Salt pork, bread and coffee were our main supplies. We started for the forest region from a little lumber camp in the northwestern part of the State, and we did not pitch our tent until we were over forty miles from any inhabitants. We slept under God's canopy and enjoyed ourselves hugely catching fish. We had exciting times hauling in the speckled beauties, but we all longed for a good venison steak, nicely toasted on the coals of a camp fire. Of course fried salt pork and black coffee boiled in an iron pot are not to be despised by a man camping in the bracing air of the pine forests, yet, as I said, we hungered for deer. We decided one night to watch a lake where the guides told us deer would come to drink. We had not long to wait, as I soon spotted as fine a specimen as ever graced the woods of Wisconsin. I raised my rifle, took good aim and fired. It was a true shot and the animal fell over dead. Just imagine the feast we had next day! We ate all that deer except his hide, horns and tail. In our stay I killed two more deer, which were treated in the same way. I can assure you we had no intention of violating the game law, and I killed those deer simply because we wanted meat to eat. In that section of the country the inhabitants consider that under those circumstances I was justified in shooting the animals. If it was breaking the game law of the State it was without intent, and if the authorities so desire I have no objection to paying the fines."

The worthy doctor has several times said that he would just as soon pay those fines as not. If this is only a bluff, it would seem time the bluff were called. To-day I wrote to the State Game Warden of Wisconsin, and inclosed him a copy of FOREST AND STREAM, and just told him, sort of careless like, that we had a man down here who hankered after paying a few fines. Some interesting correspondence is likely to result from this.

If Dr. Thomas is correctly reported, he broke the law in a double sense. He did not stalk and shoot his deer in hunter-like fashion, but shot them in the water. If this was in the day time, the deer were driven into the water by the flies—a pest which has cost many a deer its life when helpless against the summer butcher. The story says it was in the night. Sec. 7, Chap. 374, of the Wisconsin laws forbids all hunting of deer at night. If it was a dark night, we may suppose the divine used a jack light. This is contrary to a further provision of the same section.

To tangle the worthy divine up still more, the *News* interview makes him say in conclusion: "Altogether we had a jolly time, and I intend repeating the trip after more deer next summer."

Dr. Thomas may be incorrectly reported in this. He may kill more deer next summer in Wisconsin, but I don't really believe he will. I am inclined to think he doesn't think he will. E. HOUGH.

175 MONROE STREET, CHICAGO.

## AN AFTERNOON WITH THE RAIL.

THERE is on Long Island somewhere between Oakdale and Patchogue a little creek which I happened to stumble on, or rather into, about a year ago. Some years since one of our most prominent brothers of the gun and rod—who emulates the example of the apostles, and is a "fisher of men," knowing well how to land the old mossbacks who lie under the political roots and wait for the unsuspecting minnow to pass—had this little brulé sown with wild rice, a cereal until that time comparatively unknown on the "South Side."

Year after year Jack Frost did his work and the ripe seeds dropped into the current and found lodgment in the rich mud along the banks, and so the rice beds spread east and west until there was set for our friends the sora a rich feast each autumn, at which he was often joined by that Beau Brummel of wildfowl, the wood duck.

Come with me on one of these soft September evenings. Have Billy B. meet us with his sharpie at the bridge where the old main road crosses the creek, about half way to our home.

"Step amidships, Mr. D. Here's your gun and plenty of shells." All of which is answered by a half nod, and we are off.

"Look out!" from Billy. Crack! from the 12-bore, as a small brown shape tops the reeds. A clean miss. The bird drops, as these follows often do, before I can get in the second barrel. But never mind, we are just coming to a bend where the rice is thick and there must be birds. Steady! Bang! "Mark east!" Bang! "Both down, Billy." "There's another, Mr. D!" Bang! "Killed him, too," and so it goes as we push along for a mile, until we see the mouth of the creek opening into the bay.

The sun is sinking behind the trees and casting a ruddy tinge over the meadow and through the leaves when Billy excitedly claims: "Down! Look up the creek!" I obey and see clear cut against the northwestern sky two black spots, which, carried by whistling wing, are coming right for me. I jump my gun on them as best I can. Both barrels seem to go off at once, and—"vainly the fowler's eye." Two drams and ¾oz. of No. 10 will not stop a wood duck when he is scared. Too bad, but there is my home light shining through the trees to the east'd, and I know my little woman is waiting dinner for me, not impatiently, but with anticipation, for she knows the report of my gun and expects something good from the creek with which to grace our table to-morrow.

Have you a helpmate who can handle a gun and who appreciates legitimate sport? If you have, you can understand with what pride and pleasure I place my string of birds on a platter and present the trophy to my wife.

CHAS. S. DEVELIN.

NEW YORK CITY, Sept. 14.

## SOME MASSACHUSETTS SHOTS.

GARDY EAMES, of Reading, and Phineas Killam, of the same place, hunted all day the first day of the open season, Thursday last, and did not get a grouse. In fact, they scarcely fired a shot. It is true that Ed. Eames, of the same town, fired 5 shots on the opening day and killed 5 partridges, but this is counted as most remarkable, and the other hunters say that he knew where the flock was. But Gardy Eames is one of the finest shots in the country, and he is also an expert with both dogs and gun, and his friends say that if there are any partridges in the woods, Gardy is sure of them. His shooting is something remarkable. A .22cal. rifle is something of a favorite with him. He is a rather nervous man, and probably in shooting at a fixed target he might make some misses. But on a moving object "he is a wonder," so all his friends say. Pennies snapped up a few feet into the air are as easy for him to hit as would be targets of the same size fixed to the ordinary rifle shot. A noted sportsman and a good shot was recently told of the shooting of Gardy, and he refused to believe it. He declared that it was not possible for any man to hit pennies snapped into the air 9 times out of 10, as it was claimed Eames could do. Gardy happened to overhear the remarks of the gentleman, and quietly remarked that the gun was at hand. The gentleman desired to see him shoot. It was in a store that the conversation took place, and there was a barrel of cranberries standing there. Gardy proposed that some one throw up cranberries for him to shoot at. It was done. He fired 3 shots and punctured three berries. Curious to relate, two of the berries were simply cut out in the form of a perfect ring, the little .22cal. slug going completely and cleanly through the berry shot at. The stranger was so much surprised and pleased that he immediately purchased the rifle at a good price, with the intention of practicing himself.

J. A. Faulkner, of Lowell, E. A. Smith, of the same town, and Geo. C. Moore, of North Chelmsford, left Boston Friday evening, on the Pullman train, for the Inglewood Club camps, in New Brunswick. They will be followed by Harry B. Moore on Monday. They go for large game, the season on moose, deer and caribou being already open there. Mr. Leroy S. Brown, of the Inglewood Club house committee, hears that large game is very plenty in the club's preserve and that small game is abundant. Each one of the party expects to capture a handsome head and the chances are good that they will have some fine shooting. The suggestion has been made to Harry Moore that a step-ladder would be a good thing to have at hand, in order that a moose standing 12ft. high may be shot at on a level. The moose is discovered and the guide at once places the step-ladder, when the hunter mounts and shoots. Harry has made a memorandum of this suggestion.

Mr. Wm. H. Goggin, with Dwinel, Hayward & Co., and his friend Dr. Nason, of Hampden, Me., are to make a very enjoyable trip this fall. They hope to start about Oct. 1. Dr. Nason has a brother who has charge of considerable lumbering operationss in Aroostook county, Me., and he has invited his brother and Mr. Coggin to go into the woods with him on a two-weeks' hunts. Staging some 25 or 30 miles has to be done from Houlton and then some 40 miles by teams before the first camps are reached. There are several camps and the hunters will alternate between them. They will be saved the trouble of packing provisions, for the crews of men will be at work and the hunters will mess and sleep at the camps.

It is a wonder that no more of such hunting is done. It is not at all difficult to get in with the lumber people, the bosses generally being glad to have the company of the right sort of hunters, and besides there is the game that hunters who are at all expert can furnish for the camp tables. In Mr. Coggin's case the hunters will be doubly welcome, for the boss is a brother of one of them, and will doubtless go with the party a good deal himself. Last year a party visited the same camps at about the same time, and both moose and caribou were killed, with all the deer the law would allow. Mr. Coggin promises a good account of the hunt for the FOREST AND STREAM.

A happy hunting party is to start from Boston about the 24th of September for the region beyond Moosehead Lake, Me. The party will be made up of D. J. Puffer, of Boston, and well known in the soda fountain business; Mr. H. L. Buss, of the Chamber of Commerce grain trade; Henry La Page, of Medford, and Mr. J. A. Collins, with the Puffers. The Puffers are expert hunters, and go nearly every season, but to Mr. Buss the experiences will be rather new. They have their guides engaged, and starting from Kineo, they will go back till they find big game. Their guides report moose seen, with deer and caribou plenty. SPECIAL.

## AN ADIRONDACK DEER DRIVE.

NORTHWOOD, N. Y., Sept. 14.—We generally have a hunt here on the first day of the running season. The first came on the tenth of this month and we had our hunt. The men who were to do the shooting were at the stands by 6 o'clock, and George Peters who was to make the first drive with his two celebrated dogs. The watches waited nearly an hour before they heard a dog, then the two dogs were heard to start in a small swamp back of "Bill" Brant's.

The men at the stands looked at their guns and then looked at the surrounding trees and brush heaps, they looked and listened for the game for an hour, then they saw it. The dogs led toward Wheelertown and then turned and took another course toward the watchers. "It's a deer sure," said all to themselves, keeping a sharp eye for the appearance of game. A big fox ran along the line. Most of us said a bad word or two when the two dogs came along on the fox's track fifteen minutes after. Two expert deer drivers were sent after the other dogs that had been tied up at Mr. Brant's. The men had resumed their stations when Mr. Peters came back. He was exhorted to go hence.

It was nearly nine when the new drivers started after the dogs. At half past nine two deer were jumped in the swamp where that blooming fox was started. The driver who saw them start got a shot at the spike-horn and broke his leg. The unwounded one led two dogs away and was seen no more. The spike-horn circled and led away like the fox did, turned and came back. He almost went through that deadly line too. Four men shot eight shots at it and the fifth shot two loads of buckshot; one missed, the other hit the poor deer all over.

A deer ran the same day within 10yds. of a man who was stacking corn. The deer is supposed to have been the one that was started in Brant's swamp that morning.

Two bears were killed in the Old Pardee Clearing during the morning of the tenth by Elmer Hamlin and Joe Worden. One of the bears was caught in a trap, the other was up a tree, the tree was cut down and the bear killed with an ax—so Worden claims. Two parties are at Moose River, from this place. RAYMOND S. SPEARS.

### A Tamed Caribou.

HALIFAX, N. S., Sept. 9.—I was greatly interested in reading notes in your last issue about the caribou being so tame, and it reminds me that Capt. Farquhar, of the steamship Harlow, from Newfoundland, brought up with him, by last trip, a fine specimen of this family in the shape of a young buck, I should judge about 19 months old. The animal was captured while swimming a lake and is now for sale. Any one wanting him would do well to write the captain at once. The animal is very tame, can be patted and it likes to be patted, and would be a grand acquisition to some park. The captain feeds it on potatoes, oats, etc. H. AUSTEN.

### To Deliver Shot as a Slug.

REPLYING to Mahlon Gore's question in your esteemed edition of last date, I would modestly say that, for practical result, my experiences South last winter support the following simple method: When off ranging, with only your small shot, take a half dozen shells and with pocket knife encircle the same through to the innermost lining and parallel with the shot side of the dividing wad. The charge then when fired will deliver its shot intact and perforate an inch board from 40 to 70yds. distant, with no increased exposure to either gun or gunner.

GEO. A. FIELD.

### Wild Rice.

IN regard to the wild rice seed inquired about recently I should say that while Mr. Hallock is quite correct about the abundance of this plant on the meadows on the Hackensack River, yet it would cost more to get the seed from them than to buy it. It is kept by all the large seedsmen in New York, Philadelphia and Detroit. I think the price is not more than $2.50 a bushel, although I may be mistaken, but at any rate the seed can be purchased. A few handfuls sown here and there on the banks in the shallow water, first steeped in water to make it sink, will quickly spread and stock a pond or river. H. STEWART.

HACKENSACK, N. J.

## NOTES FROM THE GAME FIELDS.

### Game Prospects in Pike County.

GLEN EYRE, Pa.—The open season on ruffed grouse commenced Sept. 15 in Pike county, Pa., and considering the dense foliage, heavy growth of scrub oak, and general thick underbrush, very good bags have been made. What is now needed is a strong frost, followed by a heavy rain, that would drop the leaves, and give one a fair open sight shot, in place of hip and snap shooting now the only possible method of success. The birds are now in heavy swales and thick laurel swamps, almost impossible for man to penetrate or dog to work.

A good season is expected, and there are certainly far more birds than for the last two years.

Woodcock are fairly abundant and are now showing themselves on the edge of the meadows. The fall flight about the middle of October is the best shooting period.

Quail do not exist in quantities unless in the Delaware valley.

Deer show a large increase over the past five years.

Bear also have been seen all summer and will prove ample sport for those who care to indulge in this style of game.

The best route for sportsmen to take to reach the best shooting ground is via the Erie R. R. to Port Jervis, three hours from New York, and from there by stage, on fine roads to Milford, Dingman's Ferry or Bushkill, where very comfortable hotels may be found and in easy distance from some of the best shooting in the State. Y.

### Nova Scotia Snipe and Woodcock.

HALIFAX, N. S., Sept. 9.—Our woodcock shooting started here on Aug. 20, but I have not given them much attention yet, putting in my spare time with the snipe and picking up odd woodcock on the way. On the 20th a friend and myself bagged 6½ brace of snipe and woodcock, and on 27th we brought back 10½ brace of snipe and woodcock. On Sept. 2 we knocked over 18½ brace of woodcock and snipe, also a pair of bittern that got in the way; but these, with yellowlegs, mud snipe, etc., we don't count as game and pay no attention to them, except they come fooling about when the gun happens to be loaded and pointed their way. I hear of some good bags of woodcock being made by parties up on old ground of mine, through Musquodobit—one bag of 40 brace, another of 20 brace, but then that was with three and four guns, and, after all, it is poor sport, as weather is very warm, covers thick and birds poor. October and the first part of November are the best; then the birds are strong of wing and are in fine condition. On Nov. 1, last year, my friend Wallace and myself knocked over 13 woodcock, 1 snipe and 5 grouse, and they were worth getting. We are off again to-morrow, and expect to make a fair bag; will report later. H. AUSTEN.

### Squirrels in Northern New York.

GLENS FALLS, N. Y.—This appears to be a squirrel year in northern New York, and gray squirrels are more plentiful than at any time during the past ten years. One man killed forty-seven gray and black squirrels just over the line in Washington county in one afternoon last week. Bags of fifteen to twenty-five are not uncommon. Deer seem to be almost as thick as squirrels if one can believe the reports. A friend who has just returned from Harrisburgh, in Warren county, tells me that in one day twelve deer were killed there, and the next day seven more met the same fate. Remember that this is done within fifty miles of Saratoga Springs, and then imagine what the prospect for deer should be further away in "the wilderness." A. N. C.

### Kansas Small Game.

OTTAWA, Kansas, Sept. 16,—The squirrel hunters have been having fine success around here. Last week a party of four went down the river from this place for a couple of days hunting. They stayed one night and part of two days and brought back about seventy squirrels. Besides this they killed one coon, four possums and five skunks, and they didn't keep track of the watermelons they bagged. Several parties have been out hunting prairie chickens lately without much success. A bag of three old ones is the largest I have heard of. F. B.

### New Hampshire Small Game.

CHARLESTOWN, N. H., Sept. 18.—Fishing off! Shooting on! Few birds yet, but great invasion of gray squirrels, the first for nine years. Cannot see now to shoot myself in the thick foliage, but a young friend has been out three times, getting 6, 10 and 6, respectively. Two young men from Claremont are reported to have shot 30, weighing 41½lbs., on the slopes of Ascutney Mountain, a week since, and I hear of numerous other bags. Where do they all come from? Who can answer? VON W.

### Big Game in the Rockies.

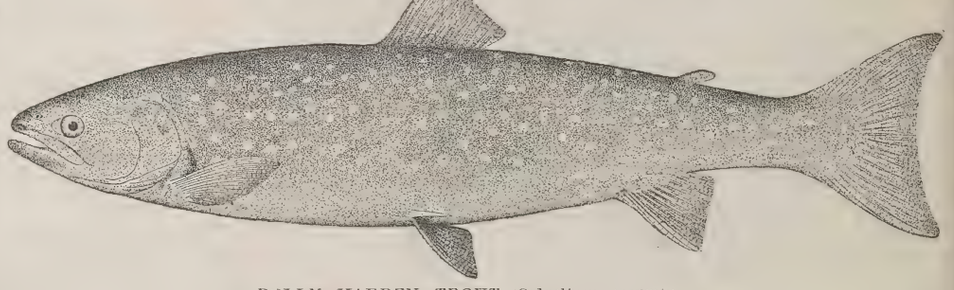
A CORRESPONDENT living on the flanks of the Rocky Mountains wishes to take out a hunting party for big game during the coming month of October. He states that on the ground he is to visit he can guarantee shots at elk, mountain sheep and white goats. The name of our correspondent can be had by addressing Big Game, this office.

### Squirrel Year in Missouri.

SPRINGFIELD, Mo., Sept. 8.—Quail will be plentiful notwithstanding the wet spring. Farmers report this to be "squirrel year." A. E. H.

*Antelope and Deer of America. By J. D. Caton. Price $2.50. Wing and Glass Ball Shooting with the Rifle. By W. C. Bliss. Price 50 cents. Rifle, Rod and Gun in California. By T. S. Van Dyke. Price $1.50. Shore Birds. Price 15 cents. Woodcraft. By "Nessmuk." Price $1. Trajectories of Hunting Rifles. Price 50 cents Wild Fowl Shooting; see advertisement.*

THE HAZARD POWDER CO. has sent us a novel paper-weight, in the form of a small powder canister. It is a perfect *fac simile* of the patent canisters used by this company, but is harmless, being filled with sand, instead of "Kentucky Rifle," as the label would lead one to expect. It is an ingenious idea, well carried out, and should prove a good advertisement for the company.



## Sea and River Fishing.

### THE DOLLY VARDEN TROUT.

IT has not escaped the notice of anglers that the trout native to Eastern waters are, with only a few exceptions, red-spotted, while the species native to the West and Northwest are nearly all black-spotted. In the West the black-spotted forms are numerous, and in the East there is a goodly number of red-spotted species, of which the common brook trout represents one group and the golden trout of New England lakes typifies another.

Dr. Jordan has explained in these columns that our black-spotted trout are the analogues of the trout of Europe while our red-spotted species are in the category of charrs. The East has several charrs; the West has only one, the Dolly Varden. This fine fish is a very near relative of the Sälbling or *Ombre chevalier* of European waters, and of the golden trout, the sea trout of Labrador, and the Floeberg charr of the extreme north part of Arctic America.

The Dolly Varden inhabits cold mountain streams of California, Oregon and Washington, and extends northward to the Arctic regions of Alaska and British Columbia. It is known, also, from Kamtschatka. There is no doubt that the species lives in the Mackenzie and tributaries of the Saskatchewan. It has long been known as the bull trout in Montana, Idaho and Wyoming. Prof. Evermann was reliably informed by Montana fishermen that this trout is common in most of the large tributaries of the Columbia in Montana, particularly in the Hell Gate, Missoula, Pend d'Oreille, Flathead, Bitter Root, and

DOLLY VARDEN TROUT (*Salvelinus malma*).

Big Blackfoot rivers, and in Swan and Flathead lakes. The Bitter Root, near Missoula, is credited with individuals weighing 12 to 14lbs.

The McCloud River indians call the Dolly Varden *wye-dar deek-it*. The name Dolly Varden was applied to it at Soda Springs, Cal., more than twenty years ago, as will appear from Mr. Livingston Stone's notes in the U. S. Fish Commission Report for 1872-73, page 207. The name bull-trout is current for it also in California. Another name applied to the species in Montana and Alaska is salmon trout, while in California it is the brook trout. The Russians call it *goletz*, and in Kamtschatka it is the *malma*.

In the northern portions of its range, where cold water is found at the sea-level, the Dolly Varden enters the ocean and becomes the object of a fishery of some importance; this is especially the case in British Columbia and Alaska.

The Dolly Varden is a very large trout, its average size increasing with its range northward. In Alaska it is not uncommon to catch examples weighing 10 or 12lbs., and equally large specimens are recorded from Montana. When it is recalled that this is one of the liveliest of game fishes in most localities it will be admitted that the West is favored in its possession.

This trout is migratory and passes much of its time in the sea near the river mouths; it enters the rivers late in the fall and descends in the spring. The young, however, remain in the streams during the summer, thus differing in habits from the adults. Mr. E. W. Nelson found the Dolly Varden at Unalaska early in June and in the Yukon River in the same month. The writer also has taken them at Unalaska about the same time. In the Yukon Mr. Nelsom observed them to be most abundant in the fall just before and after the streams freeze over.

There is some uncertainty about the date of the spawning season. J. B. Campbell, who was employed at the McCloud River some years ago, fixes the time in September and until November. This is corroborated by my own discovery of eggs, nearly matured, at Karluk, Alaska, in August. The eggs are about one-half as large as in the rainbow trout.

Mr. Campbell says it is very hard to hold a Dolly Varden, the fish slipping out of one's hands almost like an eel.

In the fresh waters this trout feeds chiefly on salmon eggs, and is justly regarded as very destructive to the larger fish of its own family on this account. Around the fish-cleaning houses at the canneries of Alaska greedy hordes of Dolly Varden may be seen consuming the eggs which are thrown overboard. Specimens taken at sea sometimes have capelin in their stomachs. In fishing for the Dolly Varden no other bait is more effective than salmon eggs.

Natives of northern Alaska make very pretty waterproof clothing from the skins of this trout.

There is, perhaps, no other trout in the West which is so readily taken with the artificial fly. In the summer of 1889 a party from the steamer Albatross caught several hundred in one hour by this method of fishing. Livingston Stone has stated that it will also take live bait with avidity. Mr. Nelson took specimens weighing 1lb. and upward with a brown-hackle and found them game and offering good sport on favorable days.

The illustration of the Dolly Varden trout is copied from Fig. 1, plate XXV., Report on Fishcultural Stations in Rocky Mountain Region and Gulf States, issued by the Government Printing Office.

Capt. Charles Bendire informed me that the bull trout, as it is generally known in the Northwest, is not equal to the steelhead or the red-throated trout either for eating or sport. It seldom takes the fly in that part of the country, being a ground feeder. He says it is softer in flesh than the other two species, and that it is much more voracious, killing every fish near it when closely confined as in aquaria.

"Scarlet-Ibis" stated in FOREST AND STREAM, June 11, 1892, that a California fly-fisherman complained that the Dolly Varden will not rise to the fly, though it takes bait very well, even the "barnyard hackle," generally known as "wums." He was told, however, that it will occasionally take a bright salmon fly. The few he caught were captured by trolling with a mottled pearl bait. Incidentally "Scarlet-Ibis" noted that the fish was spawning in September. T. H. B.

### SAGE HENS AND CUT-THROAT TROUT.

AN article which I read some time since in the columns of your valuable journal, from Doctor Thomas Turton ("Lone Fisherman"), in regard to sport in Snake River section, Idaho, led me to open a correspondence with him, which resulted in my paying him a visit.

Our party, consisting of Jack, Howard and the Old Man, arrived at Beaver Cañon, Idaho, on the morning of July 29 last, where we found that everything had been arranged by the indefatigable Doctor for our trip and for our comfort and pleasure.

After a hearty breakfast at mine host Coulson's, we donned our hunting clothes and were soon seated behind the Doctor's fine team, "John and Bill," and whirled away toward our first stopping place, Mrs. Bell's, some twenty-five miles distant. Before reaching there, however, we let out the Doctor's setter Pat, and in a few moments he was pointing. The Doctor's laconic remark, "Chickens," tumbled me out of the wagon, and a moment later scored my first sage hen; in fact the first I had ever seen. From my imperfect knowledge of the characteristics of this member of the grouse family, I expected to see a bald-headed fowl, wise in its day and generation and more than a match for a charge of No. 7 shot backed by Schultze powder and a correct aim, but this chicken—about two-thirds grown—seemed lacking in the essential quality of speed of wing, which is possessed by our ruffed grouse, and tumbled in a very much demoralized condition at the crack of my little Scott gun. With the remark, "These are too easy, Doctor." He replies, "Wait till September, when they are full grown and feathered and begin to pack, rising wild, you will need a chokebore and heavy charges with No. 4 shot to stop them."

At this season of the year their education is somewhat neglected and they are busy feeding and growing, but no doubt, later, the Doctor's assertion will be fully verified, and they will become sage both in knowledge and flavor.

In less than two hours, we had bagged thirty-seven, all we could use that day, and stopped shooting. Mrs. Bell had a fine supper awaiting us to which we did ample justice, and after a smoke, were soon in bed to enjoy such slumber as we had not had since a growing lad of twelve. It was worth going many hundreds of miles, to enjoy such sleep as we had that night. What caused it? Certainly it was not the luxury of our surroundings, for through the chinks of the logs you could see the stars shining; no Axminster on the floor, and our room partitioned by a cotton sheet. It was our tired brains, diverted from the beaten track of close application to business, by new thoughts, new scenes, new experiences, a complete change, and with it came this sometimes unattainable calm and dreamless sleep.

The morning found us on our way to the hospitable ranch of Mr. G. E. Hopf on Snake River, and distant about twenty-five miles. The saucy sage hens would barely give us room to pass them on the road, which they monopolized for dusting purposes. One, more bold than the others, seemed to dispute the right of way, and foolishly lost its life by being run over, the Doctor obstinately refusing to turn out for its accommodation. Arriving at Mr. Hopf's we were soon at home, and I cannot say too much for the kind attention bestowed on our party by Mrs. H. and her charming daughters.

Here in the morning we first strung up our rods, and under the guidance of the Doctor, were soon fast to a cut throat trout. In my judgment they are rightly named, for aside from the distinguishing red slashes under the throat, they seemed possessed of all the characteristics of a veritable cut-throat, and take to fighting as naturally as their namesake; they do not seem satisfied with a short, hot round, but come up equally as ready and smiling for several; in fact, fighting seems their forte, for it is often a question whether you or the trout will give up first, and many is the one that eventually, after a long, hard struggle, twists the fly from his jaws and is victor. No doubt the purity and coldness of the water has something to do with their staying qualities.

Of the many trout streams I have whipped in the last thirty years, none of them approach the North Fork of Snake River in beauty of scenery or purity of water. The clear, cold water springs from the rocks and starts from its fountain head, a full-sized river, while hundreds of clear, cold springs add to its volume ere it reaches the junction of the South Fork. The water being so clear, it requires a long free cast to land your flies at a proper distance to prevent the observation by the fish of your motions or movements. This makes it difficult to the amateur fly-caster, but to an experienced fisherman only adds to the charm of fly-fishing. This beautiful stream,

however, is doomed to extermination unless the State and county authorities will take some vigorous measures to uphold the laws and prevent the wholesale seining and spearing that has been going on for a year or two past. With legitimate fishing with rod and line, the market fisherman can take his fifty to one hundred pounds per day, and still there will be enough left to satisfy all, but with the murderous spear and seine with its victims of five hundred to one thousand pounds a night, no stream, be it ever so populous in numbers of fish, can withstand such a drain long. Would that the mantle of the Park authorities might be extended for the legitimate protection of this noble stream.

About noon the good Doctor puts our catch upon his back, and making a short cut through the woods we are soon seated around Mrs. Hopf's hospitable board, where we discuss the good things provided and plan for a visit on the morrow to Flat Rock, a famous place for large trout. Here we had fine sport, rarely taking a fish less than 1½lbs. and up to 3¾lbs.

The next day the Doctor, having some business that calls him home for a couple of days, Jack and the Old Man are left to amuse themselves as best they can, and word having been received by Mrs. H. of the expected arrival of some forty tourists on their way to the Park, we cheerfully respond to her request for some trout and chickens for the table. A short trip of half a mile up the river furnishes all the trout she needs, and after dinner we take the mules, and after a short drive are soon at Sheridan Creek, where we expect to kill some chickens. In the Doctor's absence we have no dog and must trust to our luck in walking up the birds. Jack kindly consented to act as retriever, and in walking less than half a mile we kill thirty-two chickens in thirty-three shots, the miss was inexcusable, as it was the fairest shot of the lot. As this was all that Mrs. H. needed, we stopped short, but it was a great temptation to shoot more, as the birds were jumping up all around us, but we firmly adhered to our inflexible rule of no waste.

Each day our time was occupied, the Doctor taking us to portions of the river where we had not fished, and for a change we camped for a day or two. A drive of part of a day will take one where fine fishing in Henry's Lake bottom can be had and over to the South Fork of the Madison, where he will be royally entertained by Mr. H. T. Dwelly and can enjoy some fine grayling fishing, and he wants to kill elk or large game I know of no better place to stay or a better prospect for a shot.

Soon our allotted time is up—how the time flies when you are fishing and hunting every day and sleeping soundly every night!—and we say good-bye to the kind friends at Arangee Ranch and start on our way homeward. We have fine sport with sage hens on our way to Mrs. Bell's. Here is where Jack, our New York bond broker, attempted a new feat for him—of milking a vicious cow, and from the small quantity of the lacteal fluid remaining in a very much demoralized-looking milk pail and the torn and soiled condition of his clothes, it looked somewhat as if he was not a success in that line. He, however, claimed that it was all right; but possibly he might have squeezed that part of the cow's anatomy from which the milk flows a little too hard and thus caused restlessness.

We take the train at Beaver Cañon, but can hardly realize that our outing is over, and we must soon knuckle down to work again. We take with us, however, the recollection of a glorious time, thanks to Dr. Turton's untiring zeal, and that not a trout was caught or a chicken killed that was not utilized.

Should any one desire to take this trip, the Doctor will cheerfully give all the information needed to make it a success, and if you can get him to go with you, you can gamble on getting all the trout and chickens you may in reason desire. OLD MAN.

## THE IRON CITY FISHING CLUB'S CAMP.

ON the romantic and historic Shields's Point: situated at the foot of Lake Talon, Ontario, Canada, at the junction of the latter with the Kabaska River, the two uniting in the Talon Chute in their descent to the Mattawa River, the Iron City Fishing Club, of Pittsburg, Pa., pitched their tents for a three weeks' outing, numbering in all 53 members, with their families and guests, besides a colored cook ("Smoke" by name, whom they had brought with them from Pittsburg) and a retinue of French-Canadians and Indians, who were engaged at Talon. The club arrived at the camping ground on Tuesday, Aug. 9, having come direct from Pittsburg in their special train of Wagner sleepers, the entire trip of 610 miles being made in 27 hours.

The romantic beauty of the scenery at Lake Talon is unsurpassed, and with the ever cool and bracing winds of Lake Nippising, 26 miles west, a party of campers could wish for no more desirable place to spend a few holidays.

Then again, Talon and Trout lakes abound in the ever-sought-for favorite—the black bass, with muskalonge, pickerel, pike and trout. Moose, deer and bear, besides an abundance of pheasant and partridge, were to be found in the immediate vicinity. One morning the campers were surprised to hear from one of the Indians that a black bear had been seen during the night within 50yds. of the commissary tent, having been attracted there by the smell of cooking and provisions.

Several young men and ladies of the party went some miles up Talon, and while quietly fishing from their boats not very far from shore, saw a large, beautiful buck come to the water's edge, take a drink of the water and then quietly and majestically walk off and disappear behind the thicket.

Very few of the gay throng of campers were aware that they were camping on historic grounds. The great explorer Champlain and his party passed that way nearly 300 years ago, as recorded by the historian Parkman, and had perchance encamped on that very spot where the Iron City Club was located, as that is the point where the two routes converge, the one through Talon and Trout lakes, the other through the Cabaska and Nosbonsing to the waters of the Nippising. Nosbonsing is said to signify the "way by water" and Mattawa the "meeting of the rivers." Still further proof of this having been Champlain's camping grounds is the finding of a pewter cup some years ago by Mr. Shields, owner of this tract of land, with Champlain's name engraved upon it, within a very short distance of the Point, it having been very probably carried there by the Indians. The remains of an old encampment, evidently French in its origin, were also found in this vicinity. According to tradition it was near this point where the Hurons, a few years after, to inflict a terrible revenge, totally annihilated a band of Iroquois who had penetrated this region. Several years ago there were quite a number of Indians encamped on the shores of these lakes, as also on a number of other lakes in the vicinity, but when the Reserve was established near Nippising they were all removed there.

Bunton Thirston, one of the Indians employed by the Iron City Club, is a celebrated sprinter of Canada, it being said that he has outrun every sprinter whom he has met and has won a number of prizes at the different country fairs in Ontario within the past few years.

Four of our party went trout fishing one morning in a stream about three miles from camp, and their catch by afternoon amounted to 105 fine fish. Bass were caught, the largest weighing 5½lbs., caught by Dr. Miles, who also caught a 15lb. muskalonge.

Three of the young men had Kodaks with them, and secured some very fine reminiscences of the "Camp of '92."

The officers of the club are: Mr. S. A. Shepard, commissary; Mr. S. L. Wood, treasurer; and Mr. Will Price, secretary. Almost the entire party were Pittsburgers and Alleghenians. There being five ministers in the party, religious services were held Sunday afternoons at 3 o'clock and praise-service in the evenings, being conducted alternately by the ministers. To these services the Canadians of the surrounding neighborhood were invited; who seemed to very much enjoy the Americans' preaching. Two entertainments were given by some of the talented campers, embracing vocal and instrumental music, recitations, character sketches, etc., which were largely attended by the neighboring Canadians. The singing of "God Save the Queen;" by both Canadians and Americans, being a prominent feature of the entertainments.

The scenery on the Mattawa River, some two miles distant from camp, is most beautiful, there being ledges of granite in some places nearly a hundred feet high and descending perpendicularly into the river. Huckleberries, blackberries and red raspberries are found growing in large quantities along the shores of all these waters, and the campers took advantage of this opportunity to have plenty of berries at meal times.

Several weeks before the Iron City Club's arrival Mr. Shields saw what appeared to him to be his two horses grazing on the elevation where the camp was located, but upon closer investigation found it to be two large moose.

On Thurday, the 25th of August, we broke camp, very regretfully, it must be said.

At every station where a stop was made in Canada the boys of the party would give the club yell: "Iron City Fishing Club, of Pittsburgh, Pa. We are the people of the U. S. A. Hurrah!" which apparently greatly astonished the Canadians, who evidently thought we were a clever lot of campers. ONE OF THE CAMPERS.

## UTAH FISH AND GAME NOTES.

IN CAMP, HEAD WATERS WEBER RIVER, Utah Territory, August 24, 1892.—I peruse FOREST AND STREAM with much interest; it contains a great amount of valuable information.

I was born on March 1, 1807, at Avon, Hartford county, Conn., on the banks of a trout brook which had turned the wheels of a flour mill and a saw mill, owned by my grandfather and father, for many years. As soon as I was old enough to carry a fish-rod I commenced catching trout, which I have continued to do, from time to time, for nearly 80 years.

Several years of my life were spent in Ashland, Oswego Co, New York, on the east border of Lake Ontario. While there I assisted one morning in catching 500 salmon, very few of which were under 20lbs., while a few weighed 40lbs. My first experience in fishing with fly for trout and salmon was in England and Scotland in 1845; but I met with little success there.

At the time of the early settlement of Utah Territory, the mountains and canyons were thickly inhabited with the elk, deer, antelope, panther, mountain lion, wild cat, and grizzly, cinnamon and brown bear; some of which were of immense size. These animals are still found in our mountains, and are frequently killed. I never shot a bear, although I have seen quite a number of grizzly and cinnamon bears after they were killed. In one instance a very large grizzly, with two large cubs, passed within 30 yards of me while I was concealed in the brush. I was, at the time; holding in my hands a muzzle-loading gun, and the manner she treated her cubs, while apparently trying to wean them, plainly indicated the wisdom of my letting her pass unmolested, and assured me if I should fail to kill her the first shot, see would attack and kill me. Hardly half a mile after passing me, she came upon a camp, some of the men fired at her several times, but she got away, with her cubs. I have killed deer and antelope but never elk, although upon one occasion a band of more than 200 came within 300 yards of me, and were headed towards me, but were frightened off in another direction by a man without a gun who came running to see me shoot an elk; a companion hunter, however, shot and killed one of them. We think deer are increasing in our region. A good many elk and sheep are still in our mountains, but difficult to get at. Deer, antelope and elk are quite plentiful north of us, in the Snake River country, now Idaho; and moose are taken occasionally. Some six years ago I met a young man up there who shot 16 elk and 2 moose out of one band, and he said he might have killed more, but to do so would only have been to waste them.

Utah, Bear, Panguitch and Fish lakes, as well as other lakes, rivers and streams, abounded with the largest and finest trout when we first reached the Territory, but as the country has become settled they have steadily decreased; still our waters supply quite an amount of trout at the present time. Some years ago, one warm day in June, I helped to make a haul at the mouth of Provo River, the trout having gathered about the river mouth for cooler water, (the fishermen had made several hauls during the day, out in the lake, and took some 500lbs. of fish) and when the net was drawn, the draft was judged to be about 4,000lbs. A great number of trout weighed 10lbs. each, on the scales. As it was night, and having a great amount of dead fish on hand to be saved, after taking out several hundred pounds of the largest fish, the rest were turned into the lake alive. I saw one trout caught in Utah Lake, by net, which weighed 18lbs.

Trout and salmon have been successfully hatched here, under the supervision of Hon. A. P. Rockwood, who is now dead; the eggs having been supplied by the late Fish Commissioner Seth Green. The fry were put into Utah Lake and the tributaries of Bear Lake. Mr. A. M. Musser, our local Fish Commissioner, about three years ago put into Utah Lake 1,000,000 shad fry, and I am happy to say that this effort to stock Utah Lake with shad bids fair to be a success. Although these fish are as yet protected by law, some of them, on one occasion, found their way to the market and weighed 2¼lbs. I assisted Mr. Rockwood, several years before, to put in our river Jordan 5,000 shad fry, but the venture was not a success.

About 12 years ago I visited Bear River Valley and fished 4 hours in a creek leading into Bear River, with a rod and reel, and caught 20 trout, four of them weighed a little over 4lbs. each. Upon this occasion I hooked and brought to sight one trout, I think, of 10lbs. weight; but on account of the perpendicular height of the bank I could not land him.

Concerning wild fowl; for years our lakes, ponds and streams were alive with pelican, geese and ducks; and chickens and sage hens were numerous in the hills; but as the country is being settled, our feathered game, too, correspondingly diminishes. Chickens are now mostly confined to the distant hills and canyons. During the last few days we have killed 30 chickens near our camp. One of our company started a flock and shot nine times on the wing, dropping 9 birds, the tenth shot brought down 2, the balance of the charge striking the side of a rock, glanced and hit a young man as he was mounting into the saddle. Seven shots lodged in the man and eleven in the horse; the man was hit in the throat, shoulder, back of head, and right knee. Nothing serious, however, resulted from the accident. WILFORD WOODRUFFE.

## SUSQUEHANNA BASS FISHING.

WE have referred to Eugene Snyder, Esq., of Harrisburg, Pa., as one of the successful bait fishermen who does not take stock in artificial flies. Mr. Snyder's experience as related below is interesting, since it goes back almost to the earliest days of bass fishing in the Susquehanna.

"There are conditions of water and the weather when bass will and will not bite, and the secret of that has never been learned by any one. I have fished for half a day, using different kinds of bait, minnows, lampers, helgramites, crabs and worms, when, all of a sudden they would begin to bite without my knowing why, or pretending to do so. I have often observed that bass become voracious for food just before and approaching a storm, but whether the inducement is through electric currents or not I was never able to find out, I believe that when the conditions are good bass feed from the surface, that they can be caught by partially sinking the fly, say twelve inches and drawing it through the water, to make it have the appearance of a living fly dropped into the water and struggling to get out.

"I have done a great deal of fishing. I remember in 1875, during the close season for bass, when the late Dr. Dock, Dr. G. H. Markley and myself were fishing near the Dauphin county shore, below Green's Dam, that we had our first experience in catching bass. Since the season opened in 1876 I believe I have caught thousands. The first year's fishing was better than now. A number of my friends and myself as early as 1876 caught large strings at Collins's, at the foot of the Conewago Falls, quite a celebrated place. After that Col. Charles E. Roumfort and myself caught literally hundreds and hundreds of bass at the Cove Forge, below Duncannon and at Losch's Run, above Duncannon. We have a number of times caught fifty or sixty before breakfast; now you can scarcely catch that many in a week. There are less bass in the river now than in former years. I believe the cause of it is the spring floods that rile the water and destroy their spawning beds, carrying many below the Columbia dam."

## THE TEXAS JEWFISH.

*Editor Forest and Stream:*

Noticing your query in connection with my letter published in FOREST AND STREAM of July 7, as to the identity of the jewfish found in the waters of the Gulf Coast of Texas, after considerable inquiry and research I would reply that the particular jewfish in question is undoubtedly the jewfish or warsaw referred to on page 412 of "Fisheries and Fishery Industries of the United States," published by the U. S. Fish Commission in 1884, and illustrated in plate 165; being the short-spined variety, or *Promicrops guasa*. These fish are frequently caught in this neighborhood, weighing from 300 to 600lbs.; while, as I understand it, the black grouper seldom attains a weight of more than 100 to 125lbs.

Captain Mitchell, Deputy Collector of Customs at this port, who has been connected with the revenue service on this coast for the past twenty-five years, and who is a close and intelligent observer of matters of this kind, states it to be his opinion, based upon his long experience, that the black grouper is not found on this part of the coast, but that all the jewfish he has ever seen caught in these waters are of the species mentioned above.

I inclose a photograph of a Texas tarpon to add to your collection. This fish was caught two or three weeks ago from one of our wharves and measured 6ft. 10in. in length, and a few days later a lady caught one nearly as large at the same place. J. S. PETER.

CORPUS CHRISTI, Texas.

### A Whale Convention.

IN September, 1890, while on a cruise in the Gulf of Georgia, B. C., our party saw a great number of whales. We were becalmed for several days on the gulf and during that time the whales seemed to be having a grand re-union, or "potlatch", and were then in large numbers all around and sometimes within a few rods of the sloop, puffing and blowing like steamboats. The large thrasher was also on hand, making his presence felt, and we saw many battles between these marine monsters, during which the spray would be thrown high in the air, while the surface of the water would be lashed into foam. On one occasion our party saw a large whale jump entirely out of the water. At times we would see the long, scythe like tail of the thrasher rise out of the water at least 15, and I think 20, feet in the air and then come down with a splash. The general color of the tail seemed to be dark, with white splotches on the sides, and, I think, from what we saw, that the animal must at times reach the length of forty feet. H.

## BLUEFISH AT CHATHAM BEACH.

BOSTON, Mass., Sept. 16.—For the benefit of my fellow-sportsmen, I give you and them the following account of one of the future fishing grounds of the New England coast. I say "future," for Chatham Beach has not to my knowledge the reputation it deserves. It is undoubtedly among the best shore bird grounds that we Massachusetts gunners have, and perhaps its reputation in that capacity has overshadowed its bluefishing. Then, too, up to last year, there was no hotel or even boarding-house near enough to the fishing ground to allow fishermen to watch for opportunities and take them when they come. Now the hotel on the beach itself is becoming as much a summer and cool air resort as it is a sportsman's home. The beach has to be reached at low or half-tide, because it is an island at high water. It is about 3 miles long, very straight and white, spotted here and there with wrecks of years before, and, curiously enough, but happily for the fisherman (and *per contra*, unhappily for the fish) it is so abrupt that one can almost dive from the edge into deep water.

I came to Chatham for the shore bird shooting, and I got some, but how many I really can't tell, for the bluefishing has driven it from my head. The tide was not right to set decoys the second morning, and I was sitting with other gunners on the piazza looking out to sea and listening to some of the most awful shooting fibs that ever blackened the record of a gunner. I had noticed an extraordinary number of gulls whirling round a spot near the beach about half a mile away, and called the attention of some one to it. It was not 30 seconds before the quiet group was scattered through the house without condescending to pay any attention to me and my inquiries. They told me afterward that the bluefish chase the small schools of fish to the beach, and the gulls join in the chase and become the alarm signal to the fishermen. By the time the lines were collected and the happy possessor of that one bass rod had prepared himself the bluefish were nearly in front of the hotel within a hundred yards of us. Capt. Gould whirled his five ounces of lead round his head, and out it went about 50yds. off the beach and beyond the small breakers. He had not dragged it hand over hand 10ft. before the line tautened and the fun began. We all caught them; ladies caught them and the man with the bass rod and the light drail was a fortunate man indeed. He had been at Chatham a week and this was his third experience of the kind.

We caught over 90 fish. They all weighed over 8 and most of them nearer 10lbs. I have caught most kinds of fish, and hitherto have not been a real enthusiast, and have been sometimes worried about it, but it's all right now; I am converted, and the four beetle heads I shot over decoys that afternoon didn't give me the usual thrill. I think there probably is just so much thrill in a person, and mine I had used in the morning. On an average of twice, perhaps three times a week the schools of bluefish come down that beach during the months of July, August and September, and here are fish enough for every one or I wouldn't give the place away.

## BLUEFISHING AT ORIENT POINT.

*Editor Forest and Stream:*

Being comparatively a new subscriber to FOREST AND STREAM, and noting that most of your "fish stories" relate to trout and bass fishing, I will take the liberty of giving you a little of my experience at bluefishing in Plum Gut. When I read in FOREST AND STREAM, from the pen of some of your contributors, of the great excitement attending the capture of a 4oz. trout, and the desperate struggle he makes for liberty, it puzzles me a little, as I have never had an opportunity to try trout-fishing; therefore you must attribute it to my ignorance of real game fishing when I claim that there is more real excitement in trolling for bluefish in an 18-foot boat, on "the ragged edge" of a spiteful rip, when a slight lull in the wind gives you a chance of filling the boat with water, and fish are hooking faster than you can pull them in. I first went bluefishing with my father, when about 12 years of age, and although he had often fished at Montauk with old smackmen, he would get so excited when the first fish struck that he would luff the boat right up to it, all the while pouring forth a torrent of advice as to the best way to get that fish into the boat. Of course that stopped the fun for the time, for you have got to keep the boat under good headway to hook them.

Several years after my brother and myself tried it on our own account, and, although we have had our lines in some pretty bad tangles, we have had fair success nearly every season since. I remember one trip we took an old sea captain with us, and when my brother hooked the first fish and had pulled it about half-way, with more energy than he displayed in every-day life, the captain, who was standing a little further aft, reached over and finished the job himself.

The language my brother used in expostulating with him was much more forcible than elegant. Until last season the fish caught here were mostly small, weighing from ¾lb. to 2½lbs. This summer and last also they have weighed from 3 to 6lbs. The overseer of ex-Mayor Hewitt's place told me the other day that he and his son, in two small rowboats, caught 1,000 in one week. The season usually begins about the middle of July and closes about Oct. 1, with occasionally a week's recess.

ORIENT POINT, L. I. HAZEL KIRKE.

## WINNEPESAUKEE BLACK BASS.

NEW YORK, Sept. 15.—Having left New Found Lake in disgust so far as the fishing was concerned, I arrived at Weirs, N. H., Lake Winnepesaukee, and learned that at Long Island there was good black bass fishing. I took the Lady of the Lake and arrived at Blake's Island Hotel on Sept. 5 and engaged Mr. Luther Smith as boatman. In eight days' fishing I caught all the black bass I wanted; and to tell the truth, I was so well pleased with the fishing that I can safely say it is the best place I know of, and I can recommend any one to this place. Mr. Blake is an old resident and can give one all the information needed about fishing. Mr. M. Fleisher, of Philadelphia, engaged Mr. James Day and came in with good strings. Mr. Williams, of Boston, caught two bass, weight 4 and 4½lbs., off the bridge connecting Long Island to the mainland. Prof. Ewell, of New York, caught one at the same bridge, weight 5lbs. This is only a small record of what has been done and that came under my personal observation.

Blake's Island Hotel is pleasantly situated on Long Island, Lake Winnepesaukee, and is reached by boat from any place on the lake. Dr. Green has a magnificent residence near the house, and his genial disposition makes for him many friends. The house was filled with people congenial to the tastes of fishermen, and great was the excitement every night when the fish were weighed, and very few were found wanting of the necessary weight to make one's heart feel happy and an ambition to go a-fishing the next day. I will willingly correspond with any one who may wish to know more about this location; my address is with the FOREST AND STREAM; and I trust this may be of some benefit to my brother sportsmen. H. C. W.

## CHICAGO AND THE WEST.

[*From a Staff Correspondent.*]

CHICAGO, Ill., Sept. 17.—Mr. Carter H. Harrison, Jr., assistant managing editor of the Chicago *Times*, is an enthusiastic fly-fisherman. He writes me the following interesting letter in regard to the grayling fishing in Michigan, and I offer it as good news to anglers. Mr. Harrison says:

"My brother and I put in the last three days of the season with the trout and grayling in Michigan. The first day we fished the Maple River at Pelton with moderate success; the fish were altogether too small—6 and 7in. in length—my best being a ¼lb. trout and ¼lb. grayling. That night we hustled around to Wolverine on the M. C. and put in the 30th on the Sturgeon. My brother nailed sixteen grayling and a few small trout; two of the grayling ran ¾lb. each. I took five trout—two were ½ pounders—and eighteen grayling, not one of which measured less than 10in.; that means they ran from ½ to ¾lb. each. Every grayling under this size was returned to the stream.

"The following day it rained hard, and as the Sturgeon rises with great rapidity we did not have much luck. A friend of mine took thirty-six fish of legal size out of the same stretch of water ten days before we were there, three-fourths of which were grayling. I still think, as I did last spring, that it is the angler and not the trout that keep the grayling down. The grayling is the sturdiest and boldest riser of any fish I have ever caught. No matter how often he misses, if you will keep on putting your fly at him he will take it. All of our fishing was done with the fly. I fished with an alleged gray-drake, the hackle being ginger instead of gray, for the middle fly; the tail and hand fly were my own pattern, a fly I have dubbed 'Harrison,' for the want of any other known name. It is a corker for trout and grayling. Wings, tail and hackle gray—the same as in a genuine gray-drake—the body of yellow mohair. Practically all my fish and the most of my brother's were taken on this fly.

"The Sturgeon is stocked with both brook and rainbow trout; has been for years, how many I don't know, but there are rainbow trout in it running up to 3lbs. in weight. Yet only in the West Fork do the trout seem to be in the majority. I have never fished this part of the stream. From what I learn it is rapid, rather shallow water, better suited to trout than grayling. The latter likes long, deep pools and rapids where the water is very deep. Out of one pool of this kind I took six ¼lb. grayling without moving as many feet. If the fish hogs can only be kept away from the grayling a few years there is great joy in sight for some one. The day we fished at Wolverine, however, two of the boys fished the West Branch, carrying fifty-six fish away with them. A man who saw the catch told me that at least forty of these were not over 5in. long. One of the 'anglers' was a preacher.

"Another enemy the grayling have to contend with, in this stream at least, is the spearer. Two fish my brother caught and one of mine had long jagged wounds on their sides which could only have been made with a spear. After a good deal of pressure some of the loungers about the hotel admitted that a few small boys occasionally speared fish just below the mill. The fish in the Sturgeon are as fine a lot as one would wish to see. There are so many big fellows that strong temptation is offered to the spearer. I have written Mossman, a newspaper man at Petoskey, who is also a game warden, and hope that this end of the line will be watched. However, the fishing in the Sturgeon at least is far better this year than it was last season. The fish run larger and there are more of them. The Sturgeon is a superb stream, 30 to 40ft. wide and in places apparently 12 to 15ft. deep. The water is exceedingly clear and rapid. Naturally it is as fine a stream for trout and grayling as one would care to see. One beauty of it is that for about twelve miles it is never more than an eighth of a mile from the railroad, so that it is easily accessible from Vanderbilt, Trowbridge, Wolverine and Rondo. The natives tell me the fishing has been improving every year for a number of years past. If the other grayling streams in Michigan are in as good shape the grayling will remain with us for a number of years to come.

"I got the hotel keeper's son at Wolverine to promise me that the next time he saw a man with a trout or grayling under legal size in his possession he would have him run in. As he is a good deal of a fisherman I think he will do it. If you have information in regard to other grayling waters please let me know."

Mr. Harrison's report is very interesting. I do not remember to have seen in FOREST AND STREAM for four years any other actual recountal of grayling experiences in Michigan. It is interesting to note that one of the known stream-despoilers was a preacher. It seems to me that the morals of the pulpit might be much improved these days.

THE KEKOSKEE FISH STORY.

I was going to tell in this column the Kekoskee fish story, referred to elsewhere, but it occurs to me that the facts—although they are facts pure and indisputable—are so strange and improbable that it may be best to lay them before the editor of FOREST AND STREAM tentatively before putting them into shape for publication. It is really a story about bullheads, and of course, therefore, it cannot fail to be picturesque, for the bullhead is naturally a romantic fish. Every man in Mayville and Kekoskee knows this story, and without any hint or coaching will tell it to you exactly as his neighbor did. Every man of them knows the horse, too. You see, there was a horse in the story—is yet, for that matter. It all happened away back in 1860, when Horicon Marsh was Horicon Lake. The Rock River ran into the lake then, and now it runs into the marsh at the same place where it used to run into the lake. It's the same river, and they will take you to the same place, and show you where the story happened, so you can't possibly doubt the truth of the story in any particular. It was an awfully cold winter that year, and that has something to do with the story, too. But perhaps I ought not to tell part of the story unless I tell it all, and I do not like to do that on my own responsibility. E. HOUGH.

175 MONROE STREET, Chicago.

### Frying-Pan River Trout.

ON returning in July from a trip to Utah I halted a day at Thompsonville, Col., on the Colorado Midland Railway, on the west slope of the Rocky Mountains, for a "hurl" at the trout in the Frying-Pan River. The stream was high and turbid, and the conditions bad, and I was too tired to exert myself greatly, and I caught only two trout, though I had several rises and could easily see that the stream was well stocked. My fish were remarkably tame in action, though handsome and brilliant in color and markings. A small silvery and golden scale was plainly visible. Will any one tell me the exact species? C. H. AMES.

[Judging from the size of the scales we believe this trout was one of the varieties of the red-throated species. If the spots were black and most numerous on the posterior half of the body, there is no doubt about this identification. Colorado has many forms of native black-spotted trout, all of them varieties of the red-throated. Other black-spotted species, the California rainbow, the Loch Leven and Von Behr have been introduced. The Dolly Varden, a red-spotted species, is found in that State, and the Eastern brook trout has been introduced and thrives even in high regions.]

### The Adirondack Trout Season.

A NORTH WOODS correspondent writes: "There seems to be a vast difference in opinion in regard to the termination of the trouting season. I 'swear' by the *Book of the Game Laws* as published by you, and which I sent for and have abided by, though reluctantly stopping my trouting until the 15th of this month. Please editorially state in your issue next week whether sportsmen in the Forest Preserve could take trout until Sept. 15."

The trout law of 1892 is correctly given in the *Book of the Game Laws*, as follows:

Sec. 105. Trout of any kind shall not be fished for, caught, killed or possessed between the first day of September and the fifteenth day of April following, except as provided by section 166; and in Spring Brook Creek, situated in the counties of Monroe and Livingston, trout shall not be fished for, caught or taken between the first day of September and the first day of April following and except in the waters of Lake George, where the same shall not be fished for between the first day of September and the first day of May.

Sec. 166 refers to Long Island, but does not even there change the date Sept. 1, which is everywhere the first day of the close season.

### The Sunday Fishing Case.

*Editor Forest and Stream:*

Permit me to inquire through your columns if there are any sportsmen sufficiently interested in the "Sunday Fishing Case" to join me in taking the issue to the Court of Appeals. A reference to your numbers of Aug. 18 and Aug. 25 will put interested readers in possession of the leading facts and points in the matter.

I should be glad to supplement this with any information desired and to give my reasons why I consider the decision as it now stands an erroneous one. If it be allowed to remain unchallenged it will seriously affect the privileges heretofore enjoyed by sportsmen and clubs and will impair the value of their property in this State.

Would it not be desirable now that a test case is so far advanced as the General Term to carry it at once to the Court of final resort? ROBERT H. MOSES.

### Darkness and Animal Colors.

SOME of the effects of the absence of light upon animal life were strikingly revealed, not long ago, on the re-opening of an old mine near Bangor, Cal. In a dry slope connecting two shafts, one of the explorers was astonished to find a number of flies that were perfectly white, except the eyes, which were red; and directly afterward he killed a pure white rattlesnake. The animals had lived in the dry passages, where they had been supplied with air but not with light. It is supposed that the flies were the offspring of some that had been imprisoned by the partial filling of the mine with water about thirty years ago, and that the snake, when quite young, had been washed down in a rain. A few of the flies were exposed to light in a glass case, and resumed the colors of ordinary house flies within a week.—*Nature, Sept. 1.*

### Third Lake Trout.

CAN "Von W." or some of your correspondents tell us anything about the trout of Third Connecticut Lake in New Hampshire? During a recent visit to this region I was much struck with the difference in shape and coloring of the trout of Third Lake from the others caught in that section. Although it has been nearly a dozen years since I have caught or seen the silvery-sided beauties of Dublin Pond, in southern New Hampshire, these in the most northern waters of the State seemed to me to be almost identical, although I think the spots were a little more prominent and perhaps not quite so silvery, yet if my memory serves me right they were much the same. Can any of your correspondents give us any light on the subject? OMPOMPANOOSUC.

### Mice as Bait for Trout.

IT is reported in the English papers as something new that the trout are feeding on the abundant field mice that are ravaging the pastures in Scotland. When I was in England thirty years ago, mice were used as bait for trolling for trout on the Westmoreland lakes, and also in the Scotch lochs that I visited, and I have taken large trout in this way. H. STEWART.

### Sunfish as Bass Bait.

BROOKLINE, Mass., Sept. 13.—A communication in FOREST AND STREAM, Sept. 8, signed "B." leads me to state that small sunfish, commonly called civers in this locality, are killing bait for black bass, and have the advantage of being very hardy. They will swim about in a lively manner for a long time, if properly hooked through the back. When others, with shiners, shrimp and worms, have had no luck, I have still-fished with a young sunfish about the size of a silver half-dollar, and have taken my three-pounder where no large fish were suspected of living. C. B. D.

### Fishing in the Raritan.

PERTH AMBOY, N. J., Sept. 12.—Fishing for bass and snappers has been excellent for a week past at the Long Branch railroad bridge over the Raritan, and should continue for the rest of the month. Hitherto the fishing has been very poor this summer, except the bluefishing for a week or so in July. J. L. K.

## The Kennel.

### FIXTURES.

DOG SHOWS.

Sept. 26 to 30.—Rochester Kennel Club, at Rochester, N. Y. Dr. O. S. Bamber, Sec'y.
Sept. 27 to 30.—Dog Show at Ottawa, Can. Alfred Geddes, Sec'y.
Oct. 4 to 8.—Eleventh Annual Dog Show of the Danbury Agricultural Society, Danbury, Conn. B. C. Lynes, Sec'y.
Oct. 25 to 28.—Omaha Kennel Club, at Omaha, Neb. E. L. Jarston, Sec'y.
Nov. 22 to 25,—Brooklyn. H. W. Huntington, Sec'y, 148 South Eighth street.

1893.

Jan. 5.—Gloversville, N. Y. F. B. Zimmer, Sec'y.
Feb. 21 to 22.—Westminster Kennel Club, New York city. Jas. Mortimer, Supt.
June 13 to 17.—World's Fair, Chicago.
Sept. 7 to 10.—Hamilton, Ontario. A. D. Stewart, Sec'y.

FIELD TRIALS.

Oct. 25.—Third Annual Field Trials of the National Beagle Club, at Nanuet, N. Y. Bench show of the club Oct. 24. H. V. Jamieson, Sec'y.
Nov. 7.—International Field Trials Club, third annual trials, at Chatham, Ont. Amateur Stake, Nov. 7. Open Stakes, Nov. 8. W. B. Wells, Sec'y.
Nov. 7.—United States Field Trials, at Elizabethtown, Ky. P. T. Madison, Indianapolis, Ind., Sec'y.
Nov. 8.—New England Field Trials, at Assonet, Mass. E. Knight Sperry, New Haven, Conn., Sec'y.
Nov. 14.—Fourth Annual Trials of the Brunswick Fur Club, at Princeton, Mass. J. H. Baird, Sec'y.
Nov. 15.—American Field Trials, at Columbus, Ind. W. J. Beck, Sec'y.
Nov. 21.—Eastern Field Trial Club Trials, at High Point, N. C. W. A. Coster, Sec'y.
Nov. 28.—Philadelphia Kennel Club Trials, at High Point, N. C. F. G. Taylor, Sec'y.
Dec. 5.—Central Field Trials, at Lexington, N. C. Col. Odell, Sec'y.
Dec. 19.—Irish Setter Field Trials, at Lexington, N. C. Dr. G. G. Davis, Philadelphia, Pa., Sec'y.

1893.

January.—Pacific Coast Field Trials, at Bakersville, Cal. J. M. Kilgarif, Sec'y.
Feb. 8.—Southern Field Trials, at New Albany, Miss. T. M. Brumby, Sec'y.

### TORONTO DOG SHOW.

THIS show opened auspiciously as far as dogs, exhibitors and the weather are concerned. I wish I could say as much for the management, but it is impossible to do so. This part of the show was simply wretched. The Toronto committee does not seem to grasp the idea that their show has become a national or international event, and therefore we expect more than provincial management. The buildings and benches being permanent there is no need for any delay in numbering stalls and getting the judges' rings in order. Half a day's work would fix everything in apple pie order. On Mr. Stone seems to lay the brunt of everything, and we must say that the position requires a man with some leisure time to devote to the proper arrangement of catalogue and other parts of the show. This year the judging rings were curtailed, and the terrier and spaniel rings had to be pitched in convenient quarters in the galleries, hardly affording sufficient room for the judge to do justice to himself or the dogs. The floors were littered and smelled very strongly even the first day. I do not like to write in this manner, for Mr. Stone seems to try to do his best, but there was a lamentable lack of system in the whole show. Catalogues were issued about noon Monday, and the few on sale were grabbed up very eagerly, though when opened we found that it went only as far as black and tan terriers, and there were something like a hundred more entries to be printed in another catalogue. This was probably the printer's fault in a measure, but primarily the management is to blame in not having everything in ship shape. To turn to a pleasanter part of the show I noticed that Canadian exhibitors are very well represented, Hamilton, Woodstock, Kingston and Ottawa sending many well-known fanciers. The judging was necessarily slow and was not completed till Wednesday night.

MASTIFFS.—*James Mortimer, Judge.*—The show of big dogs such as mastiffs, St. Bernards, Great Danes, etc., is never good at Canadian shows, at least so far as Canadian entries are concerned, and the year 1892 finds no improvement in the first-named breed. Many of the old faces were again on the benches, but Mr. Winchell's Beaufort's Black Prince was absent, and so Canadian breeders missed an opportunity to form some idea of what a really crack mastiff is like; but we are forgetting that Elkson was there, and we must give him his due meed of praise as a consistent performer at Toronto. This time Dr. Kimball's dog was in the challenge class. He hardly looked in as good flesh as usual. Challenge bitches did not fill. In the open dog class Beaufort's Beau, a young dog, not square enough in muzzle, leggy, and needing age to furnish up was first over Grimsby Caution, who is no better in body, but has better legs and head, though marred by very light eyes; Minting Minor, who shows up every time, scored third; his worst fault is his straight hind legs; his bone is light, too, body short, his head well shaped; a fairish dog in Ilford Mint took fourth. In bitches the winner is a plain dished-faced bitch and lacking in depth of body; Old Bess, second, but for her gray hairs and consequent age would probably beat the winner, better shaped head and much better shaped body; Ruby, third, carries her ears wrong and has a plain, straight face. After this she is well put up, beating all the others in legs and body if she does not show a little slackness behind the shoulder. There were no others in this class. The winner in puppies is rather bowed in front, and head needs more stop to approach being good; the other pup has mouse-colored markings, but is fairly well formed. Beaufort's Beau won in novice class, beating the bitch Attraction. There was no kennel prize awarded.

ST. BERNARDS.—*James Mortimer, Judge.*—Taken all round, even with different kennels sending representatives from the States, the quality in these classes was about on a par with last year. This time the New York St. Bernard Kennels stayed at home and Col. Ruppert had a shy at Canadian glory, his Aristocrat, very short of coat, being alone in challenge dogs, but bitches did not fill. In the open dogs about a dozen showed up, and the winner, Lord Melrose, from Boston town, stood head and shoulders, both figuratively and practically, over the others, the dog looked thin and should have had a stall half as large again to feel comfortable; his head has filled out nicely, and but for his straight hindlegs and look of narrowness all through was an easy winner over Hesper's Son, which was third here as a youngster last year; he has not improved on puppy form, his loins and quarters are not strong enough, fall away too much, and his head is a bit bloodhoundy; his forelegs and chest are the best parts. Don Phyllis, I thought, might have been put over the other, better head and more substance. Monk came next, he was third last year; he is light throughout and weedy-looking. Safety, the reserve, I could not find, it is a son of Sir John of Sir Charles protest fame. Premier, vhc., has a poor head any way you look at it, is light colored, and depends on body, legs and coat for any merit. Prince Imperial, hc., has not enough stop, his feet turn out, and he is straight behind, so it will be surmised he is not a good one. Big Bob, in the same division, is a big overgrown collie and did not deserve a card; he's a collie even to the frill, very pretty and all that, but not a St. Bernard in the proper sense. The c. lot was poor; Survivor has a long, narrow snipy head, and Celtic's bone is all to be noticed in him; Lord Dalhousie has a long, light head, with little type, bad, light eye, but forelegs are good. This brings us to the female division, and Col. Ruppert furnished the three first, but I did not think that Lady Anne deserved her position; compared with Lady Gladwyn, second, she is quite inferior in straightness of pastern and compact feet, is much narrower in chest; in head, while skulls are about equal comparatively, Lady Gladwyn's muzzle is deeper, broader, and squarer, and her ears are better set on; while Lady Anne has a deep, good roomy body, Gladwyn's is certainly much more so, was in very much better condition, and is broader and stronger in loin and quarters; Lady Anne was thin and out of show shape, and loses to Gladwyn in coat and general sleekness—just had puppies, I believe. Third goes to Altonette, our opinion of whom is well known and she does not improve; carrying many pounds more flesh and more coat she would do better

MR. F. C. WHEELER.
Judge of Fox-Terriers.

and her great bone would not be so conspicuous. Then came Glenisha, third at Hamilton last year: her head is the best part. Roulette, vhc., is redeemed by splendid forelegs and chest; her head is plain and there is something the matter with her eyes; is short of coat, but well colored, and rightly placed. Queen Vic, vhc., is a weedy, bad-bodied bitch, light of bone and with a long, narrow head. Beulah, hc., I liked better; nice head and good body. Belle Maida, c., is small, light eye, muzzle not deep enough, bad behind, no coat, and—but probably those are faults enough. Queen Valentine, c., is faulty in head and size deficient. Speranza, also commended, is a poor weed; no use encouraging the Canadians in breeding such straight-faced, narrow, untypical specimens, at that rate the breed will never improve in Canada. Dog puppies were poor and small, the winner being older than the others, and the bitch class winner will never get another blue ribbon, I am afraid.

Smooth-coats showed up pretty well, but Mr. Moore's pair were far ahead. Melrose has thickened out well since New York and has a good typical head, with lots of quality; his good bone and legs are noticeable; his coat is probably a little more than a smooth should have, but not so bad as, say, Victor Joseph or Beauchamp. Sailor could come no nearer than fourth to the winner; has no type or quality, lacks bone and substance, etc., etc.; in the catalogue his dam's name is given as July 3d. Miss Alton headed the bitch class; she is not so good as her litter brothers, is a bit houndy in head, though muzzle is square and deep; lacks shadings and her ears are quite large enough; very good legs, well off for bone, and body deep and broad for her age; a very likely, well-made bitch. Lola, third, cannot boast of a good head, lacks shadings, but her legs, chest and body are good; body color nearly all white Charmion has a fairly good head and bone; was at New York show. Lady Keeper, fourth, is a light, weedy, slack-backed bitch, knuckles over, light, long head and narrow; a poor one. Cleopatra II., vhc., has a very poor head, narrow as a board all through, open feet, and does not do old champion Hector justice by any means. Nellie, hc., was badly handicapped by being benched alongside Miss Alton: this is the nicest thing I can say of her. Lady Swiss, c., is off in color—a sort of orange liver—and had no type of the breed whatever. The novice winner is a big dog, straight behind, head needs more stop, is not a good one, and Dictator, second, has a plain, expressionless head, with no markings at all; good bone and front. The others, with the exception of Safety, have been mentioned. She has a very forbidding head and is brindle and white in color. The kennel prize fell to Col. Ruppert, Jr.

BLOODHOUNDS.—*James Mortimer, Judge.*—These were poorly represented, indeed, and prizes withheld. Beauty is not a bad shaped one, but color wrong. Newfoundlands were also very much wanting, the winner was the only one showing any pretensions to type, and he must thank a good coat and body for notice, as his head is too long, muzzle not deep enough, ears, big, etc., the others were of no account.

GREAT DANES.—*James Mortimer, Judge.*—This was hardly so good a collection as last year and the open class when judged was poor. Don Cæsar, Jr., was placed first in dogs, black and light brindle in color, his general makeup was also not good; Bismarck, second, has a poor head with little great Dane character, his feet are bad, his body being the best part of him; Hero, third, hardly deserved mention, has a coat like a smooth St. Bernard. Afterward, a dog that is something like a great Dane turned up in Mr. Livingstone's Maloch, a well-made brindle, capital head, body and legs, but condition not first-class, he was given an extra first. The winner in bitches, Minerva's Fawn, is, barring a snipy muzzle, a capitally-made bitch all round, and beat the second, Kelpie, in head, neck and ears, Kelpie having bone and size in her favor; the others did not amount to a row of pins, showed little type or quality, and belonged to the man who shipped seventeen puppies in a box that would comfortably carry about half a dozen, but he took the kennel prize.

RUSSIAN WOLFHOUNDS.—*Chas. H. Mason, Judge.*—The Psovois did not come out in great force, only four putting in an appearance. Argoss and Mr. Hanks's new dog Sarvanets were the only dogs and the decision was a repetition of Boston with the latter dog substituted for Leekhoi. We all know Argoss and how he is built, more after the style of a deerhound, and this time he had very little coat, so his resemblance to the greyhound was also pronounced. Sarvanets was of the type looked upon as distinctively Russian, a very strong head, hardly so long as Argoss's, but a punisher, very strongly built throughout and quite as broad in loins and quarters and as powerful as Argoss and exceedingly deep chested, but rather short-legged. His coat and feathering were profuse, more so in fact than any specimen I have seen so far, but hair on body is rather curly; he is, all in all, a very handsome dog and more pronounced in the difference of type from Argoss than even Leekhoi is. It is a pity that some definite understanding is not come to about the correct type of these dogs. Probably they are both right, and if so it makes the judging all the more difficult and one type will suffer according to the fancy of the judge. Princess Irma won over Flodeyka in bitches. These are both more of the Sarvanets type, as bitches, in general build, and Princess has a great advantage over the other in her beautiful front; otherwise Floydeyka is a stronger made bitch and not so extremely narrow throughout, but Princess Irma has a look of intense quality that is wanting in the other, besides, Flodeyka gets her ears too forward.

GREYHOUNDS.—*Chas. H. Mason, Judge.*—This favorite breed in Toronto was not nearly so well represented as last year, and with the exception of almost four or five well-known dogs, the quality was a little more than mediocre. Gem of the Season and Bestwood Daisy furnished the challenge winners and were in nice show shape. The dog class numbered a dozen and Echo, Mr. Purbeck's new dog, was placed first; he is a rather plain dog, dished out face, wide front, but body, legs and quarters are good. Justinian, not looking so big as I have seen him, has a snipy head, feet could be better and he is long waisted. Ranger, third, is an old friend and looked well, his quarters and thighs are exceptionally good. Then came Never Quit, reserve, a capitally made dog, a trifle too short in body however, legs good, ears could be carried better, but his loin and quarters are very strong and might have been placed higher up without injustice to the others; he is built after the style of Lord Neverstill. Fullerton, vhc., has a wild stary eye, is very deep in chest and drops in quarters too much, rather *à la* Psovoi. Fawn, vhc., is not let down enough in hocks, light eye, body and legs good. Jack B., hc., is wide in front, and Fleet is thick and short in neck, quarters also faulty. Twilt, hc., has a good front, but is bad behind, too straight. Young Memnon, c., was lucky, lightly built, shelly and head is poor. The bitch class was only moderate with Jetsam returned the winner; she has a nice head and front, body seemed O. K., but she was in whelp or seemed to be. Lily of Gainsborough pressed her hard but was not in show shape. Leonie, third, furnished the surprise of the judging and the only fun to be had in the show. Knowing the judge's attitude so repeatedly explained to us in regard to prick-eared greyhounds, one may be forgiven a little astonishment to see the bitch Leonie placed third or given anything at all, as she is about the most prick-eared greyhound yet seen at our shows and the ears are large as well. Personally I see no reason, as stated before, why this should affect an otherwise good greyhound very much unless in close competition, but in view of the criticism which fell on the judges who placed Echo, that has the fault in a much less degree, the situation becomes amusing and proves that we are all mortal after all. Leonie otherwise is heavy in shoulders, but in ribs, loin and legs she will do and her head is good. Marguerite, vhc., I commented on at Lewiston. Miss Memnon is a better greyhound than her brother, but should be better let down in stifle. Elsie, hc., has a poor expression, legs and feet fairly good, long in loin. The pup Montezuma is a big slackly put together animal with some good points but too long waisted. The kennel prize went to Mr. Purbeck.

FOXHOUNDS.—*John Davidson, Judge.*—This was as good a show of these dogs that one associates with "a southerly wind and a cloudy sky" and the View holloa! and it did one good to see the straight well-formed forelegs of some of them, especially those of the London Hunt Club. Finder, the winner in English dogs, is a capitally made hound, not just the thing in head—eyes light and too straight-faced—but in legs, feet, coat, ribs and loin he could scarcely be beaten. Genius runs him close, but has the same faulty head; then Benwell is worse still in this respect, and is not so well ribbed up nor so strong in loin; Fowler, res., is all right for front, but droops too much in quarters and stern. Challenger, v.h.c., has a capital coat, but stands out a bit in front, but I liked his head better than the others. Vexation, the winner in bitches, shows lots of quality, a nicely formed head and true in front, good running gear all round. Gaylass, another old friend, seems light compared to the others; Singwell, third, is too heavy in shoulders. Then came American foxhounds, but there was little about them that we associate with the whippety-looking hounds generally palmed off as such. These were in build very like the English dogs, and evidently of same strains or crossed. Rally, the winner in dogs, is a good English hound, a bit straight in stifle; Berchell is too long and straight-faced, flat-ribbed and no depth of chest; Ringwood, ears are not hung close enough; front good but weedy behind the shoulder. Maud, in the ladies' pack, has better legs and feet than the second, Gayge, but more of the English type of head, which is a very good one. Gayge dips a bit behind shoulder, but is well ribbed; Fleet, was in whelp, is gone in mouth and throaty, but still shows a good front; Jane, v.h.c., has a good hound head but lacks body substance. The London Hunt Club had much the best pack. The harriers hardly deserve much mention; were not of correct build.

POINTERS—*John Davidson, Judge.*—These classes with very few representatives from the States were not heavily filled, Mr. Davey's kennel supplying most of the winners. The Leamington Pointer Kennels' Count Graphic won challenge honors in heavy dogs, a fairly well made dog, spoilt in facial expression by a wild big eye, loin and quarters are not very symmetrical; he won at Pittsburg last spring. The bitch class produced more competition, Revelation having Devon Nell to contend with. The latter beats the other in head formation, but age and condition told in favor of the first named. Both are well known. Another circuit trotter, Westminster Drake, won in dogs. He has filled out nicely, and is a strong, workmanlike looking dog, and will have a chance to show his field merit in the coming trials in the different localities. Molton Banner, second, has a light eye, and shoulders are rather heavy and stand a bit out at times, his loin is rather flat, but he is nevertheless a good mover. Count Grosvenor, third, is deficient in stop, eye too large and light, turns elbows out a bit and needs more rib. R. Lee Graphic, reserve, is throaty, narrow-chested, open feet, a leggy, short-bodied and plain all-round dog. In

bitches Mr. Davy supplied the only entries in Josie Bracket and Ightfield Madge. The former has a better head and front, deeper chest, but is faulty in loin and quarter, well ribbed. Lady Gay Spanker was the only light weight challenge representative, and looked as bewitching as ever. The well known Rock II. upheld the honor of the Quaker City by catching the judge's eye for first place in the open dog class. He is a little heavy in shoulders and is too broad in skull to have a very good head, but is all round a smart little dog and is a worker, too; Donovan, second, is a light-bodied, straight-backed dog, head fair but too much cut out before the eyes, ears do not hang well, good front, but needs some flesh; Duke Graphic is not up to the others in head properties, stands back on his pasterns and is straight behind. Miss Rumor, despite her plain head, was well ahead in light-weight bitches; Chairn's snipy muzzle and light eye counteracting her good bone, body and legs: Frivolity, from the same kennel, has her ears set on too high and not of right shape, head fairly well formed if it had more stop, other parts well formed; Bessie's Girl has a light eye, and feet are not O. K., body needs depth but has a nice swell of rib, seems a bad shower; Fanny Graphic, placed ahead of the bitch just described, is faulty in head and feet. The novice winners have most of them been commented on. Brighton Don, the winner in dogs, stands out at elbow at times, has a very bad head, snipy and flat, but stands on good legs. Axtel's Baby, third in bitches, has a light bulgy eye, is a small bitch well ribbed up but no depth of chest; Graphic Francis, second in this class, has a very bad head, ears carried wrong, light-boned, small body but nicely formed. Mr. G. O. Smith showed the only puppy, by Lord Graphic, quite a promising one, but muzzle not square enough. Mr. T. G. Davey captured the kennel prizes without difficulty.

ENGLISH SETTERS.—*John Davidson, Judge.*—This breed I hardly thought was as well represented, this year as last, and certainly there was not the same interest displayed. The challenge winners, Edgemark and Cambriana, had no competition in their classes but were well prepared for it. The winner in open dogs is one new to show fame, one of those chance dogs we come across now and then, his mother is known, but his sire, I am told, is an "itinerant." He is a bit on the coarse order and probably sees now his best day: he has a well-shaped head, ears a bit flat, a little throaty, has a good, well-ribbed body and short loin, standing on capital legs and was in good show trim. Ben Hur of Riverview is an old face though it is a bit flat, not stop enough. Tony Gladstone has hardly carried out the promise of two years ago, but is a well-made dog that could be better behind. Matane is faulty in stop and light in loin, but otherwise good, and was up to any of the others, barring the winner. Brighton Benwell, v.h.c., is a long, slack, light-boned dog with a well-shaped head and good front. Druid J., reserve, is plain in head and short in body. Sig Gladstone is another of the promising ones that have not come up to time; his short, stumpy head is his worst part. Mingo, Jr., is all front and shoulders. Locksley II. is a big coarse dog, flat head. The others call for no comment. The winner in bitches was Lady Patch, a trifle Roman-nosed, and could do with more stop; otherwise good. Esmeralda has a poor head and needs time in body, which is a bit long cast; good legs. Canadian Lillie I liked better; excellent front, nice body outline and head only needs more stop. Daphne is a little long cast and ears are not set on right; otherwise she will do. Miss Frost is not correct in stop, too flat; this was a noticeable fault in many of these dogs; it probably does not interfere with their gait but it does not conform to the standard. Misfortune is another that age will improve; at present is light throughout. Lady Spot is throaty and quarters fall away too much; she is very peculiarly marked, one side of head black and the other dark tan and evenly divided. Ponto claimed the blue ribbon in novice dogs; his head and body are the best parts. The others have been mentioned and so have most of the bitches. Dog puppies were of no account but bitches were just a little better. Forest Novel boasts a nice head and front but Forest Nia has a poor, flat head, and the third winner, Jess, is a snipy-headed weed.

IRISH SETTERS.—*John Davidson, Judge.*—One of the best, if not the best, collections seen in Canada, and the Seminole and Oak Grove Kennels were out for blood every time. In challenge dogs champion Tim, looking in full bloom, beat Kildare once more, with Duke Elcho reserve, who accounted for Seminole in loin and quarters. The bitch class was also a hot one, and old Laura B. still holds her own and looked extremely well. The next was Norna, who loses to the other considerably in substance and head properties. Edna H., her kennel mate, as usual followed her, and Elfreda brought up the rear, losing in quarters and muzzle. Pride of Patsey and Kildare Gleumore had it nip and tuck in open dogs, the younger dog loses before the eye and in ribs, besides, he is not quite straight in front, and the decision was about right. Montauk, Jr., is behind the others fairly, losing in muzzle, ribs and quarters, and Toronto Jim would do with more muzzle. Elfrus is a bit long cast and head is not well formed; Elfrin, from same kennel, is not square enough in muzzle and not quite straight in front. Rose Sarsfield claimed first for the Oak Grove Kennel this time; she has a well-shaped head, especially in skull, body well turned, and has good running gear, her color might be darker. Irene was the winner last year and Claremont Heather is a new face that needs a little more stop, but his legs and feet and body are good. Toronto Mollie, fourth, needs a squarer, deeper muzzle and more depth to body. Belle, vhc., should be squarer in muzzle, too. The novice winners have been mentioned generally. Sir Elcho loses in head, which is bitchy. In puppies Don has a rather dished face, and Seminole, Jr., I thought just a bit better in head and general build. Seminole Betsy was the only bitch puppy and is fairly good. Seminole, after keen competition, received the kennel prize for a very level lot.

GORDON SETTERS—*John Davidson, Judge.*—Quite a good lot for Canada, although I missed one or two familiar names from the catalogue. Dr. Dixon's Leo B. sustained the challenge dog honors well, and his kennel mate, Duchess of Waverley, found no difficulty in taking care of Hilda, who loses in face and head to the first named. In dogs, one I have spoken of before, Count Noble, a rather funny name for a Gordon, was well placed. His tan is bright, but he has a nice head and expression, ears are carried back a bit, but behind them he is well formed and a good mover. He lacks size somewhat. Rush is light in tan, but head is fair, is a bit throaty, bone and body good, a serviceable dog. Duke of Wellington third, loses in tan and legs to the others, head coarse. Clyde was the winner last year. In bitches Lewis again led out the winner in Lady Gordon, a daughter of Little Boy, that shows lots of quality, a little too much tan on muzzle, no pencilings, otherwise O. K. Princess Louise, from the same kennel, has smutty tan on head, and muzzle should be squarer. Wanda and Floss were placed as named. The former I did not see, but Floss is too light in tan and wants more stop. The novice prizes nearly all fell to Mount Royal Kennels, which showed up bravely in this breed. Dr. Dixon's four took the open kennel prize and Mount Royal the other two for Canadian dogs.

COLLIES—*John Davidson, Judge*—Made a good show. Taken as whole, the general quality is far from being up to the mark. Certainly such dogs as Christopher, Wellesbourne Charlie, Conrad II., Charleroi II., champion Flurry II. and a few more old country heroes and heroines helped to elevate the tone and saved this section from being a failure. In challenge dogs Roslyn Wilkes and The Squire did not put in an appearance, and as Ormskirk Shep turned up too late for competition, Charleroi II. had no opponent to dispute his right to the coveted honor. He is at present in very good form, although I should like to see his coat flatter. He looks good for quite a long while yet. Bitches saw old champion Flurry II. again to the fore, a remarkably fine-headed bitch for her years. (I am informed that this is the last of her on the show bench; her owner intends giving her a rest for the remainder of her pilgrimage here.) Champion Metchley Surprise, a small but very typical black and tan, getting the reserve number. In open dogs Christopher, "the beautiful," experienced no difficulty in winning from Conrad II., who was looking remarkably well indeed, and, bar his gayly carried tail and faulty ear carriage, would take some beating. Both were shown in faultless condition, and considering the trying weather they have recently passed through, I think a word of praise is due to their kennelmen for the excellent trim in which the dogs from these two representative kennels were turned out. I refer to the Chestnut Hill and Hempstead Farm kennels. I could not agree with the award that put Samson third. He is a very big dog, but that's about all that stands to his credit. In no instance should size give place to collie character and quality. This dog has really no collie character about him; he is far too long in body—a regular funeral—while his expression is sulky and sour, and he gets his tail over his back like a Pomeranian. I should have put the h.c. Toronto Wonder in this position; he is a really high class collie, beautifully marked, very showy sable and white, good head; nice ears, fair legs and feet, and although not in first-class condition, carries a great coat of the proper texture; bar the winners he is streets ahead of anything in the class. The reserve Moonstone is far too cloddy. Drury, v.h.c., is too short and thick in head. Bute, v.h.c., is thick in skull and ears badly carried. Open bitches (11) were not a brilliant lot by any means. First, Nancy—a ch. Eclipse bitch—a big roomy one, carrying a great coat; her head is a bit faulty, but she should make a valuable brood bitch if suitably mated; second, Dudley Chris, is wrong in type, a lanky, settery looking animal; third, Highland Floss, is a dark sable and white, small but full of character, at present out of coat, but looks as if she carried an enormous one when in form; fourth, Auchairnie Lassie, a racy looking, showy black, tan and white puppy; beautiful head and ears; good coat, legs, feet and front; tail carried correctly, all over a good one; had she been placed first no one could have grumbled. Reserve Crissey, a very smart black, tan and white, at present out of coat, will do better some other day. In novice dogs (8) Wellesbourne Charlie was first, the rest nowhere. This is a remarkably fine dog; his head and ears are just as near perfection as it is possible to get them; he carries an enormous coat of correct texture; in legs, feet and front he is unexcelled, and in size, shape and substance all that can be desired, in other words, "a flyer." Novice bitches, first, Dudley Chriss, second Viola, too toyish, very bad feet, wide in skull and short in face; she carries, however, an enormous coat of very fine texture; third, Beulah is too weedy; v.h.c., Auchairnie Lassie should have easily won, with the small but typical Orange Lass second. Dog puppies: (7) Lawrie, a black, tan and white, with good head and ears, fair coat, nice bone and showing a deal of quality, won; a very promising sable and white puppy in Roslyn Charlie, by Wellesbourne Charlie, getting second: he only requires time to make a good one. Third, Forest Boy, a thick-skulled brute, a long way behind. Bitches: (5) third, Auchairnie Lassie, bad luck still clings to her, two small, weedy, unattractive puppies in Stella and Christian getting first and second respectively.

BULLDOGS.—*James Mortimer, Judge.*—These classes did not fill to expectation. Our old friend Carisbroke led in challenge dogs, and I never saw him looking better. The ladies' class did not fill and in open dogs only one, Brian Boru, who has not a bad head, he needs a sturdier body and is a little leggy. Lady Venus took an unopposed first in her class; she shows a good foreface, though skull should be fuller and higher, she is well out at shoulder and is a smart dark-brindled little bitch.

BULL-TERRIERS.—*Frank C. Wheeler, Judge.*—This judge began his work with these dogs and really deserves some leniency considering the difficulties under which he labored. His ring, or space allotted to him for such, was an alley-way between two rows of terriers, and one row of fox-terriers was benched on the floor, if such a "bull" may be allowed in this report. Consequently there was a continual trying to "get at" that was mutual between the dogs and, of course, this aided the judge immensely in his endeavors to get the right ones right. Streatham Monarch and Starlight were the challenge aspirants and worthily filled their positions. In open dogs (10) Principio, although gone off, still landed an easy winner. Second, Count II., is too cheeky. Third, Chatham Prince, has a very conspicuous dudley nose, long, lathy body, narrow dickey front, a really shelly got up one. Vhc., Silvree, a rare big one, great front and bone, really good head and an all-round, well-made one, in the pink of condition, should have been an easy second; while the other vhc., Ted Pritchard, an aristocratic-looking small one, made a good bid for third place. In bitches (9) Lady Dinah was first, a small dudley-nosed one, shown in nice order. Second, Kathleen Mavourneen, falls away below the eye and wants more bone. Third, Vesper Belle, one of the best bull-terriers it has been my lot to look upon for a long time, a really grand one and should have won everything she was entered for. In justice to the judge, we must explain that she did not show herself to advantage in the ring, being young and timid, but venture to predict a great future for her. In puppies (8) Chatham Prince was first, Vesper Belle second and Vixen third. I should have placed Vesper Belle first and the two unnoticed, Sweet Marjoram and Lorna Doon, second and third respectively; both are uncropped, but there is no getting over them, both having nailing good heads, and in shape and substance all that can be expected at their age. Boston terriers were a mongrel-looking lot, small, bad bulldogs with cropped ears.

Bijou was the only poodle shown and was not the right sort.

WHIPPETS—*John Davidson, Judge.*—A nice lot of these toy greyhounds, thanks to George Thomas and Messrs. Campbell & Blake's entries. Boston Model had not much in hand over Maggie, and Tip, a broken haired one, is faulty in muzzle, nice body and legs. Ben is a prick-eared one, but fairly well made, and can show some speed.

RETRIEVERS—*John Davidson, Judge.*—Only two were shown, and these were from Mr. Davey's kennel, and they were smooths, too. Loyal was placed first, but I think the bitch has much the advantage in body and legs, though the first one has a better head. The decision should have been reversed.

SPANIELS—*Charles H. Mason, Judge.*—There was a grand show of these popular dogs as far as cockers were concerned, but I thought there was a falling off in fields. Irish waters were first on the list, and the winner, Dan Rice, is only a fair specimen, coat and topknot not A1. Face a bit too straight and not enough fur on the legs. Second was withheld. In bitches Marguerite shows a good topknot and a fair head, capital legs, but tail not fine enough, too much hair on. This was the fault of most of them. Flo Shaughran is not straight on forelegs, is slightly better in coat than the winner, but tail all feathered, which of course should not be. Biddy Donelly is a pup not straight on legs, but carrying a straight tail. Dennis won over her in puppies.

Clumbers had old Boss III. in challenge class, but he hardly looked the dog of old. In open division Drake, a capitally well made one, had no competition as Fop was disqualified for something the matter with his eyes.

Field Spaniels: Beverly Negus was the winner in challenge dogs followed by Newton Abbott Laddie, both are well-known and looked fairly well. In bitches What Not was alone. That well made dog Judex ran nicely in open black dogs, beating Warwick in head, skull too high and muzzle not deep enough, and needs more rib. Rab has crooked legs, is not well ribbed and could do with a better coat. Corktown Cupid, reserve, is out at elbow, and skull is domy. Black Pete II, vhc, is a big coarse dog with a regular top-knot. Wonder is Roman-nosed and light in body. Rosedale Rob has a coarse head and muzzle not square enough. Grace was first in bitches and barring muzzle not much fault can be found with her. Daisy Dean, from same kennel, is also faulty in the same place and her feet turn out. Dot Snivell has a very nice head and is quite as good as the Dean in body and legs. Rosedale Romp is a little bowed in front, and R. Princess turns her feet out and is light in body. Queenie in "livers" won nicely over Carlile's Napoleon who has a dachshund front and head not good enough. Billy, the winner in any other color, is a big dished-faced and undershot, coarse and curly coated. Carlile Sam, second, is a quarter inch undershot.

In cockers the competition, of course, was keen, but there was not that general interest taken in the results that we remember in former years, and the judging caused considerable grumbling, though the decisions on the whole could not be cavilled at. Fascination, in first-rate trim, was put ahead of Black Dufferin, and Black Duke came next in the challenge, then Amazement and I Say were placed as named in the ladies' division. In any other color that good little dog Red Jacket beat Red Roland, with Bamboo reserve. In bitches King Pharo's Sister, though hardly stop enough, beats Jessie C. in body, legs and action. Open black dogs saw Jay Kay first, fairly good in front, high in skull and muzzle high, long and body not deep enough. King Raven, Jr., second, is not good in front, feet come together. Black Brant, third, has a field spaniel head. Dono has a good front but his head is coarse and heavy. Black Graf is well known and will be more celebrated as the sire of Troublesome. The bitch class the judge marked as "the best ever seen in America." This should make Troublesome's debut all the more meritorious as, although the class was not as large as we have seen here, the quality could not be denied. Troublesome, Mr. Geo. Bell's new bitch, might be a little squarer in muzzle and shorter, and is yet a little full in skull, but her legs, body, coat and general symmetry and character are of the best. Rideau Reine was some distance behind, throaty, crooked forelegs and not ribbed up enough. Madame Patti's skull is too round. Rideau Flossie, fourth, is faulty in muzzle, body fairly good, but coat not as it should be. The others fully deserve their awards. Red Obo won in any other color dogs, a nice-headed little dog that beats Nugget in shape of back and legs. Brownie B. is wide in front and snipy; skull is too broad as well, body good. Cherry Ripe was the winner in bitches, a very pretty little bitch. Vic, second, is too wide-chested and pinched in muzzle. Mono's body is too light and muzzle not short enough, and it is also covered with warts. Rideau Robina I thought should have been better treated, as there is little fault with her. The novice winners have been commented on and so have the puppies. The general opinion was that cockers of the toy order had the preference, when Canadian breeders had been trying to get a more workable stamp of dog, and one prominent breeder remarked that this show had set them three years back in breeding. We hardly think such a pessimistic view of the question need be taken as that; if the proper type is bred for a chance decision or two should not affect the general result. Ancient and Modern Kennels took the kennel prizes for both countries.

DACHSHUNDS.—*John Davidson, Judge.*—These were not as good as last year, Fritz K. being the only dog, and he was in nice shape. In bitches we were introduced to a nice lengthy one in Jessie Victoria, with a capital body, good crook and nice long head, streets ahead of the second, Lena, a short-faced one of terrier stamp.

BEAGLES.—*John Davidson, Judge.*—This breed showed a great improvement over last year, and the sight given us when the judging for the kennel prize came on was a splendid one. Tricotrin, very much improved, was alone in challenge dogs. The keenest competition was in bitches, between Twintwo and Elf, and my decision of a year ago was indorsed by Twintwo winning again. I gave the reasons then, Twintwo may lose in head, but that is about all, besides Elf is getting too thick round shoulders and neck. In the large class Joe was returned the winner; he is hardly good enough in forefeet, body too long, and is not ribbed up enough, head of good shape but long. Diamond Forest, though he has a coarse head, runs the other very close. Sherry, third, has too fine a muzzle, but outside of this he is quite a nice one. Rallywood II. is rather large and coarse, but looks like a workman, and I am told is right for the country he is wanted for; Roscoe is not straight in front, and Pomp is too long-faced. The bitch class was small, only two appearing, and Parthenia won easily from Rally, though the former needs some stop she is well off behind the head and shows lots more quality than Rally, who is big and coarse. In puppies, Roger W. is a promising one, needs squareness of muzzle and is a little straight behind. Vixen ran it close, little long in body and same in muzzle. Royal Krueger won in under 13in., and looked as blooming as ever, while Lou was just a little too much for the toy Ava W. in the corresponding class Laddie, in open dogs, won over Little Wonder, but this was wrong, the winner has a light shelly body, wretched front comparatively, but has a trifle better head than the other, Little Wonder is streets ahead of Laddie; Rob Krueger is not straight in front and too round and full in skull; Gleurose is well up to the standard in height and a trifle round in skull and long in muzzle, his body is the best part. Flora K. had a tight thing of it with Topsy S., in the next class, she beats Topsy in eye and head generally, but other points are about equal and it's a toss up between them; Periwinkle is not quite right in front; Butterfly shows a little too much stop, but her expression is very pleasing and body well put together, coat rather soft, she is well up with the others to say the least. The kennel prize went to the Hornell-Harmony Kennels, who handled a very showy and sorty lot in divisions.

FOX-TERRIERS.—*Frank C. Wheeler, Judge.*—The display of these was a comparatively good one, although the quality is not quite up to the standard of the old country. In challenge class for dogs Blemton Trump added another win to his list. The challenge bitch class had no claimants for honors. In open dogs, a good-fronted, terrier-looking dog in Beverwyck Punster won, Blemton Rattle, a heavily-marked, good-headed and fronted one, making a good second; Ruxton, a fair good one, rather light in eye and big in feet, getting third. I preferred the vhc. My Fellow for this position, a good-class puppy that with time will take some beating. He has a beautifully marked, long, lean, level head, well-carried small ears, nice round bone, small feet, good coat and rare terrier outlook. Bitches—Grouse II., a nice quality, good-coated one, won with something in hand from Hillside Baroness, a good bitch, but gone in front and thickening in head, second, Rosa Canina, an old country winner now getting very wide in front and full in eye, taking third place. Blemton Su Su, vhc., wants substance, is wide in front and hare-footed. I was greatly impressed with the heavily-marked Damson, by Dominie ex Daphne. She is a trifle on the small side, but her beautiful head and ears, nice bone, straight legs, good feet, front and coat, and particularly the amount of quality she shows, should have placed her in the money. Dog puppies—First, My Fellow, wins easy; second, Calchas, light in eye, wide in front and thick in head; equal third, Trumpet and Cataraqui Critic, are weeds. Bitch pup

pies—First, Boscobel, is rather a nice puppy; second, Timbrell, is just fair.

In wire-haired, open dogs, the judge must have made a mistake when the weedy Tinderbox got the award over that sterling good terrier Adswood Jim. The former may have been a good terrier, but he certainly is not one now; he is exceptionally weak in bone, and the manner in which he was turned out made one really wonder what new breed of dog he was. At first sight he might have been mistaken for an overgrown Maltese terrier. The latter is a really good-coated dog that requires no dressing; his legs, feet and front are beautiful, his head and ears about perfect, and taken all over, he is a dog that even now would take some hard beating. The bitch class did not contain anything worth mentioning. Rough and smooth novice class—First, Ruxton; second, Tom Tom, a good-fronted one, fair head, but very bad eye; third, My Fellow, should have won in this class; reserve, Calchas. Novice bitches, rough or smooth—First, Bonally Belle; second, Boscobel; third, My Queen, very timid, still deserved a step up. Trimmer, the winning dog pup, has a capital head, but did not show up well. Mr. A. D. Stewart won both kennel prizes.

IRISH TERRIERS.—*F. C. Wheeler, Judge.*—A small but select lot of the "dare devils" turned up. They seem to be gaining in popularity on this side, and no wonder, either; their "hareum scareum devil may careum" look and character, and their kindly and affectionate disposition, endears them to all they happen to come in contact with. As companions they are unequalled, and as all round "sports" where is the dog that can look at them. In the challenge class, Boxer IV. had a walk over; he is a fairly representative specimen of the breed, but is much oversized. Open dogs saw that nice-sized, game-looking terrier Jack Briggs well to the front; he has improved much of late and is now quite a first-class dog. I believe this win qualifies him for the challenge class; second, a fair dog of nice size in Saltus, is well built, and bar his weak, snipy muzzle and really bad coat, I have little else against him. Commissariat, a fair uncropped dog, far too big, got third, and for once in his life Hanover Boy got his proper position at the foot of the class; his light gooseberry eye, dark shadings, snipy muzzle and extraordinary wide front is enough to keep him out of any competition. Bitches—The recently imported Candour won hands down here, and Mr. Jarrett, of the Chestnut Hill Collie Kennels, became so infatuated with her that he made her owner a bid of $500 for her, at which price she passes into his hands. When it is considered that Candour is probably the best Irish terrier bitch living, and that she is as yet little over her puppyhood, the price does not seem very big after all. Killarney Girl, a very fair cropped bitch, just full enough in eye, came in for second honors, and Salem Witch made a good third.

DANDIE DINMONT TERRIERS—*James Mortimer, Judge.*—Open dogs, Amphion, a very characteristic mustard, got the coveted card. He is very washed out in color, and I preferred his "pepper" kennel companion, King of the Heather, to him. The latter is a good sort of Dandie, but not quite good enough in front. Rodger, a promising pepper puppy, made an excellent third, while Laird of the Heather and Goyoa brought up the rear. In bitches, Heather Madge, a very fine bitch, but badly turned out, won with a lot in hand. Kirsty has a good topknot, but is at present sadly out of condition. Mena, who got third, is also a fair good sort, but badly shown; Ainsty Daisy did not put in an appearance.

BEDLINGTON TERRIERS.—Mr. Wheeler made the best of two really bad classes. Not even one decent-looking terrier present.

SCOTCH TERRIERS—*James Mortimer, Judge.*—These made a particularly meritorious turnout, and included some really first-class dogs. In open dogs Kilroy beat his kennel companion, Kilcree. As they stood to-day I would reverse the decision. Kilroy has the largest and strongest head, but it does not possess the quality or character of Kilcree's. Then in size, shape and carriage of ears, in legs and feet, and in shape and formation of body Kilcree has it by a bit. Both are good dogs, and had the third prize one, Lovat, been a size smaller, either of them would have had to look to their laurels. A rare old-fashioned stamp is Scotch Hot, but he is not what is wanted nowadays. In open bitches, Culbleau won easily. A rare character bitch, full of quality and all over a terrier; second, Grey, another old style one; third, Gipsy Yet, another of the same sort. Mr. Brooks of course won the kennel prize.

SKYE TERRIERS—*James Mortimer, Judge.*—The winner in dogs was old Sir Stafford, and he smothers Toodles, Islay, a capitally made one, won in bitches, though Endcliffe Maggie ran her close in head and coat. Scotch Rose was well behind these two.

BLACK AND TAN TERRIERS.—*James Mortimer, Judge.*—We always look for a good showing in these breeds here and we were not disappointed this time. Sultan smothered old Sir Wallace for challenge honors in dogs; no bitches turned up. In open dogs, Salisbury, under new ownership, had a good win over Merry Monarch, whose tan is not rich enough, body too long, eye not dark enough, head rather flat and plain though of good length, a smart looking little dog nevertheless. The Black Earl, capitally marked, runs him close, has a nice clean head, little round in skull and ears not well carried, capital thumb marks, etc. Louie could not be denied in bitches, English Lady follows, both are well known. Rochelle Topaz has beautiful tan and thumb marks, but other faults put her back. Puppies were good, Lady Don has nice markings and rich tan, but Black Earl runs her close. Space forbids going further into the awards. Yorkshire terriers were poor, the winning bitch being the best. Toys were also hardly worth mentioning; much on the apple-headed sort.

PUGS.—*James Mortimer, Judge.*—These turned out well and some of the best we have were on hand. Bonsor scored his first win under his new ownership, beating Bob Ivy in body especially. Cassina was the winner in bitches. That good little dog Dixie won well in open dogs, I spoke of him fully in Lexington report last year, he beats Patsey Bolivar in body and head and carriage of ears, the latter's head being dark and coarse but well shaped, rather large sized. Drake Howard, third, does not carry his ears right and is rather long in body. Penrice Boy has not improved on puppy form. Sara Bernhardt, well-known, won in the next class, beating Midget who is quite a nice one, though her ears are carried wide. Mint, third, is too flat in skull. The winning pup is quite a promising one though rather dark. The kennel prize fell to "Square Deal" Eberhardt.

TOY SPANIELS.—*Chas. H. Mason, Judge.*—In the open class Toronto Royal Duke won over Royal Roy better in head, coat and tan. The well known Topsy won easily again over her kennel mate Ruby, better head. La Fleur, third, fails in markings and coat, big. Romeo, the winner last year won in the mixed class and was alone, while a rather large Jap, too long nosed, won in that class.

ITALIAN GREYHOUNDS.—*F. C. Wheeler, Judge.*—Byron, the winner in dogs, seems a likely one, but really it was impossible to get at the dogs and tell which was which of the others when they were benched so much together.

The miscellaneous class was not very well filled and was more or less mixed. I noticed Sheffield Lad; the "Pom" was a winner, and Mr. Hays showed his wolfhound Leprechan, but the best was a smart Airedale terrier that won first in large size class. H. W. LACY.

*Correction.*—In the miscellaneous class the winners should be: 1st, W. H. B. Medd's Airedale terrier Jack; 2d, A. Trebilcock's Pomeranian Jumbo; 3d, A. S. Hays's Irish wolfhound Leprechan.

Mr. Brodie, the owner of Irish Ambassador and other good Irish terriers, wrote the reports on collies, fox-terriers, bull, Irish, and other rough terriers.

MASTIFFS.—CHALLENGE—1st, E. L. Kimball's Elkson.—OPEN—*Dogs:* 1st, F. J. A. Beier's Beaufort's Beau; 2d, W. D. Forbes's Grimsby Caution; 3d, John Massey's Minting Minor. *Bitches:* 1st and 2d, Hugh Falconer's Attraction and Bess; 3d, A. G. Brown's Ruby. *Puppies:* 1st, E. L. Burden's Lion; 2d, W. D. Forbes's Grimsby Jack.—NOVICE—1st, F. J. A. Beier's Beaufort Beau; 2d, Hugh Falconer's Attraction; 3d, W. G. Doherty's Ilford Mint.

ST. BERNARDS.—ROUGH-COATED—CHALLENGE—1st, Col. Jacob Ruppert's Aristocrat.—OPEN—*Dogs:* 1st, E. H. Moore's Lord Melrose; 2d, F. Stettenbenz's Hesper Son; 3d, Pottersburg Kennels' Don Phyllis; 4th, J. S. Williams's Monk. Reserve, C. H. Howard's Safety. Very high com., A. J. Grove's Premier. High com., P. T. Carey's Prince Imperial and H. E. Jenkins's Big Bob. Com., G. L. Maxham's Celtic, S. H. Thompson's Survivor and J. S. Williams's Benmore. *Bitches:* 1st, 2d and 3d, Col. Jacob Ruppert's Lady Anne, Lady Gladwyn and Altonette; 4th, Pottersburg Kennels' Glenisha. Reserve, F. Stettenbenz's Roulette. Very high com., P. Hart's Queen Vic. High com., J. S. Williams's Beulah. Com., Geo. Massey's Belle Maida, F. Stettenbenz's Queen Valentine and A. C. Woodman's Speranza.—PUPPIES—*Dogs:* 1st, Duncan Cameron's Prince Charlie. *Bitches:* 1st, Jas. Miller's Mable.

ST. BERNARDS.—SMOOTH-COATED.—OPEN—*Dogs:* 1st, E. H. Moore's Melrose; 4th, Frank A. Stanton's Sailor. *Bitches:* 1st, E. H. Moore's Miss Alton; 2d, H. Gorman's Sola; 3d, H. Schierloh's Charmion; 4th, Fred Stettenbenz's Lady Keeper. Very high com., H. Schierloh's Cleopatra II. High com., E. Wilson's Nellie. Com., R. W. Tuck's Lady Swiss.—PUPPIES—*Bitches:* 1st, Fred Stettenbenz's Lady Keeper; 2d, Henry Schierloh's Cleopatra II.—NOVICE—*Dogs:* 1st, Geo. Wright's Oscar; 2d, J. S. Williams's Dictator; 3d, C. H. Howard's Safety. Very high com., A. Grove's Premier. High com., Frank A. Stanton's Sailor and P. T. Carey's Prince Imperial. *Bitches:* 1st, E. H. Moore's Miss Alton; 2d, Geo. Massey's Belle Maida; 3d, H. Schierloh's Cleopatra II. Very high com., A. C. Woodman's Speranza.

NEWFOUNDLANDS.—1st, T. Langton's Major; others withheld.

GREAT DANES.—*Dogs:* 1st, S. Stewart's Don Cæsar, Jr.; 2d, A. McL. Howard's Bismarck; 3d, F. W. Wilson's Hero. *Bitches:* 1st, withheld; 2d, W. F. Dorn's Kelpie; 3d, F. W. Wilson's Freda; 4th, Mr. Royal Kennels' Minerva's Fawn.

RUSSIAN WOLFHOUNDS (or Psovoi).—*Dogs:* 1st, H. W. Huntington's Argoss; 2d, C. S. Hanks's Sarvanets. *Bitches:* 1st, H. W. Huntington's Princess Irma; 2d, C. S. Hanks's Flodeyka.

DEERHOUNDS.—*Dogs:* 1st, A. M. Lyons's Harvie. *Bitches:* 1st, 1st, H. Smith's Flora.

Mount Royal Kennels' Mount Royal Wanda and Mount Royal Floss. Very high com., C. A. Gibbs's Annie Gordon.—NOVICE—*Dogs:* 1st, Mount Royal Kennels' Mount Royal Rush; 2d, A. J. Devonshire's Rober. *Bitches:* 1st, Dr. S. Dixon's Princess Louise; 2d and 3d, Mount Royal Kennels' Mount Royal Wanda and Mount Royal Floss.

IRISH WATER SPANIELS.—OPEN—*Dogs:* 1st, T. A. Carson's Dan Rice; 2d, withheld. *Bitches:* 1st, J. C. Nichols's Marguerite; 2d, D. H. Bastedo's Flo Shaughran; 3d, T. A. Carson's Biddy Donelly.—*Puppies:* 1st, J. G. Nichol's Dennis; 2d, T. C. Carson's Biddy Donelly.

CLUMBER SPANIELS.—CHALLENGE—1st, A. H. Middleton's Boss III.—OPEN—1st, A. H. Middleton's Drake; 2d, withheld.

FIELD SPANIELS.—CHALLENGE—OVER 28LBS.—*Dogs:* 1st, Albert E. Foster's Beverley Negus; 2d, J. F. Kirk's Newton Abbott Laddie. *Bitches:* 1st, Ancient and Modern Kennels' What Not.—OPEN—OVER 28LBS.—BLACK—*Dogs:* 1st, Albert E. Foster's Judea; 2d, Dr. S. S. Bradbury's Warwick; 3d, C. E. Fenton's Rab. Reserve, Corktown Kennels' Corktown Cupid. Very high com., Herbert M. Howes's Wonder and J. A. Spracklin's Black Pete II. High com., J. F. Kirk's Rosedale Bob. Com., W. H. Gray's Banjo. *Bitches:* 1st and 2d, J. A. Spracklin's Grace and Daisy Dean; 3d, Corktown Kennels' Dot Snivel). Reserve, J. F. Kirk's Rosedale Princess. Very high com., J. F. Kirk's Rosedale Romp.—OPEN—OVER 28LBS.—LIVER—1st, J. A. Spracklin's Queenie; 2d, I. X. L. Kennels' Carlile's Napoleon.—ANY OTHER COLOR—1st, H. M. Douglas's Billy; 2d, I. X. L. Kennels' Carlile's Sam. *Puppies:* 1st, Dr. S. J. Bradbury's Warwick; 2d, J. F. Kirk's Rosedale Brush; 3d, C. F. Fenton's Rab. Reserve, J. K. Kirk's Rosedale Princess.

BEAGLES.—CHALLENGE—*Dogs:* 1st, Hornell-Harmony Kennels' Tricotrin. *Bitches:* 1st, Glenrose Kennels' Twin Two; 2d, Hornell-Harmony Kennels' Elf.—OPEN—*Dogs:* 1st, G. D. Welton's Joe; 2d, National Beagle Kennels' Diamond Forest; 3d, Hornell-Harmony Kennels' Sherry. Very high com. reserve, Albion Kennels' Rallywood. Very high com., G. D. Welton's Pomp and Albion Kennels' Romp. High com., H. B. Nicoll's King Krueger. *Bitches:* 1st, Glenrose Kennels' Parthenia; 2d, Albion Beagle Kennels' Rally. *Puppies:* 1st, Hornell-Harmony Kennels' Roger W.; 2d, G. D. Welton's Vixen.—UNDER 15IN.—CHALLENGE—*Dogs:* Hornell-Harmony Kennels' champion Royal Krueger. *Bitches:* 1st, Glenrose Kennels' Low; 2d, Hornell-Harmony Kennels' Alva W.—OPEN—*Dogs:* 1st and 2d, Hornell-Harmony Kennels' Laddie and Little Wonder; 3d, F. P. Robson's Bob Krueger. Very high com reserve, Glenrose Kennels' Glenrose. Very high com., Raglan Kennels' Guy. *Bitches:* 1st, Hornell-Harmony Kennels' Flora K.; 2d, National Kennels' Topsy S.; 3d, Albion Beagle Kennels' Periwinkle. Very high com. reserve, Glenrose Kennels' Butterfly Very high com., A. Geddes' Snow and Arden Kennels' Arden's Cora Krueger. High com., Hornell-Harmony Kennels' Nibs.

GORDON SETTER COUNT NOBLE, 1ST, TORONTO, 1892.
Owned by Mr. S. A. Nickerson, Providence, R. I.

GREYHOUNDS.—CHALLENGE—*Dogs:* 1st, Arthur W. Purbeck's Gem of the Season. *Bitches:* 1st, Arthur W. Purbeck's Bestwood Daisy.—OPEN—*Dogs:* 1st, A. W. Purbeck's Echo; 2d, J. W. Wolfred Wurtele's Justinian G.; 3d, reserve, high com. and com., C. E. Ireson's Ranger. Never Quit, Twilt and Young Memnon. Very high com., Frank L. Mabee's Fawn and Miss F. Habart's Fullerton. High com., Joseph Bradon's Jack B. and E. F. Davis's Fleet. *Bitches:* 1st, J. Wolfred Wurtele's Jetsam; 2d, A. W. Purbeck's Lily of Gainsboro; 3d, Chas. E. Rowland's Laonie. Very high com., Manatang Kennels' Marguerite and C. E. Ireson's Miss Memnon. High com., Dr. J. Fotheringham's Elsel II. *Puppies:* Withheld.

ENGLISH SETTERS.—CHALLENGE—*Dogs:* 1st, F. S. Brown's Edgemark. *Bitches:* 1st, W. B. Wells's Cambriana.—OPEN—*Dogs:* 1st, E. G. Walsh's Sultan; 2d, Pennsylvania Kennels' Ben Hur of River View; 3d, Joe Lewis's Tony Gladstone; 4th, W. B. Wells's Matane. Reserve, J. Kime's Druid, Jr. Very high com., T. G. Davey's Brighton Benwell, Dr. J. A. Hartman's Sig Gladstone High com., H. Marshall's Locksley II., J. Kime's Mingo, Jr., W. B. Wells's Luke. Com., C. S. Macdonald's Westmoreland, J. Kime's Brush K. *Bitches:* 1st, J. Kime's Lady Patch; 2d and 3d, T. G. Davey's Esmeralda; 4th, W. B. Wells's Daphne. Reserve, Joe Lewis's Miss Frost. Very high com., T. G. Davey's Misfortune, J. Kime's Lady Spot. High com. and com., Forest Kennels' Forest Louise and Forest Belle.—NOVICE—*Dogs:* 1st, John Ayre's Ponto; 2d, J. Kime's Druid, Jr.; 3d, J. A. Hartman's Sig Gladstone. RETRIEVERS—Best brace, T. G. Davey's Loyal and Beaver; best dog, Loyal; best bitch, Beaver.

IRISH WATER SPANIELS—Best brace, T. A. Carson's Dan Rice and Biddy Donnelly; best dog, J. C. Nichol's Dennis; best bitch, J. C. Nichol's Marguerite.

CLUMBER SPANIELS—Best dog, Boss III.

FIELD SPANIELS—American Spaniel Club's $100 cup, A. E. Foster's Beverly Negus; best kennel, J. F. Kirk; best brace, Spacklin's Grace and Queenie; best dog (Canadian), J. F. Kirk's champion Newton Abbott Laddie; best bitch (Canadian), Queenie.

COCKER SPANIELS—American Spaniel Club's $100 cup, Geo. Bell's Fascination; best kennel, Geo. Bell; best brace, Geo. Bell's Fascination and Amazement; best dog, Fascination; best bitch, Amazement.

DACHSHUNDS—C. K. C. diploma for best bitch, T. C. Blogg's Lena.

BEAGLES—Association prize for best kennel, Hornell-Harmony Kennels; C. K. C. diploma for the best kennel owned in Canada, Albion Beagle Kennels; Beagle Club specials, best dog, champion Royal Kruezer, and best bitch, Glenrose Kennels' Lou; best brace (Canadian), Albion Beagle Kennels' Rally and Periwinkle; best dog, F. P. Robson's Bob Krueger; best bitch, Rally.

FOX-TERRIERS—Association prizes and C. K. C. diploma for best kennels (smooth and wire-haired), A. D. Stewart; best brace, A. D. Stewart's My Fellow and Hillside Baroness; best dog, A. A. Macdonald's Blemton Trump; best bitch, Hillside Baroness; sweepstake (smooth or wire-haired), whelped in 1891 or 1892, Clover Hill Kennels' Tom Tom; best wire-haired dog, Fred Wetherall's Tinderbox; best wire-haired bitch, A. D. Stewart's My Queen (all Canadian specials).

IRISH TERRIERS—Best kennel, Dr. W. H. Drummond's Commissariat; best bitch, Wm. Brodie's Candour.

DANDIE DINMONT TERRIERS—Best dog and bitch, R. Wanless's Roger and Kirsty.

BEDLINGTON TERRIERS—Best dog, W. Kingdon's Jack; best bitch, W. Chalmers's Jenny.

SCOTCH TERRIERS—Best brace and best dog and bitch, W. P. Fraser's Lovat and Grey.

SKYE TERRIERS—Best brace, C. H. Smith's Islay and Prairie Flower; best dog, A. J. & H. L. Jeffrey's Toodles; best bitch, Islay.

BLACK AND TAN TERRIERS—Association prize for best kennel, Rochelle Kennels; best brace, Canadian, A. E. Elmer's Sir Wallace and Grace; best dog, Wm. Brodie's The Black Earl; best bitch, A. Elmer's Lady Don.

YORKSHIRE TERRIERS—Best bitch, Allan Trebilcock's Tiny Jones.

TOY TERRIERS—Best brace, W. R. Mumford's Paddy Trix and Nettie; best dog, G. E. Manson's Jole; best bitch, Nettie.

PUGS—Exhibition prize for best kennel, Eberhart Pug Kennels; best dog, Canadian, Hugh Falconer's Peekaboo; best bitch, J. J. Briggs's Judy II. Open bitch class, Eberhart Pug Kennels' Sara Bernhardt (not Howard's Obon, as reported last week).

KING CHARLES SPANIELS—Best brace and best dog and bitch, Trebilcock & Rogers's Toronto Duke and Topsy.

## MT. HOLLY DOG SHOW.

[*Special Report.*]

THE first annual bench show held in connection with the 46th annual Burlington County Agricultural Society's fair, at Mount Holly, N. J., Sept. 12 to 16, brought together many well known prize winners, and several new dogs of more than average merit, making an exhibition equal to those of many kennel clubs, and though it may not call for the usual technical report, the fact of the show being recognized by the American Kennel Club, and the singular manner in which awards were made, where the records of dogs of renown suffered, some serious as well as critical remarks should be made.

Mr. J. Holmes Longstreet, who had the show under his charge, left Mr. Frank Smith to superintend, which he did in a praiseworthy manner.

Mr. John Diehl, who accepted the position of judge, must have imagined that little progress had been made since the time of the pointer Sensation, and that retrogression was the rule in other classes in this degenerate age, consequently his singular awards and his equally bad explanations, brought down a shower of uncomplimentary remarks, some being made to his face in the ring.

The building was well suited for the show. Spratts biscuits and Burlington county beef were used to meet the calls of the inner dog, and as to disinfectants, cleanliness and pure air seemed to meet all demands.

"Have you seen the dogs?" was whispered around, and great was the crowd that swarmed through the building devoted to them, and strange indeed were the remarks and inquiries which they called forth. After looking at the $10,000 dog, worth more than a farm and a spanking team of trotters, and admiring the "animated hearth rug"—the poodle champion Dexter—and one or two others, very often inquiries came for the "coolies or shepherd dogs" and a look of wonder then succeeded the look of curiosity, for there were none on exhibition.

It was but natural that at a country fair such dogs should be on exhibition, and though the country folks may be interested in all things curious, they are also interested in everything useful to them.

Of the larger breeds Mr. Chas Porter's Brother was a good representative of the English mastiff, and their German brothers the Great Danes or German mastiffs had Messrs. Weisbrod and Hess's Bismark and Flora II., two stylish dark brindles with symmetry, character and agility. Mr. Magnus Schulls was unlucky in having to bring his harlequin Tyras into the ring against such, and though he had the puppy class to himself with a son and daughter of this dog the second prize was withheld.

The St. Bernard entries were chiefly well known, but when such a dog as Refuge II. (winner of forty-one firsts in England) is defeated there is usually some curiosity to learn something of the new aspirant. Mr. Fred Schmidt has in Otos a dog that must stand nearly 34in. and could be made to weigh 200lbs. He has a good coat, dark orange, with white collar, legs, tail tip, blaze, and having besides dark face shadings, he is about right in those respects. In head he follows his sire, Ben Lomond, and has the angular rather than the rounded outline, and though he has a large, well-made head, with muzzle, depth of lip and colors in his favor, his somewhat light eye, showing haw, detracts, and there is a lack of character. His limbs are good, and in this he gained over Refuge II., for he is going in pasterns as well as stifles, whereas Otos was agile, showed the sweet disposition of his dam, Corette, the beautiful daughter of champion Save and champion Queen Jura, and were it not for his having less flesh than is generally expected for show bench condition, a want of substance and spring of ribs might not have been noticed except by the most critical. A dog of such height, breeding and general excellence deserves the attention of all interested in the breed, and his having been bred in America, together with this, his first achievement, must add to the interest.

Mr. W. C. Reick's Lady Bountiful was only given second in the bitch class, though a tall, active orange and white of much merit and sired by Lord Bute, and certainly deserved the blue ribbon.

The New York St. Bernard Kennels' exhibit was a feature of the show, and the dogs were in excellent form. Mr. Dan Foster's Leicester won the special for the best St. Bernard in the show, and was in good trim. His wife's pet, Jolly Commodore, is a pup of good color, shadings and action, and competes in the rough division.

In English setters the dogs are well known and the competition was not strong.

In the Irish there were two distinct types—Carrie S. and Planet Chief of the cobby build, and Molly's Best, one of the long, narrow-headed style, which the judge failed to appreciate.

The Gordon exhibit was a feature of the show. Heather York met and defeated his brother, Rexmont, in the challenge class, reversing a decision of a better known judge made at the last Washington show, and as Mr. Diehl could only find a better distribution of tan in favor of the winner, the award may be taken for what it is worth. Comus, a matured dog, met a pup in Brillmont in the open class. Salmont, first in bitches, is a sister of the two challenge class dogs, and the dam of Brillmont and Raymont, first in puppy class. Maternal duties have prevented her exhibition since her puppy wins at Chicago and Boston.

In the pointer class Lad of Kent met Inspiration, much to the sorrow of Mr. Geo. Jarvis, the proud owner of Lad. When the judge explained that his ideal was old Sensation, and Inspiration was the same color and sort of dog, the value of the decision may be easily estimated, and though there may be rejoicing at Philadelphia there should not be sorrow at New York.

In greyhounds, Sir Launcelot (Gem of the Season—Lady Clare) followed up his successes as a puppy at Washington and Pittsburgh, by an open-class win over Mr. Leiber's Flora and the Woodhaven Kennels' Spider.

The next class where there was competition was the fox-terriers, and after reference to his books, and whispered consultations, decisions were made by the judge which do him credit; for in a class where there was a chance to make an error of judgment, the awards went to the right dogs.

In bull-terriers there was a Jim Corbett, but he got defeated, and rightly, too, for Lady Velmar first, and Regal second, were good specimens, the latter having the better head and expression, and being as good in other respects, deserved the blue. A nice promising youngster, by Gully the Great ex Wild Rose, was presented in Castle Bride, the winner in the puppy class.

There were many good dogs in the other classes, but as there was little possibility for wrong decisions, it is needless to do more than refer to the list of awards below. We understand that the committee see the justice of a demand for a competent judge, and that at the show next year those who are "up to date" will be asked to judge, which will be absolutely necessary to secure the entry of such dogs as were present this year. EDWIN H. MORRIS.

LIST OF AWARDS.

MASTIFFS.—1st, Charles Porter, Jr.'s, Brother.

ST. BERNARDS—ROUGH-COATED—CHALLENGE—*Dogs:* 1st, W. C. Reick's Kingston Regent. *Bitches:* 1st, W. C. Reick's Republican Belle. OPEN—*Dogs:* 1st, Fred Schmidt's Otos; 2d, W. C. Reick's Refuge II.—*Bitches:* 1st, withheld; 2d, W. C. Reick's Lady Bountiful.—SMOOTH-COATED—1st, D. P. Foster's Leicester; 2d, Charles S. Baker's Lady Leeds.—PUPPIES—1st, Mrs. D. P. Foster's Jolly Commodore.

GREAT DANES—1st and 2d, Weisbrod & Hess's Bismarck and Flora II; 3d, Magnus Schull's Tyras. *Puppies:* 1st, Magnus Schull's Flora; 2d, withheld; 3d, Magnus Schull's Nero.

ENGLISH SETTERS—CHALLENGE—1st, Frank G. Taylor's Breeze Gladstone.—OPEN—1st, R. R. Moore's Kent's Rex; 2d, Pennsylvania Kennels' Benzine.

IRISH SETTERS—CHALLENGE—1st, E. H. Maber's Larry S.—OPEN—1st, E. H. Maher's Planet Chief; 2d and 3d, Charles Thompson's Fly and Molly's Rest. *Puppies:* 1st, A. V. L. Pumyea's Red Riding Hood.

GORDON SETTERS.—CHALLENGE—*Dogs:* 1st, J. B. Blossom's Heather York; 2d, Fernwick Kennels' Rexmont. *Bitches:* 1st, J. B. Blossoms's Flemont.—OPEN—*Dogs:* 1st, J. B. Blossom's Comus; 2d, E. Morris's Brillmont. *Bitches:* 1st, E. Morris's Salmont. *Puppies:* 1st, E. Morris's Raymont.

POINTERS.—CHALLENGE—1st, J. H. Winslow's Inspiration; 2d, Geo. Jarvis's Lad of Kent.—OPEN—1st, J. S. Summers's Bing of Kippen; 2d, Geo. Jarvis's Lass of Kent; 3d, E. Halpen's Bracket's Ladd.

RUSSIAN WOLFHOUNDS.—1st, H. W. Huntington's Zerry.

GREYHOUNDS.—1st, E. Morris's Sir Launcelot; 2d, W. S. Leiber's Flora; 3d, Woodhaven Kennels' Spider.

BEAGLES.—CHALLENGE—1st, W. M. H. Child's Tony Weller.—OPEN—1st, Wm. Woll's Lady.

DACHSHUNDS.—1st, Weisbrod & Hess's Peterman van Schlachdensee.

COCKER SPANIELS.—1st, A. H. Darnell's Sue. *Puppies:* 1st, L. N. Walton, Jr.'s King; 2d, A. H. Darnell's Sue; 3d, E. H. Morris's Glen.

FIELD SPANIELS.—1st, E. A. Wilson's Bradford Mohawk; 2d, E. H. Morris's Bachelor.

KING CHARLES SPANIELS.—1st, Jacob Bromach's Duke of Wellington. *Puppies:* 1st, E. H. Morris's Union Jill.

BULLDOGS.—1st, F. Irwin's Glenwood.

BULL-TERRIERS.—1st, Lansdowne Kennels' Lady Velmar; 2d, Mrs. Sidney Harris' Regal; 3d, H. W. Schlechter's Jim Corbett. *Puppies:* 1st, G. P. Runton's Castle Bride.

FOX-TERRIERS.—1st, J. B. Nelson, Jr.'s, Regent Brisk; 2d, Lansdowne Kennels' Desperado.

IRISH TERRIERS.—1st, Edward Lever's Kathleen.

SKYE TERRIERS.—1st, Walter S. Leiber's Sir Roger. *Puppies:* 1st, Walter S. Leiber's Sir Bruce.

SCOTCH TERRIERS.—1st, T. H. Garlick's Glenelg.

BLACK AND TAN TERRIERS.—1st, Addison Rowe's Play Boy; 2d, Rochelle Kennels' Rochelle-Sultana. *Puppies:* 1st, Addison Rowe's Play Boy.

ITALIAN GREYHOUNDS.—1st, Jacob Brombach's Golden Rod.

PUGS.—1st, Jacob Brombach's Diamond Kennels' Bradford Rowdy; 2d, Jacob Brombach's Diamond Kennels' Frisk.

POODLES.—CHALLENGE—1st, Edwin H. Morris's Dexter.—OPEN—1st, 2d, and 3d, James Simpson's Black, Domino and Lady. *Puppies:* 1st, Edwin H. Morris's Dot.

MISCELLANEOUS.—OVER 50 LBS.—1st, Henry Seher's Rover. Bitches with puppies under eight weeks old—1st, Jacob Brombach's Diamond Kennels' Diamond Queen; 2d, Lansdowne Kennels' Velma.

The pointer Kentwood, by King of Kent out of Belle Randolph, was shipped last Monday by Robert Leslie, Lynn, Mass., to Mr. Burke C. Miller, of Little Rock, Ark., to be trained by that gentleman.

### How it Reverberates.

BLOOMING GROVE PARK ASSOCIATION, Club House, Sept. 19.—To my advertisement for a foxhound, in your issue of the 8th inst., I have had replies from nearly all the Eastern, Central and Middle States, showing how well your paper is read.

CHAS. FRANCIS HARDY.

## IRISH SETTER CLUB DERBY.

*Editor Forest and Stream:*

Inclosed please find the list of entries for the Derby Stake of the Irish Setter Field Trials. There are 22 in all, 9 more than last year. All were whelped in 1891:

ROMAYNE (Dr. Wm. Jarvis), bitch (Duke Elcho—Romaine), October.

GINE (Dr. Wm. Jarvis), bitch (Elcho, Jr.—Romaine), February.

BELLE OF MEXICO (Geo. H. Kunkel), bitch (Dan O'Connell—Lalla Rookh), November.

ROCKWOOD DANDY (Chas. T. Thompson), dog (Desmond II.—Fly), March.

ROCKWOOD HEN (C. E. Thompson), bitch (Tim—Estelle), March.

MOLLEEN (F. L. Cheney), bitch (Henmore Shamrock—Daisy), January.

KILDARE WINNIE (W. H. Beazell), bitch (Beau Brummel—Winnie II.), March.

SHANDON BELLE (J. J. Scanlan), bitch (Inchiquin—Daisy H.), August.

CLAREMONT CLARA (F. H. Perry), bitch (Claremont Patsy—Nellie Glencho), March.

HAWKEYE DICK (Perry & Switzer), dog (Claremont Patsy—Nora of Claremont), April.

HAWKEYE QUEEN (Perry & Switzer), bitch (Claremont Patsy—Nora of Claremont), April.

ELPHIN II. (Glenmore Kennels), bitch (Tyrconnel—Kinvara), May.

GLENMORE OWNIE (Glenmore Kennels), bitch (Elcho, Jr.—Romaine), April.

GLENMORE BAN (Glenmore Kennels), bitch (Desmond II.—Nellie), March.

GLENMORE PET (Glenmore Kennels), bitch (Mack N.—Ruby Glenmore), September.

GLENMORE WAD (Glenmore Kennels), dog (Mack N.—Ruby Glenmore), September.

GLENMORE APPIE (Glenmore Kennels), bitch (Desmond II.—Nellie), March.

GLENMORE BEAU BUM (Glenmore Kennels), dog (Beau Brummel—Belle Anna), July.

GLENMORE JAY BIRD (Glenmore Kennels), bitch (Mack N.—Ruby Glenmore), September.

REDSKIN (Dr. Edward B. Weston), dog (Mardo—Mirtie), April.

SAGAS TEARAWAY (Geo. E. Gray), dog (Tearaway—Tillie Boru), April.

TILLIE BORU II. (W. H. Laird), bitch (Tearaway—Tillie Boru), April.

G. G. DAVIS, Secretary.

## NATIONAL BEAGLE CLUB MEETING.

*Editor Forest and Stream:*

AN executive meeting was held at Boston, Mass., Sept. 8. Called to order at 7:20 by president. Minutes approved. Committee on premium list, F. W. Chapman, chairman, then read report, which was accepted. Voted that following classes be made at bench show:

Class 1, challenge dogs, 15 to 13in.; prizes, 1st 60, 2d 40 per cent.

Class 2, challenge bitches, 15 to 13in.; prizes, 1st 60, 2d 40 per cent.

Class 3, open dogs, 15 to 13in.; prizes, 1st 40, 2d 30, 3d 20 per cent.

Class 4, open bitches, 15 to 13in.; prizes, 1st 40, 2d 30, 3d 20 per cent.

Class 5, challenge dogs, 13in. and under; prizes, 1st 60, 2d 40 per cent.

Class 6, challenge bitches, 13in. and under; prizes, 1st 60, 2d 40 per cent.

Class 7, open dogs, 13in. and under; prizes, 1st 40, 2d 30, 3d 20 per cent.

Class 8, open bitches, 13in. and under; prizes, 1st 40, 2d 30, 3d 20 per cent.

Class 9, puppies, dogs and bitches; prizes, 1st 40, 2d 30, 3d 20 per cent.

Voted that 250 premium lists, 350 entry blanks and 350 return envelopes be printed for bench show. Voted 250 entry blanks for field trials be printed.

Voted that all approved advertising be accepted for premium list and catalogue of bench show at $2 a page.

Communications read and filed.

Mr. Guy D. Welton, Detroit, Mich., was elected to membership. Voted that resignation of W. Stewart Diffenderffer be accepted. Voted that $5 for best beagle dog and $5 for best bitch be donated to National Greyhound Club show held at Brooklyn, N. Y.

Voted, that H. L. Kreuder, Nanuet, N. Y., be appointed on pedigree committee in place of H. F. Schellhass, resigned.

Voted, that in conformity with Art. 5, Sec. II. of Constitution, the executive committee divide itself into two opposition parties as follows: Messrs. F. W. Chapman, John Davidson, H. V. Jamieson and W. S. Clark, and Messrs. B. S. Turpin, W. A. Power, H. L. Kreuder and O. W. Brooking.

Voted that $20 be devoted to advertising field trial and bench show in principal kennel journals.

Voted that W. S. Clark be appointed to solicit advertisements for premium list and catalogue of bench show. Adjourned 9:15. H. V. JAMIESON, Sec'y N. B. C.

MELROSE, Mass.

## CENTRAL FIELD TRIAL FREE FOR ALL.

IN view of the probability of a much increased number of starters in the Free for All Stake, the Central Field Trial Club will change the running as follows: There will be a preliminary round of four hour heats, as heretofore, but the judges may slightly extend the time of any brace, if necessary to make the endurance test clear.

The dogs kept in for the remaining series will be run for such time as is deemed necessary to a decision by the judges, and the whole stake will be run under the spotting system.

The handlers will have the privilege of handling their dogs from horseback during this stake.

Up to the present time all dogs who have shown themselves fit for a four hour heat have been perfectly able to repeat the same; while the quitters fell down on their first heat. It therefore appears unnecessary to run a continued four hour race, and with an increased number of starters would be quite impossible.

In the opinion of all competent authorities whose expression we have been able to get, this is the most useful and instructive stake in the whole field trial round. The club desires to perfect it and make it the leading feature of the season. It is believed that the above changes and the giving of second and third prizes will meet the views of sportsmen and considerably increase entries.

C. H. ODELL, Sec'y and Treas.

### Ottawa Show.

The following is a list of specials for the Ottawa dog show: For the best St. Bernard, $5; greyhound dog, hat; bitch, $2; foxhound, $3; beagle dog and bitch, $2; pointer and English setter, $3; Irish setter, Gordon setter, $3; collie, Clumber spaniel and field spaniel, $2; cocker spaniel dog, $3; bitch, $2; fox-terrier dog, $3; bitch, $2; black and tan terrier, Irish terrier, Yorkshire terrier, toy spaniel, pug, dachshund, $2. For local competition only: Subscription to *Canadian Kennel Gazette* for best field spaniel, cocker spaniel, deerhound and beagle. The Association's handsome diploma will be given for best specimen in open and novice classes in each and every breed.

## THE KINGSTON SHOW.

*[Special to Forest and Stream.]*

KINGSTON, Ont., Sept. 21.—The show opened auspiciously on Monday and judging was carried through till Tuesday evening. The weather is good, but attendance is poor. The awards to date are:

MASTIFFS.—1st, Falconer's Attraction.

ST. BERNARDS.—CHALLENGE—1st, Ruppert's Aristocrat.—OPEN—ROUGH—*Dogs:* 1st, 2d and high com., Moore's Lord Melrose, Baldus and Oudine. *Bitches:* 1st, 2d and 3d, Ruppert's Lady Gladwyn, Miss Anne and Altonette.—SMOOTH—*Dogs:* 1st, Moore's Melrose. *Bitches:* 1st, Moore's Miss Alton.

GREYHOUNDS.—CHALLENGE.—1st, Purbeck's Gem of the Season.—OPEN—*Dogs:* 1st, Purbeck's Pious Pembroke. *Bitches:* 1st, Purbeck's Lilly of Gainsborough; 2d, Wurtel's Jetsam IV. High com., Curtis's Clio.

BEAGLES.—CHALLENGE—1st, Kreuder's The Rambler.—OPEN *Dogs:* 1st and 3d, Kreuder's Jack Rowell and Duce; 2d, Curtis's Ranger. Very high com., Robson's Rob Krueger. *Bitches:* 1st, Kreuder's Kernannan.

ENGLISH SETTERS.—CHALLENGE—1st, Brown's Edgemont.—OPEN—*Dogs:* 1st, Walsh's Sultan; 2d, Taylor's Ben Hur of Riverview; 3d, Graydon's Locksley II. Very high com., Sears's Sir Harold. *Bitches:* 1st, W. Forest Kennels' Forest Louise; 2d, Kingston Kennels' Maid of Kent.—NOVICE—1st, Sullan's Forest Louise; 2d, Locksley II. High com., Darby's Earl.

IRISH SETTERS.—CHALLENGE—*Dogs:* 1st, Tim. *Bitches:* 1st, Laura B.—OPEN—*Dogs:* 1st and 3d, Seminole's Pride of Paisey and Montauk, Jr.; 2d, W. Paul's Stoco. Very high com., Mount Royal Elfrin. High com., Mount Royal Elfrus. *Bitches:* 1st, Seminole's Claremont Heather; Douglass & Chambers's Irene.—NOVICE—1st, Claremont Heather; 2d, Elfrin; 3d, Kingston Kennels' Madcap II. High com., Elfrus.

GORDON SETTERS.—CHALLENGE—*Dogs:* 1st, Dixon's Leo B. *Bitches:* 1st, Dixon's Duchess of Waverly.—OPEN—*Dogs:* 1st, W. Mount Royal's Mount Royal Rush; 2d, Dixon's Duke of Wellington. *Bitches:* 1st, Graham's Lady Gordon; 2d, Dixon's Princess Louise; 3d, very high com. and high com., Mount Royal's Wanda, Floss C. and Nujen.

POINTERS.—CHALLENGE—Mount Royal's Devon Noll.—OPEN—*Dogs:* 1st, Connell's Rock; 2d, Grayson's Donovan. *Bitches:* 1st, Mount Royal's Chaira; 2d, Smith's Kune. High com, Kingston Kennels' Sunet M.—NOVICE—1st, Chaira; 2d, W. Kune; 3d, Kingston Kennels' Bell Bird. Very high com., Donovan.

GREAT DANES.—1st, Stewart's Don Cæsar.

IRISH WATER SPANIELS.—*Dogs:* 1st, Carson's Dan Rice *Bitches:* 1st, Carson's Biddy Donnelly; 2d, Nichols's Marguerite

CLUMBERS.—1st, Smart's Darby.

FIELD SPANIELS.—1st, Spracklin's Queenie; 2d, Howe's Wonder; 3d, Walkem's Sport.

COCKERS.—BLACK.—CHALLENGE—*Dogs:* Bell's Fascination. *Ditches:* Bell's Amazement.—OPEN—*Dogs:* 1st, Kennedy's Jay Kay; 2d, Mitchner's Dora. *Bitches:* 1st, Keyes's Rideau Flossie; 2d, Bell's Troublesome; 3d, Spracklin's Volo. Reserve, Kennedy's Molly Baron. High com., Thompson's Lillie.—OTHER THAN BLACK.—CHALLENGE—Nellie's Red Jacket.—OPEN—*Dogs:* 1st, Spracklin's Red Oho; 2d, Leigh's Rufus; 3d, W. Gowan's Red Fellow. *Bitches:* 1st, Bell's Cherry Ripe; 2d, Spracklin's Lady.—NOVICE—1st, Troublesome; 2d, Jay Kay; 3d, Rideau. Reserve, Cherry Ripe. Very high com., Bates's Nina. High com., Thompson's Lillie and Red Fellow. Com., Walkem's Rusty.

COLLIES.—CHALLENGE—*Dogs:* Seminole's Roslyn Dandy. *Bitches:* Seminole's Metchley Surprise.—OPEN—*Dogs:* 1st, Chestnut Hill's Wellsbourne Charlie; 2d, Hempstead Farm's Conrad; 3d, McEwen & Gibson's Samson. Reserve, Seminole's Chrisolite. Very high com., Ford's Metchley's Bob. *Bitches:* Seminole's Bertha and Crissy: McEwen & Gibson's Crissy; McEwen & Gibson's Dudley Chris.

BULLDOGS.—CHALLENGE—Smith's Carisbrook.—OPEN—Dole's Lady Venus.

BULL-TERRIERS.—CHALLENGE—Dole's Starlight.—OPEN—1st, 2d, 3d and very high com., Homes's Count II., Chatham Prince, Grove's Duchess, Tournout Kit.

FOX-TERRIERS.—CHALLENGE—McDonald's Blemton Trump.—OPEN—*Dogs:* 1st, Bank's Blemton Rattler; 2d, Rathbone's Beverwyck Prinston; 3d, McDonald's Calchas. Very high com., Hanks's Bambou, Keyes's Rideau Rivet. *Bitches:* 1st, Hanks's Grouse II., 2d, Stewart's Hillside Baroness; 2d, Hanks's Fuss. Very high com., Hanks's Damson, Oldrieve's Dudley Stave. High com., Arden's Rosa, Jr.—NOVICE.—1st, Myfellow; 2d, Calchas; 3d, Hempstead Farm's Suffolk Tesse. Very high com., H. W. Smith's Sister Trick.—WIRE-HAIRS.—1st, Hempstead Farm's Suffolk Trimmer; 2d, Wetherall's Tinder Box; 3d, Hempstead Farm's Tesse. Very high com., Sister Trick.

SCOTCH, SKYE, DANDIE DINMONT TERRIERS.—CHALLENGE—Strimm's Sir Stafford.—OPEN—1st, Wanton's Rodger; 2d, Symonds's Scotch Hot; 3d, Endcliffe's Maggie. Very high com., Brock's team of Dandies. Reserve, Smith's Islay.

IRISH TERRIERS.—CHALLENGE.—1st, Comstock's Bosco IV.—OPEN—*Dogs:* 1st and 3d, Symonds's Salem and Jack Brigge; 2d, Comstock's Hanover Boy. Reserve, Drummond's Commissariat. *Bitches:* 1st, Mount Royal Kennels' Libbie; 2d, O'Connor's Gultees; 3d, Brown's Killarney Girl.

BLACK AND TAN TERRIERS.—CHALLENGE—1st, Elmer's Sir Wallace.—OPEN—*Dogs:* 1st, Dole's Salisbury. *Bitches:* 1st, Symonds's Rosette; 2d, Rochelle Kennels' Topaz. Reserve, Rochelle Kennels' English Lady. Very high com., Dole's Louie, Elmer's Lady Don. High com., Elmer's Grace.

TOY SPANIELS.—1st and 3d, Trebilcock's Toronto Royal Duke and Topsy; 2d, Central Kennels' Royal Roy.

PUGS.—CHALLENGE—1st, Seminole Kennels' Bonsor.—OPEN—*Dogs:* 1st, Hardy's Dixie; 2d, Adams's Meddler; 3d, Miller's Dandy, Jr. *Bitches:* 1st, Seminole Kennels' Midget; 2d and 3d, Hardy's Mint and Miss Penrice. Very high com., Hardy's Baby Ruth.

FOXHOUNDS.—1st, Spracklin's J. I. T.; 2d, Curtis's Jack.

MISCELLANEOUS.—*Dogs:* 1st, Seidee's Fritz K.; 2d, Lewis's Biglow; 3d, Lyons's Harvey. Very high com., Hanks's Servanates, Trebilcock's Jumbo. *Bitches:* 1st, Hanks's Elodevka; 2d, Manice's Jessie; equal 3d, Victoria and Thomas's Boston Mdel. Very high com., Symonds's Jenny.

## THE WESTERN MICHIGAN SHOW.

*Editor Forest and Stream:*

I cannot help noticing, with your permission, the letter of Mr. Bates, secretary of the Kingston show, published in your issue of the 8th inst. It was bad enough for Kingston to come along long after we had claimed our dates and publish the same dates for their show, but when any club resorts to such direct slurs as he makes use of regarding our entry fee and "novice" management of our show, as he terms it, I feel that this "patent medicine" style of trying to draw from our entry is very unbecoming. Do you suppose there is another man in the same official capacity in this country or Canada that would write such an article with the direct purpose of injuring another show. No, sir; and perhaps the "novice" management of the Grand Rapids show may have as strong prestige among his American cousins as he has, which may affect his entry more next year than this. We certainly appreciate the "two years" experience of the Kingston Club in the "novice class," and if they took two "firsts" we are glad to welcome them in the class that "know it all." Perhaps Mr. Bates, if he was a little better acquainted with the "novice" management of our show, would have saved his remarks for a more suitable occasion. We wish Kingston a success, and if our "baby" is a failure we will publish it.

CHAS. K. FARMER, Vice-President W. Mich. K. Club.

### Whippet Racing.

On Wednesday afternoon of Toronto show, there was a race between George Thomas's Boston Model and Campbell & Blake's Maggie. Though beaten on the bench, the latter fully revenged her defeat by beating Model twenty yards in 200 in 13 seconds. Afterwards, with Tip as pacemaker, Maggie did the distance in 12¾ seconds on a somewhat rough course. "Tom" Blake gave exhibition every day in front of the big grand stand, and the racing created a lot of interest. His dogs will run at Grand Rapids this week, when probably a big match will be brought off.

# DOG CHAT.

### Toronto Dog Show.

As the show progressed the management settled down to something resembling order, and aisles were swept up, and by Thursday morning the show smelled pretty sweet. We should advise Mr. Stone to lay in next year's supply of sawdust for rings, etc., at once, so that no contretemps can happen in 1893. It is not particularly nice for judges and exhibitors to indulge in a species of hurdle racing about the ring to keep measurably clean. The catalogue, when it finally issued in its entirety, was quite an ambitious affair. Each breed had a standard or description drawn up at the head by some well known breeder. This is a useful feature, especially for the "recruits." The catalogue was, however, lamentably full of errors; we hate to find so much fault, but in future it would be well for the secretary, if he has not time to do the work himself, to employ some good clerk and give him full charge of the whole clerical business, and let him have say a W. K. C. catalogue to go by. The entries closed in ample time to do the work properly, and it should be done, as nothing galls a man more than to find his own or his dog's name only a resemblance to the truth. We are told the feeding was good and the food well cooked and enjoyed by the dogs; some local firm supplying the biscuits we believe. The disinfeeting—well, the less said about that the better.

There is another point in connection with this show that should be corrected next year. The rules under which the show is held state that puppies shall not be shown under six months old, or to that effect. There were puppies shown then at Toronto that were little over so many weeks old, and their pens were kept in a shocking state. There was even a great Dane bitch with a big litter, and the puppies, to get out of the reeking mess, climbed on the mother's back. This sort of thing frustrates every good that the aforesaid rule was intended to do.

The visitors at the show from all parts were numerous, and the Canadian Kennel Club meeting was attended by some 40 fanciers. It was a delight to see the manner in which they all seemed to join in the discussions, contrary to the custom of our A. K. C. meetings, where two or three delegates do the talking and the others throw up their hands when "held up" by the leaders. The Canadians seem to enter into their discussions most heartily and *con amore*. In conclusion, we must not forget to mention that among the hard-working stewards were Capt. Greville Harston, who really worked like a Trojan in Mr. Davidson's ring, and Mr. W. F. Fraser stuck to his duties well in Mr. Mason's behalf. Mr. H. B. Donovan spared sufficient time from his multifarious work for Mr. F. C. Wheeler's benefit, and Mr. A. W. Smith was also an active volunteer. The fair, as usual, was a great attraction, and the people crowded into the town to the tune of about 80,000 during the week. The judging gave almost general satisfaction. In only a few instances was grumbling indulged in, and results were taken philosophically.

### A New Kennel.

We always like to hear from those who are just starting in and of the dogs they commence with. Some time since we spoke of Mr. H. H. Hunnewell, Jr., having contracted the fever, and are now able to give some interesting particulars of his "nucleus." In wire-haired fox-terriers he has imported three bitches: Petition; breeder, Mr. Spennly, England; by Ebor Nick out of Keldgate Bell; whelped March, 1889. She has won second at Cruft's show in 1891, and other prizes. Oakleigh Flirt, breeder Mr. Lindsay Hogg, is by Oakleigh Hymen out of Nettle, and was whelped June, 1890. Meg II. is by Tyke out of Vixen. His dog is Oakleigh Bruiser, by Dudley Rarity out of Burrett, a fine, promising all white dog, whelped June, 1891. In brown poodles he has Pooh-Bah, breeder J. Coulin, Paris, whelped November, 1888. This dog won third prize at the Paris show of 1890. He was purchased from Miss Post in Paris, France. Ida is a very fine brown poodle, which he has only just received from Paris. She won second at the dog show in that city this summer. She was whelped May, 1891. Mr. Hunnewell is building extensive kennels, and expects several more wire-hairs yet; so we suppose he will have to be reckoned with when the shows come round next year.

### Death of Champion Foreman.

The death of this well known and justly celebrated English setter last week, from old age, removes from the atmosphere of the show ring a dog around whom was attached a general interest at one time. This was in the days of Plantagenet, etc., and the early 80s, and when our friend "Billy" Tallman was right in it, both on bench and field, for Foreman was a corker among the quail as well as on the bench. This dog probably won more prizes than any other during the twelve years of his life. He was whelped Feb. 26, 1880, and was by Dashing Monarch out of Fairy II., and therefore truly bred in the purple. His first winning bracket was hung up at Boston in 1882. The name of Foreman was always associated with those of "Billy" Tallman and Fred Crawford, of Pawtucket, R. I. At one time Foreman, we are told, was sold for $2,500. His best win in the field was in 1884, when he won the All-Aged Stake at the Eastern Field Trials, and he also won the Members' Stake in 1885, at High Point, N. C. He was bred by Mr. J. C. Higgins and owned at one time in Canada. One by one the old landmarks pass away, but there does not seem to be that romance and keen interest surrounding those that take their places; is it that the dogs are not so good or is the change in the owners?

### The Flour City Kennel Sale.

We cannot say that Mr. Whitney's resolve to give up trying to breed mastiffs surprises us very much, for if any one has had hard luck enough to break any man's fancier heart, this gentleman has experienced it. A little ray of sunshine now and then, in the way of a living litter, tends to keep a man on the lookout for a turn in the tide of ill luck, but Mr. Whitney has not even had this. After expending some $9,000 he finds himself with one puppy of his own breeding. What he has seen during his late visit to England convinces him they are not much better off over there. His dogs are all for sale and to the highest bidder, bids to be sent to Mr. W. Wade, Hulton, Pa., and the top one gets his choice. This is an opportunity for mastiff breeders of limited means to secure some of the cream of the fancy at pretty nearly their own prices. We know Mr. Whitney will not give up the fancy altogether, and probably with a smaller kennel and a new deal he may have better luck. We hope so.

### Inhuman Treatment of Dogs.

One of the most inhuman and dastardly actions that any man, dogman or otherwise, has been guilty of was exposed at Toronto show on the arrival of a "box of dogs" consigned to the show and owned by Mr. F. W. Wilson, of Chatham, Canada. Every one knows what a carpenter's chest is like, this was the shipping crate and measured 3ft. by 2ft 6in., and in this a supposed fancier of dogs had the brutality to force seventeen great Dane puppies and two fox-terriers. On the box being opened nine puppies and a fox-terrier were found to be dead. The affair has disgusted every one here, and sorry we are that we should have to include a man who could do such a thing among the members of dogdom. Mr. Wilson is no novice, for he has exhibited dogs here for two or three years.

### Notes from New England.

Mr. "Bob" Leslie, of Lynn, Mass., was in New York city last Monday and dropped into our sanctum. He brought a few bits of New England gossip; but the worst that we heard was of the accident that happened to Mr. E. B. Sears. It seems he so wrenched his ankle that two ligaments were broken. We are happy to hear, however, that the owner of Sir Bedivere can get about again, though progress is painful. Mr. Sears wished to resign the presidency of the Lynn Club, but better counsel prevailed, and he will retain office till next May. The other day Mr. Sears received word that Sir Bedivere had sired a litter of seventeen pups. This in itself should be sufficient to make Mr. Sears reconsider his idea of giving up the dogs. We hear that $500 was offered and refused for his Wyoming Prince, a son of the late champion Hesper.

### Canada's Fox-Terrier Club.

A meeting of fox-terrier men was held at the Walker House, Toronto, Sept. 13. Alderman A. D. Stewart, of Hamilton, was in the chair. H. B. Donovan acted as secretary. It was decided to form the Canadian Fox-Terrier Club, and officers were elected as follows: Patron, William Hendrie, Sr., Hamilton; President, R. Gibson, Delaware; Secretary-Treasurer, H. P. Thompson; Committee, F. S. Wetherall, Compton, Quebec; G. Bell, Toronto; J. W. Morden, Hamilton; James Lindsay, Montreal; F. R. Close, Hamilton; S. Munro, London; G. S. Oldrieve, Kingston; J. V. Bennett, Toronto; P. Smyth, Toronto. The fox-terrier fancy in Canada is increasing so rapidly that it will not be long before the spaniel men will have to share the honors of popularity.

### Lawsuit About a Dog.

It will be remembered that Mr. A. W. Smith's celebrated black and tan terrier bitch Buffalo Lass was smothered in transit to the New York show last spring. Mr. Smith, securing certificates from Drs. Glover and Foote as to the cause of death, has now brought suit against the American Express Co. for $200 damages, and the trial comes off this week in the Supreme Court, Buffalo, N. Y. The outcome will have an important bearing on the legality, etc., of the release clause that dogmen have to sign, and how far express companies are liable for death and injuries to dogs traveling in their care.

### Mr. Jarrett's Purchases.

Mr. W. Brodie did not hold his Irish terrier bitch Candour very long after his arrival in Canada. Mr. Jarrett, who likes a daredevil almost as well as the milder collie, gave, it is said, $500 for her. With her ears cropped she will act a leading part in future shows, and Mr. Jarrett must be congratulated on his plucky purchase. Mr. Jarrett also picked up a good collie in Toronto Wonder, and a dog that, under Mr. Jarrett's skillful manipulation may be expected to take much higher honors than he did at the Toronto show last week.

### More Importations.

The steamer Cufic, of the White Star Line, arrived from England Sept. 13 with two collie dogs, Nellie and Wallace, from Mr. Geo. F. Bowden, consigned to Mr. E. H. Morris. These are the sheep dogs that have been imported especially with regard to their working capabilities, and will compete at the sheep dog trials at the Trenton (N. J.) fair. A wire-haired terrier was also received consigned to Mr. T. S. Bellin, 21 Park street, Albany, N. Y.

### Death of a Valuable Terrier.

Mr. Henry Brooks, of West Medford, Mass., has the sympathy of all sportsmen and lovers of the dog, at his cruel ill-luck in losing his grand Scotch terrier bitch Gerda, which died the first morning of the Toronto show from rupture of the stomach. Gerda was lately imported from England and was own sister to his crack little dog Kilroy, champion Kildee—Bitterweed.

---

At Toronto last week we saw a rather unique style of evasion of the cruelty laws. A scissor grinder coming into town had a dog, looked something of the Chesapeake order, chained to his machine by two chains which centered on the dog's collar at the back. The dog apparently trotted along at the side of the big wheel, but in reality he lugged the whole concern, the man simply guiding the wheel. It was real downright hard work for the dog, and if the owner values his pocket or liberty he had better keep on the northern side of the line.

---

We regret to hear from Mr. W. C. Reick that his young stud dog Prince Clifford was killed last week by an engine on the rails at Seabright, N. J. These second strings are useful in a large kennel and it is too bad to lose such dogs in so shocking a manner.

---

Mr. L. C. Whiton's greyhound Spinaway is now in England in Mr. Geo. Raper's care, and will remain some time and be bred to Young Fullerton. Mr. Whiton will run jointly with Mr. Lowe the greyhound Lord Neverstill at Great Bend next month. The Brooklyn catalogue will have pictures of typical specimens of each breed at the head of the classes, and a special effort will be made to make the catalogue a work of art as well as reference.

---

Under a misinterpretation of the rules, Mr. Jarrett entered his crack collie Wellesbourne Charlie in the novice class at Toronto and won. Mr. McEwen protested the award and entry, and a committee meeting being held, the dog was disqualified and, we believe, the entry fee returned. It does not seem just to the novices that a dog like Wellesbourne Charlie, who has won prizes at shows in England and some under C. K. C. rules, should be allowed to compete in our novice classes. This subject was discussed some time since, and the Canadian rule bearing on novice classes was changed to bar prize-winning dogs from England from competing in these classes. Mr. Jarrett, however, complained that, though the C. K. C. rule said "recognized shows in Canada, the United States or England," the list of recognized shows in England was not given in the premium list, as was the case with the other two countries.

---

We have heard capital accounts of the dog biscuits made by Messrs. Austin & Graves. During our visits to the New England kennels, we notice that this brand of biscuit is to be found in almost every kennel, and we all know that the average New Englander is not given, as a rule, to waste money on worthless articles.

---

Mr. M. Flynn, Jr., we see in the business column, is offering some choice Irish setter pups ridiculously cheap, out of Sedan by Glen Jarvis. The progeny of such animals should soon be snapped up, for we all know what a capital field bitch Sedan is, for did she not win the All-Age Stake at High Point last year at the Irish setter field trials?

---

Dr. O. Stewart Bamber, secretary of the Rochester Kennel Club, writes: "Considering the small money offered we are very well satisfied with an entry of over 100 dogs. St. Bernards are strongest with 14 entries, mastiffs second with 13, all breeds represented contain representative dogs."

---

Any one not receiving premium lists for bench show and trials of National Beagle Club should address: Field Trial Committee, N. B. C., Box 220, Boston, Mass.

### Westminster K. C. Dogs for Sale.

We note that the Westminster Kennel Club intend auctioning off nearly all their pointers at the American Horse Exchange, Sept. 29, at 3 P. M. They will, however, reserve heir stud dogs. The list includes such noted dogs as Lass of Bow, Glauca, Westminster Sal, Gladys and many others. Such an opportunity probably has never before been offered for pointer men to get such stock at prices that usually prevail at auctions. The dogs will be on exhibition Sept. 28 up to time of sale.

## ANSWERS TO CORRESPONDENTS.

*There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.*

SUBSCRIBER, Brockville, Ont.—1. The old hunter has given you some wrong information, and has been guilty of stating some absurdities. Dogs properly trained can point ruffed grouse, and do it very nicely. The qualities you mention as belonging to your dog are most desirable. You have let him have his head too long and have not given him enough experience. Use a short checkcord aboot 5ft. long and a spike collar when working him on ruffed grouse. As he has pointed larks there is no doubt but what he will point grouse if properly handled. It is not uncommon for a dog to refuse to retrieve other birds than those he has been trained on exclusively, and again the spike collar comes into play to enforce the training. It will require diligent training to get your dog well in hand, but his qualities are most excellent as you describe them. Dogs should be taught to range close for ruffed grouse. 2. For ruffed grouse, woodcock and snipe a cylinder-bore or modified choke will be the best.

L., Oliphant, Furnace, Tenn.—There are bloodhounds broken to trail men. The price of good specimens of good breeding is from $50 to $100 for puppies. You will find such stock advertised in our columns from time to time.

# Yachting.

## FIXTURES.

SEPTEMBER.

24. Chelsea.
24. Buffalo, 3d Pennant.
24. Commonwealth, Cham., Dorchester Bay.

OCTOBER.

1. Corinthian, Atlantic City.
15. Buffalo, Closing Cruise.
9. Jersey City, Ladies' Day, New York Bay.

### The America Cup.

BACK of the rumors, present and prospective, of challenges from various quarters for a race next year for the America Cup, there is the solid fact that one British yachtsman, Lord Dunraven, undeterred even by that "two miles of open water," is not only willing but anxious to challenge as soon as the Cup is offered on fair conditions, such as its donors intended. If the New York Y. C. really wishes a challenge it can obtain one within a week, by a frank and manly admission of the mistake it made in 1887 and an honest effort to remedy it.

### New York Y. C., Schooner Sweepstakes.

NEW YORK—NEW YORK HARBOR.

THE New York Y. C. closed the season so far as the larger yachts are concerned with a special sweepstakes for schooners in the 90ft. class, as announced early in the year. The race was arranged in view of the renewed interest in the class this year, as evidenced in the construction of two new yachts, the expectation being that with all the boats at their best, and with a good September breeze and a course outside the Hook, the race would afford a fine spectacle and produce some valuable results. Sad to relate, the race was rather a tame one, while even the liberal offer of the club of extra cups in addition to the sweepstakes was ineffective in bringing out entries.

The conditions were: entry, $200, with $100 forfeit; if two start, winner to take stakes; if three start, second to save her entrance money. The club added a $500 cup for the first and a $150 cup for the second, the latter conditional on three starting.

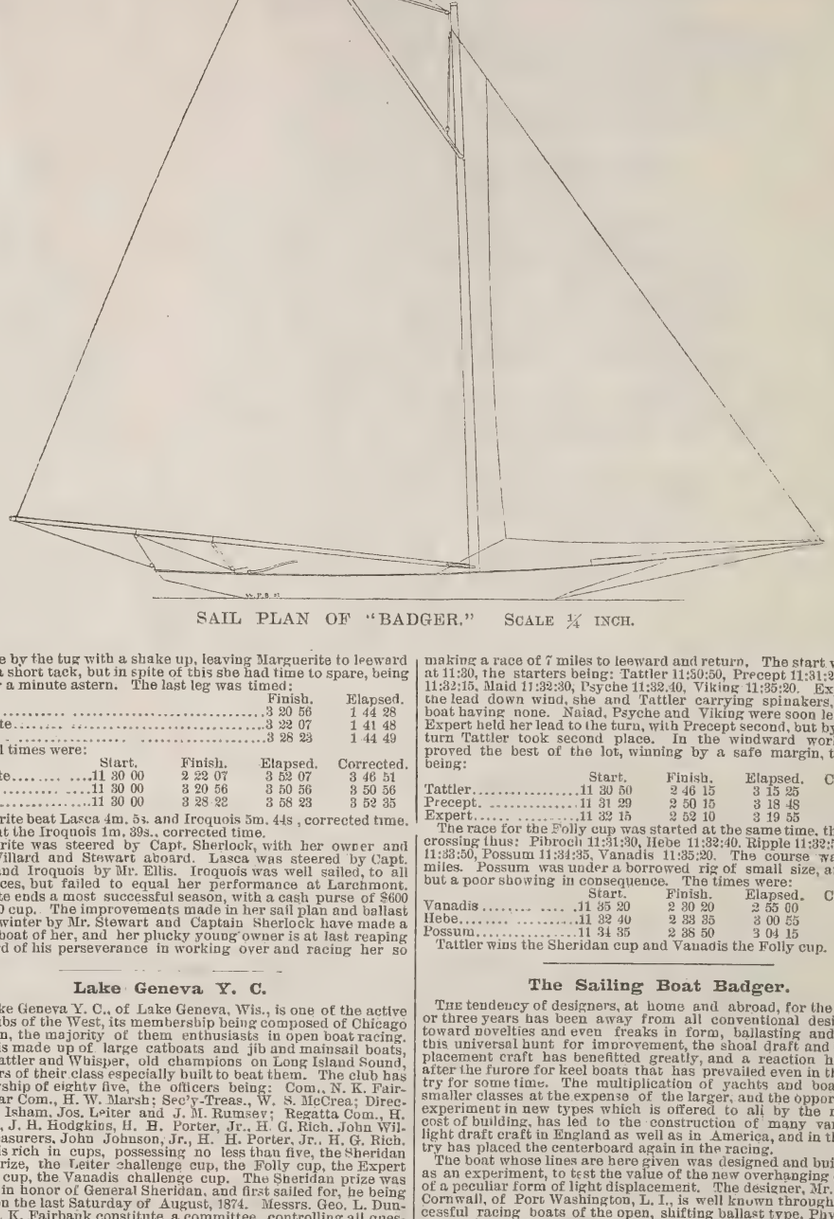
When the list closed on Aug. 5 there were 5 entries, Alcæa, Messrs. Clark; Alert, J. N. Luning; Iroquois, R. N. Ellis; Lasca, J. E. Brooks, and Marguerite, R. S. Palmer. Since then Alcæa was shipped her smaller rig for a Mediterranean cruise, while Alcæa was not in condition, so both paid the forfeit. Alcæa has been for several weeks in the charge of Capt. Haff, Sr., of Volunteer, to be worked up to form, but as he was not satisfied with her as yet she did not start, though out on the course. This left as starters only the following three:

| | Sailing Length. | Allowance. |
|---|---|---|
| Lasca, J. E. Brooks | 93.17 | . .. |
| Marguerite, R. S. Palmer | 83.48 | 5.16 |
| Iroquois, Ralph N. Ellis | 82.58 | 5.48 |

After the very hard blow of Tuesday night and Wednesday morning there was but a moderate breeze on Thursday, about W.N.W. when the tug Ocean King anchored off Scotland Lightship at 10:30. On board her were Messrs. S. Nicholson Kane, Chester Griswold and Irving Grinnell, the regatta committee, and a small gathering of New York yachtsmen. The smaller tug, Scandinavian, was in company, in charge of Superintendent Neils Olsen, with three plank floats, each bearing a red flag, on the after deck. It was impossible to lay off the first leg to windward, so the triangle was laid out S.½E., 10 nautical miles, N.E.½N., and W.N.W. This made a reach down the Jersey beach, a second reach seaward after the jibe, and a beat home.

When the signal for the start was given, with 5m. to cross in, the three were chasing each other to see who would be last, and all were so successful that they were still above the line when the last gun fired, 5m. later. Marguerite, with a fine suit of canvas and everything drawing, went over first, followed by Lasca, while Iroquois was some distance astern; the handicaps being 42s., 1m. and 1m. 2s. Marguerite and Iroquois broke out jibtopsails when over the line, Lasca carrying hers and a maintopmaststaysail as well when she crossed. Marguerite set her maintopmaststaysail very promptly, but Iroquois waited for a time, ready to luff out if necessary. A passing tug and tow caused a little trouble, Lasca bearing away to avoid them and then sailing a freer course than the other two. She soon ran ahead, while Iroquois steadily dropped astern of Marguerite, apparently finding the wind light. All were carrying clubtopsails.

The reach out in Indian file, with a light breeze and only the roll of a dead sea left from the easterly blow of the few previous days, was a tame enough procession, devoid of incident or excitement. The first mark was timed after an easy jibe:



| | 1st mark. | Elapsed. |
|---|---|---|
| Lasca | 12 31 00 | 1 00 00 |
| Marguerite | 12 32 15 | 1 01 33 |
| Iroquois | 12 35 20 | 1 04 18 |

Jibtopsails and maintopmaststaysails were shifted for ballooners, and the run was made to the second mark with a small but valuable gain for Lasca. She came to the turn, however, with her big balloon jibtopsail still set, luffing around the second float with the sail to windward in a bag over the lower sails. There was some delay in luffing and clearing the sail, enough to lose the race in the end. Marguerite came for the mark with jibtopsail stowed and sheets trimmed for the beat home in the freshening wind, not losing a moment at the turn. Iroquois, too, was well handled. The times at the second mark were:

| | 2d mark. | Elapsed. |
|---|---|---|
| Lasca | 1 26 28 | 1 05 28 |
| Marguerite | 1 40 19 | 1 08 04 |
| Iroquois | 1 43 34 | 1 08 14 |

When Lasca finally settled out to sail, she found the wind more to her liking than at any time before, and at once began to open out on Marguerite. For a time she continued to gain, the pair making several tacks together, but when about the middle of the last leg the wind lightened, Marguerite picked up and came dangerously near the big fellow. All three were carrying baby jibtopsails, Marguerite's in particular being carefully tended while on Lasca the sail was continually lifting, being full only at intervals. Iroquois chose a course of her own, standing on one long starboard tack toward Long Branch until she could weather the Scotland.

Coming inshore, a few harder puffs helped Lasca, but within the last two miles Marguerite weathered on her rapidly, and had the race to a certainty. At the line Lasca was still leading, and she managed

SAIL PLAN OF "BADGER." SCALE ¼ INCH.

to squeeze by the tug with a shake up, leaving Marguerite to leeward to make a short tack, but in spite of this she had time to spare, being little over a minute astern. The last leg was timed:

| | Finish. | Elapsed. |
|---|---|---|
| Lasca | 3 20 56 | 1 44 28 |
| Marguerite | 3 22 07 | 1 41 48 |
| Iroquois | 3 28 23 | 1 44 49 |

The full times were:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Marguerite | 11 30 00 | 2 22 07 | 3 52 07 | 3 46 51 |
| Lasca | 11 30 00 | 3 20 56 | 3 50 56 | 3 50 56 |
| Iroquois | 11 30 00 | 3 28 22 | 3 58 23 | 3 52 35 |

Marguerite beat Lasca 4m. 5s. and Iroquois 5m. 44s, corrected time. Lasca beat the Iroquois 1m. 39s., corrected time.

Marguerite was steered by Capt. Sherlock, with her owner and Messrs. Willard and Stewart aboard. Lasca was steered by Capt. Rhodes, and Iroquois by Mr. Ellis. Iroquois was well sailed, to all appearances, but failed to equal her performance at Larchmont. Marguerite ends a most successful season, with a cash purse of $600 and a $500 cup. The improvements made in her sail plan and ballast plan last winter by Mr. Stewart and Captain Sherlock have made a different boat of her, and her plucky young owner is at last reaping the reward of his perseverance in working over and racing her so steadily.

### Lake Geneva Y. C.

THE Lake Geneva Y. C., of Lake Geneva, Wis., is one of the active racing clubs of the West, its membership being composed of Chicago yachtsmen, the majority of them enthusiasts in open boat racing. The fleet is made up of large catboats and jib and mainsail boats, such as Tattler and Whisper, old champions on Long Island Sound, with others of their class especially built to beat them. The club has a membership of eighty five, the officers being: Com., N. K. Fairbank; Rear Com., H. W. Marsh; Sec'y-Treas., W. S. McCrea; Directors, G. S. Isham, Jos. Leiter and J. M. Rumsey; Regatta Com., H. W. Marsh, J. H. Hodgkins, H. H. Porter, Jr., H. G. Rich, John Williams; Measurers, John Johnson, Jr., H. H. Porter, Jr., H. G. Rich. The club is rich in cups, possessing no less than five, the Sheridan regatta prize, the Leiter challenge cup, the Folly cup, the Expert challenge cup, the Vanadis challenge cup. The Sheridan prize was instituted in honor of General Sheridan, and first sailed for, he being present, on the last Saturday of August, 1874. Messrs. Geo. L. Dunlap and N. K. Fairbank constitute a committee controlling all questions relating to this prize. They decided that the race this year should be sailed under the direction of the Lake Geneva Y. C. and governed by its rules and regulations. Yachts contesting to be sloop rigged open boats belonging on Lake Geneva. The name of the winning yacht and its owner to be engraved on the prize each year. The owner of the yacht winning the prize to be entitled to hold it on the express condition that it is the property of the committee, subject to their order on Aug. 15 of each year.

The Leiter Challenge Cup was instituted in 1886 by L. Z. Leiter, Esq. It was first held by the Blossom. The Viking next won it, and successfully defended its title to the trophy in several races. The Vanadis was the next winner. A synopsis of its conditions are: Only open sloop yachts can race for its possession. A competing yacht must be sailed by its owner, and amateurs must handle main and jib sheets. Owners of winning yachts are subject to challenge for it, after having had possession two weeks. In event of challenge no other yacht can enter a race already arranged, without consent of both holder and owner of yacht originally challenging. Otherwise rules of the Lake Geneva Y. C. govern all contests.

The Folly Cup was offered in 1891 by Mrs. Kate R. Papin, to be competed for by sloop yachts of the 20ft. class. This cup was first won by the White Wing. The conditions are as follows: All competitions to be under the direction and rules of the Lake Geneva Y. C., and sailed for only by yachts belonging to members of said club. The cup is to be sailed for each year on the day of the Sheridan prize race by sloop yachts of 18ft. and not over 21ft. racing measurement, according to the existing rules of the Lake Geneva Y. C. The course is to be the then existing one for yachts of above measurement. The cup is to be subject to the order of the regatta committee on Aug. 15 of each year. The name of the winning yacht and the name of its owner may be engraved on the cup.

The Expert Challenge Cup was given by the owners of the yacht Expert. It must be sailed for under the rules of the Lake Geneva Y. C. by cat-rigged boats, 18ft. long and not over 21ft. long, Lake Geneva Y. C. racing measurement. The course to be the then existing course for yachts of above measurement. After a yacht winning this prize has had possession of the cup for two weeks, its holder is subject to challenge to a race for its possession. A copy of the challenge must be sent to the chairman of the regatta committee, which committee is to name a day for the race, if owners of the two yachts interested cannot agree upon a date. The name of the winning yacht and its owner may be engraved upon the cup.

The Vanadis Challenge Cup, which was given by the owners of the yacht Vanadis, is to be competed for by cat-rigged boats over 23ft. and not over 25ft., racing measurement according to the rules of the Lake Geneva Y. C. The race shall be over the then existing course of said club for yachts of above named measurement. Other conditions are the same as for the Expert cup.

Expert was built in 1888 by John H. Cornwall, of Port Washington, Long Island, and after a very successful career on the Sound found her way to Lake Geneva, where she was equally successful. Following her victory of last year came an order from Mr. J. H. Hodgkins for a boat from the same stocks to beat her, and before the new boat, Precept, was launched, another member of the club, Edward Norton, purchased the fast Cornwall boat Tattler on the Sound, and shipped her by rail to Lake Geneva. At the same time a third new boat was ordered for the smaller class, a novel experiment of Mr. Cornwall's similar to his Badger, whose lines are given this week, the Possum, built for Com. Fairbank. This last yacht is but 17ft. on waterline and 27ft. over all.

The date for the Sheridan and Folly cup races this year was Aug. 20, but the race was unfinished owing to unfavorable weather, and so postponed to Aug. 22. There was rain in the morning, but by 11 A.M. there was a nice easterly breeze, shifting to northeast at the start, making a race of 7 miles to leeward and return. The start was given at 11:30, the starters being: Tattler 11:30:50, Precept 11:31:29, Expert 11:32:15, Maid 11:32:30, Psyche 11:32:40, Viking 11:35:20. Expert took the lead down wind, she and Tattler carrying spinakers, the new boat having none. Naiad, Psyche and Viking were soon left astern, Expert held her lead to the turn, with Precept second, but by a clever turn Tattler took second place. In the windward work Tattler proved the best of the lot, winning by a safe margin, the times being:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Tattler | 11 30 50 | 2 46 15 | 3 15 25 | 3 15 25 |
| Precept | 11 31 29 | 2 50 15 | 3 18 48 | 3 17 49 |
| Expert | 11 32 15 | 2 52 10 | 3 19 55 | 3 19 03 |

The race for the Folly cup was started at the same time, the yachts crossing thus: Pibroch 11:31:30, Hebe 11:32:40. Ripple 11:32:50, No. 34 11:33:50, Possum 11:34:35, Vanadis 11:35:20. The course was but 12 miles. Possum was under a borrowed rig of small size, and made but a poor showing in consequence. The times were:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Vanadis | 11 35 20 | 2 30 20 | 2 55 00 | 2 55 00 |
| Hebe | 11 32 40 | 2 33 35 | 3 00 55 | 3 00 26 |
| Possum | 11 34 35 | 2 38 50 | 3 04 15 | 3 02 26 |

Tattler wins the Sheridan cup and Vanadis the Folly cup.

### The Sailing Boat Badger.

THE tendency of designers, at home and abroad, for the past two or three years has been away from all conventional designs, and toward novelties and even freaks in form, ballasting and rig. In this universal hunt for improvement, the shoal draft and light displacement craft has benefitted greatly, and a reaction has set in after the furore for keel boats that has prevailed even in this country for some time. The multiplication of yachts and boats in the smaller classes at the expense of the larger, and the opportunity to experiment in new types which is offered to all by the moderate cost of building, has led to the construction of many varieties of light draft craft in England as well as in America, and in this country has placed the centerboard again in the racing.

The boat whose lines are here given was designed and built purely as an experiment, to test the value of the new overhanging ends and of a peculiar form of light displacement. The designer, Mr. John H. Cornwall, of Port Washington, L. I., is well known through his successful racing boats of the open, shifting ballast type, Phyllis, Tattler, Expert and others. The new boat is totally different in model from any of these, not only in the overhanging ends but in the midship section, which shows a decided hollow below. She was built for Louis J. Boury, of the Atlantic Y. C., by J. Willis, of Port Washington. Although she has sailed in but a few races she has been in constant use about New York during the summer, and has proved fast enough to justify the expectations of her owner and designer, holding her own easily against large catboats and the smaller keel boats larger than herself. She is decked with the usual fittings of the open jib and mainsail boat, her centerboard being 7ft. long. The rig is the jib and mainsail.

Her leading dimensions are:

| | |
|---|---|
| Length over all | 26ft. |
| L.W.L. | 16ft. 11in |
| Overhang forward | 5ft. 4in. |
| aft | 3ft. 9in. |
| Beam extreme | 9ft. 5in. |
| L.W.L. | 8ft. 2in. |
| Draft | 1ft. 6in. |
| Least freeboard | 1ft. 3½in. |
| Mast, deck to hounds | 27ft. |
| from fore end, l.w.l. | 4ft. |
| Boom | 23ft. 4in. |
| Gaff | 15ft. |
| Bowsprit beyond l.w.l. | 13ft. 6in. |
| Mainsail area | 418sq. ft. |
| Jib area | 177sq. ft. |
| Total sail area | 625sq. ft. |

The lines were taken from the original model, the after overhang of the boat as built being really less than shown here. Since Badger was launched and tried Mr. Cornwall has built a similar boat, the Possum, now on Lake Geneva, Minn., owned by Com. N. K. Fairbank, of the Lake Geneva Y. C.

### Gloucester Races.

THE final decision of the judges in the Gloucester races is as follows:

First class—Chieftain, Aaron Brown, Gloucester, $50; King Philip, H. B. Torrey, Boston, $25.

Second class, centerboards—Chapaquoit, C. H. Jones, Boston, $40.

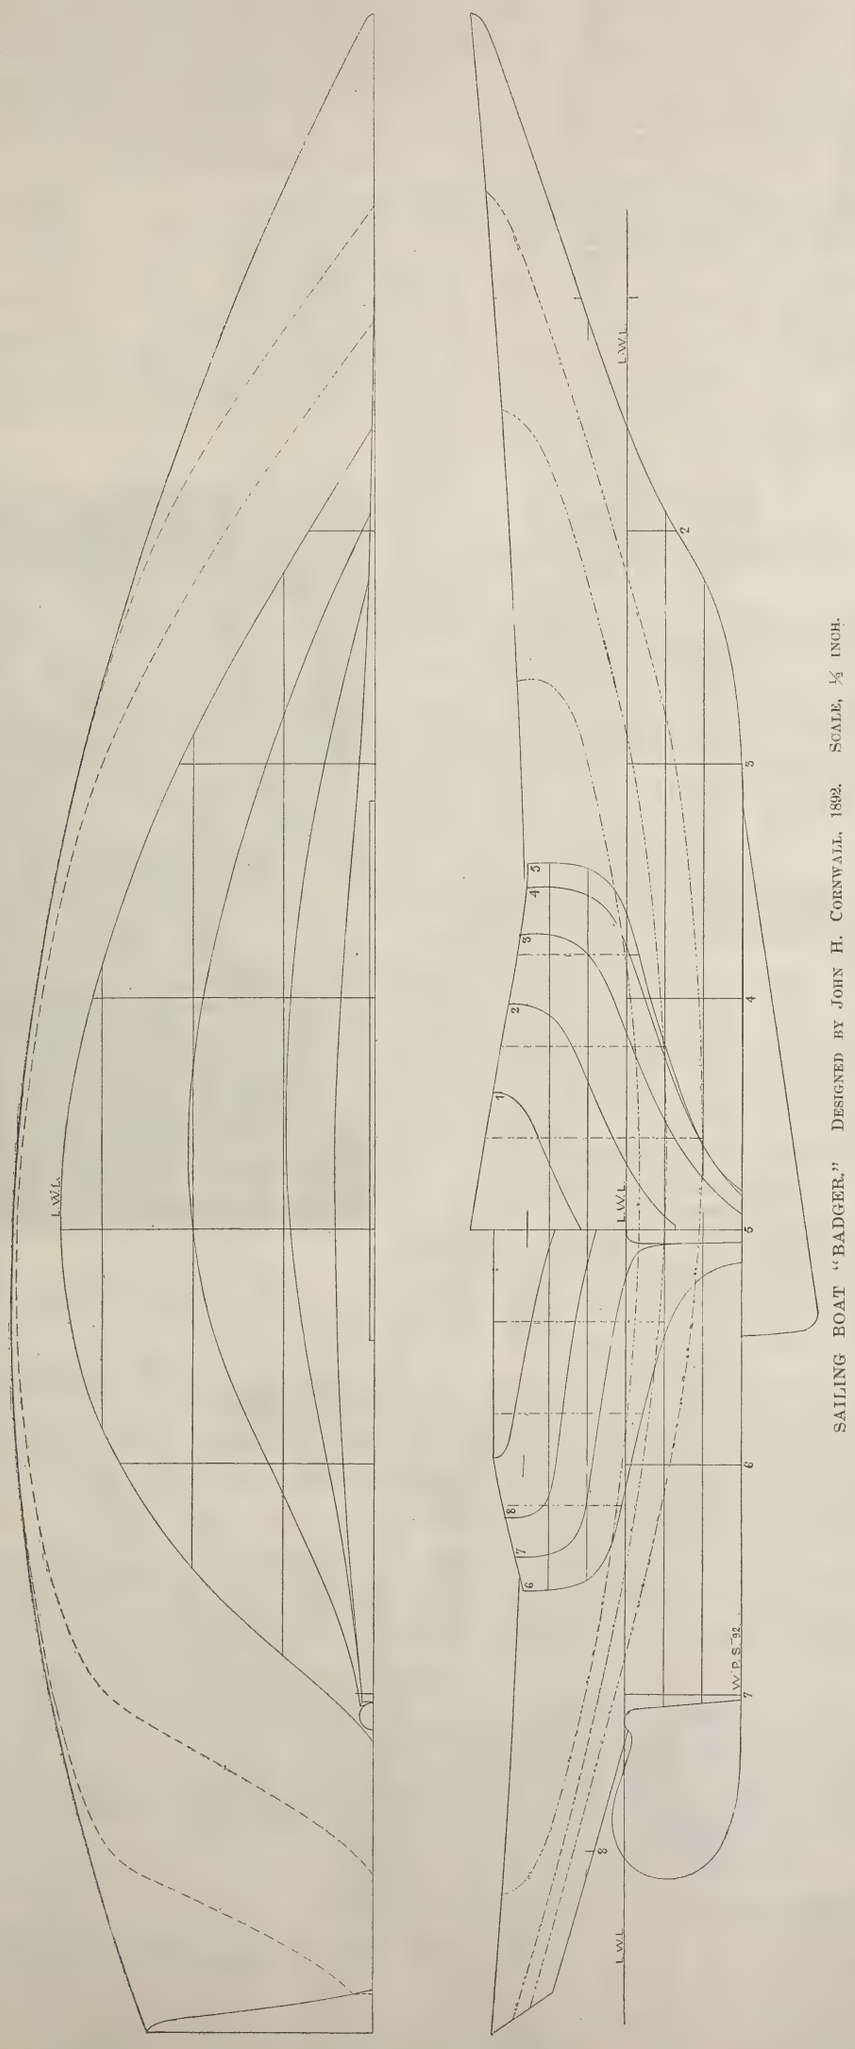
Second class, keels—Handsel, J. L. Hooper, Boston, $40.

Third class, centerboards—Beatrice, J. Cavanagh; Braintree, $35; Black Cloud, E. H. Taylor, Lynn, $20; Hazard, Pierce & Moody, Newburyport, $15.

Third class, keels—Emma L., S. L. Saunders, Lynn, $35; Irene, H. Armstead, Lynn, $20.

Fourth class, jib and mainsail—Mavis, Smothers & Brooks, $40.

Fourth class, cats—Magpie, H. G. Otis, Winthrop, $40; Arab, W. F. Scott, Dorchester, $25.



Fourth class, keels, special—Wahneta Smith & Cobb, $40; Mocking Bird, J. McLaughlin, Gloucester, $25; Wraith, A. H. Higginson, Manchester, $15.

Fifth class—Ithispie, W. E. Tucker, Gloucester, $20.

Sixth class—Marchioness, Percy Hodges, Boston, $25; Brodie, Geo. Rodigrass, Haverhill, $15; Alpine, Clement, Lynn, $10.

In third class Gypsy was disqualified for not sailing over the course, and in the fourth class keels it was decided that Astrea received due notice of the rules prohibiting shifting ballast and that therefore she must be disqualified for having, as she admits, shifted ballast.

Brunhilde, schr., recently purchased by H. B. King, is at Poillon's for a new and longer stern.

SAILING BOAT "BADGER." DESIGNED BY JOHN H. CORNWALL, 1892. SCALE, ½ INCH.

## Sippican Y. C., Aug. 31—Sept. 7.

MARION, MASS.—BUZZARD'S BAY.

THE twenty-first regatta, open race, of the Sippican Y. C. was sailed at Marion, Aug. 31 The date was set for Aug. 27, but on that day there was a northeast gale blowing, with a thick fog, and the race had to be postponed. On the 31st the wind was heavy from the south, with a high sea, and an unusual number of boats were unable to finish.

The start was made at 1:40. Lorita was the only boat in class A and she was beaten by the cats of her size.

In the first class Flight was off first, followed by Whisper, Hector and Lina in order. Lina is a new Crosby boat. The race soon narrowed down to Hector and Flight. Flight gained only a few seconds going to windward but outran her rival badly and won.

In the second class Mist led off 11s. after the gun, with Success, Defiance, Surprise, Lestris and Gymnote close behind her. This race was merely a procession, with Mist ahead and gaining steadily. Though small for her class, Success was second, even on actual time. Lestris had too much sail and withdrew.

In the third class Guess, Vivian, Doris, Tycoon, Sippican, Aucoot and Buzzard started in order. Sippican, Tycoon and Doris had a very exciting race, but Sippican had clearly the best of it, working right to windward of Tycoon in the seaway and beating her in her own weather.

In the fourth class Ethel, an Oysterville crack, came to try the Buzzard's Bay boats but they were too much for her. It was the same old story over again to-day. Cat beat Edith on the windward work but could not be steered, running off and was passed.

In the fifth class Worry was single-handed and was badly beaten by Trance, but took second. Mab probably takes third on allowance.

In class B Cheemaun had no competitor but beat Squall of the fourth class. The summary:

CLASS A, 35 TO 40FT. SLOOPS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Lorita, J. Arnold | 31.10 | 2 27 41 | 2 19 21 |

CLASS B—SLOOPS NOT OVER 20FT.

| | | | |
|---|---|---|---|
| Cheemaun, F. W. Palfrey | 18.01 | 2 04 04 | 1 47 03 |

FIRST CLASS—CATS 24 TO 30FT.

| | | | |
|---|---|---|---|
| Flight, I. E. Hiller | 30.00 | 2 24 48 | 2 14 12 |
| Hector, C. E. Stetson | 28.10 | 2 27 11 | 2 15 03 |
| Lina, H. M. Crosby | 27.04 | 2 43 02 | 2 28 47 |
| Whisper, A. R. Weld | 28.00 | Withdrew. | |

SECOND CLASS—CATS 20 TO 24FT.

| | | | |
|---|---|---|---|
| Mist, G. H. Lyman, Jr | 27.04 | 2 27 06 | 2 13 51 |
| Success, J. F. Perry | 25.03 | 2 32 08 | 2 14 41 |
| Defiance, H. E. Perry | 26.04 | 2 31 31 | 2 17 46 |
| Gymnote, W. E. C. Eustis | 27.04 | 2 32 39 | 2 18 24 |
| Surprise, J. M. Codman | 27.04 | 2 32 59 | 2 18 44 |
| Lestris, J. Crane, Jr | 26.04 | Withdrew. | |

THIRD CLASS—CATS 17 TO 20 FT.

| | | | |
|---|---|---|---|
| Sippican, W. H. Davis | 22.10 | 1 41 28 | 1 29 56 |
| Tycoon, J. L. Stackpole, Jr. | 23.01 | 1 42 29 | 1 31 11 |
| Doris, John Parkinson | 23.02 | 1 43 03 | 1 31 50 |
| Buzzard, A. B. Shipley | 23.07 | Withdrew. | |
| Guess, ——— | 20.10 | Withdrew. | |
| Aucoot, S. Batteile | 23.03 | Withdrew. | |
| Vivian, B. Huckins, Jr. | 23.00½ | Withdrew. | |

FOURTH CLASS CATS—14 TO 17FT.

| | | | |
|---|---|---|---|
| Edith, G. Van Rensselaer | 19 04 | 1 56 41 | 1 41 17 |
| Cat, B. Clark | 19.03 | 1 57 44 | 1 42 13 |
| Squall, J. G. Palfrey | 19.11 | 2 10 17 | 1 55 35 |
| Ethel, Elliott Crosby | 19.06½ | Withdrew. | |

FIFTH CLASS CATS—NOT OVER 14FT.

| | | | |
|---|---|---|---|
| Frana, M. Crane | 14.04½ | 2 01 12 | 1 41 15 |
| Worry, P. Hurst | 15.10 | 2 09 43 | 1 52 55 |
| Mab, Dr. Beaumont | 13.08 | 2 14 38 | 1 53 26 |
| No Name, D. Knowlton | | 2 14 19 | |

Course: Class A, first and second classes, from starting point, leaving Nye's ledge and S.E. ledge buoys on port and return, 15 miles. Third and fourth classes and class B, from starting point, leaving Bow Bells and S.E. ledge buoys on port and return, 8 miles. Fifth class, from starting point, leaving Seal Rock buoy and stakeboat off Plantin Island on port, rounding judges' yacht on port, and repeat the course once, 7 miles.

Judges: Dr. J. S. Whiting, Mr. Henry Cope, Mr. George L. Luce. Judges' yacht, Kitt.

The twenty-second regatta, third championship race, was sailed on Sept. 7 in a moderate S.S.W. breeze. In Class B Cheemaun had no competitor. In the third class Algol started first and held her lead on the beat to windward, but Sippican almost caught her on the run home and won.

The race in the fourth class was the best of the day. Cat started first, with Edith close at her heels and Squall 2m. behind. Edith soon passed Cat; Squall gained steadily on both and almost passed them when the boom lacing of her sail gave way. Fully 3m. were lost before the damage was repaired, and then it was not really repaired and the sail could not be brought to sit well. Still, she kept on, gained steadily, and for the first time in her career she won a race.

In the fifth class P. D. Q. withdrew, leaving Worry a walk over. The summary:

CLASS B—COURSE, 8 MILES.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Cheemaun, F. W. Palfrey | 18.01 | 1 53 30 | 1 36 29 |

THIRD CLASS—COURSE, 11½ MILES.

| | | | |
|---|---|---|---|
| Sippican, W. H. Davis | 22.10 | 2 10 30 | 1 58 58 |
| Algol, J. R. Bullard, Jr. | 23.11 | 2 11 11 | 1 59 43 |

FOURTH CLASS—COURSE, 8 MILES.

| | | | |
|---|---|---|---|
| Squall, J. G. Palfrey | 19.11 | 1 45 55 | 1 31 13 |
| Cat, Bruce Clark | 19.03 | 1 46 45 | 1 31 15 |
| Edith, G. Van Rensselaer | 19.04 | 1 47 02 | 1 31 48 |

FIFTH CLASS—COURSE, 7 MILES.

| | | | |
|---|---|---|---|
| Worry, H. W. Bellows | 15.10 | 1 29 12 | 1 11 24 |
| P. D. Q., J. W. Austin | | Withdrew. | |

Judges—Dr. J. S. Whiting, Mr. Knowlton.

OPEN SWEEPSTAKES.

The last race of the season was sailed on Sept. 10 in a good full sail breeze from N.E. The light breeze of the morning prevented most of the boats from a distance from starting, but the races were unusually good among the boats that were present.

In the third class Algol had too light a crew and was outsailed from start to finish by Sippican.

The closest race was in the fourth class. Edith led off a minute and a half after the gun. Squall crossed the line just as the last gun should have been fired, but the gun missed fire, and Cat, crossing a minute later, was not handicapped. On the first leg before the wind Squall and Cat both gained half a minute on Edith. On the next leg to windward Cat at first gained on Squall, but Squall soon regained her lead, and at the turn at S.E. ledge was as far ahead of Cat as when she started. On this leg Edith gained 10s. On the run home Squall gained 5s. on Cat, both of them gaining on Edith. Thus Squall made the best actual time, but was beaten on allowance by both Cat and Edith.

In the fifth class Rena had things all her own way. Worry beat Trana on actual time, but was beaten on allowance. Trana protests Rena for fouling her, not yet decided. Distances same as last race. The summary:

THIRD CLASS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Sippican, W. N. Dairs | 22.10 | 2 11 37 | 1 55 02 |
| Algol, J. R. Bullard, Jr. | 22.11 | 2 16 23 | 1 59 56 |

FOURTH CLASS.

| | | | |
|---|---|---|---|
| Cat, B. Clark | 19.03 | 1 48 41 | 1 32 39 |
| Edith, G. G. Van Rensselaer | 19.04 | 1 48 47 | 1 33 23 |
| Squall, J. G. Palfrey | 19.11 | 1 48 06 | 1 33 24 |

FIFTH CLASS.

| | | | |
|---|---|---|---|
| Rena, A. M. Hiller | 16.07 | 1 32 30 | 1 15 45 |
| Trana, M. Crane | 14.04 | 1 37 45 | 1 17 48 |
| Worry, H. W. and R. P. Bellows | 15.10 | 1 37 00 | 1 19 12 |

Judges—Messrs. Knowlton and Bullard.

## Western Yachting Notes.

THE Racine Yacht and Canoe Club was organized on Sept. 1 at Racine, Wis., with a membership of 28. Several races will be sailed before the close of the season.

The Cleveland Y. C. is working hard to secure from the city a twenty-year lease of a location on the lake front, near the Union Depot, for the erection of a suitable club house and station.

On Sept. 7 a meeting of the new Seattle Y. C, was held at Seattle, Wash., and the following officers were elected: Com., F. E. Sander; Vice-Com. J. H. Johnson; Port Captain, Carl Siebrand; Sec., W. W. French; Treas., W. W. Pinkney; Meas., H. A. Riddle; Trustees, the Commodore ex-officio, R. R. Spencer, J. A. Hatfield, L. Turner and H. C. Henry. The club starts with a membership of 200. A site has been offered at a nominal rental for five years by the West Seattle Land and Improvement Company, and a club house will be erected in time for the first regatta, on Oct. 3.

The fin-keel has found its way already to Lake Erie in the shape of a small yacht designed and built by the St. Lawrence River Company, of Clayton, for Mr. Gardner, of Cleveland. The Mott B, is 24ft. over all, 18ft. l.w.l., 5ft. 6in. beam and 4ft. total draft, her steel fin and lead cigar weighing 1,167lbs. She was tested last month in a severe squall far out on the lake, while bound from Cleveland to Ballast Island, and behaved in a most satisfactory manner.

## Yorkville Y. C., Sept. 11.

NEW YORK—LONG ISLAND SOUND.

THE eighth annual regatta of the Yorkville Y. C. was sailed on Sept. 11 with a large fleet of starters and a strong S.E. wind which capsized three of the boats. The start and finish was off the club house, 138th st., Port Morris, N. Y., the courses being around the Gangway Buoy for the larger and around the Stepping Stones for the smaller yachts. The judges were Com. T. H. McDonnell, Harlem Y. C.; Com. A. Gage, Coronet Y. C., of South Brooklyn, and Vice-Com. F. Dickens, North River Y. C. The times were:

CLASS A, SLOOPS AND YAWLS, 28FT. AND OVER.

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Charles Welde | 12 08 11 | 3 30 30 | | |
| Calamity | 12 04 11 | Did not finish. | | |

| Tyrant | 12 06 34 | 4 09 04 | 4 02 48 | 4 02 48 |
| Pride | 12 08 21 | Capsized. | | |
| CLASS H, CATS OVER 17 AND UNDER 20FT. | | | | |
| Anglescy | 12 08 29 | 3 55 36 | 3 47 07 | 3 47 07 |
| Dawn | 12 05 40 | 4 17 48 | 4 12 08 | 4 12 08 |
| H. C. Miner | 12 07 40 | 3 55 34 | 3 47 54 | 3 47 54 |
| CLASS I, OPEN CATS, 17FT. AND UNDER. | | | | |
| Tenny | 12 12 13 | 3 54 48 | 3 42 30 | 3 42 25 |
| Stranger | 12 12 13 | 4 36 53 | 4 24 40 | 4 24 35 |
| Pauline | 12 12 13 | 4 06 01 | 3 54 09 | 3 52 14 |
| Tramp | 12 12 13 | 4 01 53 | 3 49 36 | 3 49 36 |
| CLASS J, CABIN CATS, 22FT. AND OVER. | | | | |
| Crocus | 12 05 55 | 2 52 10 | 3 46 15 | 3 46 15 |
| Truant | 12 04 37 | 3 53 25 | 3 48 58 | 3 47 51 |
| CLASS K, CABIN CATS UNDER 22FT. | | | | |
| Venus | 12 12 30 | 4 25 00 | 4 12 30 | 4 10 10 |
| Julia S. | 12 04 25 | 4 59 42 | 4 46 17 | 4 16 17 |
| Emily | 12 10 30 | 4 41 55 | 4 31 35 | 4 31 25 |

The winners were Charles Welde, Mamie Fox, Cygnes, Laurel, Regina, Jessie, Sunol, Anglescy, Teony, Crocus and Venus.

The capsizing of Maude M., Tip Top and Pride placed some of their crew in great danger, one man of the Tip Top being rescued by the judges tug Mutual with difficulty.

## Seawanhaka Corinthian Y. C.—Handicap Race.

OYSTER BAY—LONG ISLAND SOUND.

THE Seawanahaka Corinthian Yacht Club has this year made a departure in the matter of its annual dinner, usually held at Delmonico's in midwinter, the place being changed to the new club-house at Oyster Bay, and the time to the ending of the active season of yachting. In answer to the notices sent out there were seventy members seated at the tables in the dining-hall on Friday last, many of them having their yachts at anchor in the harbor. The dinner, at which Commodore Hill presided, was served in a way that did credit to the House Committee and the club steward, passing off very pleasantly. A few informal speeches were made at the close, after which all adjourned to the main hall and billiard room, where the rest of the evening was spent.

A handicap race was set for Saturday morning, but the day was warm and calm, the yachts lying at the starting line for a long time, and even then the race was a slow one. The course was: Starting from south to north of a line between Moses Point buoy and stake boat, thence to Cold Spring Light, keeping it on port hand; thence to stake boat off Moses Point, keeping it on port hand; thence to Cold Spring Light, keeping it on port hand; thence to finish off Moses Point buoy, keeping stake boat on port hand. Keeping to the north of Black buoy at mouth of harbor. The times were: Start, 2:05.

| | Finish. | Elapsed. | Corrected. |
|---|---|---|---|
| Nameless | 5 01 46 | 2 56 46 | 2 50 46 |
| Marion | 5 05 18 | 3 00 18 | 2 51 18 |
| Indolent | 5 08 01 | 3 03 01 | 2 52 01 |
| Rose Marie | 5 00 38 | 2 55 38 | 2 53 38 |
| Skraeling | 5 23 59¾ | 3 18 59¾ | 2 59 59¾ |
| Trinket | 5 17 42 | 3 12 05 | 3 01 05 |
| Mirth | 5 07 25 | 3 02 25 | 3 02 25 |
| Adonis | 5 20 31 | 3 15 31 | 3 02 01 |
| Club Cat | 5 24 00 | 3 19 00 | 3 04 00 |

| Vanda | 5 29 50 | 3 24 50 | 3 07 50 |
| Nadjy | Did not finish. | | |

Nameless was disqualified for fouling. Marion won first prize, Indolent second and Rose Marie third. The prizes were given by Rear Commodore Beekman, A. P. Montant and T. L. Young. The Rouse and Wetmore race will be sailed on Sept. 24.

## Excelsior Y. C., Third Annual Regatta.

SOUTH BROOKLYN—NEW YORK BAY.

THE third annual regatta of the Excelsior Y. C., of South Brooklyn, was sailed on Sept. 18 in a fresh westerly wind. The start and finish were off Forty-third street, the course for class I. being to and around Buoy No. 10 in the Lower Bay; classes II., III. and IV. around Buoy No. 9; classes V. and VI. around Buoy No. 11.

Katie B. capsized before the start, and Hope was in collision with a schooner, her crew being taken off by the yacht Wanderer. The times were:

CLASS I.—SLOOPS.

| | Elapsed. | Corrected. |
|---|---|---|
| Black Duck | 3 10 15 | 3 10 15 |
| Jennie S. | 3 41 30 | 3 07 35 |

| Willie S. | 2 47 00 | 2 47 00 |
| Later On | 2 02 35 | 2 00 35 |

Irene was disqualified by rounding Buoy No. 9 instead of No. 10.

## Ocean Y. C., Sept. 11.

JAMAICA BAY, L. I.

THE annual fall regatta of the Ocean Y. C., of Rockaway Beach was sailed on Sept. 11, in a strong S. W. wind, the times being:

CLASS A—CATS OVER 25FT.

| | Elapsed. | Corrected. |
|---|---|---|
| Allie | 2 30 20 | 2 30 00 |

| Scud | 2 54 00 | 2 50 00 |
| Lone Star | 2 50 17 | 2 52 25 |
| McAdam | 2 58 10 | 2 54 05 |

The judges were Edward Tomlinson and John Koch; J. D. Donaghue timekeeper.

## West Hampton Country Club, Sept. 10.

WEST HAMPTON BEACH—LONG ISLAND.

THE annual open race of the W. H. C. C. was sailed in a stiff S.E. breeze over a 10-mile course and proved most successful and interesting, as all four classes contained boats of the highest local reputation. Though the celebrated Pawnee, sailed by the invincible professional George Terry, won with ease in first class, she was beaten 1m. 25s. on time allowance by Maisie, the winner in second class, sailed by Vice-Com. Horn. This fact, combined with Maisie's record for her first season of four firsts and one second, entitles her to rank as a remarkable boat and an honor to her builder, G. M. Smith, of Patchogue. Enigma and Polly sustained their reputations by winning in third and fourth classes respectively. Elsie, a Hempstead Bay Y. C. boat, after having sailed nearly seventy miles to enter, came in a close second in fourth class. There were three money prizes in addition a handsome silver mug enameled with club colors for each first boat.

## White Bear Y. C., Sept. 3.

WHITE BEAR LAKE, MINN.

THE race of the White Bear Y. C. for the Gotzian cup, for which Harriet and Osito each held a leg, was sailed on Sept. 3 in connection with the sail-off of the tie between Osita and Kitten in the third championship race of Aug. 13. The race was sailed in a fresh S.W. wind, the course being two rounds of a 5-mile triangle. The times were:

SLOOPS.

| | Elapsed. | Corrected. |
|---|---|---|
| Osita | 1 50 02 | 1 44 28 |
| Shark | 1 48 52 | 1 45 21 |
| Kitten | 1 48 42 | 1 45 29 |
| Wapsie | 1 51 24 | 1 45 35 |
| Hornet | 1 54 02 | 1 46 59 |
| Valkyrie | 1 53 38 | 1 50 13 |
| Fortuna | 1 59 01 | 1 53 19 |
| CATS. | | |
| Nuska | 2 04 11 | 2 01 43 |
| Albatross | Withdrew. | |
| Mischief | Withdrew. | |
| Kelpie | Withdrew. | |

Osita wins the cup and the leg for the championship.

## Lincoln Park Y. C., Sept. 10.

CHICAGO, ILL.—LAKE MICHIGAN.

ON Sept. 10 a race was sailed between Druid, Phantom and Scorpion, of the Lincoln Park Y. C., for the handsome silver cup given by the club. The wind was very variable, being strong from S.W. at the start, shifting later to a light southerly breeze. The course was two rounds and the times were:

| | Elapsed. | Corrected. |
|---|---|---|
| Druid | 3 17 08 | 3 17 08 |
| Scorpion | 3 29 51 | 3 27 01 |
| Phantom | 3 16 41 | 3 12 36 |

Phantom wins first prize and Druid second.

## Massachusetts Y. C., Sept. 14.

DORCHESTER, MASS.—BOSTON HARBOR.

THE Massachusetts Y. C. sailed its 147th race, for the 21ft. class and 18ft. cat class, on Wednesday of last week, the course being: From starting line, leaving Farm Bar Buoy on port, Old Harbor Buoy on starboard, Half-Tide Rock Buoy on starboard, Farm Buoy on starboard, Old Harbor Buoy on starboard, Half-Tide Rock Buoy on starboard, Farm Bar Buoy on port to starting line; distance 7½ miles.

The day was particularly bad, a dense fog, hard rain squalls and a strong S. E. breeze, so that only five yachts started, each having three reefs in. The times:

SPECIAL CLASS—21-FOOTERS.

| | Elapsed. | Corrected. |
|---|---|---|
| Exile, J. F. Small | 1 11 10 | 0 43 25 |
| Caprice, R. G. Bird | 1 24 00 | not meas. |
| SEVENTH CLASS—CATBOATS UNDER 18FT. | | |
| Wink, Francis Gray | 1 23 10 | 0 52 49 |
| Scamp, H. N. Nute | 1 25 07 | 0 56 35 |
| Marchioness, C. E. Hodges | 1 27 15 | not meas. |

Exile and Caprice filed counter protests over the course.

## Mobile Y. C., Sept. 11.

MOBILE, ALA.—MOBILE BAY.

CUP race, sailed over 10 mile triangular course; wind east, very light; weather fair; smooth sea; all centerboard sloops:

| | Length. | Start. | Finish. | Elapsed |
|---|---|---|---|---|
| Carrie G., E. D. George | 33.09 | 2 10 50 | Withdrew. | |
| Mineola, A. E. White | 31.00 | 2 11 08 | 5 03 50 | 2 52 42 |
| Seadrift, Jas. McPhillips | 22.00 | 2 10 08 | Withdrew. | |
| Zephine, W. B. Curran | 28.05 | 2 11 03 | 5 03 40 | 2 52 47 |

Zephine wins cup for one year.

## Minnetonka Y. C., Sept. 10.

ST. PAUL, MINN.—LAKE MINNETONKA.

THE last race of the season on Lake Minnetonka was sailed on Sept. 10; the times being:

SLOOPS.

| | Elapsed. | Corrected. |
|---|---|---|
| Dolphin | 1 55 27 | 1 51 39 |
| Volante | 1 57 47 | 1 53 53 |
| CATBOATS. | | |
| Atlanta | 1 59 44 | 1 52 13 |
| Ventura | 2 01 27 | 1 53 15 |
| SPECIAL. | | |
| Hermes | 2 19 14 | 1 57 35 |
| Kestrel | 2 13 03 | 1 58 51 |
| The Kid | 2 23 48 | |

The judges were Charles B. Eustis, George A. Dale and Carmen N. Smith.

## Larchmont Y. C., Larchmont Cup of 1892.

LARCHMONT—LONG ISLAND SOUND.

ALTHOUGH the end of Long Island Sound can hardly be considered an ideal place for the racing of large schooners, the fact remains that under the stimulus of the Larchmont Y. C. there has been this season quite an amount of schooner racing, and some of it, as in the special race of last week, in no way inferior to the majority of races about Sandy Hook. The owners of the schooners, large and small, have done a good deal this year for the club races, and in return the Larchmont Y. C. determined to offer a special cup, costing $500, for this rig, open to yachts of the New York, Eastern, Seawanhaka Corinthian, Atlantic, Corinthian of New York, American, New Haven, New Rochelle, Corinthian of Marblehead, New Bedford, Douglaston, Indian Harbor and Riverside clubs. The conditions were: All to sail in one class under club allowances, no restrictions as to crew or sails. The date set was Tuesday, Sept. 13.

The entries, all of which save Atlantic started, were:

| | Racing Length. Feet. | Allowance M. S. |
|---|---|---|
| Ramona, H. M. Gillig | 105.84 | Allows |
| Lasca, John E. Brooks | 93.17 | 7 27 |
| Atlantic, Marshall & Seely | 86.31 | |
| Marguerite, R. S. Palmer | 83.38 | 14 21 |
| Iroquois, Ralph N. Ellis | 82.24 | 15 14 |
| Shamrock, J. R. Maxwell | 73.18 | 23 00 |
| Viator, W. G. Brokaw | 65.92 | 30 16 |
| Azalea, Edmund Blunt | 63.36 | 33 08 |

The two smaller boats, Azalea and Viator, made matters interesting by a private stake of $150.

A strong S.E. wind made it difficult to lay out a satisfactory windward course, and the following was signaled from the committee boat Mutual, which lay at the line off Larchmont Harbor with Messrs. Lovejoy, Sarony and Burger aboard: From Larchmont around a stakeboat anchored three-quarters of a mile S. by W. from Stamford Lighthouse (course E.N.E. ½ N., 9¾ nautical miles), leaving same on starboard; thence around a stakeboat anchored off Eaton's Neck

THE LARCHMONT CUP OF 1892.

WON by IROQUOIS, SCHOONER. R. W. ELLIS.

Made by Whiting Mfg. Co.

Buoy (course E.S.E., 7 nautical miles), leaving same on starboard; then returning direct to finish (course W. ¼ S., 15⅝ nautical miles). Total distance, 32⅝ nautical miles.

This gave a close reach to Stamford, a beat across to Eaton's Neck, and a free reach home.

Azalea went over first, but not hearing the signal in the wind, those on board believed that she had crossed too soon, and so she worked back and made a second start astern of Viator, thus throwing away some 10 minutes. The start was timed:

| | | | |
|---|---|---|---|
| Gun | 11 35 00 | Handicap gun | 11 45 00 |
| Azalea | 11 36 59 | Lasca | 11 45 00 |
| Ramona | 11 37 38 | Iroquois | 11 45 00 |
| Shamrock | 11 43 19 | Viator | 11 45 00 |
| Marguerite | 11 44 39 | | |

Iroquois, Marguerite, Lasca and Viator crossed near the tug, on starboard tack, the proper one, but Azalea, Ramona and Shamrock crossed the other end of the line on port tack, being obliged to tack.

The big Ramona, formerly Resolute, set the pace at this reaching job, the fleet making a fine picture as the yachts drew out into line along the Connecticut shore. Lasca led the smaller boats, closely pressed by Iroquois and Marguerite. The times at Stamford mark were:

| | 1st Mark. | Elapsed. |
|---|---|---|
| Ramona | 12 39 20 | 1 01 42 |
| Lasca | 12 46 49 | 1 01 49 |
| Iroquois | 12 47 50 | 1 02 50 |
| Shamrock | 12 48 27 | 1 05 08 |
| Marguerite | 12 48 52 | 1 04 13 |
| Viator | 12 55 15 | 1 10 15 |
| Azalea | 12 58 12 | 1 21 23 |

The next leg headed into the wind and sea, there being plenty of each. At this work Lasca, Marguerite and Iroquois showed up best, the two smaller in particular. Shamrock gave up her place to Marguerite, and Azalea lost badly by overstanding the mark. The times at Eaton's Neck were:

| | 2d Mark. | Elapsed. |
|---|---|---|
| Ramona | 1 57 30 | 1 18 10 |
| Lasca | 2 01 42 | 1 14 53 |
| Iroquois | 2 04 04 | 1 15 14 |
| Marguerite | 2 03 55 | 1 15 03 |
| Shamrock | 2 08 02 | 1 19 35 |
| Viator | 2 19 10 | 1 23 55 |
| Azalea | 2 27 20 | 1 29 08 |

Once off the wind, balloon jibtopsails and balloon maintopmaststaysails were set, and a hot race was made to the finish, Iroquois and Marguerite being together all the time. The finish and last leg were timed:

| | Finish. | Elapsed. |
|---|---|---|
| Ramona | 3 09 41 | 1 12 11 |
| Iroquois | 3 20 40 | 1 17 36 |
| Shamrock | 3 28 29 | 1 20 27 |
| Azalea | 3 53 00 | 1 25 40 |
| Lasca | 3 14 05 | 1 12 23 |
| Marguerite | 3 21 26 | 1 17 31 |
| Viator | 3 46 27 | 1 27 17 |

The full times were:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Iroquois | 11 45 00 | 3 20 40 | 3 35 40 | 3 20 26 |
| Lasca | 11 45 00 | 3 14 05 | 3 29 05 | 3 21 38 |
| Shamrock | 11 43 19 | 3 28 29 | 3 45 10 | 3 22 10 |
| Marguerite | 11 44 39 | 3 21 26 | 3 36 47 | 3 22 26 |
| Viator | 11 45 00 | 3 46 27 | 4 01 27 | 3 31 11 |
| Ramona | 11 37 38 | 3 09 41 | 3 32 03 | 3 32 03 |
| Azalea | 11 36 59 | 3 53 00 | 4 16 01 | 3 42 53 |

The race was sufficiently close throughout to be very exciting for the spectators, the windward work being particularly interesting. The handsome cup was made by the Whiting Mf'g Co., and is an artistic piece of work. The value of it to Mr. Ellis is doubtless enhanced by the fact that he won it at the wheel himself, with several crack professional skippers against him.

### Detroit Y. C., Sept. 5.

DETROIT, MICH.—LAKE ST. CLAIR.

THE Detroit Y. C. sailed a very exciting race on Labor Day, the course being on Lake St. Clair. The wind was variable in force and direction, blowing strong from the north, and later shifting to the west and falling lighter. The times were:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| FIRST CLASS. | | | | |
| Princess | 1 25 00 | 3 48 48 | 2 23 48 | 2 14 42 |
| Cora | 1 21 32 | 3 59 15 | 2 37 43 | 2 37 17 |
| Crusader | 1 20 03 | 3 57 55 | 2 37 52 | 2 37 52 |
| SECOND CLASS. | | | | |
| Alice Enright | 1 21 26 | 3 28 07 | 2 06 41 | 2 06 41 |
| Josephine | 1 21 52 | 3 36 05 | 2 14 31 | 2 14 05 |
| Lulu B | 1 16 49 | 3 37 50 | 2 21 01 | 2 21 01 |
| Gertrude | 1 24 00 | 4 07 30 | 2 43 30 | 2 41 40 |
| Petrel | 1 23 05 | 4 13 40 | 2 48 35 | 2 45 49 |
| THIRD CLASS. | | | | |
| Shamrock | 1 21 09 | 3 41 35 | 2 20 26 | 2 20 26 |
| Surprise | 1 19 45 | 4 28 00 | 3 08 35 | 3 05 59 |
| FOURTH CLASS. | | | | |
| Ugo | 1 22 52 | 4 04 45 | 2 41 53 | 2 41 01 |
| Naiad | 1 21 40 | 4 18 30 | 2 56 50 | 2 56 50 |
| Madeline | 1 19 20 | 4 18 53 | 2 59 33 | 2 57 49 |
| Viola | 1 21 38 | 4 32 20 | 3 10 42 | 3 08 50 |
| FIFTH CLASS. | | | | |
| Cyclone | 1 19 06 | 4 03 15 | 2 44 09 | 2 42 51 |
| North Cape | 1 15 50 | 4 21 30 | 3 05 40 | 3 04 48 |
| Eureka | 1 18 15 | 4 32 38 | 3 14 23 | 3 14 23 |
| SIXTH CLASS. | | | | |
| Olive Eva | 1 16 00 | 3 44 20 | 2 28 20 | 2 28 20 |
| Norma | 1 19 00 | 4 04 25 | 3 45 25 | 2 45 25 |
| DOUBLE CATS. | | | | |
| Augusta | 1 19 26 | 3 42 20 | 2 22 54 | 2 22 54 |

Princess is better known as the City of the Straits. The judges were W. K. Parcher, W. J. Hammond and Walter Oades. Timekeepers, John R. Burton and L. N. Hilsendegen.

### Columbia Y. C., Sept. 3.

CHICAGO, ILL.—LAKE MICHIGAN.

THE fourth race of the Burlington Cup series of the Columbia Y. C., of Chicago, was sailed on Sept. 3 in a fresh S.W. wind, the times being:

| | Elapsed. | Corrected. |
|---|---|---|
| O. K | 1 33 25 | 1 32 43 |
| Growler | 1 53 44 | 1 49 07 |
| Blade | 1 56 03 | 1 51 26 |
| Sea Shell | 1 57 40 | 1 55 58 |
| Eileen | 1 59 30 | 1 56 24 |

This is O. K.'s third successive race, the score of points now standing: O. K., 12 points; Growler, 11; Blade, 8; Sea Shell, 3; May B., 3; Eileen, 2; Lois 1.

The judges were Thomas Boyle and Dr. Babes. Timekeepers: F. Gruschaw and W. C. Kraus. The steam yacht Wilber, steered by Mrs. Marshall B. Wilber, was the judges' boat.

### A Bad Blow.

ON the night of Sept. 13, a short but very severe S. E. gale struck New York, doing serious damage to yachts on the Bay, Sound and Hudson. The worst damage was at Larchmont, where quite a large fleet was anchored after the schooner race. Shamrock, Iroquois, Marguerite, Dauntless and Columbia rode out the blow with little damage, but Viator dragged up the harbor, doing much damage to herself and to other yachts as well. The most unfortunate was the yawl Mimette, which went on the beach and was completely wrecked. The sloop Peri and many small boats also went ashore. Jessie, steam yacht, Pyrie, Ileen and several other yachts were more or less damaged by collisions.

At Bath Beach, on Gravesend Bay, eighteen yachts and sailboats went ashore, among them being Badger, Sunbeam, Syria, Dorothy, Bonny Doon and Isabel.

On the Jersey shore much damage was done to the yachts of the Pavonia and Oceanic clubs, and many boats and yachts along the Hudson River suffered severely.

## YACHT NEWS NOTES.

Yampa, schr., has been chartered by C. W. Chapin to J. L. Carroll, Jr., for a 3-months' cruise in European waters.

Truant, steam yacht, Mrs. Newbury, was reported at Halifax last week, on her way to the Lakes.

Golden Fleece, steam yacht, has been purchased by Perry Belmont from the Osborn estate. Mr. Belmont has had her under charter all the season.

The *Boston Globe* of Sept. 10 published a very complete and interesting summary of the 21ft. class.

The New Utrecht Club, of Bath Beach, has organized a yachting department, with Mr. Hilton R. Freeman as commodore and John McRae as secretary. The club will build a house and breakwater. The first regatta will be sailed on Sept. 24.

On Sept. 11 the yacht Undine, of Buffalo, was capsized at night near Erie, Pa., in a heavy squall. Her crew of seven, one a lady, were thrown into the lake, clinging to the hull with great difficulty until finally taken off by Mr. George T. Bliss, of Erie, in the yacht Carmencita. A bad sea was running, making the work of rescue quite dangerous.

Ilva, cutter, owned by Tracy Peck, Jr., went on the rocks at Nubble Reef, on the Maine coast, on Sept. 15, and is a total loss.

Vamoose has been placed by Mr. Hearst at the disposal of the Advisory Board of Physicians for service about New York in connection with the cholera quarantine.

The sail-off of the Hull Corinthian Y. C., third class, on Sept. 17 resulted as follows:

| | Start. | Finish. | Elapsed. |
|---|---|---|---|
| Madge, W. H. Thayer | 9 35 00 | 11 03 28 | 1 28 28 |
| Marjorie, G. W. Bowen | 9 35 00 | 11 06 42 | 1 31 42 |

Madge wins the pennant. The wind was strong N.W.

Hugh Havatt, who was for three seasons in Capt. Charles Barr's crew as mate of Minerva and Owene, and who has been master of the 10-rater Dora this year, recently fell from the crosstrees during a race, sustaining injuries which may prove fatal.

The second class sail-off of the Quincy Y. C. on Sept 17 resulted as follows:

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Magpie, C. H. Otis | 22.04 | 1 50 42 | 1 40 10 |
| Opechee, W. P. Backer | 22.02 | 1 53 50 | 1 43 09 |
| Vision, George Crane | 22.10 | 1 56 05 | 1 45 59 |

The sail off of the Hull Y. C. in second and fifth classes on Sept. 17 took place in a strong west wind, the times being:

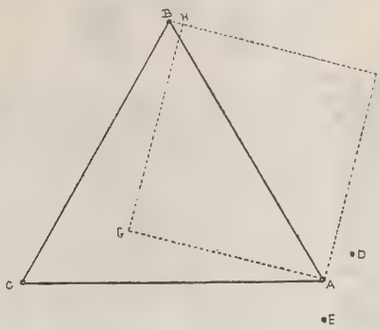
| | Elapsed. |
|---|---|
| FIFTH CLASS. | |
| Typhoon, J. L. Taylor | 1 40 24 |
| Madge, W. P. Thayer | 1 42 11 |
| Magpie, H. G. O ts | Disqualified. |
| Koorali, R. C. Robinson | Disabled. |
| SECOND CLASS. | |
| Beatrice, John Cavanagh | 1 54 33 |
| Gypsy, M. F. Drinkwater | Did not finish. |

Typhoon, again sailed by Mr. Stewart, wins the championship in her class. Magpie fouled Madge, giving the latter second prize. Beatrice wins the championship in the 25ft. class.

The Stony Point Y. C., of Port Morris, was organized on Aug. 27, with fourteen members and the following officers: Com., James C. Duane, cat Uno; Vice-Com., Anthony J. Oliver, cat Fright; Secretary, Harry C. Banks, yawl Sinbad; Treasurer, Oscar Brambach, schr. Arrow; Fleet Captain, Harry Duane, cat Hustler; Measurer, Robt. Start, cat Little Tom. The fleet at present numbers twelve boats and the club's anchorage is at Port Morris. The first race will be sailed on Sept. 24.

# Canoeing.

### FIXTURES.



OCTOBER.

1. Springfield, Cup, Springfield.

### The A. C. A. Sailing Course.

ARE the sailing races of the meet arranged primarily to amuse and interest the spectators, or as tests of boats and men? If the former, then the course as now laid out is unquestionably as near perfect as possible.

If 30 canoes start in a race, certainly not more than one can get the lead at the start. The best sailor who ever entered an A. C. A. race cannot always get the lead. If a man does not get the lead, what chance has he of winning, no matter how many rounds are sailed? If only 5 start the same thing holds good. Take the case of the third man in the race, and let us begin with him as he rounds the

windward buoy for the first time. At Buoy B there are two boats ahead of him and 27 behind him. All have started over the line A D, and have worked the half mile to windward A B. No. 3 is trying to blanket No. 2 on the run, and No. 2 is trying to blanket No. 1.

If the boats are very close together this may be done and an over lap established before C is reached, but No. 3 is in danger of being covered by those behind him, and as a matter of experience boats very rarely pass each other in this short run. If 2 or 3 are covered then 1 increases his lead.

Reaching from C to A, 2 must be very much faster than 1 to catch up with him. When A is reached a close turn is made and 1 sails as close as he can to F, with B plainly in sight. To pass 1 on this leg, 2 must point higher and at the same time sail faster—he cannot run through his lee. At F, 1 comes about on starboard tack and sails to just clear B; 2 is still behind to windward, perhaps if he has stood on further, or to leeward, if even; and is likely to pass to leeward of B; 1 has made his windward half mile by coming about only once.

Suppose 2 tries to gain an advantage by splitting tacks. Then at A he comes about on starboard tack and sails to G, where he comes about and sails to H, where he has to come about again, tacking three times to 1's once, and losing from five to ten seconds on each tack. Suppose he has actually gained by this, still he approaches H on port tack, and 1 has the right of way unless 2 has gained a clear lead, which is very unlikely. The second round is the same story over again, and so is the sixth round, including the turning of eighteen buoys. If No. 2 has such a hard row to hoe to get the lead, what chances of winning have 3, 4, 5 or 6, etc.? If the leader makes an error, of course 2 may benefit by it; but if he has a good boat and makes no errors, how can even a little better boat and man pass him?

I have before made the statement that not more than five canoes can start in a sailing race over an A. C. A. course and stand an even chance of winning. I am prepared now to venture the assertion that not more than three should sail over such a course. Any one who saw the trophy race in August must be convinced of this. It is as fair for one as another, is a statement often heard. So it is, but if a man fails to get over the line at least in as good a position as third, he might just as well retire, for his chances of winning have vanished unless the leaders break down. Only one man can get the lead, and it may happen to be any one of a dozen, depending on how the canoes bunch for the start. A slow boat may spoil the best man's chances a second before the start.

If the course was arranged with a mile leg to windward, no one would attempt to cover the distance by coming about only once, as a slight change of wind might spoil his chances, and close calculations over long distances are impossible. Therefore the canoes could break tacks and spread out over a large area, and twenty or thirty canoes could start over a long line on fairly even terms.

The best race ever sailed, to my mind, by the A. C. A. fleet, was in the club race at Jessup's Neck, two miles to leeward and return, and that race would have been far more interesting if the windward work had come first.

It seems to me that the course had something to do with the small list of entries at the last meet, and it is a subject well worth discussion. I shall be pleased to see in print the opinions of others who have suggestions to offer, or who believe that a change is not desirable.

C. BOWYER VAUX.

### English and American Rigs.

*Editor Forest and Stream:*

The article from the London *Field* published in your issue of Sept. 8, refers to the A. C. A. sailing course as being a prime factor in determining the rig of a racing canoe. It takes the ground that two sails of nearly the same size drive a canoe faster reaching and running than one large sail forward and a very small sail aft, and infers that the latter rig is faster to windward, but that this point does not count in the short windward work of the A. C. A. course. Area for area the *Field*'s contention is no doubt true. But the facts are that by means of two sails of nearly equal size in a given wind fully one quarter more sail can be carried with the same ease; and it is this fact which makes the schooner-canoe rig faster even to windward than the sloop or yawl rig. The canoe is practically the same on both sides of the Atlantic, 16ft. x30in. Do any of the English canoes carry 160sq. ft. of sail? Do they carry from 80 to 100sq. ft. when it is blowing over twenty miles an hour? Can 150sq. ft. be spread on a canoe divided into 130 and 20, or some such proportion? Limit the sail area to 100sq. ft. or 115sq. ft. and in all probability the English rig will win to windward, other things being equal. If this ground is correct, what has the course to do with the result? In point of time the half mile to windward takes longer to sail than the mile off wind, and therefore more than half the race is to windward.

C. BOWYER VAUX.

In the cutting from the London *Field* contained in your issue last week, the writer while treating correctly of the economic value of the respective methods of distributing sail in the two countries, overlooked one point which is of more importance with us than in England. There a limit of sail is imposed with the natural result that the tendency is to adopt the distribution which is the most effective per square foot. Here no such rule exists and the canoeman has to consider not the effective distribution of a limited area, but the distribution of the greatest effective area of sail.

While in a yacht the division of sail is considered objectionable and calls for allowance, in a canoe the reverse is the case for very simple reasons. In a yacht the object of changing from a cutter to a yawl or schooner is to secure increased handiness; not greater sail area. In a canoe the change is made to get increased area with equal handiness.

There is little doubt that the single sail rig is the most effective so long as the canoe can carry it, but the beam of a canoe is small, limiting the safe length of boom and so compelling great hoist to get the required area. The English yawl rig allows a greater total length of boom and thereby lowers the center of effort. It is probably not so effective, but since it can be carried so much longer makes a more desirable and faster rig. The American schooner rig is again rather less effective, but owing to the comparative long boom length and consequent low hoist an enormous rig can be put on the canoe and the greatest speed be thereby obtained. A comparison cannot be made on this side for want of data, but it may interest English canoemen to know that the total length of boom carried by an American racing canoe is as great as 20ft.

It is singular that the forms of sail should differ so much in the two countries and it is to be hoped that their respective merits may soon be tested in an international contest.

The example quoted—Canuck's sister—is unfortunately of little value. The sisters of noted boats are not, as a rule, successful; even if this case should be the exception, a Canuck would be handicapped by her great size with the limited rig imposed in England.

SCHOONER RIG.

### A. C. A. Membership.

THE following gentlemen have applied for membership in the A. C. A., Atlantic Division: F. N. Shurtleff, New York.

## CANOE NEWS NOTES.

The New Bedford C. C. has recently made a pleasant cruise among the Middleborough Lakes.

The latest novelty in the way of a canoe race, introduced by the Ianthe C. C., is a tandem hurry-scurry and upset race.

The Taunton B. C., of Taunton, Mass., held a reception and illuminated water parade on Sept. 6, which was a decided success.

The first regatta of the Tatassit C. C., of Worcester, Mass., will be held on Lake Quinsigamond on Sept. 21. The programme includes the usual events.

The Detroit C. C. has been recently organized with the following officers: Com., E. C. Whateby; Vice-Com., D. R. Holmes; Sec'y and Treas., L. K. Liggett. A suitable house will soon be provided.

THE Detroit Boat Club held a regatta on Sept. 10, the events being as follows: Tandem paddling, half mile: Clarence Gould and Ed Reynolds won with C. S. Isbam and W. C. Jupp second, J. A. Rathbone and P. S. Jacobson third, and Topping and Hastiogs last. Standing paddling, quarter mile, with two turns: P. N. Jacobson beat J. A. Rathbone, Ed Reynolds third and W. C. Jupp fourth. Single paddling: Clarence Gould, Ed Reynolds second, J. A. Rathbone third, and A. Jupp fourth. The open canoe meet was held on Monday and Tuesday of last week.

CHICAGO, Ills., Sept. 17.—Rear Commodore F. H. Gary, of the W. C. A., was down from his home in Oshkosh this week, spending part of the time in visiting the Chicago friends he met at the meet on Winnebago last July. "Terminal Facilities," as Mr. Gary is generally known, is looking the able seaman. He brings the cheerful information that Officer Casey, of Oshkosh, the warm personal friend of all the W. C. A. men, is enjoying his usual health. E. HOUGH.

# Rifle Range and Gallery.

### FIXTURES.

Sept. 25-26.—Zettler Rifle Club's prize fall shoot, Cypress Hill Park, Long Island, N. Y.

Sept. 27.—Second Regiment, C. N. G., annual prize shoot, New Haven, Conn.

Sept. 28.—New York National Guard, State and Second Brigade competition, Creedmoor, Long Island, N. Y.

### Stray Shots From Sea Girt.

"THE finest range in the country," say the Pennsylvanians.

Jersey and Pennsylvania have soured on Frankford ammunition.

Gen. Spencer was happy when he counted eleven entries in the regimental team match.

The Second New Jersey made a splendid showing, considering its hard runof luck.

If the New York team wants to win at Sea Girt it will have to get in some preliminary practice over the mid-ranges.

The N. J. S. R. A. should cut the Wimbledon match from its programme in 1893. It does not pay to close ten short-range targets for four hours in order that one long-range target may be used.

The skirmish firing should be done the last of the week.

Do away with the percentage prizes and offer stated sums in the several matches.

Include in the 1893 programme a 7-shot match, with three tickets to count, at 200yds., and make the prizes worth shooting for.

Do not allow a person, be he State official or "prominent" member, to fire a shot except it be on a pool or match ticket.

Have a stated hour for opening the pool and match targets, and open them on time.

Do not notify teams to be on hand at 2 P. M. and then keep them waiting until 3:20.

Nothing but good nature prevails during a shoot at Sea Girt.

The visitors were surprised at the fine accommodations provided them by New Jersey.

Young Horace M. Bell, who accompanied the D. C. team at Sea Girt, can shoot a Springfield like a veteran. And he can manipulate a camera in good shape as well.

Gen. Snowden, of Pennsylvania, fell in love with Jersey's splendid camp.

Wm. Hartman, of the Seventh, N. J., put up 91 in one of his match skirmish runs. W. W. Young, of the District team, made 92 in a practice run.

Everybody was disappointed at not seeing the Maine team.

There should be at least a dozen prizes in the Perrine memorial match.

The excellent half-tone engravings of the First D. C. and Second N. J. were reproduced from 8×10 photographs taken at the camp by H. J. Thein, of 46 Broad street, Newark, N. J., at the request of FOREST AND STREAM. Mr. Thein will furnish 8×10 mounted copies of the above pictures and also of the teams of the First, Sixth and Seventh, N. J.; Second Regiment, D. C.; Sixth Battallion, D. C.; Engineer Corps, D. C., and of the D. C. Brigade team, at 50 cents each.

Messrs. Thomas and Hays formed a great combination in the office.

The Pennsylvania men all used U. M. C. ammunition in their shooting at Sea Girt, and declare that it is "points better" than that made at the Frankford arsenal.

The New Jersey National Guard and the Columbia trophies, won by the team of the Second Regiment, are on exhibition in the window of Doctor-Druggist-Captain W. F. Decker, in Paterson.

Capt. John S. Sheperd, of the Twenty-third N. Y., and Capt. Ed. Gould, of the Seventy-first N. Y., were range officers at Sea Girt.

In 1893 the State authorities should order each command to enter a team for the N. J. N. G. and Columbia matches, and should pay their expenses during the week as well as providing them with transportation for three or four days of preliminary practice.

The State is trying to secure possession of the strips of cedar groves on either side of the rifle ranges.

FOREST AND STREAM of Sept. 15 had the only illustrated account of a military rifle shoot ever published in this country. But then, doncherknow, we cawnt help being on top of the heap.

In next year's Perrine match there should be at least ten stated cash prizes in addition to the medal. Or better still, do away with the present "all-comers" match and make the Perrine match open to all, the medal to go to the Jersey guardsman making the highest score, while the cash prizes were open to all. In this case there should be at least 20 prizes aggregating not less than $150.

For some unaccountable reason, in last week's FOREST AND STREAM the titles of the First Regiment, D. C. M., and of the Second Regiment, N. G. N. J., were transposed. The team shown on the upper portion of page 235 was that of the Second Regiment, N. G. N. J., winners of both the New Jersey and Columbia trophies, while the team shown on the lower portion of the same page was that of the First Regiment, D. C. M., which won the regimental team match.

Brig.-Gen. Spencer, Col. Van Valen and Col. Owens, whose pictures appeared last week, comprise the New Jersey department of rifle practice.

A number of officers who visited the range during the shoot were replendent with dress belts, swords and white gloves. Swords and belts were not needed, while white gloves are bad taste on a rifle range.

The tie for second and third prizes in the Kuser match between Lieut.-Col. Horton and Sergt. Robling was decided by the next best ticket. Each had a 32, and as Robling's ended with 4, 5, 5, and Horton's with 5, 4, 5, the former got second prize.

During future contests the targets should be changed oftener. The mid-range targets were unfit for use by Thursday.

C. H. TOWNSEND.

### Port Chester Rifle Club.

PORT CHESTER, N. Y., Sept 10.—The following scores were made by members of Port Chester Rifle Club, 200yds., offhand, standard American target:

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| J Smith | 7 | 10 | 6 | 7 | 10 | 5 | 8 | 7 | 7 | 9—74 | |
| | 10 | 6 | 8 | 7 | 10 | 7 | 6 | 7 | 8 | 8—77—151 | |
| Horn | 6 | 6 | 4 | 6 | 5 | 8 | 8 | 0 | 9 | 8—60 | |
| | 10 | 6 | 4 | 7 | 6 | 10 | 6 | 6 | 6 | 7—68—128 | |
| J Hess | 9 | 4 | 5 | 9 | 10 | 5 | 5 | 8 | 3 | 5—63 | |
| | 7 | 4 | 3 | 10 | 5 | 4 | 8 | 4 | 6 | 10—61—124 | |

R. MCNEIL, Sec'y.

### The Zettler Festival.

BARNEY WALTHER will lead out the Zettler riflemen on Sunday and Monday next for the annual shooting festival of the club. It will be the nineteenth yearly outing, and the usual close and high finishes are promised in the shooting portion of the affair, with plenty of jollity and good fellowship for everybody, shooters or not. The shooting will take place at the Zettler range in Wissel's Cypress Hills Park, and in the three main matches about $600 in prizes await distribution to those who merit them. In addition there is a good line of premiums for best shots, early and late shots, best strings of bullseyes, etc., etc. There is a judges' match for invited guests and a ladies' match to be shot by the ladies in person for prizes contributed by themselves. The programme of the fighting matches provides as follows:

Ring target.—Three-quarter inch (25) German ring target, any rifle, open to all comers, first ticket $2, each following $1, two best tickets to count for the first five prizes; the best single ticket to count for the following prizes. Tickets unlimited. Only one prize obtainable by any one shooter; 21 prizes, aggregate $250. Premiums: For the best 5 tickets on ring target, $10; second best, $8; third best, $4; fourth best, $2.

Bullseye target, open to all comers; 10 shots for $1, the best bullseye to count by measurement; 18 prizes, $102 premiums; for the most bullseyes shot by one shooter during the festival: First premium, $12; second, $8; third, $6; fourth, $4; fifth, $2. For the first and last bullseyes on each day, $1 each.

Target of honor, 3 shots, open to members only, for the prizes presented by judges and members and $100 donated by the club, in 10 prizes.

### Massachusetts Rifle Association.

BOSTON, Sept. 17.—The fine weather at the Massachusetts Rifle Association's weekly shoot sent up the scores in fine style. The shooting was at 200yds., as follows:

S. O. Merville won the three Eagle badges with rifle off-hand. Gold badge on 10 scores of 82 or better: 84 82 86 86 83 83 83 88 85 82.
Silver badge on 10 scores of 75 or better: 77 81 79 77 78 76 79 78 79 81.
Bronze badge on 10 scores of 67 or better: 86 76 72 76 83 73 73 80 77 78.

All-Comers' Off-hand Match: S. O. Merville 80, S. C. Sydney 79, O. Moore 78, J. B. Hobbs 77, A. King 71, D. Bayley 68, M. T. Day 67, D. N. Winn 64, H. N. Haven 60.

All-Comers' Rest Match: J. Francis 106, S. Wilder 105, J. French 103, W. M. Fox 102, A. H. Ballard 101, B. E. Hunter 92, M. T. Day 89, D. F. Hart 83.

Military Medal Match, Creedmoor Target: J. L. Fowle 45, G. Durward 45, A. S. Field 43, G. H. Nason 42, O. Moore 42, B. C. James 40, D. N. Winn 40.

Pistol Match, 50yds.: H. S. Harris 95, A. D. Stevens 91, H. D. Martin 90, J. B. Hobbs 90, O. Moore 88.

### Port Chester Rifle Club.

PORT CHESTER, Sept. 19.—*Editor Forest and Stream:* The following scores were made by members of the Port Chester Rifle Club, on Saturday, Sept. 17, 200yds., off-hand, Standard American target:

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| R McNeil, Jr | 2 | 8 | 9 | 6 | 8 | 6 | 9 | 9 | 10 | 6—73 | |
| | 7 | 8 | 4 | 8 | 8 | 8 | 7 | 9 | 6 | 6—71—144 | |
| E Dunham | 9 | 9 | 5 | 7 | 7 | 9 | 6 | 4 | 8 | 8—72 | |
| | 7 | 8 | 8 | 5 | 7 | 6 | 5 | 6 | 10 | 10—72—144 | |
| J Smith | 7 | 8 | 9 | 10 | 7 | 5 | 5 | 7 | 7 | 9—74 | |
| | 9 | 7 | 7 | 4 | 5 | 5 | 5 | 9 | 4 | 9—64—138 | |
| F A Bachman | 3 | 8 | 4 | 7 | 7 | 7 | 6 | 6 | 5 | 5—58 | |
| | 10 | 6 | 6 | 7 | 5 | 6 | 7 | 5 | 3 | 6—61—119 | |
| R Rudd | 9 | 6 | 4 | 5 | 4 | 4 | 7 | 4 | 7 | 7—57 | |
| | 10 | 8 | 3 | 3 | 5 | 6 | 5 | 7 | 7 | 8—62—119 | |

R. MCNEIL, JR., Secretary.

### Syracuse Rifle Club.

SYRACUSE, Sept 15.—At the regular shoot of the Syracuse Rifle Club to-day the following scores were made:

Off-Hand.

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| Stillman | 10 | 10 | 7 | 9 | 9 | 8 | 9 | 8 | 9 | 7— 86 | |
| Leighton | 7 | 9 | 7 | 5 | 8 | 10 | 6 | 10 | 6 | 9— 77 | |
| Lathrop | 7 | 5 | 9 | 6 | 6 | 5 | 7 | 5 | 9 | 8— 67 | |
| Robotham | 5 | 5 | 9 | 3 | 9 | 3 | 5 | 7 | 4 | 9— 60 | |

Rest.

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| Baker | 9 | 10 | 12 | 10 | 12 | 9 | 11 | 9 | 12 | 11—105 | |
| Leighton | 11 | 10 | 9 | 9 | 10 | 12 | 12 | 9 | 11 | 11—103 | |
| Nearing | 11 | 11 | 9 | 12 | 9 | 12 | 11 | 9 | 9 | 10—103 | |
| Robotham | 11 | 10 | 12 | 9 | 12 | 8 | 10 | 8 | 12 | 10—102 | |
| Stillman | 9 | 10 | 10 | 9 | 10 | 10 | 10 | 12 | 9 | 9— 98 | |
| Dr. Coon | 8 | 9 | 8 | 7 | 10 | 8 | 9 | 7 | 7 | 8— 81 | |

### Garden City Rifle Team.

THE Garden City Rifle Team met for their weekly contest Tuesday evening, Sept. 13, at Burley & Erickson's shooting gallery, 146 South Halsted street, Chicago. Conditions were 25yds., 25 shots each, open sights, free off-hand position, Massachusetts paper target, possible 300 points:

| | | | |
|---|---|---|---|
| A McBean | 282 | A Nisja | 264 |
| W J Gibbs | 272 | Roy Taylor | 260 |
| C A Hankle | 266 | Wm Gorensen | 258 |
| H G Burley | 266 | Wm Frisbie | 257 |
| J C Martin | 254 | | |
| M Tatroe | 252 | | |
| F Erickson | 250 | | |

Sweepstake won by Mr. McBean, scoring 107, possible 120. There will be a team shoot at this gallery next Tuesday, Sept. 20.

### South London Rifle Club's Revolver Championship.

THE scores for the revolver championship of this club, which shoots once a week at Staines', were not advanced much on Sept. 8, as many of the best shots were absent and no scores of any importance were made. Mr. Walter Winans was absent partridge shooting. The scores for the revolver championship of the club now stand:

| | | | |
|---|---|---|---|
| Walter Winans | 42 41 40 40—163 | C F Lowe | 36 36 36 36—144 |
| H Andrews | 39 38 38 38—153 | F W Heath | 37 35 33 31—136 |
| Major McKerrell | 41 37 36 36—150 | | |

It will be seen that Mr. Andrews has drawn up to second place.

### A. Lischke Rifle Club.

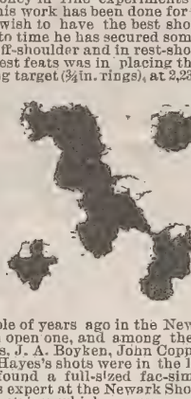
JERSEY CITY, N. J.—This is the score of five best on Friday, Sept. 16, of the Lischke Rifle Club, 110ft., 25-ring target:

| | |
|---|---|
| Lischke | 25 25 25 25 25 24 24 24 22 21—240 |
| Scharli | 25 24 24 24 24 23 22 22 19 19—225 |
| Steidel | 24 24 23 23 22 22 22 19 19 19—217 |
| Schulte | 25 24 24 23 23 22 22 19 16 15—213 |
| Dyroff | 25 23 23 22 21 21 20 19 19 18—209 |

O. SCHULTE.

### South Junction Rifle Club Revolver Shooting.

THE revolver competitions in connection with the above club took place at Staine's Sept. 1 in a very strong wind. Mr. Walter Winans again won first prize in both stationary and disappearing target competitions, with scores of 40 and 36 respectively out of a possible 42.



The scores for the revolver championship of the club now stand:

| | | | |
|---|---|---|---|
| Walter Winans | 42 41 40 40—163 | C F Lowe | 36 36 36 36—144 |
| H Andrews | 39 38 38 38—153 | Lieut T W Heath | 37 36 23 31—136 |
| Maj R Mackerrell | 41 37 36 36—151 | | |

### A Record Group for Hayes.

WM. HAYES, of the Newark (N. J.) Shooting Society, is still at his old tricks of experimenting with new rifles and ammunition, in the endeavor to find how near to perfection a combination of the two can be brought. Mr. Hayes, who is known the world over as one of the finest of Schuetzen riflemen, has probably expended more time and money in rifle experiments than any other man living, and all of his work has been done for pure love of the sport, prompted by the wish to have the best shooting utensils obtainable. From time to time he has secured some phenomenal results both in shooting off-shoulder and in rest-shooting.

One of his greatest feats was in placing the 100-shot record for the German 25-ring target (¾in. rings), at 2,235 points, which he ac-

complished a couple of years ago in the Newark Shooting Park. The match was an open one, and among the contestants were M. Dorrier, F. C. Ross, J. A. Boyken, John Coppersmith and August Begerow. All of Hayes's shots were in the 12in. black.

Below will be found a full-sized fac-simile of a group of ten shots made by this expert at the Newark Shooting Park, on Saturday, Sept. 3. The string, which was supposed to be the best on record, measured only 4½in., the measurement being taken from the center of the group to the center of each bullet hole.

The conditions were as follows: The rifle barrel, which weighed about 15lbs., was cut by George Schalck, of Pottsville, Pa., having an octagonal cut, gain twist and a slight choke. Caliber of rifle .38; weight of bullet, 300grs.; powder, 55grs. of Hazard's F.F.G.; Chase system of patching; diameter of bullet, 371½ thousandths; thickness of paper patch, 1 one-thousandth of an inch; distance, 196yds. Rifle, complete, weighed about 20lbs. Set trigger. Shot from a slide-rest invented and constructed by Mr. Hayes.

The chances are that many a moon will rise and set before this group is beaten.

## Trap Shooting.

All ties divided unless otherwise reported.

### FIXTURES.

If you want your shoot to be announced here send in notice like the following:

Sept. 23.—White Plains (N. Y.) Gun Club tournament. L. C. Platt, Jr., Treas.
Sept. 27-Oct. 1.—Grand five days' tournament at Mt. Sterling, Ky.
Sept. 28-29.—Womelsdorf (Pa.) tournament.
Sept. 29-Oct. 1.—Peekskill (N. Y.) Gun Club tournament.
Oct. 5-6.—West End Gun Club tournament, at Ottumwa, Iowa.
Oct. 4-7.—Chas. Polster's tournament, Indianapolis, Ind.
Oct. 5-7.—First annual tournament of the Riverside Gun Club, at Red Bank, N. J. First two days targets, last day live birds John P. Cooper, Sec'y.
Oct. 11.—Eastern New York League kingbird tournament, with Cruttendens & Cords new trap and pull, at Canajoharie, N. Y. T. C. Pegnim, Sec'y.
Oct. 12-13.—Wilmington (Del.) Rod and Gun Club tournament.
Oct. 18-20.—Highland Gun Club annual fall tournament, at Des Moines, Iowa.
Oct. 19-20.—Somerville Gun Club tournament, Somerville, N. J.
Oct. 21.—New Jersey Shooting Club tournament, at Claremont, N. J.
Nov. 23-26.—Milwaukee (Wis.) tournament, targets and live birds.
May 23-25, 1893.—Knoxville Gun Club tournament, $1,000 added to purses. Also valuable merchandise prizes.

## DRIVERS AND TWISTERS.

Some fine purses are offered for those who take part in the five days' tournament at Mt Sterling, Ky., September 27 to October 1, inclusive. There are no "guaranteed" purses, but what is better still, added moneys. This is what draws the shooters. The first event each day will be at twenty bluerocks, $5 entry with added purse of $100, although there is an aggregate of $600 in added moneys, besides valuable merchandise prizes, including an $80 grade L. C. Smith gun.

The tournament of the New Jersey Shooting Club, to be held at Claremont on Oct. 21, should attract a big crowd, as the shooting will be at both live birds and targets. Live-bird events will be run from 9 A. M. to 1 P. M., after which there will be target shooting until dark. Targets will be charged for at the rate of 2 cents each. These grounds are admirably adapted for both styles of shooting, and all who attend the shoot will be assured a good day's sport.

Capt. Cash, of the District of Columbia brigade team which shot during the recent meeting at Sea Girt, says he saw the shooting of Captain Brewer at Atlantic City on Aug. 13, and was thoroughly disgusted at what was there called "the sport of live bird shooting." He says that not more than half a dozen birds took flight when the traps were pulled, and that a first-class base ball pitcher could have struck at least 92 out of the 100 birds with a base ball.

John Erb announces that the "Old Stone House" Saturday shoots at live birds will be kept up during the rest of the season. There will also be a shoot on each holiday. Mr. Erb has arranged to have plenty of birds on hand for all comers. The trapping and gathering on these popular grounds are done in quicker time than anywhere else in this section of the country, Mr. Erb allowing none but experienced men to do his work.

Frank Class runs a regular Wednesday afternoon shoot on his Morristown (N. J.) grounds. At the shoot on Sept. 14, at 25 bluerocks each, Jennie Smith broke 22, Mahone 20, H. Piper 20, Class 21, F. Piper 19, A. Quimby 19, Van Arsdale 18, Hathaway 15, S. Quimby 17, Tenard 16, Renshaw 15, Miller 10. Class wants to back Jennie Smith against any woman in the world to shoot at 100 bluerocks each for $100 a side.

The Manhattan Athletic Club held a carnival of sports at Manhattan Field last Saturday, a clay bird event being included in the programme. Each man shot at twenty-five targets, Fred G. Moore carrying off first honors with nineteen breaks. J. J. Loome and William Rowland tied for second on seventeen each, Rowland winning on the shoot off.

H. A. Penrose, president of the Keystone target and trap company of New London, Conn., was in town on Monday, en route to the Interstate shoot at Auburn. Mr. Penrose says that S. S. powder, U. M. C. shells, Keystone targets and Keystone traps are a combination hard to beat.

Frank Class stated some time ago that he intended holding a tournament on his new grounds at Morristown, N. J., with two days' shooting at targets and one day at live birds, but thus far no dates have been announced.

A match between teams of fourteen men each from the Penn Club of Morristown and the Spring City Gun Club, on September 10, was won by the Penn Club with an average of 18 breaks per man to the Spring City's 17.

The Roseville Gun Club of Newark will hold its monthly shoot on the grounds in rear of John Erb's on Saturday. The club shoot at 25 United States targets will be preceded and followed by open to all events.

The Wilkesbarre (Pa.) Gun Club formed by Will K. Park, of the Wilkesbarre Gun Co., is a very progressive organization and all its shoots are well attended. It shoots on grounds near the gun factory.

The Canajoharie (N. Y.) Gun Club will engineer a tournament of the Eastern New York Trap-Shooters' League on Oct. 11. Kingbird targets and the jovial features of "Crutty" will be the attractions.

Lieut.-Col. Breintnall, the soldier sportsman of Newark, N. J., is having a pleasant time in the Yellowstone region. Col. Breintnall is accompanied by his wife, who is an enthusiastic lover of nature.

The novelty rule proved to be immensely popular at New London, and for the sake of variety it should be introduced at other tournaments. The experiment would be inexpensive.

The (Seth) Clover Gun Club of Erie, Pa., held its regular shoot on September 12, with a good attendance. The members are arranging for a big tournament to be held this Fall.

On Oct. 1, John Erb and Henry Newbouse will come together in a match at 25 live birds each for $25 a side, the match to be shot on the "Old Stone House" grounds.

The New Jersey State Trap Shooters' League will begin a new series as soon as the present one is ended. But two more shoots remain of the present series.

Al. Heritage says he is not anxious to run a tournament on his Marion grounds until he is assured of being able to get plenty of good birds.

Harvey McMurchy is making his periodical pilgrimage through the South and will not return home until some time in October.

The Bradford (Pa.) Gun Club will hold a tournament at live birds and targets next week.

The Tacoma Park Gun Club of Rockville, Md., will hold a tournament on October 5.

Frank Mason has gone West on a six weeks' trip in the interest of *The Mayflower*.

Peekskill will draw a goodly party next week. Jersey will send up a contingent.

George Mosher, of the Fulton Arms Company, was in town last week.

Riggott and Class are to shoot their return match on Oct. 12.

All the Jerseymen are going down to the Wilmington shoot.

C. H. TOWNSEND.

### Bluerocks at Morristown, N. J.

MORRISTOWN, Aug. 31.—In response to an invitation from Mr. Frank Class, the well-known live bird shots, a small but enthusiastic crowd of bluerock smashers met upon the Driving Park at Morristown. The morning did not give much promise of a pleasant day, but about 1 o'clock the weather cleared up and a more desirable afternoon for the sport could hardly be wished for. The Driving Park is situated in one of the beautiful vales for which Morris county is justly celebrated, and no better shooting ground could be found. The shooting was all at bluerocks, from three traps, rapid firing system, and the feature of the programme was a twenty-bird race which was won after an interesting contest, by Mr. W. C. Brickner, of Newton. In the near future the grounds will have a complete outfit of bluerock expert traps and the electric pull, and the matches there will be more frequent. Miss Jennie Smith gave an exhibition of her skill with the shotgun after the programme had been finished and acquitted herself with credit. The following are the scores:

No. 1, 10 targets: Class 9, Smith 9, Drake 8, Hedden 8, Shepperd 8, Piper 4.
No. 2, same: Shepperd 9, Drake 9, Hedden 8, Piper 7, Class 7.
No. 3, same: Class 10, Hedden 9, Shepperd 8, Smith 8, Drake 7, Armstrong 7, Piper 6, Timmins 3.
No. 4, same: Shepperd 9, Class 9, Smith 8, Drake 8, Hedden 7, Timmins 6, Hathaway 6, Piper 6, Armstrong 4.
No. 5, same: Smith 9, Hedden 8, Shepperd 8, Drake 7, Hathaway 6, Armstrong 6, Class 6, Piper 6, Leonard 5, Timmins 4.
No. 6, same: Smith 8, Class 7, Hedden 7, Drake 7, Shepperd 7, Timmins 6, Armstrong 4, Leonard 3, Hathaway 3.
No. 7, same: Timmins 10, Hedden 10, Shepperd 9, Smith 8, Armstrong 8, Class 8, Drake 6, Piper 4, Leonard 3, Hathaway 3.
No. 8, 20 singles: Brickner 19, Hedden 18, Smith 17, Shepperd 16, F. Class 13, Drake 19, Hathaway 9, J. Class 8, Piper 7.
No. 9, 10 singles: Class 10, Smith 9, Drake 8, Hedden 8, Piper 5, Brickner 5, Shepperd 5, Mahan 4, Hathaway 3.
No. 10, 15 singles: Hedden 13, Drake 13, Smith 12, Shepperd 10.

### New Utrecht Rod and Gun Club.

The regular weekly keystone target shoot of the New Utrecht Rod and Gun Club was held at Woodlawn Park, L. I., on Saturday, Sept. 17, for the gold and silver medals in that class of shoot. Each man shot at twenty targets, eighteen yards rise. P. Hegeman and D. Deacon tied with 18, but the latter having a handicap of one bird, took the first medal. Then D. Deacon won the second from P. Adams. The scores:

| | | |
|---|---|---|
| D Deacon | 11111111101111101101 | —16 |
| W F Sykes | 10010010011100000100 | — 7 |
| D Bennett | 10001111011000101101 | —11—12 |
| R R Street | 10010110011011011010 | —11—12 |
| P Hegeman | 10111101110101111111 | —16—17 |
| C M Myer | 10011011000010001101 | — 9 |
| P Adams | 10111111111011001100 | —14—16 |
| C Wingert | 00010111011110100010 | —10 |
| A Hegeman | 01010100010011001011 | — 9 |
| G Cropsey | 10111111000100100101 | —11—12 |
| W Lohman | 00111110001010000001 | — 8—10 |

Sweepstake shoots, $1 entrance: R R Street 5, C M Myer 2, P A Hegeman 9, A Lohman 0, C Wingert 9, A A Hegeman 7, D Bennett 8, W F Sykes 8, G Cropsey 2.

### Wilkes-Barre.

WILKES-BARRE, Pa., Sept. 18.—Following are the scores made on the shooting grounds at the Wilkes-Barre Gun Company's factory on the 17th. The Standard-Keystone targets were used for the first time and the boys were delighted with the way they broke, as none were found with shot holes, as is the case with many other targets when the birds are brought in from the field after the shooting is over. First match, at 25 single Keystones, known angles:

| | |
|---|---|
| Park | 1011111111111111111111111—24 |
| Ernest | 0011011100101111111111111—19 |
| Morgan | 0101111011100110011010111—18 |
| Smith | 0111100011111010010111110—16 |
| Browne | 0000100101010110011100—10 |
| Keystone | 1110100001101010011000000—10 |
| Wilkes | 0000000000111010010100111— 9 |

W. BARRE.

### The Jeannette Gun Club.

THE regular monthly shoot of the Jeannette Gun Club took place at Dexter Park, L. I., on Friday, Sept. 16, at 10 live birds each, modified Hurlingham rules. J. Vagts took the medal in the first class, J. Sauer in the second class and H. Hoops in the third. The scores:

| | | | |
|---|---|---|---|
| C F Offerman | 0221011110—7 | C Doscher | 1001010020—4 |
| H Otten | 0210112202—7 | J Kroeger | 1101012111—8 |
| N Brunce | 2001211100—6 | J Lahing | 0000021011—4 |

| Capt Cordts | 0001122101—6 | H Bornhoeft | 2000111002—5 |
| C Dish | 0201021012—6 | F Sauer | 1111111110—9 |
| A Christian | 1202011111—8 | C M Meyer | 1101122022—8 |
| E Busse | 0101012111—6 | | |

### Ridgewood Gun Club.

THE postponed shoot of the Ridgewood Gun Club was held on Friday, Sept. 16, at Ridgewood Park, L. I. The competition was for the club medal at 7 birds each. John Schlieman won the trophy, out-shooting F. Ibert, G. Nolte and L. New. The scores:

Club shoot for medal, 7 birds, birds good:

| | | | |
|---|---|---|---|
| P Kramer | 1101101—5 | L Neir | 0111111—6 |
| C Schneider | 0111011—5 | P Eppeg | 0001001—2 |
| C Deckelman | 1000101—3 | L Gepeing | 1110111—6 |
| B Glunocks | 0010110—3 | I Martin | 1110011—5 |

### Fond du Lac.

FOND DU LAC, Wis., Sept. 17.—Score of Fond du Lac Gun Club shoot to-day, 25 bluerocks, expert traps: A. R. Keating 20, Fred Hurlbut 10, L. F. McLain 10, Will Hamilton 5. Strong wind across the traps.

A. R. K., Sec'y.

## The New Jersey League Shoot.

THE eighth monthly team contest of the New Jersey Trap-Shooters' League, held in conjunction with an all day tournament of the East Orange Gun Club on the latter's grounds in Harrison was a very successful and well managed affair. The weather conditions were unfavorable in the early morning, the rain coming down at a lively rate at intervals up to 10 o'clock. After that hour, however, the clouds broke away, but it was not until after noon that the sun deigned to remain in sight for any length of time. Weather conditions, however, seem to make very little if any difference to the members of the clubs represented in the League, and even during the wet hours a number were on hand to shoot in the open to all events. The sweepstake events run by the club were under the direct management of H. S. Babbage, the club's efficient secretary, who was ably assisted by W. R. Hobart, the League secretary. The firing was at bluerock targets, thrown from bluerock traps, both of which gave their usual good satisfaction. Five traps were used, the shooting being under the rapid-firing system.

The grounds of the East Orange Gun Club are situated about five minutes' walk beyond the terminal of the Newark & Harrison horse-car line, and are provided with a neat club house, which Mr. Babbage states, erected within ten hours.

The team shoot for the New Jersey championship, which began about 3 P. M., had nine entries, all the clubs in the League entering except the Brunswick Gun Club, of New Brunswick. The teams comprised five men each and each man shot at 25 bluerock targets. The Independent Gun Club, of Plainfield; Passaic City Gun Club, of Passaic; East Orange Gun Club, of Harrison, Maplewood Gun Club, of Maplewood; Woodside, South Side and East Side-Mutual gun clubs, of Newark; Boiling Springs Fish and Gun Club, of Rutherford, and the New Jersey Shooting Club, of Claremont, comprised the entries.

The Independents had already won five contests, and in one had tied with the Maplewoods, the other contests have been won by the Boiling Springs. On the above day the Maplewoods and Independents agreed that their respective team scores should decide the tie existing between them. The Independents not only succeeded in winning the tie, but the contest as well, this placing seven victories to their credit out of eight contests.

Among the visitors to the grounds were W. Fred Quimby, of New York; Chas. Vermoral, of Paterson; Al. Heritage, of Jersey City, and Gus Greiff, of New York.

Below will be found detailed scores of the day's work:

THE TEAM CONTEST.

## Hamilton Gun Club.

HAMILTON, Ont., Sept 12.—One of the most successful shoots of the season was held on the grounds of the Hamilton Gun Club this afternoon. Great interest was taken in all three contests. Parker fought hard for B medal, and only for the splendid score of Mr. James Crooks would have succeeded in winning the fourth time, and closing the B medal competition. As it is he is duly bound to enter the field again. Wm. Strand still holds the challenge medal, having defeated Parker by 18 to 15. Wilson won one of the club medals and that of the H. P. Co. During the afternoon the members were photographed, a copy of which will be sent to FOREST AND STREAM in due time.

Challenge medal, 15 singles and 5 pairs:

| | |
|---|---|
| W Stroud | 1111100011111 10 01 10 11 11—18 |
| Parker | 1111000111101 0 10 10 01 10 10—15 |

Shoot for club medals at 25 singles, rapid firing:

## Brewer vs. Morris.

THE live bird match between Charles E. Morris, president of the Atlantic Rod and Gun Club, and John Brewer, the veteran professional trap shooter, took place on Tuesday at the grounds of the Atlantic Rod and Gun Club at West End, Coney Island. The match being between a comparatively young amateur against such a prominent wing shot drew a big crowd of Long Island and New Jersey shooters, who were anxious to see how the young shooter would make out. The conditions of the match by mutual agreement were somewhat changed. Instead of only 50yds. boundary the club's limit of 80yds. was adopted. Each man shot at 200 birds, 30yds. rise, modified Hurlingham rules, for $200 a side, the loser to pay all expenses.

The match was commenced at 12:30 P. M., with Brewer at the score; he killed his first 4 birds, but missed his fifth, which hung to the trap and then started off fast as a left-quartering driver. Brewer hit hard and slightly turned him, but he got on the fence. Morris lost his first bird, a left-quartering fast incomer, which dropped dead out of bounds. His eleventh bird was a right-quartering incomer and fell dead about 40ft. over the line. Drewer keps on steadily shooting, but lost his thirtieth bird, another which fooled him at the trap and proved to be a fast right-quartering driver. This was the last he missed out of his first 100; he had some very rapid twisting birds, especially his ninety-second, which started from right to left, and on being turned with first barrel was a straight driver and fell dead at the fence.

In Morris's second round of 25 he lost four, three being dead out of bounds, and all fast incomers; in the third he missed two, one incomer and a right driver, and another right driver in his fifth, finishing his first century with a score of 91 to Brewer's 98. The latter in his second century managed to miss his second bird, another left-quartering driver, and from this point he shot a steady gait and finished with 98 straight, making a total score of 197. Morris was rather unfortunate, missing one in his first round of the second hundred, four in the second, five in the third and two in the fourth, making a total of twelve missed in his second hundred, with a total of 179 out of 200.

Brewer shot with a Westey Richard 12-gauge gun, weighing 7lbs. 14oz., using U. M. C. trap shells, 4drs. E. C. Schultze powder, 1¼oz. of shot. Morris had an E. C. Higham 10-gauge gun, weighing 9lbs., Kynoch & Eley shells, 5½drs. E. C. Schultze powder, 1¼ oz. of shot. The scores:

## Keystone Shooting League.

FRANFORD, Pa., Sept 13.—*Editor Forest and Stream:* After a careful perusal of the article in the FOREST AND STREAM of the 10th, in relation to the protest by the Harrisburg Association, I am impelled to say, in behalf of the Keystone Shooting League, that the roster of the club sent to Secretary Worden, on March 22 last, was full and complete, up to that date, Messrs. Tredway and David becoming members of the organization at a later date, as the appended affidavit will show. As to the rule, on page 16, quoted by Mr. Worden—that the State Association be notified of the name and admission of each new member—we absolutely knew nothing of, the Pennsylvania State Sportsmen's Association books not coming to hand until Aug. 1.

Having no desire to go into the merits of the controversy, as it was not of our seeking, and well content to leave the matter in the just and able hands of the FOREST AND STREAM and other papers named, I submit this affidavit, showing conclusively where the protestors' argument must fall.

This is to certify that the parties hereinafter mentioned were elected members of the Keystone Shooting League (formerly the North End Gun Club), upon the dates inscribed. Mr. T. J. Tredway, April 4, 1892; Mr. H. L. David, May 4 1892.

JNO. C. SHALLCROSS, Sec'y.

STATE OF PENNSYLVANIA,
CITY AND COUNTY OF PHILADELPHIA, } ss.

John C. Shallcross above named being duly sworn deposes and says that the facts set forth in the foregoing certificate are true.

Sworn to and subscribed before me this 14th day of September, 1892. Joshua R. Morgan, Notary Public.

JNO. C. SHALLCROSS.

## Harrisburg Every Other Saturday.

HARRISBURG, Pa., Sept. 17.—Quite a lively shoot was held here to-day. Although more entries were expected, enough showed up to make it interesting and it was decided to hold one of similar kind each alternate Saturday. Messrs. Abercrombie and Runk, of Williamsport, with Heppenshell, of Steelton and Corcoran, of York, were the visitors; balance of the entries were local shots. The birds were better than expected, as Messrs. Worden Bros., who are making a business of supplying pigeons for trap-shooting, gave the committee the privilege of catching and selecting their own pigeons, as they had over 1,500 in their lofts at the time the committee succeeded in getting some rather hot ones. The weather was perfect and no wind. Appended are the scores. First money went to Brewster, $103.12, second, $61.80, to Brelsford and third divided. Sweepstake, 25 birds, $25 entrance, three moneys:

| | |
|---|---|

A. C. COLLINS.

## Long Island Sportsman's Club.

ONLY four members of the Long Island Sportsman's Club were present at the regular monthly shoot at Dexter Park, on Monday, Sept. 12. C. Stuetzle again won the medal, with a score of 9 out of 10. The scores:

| | | | |
|---|---|---|---|
| C Gentzlinger | 1010010101—5 | C Fleigel | 0001000011—3 |
| C Stuetzle | 1011111111—9 | C Hofer | 0000000010—1 |

## New York German Gun Club.

TWENTY-ONE members of the New York German Gun Club were present at Dexter Park, L. I., on Thursday, Sept. 12, it being one of the usual outings of the club, who have a full day's sport. Each man shot at eight birds, club handicaps, modified Long Island rules, H. & T. traps, ffr the two club medals. J. Schlicht won the first and E. Widman the second. The team shoot was not fully shot out owing to darkness and dark birds. The scores:

Club shoot for two medals, two best scores, 8 birds:

| | | | |
|---|---|---|---|
| F Sauter | 11200121—6 | H Homford | 11120222—7 |
| P Garms, Sr | 00021011—4 | E Stradtman | 00010002—2 |
| A Busch | 11120102—6 | M Bonden | 01102002—4 |

## Parkway Gun Club.

THE members of the Parkway Gun Club did not turn out very strong on Wednesday, Sept. 14, at Dexter Park, L. I., for their regular monthly shoot for the best averages and class prizes. H. Bramwell and L. Moeller were the only two straight scorers, with 7 each. I. Short won the Class A prize, outshooting A. Botty. H. Bramwell won in Class B, and H. Selover that in Class C. Sweepstake shoots followed at 3 birds, then miss and out. The scores:

Class A.

| | | | |
|---|---|---|---|
| I Short | 2012121—6 | E Helgaus | 1110112—6 |
| A Botty | 2220111— 6 | F Rausch | 1112001—5 |
| A Andrews | 0111110—5 | J Bennett | 2102220—5 |

Class B:

| | | | |
|---|---|---|---|
| H Bramwell | 1122121—7 | L Moeller | 1111211—7 |
| W Strasser | 2122022— 6 | | |

Class C:

| | |
|---|---|
| H Selover | 2211110—6 |

Miss and out sweepstake, $1 entrance, 3 birds:

| | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| A Andrews | 111 | 12 | 102 | 0 | H Bramwell | 121 | 22 | 111 | 21 |
| W Strasser | 020 | 120 | 2 | | H Selover | 020 | | 122 | |
| A Botty | 121 | 20 | | | E Helgans | 111 | 20 | 022 | 122 12 |

## Oneida County Sportsmen's Association.

UTICA, N. Y., Sept. 16.—The regular Cleveland badge shoot today was rather lightly attended, although the weather conditions were good. Gates pulled out a straight score in the club contest. The score:

Badge shoot, 25 singles:

| | |
|---|---|
| Smith | 1111011110110111011000110—17 |
| Hunter | 1111111111111011111111—24 |
| Knowlton | 1111100011111011111111—22 |
| Wheeler | 1110011110101011111011111—19 |
| Mayhew | 1111111101111111111111111—24 |

On shoot-off Hunter won by 4 breaks to Mayhew's 3.

Club shoot, same as above:

## Wilmington Tournament.

WILMINGTON, Del., Sept. 15.—The Wilmington Rod and Gun Club have concluded to adopt the suggestion given by the FOREST AND STREAM in regard to the team shooting at their tournament in October. We will make our shoot a three-day event, making the dates 12, 13 and 14. The second day (Thursday) we will have for team shooting, under the following conditions: The shoot will be open to teams of six men each, and a purse of $75 guaranteed to winning team; each man will shoot at 25 targets; no entrance fee will be charged; they will simply pay for the targets at the same rate as other events, 3 cents; each shooter must be a resident of the State he represents; no shooter can shoot in more than one team; each State or club can enter as many teams as they choose. All events will be at bluerock targets, rapid-firing system. All communications will be promptly answered if addressed to J. K. WOODWARD, Secretary, 107 East Eighth street, Wilmington, Del.

## Northside Gun Club.

THE regular monthly shoot of the Northside Gun Club was held on Tuesday, Sept. 13, at the Queens County Driving Park, Maspeth, L. I. The attendance was not as large as usual, but the fast birds, aided by a strong northeast gale, made some of the scores rather small. The contest was for the best averages during the season, but the monthly medal was won by M. C. Manning with a straight score of 7. All of the sweepstakes were $1 entrance, miss and out. The scores:

| | | | |
|---|---|---|---|
| Cord Meyer | 2001011—4 | A Meyer | 1110200—4 |
| A Duryea | 1111001—5 | W R Smith | 0022022—4 |
| J Tiernan | 0211121—6 | J Mencke | 0011010—3 |
| M C Manning | 1111121—7 | H Skelton | 0001020—2 |

Sweepstakes shoots, $1 entrance, miss and out:

| | | | | | | |
|---|---|---|---|---|---|---|
| J Tiernan | 110 | 2121122220 | 2 | 10 | 22220 | |

| J Mencke | 0 | | | | | |

## Coney Island Rod and Gun Club.

ONE of the best shoots of the season by the members of the Coney Island Rod and Gun Club took place on Wednesday at the Woodlawn Park grounds, Gravesend, L. I. Twenty-six members competed for the Eppig diamond badge and extra prizes. Some big scores were made, D. Van Zile winning the trophy with a straight score of 21. C. Engelbrecht won the second prize with 16 out of 17, L. Eppig the third with 13 out of 15. The fourth was divided. The veteran rifle shot R. Rathbone took the fifth. The scores:

| | | | |
|---|---|---|---|
| C Engelbrecht | 1121101221— 9 | J E Orr | 1112112121—10 |
| L Eppig | 1011202111— 8 | H P Donnelly | 1000000010— 2 |
| W Lair | 1011111222— 9 | R Rathbone | 0020221012— 6 |
| W Green | 0000200010— 2 | Dr Little | 1102220121— 8 |
| H W Blattmacher | 1101111110— 8 | Dr Van Zile | 2122112121—10 |
| A Eppig | 1211211121—10 | C Plate | 2212211111—10 |
| J Schlieman | 0112001220— 6 | E H Garrison | 0202222220— 7 |
| F McLaughlin | 0001000220— 3 | M Elsasasser | 1102220111— 8 |
| A Rockfeller | 1110111001— 7 | C L Meyer | 1021211111— 9 |

| T Buckley | 1010202012— 6 | E Bushnell | 1010012011— 6 |
| W Scheelye | 0021221120— 7 | F Ibert | 1112111111—10 |

Referee, H. McLaughlin. Scorer, J. C. DeFrain.

## Falcon Gun Club.

SEVEN members of the Falcon Gun Club shot at 10 birds each for the club medal at Dexter Park, L. I., on Thursday, under old Long Island rules, a bird killed with second barrel to count a half bird. As the grounds were occupied by the New York German Gun Club for the same day, only the club shoot took place during the dinner interval, G. Moeller won the medal, killing 7 out of 10. The scores:

| | | | |
|---|---|---|---|
| J Bohling | 2200111021—7—5½ | H Van Staden | 1011020011—6—5½ |
| J Moeller | 1000012101—5—4½ | J Vagts | 1010010121—6—5½ |
| C Doscher | 1101100100—5—5 | G Moeller | 1110121100—7—6½ |
| H Moeller | 0222111001—7—5½ | | |

## The St. Paul Tournament.

ST. PAUL, Minn., Sept. 6.—The fifteenth annual tournament of the St. Paul Gun Club commenced this morning. The tournament was held on the State fair grounds. Bluerock targets and traps with North's electric pull were used, and as usual were a success. The shooting was done from five traps, walk-around-system. The office work was under the management of B. F. Schurmeier, secretary and R. S. Kennedy, treasurer, and the black board was handled by an artist whose name I have forgotten, but can honestly say was the best man for the position I have ever seen. In fact every detail was carefully looked after and ably managed.

The weather to-day was cloudy and some rain fell in the afternoon. The State fair was in full blast and the crowd of spectators, among whom were many ladies who took a great interest in the snooting. Among the shooters present were: Catamaran, St. Paul; Elliott, Kansas City, Mo.; Budd, Des Moines, Iowa; J. H. Black, St. Peter, Minn.; Daly, St. Paul; Stearns, St. Paul; Thorne, Minneapolis; Lee Forgo, North Dakota; Marshall, Minneapolis; Wilson, St. Cloud, Minn.; Stakes, Minneapolis; Leonard, St. Claud, Minn.; Hamline and Forbes, St. Paul; N. W. Galt, Manchester, Mich.; Jones Atwater, Minn.; Reed, St. Paul; Murphy, Minneapolis; Halt, Baldwin, Sr., Burke, Bonte, Park and Baldwin, Jr., St. Paul; Barnes, Stillwater, Minn.; Alleson, Anaka, Minn.; Thomas, Glenco, Minn.; Latshaw, St. Louis, Mo.; Frazer, Fairmont, Minn.; Morgan, St. Peter; E. J. Harrison, Minneapolis. The scores follow:

No. 1, 10 singles: Hamline 9, Baldwin, Sr. 7, Daley 8, Lee 9, Leonard 7, Wilson 7, McHale 10, Baldwin, Jr. 10, Catamaran 10, Stokes 8, Jones 10, Thorne 9, Jack 8, Durant 8, Marshall 10, Kennedy 8, Bonti 8, Paulson 8, Budd 8, George 6, Holt 9, Burke 9, Norotney 9, Forbes 9, Reed 9, Frayire 8, Thomas 8, Kilby 9.

No. 2, 10 singles and 3 pairs: Lee 13, Marshall 14, Hamline 15, Baldwin 11, Burke 15, McHale 13, Wilson 15, Jones 14, Baldwin, Jr. 10, Leonard 13, Fraser 11, Jack 12, Bonti 10, Kennedy 10, Kilby 14, Budd 13, Norotney 10, Forbes 14, George 8, Thomas 15, Elliott 13, Catamaran 15, Durant 13, Thorne 12, Reed 11, Stokes 16, Daley 12, Holt 13, Paulson 8.

No. 3, 20 singles: Wilson 16, Elliott 20, Marshall 17, Leonard 19, Hamline 19, Lee 14, Fraser 18, Baldwin, Sr. 13, Stokes 17, Daley 17, Forbes 15, Thorne 19, Baldwin, Jr. 12, Bonti 14, Thomas 19, Budd 18, McHale 17, Catamaran 20, Norotney 13, George 11, Jones 18, Burke 18, Reed 19, Jack 14, Holt 13, Durant 13, Latshaw 17.

No 4, 10 singles and 3 pairs: Stokes 15, Frazier 11, Daley 15, Hamline 11, Elliott 12, Wilson 11, Leonard 14, Marshall 13, Lee 9, Baldwin, Jr. 12, Catamaran 13, Jones 14 Reed 11, Budd 10, Thomas 8, Thorne 8, Baldwin, Sr. 11, Forbes 12, McHale 14, George 10, Burk 11, Jack 12 Latshaw 13, Durant 10, Bonti 13, Norotney 12, Harrison 10, Holt 9, Kilby 9.

No. 5, 15 singles: Hamline 14, Daley 11, Forbes 10, Burke 12, Wilson 11, Frasire 14, Baldwin, 10, Stokes 14, Marshall 13: Thorne 12, Jones 14, Catamaran 12, Leonard 12, Harrison 12, McHale 15, Thomas 10, Baldwin, Sr. 14, Durant 4, Jack 12, Lee 11, Latshaw 12, Budd 15, George 9, Elliott 12, Bonti 9, Norotney 8, Reed 11, Paulson 6, Holt 12.

No. 6, 10 singles: Wilson 7, Catamaran 9, Reed 7, Thorne 6, Daley 6 Stokes 9, Hamline 8, Bonti 7, Thomas 3, Leonard 7, Frasir 9, Jack 9, Forbef 6, Marshall 7, Budd 10, Jones 10, Burke 7, Baldwin, Jr. 7, Durant 8, Harrison 9, Rogers 3, Elliott 7, McHale 8, Baldwin, Sr. 5 Lee 8, Latshaw 8, Holt 7.

*The Second Day.*—The entries to-day averaged about the same as yesterday. The weather was cloudy with a strong wind from right to left across the traps, making the shooting somewhat more difficult than yesterday. To-day is "St. Paul day" at the fair, and about fifty thousand people are on the grounds. The most interesting part of to-day's programme was the contest for the Chamber of Commerce diamond badge for the individual championship of the State, open to shooters from Minnesota only. 26 singles and 12 pairs. Mr. Burkhart, of St. Paul, won the badge with a score of 44 out of a possible 50, using a 10-bore L. C. Smith gun. About 2,000 people witnessed this contest, which was very close and exciting, Mr. Burkhart having to score his last three pair to win. He was heartily congratulated by his many friends.

No. 7, 10 singles: Catamaran 10, Baldwin, Jr., 9. Elliott 8, Thomas 5, Budd 8, McHale 8, Thorne 7, Lee 7, Marshall 6. Leonard 7, Wilson 6, Stokes 7, Daly 7, Hamline 8. Jones 9, Reed 6, Durant 7, Jack 8, Forbes 7, Stevens 4. Olson 8, Bonti 6 Barnes 6, Holt 7, Burke 9. Demille 5, Baldwin, Sr., 2. Frasier 7, Harrison 8.

No. 8, 15 singles: Baldwin, Jr., 13, Burke 13, Catamaran 14, Frasier 12, Jones 14 Forbes 14, Thorne 13, Lee 13, Marshall 11, Leonard 12, Wilson 13, Stokes 13. Elliott 13. Budd 12, McHale 10, Hamline 13, Olson 8, Harrison 13, Barnes 10, Baldwin, Sr., 3, Jack 13, Stevens 11, Reed 12, Bonti 8, Thomas 10, George 10, Reed 12, Murphy 9, Daly 13.

No. 9, 10 singles and 3 pairs: Catamaran 13, Elliott 13, Budd 14, McHale 12, Daly 14. Hamline 13, Thorne 11, Lee 7, Marshall 9, Leonard 12, Morgan 11, Wilson 14, Stokes 14, Forbes 12, Jack 13, Jones 14, Frazier 12, Reed 12, Murphy 14, Baldwin, Jr., Holt 12, Burke 14, Bonti 10, Barnes 13, Stevens 11, Harrison 6, Olson 9, Baldwin, Sr., 6, Holmes 9, Thomas 12, George 7.

No. 10, 20 singles: Catamaran 18, Elliott 18, Budd 16, McHale 17, Daley 17, Stevens 16, Thorne 16, Lee 14, Marshall 16, Wilson 19, Stokes 18, Leonard 16, Hamline 17, Forbes 13, Jack 15, Jones 17, Reed 19, Murphy 18, Holt 17, Baldwin, Sr., 9, Burke 17. Bonti 10, Barnes 14, Olson 15, Baldwin, Jr., 18, Park 15, Thomas 16, Latshaw 19, Frasier 17, Morgan 10.

No. 11. 10 singles: Elliott 10, Catamaran 10. Budd 9. McHale 10, Forbes 7, Jack 7. Thorne 7. Lee 8, Marshall 8, Leonard 8, Harrison 7, Wilson 9, Stokes 9. Daly 9. Hamline 9. Jones 10, Murphy 10, Latshaw 7, Frasier 9. Baldwin, Jr., 9, Holt 8. J. C. Kennedy 6, Burke 8, Bonti 7, Olson 10, Barnes 5, Baldwin, Sr., 6, Thomas 9, Reed 8, Fox 8, Brady 5, Durant 7, M. F. Kennedy 8,

Burkhard wins badge.

*The Third Day.*—The attendance was not so large as yesterday, but was large enough to keep up a good interest in the scores. The weather was cool and cloudy, with a strong wind to help the targets along. The best shooting of the tournament was done today, as each contestant was anxious to place himself high up in the average list. There were twenty-three average prizes given by the club, but only twenty contestants shot in every regular contest. There were two ties for sixth average and two for fifteenth, consequently only eight of the averages were awarded. The management decided to have an extra sweep and add the remaining five average prizes, and a number of entries were made, but a heavy rain set in with prospects to continue until dark, and the event was declared off. Guns were cleaned and good-byes said, and all went home well pleased with the St. Paul Gun Club tournament.

No 12, 15 singles: Catamaran 15, Stokes 13, Maichall 13, Elliott 15, Jones 14, Leonard 12, Wilson 11, McHale 14, Jack 14, Thorne 12, Harrison 14, Reed 14, Holt 14, Forbes 12, Murphy 12, Budd 14, Hamline 15, Frasier 13, Daly 13, Baldwin, Jr., 14, Baldwin, Sr., 9, Burke 15, Thomas 11.

No. 13, 10 singles and 3 pairs: Catamaran 14, Stokes 14, Marshall 12, Elliott 12, Jones 15, Leonard 14, Wilson 12, McHale 13, Jack 13, Reed 13, Forbes 12, Thomas 13 Hamline 15, Thorne 14, Daly 12, Murphy 15. Budd 13, Harrison 15, Baldwin, Jr., 14, Bonte 10, Holt 11, Frasier 13, Burke 16.

No. 14, 20 singles: Catamaran 18, Stokes 19, Daly 20, Marshall 17, Elliott 20, Jones 20, Leonard 20, Wilson 18, McHale 19, Jack 18, Reed 19, Forbes 13, Harrison 20, Murphy 20, Hamline 19, Budd 20, Thomas 14, Thorne 18, Baldwin, Jr., 26, Burke 18, Bonte 14, Holt 19, Frasier 16.

No. 15, 10 singles and 3 pairs: Stokes 13, Catamaran 13, Marshall 14, Elliott 14, Jones 11, Leonard 15, Wilson 12, McHale 14, Jack 13, Reed 13, Forbes 10, Murphy 14, Thorne 11, Hamline 12, Daly 12, Thomas 10, Frasire 9, Budd 15, Baldwin, Jr., 9, Bonti 9, Holt 14, Burke 12.

No. 16, 15 singles: Catamaran 13, Stokes 14, Marshall 14, Elliott 15, Jones 15, Leonard 13, Wilson 14, Holt 12, McHale 15, Jack 9, Reed 11, Forbes 10, Thorne 13, Murphy 12. Thomas 11. Daly 13, Hamline 13, Budd 15, Allen 6, Baldwin, Jr. 13, Burke 15 Bonti 12.

No. 17, 10 singles: Jones 9, Bonti 6, Hamline 10, Stokes 9, Holt 9, Thorne 9, McHale 10, Harrison 6, Reed 7, Budd 8, Leonard 8, Burke 8, Wilson 7, Marshall 9, Baldwin, Jack 6. Forbes 6, Thomas 10, Daly 9, Murphy 10, Elliott 8, Allen 9, Catamaran 9.

General averages, out of 250 birds shot at: Jones broke 228, first prize; Catamaran 223, second; Stokes 222, third; Hamline 220, fourth; McHale 219, fifth; Budd and Burke 218, sixth; Elliott 217, seventh; Leonard 212, eighth; Daly 210, ninth; Marshall 203, tenth; Reed 202, eleventh; Wilson 199, twelfth; Thorne 198, thirteenth; Baldwin, Jr., 197, fourteenth; Jack and Holt 196, fifteenth; Forbes 185, sixteenth; Thomas 184, seventeenth; Bonti 163, eighteenth.

## Tournament at Frankfort.

FRANKFORT, N. Y., Sept. 6.—The Labor Day shoot of the Frankfort Fish and Game Protective Association was attended by a large number of shooters from Syracuse, Cazenovid, Rome, Clinton, Marcy, Utica, Johnstown, Canajoharie, Coeymans, Deerfield, Ilion, Amsterdam, Waterville and Little Falls, and the association was in the heyday of glory over its success. Below are the results of the day's shooting:

No. 1, 10 kingbirds, entrance $1: Gates 10, Harris 8, Hunter 8, Knowlton 10, Kilburn 9, Mayhew 10, Wessells 6. Clark 10, Dexter 9, Crane 9, Partiss 8, Steele 7, Manuing 0, Short 7, Hix 9, Crutty 8, Nipe 6, Skeele 7. Rich 7, E. Steele 6, Dolby 10

No. 2, 10 kingbirds, entrance $1: Gates 10, Harris 8, Hunter 9, Knowlton 9. Kilbourn 10, Mayhew 9, Wessells 9, Walrath 9, Clark 7. Dexter 5, Crane 7, Partiss 8, Felton 8, Clow 9, Salsbery 10. Betson 10, Frier 10, Smyth 9, Short 6, Hix 9, Crutty 10, Skeele 8, Dalby 9, Northrup 10.

No. 3, 15 kingbirds, entrance $1.65: Gates 13, Harris 15, Hunter 14, Knowlton 14, Kilbourn 13, Mayhew 15, Wessells 13, Walrath 14, Clark 12, Dexter 13, Crane 7, Partiss 8, Crosby 7, E. Steele 10, Felton 14, Betson 12, Smyth 10, Northrup 9; Fryer 11, Salsbury 15, Hix 12, Crutty 13, Short 9.

No. 4, 10 kingbirds, entrance $1.30: Gates 6, Harris 10, Hunter 9, Knowlton 9, Kilborn 10, Mayhew 10, Wessells 10, Walrath 10, Clark 10, Dexter 10, Crane 6, Partiss 9, Smyth 8, Felton 9, Betson 8, Northrup 10, Clow 10, Salsbury 9, Crutty 9. Fryer 8, Short 9, Skeel 8. Crosby 4, Ed Steele 8.

No 5, 15 kingbirds, entrance $1.75: Gates 13, Harris 14, Hunter 15, Knowlton 15, Kilborn 13 Mayhew 14, Wessells 12, Walrath 15, Clark 13, Smyth 14, Crane 11, Northrup 14, Hix 11. Felton 14. Betson 13, Short 9, Crutty 13, Ed Steele 8, Salsbury 12 Clow 13, Kallis 14, Skeel 13, Nipe 8, Waterbury 1.

No. 6, 5 live birds, entrance $2 50: Northrup 1, Gates 2, Clark 4. Walrath 2, Smyth 1, Wessells 0, Kilborn 4, Harris 4, Crutty 1. Hunter 4, Felton 3, Crane 3, Salsbury 4, Clow 3, Betson 1, Knowlton 4, Short 1. Rich 2, Tressent 2, Armstrong 2, Partiss 3, Mayhew 5, McGowen 3.

No. 8, 15 kingbirds, entrance $2.50: Smith 11, Clark 10, Hunter 12, Knowlton 14. Kilbourn 15, Mayhew 13. Wessells 9. Hartley 10, Hix 10, Ed Steele 11. Walrath 14, Crane 9. Crutty 12, Short 11, Salsbury 12, Clow 15, Walton 8, Harmon 13, Northrup 14, Crosby 9, Rich 10.

No. 9, 5 live birds, entrance $2 50: Hartly 1, Rich 2, Watson 1, Northrup 3, Short 1, Salsbury 1, Hunter 4, Kilbourn 3, Walrath 5, Crain 3, Clark 3. Smyth 4.

No. 10, 20 kingbirds entrance $2.60: Smyth 16, Clark 15, Hunter 19, Kilbourn 20, Knowlton 19. Mayhew 16, Kallis 16. Short 10, Walrath 16, Northrup 20, Salsbury 16, Clow 15, Herman 16, Rich 11, Crutty 13. Steele 13, Wessells 17, Partiss 16.

No. 12, 10 kingbirds, entrance $1.30: Smyth 7, Clark 5, Hunter 10, Kilbourn 8, Knowlton 10, Mayhew 9, Short 7, Walrath 6, Salsbury 7, Clow 9, Crutty 8, Steele 7, Wessels 10, Partiss 9, Cranes 6. Hartley 10. Wood 4, Lloyd 1, Dexter 8, C. Crosby 3, Dolby 7, Hicks 3, Crosby 9.

AVERAGE PRIZES.

The best average was strongly contested for, which was for the association badge, presented to them by Sec'y Rich, valued at $25, which Messrs. Kilbourn and Knowlton tied for at 95 per cent. In shooting the ties off Dr. J. G. Kilbourn, of Utica, won by one bird. Second best average, $6, div. between Hunter and Walrath, at 92 per cent. Third best average, $3, div. between Mayhew, Salsbury and Clow at 89 per cent. Fourth best average, $2, Northrup, won at 87 per cent. Poorest average, $1, caught Smyth, at 79 per cent. Second poorest average Clark, for one of F. A. Allen's duck calls, at 84 per cent.

Sept. 10, owing to lack of time on Labor Day to contest for the undivided merchandise prizes, it was decided by the association to postpone the contests until to-day. The following is the result at 10 kingbirds, entrance $1.50 in each four events:

## The Beaver Falls Tournament.

BEAVER FALLS, Pa., Sept. 6.—I send you scores of the fourth sweepstake shoot of the Beaver Falls Sportsmen's Association, held on their grounds, Geneva Park, Sept. 5. Despite the weather, which was about as bad as it could be, as it commenced raining about 6 in the morning and poured down until 9, when it settled down to a mist, interspered with showers the rest of the day, twenty good and worthy fellows faced the storm and arrived on the grounds about 10 o'clock, when shooting was started from a set of bluerock traps (five in number), A. S. A. rules, at bluerocks. A number of well-known trap shots from a distance were present, among them being J. K. Myler and Ed Hunn, from Beaver; Wm. Foutz and I. N. Crabel, East Liverpool, O.; who are a quartette hard to beat, who come to stay all day and take everything as it comes, and when you hear one of them kick you can bet there is something wrong; they do not want the earth and a fence around it Also Geo. Cochran, of Pittsburgh; Ross, of Homestead; Dr. McCoy, Dr. Albaugh and B. Geisinger, of Steubenville, O.; H. C. Fry, of Youngstown, O.; James Rummell and Cramer, of Niles, O. Everything passed on as pleasantly as could be. The shooting was kept up until late in the afternoon, when it just poured down rain, and we adjourned to the hotel, which was within one square of the grounds, to talk over matters and explain why we did not break them all. Some good scores were made, considering. The purses were div. into four moneys, 40, 30, 20 and 10 per cent. The scores were as follows:

No. 1, 10 birds, 50 cents: H. C. Fry 5, McCready 5, J. Rummell 7, W. M. Foutz 7, Geo. Cochran 4, B. E. Surls 8, F. Cramer 7, J. A. Penn 7, I. N. Crabel 10. B. Geisinger 5, Ed Hum 8, Jos. E. Close 3, Dr. McCoy 7, J. C. Royl 5, H. W. Nair 8, Chas. Garvin 4.

No. 2, 10 bluerocks, 75 cents: Foutz 6, Fry 5, Geisinger 8, Penn 9, Crabel 8, Rummell 6, McCready 9, McCoy 9, Cochran 4, Myler 8, Royl 3, Hum 4, Wilkinson 9, Albaugh 7, Cramer 6, Surls 7, Nair 8.

No. 3, 10 bluerocks, $1: Foutz 10, McCready 6, Crabel 10, Penn 7, Fry 8, Geisinger 6, McCoy 9, Royl 8, Cochran 7, Albaugh 8, Rummell 6, Myler 8, Hum 6, Close 5, Wilkinson 8, Surls 7, Cramer 5, Nair 5.

No. 4, 15 bluerocks, $1.50: D. R. Wilkinson 15, B. E. Surls 9, I. N. Crabel 12, J. A. Penn 14, J. McCready 5, B. Geisinger 7, Geo. Cochran 12, Dr. McCoy 7, Wm. Foutz 13 J. E. Close 3, J. Rummell 7, J. Myler 12, H. C. Fry 9, H. W. Nair 13, Cramer 10, Albaugh 7, Rayl 7. Ed Hum 9.

No. 5, 10 bluerocks, $1: Fautz 8, Cochran 8, McCready 4, Penn 8, Wilkinson 8, McCoy 8, Hum 8, Rayl 10, Rummell 8, Myler 7, Cramer 7, Surls 6, Fry 7, Class 9, Crabel 3, Nair 0.

No. 8, 10 bluerocks, $1: Surls 6, Wilkinson 8, Braden 5, Foutz 9, Penn 10, Hum 4, Myler 8, Close 5, Cochran 6, Ross 6, Nair 7, Crabel 9, Rayl 3.

No. 9, 10 bluerocks, $1: Cochran 7, Ross 9, Wilkinson 10, Fautz 8, Surls 7, Broden 6, Myler 5, Rayl 3, Crabel 8, Close 8, Nair 5.

No. 6, 20 bluerocks, $2: Surls 17 Wilkinson 17, Crobel 18, Penn 15. Foutz 15, Braden 12, McCoy 19 Rummell 13, Nair 13, Close 14, Hum 12, Myler 17, Cochran 15, Fry 14, Royl 7.

No. 7, 10 bluerocks, $1: Foutz 6, Cochran 7, Braden 5, Penn 9, Surls 8, Hum 6, Close 6, Wilkinson 8, Royl 6, Myler 6, Ross 8, Nair 7, Crobel 8.

No. 10, 10 bluerocks, $1: Cochran 7, Ross 9, Wilkinson 10. Penn 9, Foutz 8, Surls 7, Braden 6, Myler 5, Royl 3, Crobel 8, Close 8, Nair 5.

No. 11. 10 bluerocks, $1: Foutz 7, Wilkinson 9. Myler 8, Braden 7, Wolf 7, Penn 10, Crobel 6, Surls 7, Ross 8, Royl 9, Nair 10, Cochran 8, Rummel 7, Ross 6, Hum 7.

## Labor Day at Muncie.

MUNCIE, Ind., Sept. 8.—I mail you herewith scores of the fourth annual fall shoot of the Muncie Gun Club. Labor Day being celebrated at this place in the elaborate manner, it has very likely cut our entries down some, races of different kinds at the fair grounds being a strong element against us. We were favored with a fair attendance from abroad, however, many old friends and some new. New Castle, Md., was represented by Messrs. Tom Gough, V. Mendenhall, M. Phares, Landers, Stilly, Stout and Modlin. Union City by the same old Chas. Proctor—he of the whiskers, tan jacket and pointer dogs; C. A. Young, from Springfield, O.; Messrs. Lockwood, Grube and Orem, from Southport, Ind., and our steadfast friend, Dr. O. E. Britton, Indianapolis. Sidney, O., was represented by Messrs. John Berkshire and his noisy partner Johnson. Half a cent was deducted from the price of each target thrown, the same being divided into three average moneys for those making first and second and the one making the poorest average in matches 3, 4, 6, 7 and 9. Bender, of the local shooters, captured first, Grube second, and Tom Gough the "consolation" end. Below are the scores:

No. 1, 10 singles: G. Ketner 10, Partington 10. Lockwood 8. Modlin 5, Stout 6, Mendenhall 9, Grube 7, Landwer 8, Orme 5, Williamson 5, Garringer 6, Tom Gough 5, Bender 7, Phares 8, Graham 4, Davis 6, Stilly 10.

No. 2, same: Ketner 7. Partington 8, Davis 8, Williamson 6, Lockwood 5, Mendenhall 9, Phares 6, Modlin 8, Stout 2, Garringer 4, Orme 9, Graham 8, T Gough 6, Grube 7, Stilly 10, Bender 8.

No. 3, 15 singles: Williamson 13, Lockwood 13 H. Gough 7, Ketner 11, Bender 12. Mendenhall 8, Phares 8, Modlin 5, Partington 11, Stout 7, Orme 8, Davis 13, T. Gough 9, Garringer 12, Grube 11, W. Garringer 12, Stilly 12.

No. 4, 25 singles: Phares 23, Williamson 19, Lockwood 20, Partington 22, Stilly 19, Grube 20, Mendenhall 23, G. Ketner 22, Davis 20, T. Gough 20, U. Garringer 17, Johnson 17, Young 24, Berkshire 14. Proctor 20, W. Garringer 15, Bender 23.

No. 5, teams of two men, 15 targets per man:

No. 6: Partington 8, Proctor 6, Mendenhall 9, Bender 9, Landwer 10, Truitt 6, Lockwood 5, F. Williamson 10, Orme 7, Graham 7, Stout 7, T. Gough 0, Grube 9, Johnson 5, G. Williamson 8, Davis 6, Dolman 8, E. Gough 8, Stilly 9, Modlin 6, Phares 8, Young 8, Higdon 7.

No. 7, 10 singles: Partington 9, Mendenhall 8, Williamson 6, Lockwood 4, Orme 9, Landwer 6, Phares 8, Johnson 5, Modlin 3, Proctor 5, Bender 8, Stilly 8, Grube 10, Stout 6, Gough 7, Berkshire 6, F. Williamson 6. U. Garringer 5, Young 7.

No. 8, 20 singles: G. Williamson 16. Partington 13, Johnston 16, Lockwood 12, Grube 19, Orme 14, Mendenhall 18, Bender 15. T. Gough 10. Proctor 17, Phares 16, Stilly 19, Young 15.

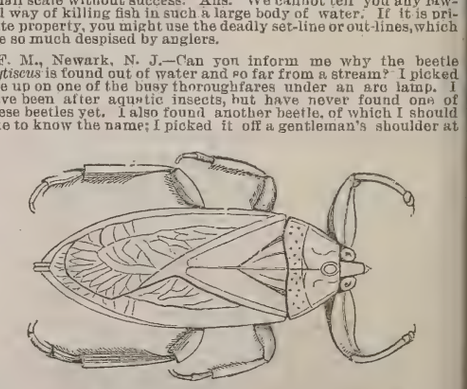
No. 9, 10 singles: Bender 8. Phares 5, Partington 8, Lockwood 7, Grube 9, T. Gough 5, Mendenhall 9, Orme 6. Graham 5, Williamson 5, Stilly 7, Landwer 4, Stout 4, H. Gough 6, Truitt 4, E. Gough 4.

No. 10, 10 singles: Lockwood 7, T. Gough 7, Phares 9, Partington 10, Andrews 6, Grube 7, Williamson 10, Bender 9, Stout 4, Stilly 8, Orme 10, H. Gough 3.

## Auburn Gun Club.

AUBURN, N. Y., Aug. 31.—Below find scores of our last contest for badge: Class A: Tuttle 18, Carr 18. Devitt 8. Tie postponed. Class B: Garrett 18, Vanderloo 16, Sinclair 12, Doun 10. Class C: Goodrich 14, Kerr 11, White 11.

# Answers to Correspondents.



☞ **No Notice Taken of Anonymous Correspondents.**

C. M. F., Buffalo.—Please inform me if the book entitled "Camp Life in the Woods" and the "Complete American Trapper" are two different books? Ans. The same book, by W. Hamilton Gibson.

F. W., New York City.—Not knowing much about the section of the country where game may be found, I take the liberty of writing to you for the required information. We would not care to go more than a radius of 50 miles from the city. If you will furnish the above information you will confer a great favor on a number of friends of your valuable paper. Ans. Try some of the Sullivan county stations of the New York, Ontario & Western Railroad for quail and ruffed grouse.

O. W. E., Fort Scott, Kan.—Can you tell us how to kill all the fish in a lake from 5ft. to 20ft. deep, 200ft. wide by one mile long, without injuring them for market? Will weigh from 5 to 20lbs., and some have been caught that weighed 60lbs. The large ones are eating the small ones. Have you had any experience in using fresh lime? We are told it will kill them, but have tried it on a small scale without success. Ans. We cannot tell you any lawful way of killing fish in such a large body of water. If it is private property, you might use the deadly set-line or out-lines, which are so much despised by anglers.

F. M., Newark, N. J.—Can you inform me why the beetle *Dytiscus* is found out of water and so far from a stream? I picked one up on one of the busy thoroughfares under an arc lamp. I have been after aquatic insects, but have never found one of these beetles yet. I also found another beetle, of which I should like to know the name; I picked it off a gentleman's shoulder at

night. I have sent the exact size. Ans. It is probable that the water beetles spend more time in flight than many collectors suppose. The one above referred to is a strong flyer. One great incentive to flight is the sexual passion. The second beetle, of which sketch was sent, is really a water bug (*Belostoma*). The species may be *B. americana* or *B. grisea*, both of which inhabit the Atlantic States of North America. A South American species, *B. grandis*, grows to the length of 4in. The *Dytiscus* is predaceous; its color is dark olive-green above, the chest and wing-cases often margined with yellow. The wing-cases in the male are smooth, in the female usually furrowed. *Belostoma* is a heteropterous insect. It is large, flat-bodied, aquatic, with powerful swimming legs, and curved fore tibiæ. It preys upon fish and other water animals. Trout measuring 5in. have been killed by this insect. We reprint from a back number an excellent drawing of a *Belostoma*.

331-333 BOWERY, BET. 2d & 3d STREETS.

NEW YORK, July, 1892.

Our "ONDINA" all Havana tobacco NEW YORK made cigar, our world-renowned "MEPHISTO" and all other finer grades of cigars made by us are superior in many ways to those made in the tropics. In addition to all the tobacco markets of the earth to which we have access, New York City always commands the best of every material as well as labor. OUR New York factory is a perfectly ventilated, clean abode. No sort of uncleanliness is permitted, and our cigars, therefore, are not liable to contain matters other than tobacco, and smokers may confidently and safely use our cigars, not needing a mouth-piece or a cigar holder to prevent unpleasant consequences. To protect consumers from imposition, every "MEPHISTO" cigar is banded.

*ILLUSTRATED SUPPLEMENT.*

THE first one of the series of four illustrations of American wild animals, that of the Panther, was given as a supplement with our issue of Sept. 8. The second one, the Ocelot, will be given as a supplement next week, Oct. 6.

*AFTER SUPPER.*

THEY are certainly the most delightful hours of the day—those after supper. The preceding ten or twelve have very likely been hard ones. To breast steep mountain sides, to clamber up ledges, to wade through fields of snow, to creep across slide slopes, and all the time to face the fierce hurricanes that sweep over the mountains, is exhausting work. Or perhaps the men have been traveling through the timber, struggling with refractory pack animals, fighting their way through thick willows or alders, or chopping through down timber. If the trail has been especially bad, an animal or two may have rolled down the mountain side, and two packers have had to climb down to where it stopped, take off the pack, carry the bundles up to the trail, lead up the animal, repair damages and repack the load; or they have had to cut loose the packs from some horse or mule which has mired down, lift up and drag out the beast from its oozy bed, and then repack. These are some of the light labors indulged in by the traveler with a pack train in the mountains—exercises which tend always to keep his health good, his muscles strong, his appetite voracious, and his temper, while on the march, brittle to the very verge of breaking. They also tend to the use toward one's animals of language which is not commonly heard at church sociables.

After supper, however, the occurrences which during the day's march seemed so trying, no longer trouble the travelers. Stretched out about the cheerful camp-fire in easy, if ungraceful, attitudes, the men are at peace, even with the worst of the pack animals. Incidents which six hours before made them feel that they would enjoy cutting the throats of some of the wretched mules, seem now, by contrast with their present comfort, the best of jokes, and they laugh heartily at the recital of the mishaps of each unlucky man or beast. He must be a churl who can growl on a full stomach, with the immediate prospect before him of half a dozen pipes, followed by a good warm bed.

After supper has been cleared away and the dishes washed, there follows a season of the idleness born of supreme contentment. At first there is little talk, and as little motion, for no one is willing to do more than to reach into the fire for a coal with which to rekindle his pipe.

As digestion proceeds, however, energy begins to return. One man commences to write up his hasty notes for the day, another repairs a rent made in his clothing by some stout branch, which would neither bend nor break; a third proceeds to cobble his shoes, while each adds something to the general fund of entertainment by story, reminiscence, joke or allusion. Where the right people are associated in these after supper hours the conversation is often very entertaining, and if it could be taken down as spoken, would furnish many a chapter of absorbing interest to woodsman and naturalist.

The evenings of such travelers are not long. Those who have worked hard during the day need rest at night, and unless among the company there is some story teller of unusual powers, who can hold the attention of his audience, blankets are unrolled and beds made up within a couple of hours. Then, the last pipe lighted, the men stand up gathered close about the fading fire, and talk in low tones, and a little later their quiet, softly breathing forms lie about the smoking ashes.

*WOMAN IN THE FAR NORTH.*

TRAVEL in the far north has hitherto been attempted only by men, but the year 1892 has witnessed the breaking up of this monopoly. Early last summer Miss Elizabeth Taylor started from Winnipeg for the MacKenzie River delta, and from this expedition she has just returned. Miss Taylor is by nature a traveler and by education an artist and is greatly interested in natural history. She started on her trip alone, and made it alone successful to the end. She is the first woman explorer that has ever ventured in to the Polar regions on her own account, and with an amount of pluck and steadfastness that would have done credit to a strong man she has carried out her programme and completed her round trip to the far northern forts of the Hudson's Company.

Of the results of her trip we can as yet know only in a general way. This much may be said, however: Her sketch book is full of drawings, which are not only of great historical and topographical interest, but also of a very high order of artistic merit. In spite of great disadvantages and continual suffering from coarse food, incessant attacks of insects, ill health and sleeplessness induced by the perpetual daylight, she has averaged over a drawing per day.

Her sketches are only a small part of the results achieved by this indefatigable girl-Greely. Her diary is as full as her sketch book, and her notes on the different aspects of nature are full and of great value. They are moreover admirably corroborated and amplified by some hundreds of photographs taken by herself.

In addition to all this Miss Taylor has made a considerable collection of natural history specimens, and when her results are in shape for publication, an unusually interesting contribution to our list of works on the Great Lone Land will have been made.

*OUR AMATEUR PHOTOGRAPHS.*

NO recent new departure of the FOREST AND STREAM has been received with more favor than the amateur photography competition recently instituted. Our friends tell us that it was a happy thought thus to encourage camera work in this special field, and to offer to amateur photographers a welcome opportunity to share the pleasure of their achievements with others of the great fraternity of sportsmen. By calling into service the half-tone engraving process it has been found practicable to present on the printed page excellent reproductions of some of the photographs, and others will follow.

Now that so many are returning after the vacation of 1892, we hope to receive some of the camera trophies of the outing. The conditions of the competition have been printed on a slip which we shall be glad to send to any address on request.

*SNAP SHOTS.*

LAST spring, it will be recalled, State Game Protector Brown seized a large quantity of game unlawfully stored in the establishment of the New York Refrigerator Company. Recent developments have shown that the protector was given his information by certain dishonest employees of the Refrigerator Company, who had made away with some of the game in storage, and had prompted the seizure with the hope that, in the confusion which ensued, the stolen game would not be discovered. In this they were foiled, however, and the thieves were duly lodged behind the bars. An esteemed correspondent complains that our columns have made no mention of these later developments, presumably because they detract from the lustre of Protector Brown's achievements. Such a view may be taken, though we do not share it; nevertheless the incident is not without its instructive moral, which is that any employer who is conducting a clandestine business and is engaged in systematic evasion of one set of statutes cannot expect from his employees a very high moral standard nor respect for other statutes. And if his clerks occasionally make away with a batch of the illicit stock, that is precisely what might be anticipated.

Reference was made the other day to the questionable constitutionality of those laws which provide for the summary destruction of dogs on which taxes have not been paid. In Connecticut there is another statute relating to dogs which, if not unconstitutional, is very unreasonable and unjust. It provides that "all dogs found doing or attempting to do any mischief, when not under the care of any person, may be killed." In the Hartford *Courant* we find notice of the recent case of Simmonds vs. Holmes, which has been decided by the Supreme Court. The plaintiff's valuable dog was found by the defendant lying asleep upon a bed of young plants in his garden, and he shot him. The court held that what the dog was doing was "mischief" within the meaning of the statute, that the right to kill it was not affected by the consideration of its value as compared with the value of the property destroyed or injured, and that it did not affect the case that the dog was a registered one.

It may be worth while, because not uninstructive, to note one point in the case of Rev. Dr. Thomas and his unlawful deer, to which our Chicago staff correspondent has been giving deserved attention. The most serious menace of the Wisconsin deer supply Dr. Thomas finds to be in the killing by outsiders for shipment to market in other States, and he would favor a law restricting this. It happens that there is just such a statute, which declares it to be unlawful to kill deer for export from the State. If in spite of the statute deer are killed and venison is shipped from Wisconsin by the ton, this may be explained by the reasonable supposition that every market hunter in the business follows Dr. Thomas's own convenient device and reasons out to his own individual satisfaction and exculpation that the Wisconsin deer law does not mean what it says, or at least does not apply to him.

In a recent number of *Nature* Cyril Frampton asks for the origin of the idea that snakes sting. Froude, in "The English in Ireland," writes: "The clergy started as if stung by a snake." Archdeacon Farrar, in "Darkness and Dawn," uses the metaphor of snakes stinging. Sir Thomas Browne in "Vulgar Errors," says that snakes and vipers sting, etc., etc., is not easily to be justified. Thomas Lodge says that people called Sauveurs have St. Catherine's wheel in the palate of their mouths, and therefore can heal the sting of serpents. And Prov. 23: 32, declares of wine that "At the last it biteth like a serpent and stingeth like an adder." We should think that this was getting back pretty well toward the "origin of the idea."

What shall be done with the man who talks politics in camp? Of all woods pests he is the one most aggravating, least deserving of tolerance, to whom no mercy should be shown. Taking into account the harassing nature of the nuisance, the extent of the victim's suffering, the remoteness from society and law, the immunity from interference by peace officers, the extreme improbability that one would ever be called to account for taking the law into one's own hands and executing summary vengeance—under all these conditions, what special form of lynch law ought one to adopt?

The Vermont Fish and Game League is manifestly planning a campaign in the next Legislature looking to fish protection and propagation. Secretary John W. Titcomb has sent out from Rutland a note of inquiry asking the members of the next Legislature these questions: "Are you or the residents of your town interested in the preservation and propagation of fish for restocking the public waters of the State? Are you interested in the enactment of good laws for the protection of fish and game? Will you lend your influence in the Legislature to a furtherance of the above subjects?

Because of the Columbus celebration on Oct. 13, the date set for the meeting of the executive committee of the New York State Association for the Protection of Fish and Game, it has been deemed advisable to postpone that meeting. It is probable that it will go over until after election. The date selected will be announced in our game columns next week.

## CAMPS OF THE KINGFISHERS.—XII.

### CARP LAKE, MICHIGAN.

#### The Carp Lake Camp.

[Continued from Page 179.]

WE anchored the boat near the edge of the rush line and filled the bucket with good big shiners, which we caught with hook and line, some of them within a foot or less of the mouth of the trap. They bit greedily at a scrap of worm on the hook, but a broken up cracker in a glass case didn't appear to remind them of anything, or they were too smart to go in the trap, and we have never found out which to give them credit for, stupidity or smartness.

We pulled across to camp in an ugly cross sea, rolling down the lake, and sunk the bucket of minnows three or four rods from shore in four or five feet of water with a float tied to the end of the line attached to the bucket bale, this for a buoy by which we could readily find it when wanted; and after lifting the ironclad out on the sandy beach we climbed the bank with the "big trout" and walked in under the fly where the rest of the boys were enjoying an afternoon lunch.

From some cause—probably a violent case of cramps brought on by the hook in his bowels or the change from the cold water of the brook to the warmer water of the lake—"old Hickory's trout," as the boys had got to calling him, was dead, and stiff as a smoked herrin', and when laid on the table with his tail curled something in the shape of a spoon-oar blade each one felt called on to make a few "amphibious remarks."

"Never see a mud turkle jest that shape afore; must be a new species," said old Sam solemnly; and Charley ventured that "the markings on him were somewhat different from those on any other dogfish he had ever seen," and the Colonel and the "professor"— but I won't try to chronicle the "roasting," as they say in baseball, that I got on account of that hapless trout; it is enough to say that should I ever see another big trout in a pool and take a special interest in its capture I'll say not a word about it to "a solitary soul on the face o' this livin airth" till I have "hived him" and brought him into camp—alive.

(Old Sam put "the last trout in the pool" in strong brine to keep and take home to show to some of his fellow fish cranks, who had never seen one of the tribe, but we learned afterward that the experiment was not a success. When he took it from the jar in which it was put to pickle he said he "couldn't tell whether it was 'Jeems Mackerel's trout' or a new specie o' stone roller."

The days came and slipped by into the past, each full of its pleasures and some disappointments, for the bass fishing was not as good as we wished and the wind was a continual strain on our patience, as it blew hard every day usually up or down the lake, making the water so rough that we rarely got a half day of comfortable fishing; but withal we were content and happy, and wished there was no such thing as business in the world to disturb the dreamy, indolent ways we had fallen into and awaken us to the harder realities of life.

To vary the enjoyment, an excursion was planned that night around the camp-fire for the following Sunday to go down to Leland for a view of the big lake (Michigan) at the outlet of Carp Lake, and next morning, Saturday, I launched the ironclad, and with rod and bucket of minnows took my way down to the Fountain Point House to hire the little steam lauch Rambler, stay over night and come back with the boat in the morning in time for a good start.

The pull down to the hotel was uneventful, except for an "episode" with a school of big gars, three and four feet long some of them, that I ran into in shallow water near shore at the point above Wood's Bay. They were lying close inshore in water less than a foot deep, sunning themselves, as it appeared, and as I came on them unawares there was lively hustling among them for a minute to get around and under the boat out into the lake, and I was glad when the last one dashed under the boat and went clear without punching his long bony snout through the canvas and causing another shipwreck.

Then a great snapping turtle, as big across as a camp stool and with a head as big as a tin cup, came clawing his way along the bottom from inshore—he had doubtless been "a layin' " for one of the gars to come within reach of his terrible jaws—and passed slowly and heedlessly under the boat directly amidships, the "scroll work" on his back barely clearing the canvas as he made his way out into the deeper water.

I gave him a smart poke with an oar blade as he went by to hasten his movements, and lamented because I hadn't a gaff and a pistol along, for there, only a yard or so away, was our biggest camp kettle full of savory turtle soup walking off into the depths of the lake and I looking on powerless to prevent it.

Yum! My mouth watered, and I fancied I could almost sniff the several and various odors arising from that camp kettle; the oars fell again in measured stroke, and just then I was reminded of the story of the old darky and his rabbit, which at an unlooked for moment "humped himself" and kicked out of his grasp and made his escape, with the parting shot from the old man, "Take yo'se'f off dar, yo' wufless ole cottontail; yo' nuffin' but po' dry meat nohow," which scrap of colored philosophy I applied to the big turtle and felt resigned.

When I rounded the point a short distance below I met a stiff wind and a white-capped sea rolling up the lake, which I had thus far avoided by keeping close in along the east shore, but here the lake took a slant to the nor'-east, and from there down I was in for a hard pull.

Wood's Bay is a noted bass ground for the "resorters" who never catch any bass, and I hooked on a minnow to see if I could get a few of them to take down to my old friends, Colonel Whitfield's wife and her folks, who spend the summer months at their cottage near the hotel (they also own and manage the hotel), for I knew it would never do to make my appearance before Mrs. Whitfield and Mother Morrison without a string of fish of some kind to uphold the reputation of the Kingfishers.

I managed to pick up five big-mouths before reaching the hotel, which was fortunately little better than any of the guests had done that day, and I could afford to put on some airs, albeit the margin was exceedingly small. After a cordial hand shake all around (there were other friends there, too, from Cincinnati) the best part of the remainder of the afternoon till supper time was used up in entertaining the youngsters with fish talk and filling up at frequent intervals on the water of the famous spouting well from which the house takes its name, and after supper I pulled down to Provemont in the ironclad and filled up my old friend Couturier—the postmaster—with yarns of our camps since '84, till daylight and the old man's endurance gave out about the same time.

When I got back in the boat it was so dark I could scarcely see my way out of the narrows into the bay above the bridge, but once out I laid a course that would make a short cut to the point and soon after run on a sunken log in shallow water and came near getting shipwrecked in the darkness, which would have been an "episode" worth mentioning, for I was a hundred yards from shore and the soft, oozy mud so deep under me that an oar run down its full length failed to reach firm ground.

I was tuned up for some vigorous cussin', as I expected to hear the water coming through the canvas somewhere, but for a wonder the ironclad escaped with a good scraping of her bottom as I worked her off the log, and then I felt the way carefully up to and around the point under reduced steam, so to speak, to the boat-house, where I secured her for the night and walked up to the hotel, feeling thankful I was not perched on the sunken log down the bay, "hollerin' " for somebody to come and take me off.

At the house I spent the evening looking on at some time-killing games of cards going on in the parlor and felt quite complacent and equal to the emergency, for I had actually shaved and put on a clean shirt—not a "biled" one—before leaving camp, at which exhibition of absentmindedness the boys greatly marveled and gave me another "roasting," for shaving in camp is notable as one of the lost industries.

I slept in a good bed that night—not one of the Interlachen $1.49 affairs—had a good breakfast in the morning and when I went to pay the bill I found that Mrs. Whitfield had figured it out to amount to just $0, which reminded me of the old tavern keeper who flourished once upon a time down in Indiana.

I paid the bill, with thanks only—she would take no other remuneration—and have been studying since how to get even with that blessed little woman, but the solution is as far away now as then, and I can only say, "May the Fountain Point House prosper till the fountain runs dry."

With the indicator of the steam gauge wavering around the 80lb. mark, the Rambler made the run to camp in less than an hour, where we found the boys all ready except Kelpie and Johnny, who had taken a boat and gone to the lake and up the "bayou" to hunt the mouth of Cedar Run and follow up the stream to see if the trout fishing in it was as good as reported. The bayou was a narrow, nearly currentless stream coming into the lake through a vast swamp, and just why it was called "the bayou" no man could tell.

Cedar Run flowed into this sluggish stream from the south, about a half mile from the lake, and was navigable, so we had learned from the Nolan boys, for a canoe or small boat as far up as it had been "logged out," a distance of a couple of miles.

Old Sam and I had tried the year before to get up it in a boat but found it impossible on account of a jam of logs and railroad ties near the mouth, and this year we had been too busy hunting bass waters and idling along other trout streams to think much about it, and had not troubled ourselves to go up and see if the logs were out.

Kelpie and "the kid" had left camp early in the morning, leaving word that if the steamer would come to the head of the lake and blow her whistle a few times they would return and go along with us.

The boat was dispatched to the mouth of the bayou, when the whistle was blown vigorously for awhile, and then the Captain worked her up to the mouth of Cedar Run, where he pulled the whistle at intervals and waited for more than an hour without a response, and at last gave it up and came back without them, when we got aboard and headed down the lake in not a very good humor for having been kept so long waiting.

We took the keeper of the fryin' pans along, leaving the camp in charge of three of the Laidlaw children—"Captain Tom," his sister Emma, a little miss near Tom's age, and little Jimmy, an artless, sweet-faced midget of a boy in short breeches, who had won his way into our hearts till he was the pet of the whole camp. As the launch moved away we saluted Captain Tom, who stood at the edge of the bank erect and soldierly, nigh bursting with a sense of importance at the responsibility imposed on him, but with an air of dignity proportioned to his notions of the magnitude of his charge that was highly amusing.

But Tom was a courageous, trusty boy, and we felt that the camp would be looked after with fidelity during our absence, and that the old flag would be still there when we got back, unless he was overwhelmed by some unexpected flank movement not provided for in his line of defense.

The trip down the lake and back was uneventful, and the details may be served up like a cheap boarding-house dinner—all at once, as there wasn't an "episode" during the day worth mentioning, but it was a beautiful day, and the boys enjoyed the view of the big lake and the scenery of Lower Carp, as it was all new to them. The "perfessor" enjoyed himself, too, more, it seemed, than the rest of us; in fact, it was a great day for him, as he had us cornered in the narrow limits of the little launch where he could fire his irritating witticisms (?) and stale puns at us, and we unable to get out of the way. He had wound himself up early in the morning, and didn't run down till the circle broke up around the camp-fire that night.

(The "perfessor" might do himself a good turn by pasting in his hat the following quotation, to wit: "He that hath a satirical vein, as he maketh others afraid of his wit, so he had need to be afraid of others' memory." We still have the "perfessor" in mind.)

Back at the camp again before sundown, we found Kelpie and Johnny had just returned without a trout—or any other kind of fish.

They had gone by the mouth of Cedar run without noticing it and kept on the main stream (the bayou) hunting for "the first crick comin' in from the left," as old Sam had instructed them, till they came to the shallow water and riffles where the stream left the "hard lands" and entered the swamp, near two miles from the lake.

They had seen a good many fish—goggle-eyes, perch, suckers, and an occasional pickerel, and dogfish, but they wasted little time on them, as they were looking for Cedar Run, and trout. Kelpie said he knew there were no trout in the stream because of the presence of the pickerel and other fish, and because it didn't "look trouty," but he had enjoyed the day out, as he was never better satisfied with himself than when poking along, exploring a new stream.

When asked if they had heard the steamer whistling for them, he said they had heard a whistle but supposed it was the mill whistle at Bingham—which was the most transparent prevarication we had ever known him to be guilty of, as he knew the mill did not run on Sundays, and besides, the mill whistle was near an octave lower in tone than the whistle of the little steamer.

But after all, we did not blame him much for preferring the solitude of the swamp and Johnny to the "perfessor's jokes," and the mild "fish lie" with which he burdened his conscience to explain the reason of their not answering the whistle will, it may be hoped, not count much against him at the final round up.

Miss Emma and little Jim had got tired and left some time before, but the "officer of the day" was still on duty. He was duly commended for his faithfulness as a camp keeper, and a minute after was kicking up a streak of dust in the road with his brown bare feet as he "humped it" for home to drive up the cows for the evening milking—the happiest boy and the best, to our notion in all the neighborhood around.

Here's health and long life to you, "Captain Tom:" may you grow up to be as good a man as you are a boy.

The camp fell into its old ways again.

The old flag was lowered at sundown, untoggled and put away for the night, the camp-fire built, lies swapped around it as of yore, plans for the morrow talked over, some excruciating jokes were worked in at inopportune times by the "perfessor" to keep his hand in, and as the fire burned down and drowsiness overtook us we found our way to the tents, each as the spirit moved him, leaving the Colonel as usual to sit in his camp chair sucking comfort from his pipe and weaving fancies in the gleaming coals till the last tiny tongue of blueish flame wavered and died out, leaving him only some wreaths of smoke curling from the ends of burned off sticks and the dull red glow of the dying embers to remind him that the turn of the night was drawing on apace. KINGFISHER.

[TO BE CONCLUDED.]

## A CAMPER'S DIARY.—IV.

THE FORKS, Aug. 24.—This is the camp on a bank, raised up, overlooking the Little Magalloway, not far from where it joins the Magalloway proper. You can't quite hear the meeting with the big one, but you can hear the commotion. There's only a little plateau cleared off for the camp, with a raspberry jungle in back and then the woods interminable. We have built some steps down the bank to the foot where the boats lie moored, half hidden. There's a trail meandering down along the brow, and when the flaps are open it goes right through the tent. One side of the canvas is pinned close to the edge of the bluff with the guy ropes reaching down and fastened to divers spruce and small white birches among the foliage on the bank. There's a rude shelter tent, too, just a fly, supported by forked saplings, and there we dine on a table made from a dismembered provision box. The camp stones are between, in the clearing, well swept by the bough broom, and the forked saplings are garnished with camp things; some are bright and reflect the sun, some don't. I'm making these notes in peace. The others are off on an all day's tramp.

The provisions suffered little from their wetting in the rapids. The flour, in a big tin pail, caked a little, the meal got sour in spots, and the bag of prunes prematurely began to swell, but the big rubber bags saved the clothing. The only bad thing about those bags is in the tent at night. When a thing goes through that capacious maw it's irrecoverable. You're liable to want a pair of stockings the worst way, but the chances are you don't get them. You leave them there. You always know where everything is. * * * I've had a visitor. While I was at lunch a fellow came down the trail, came through the tent, and first thing I knew stood smiling at the little village obstructing things. He was a youngish man with a brown flannel shirt, open at the throat, a knapsack on shoulder and a well browned skin that proclaimed him a native, a tan that was ingrained and staid there summer and winter, not fresh and parvenu like ours. We appeared to have known each other for several years, so he unslung his pack and dropped on his haunches to help me make the dinner less.

When the subject of deer came up, I said, "Are there many?" His mouth was obstructed at the time with one of Sam's famous biscuits, so he smiled and waved his hand over miles of wooded hills. He knew of nothing to prevent a man from getting a deer if he wanted one and kept quiet about it. To his thinking, the natives ought to leave them pretty much alone for the visitors who come with guns and pocketbooks. He reflected seriously before answering my question, and said: "Yes, there are more deer shot in summer than in winter."

*Aug. 25.*—The boys came home tired last night, but brought a fair lot of fish, so we ate trout for supper and had some left to put down in the spring. Had a fine camp-fire then, and all sat round with our coat collars up and talked. We don't tell stories much, we argue. Perhaps the queerest thing is that nobody smokes. Mack pulled out a brand new briar wood, took a few puffs and put it back with the remark that he smoked a great deal at home, "great deal," and this brought a quick look from Sam. Mack was going to continue, but Valentine interrupted him. He does this frequently. He takes possession of the conversation any time he wants it by virtue of a great, big, baritone voice. He said, "This superior attitude affected by smokers is all bosh. They get round a fire with their pipes and have you think their minds are full of high fancies and poetic dreams unknown to those outside the cult. Fact is, their brains are smoke-cured and can't think. They only see the flames that sort of leap and change, with a vacant smile."

When I told about my noonday visitor, Mack was all excited and got out the gun he hadn't dared to show before. He seemed to think the law was off and wanted to make plans for to-morrow. Valentine got to lecturing

and said he didn't want to be mixed up in any poaching business, and he couldn't afford to chip in for deer at forty or fifty dollars a head. Mack said there was no danger, and left it to me if my man didn't say so. I had to agree with Valentine, that camping as we were, not dropping much money, nor subsidizing any, it might be risky. Sam, the court of last resort, kept smiling and said, "Mack, if you want a deer Old Man, you go and get one."

"Well, that's all right, but how would you go about it, Sam?"

"Well, don't go to-night; it's too cold; but to-morrow night if it's warm, paddle down to that runway I showed you and hide and wait, and wait, and wait till the leaves rustle and the twigs crack and a big black shadow comes out on the beach, and then you plunk it over at short range like one of Flint's old cows. Then steal up and look round as if you thought Flint was coming and hack off some chunks of hindquarter and dig a hole—dun know what you'll dig it with—and bury the rest so Flint would never find his cow if he looked. Then come home with your meat and put it in the spring in lard pails—keep a week or two. Some natures enjoy that thing, I'm told." Mack scowled and put the gun back in the bag and went into the tent with a remark about deer similar to the one attributed to Mr. Vanderbilt.

That fellow Mack is a camper after my heart. We agreed some time ago that it was all right to eat oatmeal from a tin cup and then use it for coffee, but that won't do for Sam; he's scrupulous. We had to give him more dishes. Sometimes he looks over the plates after we've dried them.

*Aug. 27.*—Yesterday we left Sam and Valentine keeping camp and the two of us took the birch bark and went on a voyage up the little river. I'm trying to think of something to remember that trip by. I was conscious of absorbing pleasure all day long, but after all there was nothing, nothing but a little sun and air, and woods and water. A long easy paddle at first and then we kicked off shoes and pulled trousers high up and found ourselves laughing and leaning and slipping on smooth stones, pitting ourselves against the current with the boat between us till we came to another long slide.

We stopped a few times to fish, and a good many times for Mack to poke her nose ashore when he spied a cloven footprint. He had to shake his head and gloat over it and make wild speculations as to how long it had been there, till at last I suggested he take along a section of clay with the coveted track and have it petrified. Took dinner on a bed of dry, white sand where the freshet had been in the spring. I could have used a camera then to take Mack as he sat, bare-legged, with a tin cup of tea, amber-colored and hot, making ill-bred sounds of satisfaction after each gulp, and then tumbling forward and flat, with his face pressed against the hot beach and his arms extended, with hands and toes clutching the sand.

It was easy sliding homeward, with a stroke now and then for headway, and when we came round the head at sundown they both stood watching on the bluff. Their looks betrayed them. The rascals had been fishing. Sam made a mouth, and his voice came floating: "What luck? Show 'em up; show 'em up!"

Mack turned to the bottom of the boat, where the three fish lay—a big old hook-jaw and two small ones, and picked up the smallest, rinsed him till he glistened, and hung him in the air—about 9in. of trout. Then a howl of derision went up and they put on exhibition a string of 10 nice even spotted ones.

After we landed there was some wrangling. Valentine wanted to bet that Mack didn't catch the big one, and Mack offered to go him that there wasn't a 1lb. trout on the string, and that he never caught one of them at that. There were no takers. After supper, when the fish had mostly disappeared from the plates, and the bones of contention had all been thrown on the fire, the social atmosphere seemed to improve. Sam admitted it was too bad not to have given Jeff more credit for the big one. He said: "A 2½lb. trout isn't exactly what you'd call 'big,' with a strong accent, but still it's the best one he ever caught, so that makes it his big one, anyhow, and he got it in a nice place in the rush and swirl below the dam." JEFFERSON SCRIBB.

# Natural History.

## THE PANTHER'S LEAP.

YOUR panther number took me back fifty years to the evenings that were made grewsome by the tales of my grandfather concerning the wild beasts who were very much at home in Vermont when he first settled here and the State was wild and young.

He had no actual experience of his own to tell but that of others was at his tongue's end, and when I heard O. O. S.'s thrilling story, I felt as if my infantile ears had been cheated that this too was not added to my grandfather's repertoire and had its place with the story of the man who was pounced upon by a panther while watching a deer lick and that of the man who rode for miles on the tongue of his sled, between his oxen, with a great cat threatening him now in the rear, now on either flank, and of men beguiled into the woods in the night time by the cries of panthers, mistaken for the wailing of lost women.

How the ghosts of those long-departed panthers used to pursue me when, after supping full of horrors, I ran home across the yard through those interminable six rods of darkness. How their cold breath chilled my back that almost felt the touch of the out-reaching phantom claws.

When I was a boy, a panther annually visited Shellhouse Mountain with great punctuality about the time that the huckleberries ripened there. A few reckless men and women would venture upon the terrible beast's usurped domain, venturing their lives for a few quarts of berries, but we youngsters gave the whole mountain a wide berth, the wider after each return of the braves bearing reports of the terrific screams and mysterious stealthy footsteps which had attended their rash intrusion. In after years I was led to remark with some suspicion the regularity of the occurrence of these visits with the ripening of the huckleberries, and am inclined to doubt whether they occurred at all, but I implicitly believed in the Shellhouse panther then, as did all the other boys, and it was a fearfully delightful belief.

Sometime perhaps, a panther may have seen me, and I might have seen him if I had known where to look, but the nearest that I know I ever came to seeing a wild one was when I saw one's track, made the night before. One winter, more than twenty years ago, there came to us the old story of frightful screams having been heard in the woods and fields near the mouth of Little Otter Creek, and of strange tracks seen, without which proof we should have considered the story of the screams as apocryphal as those of the Shellhouse monster. But tracks were worth investigating.

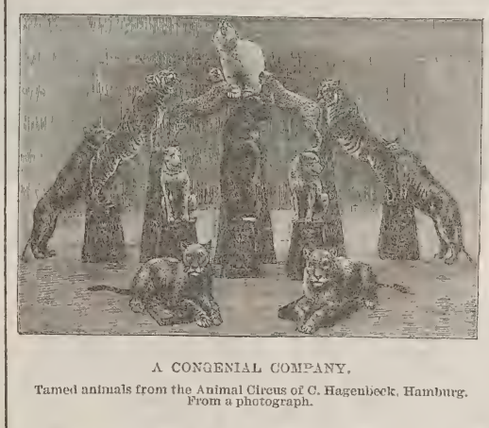
An old hunting comrade and I took our guns and drove to the place; on the way to which we met a nearer resident, who seeing our guns accosted us.

"Goin' down to look for the animil, be you? Wal, they say't he's made some turrible jumps. Thirty-six foot, right on a level."

As we drove out of ear-shot, I remarked to my companion, Bill Leonard, who occasionally uses the long bow, "Thirty-six feet on a level. If folks must lie, why can't they tell reasonable lies?"

"Yes, or else tell reasonable truths, as I do," said Bill with a merry twinkle beneath his shaggy eyebrows.

We soon reached the place where the tracks had been discovered and found a little group of neighbors inspecting them. My closed mittened hand, which is not a little one, just filled one of them where the animal had walked at a leisurely pace. A little further on he had suddenly bounded forward in successive leaps that seemed of quite remarkable length until we came to one so prodigious that we thought at first the leaper must have been borne up by the crust. But the night had been thawy and this solution of the wonder had to be abandoned. I paced the distance from track to track, and it was seventeen of my paces, which are "Quaker measure," as I am a long-legged six-footer. This and two or three slightly shorter leaps led to the objective point, which was a fragment of a sheep's carcass that a fox had been evidently gnawing at when the panther scented or saw him. The fox left the record of his hurried departure and the panther his more leisurely making off in a direction at a right angle with his unsuccessful onslaught.



We lost his track among the tangled labyrinth of woodroads in the neighboring forest, and nothing was heard of him thereafter.

Though there were half a dozen trustworthy witnesses I have always felt a good deal of diffidence in giving the measurement of the leap, until the publication of your accounts by guides and hunters have given me more assurance. AWAHSOOSE.

FERRISBURGH, Vt.

### A Congenial Company.

To what perfection art and perseverance have brought the taming and training of wild beasts is shown in the illustration? It represents a performance by the animal

A CONGENIAL COMPANY.

Tamed animals from the Animal Circus of C. Hagenbeck, Hamburg. From a photograph.

circus so successfully trained and exhibited by Mr. Carl Hagenbeck, of Hamburg. Such dreaded beasts as the polar bear, panther, tiger and black bear have been shaped into a pyramid, the bear with a dog at each side, forming a sort of gate, with two mighty lionesses keeping watch without. Animals which under natural conditions are each other's worst enemies, here, under the influence of the human mind, seem apparently to have exchanged their natures, and obediently form a part of the artistically wrought pyramid—a congenial company, which would considerably lighten the dangerous venture of a modern Knight Delorges.—*Gartenlaube.*

### The Strange Adventure of a Gull.

As an example of the fact that animals, as well as men, may be the victims of accident and mistake, the following account of the curious misfortune of a herring gull in Duxbury Bay one day last spring, may interest the readers of FOREST AND STREAM.

One day in April two Duxbury school boys were rowing from Plymouth, Mass., to Duxbury, when their attention was attracted by the odd position of a herring gull, sitting in the water with its head almost buried beneath the waves. As they approached the bird arose, flying heavily a short distance, and the boys could see an object hanging from its head—a fish as they thought. The gull alighting after a flight of about 100yds., was easily captured, and was so exhausted that it hardly made a flap of its wings. Then the cause of disaster was seen. The bill of the unhappy bird for its entire length was stuck in a huge quahaug clam, the valves of which, contracting like a vise, prevented its withdrawal.

While feeding at low tide the gull must have been made a prisoner by the intended victim of his appetite, and would probably have been drowned by the weight holding his head under water, but for his timely rescue.

After showing gull and clam to interested friends on shore the boys liberated the bird, which, freed from its dangerous burden, flew out into the bay, apparently none the worse for its strange adventure, but, it is to be hoped, possessed of wisdom gained from experience. P.

BOSTON, Mass.

## SKIN PARASITES OF MICE.

SOME years ago, in 1870 I think, I found several forest mice which had nested under a heap of old clothes that had been thrown away with a lot of rubbish into a sand hole or pit back of my grandfather's house. I caught several of the mice and carried them home and put them in a cage. The wires in the front part of this were so far apart, however, that my captives soon got out. For several nights they would come out of their hiding places and run around the box on which I had placed the cage, and even into the cage itself. I noticed that the largest mouse, which was the mother of the others, had an excrescence on one of her hindquarters which at that time I thought to be an abscess or some such affliction, and wondered at the small concern the animal showed at its presence. It did not seem to incommode the mouse at all, although in size it was very apparent, being fully one-tenth as large as the animal.

These mice soon left my room and I did not think of the matter again till during the spring of 1880, when I again found some mice of the same kind under some rubbish. This time I grabbed up two mice as they were running beneath my feet and thrust them into a coat pocket, where they stayed till I went to the house at chore time.

In the evening, after going to my room, I took them out, and one—the smallest—had two such bunches on one hindquarter, as I before described. This mouse I accidentally injured in catching, and he could not run when I took him from my pocket, and in fact soon died. After his death I observed a motion of the skin which surrounded the supposed tumor or abscess, and then I saw for the first time that the swellings that I had taken for "sores" of another kind were produced by the grub of a fly similar, if not identical with, the ox breeze fly (*Oestrus boris*, Clarck). My astonishment was increased when one of them made its escape and left a cavity, the inside of which could be seen through the aperture from which the grub came. The other grub soon came out in the same way, and the two were fully one-tenth the size of the mouse's body. They were as large as any that I ever took from a cow, and of a brownish color, similar to that of the chrysalis of the *Promethea*, and nearly as big.

I did not have time to examine further into the matter, and sent the mouse and two grubs to Prof. F. G. Sanborn, then of Andover, Miss. I never heard from him in regard to them, and think he may have been from home at the time, and so never received them. I have never read of them being found in animals so small before, but do not think it can be of so rare an occurrence, for the two specimens of mice which I caught were in different towns, and several years had elapsed since the first was taken. Will some of the readers of the FOREST AND STREAM give any experience they may have had in the same direction? MERGUS.

## THE EAGLE AND THE BABY.

TACOMA, Wash.—*Editor Forest and Stream:* Inclosed please find a clipping from the Boston *Traveller* giving an account of an eagle carrying off a child six months old:

DETROIT, Mich, Aug. 5.—Two eagles had a duel to the death for the possession of the six-months-old baby of Peter Shaw, who lives four miles north of Allis, in Presque Isle county, yesterday. Mrs. Shaw had laid the baby down in the grass and returned to the house for a few moments, when an enormous eagle swooped down on the infant and sunk its talons into the little one's flesh and clothing. The mother heard her baby's cry but came too late to be of service, but her shrieks brought the father who, quickly comprehending the situation, mounted a horse and armed with a rifle rode to the shore of a near by lake, where he knew there was an eagle's nest in the cliffs.

Shaw arrived just in time to witness a terrible sight. Two eagles were hovering above a crag of rock, battling for possession of the baby, that lay high upon the cliff. Before the father reached the summit one of the eagles had fallen to the ground, while the other had again taken up the child for another flight. The father fired and the bird and baby fell into the water. The frantic father plunged into the lake, caught up the body, but the little one was dead. He took home the body, along with those of the two eagles, one of which had been killed in the fight over the prey.

I did not think an eagle could lift ten pounds, and a child six months old should weigh upward of fifteen pounds. My children at that age have always weighed more.

Among the traditions are stories of children who were carried off by birds of prey, notably by the lämmergeiers of Europe, the condor of South America and the various eagles.

Hoping this will call out some opinions from your correspondents, I remain as ever your well wisher,

WALTER B. SAVARY.

### A Naturalist in Nicaragua.

MR. CHARLES W. RICHMOND, whose collecting tour has been referred to in FOREST AND STREAM, writes from Escondido River that he expects to send home a large series of fishes along with other natural history specimens.

The rainy season, which begins in May or June and lasts about eight months, is now causing high water and frequent floods. Fish do not bite while the streams are swollen. In the proper season ripe banana is generally used for bait, but some of the planters meet with considerable success in the use of traps made of wire netting.

Mr. Richmond expects to revisit Lake Nicaragua in December and will probably spend a month or two on Rio Frio. He has been told by an intelligent man who is familiar with the lake that a species of sawfish is occasionally found there, which is highly probable, since sharks are known to occur in that body of water. A species of devilfish (*Octopus*) collected near Grenada by Mr. Richmond has been pronounced by Dr. Dall new to Lake Nicaragua.

Fever has not overlooked the collectors and has interfered seriously with their work since June.

### Panthers in Vancouver's Island.

TORONTO, Canada, Sept. 22.—*Editor Forest and Stream:* I have just returned from my summer outing on the prairies, and while traveling I fell in from time to time with British Columbians. I usually questioned these about the wild animals of their region and was informed by many different persons at different times that panthers are on the increase in British Columbia and on Vancouver's Island since the introduction of sheep. In the latter colony especially their depredations are becoming quite serious, and the coming Legislature is to take steps that will result in a vigorously prosecuted war on the panther race. ERNEST E. THOMPSON.

## THE INDIANS' BUFFALO PISKUN.

IN the September number of *Scribner's Magazine* Mr. George Bird Grinnell, of the FOREST AND STREAM, writes of the American buffalo and of the buffalo days. The paper is historical, descriptive and reminiscent, and gives an admirable *resumé* of our present knowledge of what must be ranked as the most important game animal indigenous to this continent. Mr. Grinnell has drawn his material from an unusually rich personal experience on the hunting grounds of the West when the buffalo was still abundant and from a wide acquaintance with the primitive hunters who will ever be associated with the bison. The admirable illustrations which accompany the article are by Mr. Ernest E. Thompson: one of them is here reproduced by courtesy of the Messrs. Scribner. Mr. Grinnell gives the following account of the Indians' buffalo *piskŭn* hunting:

Apart from man, the buffalo had but few natural enemies. Of these the most destructive were the wolves, which killed a great many of them. These, however, were principally old, straggling bulls, for the calves were protected by their mothers, and the females and young stock were so vigorous and so gregarious that they had but little to fear from this danger. It is probable that, notwithstanding the destruction which they wrought, the wolves performed an important service for the buffalo race, keeping it vigorous and healthy by killing weak, disabled, and superannuated animals, which could no longer serve any useful purpose in the herd, and yet consumed the grass which would support a healthy breeding animal. It is certainly true that sick buffalo or those out of condition were rarely seen.

The grizzly bear fed to some extent on the carcasses of buffalo drowned in the rivers or caught in the quicksands, and occasionally they caught living buffalo and killed them. A Blackfoot Indian told me of an attempt of this kind which he witnessed. He was lying hidden by a buffalo trail in the Bad Lands, near a little creek, waiting for a small bunch to come down to water so that he might kill one. The buffalo came on in single file, as usual, the leading animal being a young heifer. When they had nearly reached the water, and were passing under a vertical clay wall, a grizzly bear lying hid on a shelf of this wall reached down and with both paws caught the heifer about the neck and threw himself upon her. The others at once ran off, and a short struggle ensued, the bear trying to kill the heifer and she to escape. Almost at once, however, the Indian saw a splendid young bull come rushing down the trail toward the scene of conflict and charge the bear, knocking him down. A fierce combat ensued. The bull would charge the bear, and when he struck him fairly would knock him off his feet, often inflicting severe wounds with his sharp horns. The bear struck at the bull and tried to catch him by the head or shoulders and to hold him, but this he could not do. After fifteen or twenty minutes of fierce and active fighting the bear had received all the punishment he cared for and tried to escape, but the bull would not let him go and kept up the attack until he had killed his adversary. Even after the bear was dead the bull would gore the carcass and sometimes lift it clear of the ground on his horns. He seemed insane with rage, and, notwithstanding the fact that most of the skin was torn from his head and shoulders, he appeared to be looking about for something else to fight. The Indian was very much afraid lest the bull should discover and kill him, and was greatly relieved when he finally left the bear and went off to join his band. This Blackfoot had never heard of Uncle Remus's tales, but he imitated Br'er Rabbit—laid low and said nothing.

To the Indians the buffalo was the staff of life. It was their food, clothing, dwellings, tools. The needs of a savage people are not many, perhaps, but whatever the Indians of the plains had, that the buffalo gave them. It is not strange, then, that this animal was reverenced by most plains tribes, nor that it entered largely into their sacred cermonies and was in a sense worshipped by them. The Pawnees say, "Through the corn and the buffalo we worship the Father." The Blackfeet ask, What one of all the animals is most sacred?" and the reply given is "The buffalo."

The robe was the Indian's winter covering and his bed, while the skin, freed from the hair and dressed, constituted his summer sheet or blanket. The dressed hide was used for moccasins, leggins, shirts and women's dresses. Dressed cow-skins formed their lodges, the warmest and most comfortable portable shelters ever devised. Braided strands of raw hide furnished them with ropes and lines, and these were made also from the twisted hair. The green hide was sometimes used as a kettle, in which to boil meat, or, stretched over a frame of boughs, gave them coracles, or boats, for crossing rivers. The tough, thick hide of the bull's neck, allowed to shrink smooth, made a shield which would turn a lance thrust, an arrow, or even the ball from an old-fashioned smooth-bore gun. From the raw hide, the hair having been shaved off, were made parfleches—envelope-like cases which served for trunks or boxes—useful to contain small articles. The cannon bones and ribs were used to make implements for dressing hides: the shoulder-blades lashed to sticks made hoes and axes, and the ribs runners for small sledges drawn by dogs. The hoofs were boiled to make glue for fastening the feathers and heads on their arrows, the hair used to stuff cushions, and later saddles, strands of the long black beard to ornament articles of wearing apparel and implements of war, such as shields and quivers. The sinews lying along the back gave them thread and bowstrings, and backed their bows. The horns furnished spoons and ladles, and ornamented their war bonnets. Water buckets were made from the lining of the paunch. The skin of the hind leg cut off above the pastern, and again a short distance above the hock, was once used for a moccasin or boot. Fly brushes were made from the skin of the tail dried on sticks. Knife-sheaths, quivers, bow-cases, gun-covers, saddle-cloths, and a hundred other useful and necessary articles were all furnished by the buffalo.

The Indians killed some smaller game, as elk, deer and antelope, but for food their dependence was on the buffalo. But before the coming of the whites their knives and arrowheads were merely sharpened stones, weapons which would be inefficient against such great thick-skinned beasts. Even under the most favorable circumstances, with these primitive implements, they could not kill food in quantities sufficient to supply their needs. There must be some means of taking the buffalo in considerable numbers. Such wholesale capture was accomplished by traps or surrounds, which all depended for success on one characteristic of the animal, its curiosity.

The Blackfeet, Plains Crees, Gros Ventres of the Prairie, Sarcees, some bands of the Dakotas, Snakes, Crows, and some others, drove the herds of buffalo into pens from above, or over high cliffs, where the fall killed or crippled a large majority of the herd. The Cheyennes and Arapahoes drove them into pens on level ground; the Blackfeet, Aricaras, Mandans, Gros Ventres of the Village, Pawnees, Omahas, Otoes, and others, surrounded the herds in great circles on the prairie, and then frightening them so that they started running, kept them from breaking through the line of men, and made them race round and round in a circle, until they were so exhausted that they could not run away, and were easily killed.

These primitive modes of slaughter have been described by earlier writers, and frequently quoted in recent years; yet, in all that has been written on this subject I fail to find a single account which gives at all a true notion of the methods employed, or the means by which the buffalo were brought into the inclosures. Eye witnesses have been careless observers, and have taken many things for granted. My understanding of this matter is derived from men who from childhood have been familiar with these things, and from them, during years of close association, I have again and again heard the story of these old hunting methods.

The Blackfoot trap was called the *piskŭn*. It was an inclosure, one side of which was formed by the vertical wall of a cut bank, the other being built of rocks, logs, poles and brush six or eight feet high. It was not necessary that these walls should be very strong, but they had to be tight, so that the buffalo could not see through them. From a point on the cut bank above this inclosure, in two diverging lines stretching far out into the prairie, piles of rock were heaped up at short intervals, or bushes were stuck in the ground, forming the wings of a V-shaped chute, which would guide any animals running down the chute to its angle above the *piskŭn*. When a herd of buffalo were feeding near at hand, the people prepared for the hunt, in which almost the whole camp took part. It is commonly stated that the buffalo were driven into the *piskŭn* by mounted men, but this is not the case. They were not driven but led, and they were led by an appeal to their curiosity. The man who brought them was usually the possessor of a "buffalo rock," a talisman which was believed to give him greater power to call the buffalo than was had by others. The previous night was spent by this man in praying for success in the enterprise of the morrow. The help of the Sun, *Nápi*, and all Above People was asked for, and sweet grass was burned to them. Early in the morning, without eating or drinking, the man started away from the camp and went up on the prairie. Before he left the lodge he told his wives that they must not go out, or even look out, of the lodge during his absence. They should stay there, and pray to the Sun for his success, and burn sweet grass until he returned. When he left the camp and went up on the prairie toward the buffalo, all the people followed him, and distributed themselves along the wings of the chute, hiding behind the piles of rock or brush. The caller sometimes wore a robe and a bull's head bonnet, or at times was naked. When he had approached close to the buffalo, he endeavored to attract their attention by moving about, wheeling round and round, and alternately appearing and disappearing. The feeding buffalo soon began to raise their heads and stare at him, and presently the nearest ones would walk toward him to discover what this strange creature might be, and the others would follow. As they began to approach the man withdrew toward the entrance of the chute. If the buffalo began to trot, he increased his speed, and before very long he had the herd well within the wings. As soon as they had passed the first piles of rock, behind which some of the people were concealed, the Indians sprang into view, and by yelling and waving robes frightened the hindmost of the buffalo, which then began to run down the chute. As they passed along more and more people showed themselves and added to their terror, and in a very short time the herd was in a headlong stampede, guided toward the angle above the *piskŭn* by the piles of rock on either side.

*Drawn by Ernest E. Thompson.* *From Scribner's Magazine.*

AT MID-DAY.

(By kind permission of Charles Scribner's Sons.)

About the walls of the *piskŭn*, now full of buffalo, were distributed the women and children of the camp, who, leaning over the inclosure, waving their arms and calling out, did all they could to frighten the penned-in animals, and to keep them from pushing against the walls or trying to jump or climb over them. As a rule the buffalo raced round within the inclosure and the men shot them down as they passed, until all were killed. After this the people all entered the *piskŭn* and cut up the dead, transporting the meat to camp. The skulls, bones and less perishable offal were removed from the inclosure, and the wolves, coyotes, foxes and badgers devoured what was left.

It occasionally happened that something occurred to turn the buffalo, so that they passed through the guiding arms and escaped. Usually they went on straight to the angle and jumped over the cliff into the inclosure below. In winter, when snow was on the ground, their straight course was made additionally certain by placing on or just above the snow a line of buffalo chips leading from the angle of the V, midway between its arms out on to the prairie. These dark objects, only twenty or thirty feet apart, were easily seen against the white snow, and the buffalo always followed them, no doubt thinking this a trail, where another herd had passed.

By the *Sauiksik* tribe of the Blackfoot nation and the Plains Crees, the *piskŭn* was built in a somewhat different way, but the methods employed were similar. With these people, who inhabited a flat country, the inclosure was built of logs and near a timbered stream. Its walls were complete; that is, there was no opening or gateway in them, but at one point this wall, elsewhere 8ft. high, was cut away so that its height was only about 4ft. From this point a bridge or causeway of logs, covered with dirt, sloped by a gradual descent down to the level of the prairie. This bridge was fenced on either side with logs, and the arms of the V came together at the point where the bridge reached the ground. The buffalo were driven down the chute as before, ran up on this bridge, and were forced to leap into the pen. As soon as all had entered, Indians who had been concealed near by ran up and put poles across the opening through which the buffalo had passed, and over these poles hung robes so as entirely to conceal the outer world. Then the butchering of the animals took place.

Further to the south, out on the prairie, where timber and rocks and brush were not obtainable for making traps like these, simpler but less effective methods were adopted. The people would go out on the prairie and conceal themselves in a great circle, open on one side. Then some man would approach the buffalo, and decoy them into the circle. Men would now show themselves at different points and start the buffalo running in a circle, yelling and waving robes to keep them from approaching, or trying to break through, the ring of men. This had to be done with great judgment, however, for often if the herd got started in one direction it was impossible to turn it, and it would rush through the ring and none would be secured. Sometimes if a herd was found in a favorable position, and there was no wind, a large camp of people would set up their lodges all about the buffalo, in which case the chances of success in the surround were greatly increased.

The tribes which used the *piskŭn* also practiced driving the buffalo over high, rough cliffs, where the fall crippled or killed most of the animals which went over. In such situations, no inclosure was built at the foot of the precipice.

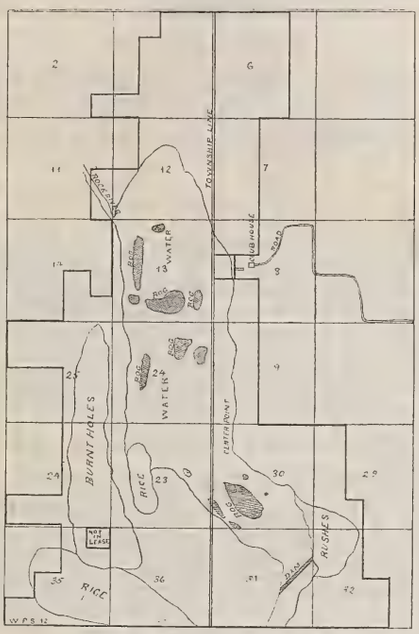
In the later days of the *piskŭn* in the north, the man who brought the buffalo often went to them on horseback, riding a white horse. He would ride backward and forward before them, zigzagging this way and that, and after a little they would follow him. He never attempted to drive, but always led them. The driving began only after the herd had passed the outer rock piles, and the people had begun to rise up and frighten them.

## CHICAGO AND THE WEST.

*[By a Staff Correspondent.]*

### The Horicon Shooting Club.

*[Continued from Sept. 22].*



HORICON SHOOTING CLUB, I learned by talk with Mr. Lawrence, was first organized nine years ago, its lease beginning July 28, 1883. The lease runs for twenty-five years, and covers practically a full township's extent of as fine duck and snipe marsh as can be found in all the West. At first there were 100 memberships, these being now reduced to sixty. There are now forty odd members, and eighteen shares are offered for sale at the very low figure of $150 a share. Time was when the duck shooter would have demurred to paying anything for shooting privileges, but that time is past. A share in this marsh, in view of the present outlook as to the duck supply, will in five years be worth five times, perhaps ten times, the face value of to-day. As to the shooting value of a share, there is now only one club, the Fullerton, anywhere near Chicago which compares with the Horicon. Even in my short connection with sporting journalism in this part of the country, I have seen much of change in duck shooting, and it is not for the better. Take for instance opening day at Fox Lake (Illinois), Sept. 15. The whole cover about Fox Lake and Grass Lake was so full of guns that it was actually unsafe. There were dozens, almost hundreds of shooters, and no one got any ducks. Col. Felton worked all day and did not get a bird. Charlie Wilcox got two ducks, and says that he saw no one who had more than that many. Fox Lake region is open country, right on the same line of migration as the Horicon marsh, and naturally a fine breeding ground also. Compare Fox Lake with Horicon, opening day or any other day, and you have in an instant a comparison of the open system and the preserve system, and you know in an instant what the duck shooter must do if he expects shooting for the future. The preserve system is the only salvation of the game.

Owing to the objections of local shooters to seeing their old hunting grounds shut off from them, and the very practical form these objections sometimes took, the club some time ago adopted the policy of selling shooting permits, the charge being merely nominal, $5 for five days' shooting. It is probable that this course will soon be discontinued.

Between the two clubs which now control this great marsh their exists only the most friendly relations. Their interests are practically the same, and the future of one is the future of the other. I cannot see why the two clubs do not unite, and under their more solid organization build up a still better system for keeping intact this great natural breeding ground. I am inclined to think that a share in such a club would be worth more than one each in the two existing clubs. That, however, is mere surmise, and, as it is, the man who owns a share in either is highly to be congratulated.

The present membership of Horicon Shooting Club is as follows: Geo. Atwell, Max von Baumbach, H. F. Bosworth, W. H. Ellsworth, Milwaukee, Wis.; Franz Brunke, Robert H. Butter, G. J. Clark, Dr. C. H. Kaetel, Wm. Kliefoth, Henry Kloeden, C. W. Lamoreux, Frank M. Lawrence, Charles Wendt, Mayville, Wis.; Ben Buchholtz, E. A. Galloway, J. L Gault, W. I. Hamilton, A. R. Keating, A. H. Lewis, M. O'Connel, A. Wheeler, Louis J. Zinke, Fond du Lac, Wis.; T. F. Bearne, James H. Burns, Dr. J. W. Burns, J. J. Burleton, W. S. Russell, Oakfield, Wis.; Dr. L. D. Cyr, Negaunee, Mich.; H. S. Eldred, Fort Howard, Wis.; George Engel, Kekoskee, Wis.; Chas. Hebard, Pequaming, Mich.; Michael Lehner, Le Roy, Wis.; D. C. McKinnon, Iron River, Mich.; C. M. Ray, Chester, Wis.; L. Rhodes, Kekoskee, Wis.; B. H. Sanford, Sheboygan Falls, Wis.; Chas. Schultz, Kekoskee, Wis.; W. H. Selden, Stambaugh, Mich.; Wm. Strook, Chester, Wis.; E. A. Wetmore, Marquette, Mich. The officers are: Dr. G. J. Clark, president; B. Buchholtz, vice-president; A. R. Keating, manager; F. M. Lawrence, solicitor; R. H. Butter, secretary; Dr. J. W. Burns, treasurer. Board of directors: Dr. G. J. Clark, A. R. Keating, R. H. Butter; B. Buchholtz, F. M. Lawrence, Dr. J. W. Burns.

The club opens its seasons Sept. 1, and closes at Dec. 1.

UPPER HORICON MARSH, WIS.

No spring shooting is allowed. The Wisconsin law protects mallard, teal and woodduck in the spring, but holds the season on other ducks open till May 1—another instance of legislative wisdom. If any one thinks it tame sport to shoot season ducks after Sept. 1, let him go out on the marsh, any day after the 1st, and try it. He will find that much of the wild duck's shrewdness is born already in its head, and the rest of it is learned mighty early.

#### MORNING ON THE MARSH.

The evening passed swiftly, as is commonly the case with the company gathered at a shooting box, and it was late when we turned in. Nevertheless it was only 3 o'clock in the morning when the alarm went off, and there was a hasty rolling out of bed. More hot coffee and a big breakfast, and long before 4 P. M., the little procession of boats was gliding out of the ditch and past the big lantern which all night long burns high on the staff at the mouth of the ditch, as beacon for any belated shooter who may have fallen into the really serious plight of getting lost on the marsh. The dawn was now barely beginning to show. A white mist hung over the marsh, streaked feebly by the lantern's yellow rays. The line of boats pushing out looked spectral, huge and unreal in the weird light and shade, and the trees about the club house stood truncated and visible only above the curtain of hanging fog. I stopped my boat and looked back at the singular picture. Why have we no artist to paint such pictures—pictures new and of a sort to thrill one? Why do they all cling to the same worn-out conventionalities? No picture like this of morning on the marsh was ever painted. It is valid subject for an American, and fit for the grand prize of America, when that shall be worth all the grand prizes of the earth. It will be painted some day, when some artist stands in the morning and watches the grays turn to pink, and sees the giant boatmen passing through the twisting fog, and feels the inspiration in the sharp air blowing from the marsh.

The sun was half an hour from rising when my companion and I were settled, he again on Center Point and I across from him on a little bog just big enough to hold the boat. The light now grew stronger. Above and below the guns began to talk. In the mind's eye one could see each lusty gunner crouching in his blind, peering this way and that in the dim light, and listening for the whistle of oncoming wings. Below and to the west of us the shooting grew heavier, but nothing passed in range of the narrows at the point for some time. A mudhen scuttled back of my boat, and to try the range I took a backhanded shot and missed it finely. Then a pair of teal flitted by in front of the blind, and I got one and missed one, and then I missed another teal, and then some more, and lost two crippled, and missed a pair of teal bodily with my right barrel and killed them both with the left, a good way to average things. That was about all the flight there was. Meantime my friend's gun on the Point had had very little to say. Half an hour after sunup the boats came pushing out of the rice, everybody complaining about the flight and all hunting for new locations. It was evident that the morning's flight did not in any way represent the ducks on the marsh.

#### WHERE THE BIRDS WERE.

On the evening before we had noticed a great many birds going down away over to the west, beyond the rice, and it seeming probable that the great body of fowl was in that direction, four of us started over. Following a crooked channel through the rice, and pushing through the dense growth where there was no channel, we came to a "pull-over" of dry ground, about 60 to 100yds. across. This brought us to one of the quartette of the "burnt holes," a half mile square or more. On the further side of this we saw a great sight, and one worth the trouble of a mile or more of hard work. A vast bank of ducks line the shore for hundreds of yards, thousands of ducks, probably 3,000 to 4,000 birds in one body, "like old times," as one of the shooters said. Investigation showed that these birds were mallards and pintails mostly, with a few spoonbills. They were feeding on snails, of which the greatest abundance existed. This solved the riddle. So long as the birds could come back into this unvisited part of the marsh, where food was handy and plentiful, there existed no especial reason for them to come out in the open and get shot at.

We put the birds out and took stations, but as the day had turned off bright and warm no one expected much shooting till evening. The whole body of ducks simply flew a little further over to the edge of the marsh and settled in another hole. Wishing to explore still further a marsh which seemed to have no end, I pushed on in, dragging and pulling my boat overland at the dry places, and pushing over the wet, until I made the discovery the bog in the burned district was perfectly safe to walk on. Then I left the boat and went on some distance, putting the great bunch of birds up again. Again they circled and settled still further on, and it was evident they could not be worked very well that day. As I had to be back at the club house by noon, I had to give up the interesting problem and return. Before leaving I put up three swans and a number of cranes. In the afternoon the shooters heard a great deal of firing over in that direction and it was supposed that the others who went into the burnt holes had some good sport. The birds may have begun to work, or these may have been northern birds coming in. We had to hurry away that afternoon and did not get out again on the marsh. For my part, I needed no further pleasure and no further proof of the duck supply on these grounds. This was the largest body of ducks I have seen for many and many a day.

Dr. Clark and Mr. Lawrence again went south, and got down as far as Big Lake, on the Diana grounds, where they met Dr. Buechner, Mr. Dicks and Mr. McWhorter, all of whom were doing fairly well. The net result of our hurried shoot was only 36 birds, mostly killed by our hosts, though other guns, those familiar with the marsh, were averaging about a dozen a day.

"This is no shooting at all," said Dr. Clark, "and you have struck the worst possible time. If you can come up again we will send for you in about three weeks. If the northern flight is anything like the average you can stand right where you were last night and shoot 200 to 300 shells a day. Very often the best flight is late, after the frosts have cut down all the cover. You have to hide without a blind then, but if you lie down on your back and shoot you are apt to have some red hot fun. Sometimes the pintails, redheads and mallards fairly tumble over each other. I think we are going to have some canvasbacks this fall, there is so much water."

It now became our duty to leave this comfortable spot. Mr. Lawrence wanted to show us a spring, and we went around by a new road. He did show it to us, too, the largest and boldest spring I ever saw in my life, hardly a spring so much as a creek, gushing directly out from under the hill. The water is cold as ice. A better chance for a trout hatchery and farm never existed than is possessed by the farmer who owns this remarkable flow of water.

#### CURIOUS KEKOSKEE.

On the way home we passed through the village of Kekoskee, where there is a mill, a dam and a bridge on the Rock River. A very quaint place is Kekoskee, and yet a place with a distinction of its own. Kekoskee is the home of the biggest fish story that ever was told on earth. I dare not join this fish story with the record of our visit to Horicon Shooting Club, for, though both are strictly truthful, the former might bring discredence on the latter. I shall therefore tell the Kekoskee fish story by itself, in another place, perhaps in another issue of the paper. In advance I solemnly aver that it is the biggest fish story that ever was told, perpetrated, performed or executed in the history of man. The whole surrounding country is educated up to this fish story. Every man in the entire population has it on his tongue's end, and tells it without a skip or a break. It is unanimous, convincing, overwhelming. A Minnesota champion liar once was lying, when a man from Mayville began to tell the Kekoskee fish story. "Are you from Kekoskee?" said the Minnesota man. "Then hold on, I haven't a word more to say." The story may thus be seen to have a reputation. Great as is this reputation, the story has never appeared in print. It is a FOREST AND STREAM scoop, and one of the utmost importance. The strongest thing about it is, it is true, every word of it. You see, the Horicon marsh was once—but I am anticipating, and I said I wouldn't.

That night we spent at the quaint German inn of the town, so different in its customs from the average modern hotel, and in the morning bade our good-hearted host good-bye with actual regret. It would be regret also to leave the gentlemen who so kindly entertained us did we not hope to meet them again somewhere in the world of sport. It is not often one meets such hosts, such a club, and such a fish story, all on one trip. The story is really part of the appurtenances of the Horicon Club, although that is a shooting and not a fishing club. It runs away back to 1860. At that time Horicon marsh was Horicon Lake, and there was no Horicon Club—really it is hard

to keep from telling so good a thing as the Kekoskee fish story of Horicon country.

---

CHICAGO, Ill., Sept. 21.—The record on ducks has been broken for this neck of woods. Percy Stone last Saturday bagged 103 birds at the Horicon marsh, on Diana Club grounds, almost all the birds being teal. He stopped shooting at 11 o'clock in the morning. This remarkable flight was at a point where on the day before the same shooter had killed only 10 birds. Mr. Stone says he never saw birds come so fast in all his life, and they drew by within 30yds. When he went into his blind he lit a cigar, and before it was burned out he had 11 dead birds on the water in front of him.

Verily, this marsh comes to shoot itself well, as we say in French. A week before Percy's big bag, the club keeper, Yorgey, killed 81 ducks in one day. Since the opening day, Sept. 1, the total average of ducks to the gun has been over 25 a day. Messrs. Hamline, Merrill, Dicks and others have gone over 20 on some days. Mr. Stone's brother killed 40 the same day the big bag was made. In fact, nearly everybody has had good shooting. Dick Merrill is just back from Minnesota, and says he killed more ducks in one day on Horicon marsh than he did in two weeks out there.

Naturally, this news has sent the Diana man hurrying north to the club. Messrs. W. L. Shepard, W. P. Mussey and George Holden started yesterday. Messrs. F. C. Donald and C. S. Burton left to-day. Messrs. L. M. Hamline, C. B. Dicks, C. L. Hunter and Dr. Buechner start Friday. There is not a great deal of shooting done on this marsh, and the above number of guns will not be enough to keep the birds moving well.

Percy Stone is the best amateur duck shooter I ever saw on a marsh. He is a good pusher and a good shot, wiry and strong, and "sandy" enough to go clear through to where he starts for. I fancy the club will be glad it is he who had the "big day," for it is to his stalwart hustling that much of the success and smoothness of the club's affairs are due.

The only other bag approaching this during the time I have reported these matters here was that made four years ago by C. E. Willard, who bagged 101 mallards on the Kankakee. This was in a little feed hole on a small creek. The mallards could not be kept out, and most of those killed were shot at less than 25yds. Of course the mallard bag would be preferable, but in either case the shooting was fast and furious.

OTHER ACCUMULATIONS.

Messrs. Eddie Bingham and A. W. Knox made a brief trip to Koshkonong Lake, Wis., this week, and made a tidy little bag of 25 birds. The deep water ducks are not down yet, and it is the general opinion that the teal flight is not yet in, though I am inclined to think it is, partly, at least.

Mr. W. Y. Wentworth, keeper of Black Hawk Club on Lake Koshkonong, writes me that he wants me to come up and have a go at the canvasbacks when they get in, and adds that he will wire me when that auspicious moment arrives.

Mr. Wentworth informs me—what I did not know—that he is no longer State warden of Wisconsin, the present incumbent being Mr. D. W. Fernandez, of Madison. All gentlemen wishing to remit fines by mail for game law violations in Wisconsin will please cut out this address. A change in the political complexion of Wisconsin caused Mr. Wentworth to make his adieux. He will now have more time for business. This is the same gentleman who advertises the wild celery seed for sale. A couple of years ago I described how they rake the seeds up from the bottom of the lake.

Mr. J. McKay, of English Lake Club, had two very pleasant days with the ducks in the front end of the season, bagging 33 the first day and 28 the next. These were mostly young local wood ducks.

Messrs. R. A. Turtle, Sam Booth and C. L. Halden are just back from a trip after prairie chickens in Illinois. They were gone four days and brought back 90 chickens. They do not seem anxious to tell where they got their shooting.

BIG GAME.

Mr. J. W. Schultz, the successful Rocky Mountain guide whose name has often appeared in these columns, wired me from Blackfoot, Mont., on the 18th: "Just returned with the Philadelphia gentlemen. We had lots of big game. I wish you would send me out a party for October. Will guarantee shots at elk, mountain sheep and mountain goats, or no pay." Mr. Schultz's address is Piegan, Mont.

Gray wolves are unusually abundant in northern Michigan and Wisconsin this fall, and were so all last winter. The deer hunters at Gaylord Club, on Coleman Lake, constantly met their tracks when they were out on the snow last winter, and in the logging country the hands would not venture out alone in the evening. The foreman of one gang was treed by a pack within 300yds. of the camp. Elsewhere I heard of a teamster in the Brulé country, near Saunders, who was followed several miles by a pack. Deer hunters of that section this fall will do well to hang their dead deer up pretty high.

OLD FRIENDS.

This is a very small world, and that part of it outside of Chicago does not amount to a great deal. If you want to meet any man you ever saw, go down and wait at the corner of State and Madison, and by and by he'll be along. I have just discovered that there is living within two blocks of me a man I first met about a thousand miles from here. This is Mr. D. Hugh Halliday, late of Great Bend, Kan., whom I used to see out there every fall. Mr. Halliday has with him the two English setters Mack and Lady, which I selected three years ago from Mr. T. G. Davey's kennels at London, Ontario, at the request of Mr. W. W. Carney, then of Great Bend, but now of Portland, Ore. Mr. Carney owned Lady, but when he left for Oregon sold her to Mr. Halliday, who owned Mack. Now, here are both dogs, hardly a gunshot from where I live. It is much like meeting old friends. I shall remember a very pleasant day I put in at the Kansas quail with Lady in company with Master Charlie Carney, some account of which trip I believe I made at the time. All we need now is Mr. Carney and Charlie, and doubtless they will step in from Portland before long, so that we can all go out shooting together. Meantime Mr. Halliday and I forthwith agreed that we must take the dogs out for at least a try at a covey of chickens somewhere near the city, if we can get out of town for a day before it is too late.

Something more of interest attaches to this same setter Mack. When I saw him at Great Bend last fall he was suffering from an injury which bid fair to destroy his usefulness, if not to end his life. Some wretch had shot him with a rifle, the ball striking him right at the apex of the lower jaw, breaking the jaw bone entirely off there, and also breaking it off well back in the left jaw. The whole half of the jawbone hung loose, and the wound did not heal. The dog suffered a great deal and could eat nothing but milk. When he left, Mr. Halliday was contemplating having the entire loose bone removed, an operation which would have left the subject a pretty bad cripple. To-day Mack has a solid, firm jaw, with all the bone in it, and no disfigurement except a protruding tooth and an unhealed opening below the jaw. The successful operation was performed by Dr. Castle, a dentist of Great Bend. The dog was put under the influence of chloroform, and the flesh dissected back from the injured bone. The ends of the bone were then drilled and bound fast together with silver wire. The incision was closed and the proper dressing and bandages having been applied, the whole head of the dog was inclosed in a large and heavy muzzle. For a time Mack was fed through his closed teeth by means of a syringe, but he can eat now all right. The bone seems to have knitted and the jaw is firm. Mack is now fat and hearty, and I know he wants to go out hunting because he told me so this evening. I may close this odd little story by saying that the man who is supposed to have shot Mack was taken sick and died not long after the act. The dog was always perfectly harmless and friendly. He and Lady make a very lovable brace of bird dogs, and I am glad their owner has them where I can see them often, for I have sort of taken a shine to them.

DR. THOMAS ONCE MORE.

Rev. Dr. H. W. Thomas, whose three summer deer made the text for long mention last week, has written a letter in reply thereto, which I take pleasure in offering in full, with comment, which will be, perhaps, sufficient to close extended reference to this singular and interesting case. The letter follows:

*E. Hough, Forest and Stream:*

One who preaches should be willing to be preached to; and in this spirit I have read with patience and interest your sermon on the duty of the citizen to obey the laws of the land, and the great offense of killing a deer out of season.

Obedience to the law is healthy teaching, and in this no one agrees with you more perfectly than myself; but I must still claim that the intent of a law should govern its interpretation and application, and that these as understood by the people when the law obtains become the rule of conscience and conduct for the sojourner in their midst. Nor are the people in this instance "poor devils," as you call them, but intelligent law-abiding citizens, who feel that they are not violating the intents of the statute in killing deer out of season, for use. And it seems quite too severe to characterize it as "stealing from the State" or from "these poor devils" when one goes into their midst and without concealment and with their knowledge and consent does the same thing. Our party left more money in that region than would pay for the deer, and the penalty for killing them, too. The people feel—and I think they are correct—that the State does not intend to prohibit a reasonable right to the use of the game about them; and they concede the same privilege to those who for a time are their guests.

There is little danger that the few who may spend a month in the summer in that sparsely-settled region, that cannot accommodate many, will seriously lessen the amount of game. Your object in writing you say is, "not to preserve these animals for myself, or my sporting friends, or the public; I want these animals preserved for their own sake;" and then pathetically, "they are going, Dr. Thomas does not know how fast." If the desire is to preserve deer "for their own sake," why permit them to be killed at all? If the purpose of the law is to regulate the killing, reduce the public hunting season to a certain time, that is well; but why not regulate the number that any one hunter shall kill? I was told that individual hunters coming from other parts of the country and from other States have killed thirty, forty, fifty, and one eighty, deer in one season; they come in and kill them for profit, for sale, and ship them out of the State.

Is it strange that the few who live there all the year feel that it is not wrong to kill a month or more before the authorized hunting season, for their own use? I should favor a law limiting the number that any one non-resident sportsman should be permitted to kill say to ten or fifteen. In some such way the fearful slaughter may be prevented; but not by any severe interpretations of the statute as to the few killed out of season. In such a reasonable enforcement of the law as it is, I am "with you;" but if it is to be accounted "stealing" when one does a little modest shooting, as in my case, or if it must be done in secret and denied after it is done, and then in "season" all the world rush in to kill and ship off, then I agree with you that one should "preserve his self respect;" but fail to see how the destruction you lament is to be prevented, even "for the sake of the animal." H. W. THOMAS.

CHICAGO, Sept. 20.

In reply to the above, I took the liberty of writing to Dr. Thomas, and I sent him a letter chock full of good advice. I am always ready to lend a helping hand, especially to ministers. It occurs to me, however, that there were some things left out of that letter which ought to go, and as Dr. Thomas is likely never to write to me any more, I suppose I shall have to advance these things here.

Dr. Thomas's letter is lame, very lame, one of the lamest things that ever came up, even in excuse of violating game laws. If Dr. Thomas will look in his library, he will find a dusty little book, "Principles of Logic."

If Dr. Thomas will carelessly turn the leaves of this little volume, opening it almost anywhere, he will find useful and interesting reading. He may learn, for instance, that a lot of detached assertions don't prove anything. They must have some sort of relation before they can be premises in a syllogism. He may learn also, in substance, that a syllogism with a faulty middle in its anatomy is no good on earth. He may learn also that you cannot jump from particular to general, and from general back to particular, just any way you like when you are framing premises to prove your propositions.

If Dr. Thomas will now close the well preserved little book and read the letter shown above, he will know in his own heart, just as everybody who reads it will know in his own mind, without any logic, though perhaps without knowing how to get at the sophistry of it, that there is nothing whatever left of his letter.

The law of a State is made for each citizen and every citizen of that State. The courts construe intent, the citizen cannot. If the citizen may construe the intent of the game law, he may as well construe the intent of any other law, and so pervert it to his own wishes and purposes, as was done here. We can not pick out for ourselves the laws whose intent we wish to construe. This conclusion is known as *reductio ad absurdum*. It is sort of awkward to run against. If we followed Dr. Thomas's argument, and took the matter of intent in our own hands, we could excusably construe ourselves into a very decent state of red anarchy, with a little arson, rapine, pillage, fire and sword on the side.

To pay my "poor devils" of the woods a lot of money, and then to ask their opinion about the intent of the law as to summer deer—that is what the logic book calls the argument *ad hominem*, isn't it? In other words, the natives are apt to practice summer killing, and your guide is mighty apt to feel just the way you do about that question. He can't afford not to. Dr. Thomas asked these few men about their idea of the intent of the law, but these few men did not own the deer. The people of Wisconsin owned those deer. To the people of Wisconsin, therefore, as represented in their courts of justice, organized expressly for that purpose, he should go and ask for an expression of opinion as to the intent of the law protecting deer. He will very quickly find out the intent, and also certify himself about the spirit and the letter of the game laws. This is good logic, but it rises above the realm of logic. It is just plain, hard, horse sense. Everybody knows it is true. Incidentally, doesn't Dr. Thomas?

Dr. Thomas commits the logical fallacy of confusing the general and particular when he seeks to tangle me up over my statement, "I want these animals preserved for their own sake." He could have read further on the statement that the sportsmen were trying to get better laws, so that all might have an equal chance to kill some deer, under wise restrictions, which would keep the deer from being destructively pursued. He asks the question, "If the desire is to preserve deer 'for their own sake,' why permit them to be killed at all?" He errs in this because he loses his premises. (1) These are not my deer, and my wish is merely a personal one. (2) I do not make the laws, and cannot change them. I cannot permit or forbid the killing of deer at any season. The question is baseless, and has no argument in it. I don't mind saying, however, that if I did not have the making of these laws, as Dr. Thomas is good enough to suppose, and if I could enforce them, there wouldn't be a deer killed in the United States for 10 years, and not one after that in the summer time, and never one for sale. We certainly would have deer. But what has that to do with this case?

As to the question whether more deer are killed in summer or in legal season in Wisconsin, neither Dr. Thomas nor I can decide. In the summer the deer take to the water and are comparatively helpless. It is not difficult to kill one then. Unquestionably, more deer are killed then, illegally, than are killed in the legal season by the only legal method, the difficult art of stalking. The great bulk of the heavy killing reported by Dr. Thomas was in every probability done by the destructive and illegal method of hounding. Of course it is wrong. Of course, it ought to be stopped. Of course, there ought to be a limit set. Of course, every sportsman ought to lift voice and hand against this sort of butchery also. Of course, every shooter who admits he has broken the law in this way ought to go and pay his fine, just as Dr. Thomas ought for breaking it in his way. But granted that, what has all that to do with this case? Does the legal or illegal killing of one or many deer in the fall or winter excuse Dr. Thomas or any other man for the illegal killing of deer in the summer time? This is a very bad sample of logical reasoning, and we have a right to expect far better from Dr. Thomas. Suppose I am a member of Dr. Thomas's church, and I commit the sin, say, of breaking the Sabbath. Dr. Thomas comes along and says:

"Here, this is never going to do, see?"

"Well, why not?" I ask. "Didn't I see seventeen of the other members committing the sin of theft? That lets me out, see?"

"Well, no," Dr. Thomas replies, "I don't see." And he can study a long time before he ever will see. He will see the soundness of the argument of his letter at about the same time.

If Dr. Thomas will now lay down his little book on the principles of logic, and pick up a bigger and better Book on the principles of right and wrong, he may find a little parable, ending, "First cast out the mote out of thine own eye, and then thou mayest see clearly to cast out the beam that is in thy brother's eye."

It is wonderful how roughly some of these plain, homely shoes fit on the soft corns of our daily lives.

Sportsmen know the laws could be improved, and know they are ill-enforced. But sportsmen want better laws. They want more respect for the existing laws. They want a beginning, a rallying point for this increasing of the respect for the law. They have it here, and they should insist upon their chance. If a case like this, so prominent, so widely advertised, so openly admitted, so badly excused, and so surrounded with every sensational feature to give it notoriety—if a case like this can escape censure and penalty, then what right have the sportsmen to hope for any restraint whatever upon the killing of deer, now or at any time, under this or any future law? This case would be used continually as a pretext. Dr. Thomas does not stop to reflect that in killing his three deer he perhaps killed dozens or hundreds of other deer. He does not reflect that dozens or hundreds of law-breakers may seek refuge behind the cloak of excuse held up by him, which we most sorrowfully call all too ill-made and flimsy. Upon the other hand, take this case, nail it, establish it, record the fine—and these three deer may have been well sacrificed. They may save dozens or hundreds from a like fate, for this case has attracted more attention than any similar one in the West, and it will be followed to the close by the public.

Much of this may sound rough, but I do not mean it so, and I firmly believe the sportsman's position in this is right. I should like to see a fine recorded in this case, because I believe it would do as much good as twenty fines in other cases. There is a compliment to Dr. Thomas in that. I should not like to see the fine higher than the lowest amount of penalty named, and believe the warden of Wisconsin would urge fine for only one deer in this case. Dr. Thomas should ride straight. He should pay his fine. He should square it. When he has done that, I think he will find the sporting press as free with praise as it has been with censure. He is no deliberate law breaker, but a good and innocent man, overjoyed and exultant at the pleasure of a trip in the woods, and taking up too readily with the easy customs of a country which should be taught and should not teach. Many happy days to him in the woods, and before these are all past, he will see much of this from the sportsman's standpoint, I am sure. E. HOUGH.

175 MONROE STREET, Chicago.

## Forest and Stream's Shooting News Postals.

NOTES FROM THE GAME FIELDS.

### New Hampshire Game.

LANCASTER, N. H., Sept. 24.—I too, with "Von W.," wonder where all the gray squirrels come from, and I suspect that we must look for a solution of the problem to the same source that informs us "where all the pins go to." I have not heard of a "gray" in these parts for at least three years and all of a sudden they appear on the scene, and our sportsmen come in with a bag of from three or four to a dozen. What seems more strange to me is the fact that squirrel year is not confined to New England, or a portion of it, but, as "our paper" informs us, extends throughout the entire eastern portion of the United States. Were it not for this we might conclude the squirrels migrated from one portion of the country to another.

Ruffed grouse do not as yet show up very plentifully, though, of course, it is still early to hunt them very successfully, even if they were plenty. It seems the wet weather must account for the scarcity, as broods of young were frequently reported in the spring.

For some reason, I do not hear anything from the Connecticut Lakes since the shooting season opened. I expected before this to report the capture of several deer from that place, but "nary a word" do I hear. There are (or were last summer) plenty of deer, more than I have ever seen there before, and I am pretty well acquainted with that country and know, too, that summer shooting is not indulged, and, for that matter, very little of that is done anywhere in the county. Coos county is a pretty safe place to count on a deer, if you really want one, and there are plenty of camps, guides, dogs, etc., for your accommodation if you will avail yourself of them. I am sorry to say that hounding is allowed in this State from Sept. 15 to Nov. 1, and furthermore I am sorry that all good sportsmen (and who ever saw a bad one) don't take the same view of the dogging business and abolish it. It's time. ROB.

### The Pocono Mountains.

NEW YORK, Sept. 25 —I have hunted for the past ten years in the Pocono Mountains of Pennsylvania. I have always stopped at the Spruce Cabin, owned by Wesley and Milton Price, in Canadensis. They own considerable hunting territory, which is a decided advantage, as a number of land owners now object to trespassing, and some employ watchmen to keep off trespassers. I spent a week up there lately, and can say that there is every prospect of a good supply of ruffed grouse, of which I saw many broods and also many single birds. There are plenty of rabbits or hares, and although the woods are alive with red squirrels there are but few of the gray variety. Ruffed grouse were very scarce in that locality last fall, but it looks as if they would make up for it this year. Deer signs were numerous, and some lady boarders when out driving saw a black bear which ran across the road ahead of them. This locality is the best hunting ground that I know of near New York. The above named brothers are excellent guides and have thoroughly trained dogs. F. W. S.

### "The Wind."

I HAVE just enjoyed reading Wilmot Townsend's delightful article on "The Wind," and wonder if he knows that the verse of the old English hunting song he quotes is intended to describe a soft damp winter morning, when the frost will be loosened in the clods and pastures, and the scent lies well? Probably he does, but we usually in this country speak of "hunting" as the pursuit of game of any kind with the gun. In England "hunting" is only the chase of the fox or deer with horse and hound. If the hare is the game, it is "coursing," and whenever the gun is used it is "shooting," and a "hunting morning" implies anything but a good one for partridge or woodcock shooting! It may be a gentle drizzle, or a "Scotch mist," and yet be all right for fox hunting.

I see numerous other correspondents note the great squirrel migration of the year. VON W.

### Maine Ponds and Mountains.

BOSTON, Sept. 8.—In your issue of Sept. 1 Fred K. Owen gives the elevation of West Chairback Pond. Me., as 2,120ft. above sea level, and that of Chairback Mountain as 2,270ft., and he claims the pond as the highest trout pond in Maine. I have fished it many a time, and climbed Chairback many a time, and feel sure that Mr. Owen is wrong in a few points. Whatever the height of West Chairback Pond, the summit of Chairback Mountain must be far more than 150ft. higher. I should say two or three times that at least, and I cannot resist the impression that Greenwood Pond and the Spruce Mountain ponds, all good trout waters, are higher than West Chairback Pond. Will not Piscataquis county men settle it. C. H. AMES.

### Buckshot in a Chokebore.

AUSTIN, Texas, Sept. 19.—Mahlon Gore asks about buckshot in a chokebore. I had a very good shooting gun, 10-bore, for sizes 3 to 8 shot, but with buckshot at fifteen paces I never could find a fence or tree big enough to stop them all. I finally remedied the trouble to a large extent by melting stearine candles, and after seating the buckshot carefully in the shell, filling up the interstices with wax, and finishing with usual wad and crimp. Care of course must be taken that the inside of the shell does not exceed diameter of the choke.

J. V. B.

### Connecticut Game Prospects.

NORTH WESTCHESTER, Conn.—Our season opens Oct. 1, and from a few walks through the cover I should say that the shooting was going to be much better than last season. Have two broods of young partridge located and several flocks of quail. Last year very few young partridge were bagged in Connecticut, but this year there seem to be young birds. E. A. C.

### Fin and Feather.

TOMS RIVER, N. J.—The inclosed clipping from the *Ocean County Democrat*, printed at this place, may be of interest to your readers. It reads rather "fishy," but I have no doubt of its entire truthfulness, as I am personally acquainted with Austin, and he bears a good reputation: "Nate Austin, of Bamber, went out on the pond at that place one day last week for the purpose of hunting ducks. While looking for ducks Nate saw one and attempted to fire at it, but the cap snapped. The duck making no movement to get away, Austin went up to it and found it apparently fast to something. He took hold of the duck and on attempting to raise it out of the water he found that a large snapper had the duck by one of its legs. Nate landed both in his boat and the snapper, upon being weighed, tipped the beam at 14lbs. Nate made his supper off the bird and sold the snapper to Dr. E. C Disbrow, of this town." G. C. L.

### An Octogenarian Sharpshooter.

HIGHGATE, Vt., Sept. 19.—Flight woodcock are coming here now in goodly numbers, and the few who are posted and know their resting and feeding grounds are making good bags. An immigration of gray squirrels has made them very plentiful in this vicinity. Their skins tacked up on every woodshed shows that the farmer's boy and his pot-metal gun have not been idle, and that they are reaping their share of the harvest. My old governor, though eighty years of age, is out with his muzzleloading rifle, and at arm's end (off-hand) can still pink a squirrel through the head, and no sighting shots required.

STANSTEAD.

### Ontario Ducks.

SOWERBY, ALGOMA, Canada, Sept. 11.—The Kingfishers have been camping with me this summer and have had grand sport with the bass. I guess Mr. Hickman will write you all particulars. "Hickory" is well up to camp business. I found them all perfect gentlemen and well up to the little game they came for. Eight gentlemen all told. The trout have only commenced to bite. I am expecting some of them to return again this fall. Partridge very plentiful, and in another month the ducks will be here by the million. G. F. D.

### Wood for the Camp-fire.

BOSTON, Sept. 16.—Your editorial discussion of the best wood for camp-fire is all right for the region of the plains and Rocky Mountains, but leaves a great deal to be said about other hunting grounds—*e g*, the Maine woods. In Maine the camper always has wood at hand in abundance, but much of his comfort depends on his choice. For myself I have found the black ash the best. When I can fell a black ash I am all right for my camp-fire. Of all green woods I believe it to be the best. I would like to hear the opinions of some of the brethren.

C. H. AMES.

### Monroe County, Pa., Grouse Shooting.

THE prospect this fall of good shooting is far above the average of the last few years. Rabbits are abundant. Grouse are also more abundant than since 1890, and with the opening of the season, Oct. 1, good sport is predicted. One of the most favorable places to visit is Analomink, situated on the famous Broadheads trout streams. Only three hours from New York by the D., L. & W. R. R. Excursion tickets to and return from Spragueville (the name of the station) costing $4.40. Three express trains daily. Y.

### A Vermont Reward.

RUTLAND, Vt., Sept. 20.—To any fish warden or any other person who shall cause the final conviction of any person found guilty of any of the game laws, the undersigned will, until further notice, allow a sum equal to one-half of the fine imposed in each case; certificate of the justice imposing the final sentence to be the evidence of who is entitled thereto. Vermont Fish and Game League; Henry R. Dorr, President; John W. Titcomb, Secretary.

### Hawk Migration.

HACKETTSTOWN, N. J., Sept. 23.—On Wednesday morning, Sept. 21. I noticed an unusual flight of hawks, some 150 to 200 individuals, circling over our town, too high to distinguish the species, yet apparently all the same. It was a curious sight, and something I have never before seen during an experience of more than 20 years with rod and gun. JAMES L. SMITH.

[Such flights are not uncommon in the autumn.]

### Vermont Small Game.

RUTLAND local hunters report an abundance of game. They say the woods east and west of Rutland are alive with gray squirrels and partridges. Blackbirds are plenty, and a number of wild ducks have been seen on Otter Creek. Sportsmen claim that feathered game is unusually plenty this season, and think that the strict observance of the game law has had a great deal to do with it.

### The First Canadian License.

BOSTON.—You know it requires a license now costing $25 for an American to shoot in Canada. My partner, Dr. H. M. Johnson, who started Aug. 29 on his annual two months' duck shooting trip got out the first license, No. 1. JONN SHAW.

### PUBLISHER'S DEPARMENT.

FOREST AND STREAM never loses its interest, which, with regular readers, amounts to fascination. It is not a "sporting" paper, but a true sportsman's paper, one in which every lover of nature will find real and rare pleasure.—*Baltimore Methodist.*

BLOOMINGTON, Ill., Sept. 15 —Forest and Stream Pub. Co.: The Trajectory Test received O. K and would not be without it for many times its cost.—R. E. HURST.

ASHFIELD, Mass., Sept. 15—My friend's four year old little girl has been looking at Mr. Thompson's picture of the panther in the last issue of FOREST AND STREAM, and says "it is a real mean looking cat and not a nice pussy at all."—CANTEEN.

"PENNSYLVANIA RAILROAD TO THE COLUMBIAN EXPOSITION" is the title of a very sensibly prepared and useful handbook of information, issued by the Pennsylvania Railroad for the guidance of its patrons. There are descriptive notes of New York, Philadelphia, Washington and Chicago, with many illustrations and maps of the cities named.

# Sea and River Fishing.

## ANGLING NOTES.

### Memories.

IN JOSH BILLINGS'S Almanac there was a long line drawn to include the first days of the month of September, and opposite was the legend, "About these days is a good time to trade mules." If Josh had been of a different turn of mind he might have written that about these days the larger part of the great army of "summer outers" are returning to their homes—chiefly to homes in the cities and larger towns. I was reminded of this to-day when I saw a trainload of people with their faces turned southward from northern New York. Nearly every one in the car had some memento of the summer, and nearly all looked brown and happy, and well and strong, and I presume that they were better in mind and body for the vacation which was drawing to a close. The souvenirs in the corners of the car seats and in racks overhead, were many and varied, and told of the mountains, the forests and the lakes; of the fashionable caravansaries, the quiet farmhouses and the camps under canvas and bark; and also told of fishing and shooting and boating, and tennis, and straw rides, and moonlight walks, and dancing and flirtations. I do not mean to say that they actually told of all these summer amusements out loud, but they suggested them, and it occurred to me that these people were taking home with these stacks and stacks of memories of the summer, perhaps to dream over during the winter. I certainly hope they were all pleasant memories, but I cannot tell, because I am not a first-class mind reader; nevertheless, I shall try my 'prentice hand on two men returning to New York city. One is loaded with the memory of a flock of black ducks that he saw in a creek in northern New York, and when his thinking machinery is in working operation, he recalls how he crept through the brush until he got within range, and then raised his gun to his shoulder and turned loose both barrels on the flock as they sat on the water, and afterward picked up three dead ducks and carried them to his boarding-house and had them cooked. Of subsequent events regarding the killing of black ducks in the month of August he has no knowledge—as yet, but he will have, later—therefore his memory rests with the eating of the ducks. If he could know that a native of the region saw him kill the ducks, got his name, made a complaint against him, and that a suit for the penalty, namely, $25 per duck, was being instituted at the present moment, the memory of the event might not be entirely pleasant.

The other gentleman is probably weighted down with the memory of a day's trout fishing on a lovely mountain brook not many miles from the creek where the gentleman of the first part killed the ducks. Under the soothing influence of an after-dinner cigar he pictures again and again the winding of the stream, and here and there he takes a speckled-sided trout and places it on the ferns in his basket. Then again, in memory, he returns to the hotel and the cook prepares the fish for his supper, and his friends congratulate him upon catching sixty odd trout from an over-fished brook. I wonder if it would disturb the pleasant memory if he should know that this day-dream had a tail to it with a string in the end, because the cook was mad when she saw the baby trout, and measured them and found that about forty of them were from three to six inches long, and went before a Justice of the Peace and swore to this fact; and that the porter of the hotel also swore that they were the same trout that this gentleman delivered to him; and that a game protector was now preparing to bring a suit in the Supreme Court for the penalty? Very possibly, for even the brightest of day-dreams are expensive at $400 per dream.

### The Camera in Alaska.

Mr. S. R. Stoddard, of Adirondack and Lake George Guide Book and map fame, has just returned from a trip to Alaska, where he went to expose several hundred negatives of various sizes to receive impressions of natives, glaciers, rivers, mountains, salmon, salmon fisheries, salmon canneries, etc. His plates ranged in size from the snap-shot variety up to a curved film 20 x 50in. in a camera with a lens having a lateral motion and operated by clock work. His companion on the trip was Mr. R. B. Burchard, of New York, who was his companion also on the canoe trip in the Atlantis, recorded in FOREST AND STREAM. When I called upon Mr. Stoddard I received an impression myself, and that was that the very live black bear that the gentleman had brought with him from Alaska would be a most interesting and companionable pet for somebody—in Alaska, but he was altogether too familiar in his manners for the effete East, when he was turned loose with nothing on him but the skin in which he was born. It may be all right in Alaska for a black bear with teeth and claws and things to sit in a man's lap, but it is not considered good form in New York State.

I found that the negatives were being unpacked but had not yet been developed, so the result of the trip is not positively known, but Mr. Stoddard feels that he must have, out of the large number of exposures, some excellent views. On a map I followed his route but I have not space to even outline it in a note. My interest centered at Yes Bay, east of Prince of Wales Island, near the head of Behm Canal, into which the Unuk River flows. Here was found a salmon cannery, and across the mouth of the inlet stream was a dam, and the salmon were jumping at it to get above it. Below the dam the water was so filled with salmon that they showed plainly at the surface and they were constantly jumping, so that scores were in the air at the same time. Mr. Stoddard took several shots with a camera at the fish that were trying the dam, and also at the school below. The fish had crowded so in order to pass the dam that many had been forced into shallow water in little setbacks, where they were found dead or dying. The fish were so thick in the stream that Mr. Stoddard had only to walk to the water's edge, stoop and lift one out with his hands. It is to be hoped that these plates, which will show the state of things at Yes Bay, may develop perfectly.

### "Old Sam's" Pike.

I read the first part of "Old Sam's" article in last FOREST AND STREAM on the pike and pickerel question with some dismay, for when he offered to compromise I did not then see any ground upon which we could meet for this purpose, and I really felt that a man who would not

compromise a fish question, particularly with a Kingfisher, deserved to be sentenced to a diet of pike—the slimy, bony kind—flesh for sixty days. I overlooked the date line or there would have been no misgivings concerning the compromise, but when I read down to the point where I realized that "Old Sam" was writing of a Kentucky fish I felt that I was on solid ground again.

I do not dare to take any liberties with the name of the fish pictured in FOREST AND STREAM, as there would be a row instanter if I did, for it is the picture of the pike such as was mentioned in an Act in the reign of Richard II. in 1382, and the same kind of pike that was served at a feast given by the Archbishop of York in 1461, and that sold for a higher price than salmon in the reign of Edward I., and for double the price of a lamb in the time of Henry VIII. And it is the pike of Izaak Walton, as it is also the "pyke" of Dame Juliana Berners, who had a proper appreciation of it, for she says: "The ele is a quafy (by which she means queasy, in other words it makes one sick at the stomach or gives him a pain in the neck to catch one of them) fyffhe, a rauenour and a devourer of the brode of fyffhe; and for the pyke alfo is a devourer of fyffhe; I put theym bothe behynde al other to angle." She had no particular use for the pike, and only introduced him after parading the "gentyll famon," the "deyntous troughte," the "delycyous grayllynge," the "fwete barbyll," the "ftately chevyn" (chub), the "holfom perche," and the "menow," which is "better when it stayeth in the water." I have no more use for the pike than had the good dame, but besides these people mentioned who called the like of the pictured fish a pike for several hundred years the naturalists call it a pike to-day, and it is a serious matter to kick against the naturalists, and I am afraid to do it. But what does "Old Sam" think of calling his fish, the Kentucky pike, the Muskingum River pike, or the Chautauqua Lake pike, for I assume that this is the fish he means. I think it was a Kentucky angler who said: "There is not the slightest occasion for any sportsman confounding the black spotted pike mascalonge, the yellow-spotted pike [*i. e.*, the fish of the FOREST AND STREAM picture], or the common pickerel [*i. e.*, a small fish with reticulated markings on its sides and which averages in size from 1½ to 3lbs., and which is the pickerel proper], with unspotted pike or great northern pike." So here is another name if it suits better, namely, unspotted pike. The only trouble is that "Old Sam" will again run against the scientists who say that the unspotted pike, Chautauqua pike, Muskingum pike or Kentucky pike is really the mascalonge without spots. An effort was made to give this fish the scientific name *Esox immaculatus*, or pike of solid color without spots or markings, but the fish sharps would not have it, saying *Esox nobilior* would answer whether solid color or spotted, Kentucky pike or Wisconsin mascalonge. Now if "Old Sam" does not accept the compromise offered, he must raise the hair of the naturalists. A. N. CHENEY.

## PUT-IN BAY BASS FISHING.

FOR many years the western end of Lake Erie has been famous among anglers as the home of the black bass. The islands reached from Sandusky by steamers have been visited by members of the craft, and their outlying reefs and rocky points have furnished recreation and inspiration for judges and statesmen, editors and merchants, the clergy and the leisurely tourist.

From Sandusky, Cincinnati and Cleveland, as well as cities of the East, the lovers of black bass fishing make their pilgrimages in June and September. Some of them sail in their yachts: some have bought little islands and built upon them; the majority take the steamers leaving Sandusky at 2:30 and 3 P. M. for Put-in Bay, where they arrive in two and one-half hours, at a cost of 50 cents, and where they find quarters in hotels charging usually two dollars per day. Boatmen are readily hired for two dollars a day; but few of them know just at this time where the angler can find the fish he is looking for.

Yesterday a fisherman caught nine bass in a forenoon's fishing on Ballast Reef, and the news was quickly circulated among the disappointed visitors, with the result of inducing several of them to stay over another day to try the grounds once more.

The range of fishing localities is somewhat extensive, embracing the rocky points of Middle Bass Island on which the town of Put-in Bay is located, Ballast Reef, Buckeye Reef, Rattlesnake Island, Starve Island, Gull Reef, Gull Island Shoals, and Chicanole Reef.

The best catch made recently was made by the Jay Cooke party about the middle of September—47 fish, consisting of black bass, rock bass, and a few pike-perch (here called pickerel), white bass and saugers. The bass, as a rule, are small, few of them exceeding 1½lbs. Certain occult signs, discernible only to the initiated, point to good bass fishing in the near future. Some ardent fishermen look forward less hopefully and fear that the glory of Put-in Bay will be dimmed unless something can be done to restore the waters. The causes of the falling off are unknown. The scarcity of bass can not be charged to the operations of commercial fishermen, because the pound nets capture few of these fish. It occurs to the writer that the lack of a close season during the spawning time may have a great deal to do with the decline of hook and line fishing. The lake is full of minnows and other food for black bass, and the waters are as suitable as ever for their habitation.

During our stay we met Col. John M. Wilcox, editor of the Cleveland *Press*, Mr. W. J. White, Dr. E. E. Beaman, Mr. J. H. Holmes of Cleveland, and Mr. J. J Stranahan, superintendent of the Put-in Bay station, U. S. Fish Commission, all of whom are greatly interested in the welfare of fish in western Lake Erie. Mr. W. G. Akers of Cleveland, whose Forest City House is known to anglers near and far, informed the writer that the fishing in Put-in Bay and vicinity has been poor for the last three years. He was in the habit of going to the islands regularly and has made some very large catches, but finds little to tempt him into the old grounds at present.

Mr. Akers states that brook trout are unusually abundant and thrifty in the preserve belonging to the Castalia Club. He has received numerous fine creels of the fish from members of the club during the last fishing season. Will it come to pass ere long that good fishing can be found only in private waters wherein the fish are protected and fostered by the prevention of injurious fishing and the judicious application of fishcultural operations?

PUT-IN BAY, Ohio. T. H. B.

## CASUAL MENTION.

*Editor Forest and Stream:*

Some weeks ago there appeared in the FOREST AND STREAM a communication from a party by the name of Hough, hailing from some town in Illinois, in which the writer complained that he could not find a line strong enough to hold the black bass that he had succeeded in hooking in the course of his piscatorial pilgrimages in the Northwest. With this I send you to be forwarded to Mr. H., a section from the leader end of a line I used all last fall in stream fishing for small-mouths, with an unmeasured amount of satisfaction, and without a single breakage. Three different times it landed a double catch of good fish (all small-mouth bass of decent size), and altogether proved itself worth many times its cost. This paragraph is not written for the purpose of advertising any particular maker, for the line was taken from a spool of No. 25 unbleached linen thread, purchased at a dry goods store at a cost of 8 cents, and I do not remember the name of the maker. Of course such a line would hardly do for trolling, since it is only twisted, and not very tightly at that. But if Brother Hough would like to have one, I would be very glad to go into a Toledo store and buy him one, for which he could remit when he got ready. It might be added that all the treatment this line ever had was a dipping in boiled linseed oil, and a little rubbing with oil after it was partly dry.

In the current issue of the FOREST AND STREAM Mr. Hough expresses some surprise that so little has been written about grayling fishing during the last four years. The truth is there has been, and still is, some excellent grayling fishing in the lower peninsula of Michigan, especially in the two rivers that he is considerate enough not to name. The best of it is thirty to forty miles from a railroad tie, and the few who enjoy it are not writing about it very much. But this is true in the opinion of those who have tried it, that the finest piscatorial sport imaginable, the one that comes nearest the ideal in perfection, is fly-fishing for grayling on one of these rivers from a boat made for the purpose. Owing to the difficulty of access, the price of good boatmen who understand the rapid water, and other outlays, it is about as expensive as salmon fishing, but under ordinarily favorable conditions there is no other fishing in which the fisher gets such satisfactory returns for his investment.

Next spring, after Mr. Hough gets his game pocket turned inside out, if he wants to go grayling fishing, and will address a postal card to the undersigned, he can hear of something very much to his advantage.

TOLEDO, O., Sept. 24. JAY BEEBE.

### Bass in the Mohawk.

SCHENECTADY, N. Y., Sept. 25.—Now is the season of the year when the Mohawk black bass fisherman spends much of his time upon the river. Bass fishing here begins in September, after the first frost, when the water is low and clear. During the past few years the Mohawk has been low and clear only sporadically. Owing to the wholesale destruction of timber in the Adirondacks and in the valley of the Schoharie Creek the river rises and becomes roily after slight rainfalls, but now the river is in fairly good condition.

Bass are not natives of the Mohawk. They first made their appearance in 1847 on the opening of the branch canal from Oneida Lake to the Erie Canal, when they came in schools, and in the two following years were caught by fishermen from the shores. Within the past three years one six-pounder has been caught, but a four-pounder is a curiosity and a three-pounder is an achievement.

Between Schenectady and Amsterdam the fishing has virtually been ruined by the establishment of large factories, which send their dyestuffs into the river, driving the bass away to less poisonous waters. Probably the best still deep-water fishing in the Mohawk is now to be found between Stryker's and Yost's, but very fine sport is to be had below the upper aqueduct, four miles below Schenectady, in the midst of some of the most charming scenery in the State. Here, in the pools below the rifts and in the long, still reaches of water down to the lower aqueduct at Crescent, is fine ground. A convenient way to reach it is by train from Schenectady or Troy, getting off at Aqueduct Station.—*New York Times.*

### Potomac Black Bass.

WASHINGTON, D. C., Sept. 26.—*Editor Forest and Stream:* On the 8th inst., with a companion, I tried for black bass in the Potomac River near Williamsport, Md., and took seventeen, weighing in the aggregate 28lbs. One splendid fellow weighed 5lbs., down weight. On the 22d we went again and took eleven, weighing 21lbs., the largest showing 3lbs. 7oz. These were considered unusually good catches for that place, though I, as well as others, have sometimes surpassed them in the same locality. Both flies and spoons were rather disappointing; the fish taken with them averaging little over half a pound each. The favorite bait used was the "stony," with peeled crawfish for second choice. October is said to be the best month for that region. I hope to be able to speak from experience in a few weeks. I failed to get to the West Virginia trout streams this season, but one of our last year's party reports to me that he and two others gave four days in August to the headwaters of Greenbrier River, fishing from four to eight hours a day. Results, first day, two rods, 190; second day, two rods, 166; third day, two rods, over 200; fourth day, three rods, 327. The trout were of very good size, but the difficulties in following the stream were the worst any of the party had ever encountered. Next season, ho for the sources of Cheat River. JERE WILLIAMS.

### Trout of the Second Connecticut.

"OMPOMPANOOSUC" asks about the trout of Third Connecticut Lake. I am sorry I cannot answer him, for I never reached that lake. I have been up half way to it several times, to the falls on the "North Inlet," and fished back to Second Lake, always filling my basket with trout that ran up from Second Lake, which were to all appearances the same as the regular brook trout, though all the lake trout I know differ slightly in coloration from those in the brooks.

Perhaps "Rob" or some of your other northern New Hampshire correspondents can answer him. VON W

### Pike vs. Pickerel.

CENTRAL LAKE, Mich., Sept. 19.—*Editor Forest and Stream:* The old Scottish proverb which says, "Hawks suldna pike out hawks een," seems to me applicable to the case of Mr. A. N. Cheney and "Old Sam." Perhaps I ought to have written "Judge" Cheney; but we anglers are all judges—after a sort—and I know "Old Sam" is a judge, for I have camped and fished with him enough to know that when he sees fit to lay down the law there is no appeal from his decisions. "Who shall decide when doctors disagree?" One of the judges in this case being scientifically accurate, a compromise seems the only way out of the complication.

Mr. Cheney's picture of the pike is exactly what my experience says it should be, but so is Judge Sam's description; and the deadly accuracy with which I have seen him swing a 3ft. "Muntle" when he chanced to have a luckless pickerel within its sweep, leads me to observe extreme caution in dealing with this matter.

As the old darky said "befo' de wah" of the North and South: "Better git a coppermise, if it cos' a hundred dollar." KELPIE.

### Sea Bass off Long Island.

THE sloop Ella, Capt. Henry Cornell, took our party of six recently for a day's fishing. We trolled from Barren Island to Long Beach, but the bluefish were away from their usual grounds, and we then cast anchor over a sunken wreck some four miles from shore and fished for sea bass. Of these sturdy fish we caught in about two hours over a hundred, and they were all fair-sized, weighing from ¾ to 3lbs. The wind springing up and the sea getting rough prevented further sport.

The sea bass much resembles the black bass of fresh waters. Anglers miss the fascinating though dangerous leaping of the latter, although, as the fishing is carried on in 40 to 50ft. of water, and the fish is fairly exhausted before reaching the surface, perhaps the action is accordingly less conducive to heart disease. W. H. R.

### A Lake Ontario Whitefish.

MR. FRANK J. AMSDEN was this morning presented a whitefish weighing 8lbs., caught last night in Lake Ontario near Webster (outside the mile limit). The capture of this monster shows that the delicious whitefish is not extinct in Lake Ontario, and furnishes great encouragement to enthusiasts on fishculture like Mr. Amsden and his associates of the Cheaper Fish Food Association of New York.—*Rochester Union and Advertiser, Sept. 19.*

### No Politics Here.

YOUR publication is the only one that affords me unqualified delight at this time, as there is not one echo of politics in it. All the others have "tariff," "reciprocity," "force bill," *id est omne genus, ad nauseam.* AKEFAR.

A JEWFISH, weighing when caught 450lbs., and 6ft. 10in. long, caught at Sarasota Pass, Fla., has been presented to the Virginia Military Institue, at Lexington.

## Fishculture.

### Hermaphrodite Trout.

THE *Fishing Gazette* contains an account by Mr. T. Andrews, of London, of a brown trout which has been pronounced an hermaphrodite. Both eggs and milk were taken from the fish, and about 350 of the eggs were impregnated and hatched out. The fish was sent to Prof. Stewart, of the Royal College of Surgeons, who corroborated the observation upon the rearing of healthy young from the self-fertilized eggs, and announced that the fish was fundamentally a male, possessing genital ducts, though the greater part of the genital glands had acquired an ovarian structure.

We do not know of a parallel to this case in the salmon family, but hermaphrodites occur in several other families of fishes.

## The Kennel.

### FIXTURES.

DOG SHOWS.

Sept. 26 to 30.—Rochester Kennel Club, at Rochester, N. Y. Dr. O. S. Bamber, Sec'y.
Sept. 27 to 30.—Dog Show at Ottawa, Can. Alfred Geddes, Sec'y.
Oct. 4 to 8.—Eleventh Annual Dog Show of the Danbury Agricultural Society, Danbury, Conn. B. C. Lynes, Sec'y.
Oct. 25 to 28.—Omaha Kennel Club, at Omaha, Neb. E. L. Marston, Sec'y.
Nov. 22 to 25.—Brooklyn. H. W. Huntington, Sec'y, 148 South Eighth street.

1893.

Jan. 5.—Gloversville, N. Y. F. B. Zimmer, Sec'y.
Feb. 21 to 22.—Westminster Kennel Club, New York city. Jas Mortimer, Supt.
June 13 to 17.—World's Fair, Chicago.
Sept. 7 to 10.—Hamilton, Ontario. A. D. Stewart, Sec'y.

FIELD TRIALS.

Oct. 25.—Third Annual Field Trials of the National Beagle Club, at Nanuet, N. Y. Bench show of the club Oct. 24. H. V. Jamieson, Sec'y.
Nov. 7.—International Field Trials Club, third annual trials, at Chatham, Ont. Amateur Stake, Nov. 7. Open Stakes, Nov. 8. W. B. Wells, Sec'y.
Nov. 7.—United States Field Trials, at Elizabethtown, Ky. P. T. Madison, Indianapolis, Ind., Sec'y.
Nov. 8.—New England Field Trials, at Assonet, Mass. E. Knight Sperry, New Haven, Conn., Sec'y.
Nov. 14.—Fourth Annual Trials of the Brunswick Fur Club, at Princeton, Mass. J. H. Baird, Sec'y.
Nov. 15.—American Field Trials, at Columbus, Ind. W. J. Beck Sec'y.
Nov. 21.—Eastern Field Trial Club Trials, at High Point, N. C. W. A. Coster, Sec'y.
Nov. 28.—Philadelphia Kennel Club Trials, at High Point, N. C. F. G. Taylor, Sec'y.
Dec. 5.—Central Field Trials, at Lexington, N. C. Col. Odell, Sec'y.
Dec. 19.—Irish Setter Field Trials, at Lexington, N. C. Dr. G. G. Davis, Philadelphia, Pa., Sec'y.

1893.

January.—Pacific Coast Field Trials, at Bakersville, Cal. J. M. Kilgarif, Sec'y.
Feb. 8.—Southern Field Trials, at New Albany, Miss. T. M. Brumby, Sec'y.

## KINGSTON DOG SHOW.

This pretty little town was the scene of a goodly gathering of both Canadian and American exhibitors last week. The show commenced Sept. 19 and continued until the 22d. It is not explained why the Canadian show managers have taken into their heads to commence their exhibitions on the first day of the week, but it certainly is about the most inconvenient day for the exhibitors. For those coming a distance it entails Sunday traveling, and this with dogs in tow is not an unadulterated pleasure. The good old plan of Tuesday to Friday, as long as we are to have four days shows, can not be improved upon.

As further notes on the show will be found in "Dog Chat" I will merely remark here that the judges, Messrs. Andrew Laidlaw, W. Tallman and Dr. Wesley Mills did their work in a conscientious, painstaking manner, though the two latter in several cases, in judging dogs with which they do not pretend to be familiar, erred on the side of leniency, and in terriers, breeds of dogs Mr. Tallman does not feel altogether at home in, the dogs were not placed as they should have been, and in proper order will try and tell your readers why. The dogs entered numbered 212, and considering that no puppy classes were offered, the result was quite gratifying, when the fact of another show, Grand Rapids, being held at the same time, is taken into consideration. I will now pass on to a review of the awards in the order of the catalogue.

MASTIFFS—*Dr. Mills, Judge.*—One entry, and this was named Attraction, the winner at Toronto, she needs more depth of body and her head is not short or square enough. I expected to see more and better entries in this breed.

ST. BERNARDS—*Dr. Mills, Judge.*—There are really not very many St. Bernards in Canada, and I was therefore not surprised to find pretty nearly the same faces, to a lesser extent, at this show. In the catalogue the rough and smooths were classed together, but this being obviously unjust, a division was made. Aristocrat was again the solitary challenge entry. Then in open rough dogs Lord Melrose had nothing to do but walk into the ring and out again for his premier award; Baldus, the second winner, being a long-faced, light-colored dog without type of any sort, he should not have been mentioned as a proper St. Bernard, his sire is unknown, and perhaps it is just as well, but the catalogue says plainly that he had a mother, and that is some comfort; Oneida, his litter brother, captured he., why, I cannot tell, probably because he was even of a worse color than the other dog, a sort of light-liver orange, a light eyed, snipy-faced dog; giving honorable mention to such dogs is, I think, one of the very reasons why a judge should in some cases give us a report of his classes. Mr. Marshall, when he put the ginger-faced C. O. D. back at New York, told us that he thought she was a freak of the albino order, this can be understood, but the rub comes when the judge gives a dog a prize that has no type whatever and shows some cross breed. I am speaking now in a general way, not purposely at Dr. Mills. Lady Gladwyn this time occupied her proper place at the head of affairs. Miss Anne coming next, with Altonette correctly placed third; I think this bitch's head is improving with age, and could she be got into good coat and fill out considerably in body she would rank well up, as her limbs are capital and just what we want. I have been a little hard on her probably, and had she not been the medium of a little "squeezing" I should not have perhaps judged her from so high a plane. With Glenisla and Queen Vic absent, the smooths came on and Melrose took one more step toward the challenge row—the reason he is doing Canada this fall. Miss Alton took another blue ribbon, not "to tie up her bonny brown hair" but with an eye to challenge honors.

GREYHOUNDS—*Dr. Mills, Judge.*—Rather a drop from Toronto and a falling off from last year, Mr. Purbeck's team supplying four of the total seven. Gem of the Season and Bestwood Daisy win in the challenge class and Gem of course was ungallant enough to go ahead of his kennel mate. Pious Pembroke I think just about qualified for the challenge class in open dogs; he was in nice shape but his entered competitor was absent. The bitch class gave rise to keen competition, for Jetsam and Lilly of Gainsborough fought their Toronto battle over again with Jetsam again "thrown up" the winner, Lilly losing a good deal in skin condition. Clio, third, was the winner last year, though that is little commendation; she looked a light-waisted commoner to-day. These were all the greyhounds entered.

BEAGLES—*W. Tallman, Judge.*—After Toronto the classes here looked mean. The challenge dogs had one entry, The Rambler, a trifle big in head; he was round the shows last spring. Open dogs introduced us to some new faces from the "Kreuder Homestead," toward which all beagle-eyed owners will be turned next month, or should be. Jack Rowell furnished the winner, a fair type; muzzle should be squarer, skull of nice shape, forelegs, however, are not straight enough, body is O. K., but coat soft. Ranger, second, is big, and his muzzle is not strong enough, weak before the eye and forelegs are not straight. Bob Krueger could not expect to do better with his round skull and faulty front. Another from the Rockland Kennel, Keenannan, was returned the winner in the next class; she has some faults, too, despite her prominent position; her feet turn out a bit, muzzle weak before the eye, nice body and capital coat, a smart little hound with not enough brush. Butterfly, the other entry, was absent. It is funny the merry little beagle is not appreciated in Canada. In my trip into the country I saw some very likely ground that a pack would be sure to give a good account of themselves in.

ENGLISH SETTERS—*W. Tallman, Judge.*—Just a fair entry, Edgemark again being the only aspirant for challenge honors. The Toronto winner, Sultan, added another blue ribbon to his collar in the open dog class. By the way, his owner writes me that an injustice was done his dog by the reflection cast upon his parentage on the sire's side. There was a mistake in the catalogue. Mr. Walsh now tells me that the sire was bred by the Detroit Kennel Club, and is by Kota, A. K. C. S. B. 3,454. It would serve no good purpose here to give reasons for any slight I may have cast on the dog's parentage last week; suffice to say, the dog wins on his own merits, and as his owner says, his "ped" is O. K., why, everything is all right again. Our old friend, Ben Hur of Riverview—I know Mr. Taylor, his owner, did not choose this name, but sincerely hope the name after this may be allowed to relapse into innocuous desuetude; Locksley II., with his coarseness and flat head, was some distance behind in merit, though in third place; Sir Harold, vhc., is faulty in head and running gear. Forest Louise was picked out as the winner in bitches. She is nicely put together on good legs and feet, with a good quality head; Maid of Kent was not far behind her, not so good in muzzle, and skull a little coarse, but not a bad head by any means, legs and feet of the best, no feathering and out of coat. In novices (6) the winners were the same as commented on: Earl, hc., is big, lathy and rather of Irish appearance; Jack the Ripper, horrid name for a dog that has the benign countenance of an English setter, was also an entry. It does seem funny that some folks have not the slightest idea of the proprieties in nomenclature.

IRISH SETTERS—*W. Tallman, Judge.*—The Irishmen were the best classes in the show, just about, and the challenge class for dogs and bitches contained no less than eight entries, though some were absent, and all present were at Toronto. Of course the class was divided and champion Tim had no chance to share the honors with any one. In bitches, however, champion Laura R., looking like a two-year-old, disposed of Elfreda's pretensions once more. Then came open dogs (6). The issue was soon seen to lie between Pride of Patsey and Montauk, Jr., but was never in doubt. Pride's good head and body put Montauk a slow second. Stoco, third, has quite a nice head and Montauk only beats him in body, good legs and feet. Elfrin, vhc., was placed over his kennel mate, Elfrus, this time; the former is not square enough in muzzle and legs should be straighter. Elfrus is a bit long cast and head needs better modeling. In open (3), in the absence of Rose Sarsfield, Claremont Heather was placed at the head of affairs, and over Irene, too, a reversal of the Toronto decision that I think was justified. Though Claremont loses in muzzle, she has better body and running gear. The novice entries (5) have all been written on with the exception of Madcap II., whose feet come together in front and has a domy, round skull.

GORDON SETTERS.—*W. Tallman, Judge.*—A poor edition of Toronto; challenge class divided to fit, Leo B. taking one diploma and Duchess of Waverly the other, it would be almost an insult to either of them to speak of their appearance, they are such "regulars," but Leo B. was in rare shape and emphasized it by taking a "muscular" special. Open dogs (3), Mount Royal Rush though smutty in tan again asserted his better quality over Duke of Wellington, whose dark coarse head is against him. Mt. Royal Spruce is a Roman-nosed weed and was left out in the cold through a brother to the winner. In bitches (5), Lady Gordon added another to her list and her good quality fully entitled her to the honor. Princess Louise as at Toronto followed up a fair second, tan smutty and muzzle not O. K. Third went to Mount Royal Wanda, who has not enough stop, and Floss vhc., from the same kennel, has a similar fault in head and tan is too light. Myra C. is small, light tan and faulty in head, a good remove from the winners.

POINTERS—*W. Tallman, Judge.*—This bred did not show up in any great numbers, nor yet was the quality anything to boast of. Mr. Davey's kennel was not represented—as he remarked to me once, "He had got beyond the stage of showing at little shows" Devon Nell was the only one to uphold the challenge division and she is getting on in years, but she has merited the honors of the past. Rock II. won again in open dogs (2), Donovan again playing second fiddle; both were criticised in Toronto report. The quality in the bitch class (4) was hardly so good. Chaira proved the winner, and she is by no means goods, muzzle snipy and eye light, otherwise she is fairly good and won well over Juno, who is throaty and muzzle not of correct shape, chest and ribs not developed sufficiently. Smut M., hc., is a dark liver, something of a commoner. Frivolity, I thought, should have had at least three letters till the judge

MR. G. BELL'S FASCINATION,
Winner Spaniel Club Cup, Toronto, 1892.

drew attention to her eyes, on one of which is a cataract, or something of the sort, which has, in a slight measure, retarded the development of that side of the head; still an hc. would have done no harm. The novices were made up of entries from the other classes, with the exception of Bell Bird, third, whose thick skull and sour expression of eye, heavy shoulders and drooping quarters, should hardly have placed him over Donovan, vhc.

GREAT DANES—*Dr. Mills, Judge.*—Only one for competition and that was one of the Toronto winners, a poor one all over, as stated last week.

SPANIELS — *Andrew Laidlaw, Judge.*—Mr. Laidlaw I know is one of the oldest exhibitors, but I believe this was the first time he had ever donned the spaniel "ermine," and he did good work with the material at hand, which was a little mixed in type. Irish water spaniels had the Toronto winner Dan Rice again to the fore with no competitor. Marguerite won easily first in the female division, her better head, topknot and capitally feathered legs being very noticeable over Biddy Donnelly, who, though she sports the cleanest tail, is deficient in other good points, such as straightness of forelegs, etc. Darby, the Toronto winner, was the only Clumber present.

Field spaniels (3) found Queenie, a nice liver bitch, first, being better in head and body than the Roman-nosed Wonder. Sport, third, has a plain, toyish head, and coat is inclined to curl.

Then came some quality in the cocker challenge class, which was divided by sex, Fascination winning in dogs and Amazement in her division. Old ch. Brant was out for specials only. In open, black dogs (2) Dono, a fairish sort, spoken of last week, secured the ribbon over Jay Kay, who has a better front, is plain in muzzle and high in skull, but in body beats the other, and especially so in quality. In bitches we were given a reversal, Rideau Flossie turning the Toronto tables on Troublesome. I don't see how this can be when condition and everything is counted. Flossie may be of sterner material, but she loses to the other in muzzle slightly, body, and especially coat; Voto, third, loses in skull and front to the others; reserve went up over Molly Bawn, who has a coming field spaniel head, no cocker type; Lillie, hc., has a poor head, round skull and muzzle not flat. In any other color, challenge, ch. Red Jacket deserved his ribbon, he looked brilliant. In the open dog class another red, Red Obo, who is dish-faced and crooked in front, was placed over a capitally made dog, a bit high on leg perhaps; he was unfortunately found dead in his stall the third morning of the show: Red Fellow, third, has too much stop and is long in skull. In bitches (2) Cherry Ripe, rather toyish in build, was placed over Lady, thus showing hardly a consistency of type compared to other awards; of course, Lady is more of the working type, but well built. Nearly all the novice aspirants have been noticed, and here Troublesome winning, leaves her novitiate.

COLLIES—*W. Tallman, Judge.*—Not by any means so good a gathering as at Toronto, and Roslyn Dandy, out of coat, won the challenge dog prize, with kennel mate Metchley Surprise the winner in her division. Then came a tug in open dogs (6) between Wellesbourne Charlie and Conrad II.; both are well coated for the season and were put down in splendid shape, but the "Toronto novice" scores slightly in head, better skull and more cleanly chiseled before the eye. Conrad's body I like better. Charlie gets the verdict on general style and action; it is very close, and condition will always be an important factor between them; Samson, third, is some distance behind, ears hang down, narrow-chested, rather a well shaped head, but a bit common in expression, in fair coat; Chrysolite, reserve, shows more quality, but is too slightly built, and very short of coat: Metchley Bob, vhc., is altogether too thick in skull, nice legs. Bitches (4) had Bertha II. for the winner; she is small and has too much stop, and does not stand quite true in front; Crissey, second, from the same kennel, Seminole's, has big ears, muzzle too scooped out, is small-sized and out of coat entirely, but shows a good deal of quality; Dudley Chris is light in body, with a fair type of head.

BULLDOGS—*W. Tallman, Judge.*—Only two on the bench, Carisbrook won in dogs and Lady Venus in the other class, both at Toronto.

BULL-TERRIERS—*W. Tallman, Judge.*—Quite a brave show. Champion Starlight, looking a little gross, was alone in challenge division. The open class was a mixed one, and the winner, Comet II., I thought should have given way to the vhc. winner, Loumont Kit, as he has a commonish head, no chest, heavy in shoulders, a coarse dog. Chatham Prince, second, has a better head, good eye, but is rather cheeky. Grove Duchess, though thick and heavy in shoulders, keeps her head well and is well shaped in body and legs and should have been in front of the winners. The class should have been just turned round.

FOX-TERRIERS—*W. Tallman, Judge.*—Quite an entry of these dogs, with Blemton Trump the challenge winner. In open dogs (7) the judge reversed the Toronto decision in placing Blemton Rattler over Beverwyck Punster. There is little between them; both are high on the leg and rather big, and both have the same fullness in skull. I like Punster better for the position; he is a little more the terrier. Calchas, third, is faulty in front, ears large, light eye and a rather coarse head, nice body. Seacroft Bourbon and Rideau Rivet are just ordinary and correctly placed. In bitches (7). Grouse II. reversed Toronto awards by beating Hillside Baroness; she loses a little in skull, but I think is more than equal in bone, front and body. Seacroft Fuss has a nice head, marred by peculiar marking; good body and ears; and Dudley Slave, vhc., has seen her best day; snipy and ears not well carried, body good. Damson, vhc., is round in skull and ears not carried well. Rosa, Jr., hc., is weedy. The novice class had that smart youngster My Fellow for winner. He is well ahead of Calchas in nearly every particular. Suffolk Teaze, the wire, loses in head. In wires that good-headed Suffolk Trimmer was placed over the Toronto winner, and I thought correctly so; the latter's head has no length, and he is altogether too "fuzzy." Teaze was third.

SCOTCH, SKYE AND DANDIE DINMONT TERRIERS—*W. Tallman, Judge.*—Sir Stafford once more graced the challenge class without competition. Then came one of the nastiest classes for a man to judge—fancy eighteen Scotch, Skye and Dandies in one class, and sexes together. The judge should have demanded a division by breeds instead of sexes; as it was, some good dogs were bound to be left in the cold of the vhc. crowd. After a lot of sorting the judge placed the Dandie Roger first, but this place should have been reserved for Amphion, as far as Dandies were concerned, better and stronger in head, front and coat more than equal as Roger is out at elbow. Scotch Hot came second, but her muzzle is too snipy. Endcliffe Maggie, third, one of the best-headed Skyes, but out at elbow and short of coat. Reserve went to Islay's Skye, who was in good coat, bit too straight in face, but good in front; she will be well up in her own class; then came a lot of vhc.'s, some of which should have been in the money. Prairie Flower, a Skye, has a record on the other side, but she is not strong enough in muzzle, and feet come together in front. Heather Madge deserved more than hc., and so did Laird of the Heather, but then what could the judge do? I would have placed Amphion first, Islay second, Laird of the Heather, Endcliffe Maggie or Scotch Hot, third, and the rest vhc.

IRISH, BEDLINGTON AND AIREDALES—*W. Tallman, Judge.*—Another formidable looking lot by breeds on paper, but luckily Irish terriers had the field to themselves. Salem Witch proved the winner where Jack Briggs should have scored well in hand; the smutty-faced Hanover Boy should have given way to Gultees, who was a clear second, cleaner in head and with better front, fair coat. Hanover Boy should have been third and Salem Witch reserve, though too high in skull and snipy in muzzle; an uncropped one. Commissariat, reserve, is snipy, leggy and not straight in front. Tibbie, vhc., has quite a good head and deserved her letters. With seven entries the class should have been divided.

BLACK AND TAN TERRIERS—*W. Tallman, Judge.*—Sir Wallace had no Sultans to bother him this week and took the blue instead of the red. Sexes were undivided in the next class (5), Salisbury proved the winner, though Louie, vhc., should have had that position, and the dog second, the bitch is better in head markings and tail and general build; third went to Rochelle Topaz, who is much too dark, this prize should have gone to English Lady, from the same kennel, who beats in head, tan markings and body; Lady Don, with rich tan and good head, legs and body—quite a promising youngster—should have been close to third; Rosette, second, should have had about reserve here, too big, coarse in head and tan not defined enough on legs.

TOY SPANIELS—*W. Tallman, Judge.*—Toronto Royal Duke, well known, was properly placed over Royal Roy, faulty in tan but head well shaped; Topsy, third, is also well known and correctly placed; Romeo, the Prince Charlie, though large, deserved vhc., but got nothing.

PUGS—*W. Tallman, Judge.*—Bonsor and Bob Ivy met again with the same result. In open dogs (4) Dixie could not be denied, for Meddler, second, loses in muzzle and body. Dandy, Jr., third, is too big in muzzle and very light in tawn, besides he is several sizes too large. Bitches (4). Midget won nicely from Mint, whose muzzle is good, but skull could be fuller to advantage. Miss Penrice is a black-headed, heavy-eared puppy, and Baby Ruth is of the same stamp.

FOXHOUNDS—*W. Tallman, Judge.*—(2) Jip, that was at Toronto, won with something to spare in head and front over Curtis's Jack.

MISCELLANEOUS—*Dr. Mills, Judge.*—Here was a turn up. First went to Fritz K., the dachshund, that is not a good one by any means, too short-headed and bodied. Second went to another dog of Ben Lewis's, Biglow, the poodle, a poor wooly coated sort. And third to a wheel-backed, coatless deerhound, that a c. card would have been ample for. Servanates, vhc., the wolfhound, should have been well in front of all, the dachshund second and the Pomeranian, Jumbo, third. In bitches (4) the wolfhound Flodeyka rightly won, closely pressed by Jessie Victoria, the dachshund, with the whippet Boston Model, third, and a moderate Yorkshire, Jenny, vhc. This class was all right.

H. W. LACY.

### SPECIAL.

Handler with largest number of dogs—Ben Lewis; second, Geo. S. Thomas. Best dog or bitch in Kingston or Frontenac county, A. E. Elmer's Sir Wallace. Best Irish water spaniel (4) J. C. Nichols's Marguerite. Best kennel of collies, Seminole Kennels. Best mover and dog with best limbs in mastiffs and St. Bernards, E. H. Moore's Melrose. Best greyhound in open classes, A. W. Purbeck's Pious Pembroke. Best beagle in challenge classes, Rockland Kennels' The Rambler. Best brace of fox-terriers, A. D. Stewart's Hillside Baroness and My Fellow. Best setter in show, Francis S. Brown's Edgemark. Best kennel of Dandie Dinmonts, E. Brooks. Best Irish setter in novice and Kingston—Kingston and Bancroft Kennels' Madcap II. Best pointer owned by member of Kingston Kennel Club—Kingston and Bancroft Kennels' Bell Bird. Best Gordon in show, Dr. Dixon's Leo B. Best cocker spaniel, Ancient and Modern Spaniel Kennels' Fascination. Best cocker in novice class; Same kenneis' Troublesome. Best kennel Ancient and Modern Spaniel Kennel. Best fox-terrier owned in Canada in novice class, A. D. Stewart's My Fellow. Best black and tan terrier owned by member of K. K. C., A. E. Elmer's Sir Wallace. Dog with best muscular condition, Dr. Dixon's Gordon setter Leo B. Best four setters in show, Seminole Kennels' Irish setters. Best kennel of Scotch or Skye terriers, Toons and Symonds' Scotch terriers.

## THE GRAND RAPIDS DOG SHOW.

THE first annual bench show of the Western Michigan Kennel Club was held at Grand Rapids, Mich., beginning Sept. 20, and ending on the 23d, under the auspices of the Western Michigan Agricultural and Industrial Society. The officers of the kennel club labored under many disadvantages in arranging for the show and in conducting it, as the officers of the Agricultural and Industrial Society had little faith in it as a whole, while some were actively opposed to it. They did not consider it an attraction or a benefit to the fair. How incapable good business men sometimes are in estimating the value of matters outside their own everyday experience was never better demonstrated than at the Society's fair. Among all the attractions presented, the horse racing included, none compared with the dogs in drawing a crowd. On Wednesday and Thursday, the aisles were literally packed with a throng eagerly curious, from early morning till the show closed at night, and so constant was the dense crowd that the reporters gave up all attempts to look the dogs over on those days. There was no additional charge made to see the dogs.

So great was the success that there was already under consideration a plan for doubling the space allotted to the dogs, and making the dog show a permanent feature, running it on broader lines in every way, and charging a small additional fee to those who desire to see the dogs.

The Great Danes were constantly inquired for, and were uniformly called Russian bloodhounds by the inquirers. The $5,000 dog also excited great inquiry, that dog being the celebrated pointer Ossian.

The quality of the dogs was quite good, better by far than the average first attempt of clubs.

The officers were most attentive and painstaking, and considering that it was a first attempt it was well managed. The show was kept throughly disinfected, but might have been tidier. There were not enough attendants to do the work properly, but this again had an easy explanation in the caution of the society in expending too much on the show. The building was distressingly close and warm when so crowded, but arrangements will be made for the freest ventilation of the next show. The dogs were fed on Austin's dog bread.

The president, Mr. Eugene Glass, the vice-president, Mr. Chas. K. Turner, the secretary, Mr. Geo. B. Thomas, Mr. H. Dale Adams and other officers worked diligently in conducting all the details.

There were 179 entries catalogued, but a number were absent, and some were present but not catalogued.

Mr. John Davidson judged the sporting classes and Great Danes; Mr. Roger Williams judged greyhounds and foxhounds, and Mr. Frank C. Wheeler judged the non-sporting classes. All gave good satisfaction, yet one judge could have easily handled all the classes and saved the club the additional expense.

The weather was close and sultry on the first three days. A heavy rain fell on Friday afternoon.

The club held a meeting on Wednesday evening and transacted business of a routine character. The judges of the show were elected to honorary membership, and about 20 applications for membership were received. In the matter of field trials, a new committee was appointed, with full power to act in making all arrangements for the club's trials next November.

It was said that the club received entries up to the opening of the show, thus receiving them after the published date of closing, and some complications with the A. K. C. were hinted at in consequence.

MASTIFFS.—But one mastiff was shown, and he was ordinary, taking second in the dog class, first being withheld.

ST. BERNARDS.—They were inferior specimens. Leo, light in bone, narrow skull and poor hind legs, had a walk over in open dogs. Two bitches competed, Princess Josephine won first easily, though her hind legs are faulty. Queen Agnes, second, has a light, weak head, poor hind legs, and hardly deserved the second prize. There were no smooth-coats on exhibition.

GREAT DANES.—A remarkably good exhibit of this breed was made, although Melac and Pedro, the challenge entries, were absent. In dogs Favor, a superior dog, having a grand head and excellent legs and feet, on which he stood squarely, an upstanding, spirited-looking fellow, took first easily. Brutus, straight hindlegs and light body, an average specimen, took second. Open bitches had five competitors, of which Lenta proved the winner; she is a good bitch, but was shown too thin in flesh and is light in barrel. Kelpie, second, is flat in ribs, legs straight and strong, and feet good. Young Pearl took the reserve; quite a good puppy. Charmion, vhc., is on the coarse side. Young Pearl was easily first in puppies, but was afterward protested and disqualified for being over age. Rhoebe, second, is light is barrel and ordinary. The disqualification of Young Pearl gave Rhoebe first place.

GREYHOUNDS.—Master Rich, well known as a winner, had no competition in the challenge class. He was looking well. King Dick, a strong, well-built dog, with a slight tendency to coarseness, was an easy winner of first in the dog class. He has good bone and muscular development, showing the mature form of an aged dog, though but little over a year old. Montezuma, second, is flat-ribbed, with a tendency to weediness. He had a walkover in the puppy class. Jumper, the only remaining entry, had goitre, which destroyed his chances of winning anything. In bitches, Lady Olivia won over Leonie, the latter having remarkable control of her ears, one of which she carried erect at times. She was far better than the winner, with the exception of the fault mentioned. Lady is light in bone and sprung too much in ribs, and is lacking in symmetry. Prim, vhc., is pig-jawed.

PSOVOIS.—There was but one, and that one was for exhibition only. He is owned by Mr. Roger Williams, who had him wonderfully conditioned, the muscles being well developed and exceedingly hard all over his legs and body, thus showing that the psovoi can be conditioned to perfection.

FOXHOUNDS.—Five dogs competed. Roger II. won first. He is throaty, is deficient somewhat in symmetry, yet is a fairly good hound. Toot, second, is coarse. Willie H., reserve, was out of condition, being too thin in flesh; but for this he was easily the best hound of the lot. The two bitches were about fair in merit.

ITALIAN GREYHOUNDS.—There were but two, each having a walkover in its class.

POINTERS.—There was a fairly good exhibit of pointers. Mack II., a coarse dog, won first in heavy dogs. Dutch, second, is better in head, legs and feet than the winner, and looked superior to him. Mack is cheeky, coarse in head, and has lumbery shoulders. Duke, third, is too high on legs, and is coarse somewhat; good in legs and feet. In heavy bitches Lord Graphic's Gem, a fairly good coarse bitch, won over Fly, an ordinary specimen. In light-weight dogs Jack of Naso, bad in knees, good back and head, though the latter is not clean cut, neck a bit short, and shows some throatiness, won first. Second went to Ridgeview Robert, which was shown too fat. Hal Pointer, third, has an unpleasant expression and was shown too lean. He is very nicely built, good legs, feet, body, back, loin, quarters, shoulders and neck; head fairly good but not clean cut. Nell of Naso, a remarkably good bitch, trim, clean cut and symmetrical, with good bone and muscular development, won first easily over Minetta, a good all-round bitch. Duke, already mentioned, took first in puppies. Second went to Jim Anderson, excellent, well-ribbed body, lean neck well set on shoulders, legs straight and strong; forefeet a bit open. Seven puppies competed in the bitch class, Bell G. being first, and Hattie L., plain in head, forefeet a little open, was second. There was a class for black pointers, in which Don Fish-el won first without competition.

ENGLISH SETTERS.—A very good showing was made in these classes. Max Noble, who took first in open dogs, was closely pressed by Tony Gladstone, the latter being better ribbed, better in back, loin, quarters and hindlegs, but gives way to the winner in shoulders and neck. Both have heads which could be improved upon. Tony has not a good carriage of stern. Third went to Paul Hill; he does not stand square in front and is only fair in front. Two dogs, Diamond and Dash S., entered not for competition, were shown in this class. Both are by Druid, and are said to be the only living representatives sired by that famous dog. In bitches, Miss Frost took the honors. She was mentioned last week. Daisy of Riverview, second, was not in her stall when I looked for her. Flirt, third, was not in good condition. She is a good bitch, long cast and head on the coarse order. The rest of the class was about average. In puppies, Bob Carroll won over Ben Mark, both being only fair in merit. In bitch puppies, two competed, Belle and Sweetness, winning in the order named, and were subsequently protested and disqualified for being under age.

IRISH SETTERS.—This exhibit was remarkably good, the Oak Grove Kennels being particularly noticeable for the superiority of its dogs and their excellent condition. Duke Elcho was without competition in the challenge class. In bitches, Norna won over Edna H., both well known. In open dogs, Kildare Glenmore was first. He also is well known. Tom Owen, second, is plain in head, but has a well-ribbed good body, stands on good legs and feet, and has fair symmetry. Mike, third, is a coarse dog. In bitches, No. 200 is the winner, but, as there was no such number in the catalogue, I fail to identify her. Rock Elcho won over Nixon in puppies, and both were ordinary. Wannetta, a common one, had no competition in the bitch class of puppies.

GORDON SETTERS.—These dogs were much better than an average lot. First went to Trade, short and blocky in head; shoulders a bit lumbery, excellent body, legs and feet; color a good black and tan. Louie S., second, has bad knees and is about an average one otherwise. Don, third, is long cast. Fly M. easily took first in bitches. She is well made and symmetrical. Belle R., third, has a pale tan, is sprung too much in ribs, but carries her nine years well. Third went to Princess Bess, too wide in ribs. Louie S. took first in puppies over Leo's Boy, the latter large in knee, narrow in head and showing weediness. Bitch puppies numbered three and were about average.

COLLIES.—Sir Walter Scott II., well known, took first in open dogs over Rover, the latter having a coarse head, good legs and feet and coat not abundant. Duke of Navarre, third, is light in bone, undersized and light in body. Grange Nellie, quite a fair bitch, won in her class. Highland Ruth had no competition in the puppy class.

BULL-TERRIERS.—The well-known Dufferin had a walkover in the challenge class. Two competed in the open class, Crisp taking first. He is cheeky, is light in body and does not stand straight on his legs. Royal II. is only a fair specimen. In bitches, Countess of Dufferin, first, is light in body, but is young and undeveloped. She won first in the puppy class over Crisp.

FIELD SPANIELS.—Toledo Snap had no competition. He is light in bone in forelegs and stands a trifle high.

COCKER SPANIELS.—Bendigo won easily over Brownie, the latter light and pinched in muzzle, wide in front and too fat. The remaining two, Black Prince and Brock's Boy, were ordinary. In bitches, Woodstock Dot took first over Kate W., Pritton Brevity, the reserve, and Gypsey Queen, vhc., an ordinary lot.

DACHSHUNDS.—Lina L., a well known winner, won without competition in the challenge class. One entry was shown in the open dog class, but it was so poor a specimen the prize was withheld.

CHESAPEAKES.—Two very poor specimens of Chesapeake Bay dogs were shown, Shot and Dell, each winning in its class.

CLUMBER SPANIELS.—With the exception of Our Joan, the exhibit was poor, the remaining two, Punk and Our Judy, being ordinary, and all were out of condition.

BEAGLES.—June M. had a walk over in challenge class. Crowner, first in open dogs, was thin and in poor condition. He is a fairly good beagle, a bit high-ly made. Pomp, second, is light in bone and was shown too fat. Bitches were a mixed lot, but fair in quality. Snow was easily the best in the class; she has a plain head, Little Spottie and Runa, second and third, were about the average.

FOX-TERRIERS.—London Risk, first over Stormy, is a bit cheeky. Rosa Canina, a well-known bitch, had no competition in her class.

IRISH TERRIERS.—But one was shown, Nora, out of coat, and light in bone and body.

PUGS.—Eberhart's Cashier won in the challenge class without competition. Open dogs had three, the well-known Patsy Bolivar taking the honors. Babe S., carrying a little too much flesh, was a good second. He is quite a good pug, but is deficient in markings. Sara Bernhardt won first in bitches. She is well known. Pausy's Judy, a fair bitch, took second. Sir Douglass and Virginia won in the dog and puppy classes.

WHIPPETS.—Three were shown, Maggie, Ben and Nancy Hanks.

MISCELLANEOUS.—A Bedlington won first, and Juno second, and Midge, third, were of a miscellaneous order.

R. WATERS.

### LIST OF AWARDS.

MASTIFFS.—1st, withheld; 2d, A. V. Cochran's Cerf Vola.

ST. BERNARDS.—ROUGH-COATED—*Dogs:* 1st, O. A. Ball's Leo. *Bitches:* 1st and 2d, Robbins & Savidge's Princess Josephine and Queen Agnes.

GREAT DANES.—*Dogs:* 1st, Harry Boyer's Favor; 2d, Wolverine Kennels' Brutus. Reserve, Dr. S. M. Fowler's Sirius. *Bitches:* 1st, Wolverine Kennels' Lenta; 2d, W. F. Dorn's Kelpie. Very high com., Herbert G. Nichols's Charmion. High com., Frank S. Anderson's Columbia Flora—PUPPIES—*Bitches:* 1st, Herbert G. Nichols's Rhoebe; 2d, Wolverine Kennels' Young Pearl. Very high com., Wolverine Kennels's Furo.

GREYHOUNDS.—CHALLENGE—1st, F. S. Anderson's Master Rich.—OPEN—*Dogs:* 1st, C. W. Sarvis's King Dick; 2d, Chas. E. Miller's Montezuma. *Bitches:* 1st, C. W. Sarvis's Lady Olivia; 2d, Chas. E. Rowland's Louie. Very high com., Walter English's Prim. *Puppies:* 1st, Charles E. Miller's Montezuma.

FOXHOUNDS.—*Dogs:* 1st, Dan O'Shea's Ranger II.; 2d, E. Etienne's Toot. Reserve, The Field Kennels' Willie H. Very high com., David Graham's Parker. High com., O'Riley & Davis's Don. *Bitches:* 1st, The Field Kennels' Modest Girl; 2d, O'Riley & Davis's Penny.—PUPPIES—*Dogs:* 1st, Dan O'Shea's Foreigner; 2d, David Graham's Vick.

ITALIAN GREYHOUNDS.—*Dogs:* 1st, F. H. Hoyt's Byron. *Bitches:* 1st, J. S. Rockwell's Lavendar. *Puppies:* 1st, F. H. Hoyt's Byron.

POINTERS.—*Dogs 55lbs. and over:* 1st, D. W. Cook's Mack; 2d, Dr. J. R. Daniels's Graphic's Frolic; 3d, R. T. Gibbins's Duke. *Bitches 50lbs. and over:* 1st, Dr J. R. Daniels's Lord Graphic's Gem; 2d, C. E. Sisson's Fly. *Dogs under 55lbs:* 1st, Wm. B. Mershon's Jack of Naso; 2d, Dr. J. R. Daniels's Ridgeview Robert; 3d, B. E. Quick's Hal Pointer. Reserve, H. Warut's Osborne. Very high com., F. W. Temple's Don. *Bitches under 50lbs:* 1st and 2d, G. B. Thomas's Nell of Naso and Monette.—PUPPIES—*Dogs:* 1st, R. T. Gibbins's Duke; 2d, T. E. Goodrich's Jim Anderson; 3d, E. E. Thresher's Bruce of Ale. Reserve, G. B. Thomas's Inspector. Very high com., H. Warut's Jack of Ale. *Bitches.* 1st, 2d and 3d, T. E. Goodrich's Bell G., Hattie L. and Fanny Fleet. Reserve, C. P. Colby's Lady Benton. Very high com., G. B. Thomas's Cribbage. High com., H. Warut's Kate of Ale.—BLACK POINTERS—*Dogs:* 1st, U. R. Fishel's Don Fish-el.

ENGLISH SETTERS.—*Dogs:* 1st, E. C. Smith's Max Noble; 2d, Joe Lewis's Tony Lewis; 3d and reserve, A. G. Eberhart's Paul Hill and Noble Litt. Very high com., Dr. J. A. Hartman's Sig. Gladstone. *Bitches:* 1st, Joe Lewis's Miss Frost; 2d and reserve, A. G. Eberhart's Daisy of Riverview and Flight of Riverview; 3d, D. O'Shea's Flirt. Very high com., E. C. Smith's Girl S. Com., H. Northwood's imported Sinful Pride.—PUPPIES—*Dogs:* Disqualified. *Bitches:* 1st, D. O'Shea's Belle; 2d, M. C. Byers's Sweetness.

IRISH SETTERS.—CHALLENGE—*Dogs:* 1st, Oak Grove Kennels' champion Duke Elcho. *Bitches:* 1st, Oak Grove Kennels' champion Norna and champion Edna H.—OPEN—*Dogs:* 1st, Oak Grove Kennels' Kildare Glenmore; 2d, Dr. F. K. Owen's Tom Owen; 3d, J. B. Schumacher's Mike. Reserve, W. W. Knight's Bob Sawyer. Very high com., G. C. Tucker's Bob T., C. K. Farmer's Hiawatha. *Bitches:* 1st, No name; 2d, C. K. Farmer's Veto; 3d, S. J. Reefor's Lalla Rookh II.—PUPPIES—*Dogs:* 1st and 2d, C. A. Annin's Rock Elcho and Nixon. *Bitches:* 1st, P. A. P. Kennels' Wanetta.

GORDON SETTERS.—*Dogs:* 1st, A. Sanford's Trade; 2d, Geo. Meister's Louie S.; 3d, F. S. Anderson's Don. *Bitches:* 1st, Geo. Meister's Fly M.; 2d, O'Riley & Davis's Bell R.; 3d, Ben O. Bush's Princess Bess. Reserve, Geo. Meister's Olive P.—PUPPIES—*Dogs:* 1st, Geo. Meister's Louie S.; 2d, The Field Kennels' Leo's Boy. *Bitches:* 1st, C. W. Sarvis's Yola; 2d, The Field Kennels' Leo's Girl; 3d, Geo. Meister's Olive P.

COLLIES.—*Dogs:* 1st, John Hawkes's Sir Walter Scott III; 2d, E. Peters's Rover; 3d, J. H. Bonnell's Duke of Navarre. *Bitches:* 1st, John Hawkes's Grange Nellie. *Puppies:* 1st, Geo. B. Smalley's Highland Ruth.

BULL-TERRIERS.—CHALLENGE—*Dogs:* 1st, Wm. Bryson's champion Dufferin.—OPEN—*Dogs:* 1st, H. G. Nichols's Crisp; 2d, Dan O'Shea's Royal II. *Bitches:* 1st, W. L. Bryson's Countess of Dufferin; 2d, Dan O'Shea's Lillie. *Puppies:* 1st, W. J. Bryson's Countess of Dufferin; 2d, H. G. Nichols's Crisp.

FIELD SPANIELS.—*Dogs:* 1st, Geo. Miller, Jr.'s Toledo Snap.

COCKER SPANIELS.—*Dogs:* 1st and 2d, Campbell & Blake's Bendigo and Brownie B. Reserve, Chas. F. Baker's Brock's Boy. Very high com., W. G. McCullagh's Black Prince. *Bitches:* 1st, Geo. Miller, Jr.'s Woodstock Dot; 2d, A. W. Pancoast's Kate. Reserve, A. W. Pancoast's Pitton Brevity. Very high com., Campbell & Blake's Gypsey Queen. *Puppies:* 1st, W. G. McCullagh's Lady Golden.

DACHSHUNDS.—CHALLENGE—*Bitches:* 1st, Chas. F. Gentz's Lina L.

CHESAPEAKE BAYS.—*Dogs:* 1st, Geo. Meister's Shot. *Bitches:* 1st, Geo. Meister's Dell.—PUPPIES—*Dogs:* 1st, Geo. Meister's Doll.

CLUMBER SPANIELS.—*Dogs:* 1st, W. S. Cobb's Punk. *Bitches:* 1st and 2d, W. S. Cobb's Our Joan and Our Judy.

BEAGLES.—CHALLENGE—*Bitches:* 1st, Middleton Kennels' champion June M.—OPEN—*Dogs:* 1st, D. O'Shea's Crowner; 2d, G. D. Welton's Pomp; 3d, The Field Kennel's Hustler. *Bitches:* 1st, Middleton Kennels' Snow; 2d, C. Harris's Little Spottie; 3d, C. B. Pierce's Runa. Reserve, L. Kaufman's Trixie K. Very high com., G. D. Welton's Vanity, The Field Kennels' Fizzie.—PUPPIES—*Bitches:* 1st, E. E. Thompson's Maggie T.

FOX-TERRIERS.—*Dogs:* 1st, H. Northwood's London Risk; 2d, F. Reting's Stormy. *Bitches:* 1st, C. F. Frenzler's Rosa Canina.

IRISH TERRIERS.—1st, D. O'Shea's Nora.

PUGS.—CHALLENGE—*Dogs:* 1st, Eberhart Pug Kennels' Eberhart's Cashier.—OPEN—*Dogs:* 1st, Eberhart Pug Kennels' Patsy Bolivar; 2d, Fannie K. Simmonds' Babe S. Very high com., S. H. Slifert & Son's Othmar. *Bitches:* 1st, Eberhart Pug Kennels' Sara Bernhardt; 2d, C. K. Farmer's Pansy's Judy; 3d, S. M. Arrasmeal's bitch. Very high com., H. Seney's Fannie.—PUPPIES—*Dogs:* 1st, Shawnee Pug Kennels' Sir Douglass. *Bitches:* 1st, Eberhart Pug Kennels' Virginia.

WHIPPETS.—1st, 2d and 3d, Campbell & Blake's Maggie, Ben and Nancy Hanks.

MISCELLANEOUS.—2d and 3d, O'Riley & Davis's Jumbo and Midge.

### SPECIALS.

Best mastiff, A. V. Cochran's Cerf Vola; best great Dane, Wolverine Kennels' Lenta; best American-bred over 1 year old, H. G. Nichols's Rhoebe; best in show, Harry Boyer's Favor; best greyhound, Master Rich; best foxhound, Dan O'Shea's Ranger; best pointer dog, open classes, W. B. Mershon's Jack of Naso; best bitch, ditto, G. B. Thomas's Nell of Naso; best pup, G. B. Thomas's Inspector. English Setters—Best kennel English setters, Eberhart's (agent) Hem; best setter dog and bitch in open classes, Erwin C. Smith's Max Noble and Joe Lewis's Miss Frost; best in show, E. C. Smith's Max Noble. Irish Setters—Best kennel, Oak Grove Kennels; best dog in show (2), Oak Grove Kennels' champion Kildare; best bitch, Oak Grove Kennels' Norna. Gordon Setters—Best bitch, Geo. Meister's Fly M.; best dog, A. Sanford's Trade. Collies—Collie Club's medal for best in open classes, John Hawks's Sir Walter Scott III.; best dog or bitch in show, John Hawk's Sir Walter Scott III. Best field spaniel, Geo. Miller, Jr.'s Toledo Snap; best cocker spaniel dog, Campbell & Blake's Brownie; best dachshund bitch (2), Chas. F. Gentz's Lina; best Chesapeake in show, Geo. Meister's Shot; best beagle (2), Middleton Kennels' Snow; best fox-terrier dog in show, Chas. F. Frenzler's Rosa Canina; best pug bitch, Eberhart Pug Kennels' Sara Bernhardt; best curled tail, Eberhart's Cashier; best sired by Eberhart's Cashier for kennel, Eberhart's Pug Kennels.

## THE IRISH SETTER FIELD TRIALS.

*Editor Forest and Stream:*

The closing of the Irish setter Derby with twenty-two entries practically assures the success of that stake unless through misfortune or lack of pluck many of them fail to run. Last year, however, out of the thirteen puppies entered eleven ran, so the staying powers of the Irish setter men as well as their dogs seems to be pretty good, and we live in hopes of having the stake fill satisfactorily. We are now ready to receive entries for the All-Aged Stake, which close Nov. 1. The prizes in this stake have not yet been officially announced, but our success with the Derby has been so marked that I have no doubt but that at least the same amount of prizes will be offered in the All-Aged as were given in the Derby, viz., $200 to first, $100 to second and $50 to third. The executive committee were waiting to see the result of the Derby entries before making promises for the All-Aged Stake. We don't want to bite off more than we can chew, and the club wants to pay everything it promises. The O'Callaghan prize of $15, which Mr. Harry Anderson won last year with Nugget, has been generously donated for the winner of this year's Derby. The prospects for a good All-Aged entry are excellent. Most of those who ran their dogs in the trials last year have also promised to run some this year and besides we have several new recruits. There are a good many Irish setter men throughout the country that could run a dog if they tried, and I hope they will let me hear from them before Nov. 1. The executive committee were desirous this year of conducting the trials without having to solicit contributions, and it now looks as if they would be able to do so. The club has done all in its power to make things satisfactory to the Irish setter men and they ought to come forward with their dogs. The moderate entry fee, the acknowledged ability and reputation of the judges and the liberality of the prizes ought to be sufficient to secure a good All-Aged entry.

G. G. DAVIS, Sec'y.

## CALIFORNIA KENNEL CLUB MEETING.

*Editor Forest and Stream:*

The annual meeting of the California Kennel Club was held Wednesday, Sept. 14, and it was stated that Mr. Max Wenzel, the club's delegate to the American Kennel Club, was requested to notify the American Kennel Club that the California Kennel Club had no desire to interfere with dates claimed by any club, and to ask equal concessions at a future date. The following officers were elected for the ensuing year: President, Senator D. H. Everett; First Vice-President, Dr. John Gallway; Second Vice-President, Dr. James Stanton; Treasurer, A. B. Truman; Financial Secretary, J. J. Jamison; Corresponding Secretary, Dr. Nief; Executive Committee, J. B. Lewis, J. W. Orndorff, D. F. Crowley, Robbert Liddle, E. T. Harvey, F. J. Silvey, Gustav Pohlmann, Percy McPartland, W. G. Cue, Joseph Krutt and J. H. Harvey.

FAIR PLAY.

WINNING IRISH SETTER TEAM AT TORONTO AND KINGSTON SHOWS, 1892.

A KINGSTON GROUP.

## CENTRAL FIELD TRIAL CLUB DERBY.

*Editor Forest and Stream:*

Herewith I hand you a list of 89 Derby entries that have paid their second forfeit—52 English setters, 1 Irish setter and 36 pointers, whelped in 1891. We would have sent them earlier, but have been so busy that it was impossible to prepare them sooner.

ENGLISH SETTERS.

CECILE H. (J. L. Adams), dog (Dr. Machlin—Cosette).
SIR KENT (J. L. Adams), dog (Kent II.—Nicoletta)
CHEVALIER (Avent & Thayer Kennels), dog (Jean Val Jean—Lucy Avent).
SHADO (Avent & Thayer Kennels), bitch (Jean Val Jean—Lucy Avent).
BONIAR (Avent & Thayer Kennels), dog (Roderigo—Juno A.).
KINGSTON (Avent & Thayer Kennels), dog (Chance—Bessie Avent).
HAMLET (Avent & Thayer Kennels), dog (Chance—Bessie Avent).
LOCHINVAR (Avent & Thayer Kennels), dog (Chance—Bessie Avent).
PROCTOR KNOTT (Blue Ridge Kennels), dog (Gath's Hope—Dashing Lady).
HOPE'S MINT (Blue Ridge Kennels), dog (Gath's Hope—Dashing Lady).
LANCIER (Blue Ridge Kennels), dog (Gath's Hope—Stockings).
DICK FOX (Blue Ridge Kennels), dog (Chance—Countess Rush).
LADY BROOKS (Blue Ridge Kennels), bitch (Chance—Countess Rush).
ORSINO (E. W. Clark, Jr.), dog (Rod Gem—Winnie Davis).
SUNFLOWER (C. S. Cross) bitch (Dick Turner—Babe Gladstone)
FLING (Bert Crane), bitch (Rowdy Rod—Maud).
BRIGHTON CLIP (T. C. Davey), bitch (Canadian Jester—Lassie).
GALE NOBLE (H. K. Deveraux), bitch (Breeze Gladstone—Katie Noble).
SPOT CASH (H. K. Deveraux), dog (Vanguard—Georgia Belle).
NAHMKE PHILLIP II. (E. W. Durkee), dog (Nahmke Phillip—Mercy).
NAHMKE ALICE (E. W. Durkee), bitch (Nahmke Phillip—Mercy).
EL REY DEL MONDO (El Grato Kennels), dog (Toledo Blade—Jessie Gladstone)
ROGER'S SPARK (L. Gardner), dog (Roger—Dora Deane).
HOOSIER GIRL (J. H. & J. A. Hunter), bitch (Dad Wilson—Daisy Hunter).
DUFF (W. T. Hunter), bitch (Toss—Pitti Sing).
GLADSTONE'S PET (W. T. Hunter), bitch (Roderigo—Gladstone's Girl).
HOOSIER LADY (F. R. Hitchcock), bitch (Dad Wilson—Daisy Hunter).
CRICKET (F. R. Hitchcock), bitch (Roderigo—Juno A.).
CHINAMAN (F. R. Hitchcock), dog (Chance—Bessie Avent).
KY-KO (C. F. Joyce), dog (Tan—Ightfield Sophie).
WINNEPEG (Thos. Johnson), dog (Manitoba Toss—Pitti Sing).
NAT GOODWIN II. (H. Merriam), dog (Nat Goodwin—Royal Myrtle).
FAN (H. Merriam), bitch (Nat Goodwin—Royal Myrtle).
FLYAWAY (H. Merriam), bitch (Rowdy Rod—Eve).
SPEEDAWAY (H. Merriam), bitch (Rowdy Rod—Eve).
DESSIE HOPE (P. T. Madison), bitch (Gath's Hope—Stockings).
PRINCESS RAY (G. A. McLin, agent), bitch (Prince Lucifer—Princess Lil).
FLIRT (Randolph Kennels), bitch (Dakota—Rose).
GAIETY (Royal Robinson), bitch (Lone Jack—Gay Phœbe).
CLEM GLADSTONE (J. L. Sneed), dog (Paul Gladstone—Latonia).
MECCA (T. E. Shreve), dog (Paul Gladstone—Latonia).
RAP EYE-DAN (W. Wilson), dog (Ben Hill—Dolly S.).
ST. ANTHONY (J. H. Winslow), dog (Rowdy Rod—Celeste C.).
LADY BELTON (T. M. Lawry), bitch (Tennessee Bob—Dixie Belton).
ROD'S SUE (P. Lorillard, Jr.), bitch (Roderigo—Gladstone's Girl).
DOT ROGERS (P. Lorillard, Jr.), bitch (Roderigo—Gladstone's Girl).
ADDIE T. (P. Lorillard, Jr.), bitch (Roderigo—Maggie Gladstone).
MAIDEN MINE (P. Lorillard, Jr.), bitch (Vanguard—Georgia Belle).
GLADEVIA (P. Lorillard, Jr.), bitch (Blade—Estelle).
SPIKER'S GIRL (P. Lorillard, Jr.), bitch (Chance—Spike).
REXICUS (J. N. Maclin), dog (Van Vleete—May).
BELLE OF KENTUCKY (Fairmount Kennels) bitch (Dad Wilson—Bohemian Girl).

IRISH SETTERS.

ELPHIN II. (E.-B. Bishop), bitch (Tyrconnel—Kinvarra).

POINTERS.

KENT ELGIN (T. T. Ashford), dog (King of Kent—Vera Bang).
LAD OF RUSH (J. L. Adams), dog (Rush of Lad—Topsy L.).
DAISEY SOCWELL (J. L. Adams), bitch (Ossian—Devonshire Jilt).
RIDGEWOOD BEPPO (Graphic Kennels), dog (Beppo III.—Revelation).
HUNT'S CROXIE (Bob Cooper), bitch (King of Kent—Croxie Wise).
CHIN CHIN (Charlottesville Field Trial Kennels), dog (Rip Rap—Fannie Bijou).
JOHN PAUL (Charlottesville Field Trial Kennels), dog (Rip Rap—Petticoats).
RUFFLE (Charlottesville Field Trial Kennels), bitch (Rip Rap—Dexter's Dolly).
CONSCRIPT (Charlottesville Field Trial Kennels), dog (King of Kent—Hops).
COSETTE (Charlottesville Field Trial Kennels), bitch (King of Kent—Hops).
SEARSPRING (Charlotteville F. T. Kennel), dog (Mainspring—Queenie).
JINGO (Charlotteville F. T. Kennel), dog (Mainspring—Queenie).
VARRO (J. B. Castleman), bitch (Rex—Nell).
MAIROS (J. B. Castleman), bitch (Rex—Nell).
LADY PEG (W. T. Hunter), bitch (King of Kent—Lass of Bloomo).
DENNIS (F. R. Hitchcock), dog (King of Kent—Croxie Wise).
HEMPSTEAD BLOSSOM (Hempstead Farm Kennels), bitch (Duke of Hessen—Woolton Game).
HEMPSTEAD GAME (Hempstead Farm Kennels), bitch (Duke of Hessen—Woolton Game).
HEMPSTEAD DUCHESS (Hempstead Farm Kennels), bitch (Duke of Hessen—Merry Legs).
LUCK OF HEMPSTEAD (Hempstead Farm Kennels), dog (Duke of Hessen—Merry Legs).
MANITOBA SHOT (T. Johnson), dog (Coton—Psyche).
CROXIE KENT (W. N. Lipscomb), bitch (King of Kent—Croxie Wise).
FLORINE (C. H. Odell), bitch (Rip Rap—Dalgorouki).
TRIM (C. H. Odell), dog (Roger Williams—Ruby).
PETE (C. H. Odell), dog (Roger Williams—Ruby).
BRADLEY (C. H. Paine), dog (King of Kent—Lass of Kent).
EARLY DAWN (Randolph Kennels), dog (Duke of Beaufort—Mam'zelle).
KENT'S MAID (H. I. Reginald), bitch (King of Kent—Galena).
COXIE O'BANNON (R. I. Shannon), bitch (King of Kent—Croxie Wise).
GINGER ALE (R. I. Shannon), bitch (Osborn Ale—Pearl's Dot).
DUCHESS OF HIGHLANDS (Elliott Smith), bitch (Beppo III.—Belle).
GRACEFUL II. (Luke W. White), bitch (Duke of Hessen—Concave).
GRACE IV. (Luke W. White), bitch (Duke of Hessen—Concave).
CLANCARTY (J. H. Winslow), bitch (Beppo III.—White Fawn).
REDEMPTION (J. H. Winslow), dog (Graphic—Vandalia).
ASPIRATION (J. H. Winslow), dog (Dick Swiveler—Bloomo III.)

C. H. ODELL, Sec'y-Treas.

## POINTS AND FLUSHES.

CHICAGO, Sept. 17.—In a recent issue of FOREST AND STREAM I touched briefly on the subject of judging by scoring, in reply to a communication from Dr. Mills on that matter, and I now desire to treat it more fully.

Scoring by points is a most plausible fallacy, since nothing appears more reasonable than that if each important part of the perfect dog is given a fixed value, the sum total of all these will represent the perfect dog. This, it should be noted, is the ideal perfect dog, a most indeterminate quantity as a starting point, since there is hardly any question on which fanciers differ more radically than on what constitutes the ideal dog of any breed. There are also wide differences of opinion as to what constitutes type and general race characteristics, these differences, as a matter of course, being greater in respect to certain breeds than to others. By compromises, a certain vague ideal type is agreed upon. Each important part of the vague ideal dog is given an arbitrary and relative value, it being assumed that the value may represent the anatomical value of the part of its value as indicative of important race characteristic, or both. As to the relative values of the different parts, the value of the loin as compared to the head; the value of the forelegs, tail and chest as compared to the neck or to each other, etc., are all established by agreement, and are therefore entirely artificial and arbitrary.

Taking 100 as representing the total value of a dog in the scale of points, it is subdivided into such values as are considered necessary to give as good a representation of the animal as can be done by figures. If head is valued at 15 and feet and legs at 6, it is entirely a matter of agreement, and is, therefore, wholly artificial. There is, however, nothing whatever in the nature or structure of an animal that will permit its race characteristics and anatomy to be portrayed by figures.

It is a fair assumption that if all the scales of points, as expressed by figures, were placed before a man who was familiar with all recognized breeds of dogs, but who had never seen any scales of points, he could not determine the breed to which any one of them belonged, this of course assuming that there was no explanatory matter, but only the different columns of figures which represent the different breeds of dogs.

To be intelligible, the unit, represented by any figure, must be a constant, fixed quantity, thus, two feet, or ten bushels, etc., have a conventional meaning known to everybody. But 20, as applied to the head and neck of the dog, has no fixed meaning. No two dogs have heads precisely alike. Nor are they alike in other respects. The judge, in scoring dogs by a scale of points, has constantly varying quantities to estimate and upon which to fix values, and as no two parts are precisely alike, or alike as related to other parts, there is no exact knowledge applied at any time. It all rests on estimates and guesses in practically applying the scale of points. I do not believe that any two judges in the world could go through a class of any bred of dogs, and, working independently, score the dogs alike. It is an open secret among show goers that the same dog has been scored differently by the same judge.

But the knowledge of how to apply a scale of points, such as it is, only comes after one has learned thoroughly the breed of dogs to which it belongs. No one can study a scale of points by itself and learn anything about the breed it is supposed to represent. It is then simply an abstraction. No one can take the different scores of each individual in a class of dogs, made by a judge, and tell anything about what kind of dogs were in it. Type, expression, characteristics, symmetry, etc., cannot be represented by figures. After a judge has made a score of a dog according to the recognized standard, it has no meaning to any one but himself. The course of reasoning by which he arrived at certain conclusions, his mental estimates, his data, acquired knowledge and his ipeas of the ideal type on which he founds his score are all personal with him and do not show in the column of figures. The latter represents his judgment, supposedly in a form that will make it plain to all in an exact mathematical way, but which conveys no meaning whatever of the dog it is intended to represent. Most assuredly, a judge does not need to score a dog for his own information, for, if he has the proper knowledge of dogs, he can judge without scoring them. The column of figures being of no value to any one, and no assistance to the judge himself, of what value is it?

If a perfect head were represented by the figure 10, a judge might represent a coarse head by the figure 8, and a small weak head by the same figure. There is nothing precise in such figures to the reader, because they rest on no fixed quantity outside of the mind of the judge. If a judge has sufficient knowledge of dogs to estimate their worth and compare them one with another, he does not need a column of figures of his own creation to assist him. His scores can be no more to him than memoranda, and they are mere abstractions to all others.

These intrinsic weaknesses are greatly aggravated by the well known fact that nearly all recognized judges, the ones on whom the public depends for correct interpretations of the standard, differ greatly in their ideas of type, and practically in respect to what specimens are the best dogs, as shown by different judges reversing each other's decisions at shows. Inferentially, they must have different ideas, although it is supposed that they have the same standard to govern them.

The idea of scoring by a scale of points was carried still further by some field trial clubs in the past, in attempting to score a dog's work in a field trial by a scale of points. Pointing, backing, ranging, etc., were all valued at a maximum value, supposed to be perfection, and anything short of it was graduated according to the degree it fell short. It seems to me that it would be no more absurd to attempt to represent the lights, shadows, colors and configuration of an autumn sunset than to sum up the intelligence, powers of scent, general knowledge and practical work of a dog in a column of figures.

So long as the units, on which the figures are based, are unknown, unlike or constantly shifting and changing, the figures are meaningless. The general trend of progress is to abandon the fallacy. Field trial clubs gave it a thorough trial and abandoned it. But few breeds of dogs are now judged by scoring them.

Chicken fanciers, among whom it was most firmly cherished, have become divided on its merits both in theory and practice, and the signs of the times indicate that it will take its place with the wrecks which have marked the march of progress through the centuries.

I think that Dr. Mills will concede at the outset that there must be some fixed, unalterable unit as a starting point, to deal intelligibly with it by figures. Granting this, it destroys the possibility of a correct scale of points, for there is no fixed unit possible in comparing the relative parts of a dog with each other, as their sum total with that of some other dog.

Still, there are probably points of view which admit of a more favorable presentation of the matter, and I feel so sure that Dr. Mills can do the subject justice that I shall look forward with great interest to his communication on the matter, which he has promised.

---

That dogs are property in fact if not in law, the following reprint from the Chicago *Tribune* of this date will go far to show:

"A St. Bernard dog was the result of a replevin suit in Justice Woodman's court yesterday afternoon. E. H. Kohn filed the suit against Nicholas Greenwold. He claimed that his dog had either been lost or stolen and was in the possession of the defendant. The justice ordered the dog brought

into court, and the defendant entered a reply that the dog belonged to him, as he had purchased him of a peddler. The court asked him which he would rather do, give up the dog or confess judgment for $100, his value. The defendant said he would confess judgment. This the plaintiff would not allow and took a non-suit. He then caused another replevin attachment to be issued and placed in the hands of a constable for service. The constable secured the dog, after much resistance on the part of Greenwold, and returned the canine to Mr. Kohn. A warrant was then issued for Greenwold for resisting an officer, and he was locked up at the Desplaines Street Station." B. WATERS.

# DOG CHAT.

### Kingston Show.

The building used for the dog show at Kingston is in every way well adapted for a show. About 600 dogs could be comfortably benched, and the flooring being hard earth is particularly well adapted to showing dogs off *au naturel*. The continual fear of slipping on the sawdust covered floors of the usual judging ring often works an injustice on the dogs, trying them in their actions. Here the judges could race the dogs to their hearts' content, and this Dr. Mills and Mr. Tallman did. Mr. Laidlaw had compassion on Geo. Bell, knowing how he had to travel last year, and just "toddled" them.

Mr. H. C. Bates is a capital secretary and manager, never leaving his work for a moment and had everything in very nice form. Aisles were kept very clean and the dogs had every thing to make them comfortable. Catalogues were fairly correct and a marked catalogue was issued on Wednesday.

In such a large building as the Skating Rink, and with the benches so far apart, the lack of attendance caused a cold feeling of neglect to creep over every one connected with the show. All day long and in the evenings one saw a few odd people strolling round the benches, and if this show comes out more than even we shall be more than surprised. It was stated that the club had $300 offered for the gate receipts before the show opened, but pooh-poohed the idea. Now we fancy that half that amount would be acceptable. The people of Kingston are sleepy, very sleepy as far as most things are concerned, and dogs especially. One form of entertainment in the evening is quite sufficient to engage their complete attention, and as there were human concerts during the week, the dog show chorus suffered. The officials, however, are brimful of staying power and are loath to give up. We should think that, held in connection with the fair, their show would be a lively one, and it could not be in a worse locality to get at than the Skating Rink. There are only six primitive horse-cars in the town, and they are owned by one man, who has a monopoly of the business—or rather the business has a monopoly of him, for I did not see any one riding on the cars.

To keep themselves warm the boys indulged in athletics, and with jumping and running races added an interesting and limb-stiffening feature to the show. Geo. Bell and our only "German" doing the hop, skip and jump was a treat.

The judging space was ample and the competition for the best mover among mastiffs and St. Bernards afforded lots of fun for the spectators, for Mr. Tallman, the judge, did make them hustle, and the winner, Melrose, was far away the best; he has very true action. Some one saddled our genial friend Alderman Stewart with a St. Bernard, and like everything else he undertakes, the thorough shaking up the dog got startled it out of its senses for the rest of the show. The disinfecting, though little was needed, was excellent, and we never attended a sweeter show. On the pillars of the building were attached small deodorizers that continually emitted a pleasant odor and effectually downed any offensive smell floating round. We should recommend something of this sort for all our shows, as it materially aids the ground disinfectants. Mr. Corbett was always on hand and courteous as usual to every one, and Messrs. Kent and Darby were also generally there.

Judging commenced on time and Mr. Laidlaw got through his classes by Monday night, and the other two judges had concluded their labors by Tuesday evening. The weather throughout was beautiful and the pretty town of Kingston well repaid a visit. We noticed among the well-known exhibitors Messrs. F. W. Sackett, A. D. Stewart, P. J. Keyes, A. J. Spracklin, Geo. Bell, Ben Lewis, W. Connors, Ed Booth, Arthur Trickett, W. A. Fenton, Geo. Thomas, etc.

On Wednesday afternoon, having an hour or two to spare, a trip was made by Messrs. Geo. Bell, A. J. Spracklin, W. C. Darby, "Billy" Tallman and the FOREST AND STREAM representative to Collins Lake, a sheet of water situated anywhere from five to twenty miles from the village, at least we thought so. We cast our lines in pleasant places, but notwithstanding our seductive lures and frogs, the score was one little black bass and two rock bass, in addition to various aquatic plants—and things. We finally "dropped the anchor" and pulled for home in the dark. Meanwhile Spracklin had tried the shores for snipe, but was unsuccessful, though the previous day he had bagged five over a smart little cocker that I saw "Uncle Dick" look with envious eyes upon. Just his sort.

The show being voted slow on the last day most of the boys concluded to accompany the two press representatives from New York across the Bay of Quinte to Cape Vincent, and enjoyed a pleasant sail on the smart little steamer Maud. Just coming up to the dock at Cape Vincent we saw a boy in a boat being rowed ashore and holding on to a muscallonge some feet in length (affidavit follows), which he had hooked, but could not boat. Fishing is said to be very good at Cape Vincent just now, the best place is about three miles west up the shore from the N. Y. Central station. We shall always remember our Kingston trip as a pleasant one.

The red cocker Rufus was found dead in his stall on Thursday morning. No cause was assigned for his death, and a post mortem was held by the "vet," but up to the time of our leaving the show the result was not known.

Mr. Darby presented quite a clever trotting setter to Ben Lewis, at Kingston. The dog has a capital gait and has been trained to sulky. "Ben," we believe, will see that his training is completed, and Doc will have another rival.

### The Puppy Rule.

We intend, and other kennel journals should do the same, to call attention to every violation of the Kennel Club puppy rule, which says that the pups shall be over six months old and under twelve. At the Grand Rapids show, Wolverine Kennels showed Furo, a great Dane pup, whelped March 27, 1892. At Toronto there were a number of puppies marked in the catalogue as six months, and two St. Bernard pups so marked were not more than four or five months old. In every puppy entry the date of birth should be given. This grasping after a big entry list should not endanger the general health of a show. The attention of the C. K. C. is called to the following at this show: "Class 194. Exhibition and selling class for litters of Puppies of all Breeds." We regret to say that entries 715 to 719 represented so many litters. Besides being a cruelty to the pups and mother in being cooped up in a stinking, wet stall, the health of other young dogs in the show should not be subjected to such risks. The way it affects the public is easily imagined, and another thing it serves no good purpose, even to the owners, for hardly any one nowadays would think of buying a pup from a litter at a show, too many have been bitten in that way already. At Kingston there were no puppy prizes, for which the club deserves the thanks of the exhibiting community.

### Northwestern Field Trials Club.

A general meeting of the Northwestern Field Trials Club was held at their rooms on Friday evening, when it was decided to hold their second annual trials the first Monday in September, 1893, at Morris, Manitoba, unless some suitable place can be found in Minnesota or Dakota. The resignation of Mr. P. H. Gotzian as president was accepted. The following resolution was also unanimously carried: "We, the members of the Northwestern Field Trials Club, beg to tender to our secretary-treasurer, Mr. Thomas Johnson, our thanks and appreciation for his indefatigable services on behalf of the club, and to assure him of our strongest confidence and esteem, and that we condemn the puny and contemptible action of the Manitoba Field Trials Club in going through the farce of expulsion—nearly a year after his resignation, on the flimsy pretext that the Manitoba Field Trials Club had incurred expenses for advertising meetings, etc., to re-organize their club—and that we assure our secretary that we consider this action of the Manitoba Field Trials Club petulant, malicious and vindictive, and unworthy any organization."

### Philadelphia K. C. Field Trials.

The entries for the Philadelphia Kennel Club All-Age Stake will close Oct. 15, and the prizes are $400, $200 and $100. The judges are William Tallman, of New York city; Washington A. Coster, of Saratoga Springs, N. Y.; and Dr. William Jarvis, of Claremont, N. H. These names carry with them the confidence of sportsmen all over this broad land, and the attention of the Irish setter men is particularly called to the names of the judges of the P. K. C. trials. The owners of the red dog are directly encouraged to enter their dogs in connection with the English setters and pointers. The Philadelphia trials are deservedly popular and the success of the club's first open trials is assured. Out of a total of 72 entries in the Derby Stake 62 forfeits have been paid. For rules, blanks, etc., address Francis G. Taylor, Sec'y, 608 Chestnut street, Philadelphia. In our travels abroad we have found it the general wish and intention of many sportsmen to take in the P. K. C. week, at least, and that is sufficient guarantee as to the probable success of these trials, both from a social and a competitive view.

### Dogs Killed by Lightning.

The Brooklyn Gun Club has a splendid club house and 1,100 acres of land in the village of Smithtown. The club has occupied its present home four years, and a year ago it laid out a kennel yard for the fifty or sixty dogs which are sometimes kept there. The yard is about 200 by 150ft., extends east and west, and is inclosed by ordinary telegraph wire. At every 16ft. a wire extends 60ft. into the inclosure, where it is fastened to a post. The dogs were fastened by 4-foot steel chains to these wires, each dog having a separate wire. On Saturday last there were twenty-three dogs chained up, some of them quite valuable. About 7 o'clock in the evening one of the worst storms ever experienced in that section occurred, and the dogs retired to their kennels near the outside wire. Next morning the kennelman going out to feed the dogs noticed they did not bark as usual, and on coming to the kennels found that all the dogs on the south side had been killed and nearly all on the north side; one or two dogs were missed on this side, the fluid being a little erratic in its movements. In all sixteen dogs met a sudden and extraordinary death. We know several kennel owners who exercise their dogs on the wire, but hereafter to feel safe they will have to study the mysteries of insulation.

### Sale of Champion Dick Swiveler.

The Oak Grove Kennels have purchased from Mr. W. L. Washington, the well-known Irish setter champion Dick Swiveler. This is an important addition to an alreay formidable kennel. Dick Swiveler is so well-known he needs no description here. The rivalry now being created in the Irish setter ranks must do good to the breed, especially when one remarks the total absence of contention on the part of the owners of the principal kennels, and the way the kennel decision was received at Toronto, shows the right spirit. It is a question of condition principally between the two leading kennels, both can boast the best dogs in one or the other classes.

### Omaha Dog Show.

We have received the premium list of the Omaha show to be held Oct. 25 to 28 at the Exposition Hall, Omaha, Neb. The show is under A. K. C. rules. Mr. John Davidson judges all classes excepting pugs, toys, Yorkshire terriers and toy spaniels, which Dr. Cryer will handle. For mastiffs, Great Danes and Newfoundlands the fee is $3, toys, etc., $2, and other breeds $2.50, a very good arrangement. The prizes range from $15, $10, to $5 and $3. A number of valuable kennel specials are offered, and in all $2,500 is hung up. A more extended notice of the show will be given next week.

### A New Beagle Club.

It is intended by a number of beagle enthusiasts to start a beagle club down Mississippi way. The owners there are rather too far away to co-operate with the Massachusetts club, and as they wish to hold trials and improve the breed, they have asked Mr. Chapman to help them out, and he will probably assume the duties of secretary for a time till they get on their feet. The beagle influence is evidently spreading and there can be no better cause.

A cablegram to Mr. Mortimer conveys the sad intelligence of the sudden death of Mrs. Raper, the wife of Mr. George Raper, who, it will be remembered, judged at New York and other shows here last spring. The death of Mrs. Raper, who was almost as well known as her husband at English dog shows, must have been a great blow to her family, and Mr. Raper has, we are sure, the sincere sympathy of the friends he made over here.

Ray D Hill, owner of Werowance Kennels, Trenton, N. J., has bought from Tonawanda Kennels, Tonawanda, N. Y., the rough-coated St. Bernard Iroquois Rhoda (22,159), by Mount St. Elias out of Lady Bernie; also from Swiss Mountain Kennels, Germantown, Pa., one of their best stud dogs, Ben Ormonde (17,044), a rough-coated St. Bernard.

A number of interesting communications for lack of space must lay over till next week, among them several queries.

In our Toronto report we should have credited Mr. Gibbs, of Guelph, Ont., with the kennel prize for best foxhounds. We were told his team was the London Hunt Club, hence the mistake. They are a particularly fine lot and very sorty.

The big exhibition at Chicago next year will include among its features a bench show, which will probably attract entries from other countries than Canada and the United States, says the Toronto *Globe*. On account of the question of space the number of entries is limited and the allotment to Canada is 200 dogs of all breeds. Ald. A. D. Stewart, of Hamilton, has been appointed superintendent of the Canadian exhibit, and the Dominion Government will meet the expense of sending to the show such dogs as are decided to be of sufficiently high class to be representatives of the well-bred Canadian dog. How to select these 200 was the question discussed at a conference between the executive committee of the Canadian Kennel Club and the Dominion and Ontario Commissioners, Prof. Saunders and Mr. N. Awrey, M.P.P., during Toronto show. The result was a recommendation that dogs whose owners desire to exhibit them at the World's Fair next June should be brought together in Toronto early in February next, and that a committee of five should make the selections. Owners will be required to send their dogs to Toronto at their own expense, but the Government will probably pay for the benching and attendance while here and the judges' expenses. This recommendation, if acted on, means a two-days' show. Some special regulations will be made to meet the cases of noteworthy dogs in Manitoba and other distant parts of the Dominion.

There were several mistakes and typographical errors in the Toronto and Kingston list of awards due to the telegraph operator. Mr. E. H. Moore is credited with owning all the winners in rough St. Bernard dogs; the owner of Baldus and Oneida is Mr. W. J. Moore. In Irish water spaniels Marguerite should be first. Challenge Irish terriers should be Boxer IV. instead of Borco. At Toronto the second winning bull-terrier in open dogs was Comet II., not Count II., and at Kingston the winners were Herbert M. Howe's Comet II. first, Chatham Prince second, Grove Duchess third, Loumont Kit vhc., rightly placed but wrongly spelt.

Mr. Korning's St. Bernard bitch Lady Sylvia that was lost in Kansas City has been found and is on its way to San Francisco, Cal.

The dog in the manger act that the Rochester Kennel Club was guilty of has affected their show this week quite seriously. While in all probability they could have had a show of two or three hundred entries, a paltry hundred is all they have. This will be a warning to other clubs. The regular handlers have shown how they feel in the matter. Ben Lewis goes to Ottawa with thirty dogs, Geo. Thomas has about twenty-five, A. J. Spracklin about thirty, and several other handlers take lesser teams. These in the ordinary way would have all come to Rochester, being more convenient than Ottawa.

Dr. Foote is having busy times at his farm. Rochelle Majestic has just whelped seven by Merry Monarch, and Broomfield Madge is due with a litter of champions this week. The Rochelle Kennels is quite a delightful place, but as our visit was made in the absence of the owner, we must defer particulars for another time.

The Pennsylvania State Agricultural Society are going to hold a dog show in connection with their fair at Lancaster, Pa., Oct. 10 to 15, and Mr. Donald McVicar, of Allamuchy, N. J., has been appointed judge.

We are told that Mr. John Read had been invited to judge at Danbury show, but has declined.

At the last meeting of the board of governors of the New England Field Trial Club, held Sept. 1, it was voted that a club dinner at Hotel Thorndike, Boston, be one of the features at the next regular quarterly meeting, Tuesday, Oct. 4, at 7 P. M. A full attendance is requested.

Among the new advertisements published in our business columns this week we note the following offers for sale: Beagles—Box [illegible] Royal Forest Beagle Kennels. Collies—854 Seventh avenue, Manataug Kennels. Setters—Chelmsford Kennels, C. T. Brownell. Hounds—C. F. Kent, Rex Kennels. Bull-terriers—H. M. Howes. Great Danes—J. B. Harrison. J. Black offers the greyhound Flash at stud; the Swiss Mountain Kennels offer Scottish Leader and King Regent at stud. Box 788 desires a partner in a show and breeding kennel.

### FLAPS FROM THE BEAVER'S TAIL.

TORONTO, Canada.—The Pottersbug (London) Kennels' rough-coated St. Bernard Phyllis died the other day, it is suspected from the effects of poison. Phyllis was the dam of champion Claudius, just imported by Dr. Warner, of Bridgeport, Conn., and was got out some two or three years ago.

Dr. Mole, V.S., Hamilton, who has been most successful in his treatment of the dog, is about to remove to Toronto, where he anticipates a more extended scope for his work.

Who does not know of the notorious Dan O'Shea? I heard rather a good little story of him the other evening, too good to let go. After the judging on Monday, a select little company was gathered in the parlor of the Walker House, among others "Billy" Tallman, E. "Birdie" Elliott, Frank Wheeler, A. D. Stewart and myself. One of the gentlemen present used to do a little in the pit (I trust he has reformed) and had an old cock, the winner of a hundred battles. This old fellow Dan borrowed, and as usual he came off victorious, but alas! he, according to Dan's account, succumbed at the moment of triumph, and to prove it he produced the legs. The owner of the "late lamented" looked at them a moment and then said: "Why, the legs of my bird were yellow, these are bright blue!" Dan, not a bit discomfitted, replied with that babe-like smile suffusing his terra cotta colored countenance, "Oh, yes, but they all turn blue when they're dead."

The past week has been a busy one, numerous meetings having been held. The inaugural meeting of the Canadian Fox-Terrier Club was held on Monday night, and was quite successful. Mr. A. D. Stewart was elected chairman and Mr. H. B. Donovan secretary of the meeting. After a brief speech from Mr. Stewart, explaining the objects and aims of the proposed organization, it resolved that the time was ripe for such a club and that we proceed to form such an association forthwith. The officers were then elected. The committee was instructed to draw up constitution and by-laws; the annual fee fixed at $2, with no entrance fee, and it was decided to take a vote by mail of all members three months from date on the question of club judges.

An executive meeting of the C. K. C. was held on Tuesday evening, at which were present Messrs. T. G. Davey, president, Dr. Nevin, Dr. Wesley Mills, Dr. Milne (Victoria, B. C.), H. Bedlington, H. Gorman, P. G. Keyes, A. F. Glass and H. B. Donovan, secretary. Letter read from Kingston Kennel Club claiming show dates for 1894, and same week in perpetuity, but it was the unanimous verdict that the executive did not feel competent to deal with applications for dates so far in advance. After the election of twenty-three new members the meeting adjourned.

Immediately following this meeting was held the annual meeting of the Canadian Kennel Club, President T. G. Davey in the chair, others present being, H. O. Bennett, H. Falconer, A. D. Stewart, S. F. Glass, R. McEwen, E. Richards, H. Bedlington, H. Gorman, Dr. Milne, Dr. Wesley Mills, P. G. Keyes, Dr. Niven, A. Geddes, R. S. Williams, A. E. Kent, G. S. Oldrieve, C. H. Corbett, G. B. Sweetman, F. Habort, W. Smith, F. Wheeler, Geo. Bell, R. W. Boyle,

J. Lorne Campbell, John Davidson, A. Murdock, Dr. Moll, V.S., J. Smilhe, J. G. Michener, G. W. Douglas and R. Gibson. The minutes of last annual meeting, as published in the *Canadian Kennel Gazette*, were taken as read. Reports were received from the stud book committee and committee on diplomas and adopted. The secretary's report, a synopsis of which was given in FOREST AND STREAM two weeks since, was taken as read. The treasurer's report showed the year's income, including a balance on hand from last year of $278, to be $600.41. Expenses, including secretary's salary, $150, amount voted secretary of 1891, $100, etc., $417.81, leaving a balance on hand of $182.61. On motion of Dr. Niven, seconded by Mr. Stewart, the following important resolution was passed: "That the fiscal year and membership year end on Aug. 31, 1893, and every subsequent year, with the understanding that the membership fee be due and payable on Sept. 1 after that date."

Mr. Bedlington introduced a plan of voting by mail for officers, nominated at a previous meeting, but the members present evidently being unprepared for such an innovation it was voted down.

The order of business was here suspended to admit of the introduction of Prof. W. Saunders, Dominion Commissioner, and N. Awrey, Esq., M.P.P., Ontario Commissioner to the World's Columbian Exposition. Both gentlemen spoke, at length, on the proposed exhibit of Canadian dogs, explaining many matters in connection therewith. After some discussion the making of all arrangements was left with the executive committee with the understanding that the members confer with the commissioners at once and be prepared to submit a suitable plan of procedure. Mr. Gorman's motion that a breeder's certificate be sent in for each application for registration was lost. Mr. Stewart's motion to reinstate Mr. F. H. F. Mercer was declared out of order by the chairman, as Mr. Mercer, as required by Sec. 9 of the constitution, had not applied for reinstatement.

On motion, rule of procedure was suspended to permit of the election of officers, which resulted as follows: Patron, Hon. Senator Sanford; Hon. Pres., R. Gibson, Delaware; Pres., Dr. Wesley Mills, Montreal; First Vice-Pres., C. H. Corbett, Kingston; Second Vice-Presidents, P. G. Keyes, Ottawa, Dr. G. L. Milne, Victoria, B. C., James Laycock, Calgary, N. W. T., and C. H. Smith, St. Stephen, N. B. Executive Committee—James Lindsay, Montreal; G. S. Oldrieve, Kingston; T. G. Davy and Dr. J. S. Niven, London; A. D. Stewart, W. B. Palmer and H. Bedlington, Hamilton; A. Geddes, Ottawa; R. McEwen, Byron; H. Gorman, Sarnia; C. A. Stone and J. G. Mitchener, Toronto. Treas., S. F. Glass, London; Sec'y, H. B. Donovan, Toronto; Auditor, W. Smith, London.

The secretary was instructed to write the secretary of the A. K. C., asking coöperation in the endeavor to induce the several express companies to transport bitches sent to be bred on same terms as when sent for exhibition. It was decided to apply for incorporation under the Dominion act. It was decided in accordance with Mr. Mitchener's notice of motion that no two dogs of the same breed can be registered under the same name unless with a registered affix or prefix.

The Bowmanville (Ont.) St. Bernard Kennels are importing the prize St. Bernard bitch Lady Alton. She is supposed to be in pup to the famous Sir Hereward.

H. B. DONOVAN.

## QUAIL PLENTIFUL AT NEW ALBANY, MISS.

*Editor Forest and Stream:*

Dr. Rogers, one of the resident members of Southern Field Trial Club, at New Albany, Miss., rode over part of the grounds leased by Southern Field Trial Club, adjoining New Albany, and found four bevies of quail where there was one last season; the bevies were all large and well-grown. There are more quail on the club grounds than was ever known before, thus insuring plenty of quail for next trials.

All the shooters living in or near New Albany belong to the Southern Club and will not shoot near the club's preserves or allow any one else to do so.

Many who have seen all the different grounds for field trials pronounce those at New Albany the best.

Sportsmen wishing to enjoy some good shooting in February, or attend the trials and see the dogs work, can find quail plentiful in this section, as the hatching season has been favorable and the bevies plentiful and large.

P. H. BRYSON.

MEMPHIS, Tenn., Sept. 22.

## NATIONAL BEAGLE CLUB.

*Editor Forest and Stream:*

Owing to an oversight in writing our advertisement, the names of the judges at our trials were not inserted. Make note of them as follows: Judge of bench show, H. W. Lacy, of New York city; judges of field trials, Joseph Lewis, of Cannonsburg, Pa., and W. S. Clark, of Linden, Mass. The above are names that ought to have the confidence of every beagle owner in the United States, and I look forward to seeing them well supported

F. W. CHAPMAN.
Pres. National Beagle Club of America.

### Business.

NEW BEDFORD, Mass., Sept. 26.—*Editor Forest and Stream:* As it is impossible for me to fill all orders for puppies received through my ad. in your most valuable paper, FOREST AND STREAM, I ask you to please insert the following ad. in place of the one now in. C. T. BROWNELL.

# Canoeing.

## FIXTURES.

OCTOBER.
1. Springfield, Cup, Springfield.

### Amendments to the Constitution.

THE annual meeting of the Executive Committee of the American Canoe Association will be held in about six weeks in one of the Canadian cities, and all propositions for amendments must be published for at least two weeks prior to the meeting, so that any one desiring to offer any amendments should do so very soon. At the request of Mr. Dunnell we reprint the following amendment proposed by him last winter, and we will be glad to give space for a discussion of the subject:

*Editor Forest and Stream:*

The following draft of a proposed amendment to the constitution of the A. C. A. is submitted in the hope that it may bring on a discussion and lead to suggestions from old A. C. A. men.

The proposed changes are in line with the ideas expressed of late by a number of leading canoeists.

ARTICLE VI.—*Board of Governors.*—Sec. 4. In each division at its next annual meeting the active members thereof shall elect, in the same manner as their regular officers, one member of that division to serve on the Board of Governors of the Association, whose duty it shall be to have general control of the funds and finances of the Association. The Board of Governors at their first meeting shall, by lot, determine their terms of office, one to retire on Nov. 1, 1893, one to retire on Nov. 1, 1894, one to retire on Nov. 1, 1895, and one to retire on Nov. 1, 1896, and thereafter all members shall be elected for a term of four years, or until their successors shall be elected. The commodore shall be a member *ex-officio* of the Board.

*Duties.*—Sec. 5. It shall be the duty of the Board of Governors to appropriate and apportion suitable sums to the officers and committees for necessary expenses for the running of the Association and the meets, etc., from the finances in the hands of the treasurer; and the President of the Board of Governors shall approve all bills paid by the same. They shall hear and determine all questions of dispute on appeal from the decisions of the regatta and executive committees when referred to them.

*Quorum.*—Sec. 6. At all meetings of the Board of Governors three shall be necessary to make a quorum, but in the event of the absence of any member from any cause, the executive committee of the same division from which he comes may select any other member from that division to represent him during his disability only, and in the event of a vacancy occurring the same shall be filled for the unexpired term by the active members of the division in the same manner as for a full term.

*Meetings.*—Sec. 7. The stated meetings of the Board of Governors shall be held during the annual meeting of the Association in August and at the annual meeting of the executive committee in November, but special meetings may be held at any time and place at the call of the president or at the request of three members of the board.

*Officers.*—Sec. 8. The officers of the board shall be president and recorder, whose duties shall be similar as in other organizations, and they shall be chosen annually at the annual meeting in camp.

Art. IX., Sec. 1 Amend by striking out the word "Commodore" in the sixth line and inserting "President of the Board of Governors."

FEBRUARY 20 F. L. DUNNELL.

Mr. Dunnell also offers two other amendents, as follows:

Amend Art. V., Sec. 2, by striking out all of paragraph sixth and inserting, "In the event of vacancies occurring in any division officers from any cause, the same shall be filled by the executive committee of the division to which they belonged."

Amend Art. VI., Sec. 1, by striking out in eighth line "and power to fill vacancies until the next annual meeting of the divisions."

### Aluminum Canoes.

THE possibilities of aluminum as a material for canoe building have been discussed for several years by the leading canoeists, but nothing has yet been done toward a practical test. Within the past year, however, such progress has been made in the construction of racing shells as to demonstrate the practicability of an aluminum canoe at a fairly moderate cost. A shell builder in Philadelphia, D. J. Galanaugh, has perfected a method of working the metal which permits the construction of a single shell of any desired model out of a single sheet, a four-oared boat requiring but three pieces. A single shell built this spring for the Fairmount Boat Club is 31ft. 6in. long, 10½in. beam, 6in deep at midship, 3½in. at bow and 2in. at stern, weighing with all attachments 25lbs. A large part of this weight is in the steel outriggers and in other fittings, the aluminum outriggers first used proving weak as compared with steel tubing.

Mr. Galanaugh has also built a four-oared shell for the same club, 44ft. long, 18in. beam, 8½in. deep amidship, 5½in. at bow and 4½in. at stern, total weight 118lbs. The metal used is from 24 to 18 gauge.

A matrix or hollow mould is first built of pine boards, each layer being sawn to the shape of a waterline After the layers are nailed together the inside is finished off until it is an exact counterpart of the outside of the proposed boat. The sheet of aluminum is now forced into the wooden mould, being rubbed and worked in all directions until it fits perfectly. Where a joint is necessary, as in joining two lengths to make a long boat, a butt strap and rivets are used, a strip of linen soaked in shellac being laid inside the strap. The material is not only light and strong but it possesses a beautiful running surface, superior to varnished wood. The quality of metal used is so hard as to resist all ordinary shocks and blows, and any dent or depression may be easily removed. From what we have been able to learn, the builder is prepared to essay a canoe, the difficulties being little greater than in a shell boat.

### Detroit Boat Club, Sept. 19-20.

WITHIN this season canoeing has grown rapidly about Detroit, many members of the Detroit Boat Club taking it up, while quite recently the Detroit C. C. has been organized. The canoeing enthusiasm of the two organizations found expression last week in an open canoe regatta lasting over two days, in which a long racing programme was successfully carried out.

Monday was a very bad day for racing, a strong wind causing the postponement of all after the first two events, but Tuesday was pleasant, and some good racing took place. Mr. John E. Plummer, N. Y. C. C., was the referee, and Mr. M. F. Davis the measurer and starter. The races were as follows:

*Monday, Sept. 19.*

Sailing canoes, measurement limits, 3 miles:
Yum Yum, C. R. Corbusier.....1
Alison, D. R. Holmes.....
Nona, H. L. Walker.....
Bat, A. H. Jupp.....
May L., R. Lorimer.....
Paddling, club fours, ½ mile:
Detroit C. C.—R. D. Morgan, D. R. Holmes, L. Liggett, E. Walker...1
Detroit B. C.—W. Jupp, C. Gould, C. Isham, E. Reynolds...Capsized.

*Tuesday, Sept. 20.*

Sailing and paddling:
Chiquita, A. D. Stearns.....1
Yum Yum, C. R. Corbusier.....2
Dolphin, F. C. Baldwin.....
Paddling singles, ½ mile:
C. S. Isham.....1
P. N. Jacobsen.....2
E. S. Reynolds.....3
F. H. Hitchcock.....
W. C. Jupp.....
J. H. Hitchcock.....
C. H. Gould.....
L. K. Liggett.....
Paddling upset, ¼ mile:
F. H. Hitchcock.....1
D. R. Holmes.....2
E. S. Reynolds.....
L. K. Liggett.....
Sailing canoes, no measurement limit, 3 miles:
May W., E. C. Whateley.....1
Siren, R. G. Kirchner.....Disqualified.
Tandem paddling, ½ mile:
C. H. Gould and E. S. Reynolds.....1
W. C. Jupp and C. S. Isham.....2
L. K. Liggett and R. D. Morgan.....3
D. R. Holmes and W. Traub.....4
Standing tandem, ¼ mile:
R. Loring and C. B. Merriam.....1
D. R. Holmes and R. D. Morgan.....2
L. K. Liggett and W. Traub.....3
W. G. Rankin and E. S. Reynolds.....4
Single blade, ¼ mile with turn:
L. K. Liggett.....1
C. B. Merriam.....2
Hurry scurry, run 100yds., swim 100yds., paddle 100yds.:
E. S. Reynolds.....1
L. K. Liggett.....2
D. R. Holmes.....
W. G. Rankin.....
R. Lorimer.....

### Tatassit C. C., First Annual Regatta.

LAKE QUINSIGAMOND.—SEPT. 21.

THERE was a large attendance, and considerable interest manifested in the programme of the Tatassit C. C. regatta. Com. Winne, of the A. C. A., was present as a guest of the club throughout the afternoon and evening, as was also C. B. Ashenden, of the Newton B. C. The only disappointment of the day came in the sailing race. This was started, but had to be called off on account of the lack of sailing breeze. One of the surprises of the day was the work of George L. Putnam in the double blade ½mile paddle, in which he defeated C. B. Ashenden, of Auburndale.

It was 2 o'clock when the combination sail and paddle race was started. The prize, a handsome silk banner, the gift of F. A. Mann, was won by H. A. Whitney, G. C. Halcott second, and C. A. Pratt third.

The half mile paddling was won by G. S. Putnam in 5m. 25s., C. B. Ashenden second (prize a cup).

In the paddling open canoe, single blade, C. B. Ashenden won first. F. A. Sears second and G. S. Putnam third (prize, a paddle).

In the tandem paddling, one-half mile, Sears and Ashenden won in 4m. 45s. Putnam and Davis second in 5m. 5s. Dean and Lange third (prize, engraved flasks).

In the hurry-scurry Lange won easily, with Sears second (prize, an etched frying pan).

One of the most interesting events of the afternoon was a tug-of-war between teams composed of honorary members of the club. The winning team being captained by H. T. Farrar. At 6 o'clock a clam bake was served, and in the evening a cake walk was held, the prize, a cane, was won by Com. Winne. Shortly before 11 o'clock an adjournment was made to the city, where festivities were concluded at the Bay State House.

### A Short Run.

WE met at the boat house early one beautiful morning in June—five members of the Athens C. C., ready for a run with our canoes on the river. One of the party carried a Kodak camera, another a field glass, and each was armed with a basket containing a day's luncheon.

We could not have chosen a finer day for paddling, as the rain of the night before had cooled the atmosphere to a charming degree. The wind was in our favor, just strong enough to help us along. The first to launch his canoe was T. Roscoe F., a representative of the bar and, of course, "a rising young lawyer;" following him was Prof. Frank C., a musician of no mean skill; Tommy B came next, the dude of the party, he wore kid gloves, low russet shoes, silk hose and a pretty smile; Will Bogardus P. followed; and lastly John R., an amateur at canoeing and consequently very timid.

Our boat house is situated on the bank of the Susquehanna, and we were soon gliding quietly down this stream with the current, which ran with good speed at this place.

Soon we passed under the bridge and waved a farewell to a number of friends on the bank, and paddled for the opposite shore near an island. Here we found a narrow channel with rapids and good current, but it did not last long, and we soon shot out into the main stream, where we had steadier water.

We ran along rather easily, passing over one or two small riffles, and soon came to the junction of the Chemung and Susquehanna Rivers. This is familiarly known as The Point, and as we passed this historic place we looked to the right on the Chemung side, which during the summer is a favorite camping spot, and to the left, on the Susquehanna side, where rising nearly 500ft. above the water is Mount Prospect, once a favorite resort for picnic parties and where one obtains a magnificent view of the surrounding country; but the woodman's ax has played sad havoc among the noble trees and robbed the spot of its beauty.

While we are floating idly along with the current, enjoying the beauties of nature, we hear some one calling, and on looking we see the glisten of paddles up on the Chemung; we wait a few minutes and are joined by Ed. H, an old canoeist and a good hand with the double blade. Ed. had cruised on nearly every stream in Pennsylvania, and still liked to take a spin in his favorite Rushton. A short distance below the point we have some nice running over an old eel-rack and beside an island, then we strike a stretch of still water two or three miles long and have to use the paddles quite freely.

The Lehigh Valley R. R. runs close to the water on the west shore and we wave our hats to a passing train, a salute responded to by a number of passengers. Soon we arrive at the new bridge at Ulster, Pa., and know we are to stop for awhile, so shouldering our eight canoes we carry them to the depot, but a few rods distant, and wait for the next train north. While waiting we are the center of an admiring group of natives who ask no end of questions regarding the weight, length, price, etc. of our craft.

The train arrives, and after carefully packing the canoes in the baggage car we seek the cushioned seats for a ride of twenty-five miles to Wellsburg, N. Y., arriving there about noon. Here we have the Chemung River about nineteen or twenty miles from its mouth. Again the natives flock around us, wonder how we ride in those things, ask us "How far you going?" "Where're you from?" and a few such questions. Each of our party tells a different story, and placing our boats in the river, which is only a few yards from the depot, we wave a farewell and push into the current, gliding under the white suspension bridge which spans the river here.

We run merrily along, soon reaching a riffle which gives us a grand run, although the waves were not very rough. Now comes a half mile of deep water, which is soon covered, and we have some rapids again. Will had been over the course before and took a small, narrow channel leading to the right, the rest followed, and here we had a very pretty run. A small clump of willows divided the stream, and as we shot around it we saw the water splashing and quickly came to a small dam over which the water was running with a fine fall.

Will shot over it nicely, but took in a gallon of water to keep him cool. The others escaped better, and all were ready for another. We found the current steady and swift, requiring but little use of the paddles. Tommy B. and the Professor used theirs a little more freely and were soon out of sight around the bend.

The others followed slowly, and after a run of nearly a mile we thought we saw them lying down on a gravel beach at the right. Ed was ahead of us, and as he came opposite them called out, "Hullo! you suckers; how long have you been there?" In reply to his question a couple of young farmers arose from their soft seat and hurled such a string of sulphuric adjectives at us that left no room for doubt as to the time they had occupied that particular spot.

Then they kindly invited us over to test their pugilistic skill, or try their wrestling power, and showed their muscle by hurling huge geological specimens nearly to our boats. As soon as they paused for breath, Ed timidly called out, "I beg your pardon, gentlemen; I am rather near-righted and took you for my friends." We then heard some one laughing, and quickly spied Tommy and the Professor enjoying the cool shade of a large elm on the other side.

We all paddled over and were soon stretched out on the soft green grass, a large table cloth spread, and covered with "all the delicacies of the season."

As soon as our lunch was finished and the table cleared, Tommy, the dude, cautiously inquired for finger bowls. When he had finished dodging the orange bark, banana peel and mature doughnuts he was perfectly contented to dip his dainty fingers in the river.

During this time the two grangers had amused themselves by calling us harsh names, and Ed became quite vexed, and said he would "show those mossbacks a thing or two."

He grabbed his paddles and started as though he was going to accept their many invitations. As he neared them they arose from the sand, picked up a handful of stones and ran. Ed yelled, and they fled as though an army was after them, nor did they come in sight again until we had gone some distance down the river.

We paddled on, now and then passing over small riffles, and at one place had a splendid run of rapid boiling water, requiring considerable skill to avoid the rocks and keep the canoe straight. A short distance above Willawanna we had a grand run. An old dam had been partially broken out, and the water boiled and tumbled over in a reckless fashion, and below this for some rods was the roughest water we encountered anywhere on our trip.

Young B. and the Prosessor, with their characteristic caution, ran in on one side and took an easy drop, while Ed, Roscoe and Will accepted the biggest fall as the only place a canoe should go.

Ed went first and escaped all right, as the coveriog to his Rushton completely protected him. Roscoe, poor feilow, was completely soaked, his Nessmuk trying to spill him. Will's light craft jumped the waves very well and only a little water shipped in. When we were through and the sponge had done its work we all united in proclaiming this the finest run on the river.

A little further down we passed through a rather narrow channel, which had good speed and came out but a few yards above a white suspension bridge. Here we stopped for a drink at a spring, and the bridge, with its white network of wires, the high trees at the end and the gentle sloping bank, gave a pretty picture for Ed and his Kodak, so we pulled in position under the bridge.

Then we had steady running, without much of interest, for several miles, passing over some very fair rapids and through some pretty places, where the trees hung over the water, affording a little shade and making it pleasant to run through.

The Professor was always looking out for some unexplored part of the river, and spying a little narrow opening through the bushes on the left of the stream he paddled over, followed by Roscoe and Will. The others kept the main channel. The entrauce was not over 15ft. wide and seemed to disappear in the bank, but as we shot through it made another curve to the right and the water threw itself around an old tree which formed a big eddy at the side.

In order to avoid running into the tree we kep to the right and struck the eddy, which whirled the canoe completely around running it into the bank, but we escaped without much difficulty. The stream continued narrow and swift; while there was plenty of water it required a constant watch to avoid the snags, stumps and ends of roots sticking out, while the trees which lined the bank hung out over the water, making a perfect shade and a delightfully cool retreat. We were in ecstacy of delight over the Professor's find, and would have enjoyed going through again. After nearly a half mile of the most delightful running we again came out into the main stream to find the rest of our party out of sight.

We now had a long stretch of still water ahead of us and used the paddles steadily, keeping up a constant, rapid stroke until we reached the new iron bridge at Waverly, N. Y. Passing under this we had a good riffle to run. The D., L. & W. R.R. bridge was soon passed and we knew we were in Pennsylvania again. Our companions were not in sight and we began to think they had left us entirely, but soon we spied them seated on the bank under a tree, with an ice-cold spring near by.

We felt like having a little rest ourselves and remained here some time. After sufficiently cooling off we kept on our course, with now and then a riffle to help us along, but having rather steady water. We encountered one riffle which had several roots standing upright, and the musician had a narrow escape from hitting one. Then we found more dead water, and as the afternoon was nearly gone we plied the double blade with more energy. To amuse ourselves we sang snatches of the popular songs, the Professor usually singing a verse and the others joining in the chorus, this seemed to charm the people along the bank whenever we passed any, as they invariably called out to "go drown yourselves" or some other compliment.

We soon reached the town, but on the wrong side, but rather than

paddle to The Pount and up the Susquehanna to the boat house, we took our canoes on our shoulders and carried them across the land, a distance of less than a quarter of a mile, and placed them once more in the Susquehanna, while a few minutes paddling landed us at the boat house, where the canoes were placed in their owners' rack to rest till wanted again. W. R. P.

THE following gentleman has applied for membership in the A. C. A., Eastern Division: Geo. B. Smith, Boston.

## Yachting.

### FIXTURES.

OCTOBER.

1. Corinthian, Atlantic City.
15. Buffalo, Closing Cruise.
9. Jersey City, Ladies' Day, New York Bay.

### International Racing.

THE absurd rumor of a challenge from the Emperor of Germany on behalf of Meteor is set at rest by a statement from Mr. Poultney Bigelow, now in Berlin, to the effect that the emperor had never entertained the idea of challenging. We have recently received the following letters, one from a Western yachtsman, the other from one nearer New York:

*Editor Forest and Stream:*

I wish to express my indorsement of your views as lately expressed—namely that the action of the New York Y. C. in returning the America Cup to "the only surviving donor" was illegal, and that the only legal deed of gift was and is the original one, and, good or bad, it and it only is the one that the challengers must take cognisance of. This may not be considered American, but I hope the day has not yet come when American yachtsmen need to hide behind quibbles to retain the America Cup. I hope you will not abandon the subject until the club returns to the original deed, and thus secures a revival of the exciting races of the Puritan, Mayflower and Volunteer days.

J. D. C.

*Editor Forest and Stream:*

It has been frankly stated that another challenge would hardly be given by our English friends did the New York Y. C. not feel embarrassed by the conditions of the last so-called deed of gift and past acts of the club in connection therewith. The solution of the difficulty is remarkably simple. As the second and third deeds never had or can have any validity, why not let the club cat destroy the embarrassing papers, so relieving the club of its present strain on the mind and giving to the next administration a free hand and fair start. A YACHTING CITIZEN.

### The Fisher Cup.

ONWARD AND NORAH.

THE Fisher cup, won on Lake Michigan by Atalanta and taken to Lake Ontario, where it was won by default by Norah of Belleville, Bay of Quinte, has at last been sailed for and taken out into the open lake, where it is likely to be the subject of keen competition for some time. After the failure of many attempts to make a match for the cup by various lake yachts, a race was sailed this summer by Onward, of Rochester, a sloop once well-known about New York, the holder, Norah, being victorious. Onward issued a second challenge, and the race was sailed on Sept. 19, over the club triangle of nearly 9 nautical miles on the Bay of Quinte, 3 rounds or 26 miles.

The wind was strong from the north, making less than 3 miles of windward work on each round. The start was given at 11 A. M., but both were handicapped about 2m. Norah had a single reef and working topsail over it, while Onward carried whole lower sail and working topsail. Norah was slightly astern at the start, but showed a lead of 20s. at the first mark, but on the windward leg Onward passed her to leeward, Norah taking in her topsail, and had a lead of a minute at the second mark, which Norah cut down a little in the run home.

At the end of first round Norah made a very clever jibe and ran to leeward of Onward into first place, increasing her lead to over 2m. on the windward leg, and leading by 3m. 45s. at the jibe. On the windward leg of the third round Onward was favored by a shift of wind to the eastward, which enabled her to save her time. The times being:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Onward | 11 05 | 2 42 59 | 3 37 59 | 3 34 24 |
| Norah | 11 05 | 2 40 36 | 3 35 36 | 3 35 36 |

The judges were Dr. Saunders, of Rochester for Onward; S. A. Hyman, of Belleville, for Norah, and J. Gass, of Albany, referee. The scrutineers were Geo. F. Thompson on Onward, Henry Miller on Norah. If won three times in succession by the same club the cup becomes the property of the club to which the winning yachts belong.

### A Challenge from a Cruiser.

*Editor Forest and Stream:*

In one of your early issues just after the Cobourg—Cayuga controversy this spring, there appeared a proposition that Cayuga and I should settle the question of superiority of type by meeting for a race somewhere about halfway between our respective homes. Both of us were thinking of a good deal else than mere speed, and in any case, I had at the time no boat and was unable to make or accept a challenge. Since that time however, two boats of the spoontail type have been built, one here for the writer and one in Columbus, Indiana, both closely resembling the design in the FOREST AND STREAM of Dec. 17, 1891. Both have been very satisfactory in their performances. The owner of the Indiana boat reports her very handy and fast—fast enough to take second place in a regatta.

My own boat has not done any regular racing but has shown herself unmistakably fast to windward and also in reaching, and down hill I have not as yet been able to spread sail enough to excel, but she is well up to the average. The rig is nearly perfection for handiness, as the longest spar after the mainmast is only 12ft. long, and I can reef down or shake out without leaving the cockpit. As a sea boat she is a great success, the bow being just full enough to lift her clear and not full enough to pound, and the lifting is promoted by the narrow quarters. She handles well under the successsive changes—full sail; jib mizen and reefed main; jib and reefed mizen; full main and reefed mizen or reefed main and reefed mizen. Under jib and reefed mizen she is snug enough for anything short of a hurricane, and will stay in a heavy sea without any help from paddle or oars, in fact I have never used either except to get to her moorings from the boat house. If Cayuga wants a trial I will try to accommodate him. HENRY K. WICKSTEED.

COBOURG, Sept. 14.

### The American Yacht List.

THE new volume of the American Yacht List (Manning's Register) is not only the most complete work of the kind ever produced, but it is in plan and detail so nearly perfect as to leave little room for improvement. The book is larger in every way, nearly twice as thick as the previous editions, and besides a very careful revision of the list of yachts, the subject matter has been greatly extended, a special feature of the new matter being a nearly complete list of races in 1891. The club flags, which are very handsomely printed on a tinted ground, represent 120 yacht clubs, all but 9 within the United States. The list of private signals, arranged according to colors, includes 1300 flags. The yacht register proper has been completely remodeled in form, the work, with that of compiling the racing records, being in the hands of Captain Howard Patterson. The steam yachts are separated from the sailing craft, and in both lists the larger page used, with the new arrangement of the tables, gives space for more detailed information, one new feature being a column for the record of races of each yacht. Special attention has been paid to the accuracy of the list, and such errors as may exist are due to the negligence of owners in furnishing information; a difficulty that is experienced in all work of this kind. The record of races is most complete, the racing rule of each club being given, with the full table of times and winners of each race, including the names of helmsmen of all yachts, and their rating, as Corinthian or professional. This useful list has been made as accurate as is possible, though much difficulty was experienced in obtaining official information in answer to circulars sent out. The miscellaneous matter includes lists of clubs and officers, dues, organization etc., list of club secretaries, the three deeds of the America Cup, with lists of races sailed for, particulars of the Cape May Brenton's Reef and other challenge cups, fixtures for the year, international code, lists of names changed and other useful information for yachtsmen. The book is published by Mr. Thomas Manning, of Manning's Yacht Agency.

### White Bear Lake and Lake Minnetonka.

A SERIES of three races was recently arranged between the champions in the 23ft. class on White Bear Lake and Lake Minnetonka, Minn.; and Shark, of the White Bear Y. C., was taken to the latter lake to meet Dolphin, the champion of the class. A race was sailed on Sept. 16 and another on the following day, Dolphin winning the first by 1m. 40s., and the second by 5m. 4s. A sequel to the race is found in the following correspondence, the three letters being published in circular form under the title:

AN OPEN LETTER.

[Copy.] MINNEAPOLIS, Minn., Sept. 14, 1892.

*Commodore C. B. Eustis:*

DEAR SIR—I beg leave to call your attention to the fact that immediately upon the termination of the championship race last Saturday for sloops between 20 and 23ft., I requested a remeasurement of Dolphin while in the exact condition in which she had sailed.

The representatives of Dolphin produced a measurer's certificate in which Dolphin purported to be 22ft. 10in. long, and stated, before several members of the club, that there had been no change in her usual racing trim; that she was ballasted exactly the same as in her previous races.

The official measurer stated, however, that he had not measured Dolphin's length at all under the present rules, but only her sail area.

She was then measured for the first time this season, her trim being exactly as she had sailed in the race, and, as stated by her representatives, the same as in previous races.

The steel tape made her 23ft. 4½in. long. This is the official measurement of her condition as she was sailed, and in accordance with the following rule:

"Length shall be taken 3in. above the water line. The water line shall be determined by ballasting the boat to her usual trim when the crew are not on board, with no less than 2lbs. of ballast for each square foot of mainsail. The inside ballast to be placed as directed by the measurer, who shall keep in view the usual racing trim of the boat."

Consequently Dolphin has been and is ineligible to sail for the championship of the Minnetonka Yacht Club, which limits yachts to 23ft. Yours respectfully, H. J. BURTON.

MINNEAPOLIS, Minn., Sept. 15, 1892.

*Mr. H. J. Burton:*

DEAR SIR—Yours received yesterday. I would say that I interpret the rule referred to to mean, measured with 2lbs. of ballast for every square foot of mainsail. "The usual racing trim" means whether she is down by the head or by the stern. Referring to the rule of '91 you will see that it distinctly states that "the waterline shall be determined by ballasting the boat with 1½lbs. for each square foot of sail area." The idea this year was to increase that to 2lbs., but in doing so they changed the wording. A boat would have to be measured every day for classification if your interpretation of "her usual racing trim" was taken, as her ballast is constantly changing with the condition of the wind, and so a fixed amount of 2lbs. is agreed upon. I have interpreted the rule to mean this and think it entirely fair for all, and shall measure the boats accordingly until ordered otherwise by the club.

Hoping this will explain my position I remain,

Very truly yours,
B. C. HURD, Jr., Measurer M. Y. C.

SEPT. 16, 1892.

*Mr. B. C. Hurd, Jr., Measurer M. Y. C.:*

DEAR SIR—It was voted by the club last Saturday that if Dolphin was over 23ft. she was ineligible. You measured her in the exact trim in which she sailed that day and found her 23ft. 4½in. She was prepared and sailed by the most experienced yachtsmen in the club and it was preposterous to claim she was otherwise than in her "usual racing trim." We are sailing under the rules for '92, not the rules for '91. The clause "not less than 2lbs." applies solely to boats like Bird and Volante, which carry little or no ballast when in "usual racing trim."

Even in light breezes Dolphin sails with 4lbs. of ballast per square foot of mainsail and it would be an evasion of the plain English of the rule to measure her with 2lbs. placed in the bow so as to throw her stern out of the water and bring her within the limit.

She has never been sailed in any such trim as that.

Surely there is more sportsmanship in accepting a fair defeat from the representative of the White Bear Club than in violating the letter and spirit of your own rules. Yours truly, H. J. BURTON.

### The Rocking Chair Navy.

WE note with pleasure the following report of the proceedings of the great piazza squadron. The season's reports from sister organizations are now in order:

The second semi-occasional meeting of the Soft Bottom Rocking Chair Fleet was recently held. It was considered necessary for the coming season to fill the position of Grand Querist at once, as for some time argument had been dull. The Prominent Candidate had but one opponent on the floor, who said that he could queer anything. The Prominent Candidate at once called him down, that he was shooting wide, in fact he never could shoot. "I can shoot with any kind of shells, even chestnut shells," said P. C After this just remark P. C. was seated in the position without opposition, and with due honors.

The Grand Querist as soon as possible put forth the questions: Does steam sink? Does water float? as texts for the discussion, and reports of same are now in quarantine.

### Beverly Y. C., 3d Championship Race.

MONUMENT BEACH—BUZZARD'S BAY.

THE 193d race of the Beverly Y. C. was sailed at Monument Beach on Sept. 17 in a fair southwesterly breeze

As pennants had been won in second and fourth classes the race was practically confined to third class Here Sippican proved her superiority in moderate breeze and Fin showed again that she needed more wind. The summary was as follows:

| | Length | Elapsed. | Corrected. |
|---|---|---|---|
| FIRST CLASS. | | | |
| Violet, Toby Club | 27.06 | 2 20 30 | 2 10 56 |
| SECOND CLASS. | | | |
| Gymnote, W. E. C. Eustis | 27.04 | 2 10 40 | 2 00 56 |
| THIRD CLASS. | | | |
| Sippican, W. H. Davis | 23.03 | 1 56 04 | 1 44 35 |
| Elna, John Parkinson | 22 10 | 2 01 29 | 1 40 35 |
| Phenomenon, D. L. Whittemore | 23.00 | 2 03 19 | 1 51 37 |
| Doris, John Parkinson | 23 02 | 3 04 10 | 1 52 36 |
| Fin, L. M. Stockton | 17 03 | 2 08 21 | 1 49 39 |
| Daisy, Howard Stockton | 21.01 | 2 13 50 | 1 59 58 |
| Tycoon, J. L. Stackpole, Jr | 23.01 | Withdrew. | |
| FOURTH CLASS. | | | |
| Edith, G. G. Van Rensselaer | 19.04 | 1 29 54 | 1 20 16 |
| Kitten, Toby Club | 20.00 | 1 33 56 | 1 24 48 |

Judge, F. Elliott Cabot.

Violet, Gymnote, Sippican and Edith take firsts. Elna takes second. Champion pennants for 1892 are won on season's record by Violet, Gymnote, Sippican and Fin.

### Monatiquot Y. C., Special Race.

WEYMOUTH, MASS.—BOSTON HARBOR.

THE Monatiquot Y. C. sailed a special race for the Linton cup on Sept. 24 in a light wind, the times being:

| | Elapsed. | Corrected. |
|---|---|---|
| FIRST CLASS. | | |
| Opeechee, W. P. Barker | 1 48 20 | 1 18 45 |
| White Fawn, H. A. Jones | 1 46 53 | 1 20 36 |
| Beatrice, John Cavanagh | 1 48 49 | 1 23 01 |
| Gipsy, M. F. Drinkwater | 1 50 51 | 1 23 21 |
| Secret, E. F. Lincoln | 1 53 36 | 1 24 01 |
| Folly, J. F. Sheppard | 1 55 12 | 1 30 24 |
| Rosy, R. G. Hunt | 1 59 20 | 1 31 04 |
| THIRD CLASS. | | |
| Imp, W. F. Maybury | 1 49 45 | 1 21 31 |
| Primrose, H. M Faxon | 1 51 25 | 1 21 55 |

Opeechee, of the second class, went up in first class and won the cup. Imp won in third class.

### Alva.

MESSRS. PERKINS & WHITE, the purchasers of the sunken Alva, are working on her steadily with a fair prospect of success, in spite of the lateness of the season. If all goes well the work of pumping out and floating the hull will begin in a week or two. The schooner Geo. D. Rust is anchored near the wreck, and operations are carried on from it and a large catboat. Four divers, Duncan, Russell, Sione and Nickerson, of Boston, are at work whenever the very strong tides permit, some three hours per day. They descend from the catboat, and already they have stopped the break in the bows and all small apertures, including the companions, with 2in. planks, so that the ebb and flow of water through the vessel has been stopped.

In Chatham Harbor is a large lighter, on which has been built a large caisson of 6×6 timber, 26ft. long, 15ft. wide, and 8ft. deep, bolted and caulked. This caisson will be lowered and bolted down over the boiler hatch with a similar one over the engine hatch.

When this work is completed steam pumps will be secured to the yacht's decks and steam carried down by hose from the boilers of the wrecking boat. It is expected to pump out the hull and float it to shoaler water out of the strong tides which have made the work so difficult, after which operation it will be further repaired before towing to Boston.

A section of the bow nearly 60ft. long has been broken off and will be lifted separately.

With every trip below the divers bring up something, and already a great deal of valuable plate and furnishings of various kinds have been recovered. The wreck lately passed through a severe storm with no new damage, and Messrs. Perkins & White are likely to meet with final success, in which event they will profit largely, in addition to the honor of attempting and carrying out a task that was pronounced hopeless by the leading wrecking firms.

It is announced that Mr. Vanderbilt has just ordered a new and larger yacht to replace the Alva to be designed by Mr. St. Clare J. Byrne, of Liverpool, and built by Laird & Co., of the same city.

### A Shoal Draft Auxiliary Yacht.

A NEW auxiliary cruising yacht was launched on Sept. 22 at the yard of E. H. Thatcher & Son, New Haven, where she was built for Lewis D. Benton. The yacht is 52ft. over all, 45ft. l.w.l., 13ft. beam, 3ft. draft, the hull of oak and yellow pine. The yacht has a low trunk cabin, like the ordinary sloop, with a cabin, owner's stateroom and toilet room forward of the engine space, which is amidships. The engine is 4½ and 8×7in., with a Foster patent boiler. The wheel is of bronze and the shaft of Tobin bronze. The bunkers are under the cockpit, and there are water tanks, ice box and storage lockers for a full cruising supply. The yacht is yawl-rigged, mainmast 27ft. deck to bounds, mizzenmast 17ft., topmast 22ft. She was designed by E. E. Crampton, superintendent of the yard, and will be used in Southern cruising.

### New Yachts.

AT Bristol the Herreshoffs have begun work on the Carroll schooner, her frames being bent. Lawley has the keel out for a 55ft. wooden schooner for a Providence owner, and has nearly completed a 75ft. steam yacht. Mr. A. Cary Smith has recently completed the design for a wooden schooner 70ft. l.w.l., 21ft. beam and 8ft. draft for J. B. King, of Staten Island, the yacht to be built at Nyack. Mr. Wintringham has completed the design for a steel schooner for Mr. J. Rogers Maxwell, the leading dimensions being 82ft. l.w.l, 21ft. 6in. beam, 10ft. draft. She will be a centerboard craft. Mr. H. J. Gielow is at work on a design for a steam yacht for H. C. Baxter, of Brunswick, Me., to be 77ft. 8in. over all, 70ft. l.w.l., 10ft. 3in. beam and 4ft. draft. Mr. Gielow has also made a design for a 35ft. centerboard cutter for Mr. T. L. Arnold, Atlantic Y. C. She will be 53ft. over all, 34ft. 8in. l.w.l., 14ft. 6in. beam, 4ft. 2in. draft, with 4 tons of lead on keel.

### Lincoln Park Y. C.

LINCOLN PARK, ILL.—LAKE MICHIGAN.

THE last race of the Lincoln Park Y. C. was sailed on Sept. 17, the times being:

| | Start. | Finished. | Elapsed. |
|---|---|---|---|
| Dragon | 2 37 47 | 5 37 49 | 3 00 02 |
| Viking | 2 39 23 | 5 09 06 | 2 29 43 |
| Period | 2 38 01 | 5 05 55 | 2 27 54 |
| Blade | 2 35 46 | 5 10 52 | 2 35 04 |
| Lois | 2 37 08 | 5 02 29 | 2 25 21 |
| Ida K | 2 35 49 | 5 13 03 | 2 37 14 |

First prize, second class, Viking; second prize, Dragon. First prize, third class, Lois; second prize, Period.

The judge was J. Allen Hornsby and the time keepers were C. O. Anders and D. D. Dutton.

American Girl capsized.

## YACHT NEWS NOTES.

We have received from the publishers, Messrs. Norie & Wilson, London, a new pilot book of the English Channel and adjacent coasts, upon a novel plan. "Our Silver Streak, or the Yachtsman's Guide from Harwich to Scilly," by Arthur Underhill, Commodore of the Cruising Club, is a careful compilation of the standard charts and sailing directions for the special use of yachtsmen, such information as is useful for yachts and the smaller vessels being given very minutely, while the great mass of detail that is important only to "merchant vessels of heavy draft, or clumsy coasters incapable of beating in against a strong onset," is omitted. A special feature of the book is the descriptive matter relating to the history and points of interest of each locality. The work is pleasantly written and the technical detail does not detract from the interest of the description; American readers who are familiar with the cruises of MacGregor, McMullen and Speed will find the book a very great help in reading such cruises understandingly; especially as it is illustrated with charts of all the localities described.

There was launched on Sept. 9 from the building yard of the London and Glasgow Engineering and Iron Shipbuilding Co., Limited, at Govan, a handsomely modeled screw steam yacht named Athen, of the following dimensions: 176ft. over all, 21ft. 2in. beam moulded, and 12ft 9in. depth moulded. She has been built to the highest class at Lloyd's, to the specification and designs and under the special supervision of Mr. St. Clare J. Byrne, of Liverpool, and will be fitted by the builders with a set of triple-expansion surface-condensing engines and a large single-ended boiler, having a working pressure of 160lbs. to the square inch.—*Engineering.*

The house committee of the Massachusetts Y. C. announce the opening of the winter quarters, No. 15 Hayward Place, on Monday, Sept. 26. A table d'hote lunch will be served daily (except Sundays) from 12 to 2:30 o'clock until further notice. Meals à la Carte can be served as usual from 12 A. M. to 11 P. M. The lunch at No. 5 Rowe's Wharf was discontinued after Friday, Sept. 23, and the club house closed with exception of the lower floor and floats, which will be kept open until October, with a man in attendance.

Lurline, steam yacht, Major W. B. Wetmore, of New York, on her recent arrival at Chicago after a summer's cruise through the Lakes, was welcomed by a boat's crew from an over-officious revenue cutter and ordered to show her name and sailing port on the bows within twenty-four hours. As many yachts are expected to visit Chicago next year, it might be well if the Customs authorities would post themselves fully on the law before subjecting yachtsmen to useless and illegal annoyance.

New York yachtsmen, especially the owners of the smaller craft which do not carry a paid hand, have suffered this season from sudden and severe wind storms, the latest being on Monday morning, when half a gale came out of the west about 9 A. M., kicking a heavy sea and landing a large number of small yachts on the beach.

Gloriana's owner has decided to offer her for sale, and an advertisement of this famous yacht appears on another page. The past season has been unsuccessful, but there are many who still believe that the yacht is quite as fast as Harpoon, and not far behind Wasp.

The Pavonia Y. C. closed its club house at Atlantic Highlands on Sept. 24 with a dance. The house has been generally used by the members during the season, and the club's reputation for hospitality extends as far as the limits of tidewater about New York.

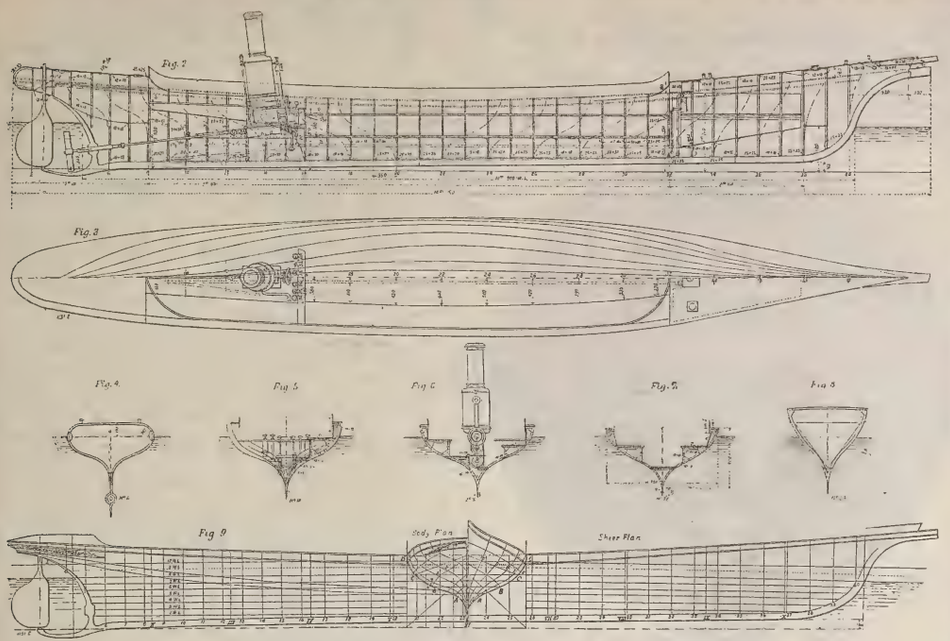
Ex-Com. H. B. Pearson, of the Jersey City Y. C., owner of the sloop Gertrude, died at Cleveland, O., on Sept. 17, at the age of 60. Com Pearson was well known about New York Bay, and was one of the first officers of the New York Y. R. A.

The championship sail-off of the Winthrop Y. C. took place on Sept. 24, Mattie, in Class 1, and Perdita, in Class 2, each scoring a walkover, while Magpie won in Class 3 and Collet in Class 4.

The regatta committee of the Eastern Y. C. has just issued in pamphlet form a very complete and interesting summary of the seven races sailed under its management this year.

The Herreshoff 21-footer Alpha, the champion of the class, has been sold by Messrs. Dunne, Brown & Hunt to an unknown owner, said to be H. W. Bird, of Boston.

The Essex Y. C., of Newark, located at Bayonne, on Newark Bay, and the Greenville Y. C. on New York Bay, are considering a scheme of consolidation.



Another 46-footer on the sale list is Barbara, and the daily papers are crediting Mr. Foster with the ownership of a new design for the same class.

Brunhilde, schr., is receiving a new overhang aft, which will improve her looks as far as it is possible to do so.

The old sloop Addie, originally the Addie Voorhees, and of late the Acteon, has been purchased by E. W. Dixon.

Elmina, steam launch, Dr. T. V. Roe, of Tarrytown, N. Y., was entirely burned on Sept. 18, the loss being $4,500.

Wild Duck, steam yacht, J. M. Forbes, has been hauled up at East Boston and her mainmast shifted forward.

ALUMINUM NAPHTHA YACHT "MIGNON."

Constructed by Messrs. Escher Wyss & Co., Engineers, Zurich, Switzerland.

## The Aluminum Naphtha Yacht Mignon.

WE are indebted to *Engineering* for the following illustrations and description of the new aluminum yacht recently constructed in Switzerland:

The yacht Mignon is constructed of aluminum, and is propelled by a naphtha motor, principally composed of the same material. Both engine and vessel were designed and constructed by the enterprising firm of Messrs. Escher Wyss & Co., Zurich, to the order of Monsieur A. Nobel, Paris, who intends that the Mignon shall cruise in the waters of La Seine.

The naphtha motor by which the yacht is propelled has three single acting cylinders, three cranks and three pistons. The whole of the machinery is constructed of aluminum (including the propeller) with the exception of the cranks and shafting. The boiler, which is constructed of copper spiral pipes, is supplied with naphtha from a large copper tank situated at the fore end of the vessel, the supply pipes running outside the vessel's keel.

In describing this yacht we may mention that this is the first vessel of her size which has been built of aluminum. Her principal dimensions are: Length between perpendiculars, 48ft.; breadth moulded, 6ft.; depth moulded, 2fr. 11in.; draft in fresh water, 2ft. 2in. On account of air-tight compartments with which she is constructed, she is rendered unsinkable, while she has a very large range of stability. She has a cutwater stem ornamented with a beautiful figurehead, and an elliptical stern; she is constructed on exceedingly fine lines, carries two pole masts, and is rigged as a fore-and-aft schooner. The standing rigging is of aluminum wire, set up with screws of the same metal, while the running rigging is of manilla rope. This vessel has a fine appearance in the water, and she will certainly belie her appearance—of which the perspective view gives a good idea—if she has not a fine career before her.

The weight of the yacht is only 1½ tons; naturally she is constructed on very light scantlings. The keel, stem and sternposts are of forged aluminum 7in.x1in.; the frames are 1in x1in.x1-16in. except in the engine room, where they are 1½in.x1½in x¼in.; the frames are spaced throughout the vessel 16in. The shell plating ranges from 3-32in. to 4-32in. in thickness, and 15,000 aluminum rivets hold the ship together. She is fully equipped, having a balanced rudder and quadrant of aluminum, bollards and fairleads of the same material, aluminum awning stanchions which support a pink-colored sunshade extending the whole length of the yacht, aluminum flagpoles surmounted with silken flags; in fact, everything in the vessel which can be made of this material is so executed to make her as light as possible.

The woodwork is of Lebanon cedar, and the seats are covered with cushions upholstered with morocco leather, while the floor is covered with portable gratings. At the fore end of the vessel is situated a portable willow cabin 8ft. in length, weighing only 86lbs., and extending the whole width of the vessel; the roof is ornamented with blue silk, relieved with gold. Situated at the fore end of the vessel is a nickel silver binnacle fitted with a double liquid needle compass. The shell of the ship is innocent of all paint and composition, and is allowed to retain its natural silver color. On the occasion of the trial trip, which took place on the Lake of Zurich on June 1, a speed was obtained of more than 13 kilometres per hour on a consumption of 17½lbs. of naphtha per hour, which was considered highly satisfactory to all concerned. On this occasion Mr. Gustar Naville and Mr. Henrich Zolly represented the firm of Messrs. Escher Wyss & Co., while Mr. Nobel and a few other gentlemen interested in this vessel made up the rest of the party.

Details of the engine and boiler are shown in Figs. 10 to 20. As will be seen from the engravings, the engine is of the three-cylinder, single-acting type and is completely shut up in a close casing. The valve chest is above the cylinders and the three valves are operated from one shaft, driven by gearing from the screw shaft. A hand-wheel on the valve shaft is arranged in such a way that by turning it one way or the other the relative position of the valve shaft is altered as regards the screw shaft, and in this way the reversing of the engines is effected, the device being equivalent to the old gab motion. The boiler is placed over the steam chest of the engines and consists essentially of a spiral of stout copper tubing, tested to a pressure of 245lbs. per square inch. This spiral is inclosed in a stout metal chamber, at the bottom of which are two burners, viz., a large ring burner D, Figs 11 to 17, and a small burner C for lighting up. When running the naphtha is drawn by the feed pump G, Figs. 11 and 19, from the bottom of a reservoir placed in a compartment on the bow of the boat. Two openings are left in this compartment through which the water streams as the boat moves, and the reservoir is thus kept cool. From the feed-pump the naphtha passes into one end of the copper coil, where it is converted into vapor. On passing out of the end of the coil the major portion of the vapor passes downward through a wide central pipe to the valve chest of the engines, but another portion of it passes by a by-pass $c_{11}$ to an air injector $d$, Figs. 11 and 20, where it sucks in a current of air through a suitable valve, mixes with it and passes on to the main burner D. The vapor, which passes through the engines, passes back to the reservoir in the bow through two outboard condensers.

In starting the engine air is first pumped into the naphtha reservoir by a hand pump provided for this purpose; when a suitable pressure is obtained here, a valve leading to the small burner, C, is opened, and the vapor, when it issues there, is lighted. When this has been done naphtha is then pumped by a second hand pump into the copper spiral, where it is heated by the small burner and vaporized; when the pressure has risen to a proper amount the valve leading to the injector is opened, admitting thus mixed vapor and air to the large burner, D. When this is fairly going the boat is ready to start.

Messrs. Escher Wyss & Co. construct about fifty naphtha launches every year, including 2, 4 and 6 horse-power, and in a very short time a new model will be completed of an 8 horse-power engine. The boats are constructed in wood, steel and aluminum. These naphtha launches sail in every known part of the world, including Australia, Egypt, India, America and the Continent. At present the firm have a large number on hand, including one for His Highness, the Khedive of Egypt, and also an aluminum sailing boat for the Fürst zu Wied of Prussia. Last year Messrs. Escher Wyss & Co. constructed and exhibited at the Frankfort Electrical Exhibition the first aluminum naphtha launch and aluminum engine ever made. Her principal dimensions are: Length between perpendiculars, 18ft.; breadth, 4ft. 8in.; depth, 2ft. 2in. The weight of the boat and machinery was only 970lbs. The name of this little craft was the Progress.

## Off South Beach.

"TAKE in the foresail, boys, lively now! Slack away the jib sheets. All hands aft! Put down two reefs." These orders followed one another in rapid succession They were almost unnecessary, though. So thoroughly did each man aboard the Shearwater understand what was required of him that the skipper's command was often anticipated. To tell the truth, they were all capable of filling the skipper's shoes—if occasion should arise to demand it.

Away to the wes'ard, stretching over a large arc, a dull, whitish band was rising. As it advanced, curling outward and expanding, fragments from the edge were torn away and whirled ahead. In front the sky was still clear blue, behind the intense black accentuated the contrast. Rapidly the swelling circle swept forward, broadening and curving in innumerable shapes. Not a breath, the reefed mainsail swung from side to side as we heeled to the long swells In the silence, broken only by the clank of the boom as it straightened out the sheets, it was easy to imagine ourselves becalmed in one of those windless summer days. A couple of pleasure yachts, balance-reefed, lay off to starboard.

Suddenly the distant shore was blotted out, another instant and a line of foam swept toward us. So powerful was the first blow that it flattened the sea down, and then—well, there was something so suggestive of a power, limitless in its strength, that the most indifferent observer could not but be impressed with an overwhelming sense of his insignificance. Long, furrowed lanes, like the track of grape shot along a field, followed where the wind's strength varied. There was something sinister about the blackened waters; its appearance was evil as the waves commenced to form and throw crests forward in blinding spray. "I have been serene and fair for days," it seemed to say, "now beware. I shall do my worst." Royally did it act this threat; shrieking through the rigging, curving the taut halliards astern with a vigor that would have boded ill for the Shearwater had we been obliged to make sail to clear a lee shore.

"Larry, go below and get the glass."

Steadying himself, he took a long look at one of the yachts. "She's making bad weather of it," he muttered, lowering the tube. "Get more sail on her forward," he shouted; "we've got ter stand by them, boys. She's taking half a barrel at every jump."

The jib was "bonnetted." When she filled away I expected every moment to see the sails blown out of their bolt ropes. When a fishing smack gets down so her lee'ard scuppers are well awash, she is over at a rather steep inclination. Working the Shearwater a little to windward, "Cap'n Jimmy" hove her up and bawled out in tones distinctly his own property, "Better drop yer peak an' drive 'fore it. We'll foller yer."

One thing was certain, he could not hold out much longer lying to. Her mast was stepped so far forward that she persisted in filling away with the sail close reefed. Every time she performed this maneuver a wave would catch her on the bows and throw the top of it aboard. Having nothing but a flimsy summer cabin—the canvas having been blown away—the entire deluge entered nearly unobstructed. Watching the opportunity, her skipper wore her around successfully. Before the wind she made far dryer decks of it. Kept alongside for an hour, until the squall blew over.

"Captain Jimmy" had decided to run eastward after the "blues." Kept on our course until well off Long Beach. A glorious October sunset lighted the west as the sails slatted, dropped within the lazy jacks and the rattling of chain forward told we too had come to rest. There are moments within the lives of us all—moments that seem too full of a quietness and peace to find their way over this throbbing world; fleeting instants—impossible to tell of and hinting of some vague joy beyond the dipping deep. The gulls are slipping seaward, carrying, as they come within the last rays, a tiny point of crimson upon their breasts. They fade into the dim wall rising in the east, and this yarn does not deal in sentiment—but if you ever follow within the sound of the surf you will know all, and more than words could ever express. The riding light swings to and fro, the darkness creeps over the pulsing sea, and with it the first hint of autumn—a cool, fresh air. Lying full length, following the arc traced by the foretopmast over the wondrous depths above—sometimes across the entire length of the great dipper the upright pendulum swung—then off among the other constellations. Gazing, I lost myself among them—

"Thoughts that come in the shadow
Never come in the shine"—

oblivious to the surge around the bows and the slatting of halliards against the mast until "Dinner!" brought my wandering sense back.

If it were not for the slow roll from side to side it were easy to imagine myself away down on the Long Island shore living over again one of the many nights spent among the bluff, whole-souled "boys" who fish off shore in one of their "beach shanties." The dinner was soon over—a meal of substantial food well suited to the hardy fellows who consumed it—and then the pipes were lit, and as the blue smoke commenced to curl upward around the swinging lamp, Captain Jimmy became reminiscent. Some yarns contained enough reality to warrant me in giving them some credence. One was particularly interesting, though I hesitate to repeat it, for candor compels the admission that half the entertainment consisted in hearing the captain tell the story:

"I was a young blade then, and like most young 'uns hankered after blue water. My brother Frank was lost on the Georges banks, an' of course them at home didn't want me ter follow the sea. But a New Bedford lad thinks of little else and I war'nt much over eighteen afore I'd signed in a Calcutta clipper. We had hardly left Sandy Hook below the horizon afore they had one of us in irons for some slight offence and I waked up to the fact that the second and third mates was brutes an' I was booked for many months with them. The grub was pretty good and a sailor will stand a heap of abuse so long as his feed is fair.

"By and by these two ruffians got rather tired of cursing and slugging us, and things settled down to the regular ships' life. Thar was another young fellow 'bout my own age in the crew. He hailed from Nantucket, and being the only two 'kids' aboard, naturally we became 'chums.' Ned was a quiet sort of fellow—one of the kind that acts more than he talks. We were in the same watch and managed to get hammocks together. Many an hour we chumed about our days at home, and it wasn't long afore we each knowed all about each other.

"Well, you know its customary for the crew, whenever a ship crosses the line, ter hold what they calls 'Neptune's court,' One fellow dresses up like the old man, and three or four more stands round ready to do whatever he says. We were holdin' court, and one of the visitors was havin' sand and water poured down his back. Ned was standin' 'longside of me when the second mate came up behind us and punched him in the jaw.

"'What is all this? Get forward the whole crew of yer or yer'll feel the weight of an iron round yer legs. Why don't yer move,' he shouted, when none of the men stirred. 'I'll teach yer ter'—but he didn't finish. Ned had recovered from ther blow an' stepping forward square in front of the bully let out an' floored him as neat as knockin' down a ninepin. He struggled to his feet, and when he rushed at the boy I tripped him. When he got up this time he had a pair of brass knuckles on his fist. I caught one glancing blow and, before he men could reach them, he had hit Ned a terrible blow on the forehead. I was almost senseless and the first mate grabbed me and hustled me below, where they hung some jewelry on my shanks and wrists.

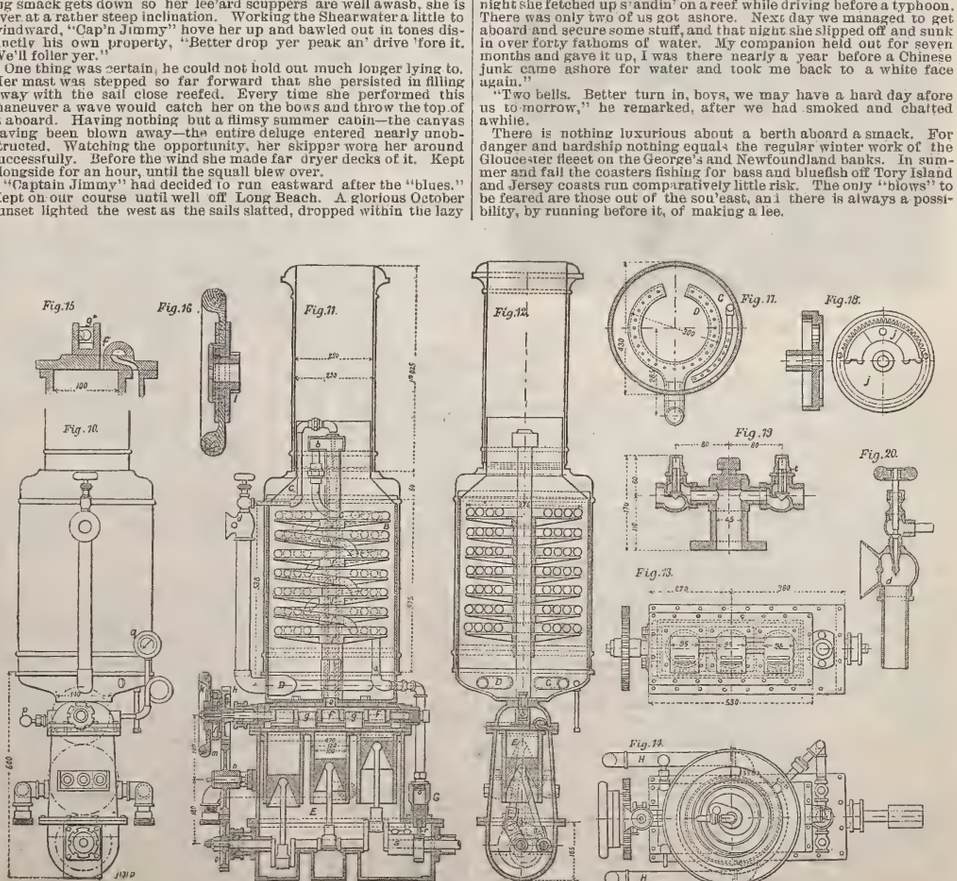
"It was about seven bells on the morning of the second day when I heard shouts and three or four shots, then hurried tramping overhead, a couple of more shots and in a little while a fellow named Jack Masterson broke open the door of my prison and told me to come out.

"'We've done two of them and got the Captain an' second mate so they won't bother us much,' he said.

"'Where's Ned?' I asked.

"They took me forward and pointed to a white object lying on a board, with something heavy at one end.

"'He never spoke after that brute hit him. He died yesterday, and while they were goin' ter bury him we drowned 'em.'



"I learned that they intended scuttling the ship somewhere near one of the islands to the north of Formosa and make their way ashore in the cutters.

"That night while sleeping soundly something aroused me. In an instant I was wide awake and turning over was scared nearly senseless to see Ned sittin' up in his hammock. There was a terrible cut on his forehead and his eyes seemed very large. He moved his lips, but I couldn't hear anything, then shook his head slowly twice and left me trying ter gather myself together. I never believed in ghosts, but I can't believe that was something I dreamed or imagined

"Well, they held the ship along for a couple of weeks, and one night she fetched up s'andin' on a reef while driving before a typhoon. There was only two of us got ashore. Next day we managed to get aboard and secure some stuff, and that night she slipped off and sunk in over forty fathoms of water. My companion held out for seven months and gave it up, I was there nearly a year before a Chinese junk came ashore for water and took me back to a white face again."

"Two bells. Better turn in, boys, we may have a hard day afore us to-morrow," he remarked, after we had smoked and chatted awhile.

There is nothing luxurious about a berth aboard a smack. For danger and hardship nothing equals the regular winter work of the Gloucester fleet on the George's and Newfoundland banks. In summer and fall the coasters fishing for bass and bluefish off Tory Island and Jersey coasts run comparatively little risk. The only "blows" to be feared are those out of the sou'east, and there is always a possibility, by running before it, of making a lee.

ENGINES OF THE NAPHTHA YACHT "MIGNON."

The anchor watch was set, the cabin light turned low, and from each bunk issued sounds of sleep—sounds that banish slumber from the newcomer until he becomes accustomed to the batteries.

"B-e-l-o-w there! Tumble out, boys."

It was Captain Jimmy's voice, and the boys didn't lie abed after that summons.

How often has the beauty of such a dawn as this been written of, and how often the flowery sentences have failed to convey one part of the pleasure enjoyed by him who watches it from ship or shore. The sun has not yet risen, the east glows a soft pink, and the long rollers, reflecting the glory, glide under and on. Then the isolated flecks of cirrus cloud turn golden and in a moment rises the sun, dazzlingly clear, not dull red through a night mist, as it comes on some autumn mornings. Its rays touch the patches of hoar frost on the deck and bulwarks and they are gone.

Breakfast over the dories are hoisted out. Two lines and a box of chum is the complement of each. "You go along with Bill," quoth the captain; "he'll show you how to horse fish if there's any around."

Along with Bill I went. There are fish along the coast called menhaden or "bunkers," as the fishermen dub them. They travel in enormous schools, so closely together that "bunker" steamers often capture two and three hundred thousand with one circle of the purse net. Chum made of finely cut up "bunker" is an attraction almost irresistible to the salt-water pirates—it proved so this morning certainly. Scarcely ten minutes elapsed before we had a school following up the oily bait, and then the fun commenced. No whirring reel and bending rod here—no wild rushes until the line is almost gone. Their voracity is whetted, not satisfied, by the tiny bits of chum they get, and following up the scent one of them sees a large piece and rushes. Bill's bare brown arms move back and forth with the swiftness and precision of piston rods, never missing a grasp upon the line. Professional fishermen never use a barb on their hooks; it would occupy too much time in releasing the fish. To ease an instant on the line when hauling in would mean, nine times out of ten, liberty for the fighting 8lbs. at the end.

Unnoticed a thin mist crept in and soon the sunlight grew dimmer and faded. The wind fell to a gentle air, retaining just strength enough to fill the sails that now and again slipped across the mystic circle. It became denser. Once or twice sounds from yachts outside our ken came to us with startling distinctness.

"I don't jes' like the look o' things ter sou'ard," said Bill as we were pulling away toward the schooner, "kinder looks like hard weather." As usual Bill was right.

There are some natures whose innate purity is unassailable, no matter how low the class with whom they are forced to associate. Far be it from me to hint at aught that would reflect upon those who man our fishing smacks—a finer, more open-handed crowd of fellows can be found nowhere. And yet there is a certain coarseness coming from the hard character of the work that Bill had escaped. He was still as manly and kind-hearted a fellow as when he left the Maine coast, years ago.

The glass was settling rapidly. Extra lashings were put upon the dories and everything made secure. The furled foresail was firmly lashed, and before Captain Jimmy went below he satisfied himself that the deck was shipshape. The commencement gave no warning of future power unless the mournful bell buoy foretold "prepare!" Now clear and high, then dull, almost inaudible, its notes drifted fitfully in over a gray, white-capped sea. How intensely lonely and sad the sound is only those who have listened to the dings can know. It rang in my ears as I turned in. Shrilly the wind treble on the shrouds increased notes of danger, yet possessing a fascination to those who go "down to the sea."

At midnight all hands were called. The Shearwater was driving before the blow through a blackness, relieved only by sullen breaks of phosphorescence. With difficulty could the eye trace outlines of the schooner forward of the mainmast. The binnacle light shone on the skipper's cool, determined face, bringing it out with strange

PRES. B. WALTHER,
Zettler R. C.

sharpness. It was the only spot of light and the eye unconsciously ought it for relief. Every man was alert and anxious.

"Would we weather Montauk Point," was the unspoken question each asked himself. The wind held almost sou'east, the schooner's head could not be held much closer than nor'east and make any headway against the seas that came tumbling aboard over the weather bow. If we were far enough to windward, all right—if not—

And so we drove onward into the nothingness, almost in the trough of the sea. The shrieking wind and wild bounds of the little fifty ton schooner before the bursts of foam shooting out of its darkness on our aft quarter; the blackness, the strangeness forced my thoughts in a channel of unreality. Like some remnant of an uneasy night it seemed—the actual expression of a nightmare. The tension increased. Three of us had gathered in a knot forward, peering ahead.

"That it is—dead ahead!" yelled Bill above the roar, almost the instant Captain Jimmie's command came forward.

"All hands flatten the main sheet," and she was laid up closer into the wind. Were we making any headway? The light was growing brighter on our lee bow. Would we weather it? More than one glance sought the broad-shouldered figure, faintly illumined by the binnacle light.

We did weather the point, scraping over the inside bar on the rise of a sea, and as soon as we had made a lee all hands turned in with an unexpressed sigh of relief. With both anchors down the Shearwater sung to sleep, careless of the blasts piping through her top hamper.

Day above the reach of blue and thin strip of beach. A dawn of crimson and gold—so radiant, so glorious and free; bringing with it a regret that such beauty cannot always be. Gradually the great rays of roseate color faded—isolated islands of cloud, detached by the remnant of last night's gale, swept overhead below a deep, cerulean sky. From the cross-trees I saw the stately three-masters ploughing along through the maze of light diamonds. To us the sun path quivered and afar, beyond the dunes stretched away the sea "illimitably sparkling." The light along the ocean's rim softened—the angel had kissed the waters and was far on her way westward carrying beneath her broad wings the never ceasing glory of perpetual sunrise.

From over the dunes came to me the music of surf upon the Nepeaque shore. 'Twas as irresistible as the siren's song. Perhaps I might pick up a few stragglers from the vast army of plover that yearly pass along this lovely coast. This hope decided the question. Bill helped me put my gun and ducks into the dingy and rowed ashore. A stage runs along the windy road between the Hamptons and Montauk Point. We sat down to lee'ard of a dwarf cedar and lit our pipes, waiting for it.

"Bill, don't you ever wish yourself back in your Maine home?"

He looked at me sadly and his clear eyes softened. "My home," he repeated musingly, "I haven't had such a thing since mother died. That was years ago. I left home then and haven't been near the

G. KRAUSS,
Zettler R. C.

shore again." The steady sound of the wind against the dense foliage overhead filled the air and the distant roar of surf came like an echo.

"Thar aint much ter my yarn, either," he added, after looking away a few moments, "only what happens ter many a feller. I never told any one—the crowd I go with don't bother much about such things. You're different somehow. Of course thar's a gal in it, and sometimes I wonder if I did right. I never said anything to her, but she must a' knowed. I was on a 'bunker' then, an' we had only been in a couple of days. I had seen her once and she had promised to meet me that evening at ther corner of the orchard. The fence was high an' it were growin' dusk as I got thar. Her father may not have seen me and maybe he did. Heard him say something 'bout a 'mackerel catcher.' Told her all the next time we met an' she said she could not disobey her father. Guess it's 'bout as well, I don't blame her for not caring for a 'mackerel catcher,' though she might have made more out of me.

"There's the signal," pointing to the Shearwater, "the captain's going to make sail. Good-bye, I hope we'll meet again." I watched the boat pull away, and thought I saw a bit of a handkerchief fluttering astern as the schooner wore to sea.

Perhaps a pair of girlish eyes look up the road in that distant town hoping against hope for a glimpse of a broad-shouldered fellow against the sunset light. Who knows? Warm hearted, gritty, handsome Bill. The friendship of such a man is truer than steel. Could his love be less so?

The Shearwater was a speck upon the horizon when the stage hove in sight over a "sand wave." REX B.

## Steam Yacht Racing.

THE first steam yacht race on Lake Michigan took place on Sept. 17, with the following entries: Buena, by the Buena Park Club; Alcyone, H. F. Balch; Wilber, M. D. Wilber; Cricket, Charles P. Willard; Now Then, Edwin P. Jaquith; Clarksdale, Wallace Clark; Bonita, W. J. Steffens. The times are:

FIRST CLASS, 27 MILES.

| | Start. | Finish. | Elapsed. |
|---|---|---|---|
| Buena | 2 37 38 | 5 04 25 | 2 36 52 |
| Alcyone | 2 26 41 | 5 29 05 | 3 02 24 |
| FIRST CLASS STEAM LAUNCHES, 27 MILES. | | | |
| Wilber | 2 35 47 | 5 40 21 | 3 04 34 |
| Cricket | 2 35 49 | 5 44 20 | 3 08 31 |
| SECOND CLASS STEAM LAUNCHES, 9.46 MILES. | | | |
| Now Then | 2 39 37 | 4 00 13 | 1 20 36 |
| Clarkdale | 2 39 32 | 3 59 44 | 1 20 12 |
| Bonita | 2 39 44 | 4 06 04 | 1 26 20 |

Buena was in first class and Alcyone in second, but the two were classed together. An outside yacht that was not entered had the bad taste to join in the first class race, Alcyone, when leading, blew out a joint and was beaten. The elapsed time given above does not include the time estimated to have been lost in repairs. Cricket was timed officially as above, but it was afterward learned that she had cut inside of both marks. The judges were Capt. S. J. Bunham, John Prindiville and Cyrus Sinclair. The timekeepers were Joseph Ruff and W. A. Paulson.

## Seawanhaka C. Y. C.—Rouse and Wetmore Cups.

OYSTER BAY—LONG ISLAND SOUND.

THE fourth and final race of the Rouse and Wetmore series was sailed at Oyster Bay on Sept. 24 in a westerly wind, which was fresh at the start but light at the finish. The Gardner fin keel Nemadjy easily defeated the other 25 footers, but was beaten by Mirth and Rose Marie. One gun start at 11:45. The times were:

| | Center Island Buoy. | Lloyd's Point Buoy. | Bell Buoy. | Center Island Buoy. | Finish. | Elapsed. |
|---|---|---|---|---|---|---|
| Mirth | 12 14 09 | 12 42 47 | 1 25 34 | 1 39 07 | 2 47 34 | 2 53 34 |
| Rose Marie | 12 13 50 | 12 45 19 | 1 29 29 | 1 44 00 | 2 54 04 | 2 59 04 |
| Pyxie | 12 12 20 | 12 46 58 | 1 33 56 | . . . . | 3 26 21 | 3 31 21 |
| El Chico | 12 12 04 | 12 46 10 | 1 35 03 | Did not finish. | | |
| Nameless | 12 13 35 | 12 45 08 | 1 33 02 | . . . . | 3 16 39 | 3 21 39 |
| Nemadjy | 12 12 13 | 12 42 48 | 1 29 58 | 1 44 43 | 2 59 18 | 3 04 18 |
| Trinket | 12 16 38 | 12 50 20 | 1 38 35 | Did not finish. | | |
| Adonis | 12 14 51 | 12 47 57 | 1 42 56 | Did not finish. | | |
| Marion | 12 17 31 | 12 49 28 | Did not finish. | | | |

## Zettler Rifle Club Festival.

THE name of the Zettler Rifle Club, shown on the programme of a prize shoot, is and has been for many years a guarantee that the shoot would be a success. Organized away back in the days when fine target shooting was in its infancy, this club has done more than any other like organization in the country to popularize the sport among the masses. Descended from a family of rifle shooters the organizers of the club, Barnard and Chas. G. Zettler, have never lost an iota of their inherited interest, but on the other hand they grow more enthusiastic as the years go by.

Every year the Zettler Rifle Club holds a prize shoot and festival at the well appointed ranges and park of the genial Charley Wissel at Cypress Hills, and no matter whether the visitor be an old friend, a chance acquaintance or a total stranger, he has but to introduce himself to one or another of the jovial members of the club and a hearty German welcome is at once accorded him.

On Sunday and Monday, Sept. 25 and 26, the club held its festival at the above named place, the event proving one of the most enjoyable and successful in the history of the club. The programme comprised a contest on the German ring target for 21 prizes and four premiums; one on the bullseye target for 18 prizes and 10 premiums, one on the target of honor, for members only, for contributed prizes, one for judges and invited guests and one for ladies, the wind-up being in the form of a banquet served by mine host Wissel and his amiable wife. The shooting went along from 9 A. M. to 2 P. M. on Sunday and from 9 A. M. to 6:30 P. M. on Monday. The weather on the opening day was favorable for good scores, but on Monday the conditions were wretched. The wind blew with almost cyclonic force first from one quarter then from another, while the light was very fitful and uncertain.

The attendance on Sunday was fairly good. Among those who were fortunate enough to secure the good weather conditions were John Coppersmith, the blonde "shoemaker rifleman" from the classic precincts of Newark; George D. Weigman, another of the Newark shooters who likes a good time; M. Dorrier, glasses, Chinese blouse and all, who has gone back to antiquated patched bullet; Fred C. Ross, the stiff-holding young Williamsburgher, who has also gone back to patched bullets; Barney and Charley Zettler, full of fun, brimful of business and with a hearty greeting for everybody; Gus Nowak, he of the 220-pound jovial nature and Hibernian-tinted apron; Barney Walther, the club's ever popular president, whose flowing auburn-hued beard and jolly face are never missing when there is a gathering of riflemen in this section of America; Henry Holges, quiet and unobtrusive, but with a "get there" look in his eyes; Geb. Krauss, the semi-auburn-complected Williamsburg expert, who is a hale fellow well met at all times—these and many other old and young shooters were on hand searching for the coveted "red flag." The shooting was extremely lively during the five hours that the targets were open and some fine tickets were scored. Many of the members had their families along, and these entered fully into the spirit of the sport.

*Monday, the Second Day,*

was of course the big day of the meeting, and from early until late the shooting house was crowded and the ten targets were kept in constant use. The crowd of shooters was much larger than on the previous day, and the shooting was spirited despite the erratic antics of Old Boreas, who seemed to hold the whip-hand. Among the contestants were such well-known schuetzen expo-

G. ZIMMERMAN,
Zettler R. C.

nents as William Hayes, "Old Obadiah," who hails from Newark and who holds the world's record of 2,235 in 100 consecutive shots at 200yds. on the German ¾in. ring target; Henry Oehl, one of the veterans of rifle shooting, who was at the top round of the ladder for many years but who has deserted the rifle for the revolver; George W. Plaisted, rifleman, scribe and jolly companion withal; Frank C. Watts, "Young Obadiah," another Newark enthusiast who sometimes shoots in hard luck; the old veteran F. Fabarius, seventy odd years of age, who is as enthusiastic as when in his prime and who never loses a chance to shoot with "my boys," as he delights to call the club members; R. Busse, the Hoboken Adonis, who was happiest when looking after the comfort of the fair sex; Karl Klein, another old-timer who has practically left the active fold but still likes to get around to the annual gathering; Emil Fisher and Dave Miller, of the Miller Rifle Club, of Hoboken; L. P. Hansen and Wm. Weber, Excelsior Rifle Club, of Jersey City; George Joiner, he of the quiet manner and "Joiner 7th Regiment bullet" fame; Louis Flach, tall and handsome and with the same winning smile as of old; Louis Vogel, "Birdie;" Max Engle; Dr. Grosch, one of the rising shots of the section; S. J. Lyon, who makes an annual trip all the way from Collinsville, Conn., to try his hand with the Zettler cracks; Ignatz Martin, who is as fond of shooting as of eating; and George Schlicht, of Hoboken.

Fun and jollity reigned supreme from 9 A. M. until 6:30 P. M., everybody being in a holiday humor and bent on making the best of their chance. "Bucking" for first honors on the ring and bullseye targets was a feature of the day.

The shooting closed at 6:30 P. M. and immediately after the shooting committee began the task of counting and measuring the bullseyes while clerk Charles Rothweiler sorted out the list of winners on the ring target. While this was going on the members, guests and the families of both were seated around the festive board discussing with vim the excellent menu provided by the club. When the coffee began to circulate President Walther called on Mr. Hayes to address the gathering, which he did in his usual happy style, paying a glowing tribute to the Zettler Rifle Club and the Zettler brothers for the grand efforts they have made to advance the interests of rifle shooting. President Walther followed with his annual address, during which he paid a touching tribute to the memory of the late Noah B. Ward, who for many years was financial secretary of the club. Geb. Krauss,

M. Dorrler and A. F. Stolzenberg also made addresses, after which the party adjourned to the dancing hall where the prizes were distributed.

Below will be found a full list of the winners, with scores and prizes appended.

Ring target (¾in. ring), 3 shots per ticket, possible 75 points, best two tickets to count for first five prizes, best single ticket for all other prizes:

| | | Prize. | | | Prize. |
|---|---|---|---|---|---|
| M Dorrler | 72 71—143 | $50 00 | C Hutch | 68 | $5 50 |
| F C Ross | 70 71—141 | 28 75 | D Miller | 68 | 5 50 |
| H Holges | 71 70—141 | 28 75 | G Nowak | 67 | 3 33 |
| S J Lyon | 71 70—141 | 28 75 | G D Weigman | 67 | 3 33 |
| W Hayes | 72 69—141 | 28 75 | G Schlicht | 67 | 3 33 |
| E Fisher | 72 | 15 00 | J Coppersmith | 66 | 1 60 |
| L Finch | 71 | 10 00 | L Schmidt | 66 | 1 60 |
| B Walther | 71 | 10 00 | B Zettler | 66 | 1 60 |
| J Hamann | 71 | 10 00 | P F Schmidt | 66 | 1 60 |
| L G Zettler | 68 | 5 50 | J Martin | 66 | 1 60 |
| G Joiner | 68 | 5 50 | | | |

Premiums for best 5 tickets:

| | | | |
|---|---|---|---|
| Ross | 71 71 70 70 69—350—$10 | Holges | 71 70 69 69 69—348— $4 |
| Dorrler | 72 71 70 69 67—349— 8 | Hayes | 72 69 69 69 68—347— 2 |

Bullseye target, prizes for best center shots by measurement (each point on the scale represents 1-250 of an inch).

| | Meas. | Prize. | | Meas. | Prize. |
|---|---|---|---|---|---|
| G Nowak | 5 | —$20.00 | W Weber | 27½ | $3 00 |

Any person who cannot find the "Forest and Stream" for sale at any news stand in the country, is requested to report the fact, with location of stand and name of dealer, to the Forest and Stream Pub. Co. 318 Broadway, New York

# Trap Shooting.

All ties divided unless otherwise reported.

## FIXTURES.

If your shoot to be announced here send in notice like the following:

Sept. 27-Oct. 1.—Grand five days' tournament at Mt. Sterling, Ky.

Sept. 29-Oct. 1.—Peekskill (N. Y.) Gun Club tournament.

Oct. 5-6.—West End Gun Club tournament, at Ottumwa, Iowa.

Oct. 4-7.—Chas. Polster's tournament, Indianapolis, Ind.

Oct. 5-7.—First annual tournament of the Riverside Gun Club, at Red Bank, N. J. First two days targets, last day live birds John P. Cooper, Sec'y.

Oct. 11.—Eastern New York League kingbird tournament, with Cruttendens & Cords new trap and pull, at Canajoharie, N. Y. T. C. Pegnim, Sec'y.

Oct. —.—Amsterdam (N. Y.) Gun Club tournament.

Oct. 11-12.—Syracuse (N. Y.) Gun Club opening tournament, on Croton street grounds.

Oct. 12-13.—Wilmington (Del.) Rod and Gun Club tournament.

Oct. 18-20.—Highland Gun Club annual fall tournament, at Des Moines, Iowa.

Oct. 19-20.—Somerville Gun Club tournament, Somerville, N. J.

Oct. 21.—New Jersey Shooting Club tournament, at Claremont, N. J.

Oct. 25-26.—Interstate Manufacturers' and Dealers' tournament, at Mo-dus, Conn.

Nov. 23-26.—Milwaukee (Wis.) tournament, targets and live birds.

May 23-25, 1893.—Knoxville Gun Club tournament, $1,000 added to purses. Also valuable merchandise prizes.

### Shooting in the Maritime Provinces.

DORCHESTER, N. B., Sept. 20.—The second shooting tournament ever held in the Maritime Provinces was given under the management of the Dorchester Gun Club at Dorchester Sept. 13 and 14. The grounds are very central and are beautifully situated, overlooking the Bay of Fundy. The club has only been in active existence two years, although organized some time before. It has gone to a great deal of expense in arranging grounds, and can now boast of having the best equipped shooting premises in the Lower Provinces. Bluerocks thrown from 3 and 5 traps operated from a screened pit were used in all inanimate matches. A very interesting feature of the shoot was the 7 live birds sweepstakes, as it was the first ever shot in New Brunswick. The birds were not a very good lot, but a glance at the scores will show that a number failed to "get on." A silver challenge cup, value $75, was one of the prizes offered. It has to be won six times by any one contesting and is open for challenge twice a year. It was won on this occasion by C. W. Bliss, M. D., of Amherst, N. S. The full scores of the shoot, which I inclose, while not large, yet will bear inspection, and when we take into consideration the fact that trap-shooting is practically a new thing with us down here by the sea, we are led to believe that the results are not so bad after all.

*The First Day.*

No. 1, 10 bluerocks, 3 traps, entrance $1, 4 moneys: C. S. Hickman 4, Lieut. McGowan 6, F. A. Wilson 5, W. Lawrence 3, R. H. Tremaine 8, Dr. Tripper 6, H. R. Emmerson 5, Wm. Tildon 3, A. W. ### The Phœnix Gun Club.

THE Phœnix Gun Club, one of the oldest shooting organizations on Long Island, held one of their day's outings at Dexter Park L. I., on Monday, Sept. 26. Each member shot at 20 live birds for a supposed medal, although the contest is to try and beat the president's score, who has for the past two years managed to keep in first place. The scores:

| | | | |
|---|---|---|---|
| Freligh | 12120112112101011—17 | Chichest'r | 21010122110011211121—16 |

NEW LONDON——EASTERN TEAM.

Le Roy. Savage Cady. Team Captain. Bates. Longden Edgarton.

## THE GREAT SARATOGA ANNUAL.

If the trap-shooters of this country do not turn out *en masse* to attend the 1893 tournament of the Saratoga Gun Club it will be positive proof that honest, fair-minded carrying out of promises bears no weight. During the 1892 shoot of this club, held Sept. 20 to 23 inclusive, the programme called for $2,200 of guaranteed money. From the very start of the firing it was seen that by adhering to the printed programme the club would be heavy losers, owing to the light attendance.

"Will you carry out the programme?" asked a shooter of a member, "even though you know you will be losers?"

"Certainly we will," was the reply, "we have guaranteed $2,200 and that sum will go to the shooters, even though we lose the entire amount. We have never yet broken a promise and we do not propose to begin at this time. We run the shoot to afford the shooters some sport and propose that they shall have it, even though we are compelled to go down in our pockets and furnish the incentive."

What a different sentiment was this from the one expressed at a recent shoot in the South, when with $500 of contributed money the tournament management refused to give more than one-half of the added money on the second day because the entries did not come up to their expectations.

Saratoga has proven itself to be true to the core, and if it does not reap its reward by having an army of shooters at its tournament in 1893 it will be strange. Trap-shooters appreciate fair-dealing and are not prone to forget those who keep their promises.

When the shoot began at 9 A. M. on Tuesday, Sept. 20, there were present twenty-one shooters, and the number of entries ran from this number up to twenty-four during the day. Among those who took part in the opening day's sport were Rolla O. Heikes, of Chicago, Ill., who had come all the way East to have a look at his old friends; E. D. Miller, of Springfield, N. J.; "Uncle Dan" Lefever, of the Lefever Arms Company, Syracuse, N. Y.; "Uncle Sammy" Goggin, of Troy, N. Y.; good-natured Charles T. Barrett, from Boston, Mass.; George Mosher, of the Fulton Arms Company, Fulton, N. Y.; M. T. Roberts, of Rupert, Vt.; W. T. Simpson, of the New Jersey Shooting Club, Claremont, N. J.; Mahlon H. Ruppell, of Milford, N. J.; George Luther, of Syracuse, N. Y.; Will H. Cruttenden, the well-known and only "Crutty," from Cazenovia, N. Y.; H. L. Edgarton, of Willimantic, Conn.; W. R. Hobart, of Newark, N. J., and T. H. Keller ("Tee Kay"), of Plainfield, N. J. The weather was all that could be desired for out-of-door sport, the arrangements for the shoot were of the best, and the kingbird targets worked to perfection. The grounds of the Saratoga Gun Club are situated in a very pleasant spot about a mile and a half from the depot, and from them a fine view can be obtained of the surrounding hills. The club has a large and well-equipped club house, adjoining which is a restaurant stand. The shooting was done in squads of six from sets of five traps each, one set being used for the amateurs and the other for the experts. Each of the score lines was protected by an awning, so that the shooters were at all times protected from the elements. The background was perfectly clear and the targets showed up well in any kind of light. The shooting was done under American Association rules and the purses were divided on Harry Levengston's system. This provides for the following divisions: Ten-target events, 40, 30, 20 and 10 per cent.; 15-target events, 24, 22, 20, 18 and 16 per cent.; 20-target events, 22, 20, 18, 16, 14 and 10 per cent. This system seemed to be satisfactory to all.

There were no drags nor tedious waits during the day, and the programme was finished in time to give the boys an opportunity to look about the town before supper.

The majority of the visitors were quartered at the Kenmore House, a cozy home-like place kept by J. N. Ramsdill, a prominent member of the New York State Sportsmen's Association, a prime entertainer, and with the happy faculty of making everybody feel at home in his place. Rolla Heikes, as usual, had his banjo along and every evening he was impressed into the position of chief musician, an office which he filled with his usual grace and skill. "Tee Kay" also did his share to enliven the company with his inimitable songs and dances, Rolla "picking" the accompaniments.

Below will be found the results of the first day's shoots, the events being as follows: Nos. 1 and 10, 10 kingbirds, $1 entry; Nos. 2, 6 and 8, 10 targets, $50 guaranteed in each; Nos. 3 and 7, 15 targets, $75 guaranteed in each; Nos. 4 and 8, 20 targets, $100 guaranteed in each; No. 5, expert event, open to all, 25 targets, $5 entry, $25 added to purse by Saratoga Gun Club. In all except No. 5 event the sliding or "North handicap" was used, winners of first or second money in one event being obliged to shoot from known traps at unknown angles in the following event:

No. 1, 10 birds, entrance $1: Miller 9, Heikes 9, Simpson 8, Livingston 8, Mosher 10, M. H. R. 6, Barrett 9, Edgwater 10, Wilcox 8, Buck 10, Goggin 6, Stockwell 9, Geiser 7, Pike 8, Perkins 7, Ramsdill 8, McGinnis 8, Roberts 7, Lefever 10, Mayhew 9, Latham 10.

During the day Barrett broke 96 per cent., Miller 95 per cent., and Levengston 95 per cent. in the guaranteed events.

*On the Third Day*

the weather was good, the only drawback being a rather tricky wind. The attendance was about the same as on the opening day. This made no difference in the management, however, as all the guaranteed purses were handed out, regardless of the number of entries. Barrett again led with 97 per cent. in the guaranteed events, Levengston making 96, Hobart 95, Miller 94, Heikes 87 and Edgarton 87. The programme was precisely the same as on the previous day and below are the scores:

No. 1, 10 singles, entrance $1: Simpson 9, Heikes 10, Livingston 10, Pike 8, T. K. 8, Barrett 10, Miller 9, Buck 10, Lefever 10, Taylor 10, Hobart 7, Luther 10, Edgarton 10, Perkins 6, M. H. R. 8, Paul 9, McGinnis 6, Mayhew 8.

No. 2, 10 birds, entrance $1.75, $50 guaranteed: Paul 10, Buck 9, Simpson 6, Heikes 7, Livingston 10, Pike 9, Barrett 10, Mosher 8, Miller 9, Keller 6, M. H. R. 8, Hobart 10, Taylor 10, Edgarton 10, Lefever 8, Mayhew 9, Luther 9, Perkins 8, McGinnis 7.

No. 3, 15 birds, entrance $2.75, $75 guaranteed:

*On Thursday, the Third Day,*

there were occasional showers, which interfered somewhat with the sport, and the light was not favorable. Nevertheless the sport went merrily on without much delay. The attendance was no larger than before. Among those who reported for duty were M. F. Lindsley, of Hoboken, N. J., and J. Taylor, of Albany, N. Y. The leaders in the guaranteed events were: Miller 96 per cent, Livingston 95, Barrett 94, Heikes 93, Hobart 93, and Edgarton 88.

The scores follow:

No. 1, 10 singles, $1 entrance: Buck 10, Livingston 8, Heikes 9, Miller 9, Barrett 9, Mosher 10, Pike 7, T. K. 8, M. H. R. 6, Lefever 10, Luther 9, Curtis 4, Hobart 10, Goggin 8, Edgarton 10, Lindsley 8, Perkins 7, Taylor 7, Fulton 5, McGinnis 8, Ingham 9.

No. 2, 10 singles, $1.75 entrance, $50 guaranteed: Buck 10, Livingston 10, Heikes 9, Miller 10, Barrett 10, Mosher 10, Pike 6, T. K. 8, M. H. R. 8, Lefever 10, Hobart 9, Edgarton 8, Lindsley 7, Perkins 7, Ingham 6, Taylor 9, Frank 10, Goggin 8, Luther 9, McGinnis 8, Fulton 8.

No. 3, 15 singles, entrance $2.75, $75 guaranteed:

*The Final Day*

was ushered in with a drizzling rain, which threatened to continue, but altered its mind about 10 A. M. The light was dull and poor until noon, when it brightened up somewhat. Before starting for the grounds some of the shooters suggested to the club that the day's shoot be declared off so far as the programme was concerned, as this would enable the management to save considerable money which was guaranteed. The club, however, would not entertain the suggestion, but insisted upon fulfilling its promises to the letter, although they were then several hundred dollars behind. So all the boys could do was to shoot "according to Hoyle." Up to this time there had been a close fight for the seven average prizes offered for the guaranteed events during the four days, Barrett having lost only 13. Levengston 14, Miller 15, Heikes 33 and Edgarton 38 birds out of 500 birds shot at by each. Edgarton and Heikes were of course out of the race, so far as high honors were concerned, and it was impossible to guess which of the three others would finish on top. Up to and including the third event Barrett gained one on each Miller and Levengston, but from here on the "Jersey Cyclone" pulled himself together, and by making clean scores in each of the last four events he won first average ($22), his aggregate being 383 breaks out of 400 targets shot at, an average of 95 75 per cent. Barrett won second money ($18) with 380 breaks, an even 90 per cent.; third money ($16) went to Levengston on 377 breaks, 94.25 per cent.; fourth money ($14) to Carter on 368 breaks, 92 per cent.; fifth money ($12) was divided by Heikes and Edgarton on 367 breaks each, an average of 91.75 per cent.

The scores are here given:

No. 1: Wilcox 7, Livingston 10, Buck 9, Barrett 8, Heikes 10, Miller 10, Keller 9, Edgarton 10 M. H. R. 8, Pike 9, Cunningham 6, Lefever 9, Betts 8, Leon 10, Luther 8, Jack 8.

No. 2: Wilcox 8, Livingston 10, Buck 10, Barrett 8, Heikes 8, Miller 10, Keller 8, Edgarton 10, M. H. R. 7, Pike 8, Franks 10, Lefever 9, Betts 9, Leon 9, Luther 9, Jack 9, Mosher 10, Taylor 10, McGinnis 9.

## THE INTERSTATE AT AUBURN.

THE shooting tournament of the Auburn Gun Club, given with the assistance of the Interstate Manufacturers' and Dealers' Association, at Auburn, N. Y., on Sept. 20-21, was held under most favorable auspices, so far as the weather conditions and management were concerned, but the attendance was very light on both days. Elmer E. Shaner, of Pittsburg, Pa., was in charge of the arrangement of traps, screens, etc., as well as the pitching of the tents of the various subscribers to the association fund. All these details were carefully attended to.

The grounds of the Auburn Gun Club, which are situated about a mile from the center of the town proper, and reached by a well-equipped electric car line, are large and well adapted to trap-shooting purposes. The entire outfit is owned in fee simple by the club, having been purchased after the State shoot was held at that place. To the right of the entrance is a well-built club house 20× 30ft., one story in height, with a 10ft. verandah extending the entire length. The inside of the house is provided with lockers for the use of the members, loading tables, etc. To the left of the ground entrance is a good-sized storage house. The grounds are fairly level to a point about 20yds. beyond the line of traps. Here they slope downward for a few yards and then take an upward turn, which continues to the brow of a hill half a mile beyond. For live-bird shooting I am inclined to think these grounds would prove almost as puzzling to the unitiated as Jim Elliott's famous "Side Hill Park," in Kansas City. For target shooting, however, they are all right. The traps of the Auburn Club, five in number, are arranged behind permanent screens about 25yds. in front of the club house, and to the right of these were set the five traps of the association. To the left of the line of traps was the blackboard and cashier's office. To the left of the cashier's office were the tents of FOREST AND STREAM, the *American Field* and the Standard Keystone Target and Trap Company, these being directly in front of the main entrance. To the right of the club house were the tents of Henry C. Squires, S. S. Powder Company, Colt's Firearms Company, Tatham Brothers, American Wood Powder Company, and the Union Metallic Cartridge Company. The only ones of the above firms represented was FOREST AND STREAM, S. S. Powder Company, U. M. C. Co., and the Standard Keystone Company.

The management of the shoots was in the hands of H. A. Penrose, Elmer E. Shaner and Charles W. Tuttle. Messrs. Shaner and C. H. Brister carried on the clerical work on the first day, but on the second day Shaner was alone except when one or another of the members gave him a lift. There was no assistant cashier nor assistant blackboardman. The weather on the opening day was delightful, the sun shining clear and bright and the wind being just strong enough to make the flight of the keystone targets a little erratic at times. The attendance, as we have stated, was light, but this was to be expected, as the $2,200 guaranteed by the Saratoga Gun Club drew a number of shooters who would otherwise have visited Auburn. In regard to the conflict of dates between these two clubs we was informed by both Messrs. Tuttle and Penrose that they had received assurances from the Saratoga people that the latter's tournament would be held during the last week in September, and that then the dates were fixed for the Auburn tournament before they knew the dates had been changed by Saratoga. Mr. Levengston, of the Saratoga Gun Club informs us that he did make the above statement to both Messrs. Tuttle and Penrose, but that before that time he had been informed by Mr. Tuttle that the Auburn shoot would be held on Sept. 13 and 14, and when the Saratoga dates were changed it was done in order not to conflict with the Peekskill dates, and with the understanding that the Saratoga shoot would be the week following Auburn. On one point we are sure, and that is that the notice that the Saratoga shoot would be held Sept. 20-23 reached us a considerable time ahead of the notice claiming the dates for Auburn.

Among those who were present on the opening day were Messrs Richmond, Borst, Hicks and Norton, of Rochester; C. Tomlinson, of Fulton, N. Y.; Harry B. Whitney, the oldtime boy wonder of Phelps, N. Y., who was accompanied by his father; H. A. Penrose of New London, Conn., and Elmer E. Shaner, of Pittsburgh, Pa.

It was nearly 11 o'clock before the regular programme was started, but after that time there was no drag, despite the fact that the hustling as well as the most of the clerical work in the office and the placing of the names on the blackboard devolved upon Elmer Shaner. He was equal to the emergency, however, and kept everything booming. In the afternoon the local shooters turned out in force, and the entries ran as high as twenty-two. All the guaranteed purses were shot in accordance with the programme, the shortage for the day being about $15. The programme was finished shortly after 4 o'clock.

After a wash-up came a tasty supper at the Osborne House, the proprietor of which, Mr. Taylor, is not only an enthusiastic sportsman, but a first-class caterer as well. After supper and a stroll about the well-kept streets of the town the party of visitors were escorted to the handsome suite of rooms occupied by the gun club. Last March, when we were in Auburn, these rooms were undergoing an overhauling, and it was lumber here, there and everywhere, but on the present visit all repairs had been completed and we are fain to say that the quarters are as cosy and comfortable as any we have run across. The rooms, four in number, are situated over one of the Auburn banks, and are very large. They comprise a pool room, billiard room, card, reception and secretary's room and one used for the meeting of the club as well as for lounging and reading. "There's an organ in the parlor to keep the house in tune," while a number of handsome pictures adorn the walls. We found in the rooms Messrs. C.W. Tuttle, James and Henry Carr, C. L. Egbert, George Corning, Irving Brigden, Thos. Church and other members of the local club and were pleasantly entertained until time to return to our couches.

Returning to the hotel we received the heartiest kind of a greeting from three of the members of Auburn's famous "Big Four." These were Alderman (soon to be Mayor) Eddy Parker, Lew Devitt and Jack Titus. The fourth member of the quartette, Eddy Cosgrove, was seriously ill at his home, the doctors fearing an attack of brain fever. A short time previous to this "Cos" had gone off on a yachting trip, got caught in a storm and was well wet. Indifference to a slight cold which resulted was followed by the serious condition mentioned above. Before leaving Auburn, however, we received the welcome intelligence that with careful attention from his family and physician he was improving, and the doctor thought that, after all, the threatened brain trouble would be averted. Whether the weather be fair or stormy, Auburn's "Big Four" can always find some pleasant method for amusing visitors even though they have to o

improvise a "birthady party" with a "2 A. M. dinner." On this occasion the "birthday party" materialized and so pleasantly did the hours go by that the cocks began to crow before the participants returned to the hotel to enjoy a few hours' rest preparatory to Wednesday's shooting.

Below will be found full scores of the first day's work, there being no average money, of course. Penrose shot as an expert, Tuttle as a semi-professional and all the others as amateurs. High averages were Whyte 88.88, Carr 86.86, Stewart 85.92, Richmond 82.96, Tuttle 71.11.

No. 1, $1: Tuttle 6, Corning 7, Egbert 5, Carr 7, Brigden 8, Whyte 9, Richmond 9, Vanderloon 8, Burst 7, White 6, Garrett 8, Brister 5, Peterson 6, Church 9, Stewart 9, Kipp 6 Goodrich 8.

*The Second Day*

was fully as pleasant as the first, although the wind was considerably stronger and the targets more erratic in their flight. The attendance was not as good as on the previous day, a baker's dozen being the limit. Three of the Rochester people had left for home on the previous evening. Among the newcomers were Messrs. Sinclair and Livingstone, of Mottville; Briggs and Rich, of Cato; and A. M. Skimmerhorn, of Cortland.

On this day was done one thing that goes further to hurt an association or club than anything else. That was the declaring off of the guaranteed purses. The Interstate Manufacturers' and Dealers' Association is comprised of twelve firms, every one of which is under contract to see that the conditions of its shoot are carried out. On this day some $200 had been offered in guaranteed purses. After the second regular event had been made up it was evident that the guarantees would not fill, so the programme was placed on the shelf and the remainder of the day was devoted to shooting sweeps, with no purses guaranteed. Had there been only three men on the grounds those men should have been entitled to shoot under the same conditions that would have prevailed with fifty entries. It may be said that "the majority of the shooters would not have gone in for the twenty-target events." Even so, the programme announced "guaranteed purses" and this guarantee should have held good, even though one man got all the money and the subscribers were obliged to make good the amount by assessment. This draining back was begun at Staunton, followed at Watertown and then at Auburn, and should be discontinued at future shoots of the association.

The shooting of the second day was ended before 5 o'clock, and soon thereafter the grounds were deserted by all save the watchman. Several of the visiting shooters afterward made a trip out to Lake Owasca and other places of interest, the "big four," as usual, being the guides. Full details of the day's shooting follow:

C. H. TOWNSEND.

AT THE AUBURN INTER-STATE.

## DRIVERS AND TWISTERS.

A few weeks ago we published the following: "If some of the progressive managers of tournaments care to attract a big field of shooters, let them offer a purse of $100 for a contest between teams of ten men each from New Jersey, New York, District of Columbia, Delaware, Maryland and Connecticut. Charge the teams only for the targets they shoot at, let the winning team take the entire pot, and let it be expressly stipulated that each man must be a resident of the State he represents. The money spent by these team men in sweepstakes during a tournament would more than offset the $100 given by the management. What is the matter with running such a contest during the tournament of the Wilmington (Del) Gun Club?" Since our last issue we have received a letter from J. K. Woodward, secretary of the Wilmington Gun Club, containing the information that their club had concluded to make their tournament one of three days instead of two as originally announced, this making the dates Oct. 12, 13 and 14. "We have made the second day," says Mr. Woodward, "the team-shoot day, as per your valuable suggestion in your paper. The purse will be $75 guaranteed the winning team." This is pleasant news, and we are positive that the Wilmington Gun Club will be winners financially by virtue of their generous offer. No entrance money will be charged the teams other than the price of the targets. The contest will be open to any number of teams of six men each from any State, each shooter must be a resident of the State he represents and no man will be allowed to shoot on more than one team. Each man will shoot at 25 targets, which will be charged for at the rate of three cents each. Bluerock targets will be shot, under the rapid-firing system. Here is a chance for some big work by the various States.

We have received the programme for the opening tournament of the Syracuse (N. Y.) Gun Club to be held on the Croton street grounds on Oct. 11 and 12. The club which was but recently organized is comprised of some of the most substantial business men of Syracuse and has elegantly equipped grounds. Harvey McMurchy, more familiar known as "McDuff," is president and prime hustler of the club; his spare moments being devoted to looking after the interests of the L. C. Smith guns. Al. Spangler, who is another of the club workers also spends some little time in engraving Smith guns. These two will be at the gate during the shoot ready to resent any insult that may be tendered them (by non shooters) The programme on each day will comprise three 10-target events, $2 entry; two 15-target events, $2 50 entry; two 20-target events, $3 entry; 5 pairs, $2 entry; 10 singles and 5 pairs, $3 entry and an event at 20 singles, $3.50 entry with $50 guaranteed. There will be four moneys in each event. Shooters will be served with free lunch. Bluerock targets will be used and these will be charged for at the rate of two cents each. This will leave the pots very fat.

The following has been received anent the coming tournament of the Riverside Gun Club, of Red Bank, N. J.: "The programmes for the first annual tournament of the Riverside Gun Club, of Red Bank, N. J., which is to be held on Oct. 5, 6 and 7, are now ready for distribution, and can be had by addressing John Cooper, Sec'y, Box 622, Red Bank, N. J. The club guarantees to have 1,000 good birds on the grounds on Oct. 7. The 5th and 6th will be devoted to target shooting, and about twenty-five valuable merchandise prizes will be distributed through the events for these two days. The grounds have just been enclosed and fitted up in good shape, and the shoot will without doubt be largely attended. Mr. Cooper will be glad to furnish any further information in regard to the tournament that may be desired.

New York and New Jersey sportsmen should not forget the tournament of the Riverside Gun Club to be held at Red Bank, N. J. on Wednesday, Thursday and Friday of next week. The first two days shooting will be at targets and the third day at live birds of which a plentiful supply will be on hand. Red Bank is about 47 miles from New York on the New York and Long Branch Railroad and may be reached by either the New Jersey Central or Pennsylvania systems, both of which run trains over this road. Those who go by the Pennsylvania way leave New York at 9:10, (Jersey City at 9:23, Newark at 9:36.) On the New Jersey Central a train leaves New York at 8:15, Newark at 8:22 and Elizabeth at 8:35 A. M. The Central train reaches Red Bank at 9:50 and the Pennsylvania train gets there at 10:38 A. M.

The Fairfield Rubber Company reports a regular "boom" in the sale of its excellent and convenient magazine vest, a cut of which is shown in another column. This vest is one of the most handy contrivances ever offered to sportsmen and should be included in the wardrobe of every gunner. The nominal price of $3 places it within reach of all.

The next shoot of the Interstate Manufacture's and Dealers Association will be held on the grounds of the Machimoodus Gun Club at Moodus, Conn., October 25 and 26. Keystone traps and targets will be used and a big turn out of Connecticut shooters is anticipated. It is hoped that at this shoot the conditions will be adhered to.

Charleston, W. Va., Sept. 15.—The Charleston Gun Club was organized last night at Goshorn & Co's hardware store, its object being to lease shooting grounds, adopt rules for trap shooting and to provide for the prosecution of violators of the game laws. The members are Judge C. P. Snyder, Dr. J. N. Mahn, Howard Rader, Will Patrick, Frank Markell, Charles Board, R. W. Harris, J. A. DeGruyter, W. F. Goshorn, Thos. Saterthwait, G. W. Davis, P. Fontaine, C. E. Rudesill, Wm. Killinger, D. Patterson, John Cotton, H. D. Gosborn, Will Richardson and Chas. Jones. Howard Rader was elected President. Frank Markell Vice President, R. W. Harris Secretary and Treasurer, and W. F. Goshorn Manager.

AMSTERDAM, N. Y.—The Riverview Gun Club of this city will hold a tournament on the McClary Driving Park about the middle of October. The exact date has not been fixed, but will be as soon as the secretary of the Eastern New York Association is heard from. The club grounds are in fine shape. Kingbird traps and targets will be used, and will be under the management of Will H. Cruttenden, of Cazenovia. Canvas covers over the score where shooters stand, and plenty of canvas, so that those in attendance will be in shade continually. Programmes are now ready, and can be had by addressing the secretary, Z. R. Jacoby, or Robert M. Hartley, President, Amsterdam, N. Y.

The following officers have been elected by the Pierrepont (N. Y.) Gun Club, which has been incorporated: Isaac N Maynard, President; Wm. M. Storrs, Vice President; W. P. White, Secretary and Treasurer; William Pierrepont White, Counselor. Membership, which is limited to fifteen, includes the following: I. N. Maynard, H. P. Crouse, W. M. Storrs, J. Fred Maynard, E. J. Millspaugh, Edward Comstock, E. D. Brandegee, Hugh White, Fred Kellogg, H Lawrence White, W. Pierrepont White. About 1,500 acres of wild rice land and marsh in Ellisburg, Jefferson county, N. Y., on Lake Ontario, have been leased for a long term of years. It is proposed to erect a commodious club house on the mainland near by.

James L. Smith, manager of the Hackettstown (N. J.) Gun Club, announces that his club will hold an all day tournament at live birds on Tuesday, Oct. 4, the sport to open at 9:30 A. M. There will be plenty of good birds on hand. The programme comprises two events at 4 birds each, $3 entry; one at 7 birds, $5, one at 10 birds, $10, and two miss and-out events, $2 entry.

The Commercial Gun Club recently formed at Grand Rapids, Mich., is officered as follows: Captain, Hobart Frost; Secretary, E Whalen; Treasurer, Geo. Heinzelman. Other members are: Charles Ruoff, Al Becker, D. Frank, N. O. Sargeant, Abe Longstreet.

The next contest of the New Jersey Trap Shooters' Leage will be held on the grounds of the East Side Mutual Gun Club, Hamburg place, Newark, on Saturday, Oct. 15. The club will run an all-day open to all tournament beginning at 8:30 A. M. The State League's team contest will start at 2 P. M.

The Erb-Newhouse match at 25 live birds each for $25 a side will take place on the Old Stone Housefgrounds in Newark on Saturday; everybody who goes to see the match should take a gun and plenty of ammunition as open sweepstakes will be in order before and after the match.

Utica has a shooter whom they are anxious to pit against E. D. Fulford. The Uticans do not expect their man to defeat Eli but they are willing to lose a limited sum in order to find out his true mettle It is likely that Fulford will oblige them as soon as his working season closes.

At the annualmeeting of the Spokane Rod and Gun Club, of Spokane Falls, Wash., the following officers were elected for the ensuing year: President, W. D. Knight; Vice-President, Wm. Carson; Secretary, F. R. Drake; Treasurer, Wm. Nelson; Captain, Melville Moore.

A 25-target sweep took place on Frank Class' Morristown grounds on September 21. The scores were Conway, Smith and Class 20 each; Piper 18, Riley and Smith 17 each; Simmons 16, Nafie, Hathaway and Brueckner 15 each. Conway won first money on the shoot-off.

An open-to-all tournament will be held by the Myrtle Gun Club at Irvington, N. J. on Saturday. The main event will be a 50-target sweep, $2.50 entry with $20 added by the club. Shooting will begin at 10 A. M. The club furnish free refreshments.

During the Saratoga shoot E. D. Miller used his old-time Parker. Some of the boys thought they had him beaten on the third day but the "Jersey cyclone" kept his nerve and came out on top. It takes a hot man to chase Enoch for four days.

The following scores were made at the weekly shoot of the Rochester Rod and Gun Club, Sept. 21: Twenty-five class—Hadley 24, Norton 19, Hicks 23. Twenty-seven class—McVean 25, Brnff 21. Thirty-one class—Quirk 24, Richman 16, Mack 17.

At the election of officers of the Bray's Bayou (Texas) Gun Club W. H. Pelge was elected President; C. Newman, Vice-President; W. Goetzman, Secretary and Collector, and E. Herdejurgen, Treasurer. The club will have a barbecue in October.

Good for Wilmington. A $75 purse hung up for a contest between ten-men teams from New Jersey, New York, District of Columbia, Delaware, Maryland and Connecticut, which of these States will reach the prize?

It was expected that a team match would take place between the Auburn Gun Club and Rochester Rod and Gun Club during the Auburn shoot, but only four of the Rochester boys put in an appearance.

By the time this paper reaches its readers the Peekskill tournament will be in full blast. To-day and to-morrow the crowd will shoot at blue rock targets and on Saturday will change off to live birds.

Each day during the Wilmington tournament there will be two 10-target events, $1 entry; two 10-target events, $1.50 entry; seven 15-target events, $1.50 entry; and one 20-target event, $2 entry.

Why not get up a trap tournament on the Claremont (N. J.) grounds, and include in the programme the return match between New Jersey and Connecticut teams?

The third and deciding match at 100 targets each between H. L. Gates of Utica and C. H. Mowry of Syracuse will probably be shot at Rome, on neutral grounds.

Al. Conway of Morristown, N. J. is willing to shoot a match against any one in the town at a 100 blue rock targets each for $100 a side.

Harry Smith of Newark and Allen Willey of Hartford will shoot their hundred bird race in October.

The Saratoga Gun Club will probably hold its 1893 tournament early in June.

Rollo Heikes and his banjo have gone to the big shoot at Mt. Sterling, Ky.

Ottumwa, Iowa, expects a big time at its tournament on Oct. 5 and 6.

The boys at Auburn missed Milt Lindsley and his "Kazoo band.

All the trap-shooting States should enter teams at Wilmington.

The Auburn boys should be happy with their cozy club house.

Jersey will send a whooping team to Wilmington next week.

Don't forget the Wilmington dates—October 12, 13 and 14.

Will the Jersey team break 98 per cent. at Wilmington?

What a crowd Saratoga should have at the next shoot.

A trio of Auburn boys will go to Knoxville next May.

Harry Levengston is a prime favorite with the boys.

The subsbribers' tents looked lonesome at Auburn.

Rolla Heikes did not catch his pace at Saratoga.

Fred Quimby will do the hustling at Peekskill.

Elmer Shaner makes a rattling good manager.

"Little Neaf" Apgar was missed at Auburn.

C. H. TOWNSEND.

**Every week we are obliged to defer to the next week trap scores which come in too late for publication in the current issue. It is particularly requested that scores be sent us as early as possib le**

### The Garfield Gun Club.

CHICAGO, Sept. 17.—Inclosed you will please find scores made at our shoots, Sept. 10-17.

### The Emerald Gun Club.

TWENTY members of the Emerald Gun Club competed for the two gold medals of the club in Classes A and B, at Dexter Park, on Thursday, Sept. 22. Each man shot at 10 birds, club rules and handicap, 5 unknown traps. The birds were good, and the weather, although cloudy, did not prevent them getting away from some of the crack shots. L. Schortemeier killed 9 and took the trophy in Class A. E. Doenick also killed 9, but was handicapped on account of previous wins. R. Regan took the second with 9. The scores:

| | | | |
|---|---|---|---|
| G Butts | 1012011111—8 | J Porter | 0001002000—2 |
| L Schortemeier | 2221121012—9 | J Hogan | 0121021111—8 |
| E Doenick | 2112111021—9 | H Thau | 2010121221—8 |
| Dr Klein | 0222210212—8 | J H Voss | 1120201102—7 |
| R Regan | 1011112121—9 | Dr Allen | 0021120010—5 |
| T Cody | 0100000020—2 | Dr Leveridge | 0211101110—7 |
| Dr Hudson | 1001100102—5 | L Gehring | 1021212200—8 |
| Swindell | 2022222000—6 | W Fitzgerald | 0012011111—7 |
| J H Moore | 2221022202—8 | Dr J Horn | 2200000102—4 |
| J Borell | 0011101100—5 | M Quinn | 1010001201—5 |

### At Watson's New Park.

No. 6: Bartlet 5, Funk 7, Parkhurst 7, Ripley 2, Myers 4.

No. 7: Bartlet 9, Myers 6, Bradway 6, Bush 6, Smith 8.

### Riverton Defeats Blooming Grove.

PHILADELPHIA, Pa., Sept. 22.—The first match of the season between the Blooming Grove and Riverton gun clubs to decide team supremacy and for a valuable trophy was shot yesterday afternoon on the grounds of the latter organization, at Riverton, N. J. A large following of both clubs was present. The match, which proved to be one of the best team matches witnessed in the vicinity, was under Hurlingham rules, 30yds. rise, with the usual boundaries. The birds selected were a lively lot and frequently the second barrel had to be used by the contestants before they could be brought to earth. The Riverton team made one of the most commendable records of the season, Soule and Dolan doing remarkably good work, the latter's only miss being a driver, a difficult shot, and therefore excusable. For the visitors Worthington and Lawrence made excellent stands. The second match of the season will be shot off on the grounds of the Blooming Grove Park Association Oct. 4:

| Riverton Gun Club. | | Blooming Grove Gun Club. | |
|---|---|---|---|
| Soule | 25 | Worthington | 24 |
| Yale Dolan | 24 | Lawrence | 24 |
| Jones | 23 | Emle | 21 |
| J Frishmath | 23 | Greene | 21 |
| McAllister | 23 | Cromelin | 21 |
| Dando | 23 | Smith | 20 |
| Godschalk | 22—163 | Loomis | 17—148 |

### Linden Grove Gun Club.

THE members of the Linden Grove Gun Club had a very enjoyable afternoon's sport on Friday, Sept. 23, at Dexter Park, L. I. The club shoot for the best averages of the season resulted in four making straight scores of seven. The team match was a very exciting one, J. A. Eppig, usually a good shot, missed his two first birds on account of a strange gun, and lost. The scores:

Averages of the season:

| | | | |
|---|---|---|---|
| P J Eppig (28yds) | 1211021—6 | M McLaughlin (25) | 2111121—7 |
| W Cunningham (28) | 1103221—6 | J Schlieman (25) | 0112112—6 |
| J A Eppig (30) | 1122122—7 | W Vorbach (25) | 2111122—7 |
| C Horney (25) | 2101020—4 | C Voehringer (25) | 0212021—5 |
| J Birmel (25) | 2221112—7 | T Eich (25) | 2106120—4 |
| F Ibert (25) | 0112101—5 | F McLaughlin (25) | 1002022—4 |

Match, losing side to pay for birds:

| | | | |
|---|---|---|---|
| F Ibert | 11112112—8 | P Eppig | 21112111—8 |
| J Schlieman | 11101112—7—15 | J A Eppig | 00111121—6—14 |

Sweepstake, 10 bluerocks, 25 cents entry, three moneys:

| | | | |
|---|---|---|---|
| T Eich | 0010008011—3 | W Cunningham | 1111001000—5 |
| H Weiman | 0101000110—4 | T Short | 1111111100—8 |
| P J Eppig | 0100000010—2 | F Ibert | 1011011101—7 |
| C Horney | 1111111030—7 | W Vorbach | 1111011010—7 |
| J Birmel | 0011101111—7 | A Eppig | 1110000010—4 |
| W Follener | 0000010101—3 | | |

### The Down Town Gun Club.

ELEVEN members of the Down Town Gun Club held their club shoot at Dexter Park, L. I., on Thursday, Sept. 22. The contest was for the club medal at 8 birds each, 25yds. rise, H. and T. traps, modified Long Island rules, the birds were too good for the shooters, hence the small scores. H. Breitstein took the medal with a score of 6. The scores:

| | | | |
|---|---|---|---|
| J Fayen | 01011011—5 | C Wissing | 01000101—3 |
| C Maisch | 01001101—4 | A Joost | 10110100—4 |
| H Breitstein | 11111100—6 | C Goetz | 0110'100—4 |
| C Wolf | 00011110—4 | W Miller | 10011010—4 |
| H Schwanger | 10101101—5 | C Doscher | 01011010—4 |
| H Hemmer | 01001110—4 | | |

### The First German Gun Club.

THE First German Gun Club of New York held its regular monthly shoot at Dexter Park on Wednesday, Sept. 21. Thirteen members competed for the club's gold medal and a second prize valued at $15 to be won three times in succession. F. Pfaender killed 10 straight, but could not take the trophy, but won the second prize for the third time. J. Wannemacher won the medal for the first time. The scores:

| | | | |
|---|---|---|---|
| F Bernstein | 1011001010— 6 | H Miller | 1010110100— 5 |
| P Neusch | 0110111010— 6 | A Neusch | 0111001000— 4 |
| G Grau | 1110101111— 8 | H Zahn | 0111010111— 7 |
| A Goetz | 0110101110— 6 | F Pfaender | 1111111111—10 |
| J Schraeder | 1110111101— 7 | D Wannemacher | 1111110110— 8 |
| C Pfaff | 0111100101— 5 | J Brauer | 0011110100— 5 |
| M Schell | 0001110001— 4 | | |

## Answers to Correspondents.

☞ **No Notice Taken of Anonymous Correspondents.**

T. J.—If you will send address we can tell you about the ferrets.

DR. M., New York.—Have we the right to shoot at clay pigeons on Sundays on our own property? Can the law prevent us? Ans. The law forbids Sunday shooting, whether on one's own property or elsewhere.

W. C.—1. For the maximum safe charge of the powder you would do well to consult the manufacturers. 2. Shells kept over a season should not be used. 3. The powders are extensively used with satisfaction.

J. G. B. B., Jamestown, N. Y.—Do the Pennsylvania laws offer a bounty on any kind of game? If so, what? What is the best book on trapping? Ans. There is a bounty of $10 on a wolf, $2 on a wildcat, $1 on a gray or red fox and 25 cents on a mink. 2. Gibson's "American Trapper."

C. H. W., Lowell, Mass.—A license fee of $20 is required for non-resident to hunt in New Brunswick. To be obtained from the Provisional Secretary, Fredricton. The duty on sportsmen's supplies is 30 per cent. on appraised value, and this is deposited to be returned when the implements are brought out again.

C. W. G., Indian Fields, N. Y.—Will you please tell me when you will have one of your books of game laws of all the States of this year? I live in Albany county and hunt in Greene county. They tell me that I have no right to hunt and sell the birds that I shot in Greene county. Ans. You will find the full text in the *Book of the Game Laws* (price 50 cents) or an abstract in the *Game Laws in Brief* (price 25 cents), sent from this office. The law on birds (quail, ruffed grouse, partridge, woodcock) is that they "shall not be transported to any point within this State, from any of the counties thereof, or possessed for that purpose, except that such birds may be transported from the county where killed when accompanied by the owner thereof."

# BOOKS ON SHOOTING.

New Editions.

## The Modern Shotgun.

By W. W. GREENER.

PRICE, $1.00.

## The Gun and its Development.

By W. W. GREENER.

PRICE, $2.50.

These volumes have been for some time out of print, and new editions revised by the author have just been received. There is scarcely any one whose utterances with regard to shotguns and rifles are entitled to as much weight as Mr. Greener's, for he has been making these arms for many years. To his great knowledge of them he adds a pleasant and clear style in writing, which adds to the value of his books. Every American who uses a gun ought to read these books. Sent postpaid on receipt of price.

FOREST AND STREAM PUBLISHING COMPANY,
318 Broadway, New York.

### *OUR ILLUSTRATION SUPPLEMENT.*

WITH this number is given as an extra sheet supplement Mr. Thompson's drawing of the Ocelot, being the second one in the series of four illustrations of American wild animal life. The first was of the Panther, in issue of Sept. 8. The others will be the Canada Lynx, Nov. 3, and the Bay Lynx, Dec. 1.

### *THE KEUKA LAKE SCANDAL.*

ATTENTION was recently called to the scandalous condition of affairs by which one of the New York State Game Protectors, Sheridan, of the Thirteenth District, is retained in a position for which he is notoriously unfit and from which in the public interest he should have been dismissed long ago. The case is one which ought not to be lost sight of; it is one which we propose to discuss until its merits shall be clearly understood by the public.

Sheridan is a game and fish protector. The business of a game and fish protector is to enforce the game and fish laws, to arrest the law-breakers, seize and destroy their nets, break up their business, defend the fish supply from ravage and ruin at their hands. In short, a protector's business is to protect. That is what he is paid to do. When he ceases to do it, and refuses to do it, his pay should stop then and there. The continued retention in office of such an unfaithful servant is a standing disgrace. It is a rotten condition of affairs that would not be tolerated for a moment in private life. Suppose that this man Sheridan were employed to care for a private estate, and instead of protecting the premises should permit trespassers to invade them, net the trout out of the pond, steal the chickens from the roost and run away with the horses by night. How long would he be "kept in his job?" How long would he draw his pay for standing around with hands in pocket and lips puckered in a whistle, while the thieves held high carnival? To ask such a question is to answer it.

But this same Sheridan, employed by the Fish Commissioners to protect the people's fish, shows himself by his inaction to be in league with the lawless netters of Lake Keuka, refuses to do what his contract with the State demands of him—to protect the fish—and yet is kept in his place and paid his salary month after month.

Why?

Because he is a political heeler and controls votes: and by paying him funds out of the State treasury the influence and the votes can be made certain.

That is the difference between private business methods and public business methods.

As we have said before, we do not so much blame Sheridan. If he finds that he can draw his pay without doing the work, if he finds that the value of his services as a heeler and wire-puller offset the worthlessness of his services as a protector and assure him of his berth and its pay, he would count it foolishness to lift a hand against the fish pirates.

The real responsibility rests with Sheridan's superiors, those who maintain him in his place. They are the ones who must answer not only for the scandal and disgrace of this unworthy servant's retention in office, but for the ruin of the Lake Keuka fishing.

### *THE OCELOT.*

IT is only to residents of the extreme Southwest that the ocelot is known as a wild animal, for it is a species of Southern distribution, its range not extending much further north than that of the jaguar. It is one of the many species of leopard-like cats which in the Southwest are known as tiger-cats, and is a graceful and beautiful animal. In length it measures about 4ft. and it stands about 18in. at the shoulders. The ground color of the fur varies from gray to a deep fawn, which contrasts finely with the black markings.

The food of this species consists for the most part of birds and small mammals, and its expertness as a tree climber is such that it is said to chase and capture monkeys among the branches where they have taken refuge.

The ocelot is often seen in captivity and frequently becomes quite gentle and much attached to its attendant. Sometimes, however, it is sullen and ferocious and seems anxious only to scratch and bite any one who may venture near its cage. We knew of a pair, sent from Mexico to New York as a present to a merchant here, which never became tame, although much time and attention was given them.

The scientific name of the ocelot is *Felis pardalis*, and those naturalists who divide the genus *Felis* into several sub-genera usually place the ocelot in the group *Leopardus*. Several species of ocelots have been described, the differences being chiefly in shade of color and character of markings. They closely resemble each other in habits, and are miniature leopards.

In the accounts of wildcat hunts in Texas which we often receive, the species pursued may in many cases be the ocelot, though its range is shared by other small cats, especially the bay lynx, which is almost universally distributed through the United States.

Facts with regard to the distribution of the ocelot within our borders are much to be desired, and we would urge upon our readers in Texas and the Southwest the importance of recording any observations which they may make on the species. In any case where doubt exists as to the species, specimens of the skull and skin should be sent us for identification.

### *SHOOTING WITHOUT A GUN.*

DOUBTLESS the highest test of sportsmanship is the woodcraft which gives one that knowledge of the habits of game that enables him to find it under the various conditions of weather and seasons, and the ability to make the stealthy approach which shall bring him within range, without alarming the object of his pursuit.

Without these qualities, partly inborn and partly acquired, there cannot be completely successful sportsmanship, however skilled one may be in the use of the gun, a skill that may be acquired in great measure by practice at the fixed and flying target.

All the skill of woodcraft that goes to the making of the successful hunter with the gun, must be possessed by him who hunts his game with the camera.

His must be the stealthy, panther-like tread that breaks no twig nor rustles the fallen leaves. His the eye that reads at a glance the signs that to the ordinary sight are a blank or at most are an untranslatable enigma. His a patience that counts time as nothing when measured with the object sought.

When by the use and practice of these, he has drawn within a closer range of his timid game than his brother of the gun need attain, he pulls trigger of a weapon that destroys not, but preserves its unharmed quarry in the very counterfeit of life and motion.

The wild world is not made the poorer by one life for his shot, nor nature's peace disturbed, nor her nicely adjusted balance jarred.

He bears home his game, wearing still its pretty ways of life in the midst of its loved surroundings, the swaying hemlock bough where the grouse perched, the bending ferns about the deer's couch, the dew-beaded sedges where the woodcock skulks in the shadows of the alders, the lichened trunks and dim vistas of primeval woods, the sheen of voiceless waterfalls, the flash of sunlit waves that never break.

His trophies the moth may not assail. His game touches a finer sense than the palate possesses, satisfies a nobler appetite than the stomach's craving, and furnishes forth a feast that, ever spread, ever invites, and never palls upon the taste.

Moreover, this gentlest of sportsmen is hampered by no restrictions of close time, nor confronted by penalties of trespass. All seasons are open for his bloodless forays, all woods and waters free to his harmless weapon.

Neither is he trammeled by any nice distinctions as to what may or may not be considered game.

Everything counts in his score. The eagle on his craggy perch, the highhole on his hollow tree are as legitimate game for him as the deer and grouse.

All things beautiful and wild and picturesque are his, yet he kills them not, but makes them a living and enduring joy, to himself and all who behold them.

### *SNAP SHOTS.*

IN our fishing columns Mr. J. S. Van Cleef advances an interesting theory to account for the diminished flow of mountain streams in the East. The explanation commonly accepted is that after the mountains have been denuded of their timber and the humus which acts as a storage reservoir, the water is no longer held back for gradual discharge, but rushes down in an impetuous flood to be succeeded by dry creek beds. This explanation does not involve a lessened precipitation, but an inadequate storage of the moisture. Mr. Van Cleef's theory, however, ascribes the scarcity of water flow not to rapid drainage, but to a change in the original source of supply. Our trout brooks, he suggests, are drying up, because the winds from the west are no longer laden with moisture as in the past. Mr. Van Cleef has been familiar with the country of which he writes for thirty years, the facts stated by him are not open to question; and his theory to account for them is worthy of attention.

---

Two years and three months have elapsed since Delmonico's fashionable restaurant, of this city, was caught serving woodcock out of season; and from what can be learned, or rather from our inability to learn anything definitely about the case, the most reasonable supposition is that District Attorney Delancey Nicoll has no intention of trying it. Disgraceful as was the record of those who shirked their duty in this case before it reached him, Mr. Nicoll is proving himself the champion dilly-dallier of them all. The new law of 1892 empowers the commissioners, in their discretion to employ special counsel to commence and maintain actions. After the experience of this case, we may be sure that the next time the game protectors catch a wealthy restaurateur serving game out of season, no district attorney will be given a chance to stand between the culprit and the law.

---

WITH a tell-tale tan and a betraying bronze, Mr. Henry P. Wells, of this city, has just returned from a "good time" in the Maine woods, at the Parmachenee Club, where he has spent six weeks in fishing, exploring and mountain climbing. The warm weather in Maine has been unduly prolonged this season; the temperature of the trout streams has been unusually high, and the big fish have refused to rise. But one need not listen to Mr. Wells two minutes before discovering that for him the pleasure of an outing is not to be measured by the size or number of fish taken. Indeed, who shall begin to analyze and catalogue a half of the many complex and often subtle factors which go to make up a "good time," as that expression is used by a professional man in the woods.

---

We have word of the death of Wm. F. Martin, on the evening of the 3d inst., at the Saranac Lakes, N. Y. Mr. Martin was the pioneer landlord in the Saranac Lake region, Adirondacks, opening his hotel about 1853. He will be kindly remembered by the many sportsmen who visited the woods at that time. As a host he was always obliging and interested in the success of his guests.

---

"It was not that I was not posted on the ways of fish, and on fishing and on where fish were to be found," explained the returned fisherman; "I was thoroughly posted in every particular, and so were the streams; and that was what was the matter. So I posted home."

---

It is estimated by an English fox hunter that the cost of keeping the 330 packs of hounds in Great Britain and maintaining fox hunting requires an annual expenditure of not less than $23,000,000.

# The Sportsman Tourist.

## A CAMPER'S DIARY.—V.

Camp on the Forks, Aug. 29.—There's a weather-beaten board nailed to the white birch that leans from the bluff and overhangs the canoes at moorings, and the letters, getting obliterated, still spell Camp Independence, so I suppose our mail should be so addressed. Sam and Mack are gone off. Valentine and I are keeping camp. The sun's out hot over everything and all the available rocks and bushes are disguised under blankets and clothing. The camp is swept and garnished.

Trouble commenced this morning after breakfast with Sam lingering so long over the provision box. As a rule, his hand goes knowingly among a promiscuous lot of cans, bottles and jars till a deft shake identifies the contents, but to-day he looks up and says "A sugar famine!" Then petulantly, "You needn't look at me about it, either, look at him. You heard me tell him forty times not to use so much 'n' you all heard what he said. Said he liked to hear it crunch. Hm'mh!"

We all looked at Mack, but Mack didn't look at anyone in particular. You could see by the expression that he was about to say four or five things at once, but the result was he said nothing. Finally the expedition was organized to go down the trail to Parmachenee and try the camp for sugar; so Sam went to the river to scrub his teeth, and Mack went inside to fix up. Sam was loath to go "on account of Private Camp. Have to burn a signal on the shore or fire a gun for them to come down with a boat," but I told him my Guide of the Knapsack had left his boat somewhere near the carry and take that. When we looked in the tent Mack was seated tailorwise on the boughs with his pants in his lap and a big needle. He was whistling and beating time with the big needle.

*Aug. 30.*—Evening, by candle light. After the expedition had moved yesterday, Valentine said he knew where Sam had got that string of fish, the very spot, just round the bend a few paddles from camp, so he built up his rod and got out the flies. Valentine never handled a rod till this trip, but you wouldn't suspect it from the way he pored over that book, pondering and rejecting. Finally I said: "What fly you looking for, Val?" He took plenty of time in answering, and said "I'm looking for the one that seems the least indigestible." So he disappeared round the bend in the Birch Bark. He hadn't been gone long when I heard a sound——

*Sept. 5.*—At home. The last three or four days of camping were too crowded for diary keeping, so these thoughts now will be recollections that come back.

That "sound" I heard came from the direction of the spot where Valentine was invisible on the river. I listened intently, but it wasn't repeated, and I decided it was about the kind of a noise I should make if I were tipping over a canoe and splashing, so I moved up the bank to a point where I could look off—and saw a man's head above the surface of one of the deepest pools in the cold, placid Little Magalloway. It came out afterward, the rod rolled overboard and sunk while he was dropping the anchor, and he looked over the side where she went. He says, "That Birch Bark's meaner than the devil's wife."

The boys came back that night with sugar, and Mack was full of enthusiasm. "Beautiful lake. Fine camp. Danforth building a house boat to take to Florida this winter and run up in the rivers and shoot game. Take boarders, you know." Val says: "Any petticoats on the piazza, Mack?" Mack looked reproof. "Don't say petticoats, Val. Ask me if I saw any does. Yes, one. And a big guide with a glass and a long range gun. Lucky Jeff didn't get up there with his bait."

*Sept. 7.*—This comes to me. On the way down the carry from Aziscohos Falls toward Flint's, stumbling down the mountain road behind the wagon, we met my Guide of the Knapsack coming back. We had hand shaking and introductions till the mountain wagon got small in the distance, and then I said "good bye," and said I should see him again sometime, and Mack gave him a grip and a smile and said, "Good-bye, old man; see y'again next year," and Sammy said, "Good-bye, old man," also, and said he should see him again, and Valentine stepped up more cordially than I ever had seen him. Valentine's apt to be rather impressed, and he smiled, too, and said: "Well, good-bye my dear boy, you'll never see me again."

*Sept. 10.*—Met a mutual friend on the street to-day. He looked quizzical and said he'd been talking to Valentine about camping. Valentine told him he had read about camping, and there was a glamor on it, but he said the glamor was all worn off. He said the worst of it was in the tent at night, jumbled up with other fellows, ill-bred, they were, though he used to think differently. There was too much confusion, he said, with everybody wanting some one else to tie up the tent and put out the candle, and to take his feet off their blanket, and to lean on his own supper, and all that sort of thing. He said the thermometer fell twenty-five degrees every night, and in the morning his shoes were extremely cold. And when he went outside to look for breakfast there was nothing but cold stones and a cold mist rolling off the river, and cold dew on the bushes, and on the grass, and on his shoes. And generally the fellow whose turn it was came out mumbling and grumbling about somebody getting some wood, and said he couldn't do it "all," It was then he made the remark about the glamor being gone.

* * * * Mack started in with a supply of toothpicks captured at the last hotel, but they gave out, and he next appeared with a sliver with a good thick handle like a marlin spike. Each day the point was whittled again and it went back to his pocket.

* * * * The camp was not devoid of objects of interest. Valentine led us out one day and showed us, first, a raspberry bush in full bearing, growing from a decaying stump as from a flower pot. Then he took us to the edge of the bluff and pointed over the river to a great dead tree that loomed far above the woods, with a few gaunt branches arranged against the sky in spirited fashion. It was classical, he said, and the topmost branches were statuary. We all guessed, but no one could see till he told us, and then it was plain enough. Mercury on tip-toe. He said there was one more; so he took us back a little through the woods and stopped. A big boulder had been riven in ancient times into three slabs that now stood leaning against each other in confusion. A mountain ash had taken life in a sod on top and sent its roots down a tortuous way among the rocks looking for earth. The sapling grew lusty and the roots got strong and held the rocks bound tight. That was all we saw until Valentine said "Laocoön," and then we could see the three Greeks being crushed in lithe, soft, strong, supple, python folds.

* * * * Well, this is what I think of camping: A man lives in town awhile, where the ground is concreted to the tread, and his friends are gloved to the touch and everything coated with varnish, and at last there is a vacation and he takes to the woods. He rejects a cedar boat, it must be a birch bark, weather beaten and well mended, and the paddle must be water worn. He makes a fire and eats food that works his jaws hard and tastes of grit. He wants his clothes to get wet and dry on him, and have weeds and sand in his trousers where they turn up at the bottom. He cleans fish and swings an ax and gets pitch and blisters on his hands. He wears no socks and gets some small excitement watching the vicissitudes of his shoes, soaking by day and toasting by night, to crack and curl up and let his toes be visible. The first day out he wets a foot and it passes for a calamity, but afterward he gets acquainted with the rain and river and takes note of the spirit of evolution that was latent. He becomes amphibious. By and by he realized there is no post-office and no mail; there are no sounds of discontent from the outside world at his absence, and he gets jealous and goes home.

It's medicinal and there's just hardship enough so that the clerk or sedentary man, sullen with his lot, goes back as if to a life of ease. His two weeks' vacation seemed like four. He wanted to come, he would like to stay, and yet he's willing to go home. Jefferson Scribb.

## THE FULTON CHAIN.

The collection of lakes in northern New York known as the Fulton Chain, are included in the old "Brown Tract," and are part and parcel of the Adirondack system. For a long period this region has been a favorite hunting and fishing ground to numbers of sportsmen, but it is not as generally known as other parts of the Adirondacks, as the former difficulties which existed of visiting it have deterred many from making the attempt. By the recent construction by Dr. Webb of the Adirondack Railroad, this beautiful portion of our State is now rendered easy of access not only to the sportsmen but also to the earnest seeker of health, or the eager searcher of the charms of nature.

The old wooden railway which ran from Booneville, and once afforded the means of access to the tract, is now relegated to the past, and its fast decaying tracks now serve no other purpose, save by their presence to bear silent witness that they were once active factors and performed their part in this busy age.

The journey to the Fulton Chain will be a very pleasant one when the new road gets fairly in working order, and some degree of system inaugurated, but at present the management are merely wasting money in printing time tables since there is not the slightest effort made to run the trains on schedule time, and everything is conducted in a happy go lucky manner. The passengers get on the cars at Herkimer, and drift with more or less—generally more—stoppages, until in course of time they finally find themselves lodged high and dry at Fulton Chain.

Notwithstanding these drawbacks, however, our party of three, which made the journey in August last, found our tedious way enlivened by many interesting features. The night was well advanced when we finally left Remsen, the point of transfer for all passengers bound on the Adirondack Railroad, and as we crawled along through the darkness we passed many railroad camps which were still occupied, the ruddy glare of whose camp-fires, with the forms of the inmates forming silhouettes against the light, were picturesque in the extreme, while the black forests which seemed to enfold us in their embrace suggested strongly the remoteness of civilization. Occasionally the headlight of the engine would suddenly glint upon the surface of some gloomy tarn, or softly murmuring stream, all of which added to the wild, romantic beauty of the scene we were passing through, and did much to atone for the vexatious and apparently interminable delays we were subjected to. By daylight this route presents also many charming features, since the natural attractions of the region traversed by this road are very striking, and as the train plunges into the dense forests, slowly climbs the steep mountains, follows the course of laughing, rippling streams, or runs through deeply wooded glens, the traveler never loses interest in the scenes presented to his eye, but is afforded a constant and varied aspect of nature in all her charming or solemn moods, which create unalloyed wonder or delight.

We arrived at the station named Fulton Chain somewhere toward midnight, where we left the train and staged it, a mile or so, to the Forge House, on First Lake, the first of the Fulton Chain. Here we found a well-built, comfortable-appearing and commodious hostelry, where we fondly hoped to find peace and comfort. In this we were grievously disappointed. The situation of this hotel is admirable and possesses many natural attractions, which would inevitably make it a favorite resort and command a most lucrative custom were it not for the fact that the hotel is badly managed.

The State has a well managed hatchery at Old Forge, where many thousands of fry are annually turned out. The courteous superintendent, Mr. Marks, is always willing to impart all information desired, and show the visitors around his well appointed quarters, and exhibit to them his lusty and large spawners, which are kept in a fine spring a short distance from the main hatchery.

We have spoken of the natural attractions possessed by Old Forge. Not the least of these is the central position it occupies in regard to the fishing or hunting grounds, and also from its situation, it is the starting point for the various routes by which one may penetrate this region. Then a most delightful trip, and one which will linger pleasantly in the memory, can be made in the little steamer which makes a daily run from First Lake to the head of Fourth Lake and return. The boat leaves Old Forge about 10 o'clock, and as it passes from lake to lake rounds the cover and bays, or winds in and out some narrow inlet, the eye at one moment drinks in all the effects produced by the primeval grandness of the scenery, and in another there breaks upon the vision one of those pretty camps, with campers grouped around, which are here and there scattered along the route, on the shores or islands. All of which goes to produce a grand panorama, which is spread out before the visitor in all its charming variation of nature and art, civilization and wildness, at every turn. The voyage ends at the head of Fourth Lake, where a stop of an hour or so is made, during which an opportunity is afforded of partaking of a most excellent dinner at a house newly built, where fine trout capitally cooked and served, with all the table appointments neat as wax, are by no means the least attractive features of the bill of fare. This is also an excellent objective point for the fisherman, as in the spring trout without number can be taken with the fly within a stone's throw of the house, and at all seasons a fair creel can be obtained from waters in the immediate vicinity.

After a pipe or two and pleasant ramble through the forest to aid digestion, the whistle signals all aboard, and Old Forge is again reached about 4 in the afternoon.

Next season a larger and speedier vessel will supplant the one in use at present on the lakes, and arrangements perfected whereby a thoroughfare will be opened up from First Lake to Raquette Lake. Repairs will be made on all the "carries" between Fourth Lake and Fifth, Fifth and Sixth, Sixth and Seventh, Seventh and Eighth lakes, and between Eighth Lake and the Raquette River, so that all baggage may be easily transported; while it is also contemplated to place steamers on the smaller lakes of the chain, to add to the comfort and increase the facilities of the route. By these means an easy way will be afforded to all to enjoy a delightful trip through the entire beautiful Fulton Chain and then down to Raquette Lake.

During our stay we found some excellent fishing for that late season of the year. One morning Phil, Mac and I started down the Middle Moose, and after rowing about a quarter of a mile, beached our boat and made a mile and a half carry over to the North Branch of the Moose. We fished down this stream to the confluence of the two branches, carefully whipping each spring hole and the point of inlet of all tributary streams. As the day was very clear, we found about noon that the trout were no longer disposed to investigate feathers, and so we ascended the Middle Moose again and repaired to the Forge House for dinner. We had made a very fair creel of trout, averaging a little less than one-half a pound, and though we possessed no large record breakers, yet considering the day and the lateness of the season, we were perfectly contented with our morning's work, and felt at peace with God and men. In the spring or early summer, and with the water in proper condition, the sport upon the famous Moose must be good indeed.

In the afternoon we bade farewell to the Old Forge, and packing up our duffle once more embarked upon river and directed our course toward Wheeler's, some eight miles down on the Moose. Although we faithfully whipped each likely and unlikely spot on our way, yet no success rewarded our efforts after leaving the point of junction of the two branches of the Moose. I am persuaded that the poorest fishing on the river is the vicinity of Wheeler's, due entirely, in my opinion, to the fact that for some miles the river has been raised considerably by a dam, erected in the time of the wooden road, for the purpose of making that part of the stream navigable for the old red propeller which carried passengers from Moose River, the terminus of the road, to the point of debarkation for the Fulton Chain.

Wheeler's is in the highest degree primitive, and although he does the best with the means at his command to make his guests comfortable, yet a stay there is most thoroughly "roughing it." It is undoubtedly a capital headquarters in the hunting season, but from our experiences there I do not believe it to be a good locality for trout.

The red-letter day of our sojourn in the woods was our last, and Nick's Lake, of pious memory, was the author of all our pleasure. This lake, which is the property of a Mrs. Julia DeCamp, is reached by a carry of a mile and a half from the Moose, and is a perfect gem of beauty. On all sides the heavy forest comes down to the water's edge and seems to enfold it in its embrace as if fearing lest stranger eyes should gaze upon its virgin beauty. The pretty islands, numberless coves, wooded headlands and broad bays all add to the attractiveness of the scene, and cause the visitant to feast his eyes in rapture upon the picture spread out before him, whose "builder and maker was God."

We did not arrive on the lake until nearly 10 o'clock, and although the sky was clear, yet during the few hours spent in fishing, we landed at least 300 trout, all of which except some thirty of the largest, reserved for supper and breakfast at Herkimer, were returned alive to the water. So wildly beautiful was that sparkling lake, embowered among the grim old Adirondack forest, and so delightful were the hours spent along its shores that we unanimously determined to put in a week's camping on its borders next year. But the old adage that "man proposes," etc., has again come true in this case, for we understand that the owner has posted the premises, and the fishing will be no longer free. As Mrs. DeCamp has hitherto been very kind in throwing open her property to the sportsmen, her present unexpected action is probably due to some abuse of privilege, and thus the innocent must suffer for the acts of the guilty. It has been said "'tis better to have loved and lost than never to have loved at all," and so we all feel that it is better for us to have seen Nick's Lake, although it is now lost to us, than never to have gazed upon its limpid waters.

The flies we found most successful were the Proctor, split-ibis, brown-hackle, Reuben-Wood and the black-fly. The Adirondack region is the only section I have ever fished where the same fly can be depended upon for killing qualities year after year. Twenty years ago, on my first visit to those woods, the brown-hackle was an all-around favorite, and each succeeding visit finds it still holding its supremacy. Flies may come and flies may go, but the brown-hackle lives on forever.

The chances for good sport with the deer, in the Fulton Chain and vicinity, should be excellent this season, since their fresh tracks were often seen upon the sandy shores of lake and stream, and late one afternoon during our stay at the Forge House, in full view of all the guests, a deer stole safely from the forest glades, and for nearly half an hour fearlessly waded and fed along the margin of the lake. It was, indeed, a scene fit for the brush of a painter. There stretched away the lake, with its waters smooth as glass, shimmering in the sun's departing beams, and mirroring on its surface the moun-

tain, trees and variegated vines, around and above, the glinting rays glancing over the forest and hillsides, imparted to all the landscape those swiftly-changing, ever-varying lights and shades only seen at eventide, while over all nature brooded that peculiar silence which ever ushers in the coming night. The whole scene was one of solemn, silent peace and beauty, the only sign of visible life being that graceful form which slowly moved among the lilies. Verily, it is afar from the haunts of men, in the wildwood, that man's nature is most deeply stirred and he himself drawn closer to his Creator.

HARRY HUDSON.

## A SUMMER ON NAG'S HEAD.

BY REV. THOMAS DIXON, JR.

IF there is such a thing as a sportsman's paradise on earth, I had the good fortune to spend the summer there. From a friend in North Carolina I had heard much of Nag's Head and its surroundings, as a place ideal to spend a summer. I determined to try it. On the 11th of July we left New York by the Cape Charles route, and in twelve hours we were in Norfolk. From there we had a short ride of forty miles over the Norfolk & Southern Railroad to Elizabeth City. Here we took the little steamer Clarence, and crossing the Albemarle Sound, a distance of forty miles, landed at Nag's Head, in twenty-two hours from New York.

Nag's Head is situated on the narrow sandbar of which Cape Hatteras is the outer promontory. This sandbar begins at the Virginia line and runs along the entire coast of North Carolina nearly to Wilmington. There are parts of this Cape Hatteras sand strip that are ten and fifteen miles in width, covered with dense forests, that have grown on the mountains of sand. Other parts of it are very narrow, tapering down to the inlets, and a part of it is marsh. Behind this long bar of sand, extending for hundreds of miles, are piled the waters of the three great sounds, the Pamlico, the Albemarle and Currituck. The Cape Hatteras strip is broken here and there by inlets very shallow and dangerous, in fact, impossible of navigation except by small fishing boats. Through these narrow and shallow inlets the tide pours in from the sea at flood, and the waters of the sound, filled by the great rivers, rush out at ebb. The sandbar is only a half mile in width at Nag's Head where the hotel is built. The building is situated in the water of the sound. The surf on the other side is reached by tramway from the pier.

Opposite the hotel is Roanoke Island, famous as the birthplace of the first white child born on American soil, Virginia Dare, from whom the county of Dare received its name. It was here that Sir Walter Raleigh's colonists made their landing.

This region of North Carolina is wild beyond description. It is in almost as primitive a state as when the first colonists pressed its soil. The only difference is in the absence of the Indian. Game and fish are just as plentiful to-day as when the white man first pitched his tent on its sands. The population is exceedingly sparse. The distances are magnificent. The way of locomotion is by boat. The mail is carried by a sail boat. Nearly every man in the county of Dare owns a boat or has one at his command. There is no such formation of waters anywhere on the American continent as that found behind this narrow bar of sand that holds back the Atlantic. With a naphtha launch drawing 18in. of water, one may start from Nag's Head and travel a thousand miles in perfectly safe waters that average four feet in depth. The great difficulty in these waters is to keep off the shoals. The channels are very narrow, the expanse of waters immense.

I had heard much of the fishing, and as that is my particular weakness I went there to make a thorough test of all the wild stories I had heard. I confess I was skeptical. I was somewhat reassured, however, by Mr. Gatling, the manager of the Nag's Head Hotel Company, declaring to me on my arrival that the board for myself and family should not cost me a cent through the whole summer if I was not perfectly satisfied with the fishing and if all he said I did not find to be more than true.

The next day after our arrival we tried the fishing in front of the hotel in the Albemarle Sound. We had six hooks at work on our little boat. We caught over two hundred fish that morning. They were fish that ranged from a half pound in weight to a pound. They told us it was not a good day for fishing. I felt, however, satisfied with the first experience. The varieties of fish usually taken on the grounds near the hotel are:

First, the croakers, which are omnipresent. They are everywhere and bite at all times. And the croaker is in these waters a respectable fish. He is shaped something like the trout, has a large mouth and is exceedingly game when taken with the reel. He fights with greater vigor even than the trout (weakfish) when first captured. He is called a croaker because of the peculiar cry he utters when brought to the surface. He can be heard for 200yds. He is not misnamed. His usual weight in these waters is from ¼ to 2lbs.

The spot is the most delicious table fish which we caught. He averages ¼lb. in weight, is very fat, and on the side of his fore fins he has a black spot. The spot is exceedingly gamy for his weight.

The pigfish is of the same size and general character as the spot, a most delicious fish for the table. He derives his name from the peculiar grunt which he utters when taken from the water, which is a perfect imitation of a pig.

The sheepshead is also caught, and we took them weighing from 1 to 6lbs.

When there has not been much rain and the water in the sound is salty, there is said to be very fine trout fishing in the waters of the sound immediately in front of the hotel. We did not find, however, during our stay any good trout fishing in these grounds. By trout, of course, I mean the sea trout or weakfish, as it is called in the North.

These were the principal kinds of fish which we found during July and August. Of course during the early spring here is the great shad fishing ground, the greatest shad fishing ground in fact in America. In the spring and fall in these waters also are taken the most magnificent striped bass weighing from 10 to 80 and 100lbs.

On the opposite side of the hotel from the sound sweeps the ocean. There you take the bluefish, shark and drum. The bluefish and the drum are the principal fish for which one ventures. The bluefish are discovered here by the action of the gulls. When a school of bluefish approach the shore, invariably they are accompanied by a flock of gulls, which are helping themselves to the small fish as they leap out of the water. The drum caught here weigh from 10 to 50 and 100lbs. Near the hotel, only two miles up the beach in fact, are a number of fresh-water lakes, which are literally full of chub and all varieties of fresh-water perch. I tried the fresh-water fishing two days, and one day we caught forty chub, averaging one pound a piece, and the other day about thirty. ["Chub" is the local name for black bass.]

The shooting I found unexcelled. We killed every variety of snipe in abundance, willet and curlew, heron and gulls, as long as we cared to shoot. In the winter season this is a wonderful hunting ground. The shallow waters of these sounds are crowded with ducks and geese. Currituck Sound is famous as a winter hunting ground. There are many New Yorkers who have their club houses built along the shores of Currituck and Pamlico sounds. Deer and bear are also found by the more venturous sportsmen.

My own personal experience in fishing found its climax in the trips which we took to the inlets. From Nag's Head it is an easy sail down the sound to the Oregon Inlet. Here we go in search of the trout as he comes in from the sea with the flood tide.

The first day we reached the Oregon Inlet was a day long to be remembered. We anchored near a little point of marsh, at which two currents came together from the inlet, which had been divided by a sandbar. Here we

A string of 25 weakfish, weighing 70 lbs., caught in 50 minutes by Rev. and Mrs. Thos. Dixon, Jr., at Nag's Head, N. C., Aug. 29.

anchored in about six feet of water, made ready our lines and floats and began work. I have read of fishing, I have heard of fishing, I have dreamed of fishing—I have never in my life fished, really fished, before that day. They began to bite from the minute our hooks touched the water, and for four hours they bit as fast as our hooks could be baited. There were five of us in the boat, and we caught and landed in the boat over 800 spots and trout in those four hours. Of this number about 725 were spots. We landed about 775 trout; averaging 1½lbs. a piece during the four hours. Our boatman said that we made that day the finest catch of spots that he had known for years. The water seemed absolutely alive with fish. The trout bit somewhat lazily. They would follow our bait to the top of the water and play around it as it came out. They seemed to be in search of live bait, while we were using cut fish. The next day we returned to the Oregon Inlet to the same ground with four boats, and on that day caught over 300 trout. The boats were anchored within 25 or 30ft. of each other.

On the last day on which we went to the inlet we only reached the ground in time for about fifty minutes' fishing; but it was the greatest fifty minutes' fishing that I ever had on this earth. The water was literally alive with trout—magnificent fellows. They were hungry. They bit as though they meant to tear hook and line and reel to pieces, and they did it. In those fifty minutes I lost six hooks and broke a new bamboo rod. In those fifty minutes my wife and I landed twenty-five magnificent trout, the picture of which accompanies this sketch. We lost of course many, which we did not land through the weakness principally of the catgut leaders, which were only three-ply and were not sufficiently strong for the fish we were handling.

On this day's experience I had demonstrated for me two facts beyond any question.

First, that the only hook that should be used in fishing for trout is the pearl weakfish squid hook. I had on my line, on this day, for the first time those hooks. Above the squid hook I had the ordinary New York trout hook. I invariably caught the large trout on the squid hook, and the small one on the plain hook. I found, as a fact, that the large trout would only bite at the pearl squid. The reason of it is very simple. When this hook is attached to the line with the swivel, the action of the tide causes it to revolve and it flashes in the water like the sides of a minnow. Trout that weigh over 3lbs. are looking for live bait. They pass by your ordinary hook, however well baited. I caught several trout on this trip weighing over 3lbs. Invariably they bit the pearl squid. I had fished on the same ground for two weeks with the ordinary hook and had never landed a trout weighing more than 2¼lbs., but on this day the largest one caught measured 3ft. in length and tipped the scales at exactly 5lbs. This fish is seen in the accompanying photograph on the end of the string. He made a magnificent fight.

It was in landing this fish that I also demonstrated for myself the merits of the automatic reel. I had bought one with fear and trembling and many misgivings about its pretensions. I will never use any other. It is everything that its manufacturers claim and more. Its action is simply superb. The man who invented it is a philanthropist. It is impossible for any fish, however swift, to get an inch of slack when hooked on that reel. When this magnificent trout, weighing 5lbs., snatched my hook, he went witch such force that my boatman cried to me in warning that I had caught a shark. I told him I thought not. I knew from the action of the fish, his motion was so swift, that it could not be a shark. He ran without stopping, save to snatch the line, as he ran for at least one hundred feet, going to as deep water as he could find. I saw that he would strip the reel if I allowed him to go further, and I lowered the brake. He continued to strip the reel, dragging the brake as though there was nothing in his way. He ran with the drag for 25ft. further perhaps, when I seized the line and stopped him, raising the brake at once lest he should start toward the boat. I began to force him in. I forced him in 50 or 75ft., and he again made a break and went nearly to the limit of the line. I again forced him in, and he bolted out a third time. I then brought him in, and standing up on the edge of the boat I gave him a very careful swing and landed him in the bottom. So delicately was he hooked, that no sooner had he touched the boat than the hook immediately dropped from his mouth. With any other reel than the automatic, which made an inch of slack impossible, I should have lost this magnificent fish, and would only have had the pleasure of dreaming of what might have been. I suppose during the month of August I landed a thousand fish with this reel, losing fewer than with any reel I ever used.

If any man desires to leave civilization as a memory, and find man heart to heart in his native independence, and nature in all her virgin wildness and beauty, let him go to the sound waters of North Carolina. It is unknown, unexplored, untouched, in its immense possibilities.

Along this wild sandbar, that extends the length of the State, every seven miles are found the United States Life Saving Stations. To these stations the wandering fisherman or huntsman is ever welcome. When you anchor near one of them the captain comes down with his cart and bids you welcome. He abides with you, he talks with you, he helps you fish, he catches bait for you, he will catch clams and oysters for you, he will provide. He will persuade you to stay longer, and you can lodge with him as many nights as you please and it will not cost you a cent. These stations, many of them, are on desolate islands, on which there is not a human habitation, save at the station itself, and all around stretches the wild waste of storm-swept sands and the roaring surf. Here civilization seems like a nightmare, and life in a great, steaming, filthy city comes back to one as the memory of a night of half fever and half delirium.

As I talked with those simple, generous fishermen, I thought to myself, after all, this is life. Here life is worth living. I left Nag's Head like a child sent back to its hard, unwelcome task. I felt like resigning my work and building a cabin in the sandhills and spending my life there. The people are kind and generous and poor, but they are independent to the last degree. They are lords of creation. If you should tell one of them that he overcharged you for his boat the chances are that he would throw the money in your face, turn on his heel and never speak to you again. They do not overcharge you. You practically make your own terms. A more delightful place for any man to spend a summer I cannot imagine. The fly and the mosquito are unknown objects at Nag's Head.

This is not a hotel proprietor's yarn. It is a literal fact to which I bear cheerful testimony, having tried it through the months of July and August.

The finest trout fishing of the whole year is the latter part of September and the early part of October. I write this with the hope that some happier man than I, with fewer cares, can go down and take up the good work where I left off.

There is no such thing as failing to catch fish in these waters any day, with any wind or any tide. You may not catch one variety, but you will catch another. We never went fishing this summer without catching fish, and without catching more fish than could be brought home in an ordinary New York fisherman's basket. My fishing basket was of no earthly use to me, so far as carrying fish home was concerned. Nor is it possible to exhaust the fish in these waters. The natural formation of the sounds and inlets is such that the fishing is always good. It has been the same for a hundred years; it will be the same a hundred years from to-day perhaps. The inlet is very narrow, the channel much narrower, and for twelve miles along Roanoke Island all you have to do is to anchor your boat in that channel and any day, with any wind or tide, you are certain to catch something. This channel is only about 150 to 250ft. in width and twelve miles long.

If I am alive when another summer dawns my address will be Nag's Head, Dare county, N. C.

This whole region can be easily reached by addressing Tom Crank, Collington, Dare county, N. C. Tom keeps an open house. He charges you $1 a day for board and boat. Give him ten days' notice any time and he will meet you at Elizabeth City, N. C., with his sloop and take you down.

NEW YORK CITY.

### Mastigouche Caribou.

A MEMBER of the Mastigouche (Canada) Club writes: I believe there must be a good many caribou on and about the property we have under lease from the Government, as during my fishing trips from one lake to another I have seen their tracks about some of the lakes as plenty as if a drove of cattle had been over the ground. Of course, half a dozen animals could make a great many tracks if they remained in the vicinity any length of time.

A.

## AT HEMLOCK LAKE.

It so happened that my usual summer outing at Hemlock Lake went by default this year of grace 1892. Things did not work right and July and August slipped away and still found me at the "old stand" selling books and stationery.

Now my friend Theodore is a hard-working young printer, whose vacations are not numerous, but who has the love of nature in his heart as pure and strong as any Thoreau or Burroughs. We often walk together of a Sunday afternoon along paths known only to ourselves, and talk of trees and birds and flowers, forgetting the busy town below as we wander near to nature's heart. There is an old prostrate log on the banks of Mill Creek cunningly concealed by a natural bower of fragrant hemlock boughs that Theodore and I fondly fancy no one knows. Here we often go and watch the sparkling water rippling at our feet and talk and plan like schoolboys rather than sober business men. Here we sat one Sunday afternoon in waning August nibbling at some wild plums we had picked up on the way. I was lamenting the fact that my vacation had been denied me, and Theodore was consoling me with brotherly sympathy. Finally he said, "What is the matter with Hemlock Lake in September? Isn't it just as beautiful then? The fishing must be just as good and the shooting is certainly better." "I never thought of that," I answered, "could you go with me?" "Let me see; we are getting out a big job for an out of town party, but I think I could get around by the 15th," said he hopefully. "That would suit me exactly. Schools would be well started by that time and I could leave business to the clerks," and the more I thought of it the more enthusiastic I got. Theodore shared my enthusiasm and in less than three days we had the whole thing planned, our lists made out, and were only waiting for the day of departure.

Our destination was Major B.'s cottage on the west side of Hemlock Lake. He kindly turned the keys over to us, told us where to find a convenient woodpile, said "Use all the ice you want and help yourselves to the boats." So on the long-waited-for morning we loaded our traps into Charley S.'s big covered wagon, and with my nine-year-old boy as ballast and a promise from the madame to come over Saturday and help us out, we started on our fourteen-mile drive for the lake. The morning was perfect, the horses in good condition, the tobacco fragrant, and as we bowled away we shed our cares one by one and dropped our years along the wayside, until at the third mile post it was a question which of we three—Theodore, the boy or myself—was the younger. How yellow the golden rod gleamed along the fences and how friendly the purple asters nodded as we passed. Shiny red apples glowed in the orchards, and every dooryard held its quota of purple plums, late peaches and ripening grapes. The aftermath stood thickly in the pastures and the buckwheat looked ready to cut. Barns were bursting with garnered products, and the land responded to our happy hearts with peace and plenty.

The sharp eyes of the lad first caught the glimmering sheen of the lake while yet five miles away. Only for an instant it sparkled a far-off welcome, then an intervening hill hid it again. Entering the lake valley we passed the little hamlet where one cuts loose from post offices, railways and newspapers, and three miles more brought us to the lake. Then a mile and a half down the shady road, where the waves almost lapped the horses' feet, and we were at the Major's barn and boat house, where, biddiug our driver good-bye, we got out a boat, blew the horn, which brought Hank across at once with another boat, and with our list and ourselves stowed away, we were soon dancing across the water in the yellow September sunlight.

Hemlock is the purest gem in the western New York chain of lakes, 7 miles long and a half-mile wide, with a depth varying from 40 to 90ft. The city of Rochester obtains its water from it, through conduits 40 miles. So abrupt are the shores that this lake still preserves its original wildness, and the hills on either side lifting up their heads a thousand feet, are clothed from base to summit in unbroken forest. Probably 150 cottages are scattered along the 18 miles of shore line, but as there is no railway within 6 miles and no big hotels, the rabble don't get here, and quiet reigns even in the height of the season.

The major's cottage is a model of its kind, and, like everything else of his, is first-class in every particular. "Comfort Cove" he calls it, and the forest swoops down upon it from the mountain in the rear to the very back door, and swings its circling arms on either side down to the water's edge. It did not take us long to store our stuff in the cellar and refrigerator, make up the beds and get a good dinner of mutton chops, boiled potatoes, coffee and cake. How strange it seemed to be able to call the mellow hours of that first afternoon all our own! Getting in the boat we pulled down to Mr. R.'s, a fellow-townsman who, with Hank, his man-of-all-work, was putting the finishing touches on his beautiful cottage. We invited them down in the evening to play "Pedro," and pulled lazily back to compete with the lad at shooting with an airgun, at which sport he beat us, and we never murmured. The game came off as advertised, and our first night at the lake we slept like tired schoolboys.

This is no narrative of successes with the gun and rod. The lake is fairly well stocked with bass and trout, and we trolled quite enthusiastically the first day or two, but luck being scarce and bacon and eggs plenty we let it go. I brought my 12-bore breechloader with me, and being awakened one morning by the bark of a gray squirrel I was up and in the boat sneaking along the wooded shore rowing bow-faced with my gun on the seat before me. Carefully I stole along, peering into ever thicket and treetop into which the morning sun was now streaming. I had reached the point above the old cellar, when a rustling in the bushes attracted my attention. My gun was ready in an instant. Something red gleamed through the leaves and I covered it fairly. Again the red showed vivid to my straining sight. "Pshaw! red squirrel," I exclaimed, lowering my gun; then came the *quit, quit, quit*, of half a dozen startled grouse, the red blotch disappeared and a covey of full grown birds dodged into the woods before I could drop the oars. I had resumed and pick up my gun again. Of course I was disgusted, and many a sly laugh was indulged by Theodore, Hank and Mr. R. at my expense when I truthfully told the tale. But I did get enough black and gray squirrels for a good full meal.

Saturday the madame came, bringing baskets of provisions and a respite from dish washing; but having gotten our hands in we, nothing loth, helped her all we could, and she enjoyed our excursions as well as we ourselves.

Hank, Mr. R.'s man, was a character. With muscles of iron he would drive a boat through the roughest water at a wonderful speed. He could turn his hand at anything, from helping Mrs. R. about the house to building an ice house or putting up a lattice that would be a credit to a master mechanic. He would hunt sassafras bark, "whisper," as he would call it (yelling like a foghorn), for the amusement of the young people, and make himself so generally useful and agreeable that everybody, young and old, on Hemlock swore by Hank.

Two meals and a lunch was the order of the day at "Comfort Cove." Dinner at 2 P. M., then across the water to the east side and possibly a stroll two miles down to the "Half-Way House," where a drink of cold sulphur water from the big spring and a few purchases at the little depleted store, with the walk back at sundown, rounded out the day completely.

Incidents, trivial in themselves, were constantly occurring to break the even tenor of our outing. The great wooded hill opposite our cottage was green as at midsummer when we came, but soon it began changing so rapidly as to offer a new vista every day. First there appeared blood-red blotches shining through the green, where the ripened dogwood hung out its flaunting banners. Then the soft maples with their subdued scarlets, followed by the hickories with their warm yellows, joined the procession, and within a week the whole mountain was variegated as one of Turner's wildest canvasses. How we enjoyed sitting in the wide verandah and drinking in this wonderful array of color. We had one genuine rainy day, so foggy and misty as to hide the shore. Chilly and damp, the porch was far from comfortable, and we built a cheerful fire in the living room stove and read and wrote and yawned and longed for the sunshine, which came again at evening, when the clouds blew away and a few beams from the setting orb gave sure promise of a bright to-morrow.

Hank had a boat he built for Mr. R. to carry heavy loads of material used in the construction of the cottage. It was a heavy flat-bottomed scow, painted red, with a pair of sweeps no man but Hank could handle. Theodore christened this craft The Red Rover, and one day we all took a trip in her to the head of the lake for a load of sawdust. The wind was dead against us going up, but Hank at the sweeps sent her snoring along, while the crew encouraged the lusty oarsman with flattering compliments touching his great strength and brawny breadth of back. Arriving at the sawdust bank, we kept the bushel baskets flying and soon had our craft loaded to the gunwale. Distributing ourselves in a row along the ridge in the center, the sail was hoisted and home we sped, making the mile and a half in the unprecedented time of one hour and a quarter!

At first it seemed that bird life at Hemlock was very meager for such beautiful weather, but as we waited our feathered friends began to show themselves more plentifully. The harsh discordant screams of the blue-jays smote our ears throughout the day, and once I heard that "low tender wheedling song," mentioned by Maurice Thompson in his delightful "By-ways and Bird-notes." With characteristic wariness they held aloof from our haunts, although we caught occasional distant glimpses of their brilliant plumage. Chickadees were constantly near us varying their usual notes with an occasional *phebe*. What an exquisite bit of melody this is! How endearing, how divinely sweet! The *avant courrier* of the ice king, the little slate-colored snowbirds, were abroad flaunting their white-in-tail defiantly and with icy suggestiveness in their metallic chirpings. The occasional drumming of a partridge conveyed to us one of the manifold secrets of the forest, and we could immagine the ruffed old autocrat performing his mysterious resonant rites on some well-trodden log. The owl serenaded us regularly with his weird nocturne, and once we saw His Owlship flitting on noiseless pinions from his perch on our cellar door. The high-hole helped to enliven the yellow September sunshine with golden glints. A clatter and a flash of blue from the halcyon. And once—was I mistaken?—I thought I heard a belated fragment of melody from the flute of a hermit thrush.

One day an old sheldrake came wheeling up the lake, but apparantly not satisfied with the prospects of food and company, went off again. Of course there was the usual crow convention among the hemlocks far up the mountain side, and hawks wheeled in great circles over all.

Our kitchen door offered great attractions to the chipmunks, and they were constantly flirting with our cook who used every device to gain their confidence, but just so far would they come, when at the slightest movement away they would fly to their safe retreat under the dead hemlock. Raccoons and black, gray and red squirrels lent their voices to our nightly and daily concerts, supplemented by the notes of frogs, tree toads and myriads of insect life.

A faithful hound who, having lost his master, set up a mournful howl on the other shore, drew us across, and the old fellow seemed as glad to see us as though we were in kind with him. We petted him a few moments, fed him, and down the road he went with a farewell wag of his tail, and we saw him no more.

And so the days went by, happy, care-free and full of incident and health. I had saved up my FOREST AND STREAMS for several weeks, not even breaking the wrappers, and these, with "Sam Lovel's Camps," "By-ways and Bird-notes," and a lot of summer literature belonging to the cottage, kept us busy between times. We finished up the "Camps of the Kingfishers," laughed at the lady in the photograph (issue of Sept. 8), who, "Out for Sport," saw no incongruity in her rubber boots and delicately trimmed hat. Imagine that hat working its gorgeous way up a trout stream! We had read "Sam Lovel's Camps" over and over in the past, but somehow our environment lent a new charm to those fascinating leaves, and we laughed at Samwell, Joseph, Antoine and the rest as we never laughed before. Theodore ventured on one of Mayne Reid's stories, "The Rifle Rangers," I believe, and he solemnly declared next morning that his sleep had been murdered by visions of Mexican banditas, tropical scenes, fierce battles, and fair senoritas, which fact I considered a great compliment to the powers of delineation of the late Capt. Reid.

We finished our unadventurous outing at Hemlock Lake Sept. 26, firm in the belief that we selected just exactly the right time and the right place. Possibly fortune favored us out of the ordinary in the matter of weather, for it was simply perfect, and the day before we left we took a dip in the lake, which is very unusual so late in the season. Now our hope is that another year we may repeat the outing. H. W. D. L.

## CRABBING TIME.

In these crisp October days of warm sunlight and mellow winds that sweep the stubble and bare fields, one must be always astir. From early morning till dusk hides the meadows all nature is aglow with life; the meadow larks and yellow-hammers are flocking, and haunt the buckwheat fields and tangled brier patches; smaller birds are preparing for their southern pilgrimage; Bob White whistles from the orchard hard by where a ringing axe is felling a dying tree. We must not idle away hours of golden autumn when all the waving golden rod and asters seem beckoning us away.

To the creek! To the creek! With oars and light strong net slung over on shoulders we take down the weedy path through the brown pasture, where the solitary woodchuck sunning on the hillside stops munching his apple to watch us pass. The old skiff lies high and dry among the reeds left by the last fallen tide. A push and she's afloat again on the incoming flood, that barely covers the flats and moves the bending eel-grass. If we would net the wary crabs silence is needful and the boat must not rock, lest the widening ripples hide our prey.

Gently we drift over the shallows, eyeing the bottom sharply far ahead. There, like a gray shadow fleeing across the mud, shoots a crab! He buries himself in yonder clump of seaweed, where just one blue and white claw protrudes to betray him. Strike straight and just in front of him and draw back with a scooping motion. Splash! You have missed him. No! There he lies in the net, helplessly kicking and savagely snapping at the stout cords. The net is overturned and he falls into the boat, where he scurries aimlessly about till a fresh victim joins him and the two do battle in foolish rage. The depth is just right, only a foot of clean green water beneath, through which one can clearly see every pebble and shell.

This catching crabs without bait is called "jabbing." Long practice is necessary to insure reliable "jabs," though even the beginner bags a goodly number if the day is good and the tide just right. Joe here is a famous hand at jabbing. Right and left his net darts, sometimes two and three come up at once. Here and there a "shedder," or crab whose shell has been shed, called soft-shelled, is captured. These invalids are always accompanied by a big, hard-shelled protector, whose duty is to defend his charge from the eels and other crabs. Fish of all sorts find the "shedder" a dainty creature and a morsel that is always relished. To see two huge "blue-claws," as the male crabs are called, fighting, is not unusual. Circling around one another, their claws clash together fiercely as each endeavors to strike the other's back. Often one loses a claw and scuttles away ignominiously to the sedge, where he will dwell in seclusion till another member grows. As the tide rises and the depth increases it is harder to "jab," for the net is unwieldy in so much water. Now one may drift along the banks, catching many a loiterer clinging to the mud or seeking food on the edges of the creek.

Flood tide is at its height. The brimming banks are covered, and we anchor at a spot where an island makes an eddy in the tide. Bits of meat about three inches square are fastened to cotton twine and thrown out for bait. Greedily the hosts attack this new attraction, sometimes three or four tugging at one line. Gradually they may be pulled in till under the boat, when raising them to the top Joe scoops them in. Not so much skill in this, but it catches the crabs in numbers. It is noon, with a burning sun now above and the glimmering creek stretching away before us. The plover have ceased their piping call from the uplands and the bitterns have sought the shady bogs. Eagerly we get out the lunch basket and leave the crabs to also enjoy a meal at the lines while we are busy. While we chat together there comes a tug and one of our lines breaks and disappears. It must have been a loggerhead turtle or a very large eel, both of which swarm in the creek.

With the ebb we drift down stream, "jabbing" as we go with good results. You will notice that we overtake most of the crabs as they are making their way back to the sea. They are but visitors and come and go with the tides, except a few which the receding water leaves in the small inlets or deeper pools. We drag the boat ashore and count our spoils. Ninety-six of them sprawling, scrambling and biting, are sent flying into the sack which Joe holds open. Damp seaweed is dropped in with them to keep them fresh, and we plod up the hill, sunburned and tired, but happy as only successful crabbers can be. Try it yourself; leave the city for a day, and in any of the shallow creeks and bays that open into the Hudson or off any of the New Jersey flats you will find our many legged friend the crab. A dry boat, a light net, some substantial lunch and some bait make up the outfit. Night will bring you back to the dusty streets with springing step and ruddy cheeks, a bag of fine crabs and a firm determination to go again. H. PRESCOTT BEACH.

## ROD AND GUN AND CAMERA.

As a recognition of the important place of amateur photography in its relation to sports of the field and prairie and mountain and forest and stream, the FOREST AND STREAM offers a series of prizes for meritorious work with the camera. The conditions under which these prizes will be given are in brief as here set forth:

There will be ten prizes, as follows: First $25, Second $20 Third $15. Fourth $10. Six of $5 each.

The competition will be open to amateurs only.

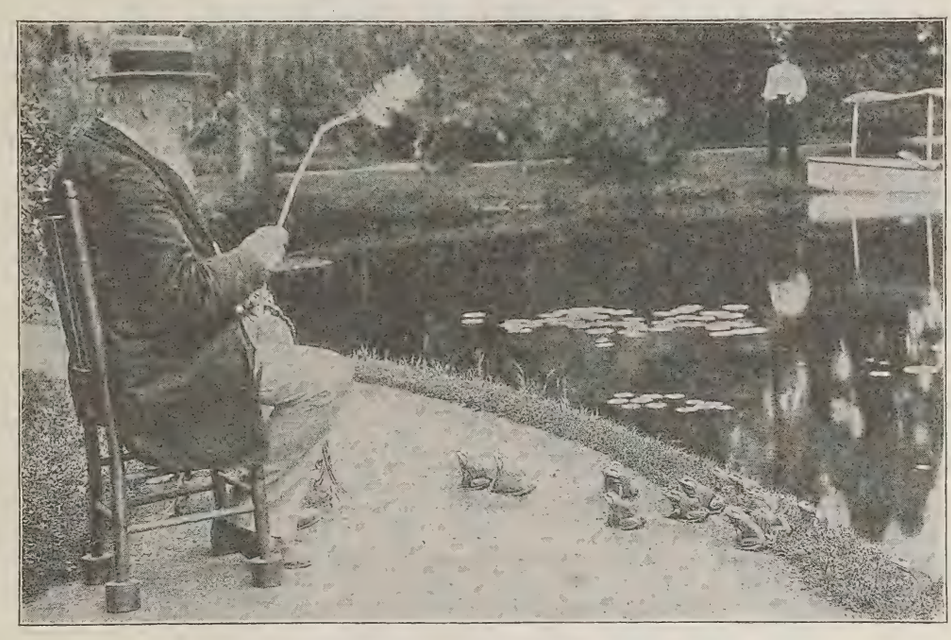
The subjects must relate to FOREST AND STREAM'S field—game and fish (alive or dead), shooting and fishing, the camp, campers and camp life, sportsman travel by land or water.

There is no restriction as to the time when the pictures may have been or may be made—whether in 1892 or in previous years. Pictures will be received up to Dec. 31, of this year.

All work must be original; that is to say, it must not have been submitted in any other competition, nor have been published.

# Natural History.

## MR. JEWELL'S FROGS.



HARTFORD, Conn., Sept. 21. — *Editor Forest and Stream:* I inclose you accompanying this letter some photographs and a description thereof published in the Hartford *Courant*. I don't know as it would be of any special interest to any of your people, but as I have noted for a good many years in reading your esteemed journal, that matters of this kind interest a very large portion of your readers, I have sent it to you that it may be one more fact in the very many very curious things in animal life. We may go back to the Proverbs for an axiom, "The ox knoweth his owner," etc., and it would almost seem as though the frogs represented in these photographs had certainly intelligence enough to know when dinner was ready and to come to the ringing of the bell. L. B. JEWELL.

We reproduce one of the interesting photographs; it shows thirteen at table. The *Courant* says:

Pliny Jewell, Esq., of this city, at his beautiful home, on Farmington avenue, has some of the queerest "pets" that were ever trained, and those of his friends who have been privileged to see him feed his bullfrogs remember the occasion for the rest of their lives. They tell here and there of what they have seen, and many people who hear them laugh at the story as ingenious fiction. But it is all true. They cannot exaggerate either the solemn manner or the capacious appetites of these queer and knowing frogs. A representative of the *Courant* recently took in the whole entertainment and a photographer snapped instantaneous views of the frogs as they sat about waiting to be fed. These pictures are reproduced herewith and must carry conviction to the most skeptical.

Back of Mr. Jewell's house is a small pond, full of lily pads, grass-bordered, with a gravel path about it. Red goldfish gleam in the water. Here and there a turtle's head lies still on the surface. But the inhabitants and rulers of this province are the dozen or more bullfrogs that have lived there for six years past and whose whole bearing indicates that they own the pond and know they do.

They are simply monstrous—great, fat, unwieldy looking creatures, but whoever thinks them as stupid as they look makes a great mistake. They know what they want and they get it. Three times a week, at 5 o'clock in the afternoon, Mr. Jewell feeds them their favorite article of diet, live mice. Promptly by 5 o'clock on those afternoons the hungriest are up on the bank waiting for him to come to his regular seat by the path. When he rings a bell the rest of them come swimming along from all parts of the pond and climb up beside the vanguard; the goldfish that also hear the call come swarming up to the shore, for they are to be fed, too, and the blackbirds and robins, hearing the bell, know it means crackers for the fish and that if they are prompt about it they can get their share, and so they come flying to the pond, too. It is a queer sight—the fish in the water, the birds in the air, and the frogs in one element or the other as they prefer.

FIVE O'CLOCK TEA AT MR. JEWELL'S FROG POND.

From a photograph.

The frogs cluster around Mr. Jewell and squatted on the grass watch eagerly for him to hold out to them the stick in which they are so deeply interested. It means a royal dinner to them. Just to get up their appetites he holds the plain rod two or three times first, and those who are hungriest jump for it as if it was already baited. Thus they get into training. Then the tail of a live mouse is slipped into a crack in the end of the stick, and held out over the frogs that are drawn up around and in front of their master. The mouse squeals once or twice and kicks a little and suddenly up goes a frog, his legs spread out in jumping fashion and his immense mouth opened to its widest. He closes on the mouse and by his own weight pulls it off the stick. The moment he lands from his leap he jumps madly into the water with a "clug," and, lying there, spread out on his own stomach, swallows his meal with every evidence of complete satisfaction. If the mouse happens to climb out of the frog's mouth, it swims away in safety. The frog doesn't try to catch it in the water. Another queer fact is that, while the frog will jump for a dead mouse as eagerly as for a live one, he will not eat it. As soon as he gets back into the water he spits it out. He knows what he wants and it's that or nothing.

On the day when the *Courant* had the opportunity to study this queer entertainment fourteen great bullfrogs were ranged in front of Mr. Jewell on the shore of the pond. They climbed up from the water, jumped across the grass, and with their eyes firmly fixed on him and his wand, settled in the path. "Grover Cleveland" is the biggest of the lot and headed the procession. He wears a full 19in. collar and takes everything he can get. On this particular afternoon he swallowed three mice and was evidently mad that the supply gave out so soon. He wanted more. "Dave Hill" is another big fellow, and he tries to get Grover's prizes from him when he can. "Tom Reed" is another autocrat of the pond. He is the only Republican in the collection; but he knows no fear and gets his full share every time. One of the funniest scenes is when several frogs jump at once for the same mouse. They go through the air very much as they do through the water, with no end of sprawling legs hanging behind them. They jump in different directions for the same mouse, and they meet with a dull thud in mid air and fall to the ground wondering what hit them. Then some fellow who kept out of the scrimmage steps up and carries off the mouse while the others are trying to make out how they missed it.

On this afternoon they exhausted the entire supply of mice on hand, 25 of them. Mr. Jewell can't raise mice enough to meet the demand, and has a standing offer of 5 cents apiece for all mice delivered to him. Whether this tends to rid the city of the vermin or offers an inducement to breed them is open to argument.

There are only two varieties of frogs in the pond. One kind are green and the others dark brown or red. One family was brought down from New Hampshire, and the others are members of the old historic and aristocratic family of Windham frogs imported from the famous frog pond there. The frogs breed, but do not increase. So far as known only two young ones have grown up. The trouble is that young frog is about as appetizing as live mouse to the big frogs, and they eat up the little fellows when they reach the suitable size. No one can doubt that the frogs love their children, but it is not a very self-sacrificing affection.

The frogs are very fond of birds, too. One day a sparrow skimming along the surface of the pond passed close to the nose of one of the old inhabitants. Quick as a flash he opened his mouth and jumped from the water, and the bird disappeared. He had made a swallow of it. This incident, which is fact (people watched the performance), recalls the performance of a frog on the lawn at Armsmear, Mrs. Colt's home, some years ago. He grabbed and swallowed a robin that hopped up close to him. Down the bird went, feathers and all. At Mr. Jewell's sometimes when mice are very scarce, English sparrows are substituted. The frogs take them unless the birds are dead and cold. They have no more use for a dead bird than for a dead mouse.

If any kind-hearted housekeeper thinks feeding of live mice to the hungry frogs is cruel, let her stop a moment and reflect on several things. In the first place, she believes in destroying the mice as heartily as the frogs do. In the second place, her way of doing it is to set a spring trap that will catch the little fellows by the neck and choke them slowly to death so that they suffer a long time. The frog trap works instantaneously and is in the line of nature. It is no more cruel than the whole procession of natural events, and, from the point of view of the frog, is a kindly and welcome provision.

### The Linnæan Society of New York.

REGULAR meetings of the society will be held at 8 P. M., at the American Museum of Natural History, Eighth avenue and Seventy-seventh street: Oct. 5.—Paper by Mr. Jonathan Dwight, Jr., "Some Remarks on Kansas Birds." Oct. 19.—Paper by Mr. L. S. Foster, "The Spring Birds of the Vicinity of New York City."

ARTHUR H. HOWELL, Sec'y.
212 MADISON STREET, Brooklyn.

### A Snake Plague.

TORONTO, Sept. 27.—*Editor Forest and Stream:* I was greatly interested in the information conveyed by the inclosed cutting which is taken from the Toronto *Mail* of the 21st inst., coming, as it did, while attention was still to some extent taken up with the late "snaky" discussion.

RALEIGH, N. C., Sept. 20.—The drought in the southeastern part of the State has caused some of the swamps to become almost dry, particularly in Brunswick county, and the monster rattlesnakes peculiar to that section have crawled all through the neighborhood. They have bitten and killed a white woman and three negroes, and have also killed scores of horses, mules and cattle, as well as great numbers of dogs. The snakes crawl into or under houses, and cattle are now kept in pens to protect them. Many persons, thoroughly frightened, have moved away from the vicinity of Smith's swamp, near Waccawan. Rattling can be heard there at all times, and immense serpents are killed in the roads, some over six feet long and three inches thick. Such a plague of snakes was never before known in this State.

Surely now, with such an excellent field for observation, all vexed questions in this connection will be settled forever. The rattlers will, I am sure, do all in their power to afford every opportunity for an accurate test as to their peculiar methods of doing business. SERPENT.

## AN INTERVIEW WITH A PANTHER.

*Editor Forest and Stream:*

As panther stories are in order, I will give you an extract from my diary about an interview that I had with one in the woods between Vancouver and New Westminster, B. C.:

Dec. 19, 1887, with my 10-bore Greener, I was taking an outing in that forest. From the coast I struck an old timber trail that led me to a small clearing, where there was a deserted house with weedy garden plot, surrounded by several acres of heavy fallen timber, that lay as it had fallen, the logs piled across each other in all directions. Near the path and but a short distance from the house was a large cedar stump at least 10ft. high. The tree had been cut down from a staging or platform such as are commonly used by the Pacific coast lumbermen in felling large timber.

In the house I found a small ladder, used to go up to the sleeping loft—this I used in mounting to the top of the stump, which gave me a good view up and down the trail and over the fallen timber. The day was warm and everything was quiet and still, and not a living thing was in sight.

I stretched out there in the sunshine and amused myself by making the adjacent woods ring by imitating a pig's squeal. In a few minutes I glanced around me and saw standing on a log not over 100yds. distant, a sight that made me wish that I had taken my rifle instead of my Greener, for there, partly headed toward me, stood a panther—or, as they are called in the mountains, a mountain lion—gazing at me. There was but little of the majesty of the lion about it, at it stood there, a long, lank, lithesome, cruel, sneaking looking coward. A long, slim neck, round head, big eyes, hollow-backed, with belly hanging within a few inches of the log, high hipped, a long tail curved downward with the end turned upward, which was convulsively twitching, the only sign of life about it. Its color, a dirty tawny yellowish brown. A big sneak cat.

We watched each other seemingly at least a quarter of an hour, when, without taking its eyes from me, it slowly reached down one forepaw to the log below and gradually disappeared from view. After another half hour's watching and seeing no further signs of it, I left my perch and started back down the trail. There was a fringe of thick bushes between the trail and the fallen timber on the left; and at the right hand was the dense forest. I had not proceeded on my way over 100yds. before the panther sneaked out of the bushes into the path about 75yds. in front of me, and there stopped side on with head turned toward me, with its slouching belly nearly touching the ground. It looked as one often sees a cat look when it steals out from some gateway and stands looking down the street ready to skulk away to some other hiding place.

With gun in position I started toward it. Sinking its belly down to the very ground it started across the trail. I gave it a right and left, the two reports of my gun nearly blending into one. The smoke hung for a moment in the heavy atmosphere, hiding all in front of me. When it lifted no panther was seen or heard.

I reached the hotel at dusk with age renewed from my outing, and with a good appetite for my dinner. Then came regrets, "If I had only taken my rifle." Well, if I had done so, I would have missed some rare sport earlier in the day, and later on would have killed some big game that would have prevented me from visiting the old clearing, where I saw the "sneak cat"—the cat that has no voice, excepting a growl and a short spiteful "yik," notwithstanding the many reports about their terrific screams, which are all myths. The sounds are made by other beasts or owls. STANSTEAD.

HIGHGATE, Vt.

## DAYS WITH THE UPLAND PLOVER.

There are birds that have a peculiar attraction for the lover of the field, though he can hardly tell why. Small as is Wilson's snipe there are few who count a day with gun as one of the milestones on life's journey who would willingly dispense with this charming bit of animation. Yet who can tell why he feels a strange thrill as he nears the meadow from which he expects this little bird to spring?

Next to Wilson's snipe no small bird ever had for me such an attraction as the upland plover. It seems but yesterday when its strange, penetrating note first fell from the summer sky upon my childish ear. So tender, yet so searching was it, so different from all the ordinary sounds of earth, what wonder that I stopped and scanned the horizon long in vain before discovering far away on high this happy soul speeding across the dome of blue more like a messenger of Jove than a creature of earth?

Never can I forget those days when first old enough to be trusted with a gun, when the bugloss spread its blue across the rolling pastures and the air was redolent of mint, when the leaves of the dewberry were turning from red to brown, and the blue of the vervain was fading, when the mutterings of thunder were almost over and silvery clouds hung low along the horizon, when a softer stillness lingered in the groves and a milder radiance played along the hills. The spots on the breast of the young robin were beginning to fade into red, hushed was the bobolink's bubbling joy, and the mellow call of Bob White came more seldom across the meadow. From the stubbles the doves were rising with whistling wing, the highholder was pitching from one wild cherry tree to another in search of the few cherries that still were left, and the young meadow lark that sat on the fence where the white sepals of the clematis were shining along its climbing stem could no longer be distinguished from its mother. All these for me in early days were great game. But I lost almost all interest in them from the time the soft notes of the upland plover first found their way to my soul.

In the Western States this bird was a few years ago very tame. I have driven by it in a wagon while it sat quite unconcerned upon the fence beside me. So simple were they in many parts not over twenty years ago that there was no satisfaction in hunting them.

But in New Jersey as far back as forty years ago it was a vastly different bird. Almost any one familiar with the uplands of the greater part of the State would at that time have taken the contract to get forty quail, twenty woodcock or a dozen ruffed grouse in a day rather than a dozen upland plover. Not only were the birds distributed over an area that made much tramping the price of a few good shots, but they seemed to have an innate knowledge of the range of a gun almost equal to that of the sandhill crane of to-day. At long intervals a sound like that of an angel breathing into a silver flute struck a strange chord within you, and while you stood wondering whether it dropped from the sky or came up from below the horizon's verge, you saw, perhaps, a fine wisp of gray mounting from the grass far out of shot and aimed away upward, as if bound for the stars. And just as you thought its prospects good for reaching its destination there broke upon your ear, louder, clearer, yet softer than before, that strange ripple of sound that rivals all the marvels of acoustics, beside which ventriloquism is ridiculous and the wonders of whispering galleries contemptible. So near it seemed in its liquid purity that you clutched the gun with confident hope, expecting to see another plover within easy shot, and just as you concluded that you saw nothing, there came, more tender yet, even clearer and nearer than before, another pearly triplet of tone, as if another bird had risen near your feet.

Can it be that so much energy is lodged in that little plover winding away on high? How can sound so light be so far reaching, or sound so sweet traverse space almost like the thunderbolt, with so little loss of power?

So you used to think while again perhaps the sweetness fell more penetrating than before. Yet you might scan earth and sky without finding other source than the bit of frail machinery that under the edge of some distant cloud seemed to need all its energy to maintain its velocity. Sadly you trudge along to the next field, yet was there not a feeling that you had been partly repaid for your trip? I would walk a long way to-day just to see once more that little film of gray skim the distant sky and catch again those pearls of sound that only that little throat can string.

The best shooting I ever had with the upland plover in the Atlantic States was quite by accident. It was in the summer school vacation that I started from the house one day for a short stroll before dinner. I took my gun along with only the two loads that were in it, expecting only to see a lark or a highholder at best. Nearly a mile from the house I left the road and turned into an old pasture to look for blackberries. I strolled along where the white and tender blue of the morning glory were twining above the little clusters of purple flowers of the spiræa, where the little scarlet petals of the pimpernel were blowing among the gold of the toad-flax and the snowy involucre of the spurge was lighting up the ground where the soft blue of the bluets was fading, when suddenly, on nearing the further side of the field, I heard a triplet of melodious notes so soft that they seemed to fall through a mile or more of air.

Though I had not up to that time been able to locate this bird within a mile or two by its note, I could see more out of one corner of my eye than now, and a line of gray flitting just above the top of the corn across the fence and scarcely thirty yards away captured my attention at once. Quickly I turned the gun upon it, and when the smoke cleared away there was nothing there but the corn leaves waving darkly green.

Imagine my surprise on crossing the fence to hear that sweet call echoed and reëchoed as if rebounding from the dome of heaven and see half a dozen more lines of gray start from the corn for as many different points of the compass.

I got off the fence in time to stop the last bird that rose and would perhaps have done so but for the reflection that it was my last load and I had no more ammunition with me. That idea made me doubly anxious to make the shot tell, and the consequence was that I soon saw the bird rising above the edge of the smoke and sailing away skyward. But sorrow was quickly swamped in glad surprise as I saw one of the first birds that rose set tling down into the corn some 300yds. away, with two more wheeling around to follow him. I gauged the situation at once. Three cornfields joined at this point, making some sixty or more acres. The birds were probably bred in the adjoining fields, and though old enough to be wary and strong of wing had probably never been disturbed and had not yet left their native heath. They had probably gone into the corn to escape the heat, and as it was about waist high, by stooping low and walking rapidly down the rows one could get within easy shot of most of them.

Great was the speed I made across the fields and down the road to the house for more ammunition. The robin in the wild cherry tree had no time to get alarmed until I was past, and where the bloom of golden rod was just beginning to tinge the white sheets of the wild carrot I almost ran over the meadow lark before he suspected there was danger. The scarlet of the catch-fly and the golden corolla of the potentilla seemed a stream of fireworks as I passed them yet close behind, overhead and far in front seemed the mellow notes of the plover that were hovering over the corn I had left far behind, and on I dashed through mullein and milkweed, scattering purple pokeberries right and left and skipping gaily over pennyroyal, the lingering buttercup and the reviving dandelions that were yellowing along the ground.

Returning with ammunition and out of breath, I went but a few steps in the corn beyond the place where I had picked up the bird I had shot, when suddenly a bit of filmy gray mottled on the top with brown and black appeared among the dark green of the waving corn, accompanied by that mysterious call that always raised such havoc in my young nerves. It brought my gun to my shoulder so hastily that before I knew what I was about it went off. Accompanied by two new lines of gray that rose from the corn a short distance beyond it, the first gray sped away upward amid a full chorus of strange melody, while a healthy cornstalk a few hills ahead of me sank to earth never again to rise.

But I was quick with the gun in those days, often too quick, but not this time. Though I lost an instant with mingled surprise and disgust at the result of the last shot I raised the gun quickly on one of the last birds that rose. Where is there such another moment as when you glance along the iron rib of the gun and find you have raised it at once to the exact spot and do not have to shift it? As I looked along that gun with hasty glance I saw the gray clear cut against the distant sky and in exact line with the rib of the gun and going almost straight away. In a moment more it vanished in a cloud of smoke to appear again below it, gyrating to earth in a soft whirl of white, gray and brown, while its comrades sped away on high, their notes falling louder and sweeter as they seemed to fringe the clouds.

As with haste I reloaded that old muzzleloader all was silent in the corn except the song sparrow trilling his joyous notes from the fragrant sassafras in the corner of the fence as if conscious that he were already singing beyond his time and must hurry to get in a full season's work, or the goldfinch's tremulous pipe as from patch to patch of downy thistle he sped in a wavy line of gold and black. But the gun was quickly loaded, for with everything convenient the muzzleloader was not as slow a tool as those who never used it are apt to think, and stooping low and going on a half run down the rows of corn I started on.

Before I had gone far enough to get out of breath or excited there was a wild yet tender *ril-lil-wil* somewhere on land or sea or sky, and I swung the gun half around the horizon before I discovered two bits of gray just topping the corn not 25yds. away. What? A double shot on the upland plover? Such fortune I had not before dared to dream of and yet here it stared me in the face with all its paralyzing reality. A double shot on anything was no easy thing for a boy of my age at that time. We were not then born of flame, nurtured with powder smoke and tutored by thunder as many are to-day. Ammunition cost money in those days, and the loading and especially the cleaning of a gun bore a striking resemblance to work. Moreover, we did not see the sublime importance of making mere machines of ourselves or we might have been better shots. Yet there the chance for a double shot stared me in the face with dazzling certainty. Too often such delightful assurance has upset the repose of soul necessary to utilize such opportunities. But not this time; for scarcely did the first bird turn up his white underwear and sink amid the green at the report of the first barrel than, by some mysterious movement so quick that I was unconscious of it, the gun was turned upon the second careering upward as if bound for some other sphere and intending to reach it before dark. Right in line with the two barrels the gray glimmered for a second against the distant sky, and as I pulled the trigger it folded its wings and whirled downward into the corn.

He who has never chuckled over such a shot when a boy or over more difficult ones in later years has missed something in this world. And he who has not been so demoralized by a little too much self-congratulation that he missed the next easy shot that happened to come too close upon the heels of the former success, has also missed something worth living for. I stood there fumbling with trembling hands after caps that would keep in the sub-cellar of my pocket, and that would drop on the ground after I succeeded in unearthing them, until beads of perspiration began to run into my eyes. Then I was foolish enough to go ahead without waiting to compose my nerves, for a boy always thinks game must be picked up at once.

Retrieving the fallen birds, I started on again, stooping low and moving as swiftly down the rows of corn as possible, and had gone scarcely 100ft. beyond where the last bird lay when another plover cleared the corn ahead of me within easy reach. The first barrel wrecked the hopes of an aspiring pumpkin on the ground below it, and where the shot from the second went I never knew. But the bird climbed the summer breeze with never a feather marred, and on the wings of his own bright song was borne well into the zenith by the time I had reloaded.

There was still plenty of corn field left, and at the rate the birds had so far been rising there was probably opportunity enough to repair my shattered pride, and on I went. To my surprise, I did not have to go 50yds. down the row I was in before two more plover rose. They were a trifle far, but I turned the first one over and ventilated the corn leaves all around the second one before I knew anything about the distance, the knowledge of which came to hand just in time to console me for the miss. From that time on I did fair shooting, the rest of the hunt being only a continuation of the first part. I tramped that corn from end to end and got many a shot within 25yds. In less than an hour from the time I crossed the fence I had seventeen plover, all well-grown birds and in fine condition.

As suddenly as it had begun the shooting stopped. Here and there across the topmost dome of blue and along the horizon's furthest rim a dim line of gray was winding out of sight, while, from no one could tell where, came that soft searching sound that seemed never so sweet as when all hope of another shot seemed gone. But not another bit of gray rose above the corn, and vainly on the following day did I tramp that corn until it needed rehoeing to insure half a crop. The birds had learned the game and were once again their own wild and wary selves.

San Diego, Cal.

## A FLYING TRIP SOUTH FOR A DEER.

I left Newport Sunday night, Aug. 21, spent the next day in New York, and leaving Jersey City at 8 P. M. via Cape Charles route arrived at Avoca, N. C., at 2 P. M. Tuesday. Found everything in good condition for the next morning's sport. Tom Webb (the veteran), with his never-failing old deerhound Buck; S. N. Everett, proprietor of the Dukinfield House; Tom White and Jas. Todd (the dead shot of the neighborhood) reported ready for the early morning start. We crossed Salmona Creek just above the Avoca homestead, and each sportsman selected a stand. Sending old Buck accompanied by two other deerhounds in, we had waited but a short time before we heard the familiar note and knew that a trail, evidently warm, had been struck, warning us that we might see game at any moment. In less than a half hour there came bounding through the underbrush a handsome young buck, dashing past Tom White. His gun was heard by all in the hunt, but no blast of horn told that success had followed; and soon the hounds were heard to pass his stand. On they came toward Todd's stand at the edge of the creek. In this immediate locality deer had, pressed by the hounds, ran to Albemarle Sound, Chowan River or Salmona Creek, according to the direction of the wind. The buck came dashing into the water as though untouched, and swam with apparent ease too far for Todd's No. 16 gun. He sprang into a canoe and pushed to get within gunshot. Succeeding, he fired. The buck struggled and kept afloat long enough for Todd to reach him; when the deer was pulled into the canoe and brought ashore—a handsome young buck. Upon examination we found that while Todd's load had entered back of his head, while he was swimming, two of his feet and ankles, front and back on same side, had been broken by Mr. White. It reminded us of the old story, fifty years old: "Massa shot and the ball had broke a hindfoot and passed through the ear—same ball." See how game this little buck ran, wounded as he was. It reminds one of the great racehorse McWhirter.

Todd sounded his horn and soon the clan gathered. Webb came, exhibiting his usual nervousness. Notwithstanding he has been in a hundred hunts he can have a buck ague every time. One old hunter laughingly said: "Webb, you can't stick your knife in him, now he is hung up."

The hunt for the day was over, but arrangements were made for another hunt next morning over the same grounds, and after an early breakfast all reported except Todd and Everett, and by lots we chose stands, Webb going in the drive with his old pet hound Buck. Webb started a large doe, after a short hunt, and feeling her ability to outrun any dog, she played along in front of the dogs; choosing a run upon which there happened not to be a sportsman, and instinctively feeling safe with no one in the drive except Webb. She finally ran to water, entered the creek some distance below any of us, and attempted an old trick they frequently practice, that of entering the water, and instead of going across the stream, swimming directly up the current several hundred yards, and then coming out on the same side from which they had entered.

Old Buck is also up to said tricks. He swam up stream while the young dog followed along the bank. After some time the young dog gave note, and soon they are off again in hot chase. After a short run she started again for water, and again Tom White was located on the lucky stand. He heard them coming, and squatting down saw the white flag flying through the tall bushes. Knowing she would cross an open space, he prepared for the supreme moment, and in an instant crack! went his gun. The magnificent doe, large and fat, lay before him. As usual, he who goes furthest and is most anxious has poorest success. But we most always feel there is a better day coming.

I enjoyed delicious venison steak for three days, and left for Newport on Monday last.

I saw several setters and pointers left last spring with Mr. Everett by Northern gentlemen to be handled until the coming season. Old Buck and Roanoke are looking very well. The early birds having a fine crop of partridge peas, buckwheat and oats, paired off finely, and are very large and strong for the season. I heard of some nice flocks of turkeys. I hope for better individual success in my next effort.

*Sept. 19.*—I arrived at Avoca Saturday. Natives are hunting squirrels with great luck. Butterton killed a buck that dressed 156lbs., Friday, and my twelve-year-old son is off this morning with dog and gun, and I hope may meet with success.

Albemarle.

### Deer in Rhode Island.

Westerly, R. I., Sept. 26.—A doe weighing 175lbs. was killed at Clark's Falls, a village about eight miles north of here, Saturday last. Fred Rowse, a lad of seventeen, was out hunting coons when the deer jumped out of the brush some 15yds. from him. He dropped her in her tracks with a charge of T shot. There is a good deal of conjecture as to where she came from. As there is a small band in Massachusetts it is possible she may have strayed from that section.

M. D.

[Several deer were reported in Connecticut last year and the surmise was that they had escaped from a deer park. The Massachusetts deer are in Plymouth and Barnstable counties, a long way from where this one was killed].

## CHICAGO AND THE WEST.

*[From a Staff Correspondent.]*

CHICAGO, Ill., Sept. 30.—How about that fine, Dr. Thomas?

Dr. Thomas is a popular preacher. He makes everything popular he touches. If left alone he would make summer deer shooting a popular pastime. Not left alone he makes FOREST AND STREAM, for the time at least, very popular. So far as I can learn the paper never pleased Western men more than by showing the facts in regard to this popular Western preacher. Even from the East comes word in regard to this. From a letter written by Mr. A. C. Collins, of Hartford, Conn., president of the Connecticut Association of Farmers and Sportsmen for the Protection of Game and Fish, Hartford county game and fish warden, president Colt Hammerless Gun Club, secretary Hartford Kennel Club, agent of the Connecticut Humane Society, etc., etc., I take the following:

If Dr. Thomas gets his just dues—a good fine—he will not then be talking his absurd and illogical vaporings regarding the game laws, neither will he be smacking his lips with so much gusto. He might then change his tone. Those three deer, killed illegally by the divine, were the property of the State of Wisconsin. He had no more legal right to steal them than he had to take other property belonging to the State. I hope he will be fined heavily. A "poacher" is a "poacher" regardless of clothes or position.

I reckon Dr. Thomas will be fined all right, though probably he never would have been except for FOREST AND STREAM. This week I got a letter from Mr. D. W. Fernandez, now State game warden of Wisconsin, at Madison, in which he inquires for the county on which Dr. Thomas did the killing. Mr. Fernandez, I understand, also wrote City Warden Bortree about it. I told Mr. Fernandez that the county did not make any difference, since I had personal assurance that Dr. Thomas was just honing to be fined. I sent Mr. Fernandez's letter to Dr. Thomas and Dr. Thomas's letter to Mr. Fernandez; if these two gentlemen don't get together now it isn't my fault. I give below Dr. Thomas's last letter, which needs no further comment, being as regards evidence in defense, irrelevant, immaterial and incompetent, as the lawyers say. The public will file its own objection to it. The best and easiest thing Dr. Thomas can do now is to take the advice I kindly gave him in my last letter—pay his fine and go and sin no more. This giving good advice to a preacher is what I call a snap, and I am wiping off plenty of old scores right here. The letter:

*Dear Mr. Hough:*

Though personally not acquainted, we are coming to know each other by correspondence.

If you were a preacher, you would probably be a regalist in religion; and yet you would find that the formal law of the churches by growth and change of custom has in many things dropped into disuse. The Methodist church has a positive law against "putting on gold and costly apparel," and yet every preacher who is able—Bishop not excepted—carries a gold watch and chain, and all wear "costly" broadcloth.

I do not mean by the analogy that the game law is by any means a dead law. I believe in it and the hunters of Wisconsin respect it and would be the first to complain of any one who sought to take advantage of or to abuse the liberty of interpretation by which they kill for use. Two of my deer I killed when alone—I like still-hunting—one when with a professional hunter, and he said, "Now, that is enough, we would not shoot another if there were forty in sight."

But the "forty" are never in "sight;" it is a difficult matter to find and get them in the interminable brush of that country. I hunted at one time four days and one night with three good hunters and we did not get one. It is not this little summer hunting that is destroying the game, but the wholesale slaughter in season. It becomes a pride and a boast to see who can kill the most. That ought to be stopped by limiting the number allowable for any hunter.

Personally I made no secret of what I did, for I live an open life before my fellow men; nor under the circumstances did I feel the least condemnation, and said then, and have said since, that I believe in the purpose of the game law, and if what I did was a violation, I would cheerfully pay for it; and if the State of Wisconsin or the proper officer presents a bill it will require no legal process to collect it. But the only effect upon others would probably be a little more secrecy; the killing, what little there is in summer, would go on just the same. The time to save the deer is in November. At that time I have to be at home at my work, but should gladly be governed by a limitation act were I a professional hunter, which I never was; but I can shoot pretty well, having been raised to the gun when a boy in Virginia. I killed a great deal of small game then, and I love the woods yet better than any place else. I never shot at but four deer in my life, and three of those I got.

But pardon this long letter. Respectfully, H. W. THOMAS.

No. 535 WEST MONROE STREET, Sept. 22.

### DECOYS IN QUESTION.

Many duck shooters of this vicinity have viewed with alarm the statement in last week's FOREST AND STREAM, quoting Mr. F. M. Lawrence, of Mayville, Wis., to the effect that it is against the law to shoot over decoys in Wisconsin. Among other comments I have the following letter from Mr. W. C. Thomas, of Sheboygan Falls, Wis.:

I have read your article on Horicon Marsh in FOREST AND STREAM of Sept. 22, and note your reference to Attorney Lawrence's statement regarding the use of decoys. I do not know what they do on the Diana grounds, but the club on the upper Horicon grounds all use decoys, as also do all hunters at Puckaway and every other duck grounds in Wisconsin that I ever heard of. I have the latest Wisconsin game laws before me and fail to find any mention therein of decoys. You either misunderstood Mr. Lawrence or else he is not posted on that point.

There is no question about the understanding, and no question about the trouble it has raised. In the compilation of the game and fish laws issued by the Wisconsin Secretary of State I find no reference to such enactment. Neither do I find it in the *Book of the Game Laws*, issued by FOREST AND STREAM, in which no error whatever has ever been detected, and which is therefore the only accurate record of the game laws published. I know the Diana Club boys use decoys, and I have used decoys there, though after this advice not on the upper club marsh (where, however, they do not "all use decoys.") If Mr. Lawrence can point out chapter and verse, he will oblige, and oblige still more if he can't.

### FUN WITH THE BOYS.

The game law is having a little fun occasionally with the South Water street boys. The surprised and grieved looks on the South Water street man's face these late days is a study. The dealers don't know what to do about this reckless violation of the etiquette of the past. President Organ and Warden Bortree, for instance, found two tubs of prairie chickens in the hands of Messrs. Ender & Ender. The firm compromised cheerfully on a fine of $270. This was a sort of double-ender, so to speak, but it is a poor rule that won't work both ways. The American Express Co. also notified the above officers that they had two barrels of grouse for Morse Gray and one barrel for G. R. Shirkly, all from Nebraska. This was unkind of the company, for the three barrels only brought $71 at auction, and might have retailed for much more if the dealers had had their way. Mr. S. O. Argraves, of Compton, Ill., also sent 10 fox squirrels to Cougle Bros., 178 South Water street, but again the American Express Co. fell against the project, and its little card of notification brought speedy and proper action. This express company is doing good, and it deserves thanks. United action of all the express companies could kill illegal shipping in one year's time. There has been less illegal game sold in Chicago this fall than at any time for 10 years, although this is the best year for game there has been for five years. Two years' good work at protection has made a distinct change. The possibilities of such work no longer remain problematical, and the practical importance of such work can no longer be denied.

### RECENT SHOOTING.

Messrs. W. R. Linn, O. H. Roche and Alex. Semple are back from a chicken trip to Worthington, Minn., and report very bad luck. I understand this point is near the Iowa line, and if so it is about 200 miles below the best Minnesota shooting this fall.

A friend tells me that this week in St. Paul he met a man just in from North Dakota, who told him that he killed 172 birds in two days. Of course 122 of these birds were illegal; lowest fine $10, total $1,220. All 172 illegal when taken out of the State. The name of the man is unknown.

Messrs C. S. Burton and Henry Smith, of this city; John Egan, of Cincinnati, and Geo. Hunsucker, of St. Paul, leave this week for Ten-Mile Lake, Ottertail county, Minnesota, for a two weeks' trip after chickens and bass.

The recent party that went up to Horicon marsh had fair sport. W. L. Shepard bagged 46 ducks in one day, W. P. Mussey 25 in two days, Geo. Holden 25 in one day, L. M. Hamline 33 in one day, C. B. Dicks 23 one day and 28 the next. The club keeper, Yorgey, bagged 40 in one day.

R. A. Turtle returned from Lake Senachwine, Illinois River country, late this week and reports thousands of birds there, mostly teal. The flight seems therefore well south.

Fred Allen, of Monmouth, was in town this week, and as usual brought me another duck call, which I add to my collection. This would seem a good place to say, in the words of the country editor, "Call again, Fred."

Big Lou Harrison, of Minneapolis, also came to Chicago this week to see about the prospects for sport this fall and winter. Mr. Cowan, champion of Montana in the trap-shooting line, is another arrival, and more to the purpose, one who will locate here and stay. The great magnet of the West is Chicago.

Mr. Frank Mason, widely known through his long connection with sporting journalism, spends this week in Chicago, being West on a trip for the *Mayflower*, an Eastern horticultural magazine. This is a good time for Mr. Mason to remember the famous remarks of the young preacher, who remarked to his congregation, "The Providence which made you, my brethren, also made the tall and spreading oak, and the Lord who made me, made a daisy." This I just drop in, as being the only thing I know about horticulture.

### LOST LABOR.

Mr. Geo. Hofmann, of this city, has, or had, one of these expectorating dogs with long white hair. It seems that there is an inexorable fashion in canine ornamentation which demands that such dogs be decorated with lion's manes, collars, cuffs, or other landscape effects trimmed out of the natural hair. Mr. Hofmann did not want to be behind the times, and so sought to shear his dog in a truly artistic manner. The dog resented, and bit Mr. Hofmann through the hand. Not even this caused him to relent, and acting on a happy thought, he chloroformed the dog, tied his legs together, and then proceeded to execute the most marvelous pattern of dog fresco that ever was derived. He cut a lane up each side of the dog's back, put frills around his legs, a ruff about his neck, a star on one side and an anchor on the other. The dog being quiet, the artist was not bothered in his work, and so proceeded with greater liberty of hand and eye. The reason why most dogs are so badly sheared is because they are not chloroformed. "This chloroform is great stuff," said Mr. Hofmann, as he finished his work, and sought to wake up his dog. The latter declined to wake up, however. In short, he was dead—a highly ornamented but also highly dead dog. Mr. Hofmann stands the chaffing of his friends very well. "I don't mind losing the dog so much," says he, "but what I want to know is whether the joke is on me or on the dog."

### ILLINOIS CHICKENS.

It is practically certain that the wet spring of this year caused great destruction among the prairie chickens of this State. This has been the report from sections of the State where the birds were fairly plentiful last year, and this I have personally verified this week by a short trip into country which should have had some birds this year. Mr. D. H. Halladay and myself went out north of Amboy, only some seventy or seventy-five miles west of Chicago, in a section where the ground is high, and where the birds might be expected to have suffered less from floods. We met warm weather, so warm that the dogs Lady and Mack had a hard time of it, but in a day's walk which covered between twenty-five and thirty miles we put up hardly a covey, and had to content ourselves with long shots at old birds. The next day we did better, and found better country and more birds. On the whole trip we put up less than sixty birds all told. We bagged twenty-three, all fine great birds, and strong fliers. As sport, we found this shooting highly enjoyable, though the scanty total would make it seem dull to many who like to shoot chickens in August, which I certainly do not. The birds have not yet taken to the corn altogether, though they fly to the cornfields when put up, and probably spend most of the day there when it is warm. Early in the morning and late in the evening we found them on the stubblee, and later met them occasionally on the pastures. They were wild and wary, and as interesting a game bird as one could ask. No. 6 and 3drs. of smokeless was none too good for them.

In the low grounds leading back to the Kishwaukee River the chickens were almost entirely drowned out, south of C. B. & Q., on the high ground, they bred better, and here we found some young birds, although there was no grass land for breeding ground. It seemed odd, to be hunting chickens in this highly cultivated farming country, where the maple trees, planted by the farmers, were thicker than a man's body, and one could not go forty acres without crossing a wire fence. It shows how the birds hang to their old home, even at the expense of changing their habits. These birds now breed right up in the field, barring meadows or grass land. We shot one bird which had only one leg, the other being taken off so smoothly at the joint that not the least trace remained of wound or scar. This was doubtless done by a mowing machine when the bird was small. This was a young bird about two-thirds grown, one of the smallest we got. Ordinarily a young bird will not cackle when it is put up, but this one cackled like a good fellow as it flew.

On this trip we met one of my old chicken dogs, in this case a half-breed, apparently setter and Newfoundland. Ponto was a Gothic sort of dog, bigger than any setter, and of no particular shape, but with as good a nose and as good a knowledge of chicken hunting as any dog I ever saw. His master, Geo. Watson, had him broken to a nicety, and I could not help wondering what would be the effect were this nondescript allowed to compete in a field trial with the cracks. Ponto had been out every day for two weeks, but on the morning we saw him he was still able to do a turn. The first we saw of him was when he was crossing a field at his mother's heels. All at once he turned and came to a full point, and later we found the birds 60yds. further on. We brought up Lady and Mack to back, and the three made a pretty field picture, all the more complete that we got the three birds which rose. Ponto cost $10. He is worth $500.

As usual, there was some sweet with the bitter of our hard-working hunt. In the evening before we took the train for home, we walked out a mile or so from the little country village where we were stopping, and tried for a few more birds. We wanted just two dozen and we had just 18. We could not put up a bird, but just at sundown my companion, Mr. Halladay, saw a little bunch of 6 birds, flying in over the corn, and he thought they went down about a half mile beyond us. Taking their line, we crossed a wide field of corn and struck a stubble field. This we worked in vain for some time, separating and beating it carefully. At length, at a distance I heard Halladay's gun twice, and looking about saw a bird rise high and wide from him, falling an instant later to his shot. Going over to him, I found that he had started 6 birds and killed 3 in the three shots. We gathered these and took the line of the three other birds, which had gone across the corn directly on the line from which we came. Pushing on through the corn and into a heavy growth of grass, one of these got up at my feet and I killed it. An instant later both the others sprung and Halladay killed both of them, though we found only one in the grass. This was all in a few moments, and was the only easy shooting we had. The birds were mixed old and young birds, and we knew when we saw them flying in the stubble that the packing-up days were near at hand.

Given a good breeding season next year, and any decent observation of the law, and we will have very fair chicken shooting within 100 to 150 miles of Chicago. The supply of breeding birds left is ample, and from this on they can take care of themselves. The public is welcome to go to Dakota and the Northwest for chicken shooting, and welcome to the big bags of easy birds. I have had one little two days' hunt, right in the door yard of Chicago, and though it was hard work to get together anything of a bag, we earned what we got, and had to walk and shoot for it. Kill a hundred chickens and you don't care for one of them, but every bird we got was an object for admiration, for comment, for careful stroking of plumage and for words of praise. There is no grander game bird flies than a full-grown pinnated grouse, and no prettier sport exists than shooting it in the proper season, namely, late in the fall. Before the middle of September chicken shooting does not deserve the name of sport. If all States opened the season Oct. 1, we should always have with us a noble bird, worthy of the keen work required to bag it.

Mr. C. W. Budd, of Des Moines, Iowa, writes, "I can give you some work on quail and pheasants this fall. Chicken shooting is fairly good. I have only been out about three hours, fifteen miles out of the city, and bagged five birds." E. HOUGH.

175 MONROE STREET, Chicago.

---

CHICAGO, Sept. 26.—*Editor Forest and Stream:* I read your Western correspondent's article in your issue of Sept. 22 in reference to Dr. Thomas's pleasant and enjoyable vacation, and the statement that the reverend Doctor intends to "repeat the trip after more deer next summer." The Doctor attempts to explain the matter away in his happy easy style, but the cold facts that he has violated the game laws of Wisconsin, and intends to violate them again next summer, and is perfectly willing to pay the fines so long as he may have all the nice, juicy venison he wishes, are all that I can see in his explanation.

The Doctor seems to have plenty of money to pay in fines, and intends to take his pick of the choicest, in season or out; game laws or no game laws, in order to tickle his palate with the delicacies of the season. The game laws were never framed to allow the persons who have the money to pay in fines, to hunt in and out of season, but to prevent the killing of game during the closed season, both by the rich and poor.

The Doctor in his capacity seems to have precious little regard for the laws of man in comparison to the respect he has for the laws of God. On his line of reasoning a gambler who can pay his fines or a criminal who clears himself by serving a term, exonerates himself in the eyes of the public. Such an example set by an eminent divine is twofold more liable to bring forth bad fruit.

The worst of it all is that the worthy Doctor intends to repeat the trip again next summer. We wish he may, but that meantime he will read the columns of the FOREST AND STREAM, if he does not already do so, and if he does he has woefully missed the teachings, and become educated as to the ethics of a summer fishing trip in Wisconsin.

If all who go fishing during the summer want a few nice fat deer to relieve the monotony of camp cookery and carried out their wants, of what value would be our game laws? Leave your guns at home on such occasions, and avoid the temptation, if you cannot withstand it.

The Doctor has erred, and should be made not to err again. OLD AVALANCHE.

## A SNIPE HUNT NEAR DENVER.

DENVER, Col.—There were four of them, the Artist, John, John's setter pup Mamie and the Credit Man. They met at the Union Depot in Denver at 12:45 on—no matter what day—for the purpose of going with the Credit Man to the only good bit of snipe ground in this vicinity. At 1:30 they arrived at the station, and in twenty minutes were on the grounds ready for the snipe.

John took the pup and went up the hill through several fields of wheat stubble, looking for a covey of quail that had been seen there several times during the close season, while the Artist and the Credit Man started over the snipe ground. It is a small piece, not exceeding forty acres, the upper end being a bog and gradually narrowing into a slough, which at the lower end is about 10ft. wide.

Starting at the narrowest part of the slough the Credit Man waded across and took the left hand side, with the Artist on the other. They had walked hardly twenty feet when away went Sir John, and in spite of the Artist's frantic efforts with both barrels he still kept on, finally alighting at the upper end. "That's all right, Artist; we'll get him later," said the Credit Man. The Artist was about to reply when *scaipe* went another right under his feet, and again the Artist made a double miss. Swinging across the slough, the snipe gave the Credit Man a right-quartering shot, and with great activity he succeeded in missing with both barrels. On our going up to the upper end and getting on a piece of wet ground just to the right of the bog, six jacks got up out of range and circled over the field, finally coming back with wings set like teal and lighting within twenty feet of where the mighty hunters were crouching.

"Now for a double," whispered the Credit Man, as he and the Artist rose to their feet. Away went the snipe; bang, bang, bang, bang, went the guns before the birds were 15yds. away, and of course none were killed. "We are shooting too soon," said the Artist, "that is the reason we are not killing." As he spoke, up got another not 20yds. away. With deliberation he covered him and at about 45yds. brought him down. Then in a few minutes he killed another and the Credit Man also killed one, although he missed him with the first barrel. Just then the Farmer (an old partner of the Credit Man in the sheep business) came down and invited the hunters up to the house. After resting a half hour John came down from the hills where he had hunted very diligently but had not found the quail. Starting over the boggy end of the snipe ground the Artist got another jack and the Credit Man missed as usual. At the lower end John's pup pointed and up jumped a rail right under the dog's nose; the pup, taking a quick step, caught it. (Is it not strange that rail should be so far inland and so far from any large marsh? It is the only one I ever heard of in this part of the country.) John got down at the lower end near the fence and put up a single bird, which he killed nicely with his second barrel.

So it went all the afternoon, getting a bird up every few minutes, killing some, missing more, until the watch showed 5:30 P. M., when it was time to start for the station.

A count of the bag gave the following result, the Artist five, John five, the Credit Man two, the dog one rail. A pretty good bag for about three hours' shooting within ten miles of Denver, where small game birds are a rarity. Better shots would have gotten more game, but it would have been impossible to have had more sport, and the three newspaper men (for they are all on the *Republican* staff) boarded the train with birds hanging in plain sight, feeling that they were indeed mighty hunters.

The quail season here opens Sept. 1.

THE CREDIT MAN.

## SHOOTING ON THE ROAD.

IT often happens that the traveling man has no time to spare for shooting except what may be used while waiting for trains, and this in the West is often half a day, and if one only had his shooting outfit along, including a dog, and knew where to go for birds or other game, he might turn many an hour of tedious waiting into an hour of wholesome and exhilarating sport. Suitable clothing, gun, ammunition and decoy ducks, too, if desired, the traveler can take with him at very little trouble or expense. Get a strong trunk 30in. long, 18in. wide and 12in. deep; the main body of the trunk should be divided by strong board partitions into three equal sized compartments. One of these can be used for shoes and rubber boots, another for the shooting suit, and the third will hold all the pneumatic decoys needed. The till of the trunk should be about 4in. deep, of heavy galvanized iron. Along one side of it is a full length compartment, lined with cloth, for the gun barrels, and a suitably shaped compartment on the opposite side receives the gun stock. Blocks of wood fastened to the trunk lid press on both stock and barrels when the lid is closed, so they are held in place without any trouble with buckling straps. The rest of the till is divided into compartments just the size to receive a box of twenty-five shells. With this outfit at hand the shooter can be ready for the field in less than five minutes after he unlocks the trunk.

Everything is here but the dog, and as no automatic dog that can be packed in a trunk and taken out, wound up and set to running, has yet been invented, the traveler will have to take his chances on finding one where he finds leisure to shoot. When you find yourself stuck for half a day in some out of the way place, don't begin by asking how much game there is in the vicinity, for you will get no reliable information. If the landlord happened to see somebody with a bunch of birds yesterday he will tell you there's lots of 'em. Otherwise he will say he don't think there's a bird in the county. The livery man will tell you the grass is full of 'em 'bout seven miles out, and if you rely on such information it won't be long till you conclude nobody ever intentionally tells the truth about game locations. If you see a good-looking bird dog on the street ask who owns him, and if his owner shoots much, and if the answer is favorable hunt up the dog's owner, tell him who you are and why you are there, and want to shoot, and ask him to go with you. He will probably say he cannot spare the time, but if you will offer to pay him what he would earn if he did not go he will be glad to shoot, instead of work, and will do his best to give you good sport. It will often turn out that the shooting is good, and oftener, perhaps, poor or indifferent. Even if it is very poor, the exercise and the expectations of shooting something, far better than to stagnate for half a day in some country town.

South of the fortieth parallel of latitude there are no doubt 500 railroad stations that have from two or three to a dozen bevies of quail in walking distance, and in many of them is a village Nimrod who knows just where they are. If you can get him you can get some of the birds. If he knows of a pond in the middle of a cornfield where some mallards keep the shallow water muddy, he will guide you there. If he has noticed a few duck feathers floating down the creek he will show you where the wild grapevines overhang the water and "guess" there must be some more wood ducks there where he shot two last week, or if you want ruffed grouse, he knows where the black haw patch is. He is often a fellow of many good qualities which a few pleasant words and the prospect of making a dollar will develop to their fullest extent. Sometimes his dog will be a real good one, one of the kind that Brother Hough says it don't hurt to be "run over with a wagon," and again he will be such a nuisance that you will wish he had been run over by a wagon when he was a pup, or even now.

I remember one dog that caught six rabbits in less than half a day. His owner said he was "commonly a powerful good quail dog, but this don't seem to be one of his days for birds." It did not seem to be one of my days for birds either, as only five were bagged, but as the dog was bent on rabbits we turned it into a rabbit shoot and had good sport with them. O. H. HAMPTON.

ROCK ISLAND, Ill., Sept. 24.

## "GAME LAWS IN BRIEF."

THIS is in response to many calls for a briefer, handier and cheaper work than our established and successful *Book of the Game Laws*.

The *Brief* is prepared by the editor of the *Book* with just as much care, and will win a like reputation for accuracy and reliability.

The difference between the two is just here: The *Book* of the Game Laws gives the entire law in the full text. The *Brief* gives in brief the sections which relate to game and fish seasons, limits of size or number, non-resident requirements, transportation, etc., and gives them in brief. A practical guide for the man who is going shooting or fishing.

For illustration, the Pennsylvania deer law is given in the two works:

*In the Book of the Game Laws.*

Elk, Deer, Antelope, Venison.—Act of June 3, 1878.—Sec. 1 [as amended June 27, 1883]. Be it enacted, etc.: That no person shall kill or pursue of any part of this State any elk or wild deer, save only from the first day in October in any year to the fifteenth day of December next following, and no person shall have in his or her possession, or offer for sale or transport any elk, wild deer, antelope, or fresh venison, save only from the first day of October in any year to the thirtieth day of November next following. No person shall at any time kill any fawn when in its spotted coat, or have the fresh skin of any such fawn in his or her possession. No person shall pursue any elk or wild deer with dogs in any part of this State, or shall kill in the water any elk or wild deer or fawn which has been driven thereto by dogs; any person offending against any of the provisions of this section shall be deemed guilty of a misdemeanor, and shall be liable to a penalty of fifty dollars for each elk, wild deer or fawn so killed, pursued or trapped, or fresh elk, wild deer, antelope, fawn skin had in his or her possession, and may be proceeded against in any county of the State wherein he may be arrested, having the same in his possession; and provided also, that any dogs pursuing elk or wild deer or fawn may be killed by any person, and any constable or other town official may kill any dog that habitually pursues elk, wild deer or fawn, and the owners of such dogs shall be liable to a penalty of ten dollars for each elk, wild deer or fawn killed by such dogs; provided also, that the catching of sturgeon in any of the waters of this Commonwealth shall not be unlawful.

*In the Game Laws in Brief.*

Elk, Deer, Antelope, Venison.—Act of June 3, 1878.—Sec. 1. That no person shall kill in any part of this State any elk or wild deer, save only from the 1st day of October in any year to the 15th day of December next following, and no person shall have in possession, or offer for sale or transport any elk, wild deer, antelope, or fresh venison, save only from the 1st day of October in any year, to the 30th day of November next following. No person shall, at any time, kill any fawn when in its spotted coat. No person shall pursue any elk or wild deer with dogs in any part of this State, or shall kill in the water any elk or wild deer or fawn which has been driven thereto by dogs.

Was anything in game legislation ever more ridiculous than that tacking of sturgeon on to the deer law? The *Brief* gives the laws with the ridiculousness omitted, the legal verbiage shorn off, and as a rule with the penalties omitted—on the theory that the law-abiding man wants to know what he may do and when he may do it, not how he will be punished if he does something else, or at the wrong time.

The *Brief* is published by the Forest and Stream Publishing Co. The price is 25 cents.

And—something new in game law compilations—the *Brief* is handsomely illustrated with half-tones from the FOREST AND STREAM—the "Mule Deer Family," from the "Boyhood Number," several of the Amateur Photograph reproductions, one of Mr. W. Townsend's ducking pictures, and others—more than twenty in all.

Bought for its utility, the *Brief* will be preserved for its beauty.

### Jottings from Jersey.

HIGHTSTOWN, N. J.—The open season for gray squirrels has already afforded considerable sport. The frisky folk are more abundant than they have been for ten years or more in this section. I confess to a liking for the pursuit of this kind of game, in which the man who can emulate the patience of Job generally comes out ahead. As I have gained about a hundred-weight of avoirdupois since I sent you the last item with this title and signature, I find that I can sit still as long as anybody. B.

### Carrier Pigeon No. 55.

BURKEHAVEN, Sunapee Lake, N. H., Oct. 1.—*Editor Forest and Stream:* While shooting in my woods here to day I aimed at what I presumed was a wild pigeon. It was flying low, and upon recovering it I found it was a carrier pigeon with a rubber band on leg numbered 55. Whose bird have I unwittingly killed? G. H. DANA.

### Wild Rice.

MR. CHARLES GILCHRIST, of Harwood, Ont., writes us that after sending the note we referred to the other day, of the loss of the rice crop, he received some 150 bushels from a sheltered bay where the storm had not destroyed it; and he is therefore prepared to supply orders to that extent.

## SQUIRREL PIE.

ADRIAN, Mich.—Two noted sportsmen not far from this place had long been talking of a squirrel dinner. In fact, each day as they went to their respective homes to dinner, they had pictured a fine platter of squirrel, and imagination had grown so strong, and had increased their appetites to such an extent, that they could resist no longer. So they took a day from business and went in search of game.

Both said that they never come home without bringing from 12 to 20 squirrels, told their families of the number they would bring home for a squirrel pie, and several neighbors and friends were enjoined not to order meat the next day, as they never failed, and would bring home plenty for all.

After tramping four long miles they found two very small squirrels. Then another four miles were tramped. Occasionally a squirrel was seen and shot at, but only chattered back saucily, and nothing fell. Finally darkness came on, and by this time the pangs of hunger were keenly felt. In imagination both went through a squirrel dinner, where fried squirrel were before them in aggravating numbers. Once more they quickened their steps to find a new place where the game danced around from tree to tree. Both aimed and fired, and fired again, but as before, nothing fell. Finally one bird was added to the game bag.

Darkness had gathered, and they must return. But how were they to meet their friends without taking them the promised squirrel? Once more the game bag was opened to see if the two squirrels within were really not four; when, lo, the bird, which had been only stunned, flew out and into a tree. By this time the home of one was reached; and the guns and game bag were deposited on the stoop, while both entered, tired and hungry, for supper.

During the meal (which was a very silent one on the part of the two hunters) it was decided that one should have the two squirrels cooked for his dinner the next day, and in the presence of their friends should tell how good they were, and how sorry they were that they had not got quite enough to go round, but that they would go again and then the rest should have them. This plan the other heartily approved; and excusing himself, before his friend should have time to change his mind, he went out on the stoop to shoulder his gun and game bag and start for home. But where was the game? That surely was the game bag dragged half-way across the lawn, and, yes, those dark objects were really cats sneaking off with the game.

All friends were seen smoking good cigars the next day instead of eating squirrel. C.

## BIRD NOTES FROM MISSOURI.

ALEXANDRIA, Mo., Sept. 26.—The spring and early summer months in this part of the great West were exceptionally rainy. Most all lands were kept wet from heavy precipitation until the first week in August, and consequently all kinds of game birds suffered greatly in trying to raise their broods. But regardless of this climatic adversity, a large percentage of quail brought out their new flocks quite early in the season. In the latter days of July I observed many bunches of young quail which had almost reached their full size. This, so early in the summer, is not common in this latitude. Here in the closing days of September I notice coveys of young quail which are grown, and although the number of birds per covey is not large, the flocks appear quite numerous.

Prairie chickens are evidently becoming scarcer and scarcer every year. I have noticed but few old birds during the season, and have seen no young ones.

The pinnated grouse, following in the trail of other native game birds, reads its doom in the plowing up of its brooding grounds, together with the merciless hunters with their improved and destructive fire arms.

During the summer I have diligently watched for the appearance of even a solitary pigeon, but my studied observations have been fruitless. I have no evidence that any pigeons have returned to any parts of this State.

On Sept. 25, immense flocks of pelicans appeared along the Mississippi, pursuing their annual migrations southward. One flock I observed was a fourth of a mile in length, and contained hundreds of these great birds. The pelicans are the only wild fowl which seem to maintain their average numbers.

One bright day of the last week of September, a proud eagle came sailing from the far north, and went on its journey to the warmer regions of the south. It was a young bird, being of a brown color, and was lacking in the characteristic whiteness of head and tail.

Few ducks of any species raise their young along these valley lands of the Des Moines and Mississippi, for their natural homes and retreats in the inland ponds and lakes are being invaded and devoted to the requirements of civilization.

In view of the growing scarcity of grouse, quail, waterfowl and game animals, the sportsman wonders how he is to pursue his cherished amusement in these regions which a few years since abounded in all kinds of wild animals and birds.

View the subject as we may, we are compelled to acknowledge that the native game birds and animals are rapidly disappearing, and will in not very remote time be extinct. JASPER BLINES.

### Game Birds for Massachusetts.

MASSCHUSETTS FISH AND GAME PROTECTIVE ASSOCIATION.—Committee on Acclimatization.—Boston, Oct. 1.—The Committee on Acclimatization of the Massachusetts Fish and Game Protective Association report the receipt of their first shipment this season.

This consists of 14 dozen Gambel's partridge (*Plumiferus gambeli*), which arrived in Boston Sept. 28, and have been loosed, half in Berkshire and half in Bristol county.

Two other lots are expected within the next fortnight to complete the order of 500 birds.

No other shipments are expected until about the first part of January, when 500 prairie chicken (*Tympanuchus americanus*) and 500 sharp-tailed grouse (*Pedicœcetes phasianellus columbianus*) will begin to come.

The committee is now ready to receive applications for birds, and also state that they shall be glad to receive contributions of money to enlarge the orders for bids already placed. HENRY J. THAYER, Sec'y.

53 State street, Room 948.

## NEW YORK STATE ASSOCIATION.

THE meeting of the Executive Committee of the New York State Association for the Protection of Fish and Game will be adjourned from Oct. 13 to Nov. 17, to be held on the latter date in Syracuse. No business will be done on Oct. 13.

### Small Loads and Quick Primers.

*Editor Forest and Stream:*

Nearly two years ago I wrote a short article which was printed in your journal, advocating the use of small charges of Schultze and E. C. powders for quail and other small game, as well as trap shooting. I stated then that in my opinion 2¾drs. of powder was a sufficient charge for the purposes named, used in a 12 gauge gun. This statement called much criticism and some ridicule, but the present condition of things would indicate that I was only a little ahead of the times, and not in error after all. Several of the large cartridge-loading companies are furnishing loads of 2½drs. Schultze or E. C. powder and 1¼oz. shot, loaded, too, in shells having the old style No. 2 primer. That the load is sufficient is evidenced by their continued popularity and rapidly increasing sales. For my use, however, I prefer the same load used in the new "smokeless" shell with the No. 3 primer, now generally on sale throughout the country, and at a reasonable price. This shell hand-loaded by myself with 2½drs. Schultze, a cardboard, three black edge and another cardboard wad on powder, 1¼oz. Tatham's chilled shot No. 8, a Squires shot wad on top, well turned down with a Spangler crimper, gives me better satisfaction at trap than any combination I ever tried, and I have been experimenting for several years, in fact ever since the nitro powders were introduced into this country. It is quick, has no unpleasant recoil, is cheap, and in every way satisfactory. The strongest point in favor of the new No. 3 primer is that it gives quick ignition and thorough combustion of the powder, with such a high velocity to the shot that it is unnecessary to hold ahead of cross-flying targets. Poor shooting with a slow powder is mainly caused by errors of judgment in holding, and to be enabled to "hold on" will improve the average shooter's score twenty per cent. JASONE.

### Prairie Chickens and Ducks.

ST. PAUL, Sept. 26.—The chicken season is about over as far as the general public is concerned; still, good shooting can be had. To say they have been plenty does not express it. Albert Fischer, president of the St. Paul Rubber Company, and W. Wilder, of Grand Forks, N. D., were in a party of four that shot near the boundary line in North Dakota. They report over 300 birds in a three days' shoot.

Judge Cory of the Municipal Court, William Hamm, Harry Osburn and F A. Kennard with four others went West on the "Soo" Line, and killed 539 chickens in a seven days' shoot. They could have shot double by hard work early and late, but had no use for more.

Dr. Richeson and John Phister, the well-known Seventh street jeweler, have just returned from a hunt near Blue Earth City, in southern Minnesota, and report chickens very scarce in that locality, and no wonder, for if reports are true the natives have been shooting them since Aug. 1.

Have heard of some good bags of ducks shot near Wilmar on the Great Northern Railway. They are also reported very plenty west of Tintah on the same road. But what few I have seen were very poor, in fact some of them can't fly yet. My dog in retrieving a winged chicken near a slough brought back a young duck, and on being sent out again repeated the performance, and on looking in the grass we saw a dozen or more running around. They were of all kinds, mallards, bluewing teal, spoonbills. I saw a few nice teal that came from Lake Jenney near Dassell, Minn., shot Sept. 18. This fine pass has been leased for fifteen years by some St. Paul and Minneapolis parties and a club house erected. F. A. K.

### A Connecticut "Choker" Fined.

WEDNESDAY of this week will be a day long remembered by Thomas H. Austin, of Suffield. On Monday Detective Irving D. Townsend, being in the employ of the Connecticut Association of Farmers and Sportsmen for the Protection of Game and Fish, of this city, visited Suffield in their interest. He caught "Homer" Austin in the act of setting snares, and found one partridge snared by him in his possession. Mr. Townsend reported the facts to President A. C. Collins, of the association. On Wednesday Mr. Collins went to Suffield and arrested Austin, and brought him before Justice of the Peace Horace K. Ford, of that town. Justice Ford found Austin guilty on four counts and fined him $5 on each count and costs of prosecution. The costs amounted to about the same sum as the fines, and $40 will give him some respect for the game law. The snaring of partridges is very expensive and bad business. Lawyer L. W. Austin, of Suffield, defended Austin, and Game Warden A. C. Collins appeared for the association.—*Hartford Courant, Sept. 30.*

### Pennsylvania Wild Turkeys.

SQUIRRELS and wild turkeys are reported to be abundant in the vicinity of Dauphin, Pa. Our informant states that he saw recently a flock of 21 turkeys, and that hunters have frequently brought in from 18 to 20 squirrels after a day's hunt. Six squirrels were shot out of a hickory tree near the town. Mr. Hoffman, the proprietor of the hotel at Dauphin, is an enthusiastic sportsman, and has been very successful in his hunting.

### Clipped from Letters.

THOMPSON'S panther, in your last, is great, it all but moves, and is a worthy study. In action it seems to me that he outranks Beard, who, although he does beautiful work, is not in it with Thompson, who feels what his pen interprets. This, at all events, is the way in which his work impresses me. W. TOWNSEND.

"O. O. S.'s" panther story is a mighty good one. My boy teases me to tell it again every night, and thinks it quite "knocks the stuffing" out of my old stock of panthers that I have been in the habit of trotting out for his amusement till the sawdust was beginning to sift through the seams. AWAHSOOSE.

# Sea and River Fishing.

*The Fish Laws of the United States and Canada, in the "Game Laws in Brief," 25 cents. In the "Book of the Game Laws" (full text), 50 cents.*

## ANGLING NOTES.

### Salmon Pond in Canada.

I HAVE lately received the report of the Department of Fisheries of the Dominion of Canada for 1891, which includes the report of Mr. Samuel Wilmot, superintendent of fishculture. From this and the reports of the officers in charge of the hatching stations I learn of the initiation of an experiment in salmon culture which might with profit be put in practice on the Hudson River. This was the impounding of parent salmon, from which to take eggs for artificial hatching, and it was completely successful. The Carleton Pond is a reservoir for confining salmon in the harbor at the city of St. John, New Brunswick, through which the tide ebbs and flows, with movable gates at the entrance to hold the fish. At high tide the water covers 6 to 8 acres of surface and at low water a large hole or basin is left 15ft. deep, with a quarter of an acre of surface. Last year about 300 adult salmon were caught in the nets in the harbor during June and July and placed in this pond, where they were kept until Oct. 28, when the stripping began, and was continued until Nov. 10. During that time 234 females and 85 males were manipulated, furnishing about 1,600,000 eggs. All the eggs were placed on the trays in the hatchery house in first-class condition after packing and shipping.

Mr. Chas. McClusky, the officer in charge says: "The salmon in the pond were in excellent condition, healthy and smart, and free from disease of any kind that could be discovered, and they were all liberated apparently in as good condition as when first taken from the water, and not a fish was lost during the whole operation." The eggs were of a higher color than those taken from salmon in fresh water; otherwise there was no observable difference. Mr. Wilmot says that doubts were entertained about the healthfulness of the pool for retaining salmon, because of sewage and other matter running into it from the surrounding buildings, but happily they were unfounded. If my memory serves me, Mr. Atkins, at Bucksport, Me., has in different years lost from 25 per cent. to all of the salmon in his fresh water retaining ponds from fungus.

Up to this time all the salmon eggs and salmon yearlings for stocking the Hudson River have come from the U. S. hatching stations in Maine, and the greatest number of fry planted in the Hudson in one year was 588,188, in 1889. These fish will be returning from the sea next year, and with the fish from previous plantings there should be a larger run of salmon in the Hudson than ever before. We know that 300 adult fish were captured in nets (illegally) in the Hudson in 1888, but how many more no one can tell, or rather no one will tell, and that was the third year that salmon had returned to the stream as the result of plantings in the headwater brooks. Only three plantings could have been heard from at that time, and they amounted to 890,000 fry. The law against netting salmon makes it impossible to get any returns concerning the salmon from the lower Hudson (Matthew Kennedy wrote me last summer that he took ten salmon in his net, at Hudson, and returned them to the water), but we know that there are plenty of salmon in the river, although nothing has been done by the State to make the Hudson a self-sustaining salmon stream. There has been talk of making a breeding pen some wherebelow Troy, and taking the eggs from the fish that may be caught in nets, but thus far it has ended in talk. With every inducement which the Hudson offers to become a first-class salmon river and a source of wealth and pleasure, the State after building three fishways is satisfied to do nothing at all to bring this much desired state of affairs about. How much longer the U. S. Fish Commission will continue to furnish salmon eggs to a State that does not appreciate them I do not know. It is evident from the experiment in Canada that a salmon pond may be erected easily, and it is equally certain that the spawning fish may be obtained, but will the State take the matter in hand?

### Rangeley Trout.

We do not now hear so much about the big speckled trout of the Androscoggin Lakes as we once did, and perhaps certain jigging operations that were once conducted at Upper Dam, and upon which FOREST AND STREAM turned a search light that was hotter than the ordinary electric light, has had something to do with it; but there are still big trout there and they are caught legitimately, even if the records do not find their way into the newspapers. Mr. Wm. D. Cleveland, president of the Houston (Texas) Cotton Exchange, and Col. A. H. Belo, proprietor of the Galveston *News* and Dallas *News*, have been at Fred Barker's camp on Mooselucmeguntic Lake for a month or more, and made excursions to the surrounding waters for trout and to New Hampshire for deer, all of which were successful. They have not taken any of the very large fish, but Mr. Cleveland writes me under date of Sept. 12, that at Upper Dam the week before some big trout were taken with the fly. One of 9lbs. 2oz., one of 8¼lbs., one of 6lbs., and several of 3 and 4lbs. each. Col. Belo and his son caught some fine trout in Richardson Pond, all taken with the fly. Mr. Cleveland went out one day with a young daughter, and the little lady beat her dad by catching the biggest trout, one of 2¼lbs.

### The Late Dr. von Behr.

At the General Assembly of the Deutscher Fischerei Verein in Berlin to take action upon the death of the late president, Dr. Friedrich Felix von Behr, the principal speakers were Prof. Virchow and Dr. Dernburg. At another time I shall give brief extracts from these addresses, for they refer most feelingly to Dr. von Behr's interest in American fishes, and his attachment to friends in the United States. I know personally of his interest in all that pertains to the welfare of this country. In a recent letter from one of Dr. von Behr's family accompanying a photograph of the von Behr mansion at Schmoldow, the writer says: "I regret that the picture does not also show the garden so dear to my father. He had many trees planted in it by his friends so to keep a living remembrance of them; thus an American group reminds us of some of your countrymen which we had the pleasure of meeting in Schmoldow."

Only two or three weeks before Dr. von Behr's death he wrote me of his regret that his advanced age would prevent his attending our World's Fair, and he looked forward with pleasure to at least hearing of the grand fishery exhibit at Chicago. A. N. CHENEY.

## WESTERN PRAIRIE AND EASTERN STREAMS.

*Editor Forest and Stream:*

Every angler who has taken delight in wading our trout streams for the past twenty-five or thirty years has viewed with alarm the steady and uniform diminution of the water flow.

The subject has arrested the attention of our Legislature, particularly as to those streams having their sources in our forests and mountains. Forest preserves have been created and the destruction of forest trees prevented or checked largely on the ground that the causes are local, but are they local? Can the preservation of the trees at the sources of our streams do more than retard a result which is inevitable from other and more far-reaching causes? Is there and has there been any definite relation between the running down of our streams and the destruction of the trees at their sources?

Perhaps some facts in regard to the lower Water Shed of the State of New York may throw some light upon this subject.

In this region, commonly called the Catskill range of mountains, which are from 3,500 to 4,000ft. high, are the sources of many noted trout streams. These mountains which extend perhaps thirty miles from east to west and twenty north and south, are practically in their primitive condition.

I have visited these streams for some thirty-five years and have been a close observer as to their varying condition. Seven noted trout streams, viz., The Beaverkill, Neversink, Rondout, Willewemoc, Esopus, Dry Brook and Millbrook, have their sources in this range, several of these sources being close together and near the mountain tops. For miles from the sources of the largest of these streams the axe has seldom if ever touched a tree, and the clearings on the lower portions are substantially the same as they were when I first visited them.

Thirty years ago this region was usually visited in the months of May and June with several northeast storms, and in every year the lumbermen on the Beaverkill were in the habit of taking advantage of what they called the "June fresh," to run their lumber in rafts from Westfield Flats to Philadelphia.

When the streams were filled by one of these storms they usually remained too high for fishing for several days.

About the year 1859 I spent two weeks upon the Beaverkill, during which time I had but one day's fishing on account of two northeast storms. Thirty years ago I had the same experience on the Rondout, a northeast storm raised the stream bank-full, and I had to wait several days before I could venture to wade it.

These storms were almost invariably followed by strong westerly winds which continued for two or three days.

All this has entirely changed. A northeast storm is seldom know any more, and when it does come the streams run down almost as rapidly as they rise. Last year I was on the Rondout when it was filled bank-full by a steady and heavy rain, which was followed the next morning by the usual westerly wind. The stream ran down so rapidly that in the afternoon it was possible to wade it, and in the afternoon of the next day it was almost too low for good fishing. The same is equally true of the Beaverkill; on the second day after a storm it is usually in good condition and on the third day too low for good fishing.

For the purpose of ascertaining whether this running down of these streams commenced at their sources or at the point where the land on the banks had been cleared, I went up the Beaverkill four or five years ago, within a day or two after a heavy storm, for several miles above the point where a tree had ever been cut, and found the water down to the drought level.

I have found also by actual comparison that these mountain streams have of late years run down as rapidly as the streams which in other places run through lands which have been cleared and drained from source to mouth, and if the experience of others coincides with my own, and I believe that it will, then the destruction of the trees at the headwaters of our streams is but one, and a very limited one, of the causes of their gradual drying up.

I suggest the following theory as accounting in part at least for the conditions above referred to. Years ago the lands lying west of us were unbroken, the prairies were covered with the natural grass, and the swamps and low lands were undrained. Under those conditions the winds which largely prevailed from the west were fairly surcharged with moisture by reason of the natural evaporation from the soil low lands and swamps, and when these winds were forced up to the altitude of from 3,000 to 4,000ft., the moisture was condensed into rain and the mountain tops were saturated with moisture which slowly and steadily, through springs and rivulets, kept up the water supply of the streams.

Now the prairies are no longer covered with grass. Where trees abounded they have been cut with an unsparing hand in the great process of reducing the land to cultivation, the low lands and swamps have been drained, and the rain which falls sinks deep into the cleared land, or is carried off immediately by surface drainage. The air as it blows over is no longer supplied with moisture from the soil through natural evaporation, but rather yields what it can of moisture to the soil to produce an equilibrium, and when this air blows over the mountains it does not contain sufficient moisture to be condensed into rain, but rather like a dry sponge sucks up moisture from the soil to restore it to its normal condition.

If there is any force in the above theory, then it follows that our trout streams are largely doomed. The preservation of the trees at or near their sources will but partially save them.

Does not the cutting down of every tree wherever situated, by which the earth is exposed to the direct rays of the sun, constitute a unit in the process of the destruction of the water supply of our streams? And if so,

would not the planting of every tree constitute a unit of force in the opposite direction?

If so, would it not be well for the Forest Commission to check, as far as may lie in its power, the cutting down of trees in the cleared lands as well as in our forests, and to foster a general spirit in favor of planting and preserving trees everywhere throughout the State?

J. S. VAN CLEEF.

POUGHKEEPSIE, Sept. 28.

## CHICAGO AND THE WEST.

*[From a Staff Correspondent.]*

CHICAGO, Ill., Sept. 29.—Mr. Geo. E. Cole, president of the State Fish League, is back from his three months' trip to the seashore with his family, and announces himself ready to go to work again. President Cole has called a meeting of the board of directors of the league for Tuesday, Oct. 4, at Springfield. It is hoped that this meeting will be attended by all members of the board. Several hundred dollars have been pledged in this city.

Dr. Bartlett, of the State Fish Commission, is in town to-day. He reports a very busy season and many convictions. He says the Illinois fish exhibit at the World's Fair will be the finest the State has ever attempted and will be complete. Few departments of the Fair will be more interesting to sportsmen than that of Fish and Fisheries.

THE KEKOSKEE FISH STORY.

I have received permission to tell the Kekoskee fish story, provided that I do so in a careful and temperate manner. I do not know how to obey this injunction better than by giving it in the words of Dr. Clark, of Mayville, Wis., from whom we first heard it.

"These events happened before the war," said he. "They are so singular and improbable that I always hesitate about telling the story. You will probably laugh at me and not believe me, yet every word of this is true.

"The winter of 1860 was very cold. At that time a vast lake covered the whole ground where Horicon marsh now is. This lake was full of fish, and when the ice had frozen deep over every portion of the lake, these fish became distressed for air. The Rock River, as you know, is a lively stream here, and as you have noticed, it has a stretch of swift water just below the great dam at Kekoskee. This dam existed at the time of the story. You have looked with your own eyes upon the very spot where these startling incidents occurred.

"The fish, unable to breathe in the half solid lake, crowded up the live channel of the Rock River, making for the hole which the swift water kept open in the ice below Kekoskee Dam. Most of these fish were bullheads, and no river of salmon ever equalled this run of bull heads. It is six miles from the lake up to Kekoskee Dam, and the ice on the river was 2ft. thick, yet the whole bed of the river, 40yds. wide, was for six miles so packed with bullheads that the heavy covering of tough ice in places rolled and tossed like the waves of the sea, so desperate was the struggle of the horny host beneath it.

"The first arrival of the run of fish at the open hole was marked by a geyserlike eruption of bullheads, 50ft. across and about 12ft. high. The pressure of the fish behind was simply enormous. The fish could not get back in the water, and so slid out on the ice, covering it in every direction for hundreds of yards to a depth varying from 6in. to 2ft.

"The air was filled with a strange, low murmuring sound, which could be heard nearly a mile around. Old settlers say they have never heard such a sound since. Dreading some unknown calamity, they hastened to the spot, and there, as you may suppose, their dread was turned to joy.

"Before noon of that day every team of the whole neighborhood was at the dam, hauling bullheads. The amount of bullheads taken from that spot I hesitate to state, for fear you will not believe it. You cannot believe it. I do not ask you to believe it. No one believes it. They always laugh at us when we tell this story, and think we have gone crazy. In Wisconsin the term 'Kekoskee man' is used to designate one who has a wheel in his head. No Kekoskee man has been believed on oath or admitted to a jury in Wisconsin since 1860. This unearned reputation has ruined the town. You see it as it is, silent, almost deserted, a few empty buildings standing as monuments to a town martyred unto ruin by too strict an adherence to the truth. For every word of this story is true.

"If you will come with me about a mile out in the country, I will introduce you to the widow Sneider, now an old lady. The widow Sneider will tell you that on one morning she counted 900 (nine hundred) wagon loads of bullheads on their way from the geyser below the dam. This was only one morning, and the run lasted for two weeks. Of course, this number of wagons represented only a part of those which passed, and this was on only one road of several leading out into the country.

"The bullheads were shoveled into the wagons like potatoes and the regular price was 25 cents a load, a nominal sum, to cover the shoveling only. One man who shoveled there bought him a farm in this vicinity with the money so earned.

"The bullheads were hauled out into the country and used largely for manure. There is no richer land in Wisconsin than this has been since 1860. All the farmers fed the bullheads to their hogs and for two years after that you couldn't get a decent piece of pork in this part of the State. It was all fishy. The hogs all took naturally to worms and liver after that, and some of them evinced rudimentary gills behind the ears. Oh, I don't blame you for doubting this. They all do.

"There was a ford on the road at this point of the river, but the wagons could not get into the water. After the first eruption of bullheads had subsided planks were laid across on the living pontoon bridge of fish and on these the teams crossed.

"Even after the run had subsided very much, dogs and children were known to run across the open hole on the backs of the bullheads. Still later in the run, after the fish had thinned out a great deal, a man well known in this community, Julius Cornell, slipped from the ice and fell into the hole. He could not get into the water for the fish. You smile at this. I do not blame you. We are used to it. No one ever believes this story.

"After the bullheads thinned out so you could get a spear through them, as they lay in a matted layer, it was discovered that there were layers of bass and pickerel lower down in the water, and much sport was had with these later on.

"Of course everybody that winter lived on bullheads and they were used in many ways. As I have said, the farmers fed them to their hogs. We had a lazy sort of expressman here named Brush, and he owned a fall-down old horse, which dated back to the Mexican war and was called Santa Anna. Brush insisted that he was too poor to buy Santa Anna hay, and so he fed him bullheads all winter, and that was everything the horse had to eat for four months. Oh, laugh, if you want to, we're used to it. But I'll take you out and show you Santa Anna, a good healthy sort of horse to-day. Brush has moved to Bayfield, but you ask any citizen of this town if Santa Anna didn't live on bullheads and if he don't tell you just what I have I'll retract the whole story. You needn't think for a minute that I'm talking to you out of my head. These things are all facts and you can get all the proof you want. You just go out alone, don't take me along, but just stop any citizen of Mayville you meet and ask him how about the Kekoskee bullheads. That's all I ask you to do. You just sift this story and see if you don't find it true."

We did sift the story and we did find it true. That is the singular thing about the story, and that is why I call it the most remarkable story I ever heard. The facts themselves are not beyond the range of imagination, but to have a whole community rise up and testify to their truth—that proves that imagination had nothing to do with it, and that the facts are facts pure and simple. Ordinarily one man tells a fish story. Here two hundred tell it and tell it just the same. The evidence is legal, convincing, overwhelming. In the total it makes up the grandest fish story ever was. I tell it here but it is nothing. No one man can tell it. It takes a whole town to tell it. To hear it aright you must go to Mayville. There the whole town will tell you this story. You dare not, can not, doubt it. You will believe and you will feel, as we did there, that the entire chain of circumstances in this case constitutes the most remarkable incident in the history of a lifetime.

We met Mr. F. M. Lawrence, leading attorney of the town, and asked him carelessly about this story. Mr. Lawrence was alone, and not within reach of Dr. Clark.

"Oh, about those Kekoskee bullheads?" said he. "Yes, that was a great time. The Widow Sneider, out here a mile on the road, counted 900 wagonloads of bullheads go by in one morning. A dog could run across the open hole on the backs of the fish. Julius Cornell fell off the ice and couldn't get into the water for the fish. The farmers fed bullheads to their hogs, and one fellow here in town, name of Brush, kept his horse all winter on bullheads. He had them stacked up out in the yard. The horse's name is Santa Anna. Want to see him? Come along with me, and I'll show him to you. A good many people don't believe this story, but I'll show you the horse."

We happened across Ed Sauerhering, who owns the drug store, and dropped a hint that we had heard something of this story. He was alone, and couldn't see Dr. Clark or Mr. Lawrence.

"Oh," said he, "those bullheads? Yes, there was an awful lot of them. Julius Cornell slipped off the ice and fell into the hole, but he couldn't get into the water for the fish. That was in the cold winter of 1860. The Widow Sneider counted 900 wagonloads of bullheads go by her house one morning. You see, the farmers fed the bullheads to their hogs. Old Brush, an expressman here, kept his horse, old Santa Anna, all winter on bullheads. He said he couldn't afford hay, and he had plenty of bullheads. Do you want to see Santa Anna? He's one of the features of the town. Come along, and I'll show him to you."

At the hotel we met the landlord, an old German, and we said a word or so about the story.

"Oh," said he, "D se bullhets? My, dot was an offul dime alretty. Yulius Gornell, he fall der ice off, and he gouldn't get into der wasser bei der vishes yet. Efferybody feeds dose bullhets bei der hogs, and I gets me so tired of bullhets I bin sick of life. Old Prush, der egsbressman, he feeds bullhets all vinter bei his horse, old Santy Anny alretty. Yas, dot Santy Anny dond eat noding elses ven der bullhets last. Of you vand to see old Santy Anny you gome along, und I shows him to you. Der Vitter Schneider, dot lives bei one mile on der road out, she hat doch nine hundert vagon loats of bullhets on einzigen morgen gesehen. I shows you old Santy Anny und der Vitter Schneider. Yas, dere is no doubdt upoud dose bullhets not py a longvays yet."

That evening we sat in the hotel office, a kind of town meeting ground. One by one, as the different citizens came in at the door, they were, without previous hint and without possibility of collusion, asked to stand and deliver the Kekoskee bullhead story. One by one they did so, without hesitation, and with absolute unanimity on the points of Julius Cornell, the Widow Sneider, and old Santa Ana, as well as on minor details.

This is what I claim for the Kekoskee fish story. It is not a plain lie and it is not unbridled imagination, but the best possible exposition of facts which do not admit of doubt. The evidence is there, and any man can go and hear it. If he does, he will doubt no more, but believe as I do and as I hope all readers of this do. Moreover, I have myself seen the very spot where the hole in the ice was. I have seen the house of the Widow Sneider, and I have seen Santa Anna. An etching of the latter dramatis persona is forwarded herewith.

I should dislike to have this story meet the ridicule with which I treated it before I had become convinced of its entire truthfulness, and any doubting allusions to it I shall treat as personal aspersions. If the proof offered here is not sufficient, there is plenty more in Mayville.

CHICAGO, Ill., Oct. 1.—It seems, by the issue of Sept. 29, that Mr. Jay Beebe, of Toledo, O., has a grayling pocket located somewhere in Michigan. I question very gravely whether he has any right to keep it covered up that way, but it is very likely that I shall get into it next season, if his promise holds good till then. There is nothing I should so much enjoy as a trip after grayling. It begins to be apparent why so little mention appears regarding the grayling fishing of Michigan. If Mr. Beebe describes his pocket no more definitely than by saying it is 40 miles from a railroad tie, I think its whereabouts will be sufficiently indefinite to bar all guessers. What railroad tie does he mean? This is worse than my game pocket, a great deal.

The 8 cent, No. 25 unbleached linen line, twisted, boiled in oil, duly reached me via FOREST AND STREAM office, and I thank Mr. Beebe for it. I agree with him that it will hold any bass that ever grew. So will a 4-cent chalk line, one of which I shall be glad, if he likes, to buy for him, on the principle that a fair exchange is no robbery. But you have to catch your bass before you hold him, and in bait-casting you have to get your bait out before you can catch your bass. I personally know Mr. Beebe to be a fly-fisher of ability and wide experience, but does he, or does any benighted citizen so far east as Ohio—save the mark!—know so much about this bait-casting business? The line he sends me is fit for neither fly-casting nor bait-casting, although it could be used at still-fishing, or in whipping a small bait with a fly-rod. I never troll for bass myself. I am asking for a strong bait-casting line and am still in the dark in the search for it. To-day I send Mr. Beebe, via FOREST AND STREAM, some fragments which I have just broken from the end of a rotten bait-casting line. This line is raw silk, as I presume all bait-casting lines must be in order to secure perfect pliancy and smooth delivery. When new it was strong, though very small and light. Two days in the guides made it what it is—a very risky medium of communication with a healthy bass. Treatment with oil or waterproofing usually stiffens a line so that it is worthless for casting off the reel. If Mr. Beebe will wind this raw silk line around his finger he will find it will lie close down and not kick up. Then if he will try a bit of his oiled linen line in the same way he will find that it will lie loosely and will kink and kick up. It would not be possible to use it for free-reel casting, I should think, for it is too stiff and sticky. As a bullhead line, now, or as a string to tie up cigarette pictures, or a cord to fasten a minnow pail, or maybe hang up seed-corn with in the winter time, I can see how this line would be a success, but I must enlist Mr. Beebe in further search for a line that will follow a frog 30 or 40yds. from the reel, and hold a bass as long as your arm. Meantime, I wish the winter were over, so we could go grayling fishing.

BROKE THE RECORD.

From time to time I have mentioned the remarkable catches of bass made on the Kankakee River in the ten miles of water near Mak-saw-ba Club. We have had no fishing here to compare with it. I presume over 1,200 bass, averaging say 2lbs., have been taken in that water by the half dozen bass fishermen of the club since July 1. Last Saturday Mr. L. R. Brown caught 25 bass, and on the same day Mr. R. B. Organ broke the club record for the season. Mr. Organ caught 32 small-mouth bass, 1 big-mouth and 1 wall-eyed pike, the latter weighing 6lbs. He also killed 3 ducks and 13 bullfrogs, and moreover did all this between 11:30 A. M. and 4:45 P. M. He caught 23 small-mouth bass out of one hole. He used live frogs chiefly, but caught some fish on spoon and quill bait, and even caught one on a rubber frog. It was his day out. It may be remembered that about a month ago nearly all the bass taken here were big-mouths. Now they are nearly all small-mouths, and the big-mouths are gone. This is the history of the bass at this point every fall. Can any one explain it?

Dr. D. H. Shields, one of the directors of the State Fish League, informs me of a slight miscarriage of justice in the following words:

"I am sorry to inform you that we have had some bad luck. We arrested two netters in the act of fishing, and yesterday, the 26th, was the day set for trial. We had no one to prosecute the case, as the prosecuting attorney failed to get to the trial. Our warden played lawyer and we got beat, they getting clear on the plea that they were catching bait."

The season in this section has been good for bass, fair for trout, bad for mascallonge. E. HOUGH.

175 MONROE STREET, Chicago.

## SOME ILLINOIS WATERS.

QUINCY, Ill., Sept. 27.—The shores of Quincy Bay have been covered with hook-and-line fishermen to-day, and hundreds of good fish have been taken home. The outfit is very simple, consisting usually of a cheap cane rod or a hickory stick with a short line and a single hook baited with angle worms. With the rods a float is used. Many anglers have hand lines only.

In company with Dr. Bartlett I counted fully sixty people engaged in fishing within one-half mile from the boat house of the Illinois Fish Commission, and every one of them had a fair string of fish. Nearly all of the anglers had carp of the scale, mirror and leather varieties and some carried fine specimens of black bass. It grieves me to report that many bass measuring only 4 or 5in. in length are caught and kept for the frying-pan. There is no law at present to prevent this slaughter of the baby fish; but there is no reasonable doubt that the outrage will be stopped by legislation next winter. Dr. Bartlett has informed me that a man boasted of having caught 800 fingerling bass, which he carried home and afterward threw into his ash heap because too soft to use. Quincy Bay is a wonderful breeding ground for black bass and furnishes unsurpassed fishing, but it cannot stand such senseless and uncivilized practices as the above.

Mr. L. B. Bartlett has observed a curious habit of the black bass which is probably not known to some readers of FOREST AND STREAM. At the head of Quincy Bay some years ago he saw something bright flash out of water near the shore, which was overhung by bushes. By expert use of a shotgun he struck two of these objects while in the air and was much surprised to find them black bass. The fish had been jumping out of water to take insects from the bushes.

The carp is well thought of in Quincy Bay and vicinity, and thousands of pounds of these fish have found their way into the homes of poor people, to whom the ease with which the carp can be obtained is a great boon. It has come to my knowledge also that the Stranahan Brothers in Cleveland place carp on their bill of fare alternately with whitefish and their patrons are equally pleased with the two. T. H. B.

### St. Louis Fishing Notes.

FISHING in all the resorts tributary to St. Louis has been remarkably good during the past month. The exceedingly high water of the spring had the effect of restocking all the lakes, and the result is better fishing than for many years past. The writer was at King's Lake one day a short time ago and fishing for croppies was most excellent. Over 500 fish were taken in one day

within half a mile of the club house, and the indications are that there will be good sport the balance of the season. There is also good fishing in the Big and Little Piney rivers, in the Gasconade, and in the St. Francis, Black and Current rivers. Just now Spring Lake is coming in for a good share of attention on account of its most excellent bass fishing. Mr. Fred Hugunin was up at the lake last week, and in a day and a half caught 94 black bass, the largest weighing 4½lbs. He caught all his fish on the fly, and had the best success with the Seth-Green, peacock and the Stewart fly. Spring Lake is reached from St. Louis by the Jacksonville & Southeastern R. R., and round trip tickets are sold to the lake for $6 There is a hotel known as the Idlewild, kept by Mr. H. N. Cook, who will treat sportsmen in a proper manner, and boats and other accommodations can be had by the angler.

ABERDEEN.

### Potomac Notes.

WASHINGTON, D. C., Sept. 13.—The Dove Creek Fishing Club is perhaps one of the smallest clubs in existence, having but four members. The club has a small house near Mount Vernon, fitted with cots and a culinary department, and is always in readiness for the members and their friends. Messrs. W. C. Kimpton, E. C. Ford and H. A. Parker were down last week and had excellent fishing. Their score was 175 white and yellow perch, 2 black bass and one small croaker. The fish were caught right off from the Mt. Vernon dock along the grass near the main channel of the river. Small minnows were used as bait. The river was full of minnows at this point. The capture of a croaker in the river as far up as Mt. Vernon is something unlooked for, and the party were much surprised. The river has been so low that crabs came up, so, we presume, the croaker thought he would make a break for the capital of his country.

We inadvertently referred to Mrs. McCathran, etc., as being with the Helmet Club. It should have read Miss McC. accompanied her brother.

BON.

### Susquehanna Bass.

HARRISBURG, Pa., Sept. 30.—While speeding along the Pennsylvania road from the West I saw from the car window a good ly number of boats engaged in fishing for black bass at Foster's Falls, near Duncannon, Pa., and at Hunter's Falls, which is a little further down the river. A traveling companion whose home is near these grounds says they are famous for bass, and the fishing is good at this time. Stone catfish are preferred for bait, but helgramites, minnows and "crabs" (crawfish) are also used effectively. The river at these points is rocky and full of rapids and eddies, furnishing ideal haunts for black bass. The fishermen were located very near the rocks. Both the Juniata and the Susquehanna still contain the walls of fish traps, and all that is needed to make them complete is a small set net at the narrow end of the triangle. Doubtless on dark nights many of them are in full operation.

T. H. B.

### Montana Notes.

LIVINGSTON.—A number of rods are going into the Yellowstone Park. The fishing is reported fair.

*Arlee.*—The Jocko River here furnishes good trout fishing and anglers are busy. Chair and whitefish are also present. Dull-colored flies are much used. Grasshoppers are equally good. Nearly all the flies noticed by me in use were brown-backles. Mr. Alex. Dow tells me that Jocko Lake farnishes unusually good fishing. Sometimes a single line is rigged with nine hooks and, if left down a short time when the trout are biting freely, will often secure nine trout, or a fish on each hook, at a single time. The boys usually take from 50 to 60lbs. of trout in a day's fishing.

The charr of these waters is the Dolly Varden and it grows to quite a good size. The whitefish in schooling make the characteristic movements in the water and a whole school of a thousand of these fish will all come to the surface at once.

BON.

### Fishing in the Gunpowder.

BALTIMORE, Oct. 3.—There has been excellent fishing in the Gunpowder River this season, and I have taken great numbers of fine white perch during July, August and September. The fishing has been best in the grass that grows on hard bottom near the shore in shallow water. This is a kind of triangular rush called "three-square" by the river men. The fish have now gone out of the grass into deep water near the mouth of the river. On Friday last two of us caught 123 fine large white perch and 19 white catfish in a hole called Stewart's Delight. The water there is 37ft. deep, and, of course, we had to fish with hand lines. Rock have just commenced biting. One party last week caught seven, with shedder crab.

E. A. R.

### Bass in the Bay of Quinte.

POUGHKEEPSIE, N. Y., Sept. 28.—I had an excellent trip of about two weeks, making my headquarters at Trenton in the Bay of Quinte, and had good sport, taking a large number of bass of from three to four pounds in weight and handling them with a 7oz. fly-rod. It seems to me that this ground ought to be better known. From about Aug. 20 to Oct. 10 or 15, I think the Bay of Quinte is one of the finest fishing grounds in the United States, and if we were there at the present time our average catch of bass would be over 3lbs. and would run from ten or fifteen to twenty-five or thirty a day. As I use a fly-rod it takes me, of course, a long time to drown the fish, frequently from twenty minutes to half an hour, but my boatman, who used a steel rod, would hook and draw in two or three bass while I was drawing in one.

J. S. V. C.

### Out of the Ordinary.

MR. L. D. FARGO, one of our most successful fly-fishermen, was casting for bass in Blue River a few evenings since, when a large bat took his fly while making the back cast. The bat fell into the water and when reeled in had the fly in his mouth. His batship evidently mistook the fly for some new-fangled bug, and as it was going his way concluded to take it in, but found, like many other people, that he had "bit off more than he could chew."

Mr. C. M. Selby, of this county, was sitting in front of his fireplace last Christmas, holding his baby grandchild in his lap. To amuse the child he set fire to a common firecracker and held it in his hand till it exploded, when immediately a tremendous explosion followed and the house was filled with smoke and set on fire. The cause of the trouble was a powder flask filled with common black powder which hung on a nail in a closet at the side of the fireplace. But the mystery is what caused the explosion. The closet door was closed tight and the flask had a good spring fastening. As black powder will not explode from concussion a spark from the cracker must have reached the powder in some way. But how could it? The flask was blown to pieces, the closet door torn from its hinges and a loaded shotgun was blown out into the room, but singularly enough no one was hurt. C. C.

RUSHVILLE, Md.

### California.

THE fame of the climate of California draws to that charming State new friends every year, particularly from sections where long, severe winters, followed by trying spring seasons, work such disastrous results among the weak and debilitated.

The great improvements in passenger train service, higher degrees of comfort in the cars, and shorter time required on the trip, combined with the cheapness of the excursion tickets now being sold to California and back by the Santa Fé route, make the journey agreeable, and one can almost say, economical. The many delightful resorts now established in California afford every comfort and luxury desired by the fastidious, and present unique attractions.

The Hotel del Coronado at San Diego, the Raymond, at Pasadena, the Redondo at Redondo Beach and the hotels at Santa Barbara, Monterey, Riverside, Los Angeles and many other points, have grown as famous as any on the Atlantic Coast—and a fact that should not be forgotten is that they are resorts all the year around, although the greatest number of people from the East are in California between the months of November and May.

The Atchison, Topeka & Santa Fé Railroad is now preparing a new illustrated book, descriptive of a trip to California over its lines, which will be mailed free to any applicant who may write to John J. Byrne, Asst. Passenger Traffic Manager, 723 Monadnock Block, Chicago, Ill., inclosing five cents in postage stamps, the amount required to carry through the mails.—*Adv.*

## FIXTURES.

### DOG SHOWS.

Oct. 4 to 8.—Eleventh Annual Dog Show of the Danbury Agricultural Society, Danbury, Conn. B. C. Lynes, Sec'y.
Oct. 25 to 28.—Omaha Kennel Club, at Omaha, Neb. E. L. Marston, Sec'y.
Nov. 22 to 25.—Brooklyn. H. W. Huntington, Sec'y, 148 South Eighth street.

1893.

Jan. 3 to 6.—Mohawk Valley Poultry and Kennel Club. Lyman W. Clute, Sec'y, Ballston Lake, N. Y.
Jan. 5.—Gloversville, N. Y. F. B. Zimmer, Sec'y.
Feb. 21 to 22.—Westminster Kennel Club, New York city. Jas Mortimer, Supt.
June 13 to 17.—World's Fair, Chicago.
Sept. 7 to 10.—Hamilton, Ontario. A. D. Stewart, Sec'y.

### FIELD TRIALS.

Oct. 25.—Third Annual Field Trials of the National Beagle Club, at Nanuet, N. Y. Bench show of the club Oct. 24. H. V. Jamieson, Sec'y.
Nov. 7.—International Field Trials Club, third annual trials, at Chatham, Ont. Amateur Stake, Nov. 7. Open Stakes, Nov. 8. W. B. Wells, Sec'y.
Nov. 7.—United States Field Trials, at Elizabethtown, Ky. P. T. Madison, Indianapolis, Ind., Sec'y.
Nov. 8.—New England Field Trials, at Assonet, Mass. E. Knight Sperry, New Haven, Conn., Sec'y.
Nov. 14.—Fourth Annual Trials of the Brunswick Fur Club, at Princeton, Mass. J. H. Baird, Sec'y.
Nov. 15.—American Field Trials, at Columbus, Ind. W. J. Beck Sec'y.
Nov. 21.—Eastern Field Trial Club Trials, at High Point, N. C. W. A. Coster, Sec'y.
Nov. 28.—Philadelphia Kennel Club Trials, at High Point, N. C. F. G. Taylor, Sec'y.
Dec. 5.—Central Field Trials, at Lexington, N. C. Col. Odell, Sec'y.
Dec. 19.—Irish Setter Field Trials, at Lexington, N. C. Dr. G. G. Davis, Philadelphia, Pa., Sec'y.

1893.

January.—Pacific Coast Field Trials, at Bakersville, Cal. J. M. Kingarif, Sec'y.
Feb. 8.—Southern Field Trials, at New Albany, Miss. T. M. Brumby, Sec'y.

## ROCHESTER DOG SHOW.

IN view of the limited entry at Rochester, it was, perhaps, a good move on the part of the committee in deferring the judging till the second day, Sept. 28. With Ottawa on, the same week, the majority of exhibitors had a practical opportunity of showing their attitude in regard to the Rochester—Hamilton unpleasantness and the result of the Rochester show this year may be summed up in one word—picayune. If the entry list, however, was not large there were some good dogs there, especially in mastiffs and St. Bernards, the former breed, probably, showing as much, if not more, quality in the aggregate than any show this year, and this was entirely owing to the exhibit of the Flour City Kennels. It made one regret more than ever that the genial owner should have determined to disband; however, the decision is irrevocable, I believe, and the illwind should blow some of the other breeders some good. To return to the show. I found the dogs benched in the old style in one end of a miscellaneous sort of a building, half cattle shed and half stable, a very good building, however, and light, airy and dry. "Uncle Dick" was superintendant and he had little to do, comparatively, but did that little well. I believe he had one attendant, and I should, perhaps, include the old darkie who held tight on to the secretary's office most of the time—said office being a loose-box. The judges, Mr. T. S. Bellin, of Albany, who took all claises but greyhounds, wolfhounds, spaniels, beagles, pointers and setters, which were handled by Mr. J. Otis Fellows, rendered their awards in such a manner that there was little, if any, serious kicking. In one or two cases I thought Mr. Fellows was rather severe in withholding prizes for want of merit. It is all very well to draw the line somewhere and I know it is a difficult matter to guage, but in a show of this sort if there is to be any leaning let it be on the side of the dog. Judging commenced about 10:30 the second day. Other remarks on the show will be found in "Dog Chat."

MASTIFFS.—*T. S. Bellin, Judge.*—As stated above, the gathering in these classes surpassed in quality almost any show this year, for we all know how miserably on the whole the mastiff classes were supported during the spring shows, with the single exception of Chicago. Mr. Bellin appreciated the fact that he was in a strange country and in a strange breed, for his heart is still true to the "wires," with the "smooths" as an alternate, and he was very deliberate. In challenge class Caution's own daughter was absent, but Lady Coleus, in very good trim, had little difficulty in overcoming her kennel mate, Lady Dorothy, who lacks size and massiveness to the other, though a bitch brimful of quality and of good type. She is one of those whose youth gave promise of a bigger fulfillment. Cardinal Beaufort, a very short-headed one, fully described in my Chicago report, has improved behind, but is still not true enough, and is not filled out enough in body, nor has he that appearance of strength and massiveness he should have. He won nicely in open dogs (2) over Major Zulu, who loses greatly in head and bone, and is very faulty behind. Then came the bitch class (8) in the language of the classics—a "corker." After considerable handling the judge plumped for Miss Caution, and he was right, but Minna Minting is not far behind; the other gains in head properties, bone and size somewhat. Both are well known; Lady Pamelia, hc., loses to the others in body, being somewhat slack in back, good skull and chest; muzzle could be deeper and squarer to advantage; Linkwood Queen, res., ears not hung right, front good, but head not as it should be, body light and tail *à la* bulldog, and only half of it. Pansy, vhc., has a nice head, a little pinched in muzzle, good forepart, but droops in quarters too much. Exeter Dirce is fiddle-faced and gray, and feet turn out, body best part. Facts is light-faced and poor in muzzle, flat skull, but good body and bone. Topsy II., a snipy-headed one with pups, finishes the lot.

ST. BERNARDS.—*T. S. Bellin, Judge.*—Two good kennels thought each would have a little quiet browsing, but the fences were down and a few others got in. Open dogs (2) as a little more stirring, but really there was only one in it, E. H. Moore's Lord Melrose; he has so recently been spoken of I will say no more than that "Arthur" had improved him on the circuit: Mrs. A. M. Hughes's Lord Wilton, second, loses ever so much to the winner in general shape and massiveness of head, is not quite straight in pasterns and feet, was out of condition quite a good deal, but still is a dog showing lots of quality and true expression, and in proper coat will make a much better showing. Frank Lehr's Major is an almost all white bodied dog with a fairly good head, small-sized to the others, but deserved two letters. The bitch class (3) had lots of quality, but Mrs. Smyth had the persimmon pickers in Sunray and Florette, two handsome bitches full of type and quality, especially Florette. One would think to look at them casually that Sunray had the advantage in length, but the tape says they are about the same, but Sunray beats in bone, height, depth of body and strength of back, Florette dipping a bit behind the shoulder. I think Florette shows the better expression and character in head, both are set on good strong legs. Mrs. A. M. Hughes's Lady Alice, vhc., despite her good body and legs, lost through her old failing, lack of head markings and want of depth of muzzle. She shows her good breeding nevertheless. Lady Gladwyn, Miss Anne and Altonette were winning fresh honors at Ottawa.

In smooth dogs (3) we soon saw that Melrose's several little picnics had come to an end, for here he would have to hustle to keep in front, and he was not in condition to do it with Scottish Leader put down in capital fettle. The decision was a close question, for both have improved on their spring form, and especially Leader. The latter is the bigger dog, though not any stronger built than the other when Melrose is in shape; here he was thin, having eaten nothing since the Sunday before, and was dead and listless, while Leader was all fire and energy. Leader is more massive in head, deeper in muzzle and stronger in loin, but not so good in hindlegs as Melrose, being rather straight in stifles, while Melrose could not be improved in his understandings. Leader has a broader, deeper chest, but when it comes to expression and general quality the palm must go to Melrose, Leader's black side face and high carriage of ears giving him too keen a look, which probably will be softened by age; Dud deserved his vhc. E. H. Moore's Miss Alton had no competition in the bitch class (2); at least, there was another bitch, but her c. card was a present, as she is a weed.

Newfoundlands and bloodhounds were drawn blank, though a weak-looking great Dane, B. H. Clark's Ivan, was wrongly entered in the latter class; got nothing and deserved it.

PSOVOIS, *J. Otis Fellows, Judge.*—H. W. Huntington's Argoss and Chas S. Hanks's Larvonets, really the dogs at Toronto only typographically not the same; fought their battles over again with the result of course in favor of Argoss, neither dog was looking as he should be; Argoss all out of coat and Larvonets with a coat every-which-way and dirty. H. W. Huntington's Princess Irma looking no fatter, was again placed over Flodeyka who though she shows a very pretty quality and better head, loses to the other in sturdiness throughout. Now we've got "to let the judge down lightly," and as we have so many authorities around all aching to say nothing, I had better just give the bare result of the special judging. Argoss, greyhound type, beats Larvonets, a good dog of the "Russian" type. Princess Irma beats Flodeyka, both good ones of "Russian" type, now then Princess Irma beats Argoss for the special. Give it up.

Deerhounds were drawn blank.

GREYHOUNDS, *J. Otis Fellows, Judge.*—A poor collection. Challenge class was blank, open dogs had three entries and one absentee. Mr. Horatio Nelson's Baritone won; he is not true in front, feet turn out a little, not deep enough in loin, better spring of ribs than the others and nicely let down in stifles. Dover, second, same owner, is heavy in shoulders, good bone, is light eyed and wants more rib; barring his head which is coarse, snipy and a bit dished, I liked Woodhaven Kennels' Nubian Prince, vhc., a son of Oldstone, for the place, better formation of body and legs, if he is a bit coarse all around. In bitches (3), the winner was Horatio Nelson's Miss Dollar, not straight in front and falls away behind, and was in soft condition. Lady Laville had the best outline, shows lots of quality throughout, needs more spring of ribs and better chest. Woodhaven Kennels' Spider, vhc., is a fairly well made bitch, too long cast, and all wrong in feet, one hind foot broken and the fore feet big open and flat; loaded in shoulder, broad in skull, long tail but beats all the others in quarters, head and neck.

FOXHOUNDS—*J. Otis Fellows, Judge.*—Only two very poor ones put in an appearance, when I expected to see quite a pack so near the Genessee country. The winner, H. T. Thurber's Elite, is a long cast black and tan, feet turn out, long waisted, but better head, shoulders and legs than the other, William Faby's Fannie, one of the long-eared, small sort, all jumped up in quarters and looks as if she was so tied in limbs that she could not gallop a field.

POINTERS—*J. Otis Fellows, Judge.*—Challenge heavyweights drawn blank and the only open dog entry marked absent. In bitches, L. W. Clute's Vesta C. was the winner, just a fair bitch. No challenge entries in light-weights. In open dogs, however, there were three. John R. Fanning's Staunch Bob, heavy and coarse in head, same in shoulders, was the winner, good straight forelegs, nice body and a good mover; second went to Wm. Faby's Bob, Jr., slack in back, feet bad and turn out, starry eye and ears too high on, a poor one; C. C. M. Hunt's Grouse I thought might have been second, though he is a better field dog than he is on the bench, he is wide in skull, not straight in front but capital body, not good behind, hocks look weak and are capped. The only bitch entered kept away from the excitement.

ENGLISH SETTERS—*F. Otis Fellows, Judge.*—All the classes in this breed were marked—no entry—till the bitch class was reached, when H. C. Hauser's Genessee Bell was brought forward. Here is where our "Uncle" should have exercised that benevolence we know he is imbued with. This bitch, barring a snipy, weak head and lack of coat, just off puppies, is a capitally made one, good body, legs, feet and action, was given vhc. when first would have done just as well; next day the judge had another look and we were instructed to mark it second.

IRISH SETTERS—*J. Otis Fellows, Judge.*—Setter classes were redeemed from nothingness by the presence of Seminole

Kennels' crack team with old Tim and Laura B. each in a challenge class, and well they looked, too. Open dogs (3), Seminole Kennels' Montauk Jr. had no difficulty in accounting for Don H., beating in head, front and body. Pride of Patsey was entered but he had his hands full of trouble with Kildare Glenmore up in the far North, and during the judging a wire was received from Ben Lewis giving the result in Pride's favor. Claremont Heather was alone in bitches; she has been recently described.

GORDON SETTERS—*J. Otis Fellows, Judge.*—In challenge classes Mr. Blossom's Heather York and Flomont each took a blue ribbon under "our only German's" pilotage, who seems, sad to relate, to be forsaking the legitimate in search of the "beautiful." He also put Mr Blossom's Comus in front, in the open dog class, beating Rexmont, Jr., in shape of head, the latter being too short in face, but better tan than the winner, who has not enough of it on muzzle, Rexmont is also wavy-coated, but stands on good legs, all round the better one won. John Panckner's Rochester Bess was the only bitch, and here Mr. Fellows, I thought, was again a little over anxious not to be too generous. This bitch has quite a nice body, head a little heavy in skull, but of good outline, tan a trifle light, good legs and an excellent mover: with no competition deserved first easily.

SPANIELS—*J. Otis Fellows, Judge.*—With the Spaniel Club's A1 classification the entry should have been better, and a spaniel man judging, too. Challenge fields, no go. Open black dogs, E. A. Wilson's Brantford Mohawk alone, well known. Next class was challenge cocker dogs, and here Geo. Bell fared better with his second string than he did further North with his company of stars. King of Obos and Amazement were alone, each in their challenge class, then his Obadiah, that won fame when he sired Fascination, won, unchallenged, in the open dog class. Another skip and G. W. Foster's Busy F. is found in the any other color bitches, and here Mr. Fellows's eyes fairly gleamed, and a long pent-up ah-h-h! went out like a lost chord, for Busy was one fashioned after those of his own heart—a worker but a pretty one, too, a little plain in head, but a capitally made bitch and excellent mover. This finished the spaniels—just five of them.

COLLIES—*T. S. Bellin, Judge.*—Not very difficult classes, one in each. Seminole Kennels' Roslyn Dandy and champion Metchley Surprise for the challenge winners and same owners' Chrysolite alone in open dogs, with Crissey, from the same kennels, the winners of the bitch class, their Bertha II. being absent. All the collies were from Seminole Kennels and have all been seen on the benches. Dachshunds did not fill.

BEAGLES—*J. Otis Fellows, Judge.*—It did not take long to do them, for it was just a walking in and out for the one entry in each class, and the division was a liberal one. Challenge class had Rockland Kennels' The Rambler, looking in good shape. In open dogs Rockland Kennels' Jack Rowett was also alone; he gets his stern up a bit and muzzle is long, otherwise a nice stamp. Same owners' Weenannon showed a little temporary lameness, but took his blue ribbon without competition. I spoke of her at Kingston; she has a fair front, is faulty in eye and brow. Rockland Kennels' Duce, Jr., was thought only good enough for second, first withheld, in dogs under 13in; he is pinched in muzzle, weak in pasterns, nice body, but a poor shower, and allowance should have been made. Diamond Krueger, entered in the bitch class, was absent.

The bulldog benches were found empty.

BULL-TERRIERS.—*T. S. Bellin, Judge.*—The quality of the few entries on hand was quite appreciated, and we were surprised to see John Morehead, Jr.'s Streatham Monarch turn up in the challenge class. He has got down to himself again, and was looking better than two or three weeks since. In open dogs (1), W. J. Higginson's Victor Bendigo, second, was rather hardly dealt with, considering the stamp of bull-terriers we generally see at small shows. This is a well-bred dog, heavy in chest and shoulders, I'll admit, feet turn out too, but his head is not a poor one and his ears are A1; he shows lots of quality and should have had the blue ribbon, there being no other in the class. In bitches (2) we were introduced to quite a smart terrier, a Bendigo bitch; good head, excellent front, straight as a string, good quarters and tail, but a trifle slack behind the shoulders; feet could be a bit closer and eye smaller and darker, and she would be a first-ranker. Nellie Harper, vhc., same owner, is some distance behind; too much stop, not straight enough in front and too heavy in shoulders, big eye and cheeky; still all white.

FOX-TERRIERS—*T. S. Bellin, Judge.*—Mr. Bellin gave a sigh of relief when these came in and one could see at once that he had struck his own street. No challenge entries. In open dogs (2) the old battle was fought over again between Mr. Rathbone's Punster and Mr. Banks's Rattler, and this time the Albany dog scored, cleaner in shoulders and a little more the terrier, so the judge thought. In bitches (3) first went to Mr. Rathbone's Moonray, who beats N. Hucker's Yorktown Fussy in head, body and front. In the novice class (2) the same two came out again. Wire-hairs saw some fairly good ones, nothing to boast about though. In dogs (2) C. L. A. Whitney's Jack Prompter won nicely over Chestnut Hill Kennels' Suffolk Trimmer, beating in terrier character of head, expression and coat, carries his ears better and is a better mover. Trimmer excels the other in front, legs and chest, and was filled out better in body than in early part of the month. In bitches (2) H. W. Smith's Sister Trick and Chestnut Hill Kennels' Suffolk Tease were placed as named. Tease loses in head—shorter—coat and carriage of ears to the winner. Jack Prompter, Sister Trick and Suffolk Trimmer furnished the winners in the novice class. Jack Prompter won the special in dog division and Sister Trick that for best bitch.

Black and tan terriers were *non est*, and Irish terriers might as well have been, the only entry being a weedy, smutty-colored one; prizes withheld. Scotch terriers.—The only entry was W. S. Bemis's Gullnie, a bad 'un, snipy-muzzled and light throughout; the judge gave her a c. card. Dandies no go. Skye terriers.—J. J. Hooly's Nellie, the only entry, had a fair coat, and that was all she had to recommend her. Dot, Henry Dodd's Yorkshire, was one of the old sort, and when I say the little tan she had was at the right end, she has praise enough; she was given hc. Of course there were no Clydesdales; they were in the other field.

PUGS—*T. S. Bellin, Judge.*—Something better here, with Seminole Kennels' Bonsor in the challenge class. He beats Jacob Brombach's Bradford Rowdy all to pieces; better head, body and front. The dog entry was absent. In bitches Seminole Kennels' Midget was far too much for J. Brombach's Frisk, hc.; better in color, muzzle, body and tail.

TOY SPANIELS, *J. Otis Fellows, Judge.*—Jacob Brombach's Duke of Wellington, first, was the only representative of the King Charles, his coat is rather curly but he has a fairly good head, nice rich tan and lots of coat. The same owner's, Golden Rod was the only Italian greyhound there, and she is a bit large and coarse, out at elbow and too scooped out before the eye; she was awarded the blue ribon. Boston Model was the last to appear and she is George Thomas's whippet; she stands the racket well. H. W. LACY.

---

Our Irish setter men can scarcely be accused of "mug hunting." At Ottawa there were six Irish challenge entries and five of them from the Oak Grove Kennel. Without any injustice to any one the class might have been divided by sex. The prize was $5. In the Gordons, with two entries in the challenge class, Leo B. and Duchess of Waverly were placed equal first, but Leo B. got the special. The atmosphere is exceptionally frigid when "Ben" falls behind.

## OTTAWA DOG SHOW.

[*Special.*]

OWNERS did not patronize the Ottawa dog show so liberally as last year and as a result the entries fell far short of the number that could have been taken. There were 193 entries with about 15 absentees and double entries. Taken as a whole the quality was good, but the judging was the worst I have ever seen. Mr. Corbett's *debut* as a judge was promising, but the other aspirant for judicial honors, Mr. Curtis of Simcoe, who judged spaniels, showed that a man may own and breed dogs for a number of years and still know very little about them. He spent twenty-three minutes over two Clumber spaniels, Quester and Darby, and then told me that, while he knew the former was the better dog, he thought he was going to be blind and would put him back on this account. He gave the crack dog Fascination nothing in challenge cockers. It was universally

FOX-TERRIERS AT ROCHESTER. "WHICH WINS?"

agreed that Mr. Curtis was not a success as a judge of spaniels. Dr. Wesley Mills, who was down to judge all breeds outside of pointers, setters and spaniels, spent two days and a half in awarding prizes to 105 dogs.

At 12:50 P. M. on the third day the handlers decided that they did not care to wait in the ring any longer, and benched their dogs, so some specials were not awarded. The dissatisfaction was general over his decisions, and several new precedents were established. Although advertised to judge Great Danes, Dr. Mills entered his bitch Minerva's Fawn in the challenge class. This class he got Mr. Corbett, the pointer and setter judge, to pass upon. Fawn received the blue, whereon her owner resumed his place and judged the other classes for Danes. In black and tan bitches the Doctor awarded English Lady first, but about an hour afterward, some one in the meantime having informed him that the "Lady" was deficient in "ivories," he ordered the class out to be rejudged. The handlers properly refused on the ground that a judge's decision is final except in cases of fraud or misrepresentation; that there had been neither of these, and the award, being entered in the judge's book, the decision was final. The committee met and ordered the dogs out,

JUDGES AT ROCHESTER.

T. S. BELLIN. J. OTIS FELLOWS ("Uncle Dick").

but the handlers still refused, and so the matter rests. Mr. Corbett, who judged pointers and setters, did well.

Troublesome, Mr. Bell's new cocker bitch, was protested for being under weight. She weighed 16¾lbs. The protest was sustained, but Mr. Wilkie, of Toronto, entered a protest in Mr. Bell's name to the C. K. C., on the ground that no limit of weight was given in the premium list, nor was any mention made of the American Spaniel Club standard in the rules. The members of the C. K. C. executive met, but no decision was arrived at, so the matter will go before the full executive, and in the mean time the award stands, Troublesome first.

The show was well managed, and until the third and fourth days, when more disinfectant could have been used with advantage, it was perfectly sweet. Clean it was all the time, attendants civil, food good. Mr. Geddes, the superintendent, received little or no assistance from his committee, and to him all the credit is due. The representatives of the press were forced to buy catalogues for the use of their papers in setting up the prize list. This was not the fault of the committee, the catalogues being published as a venture by Mr. P. G. Keyes.

Among the visitors noticed were Mr. A. D. Stewart, Hamilton; Messrs. A. A. MacDonald, H. P. Thompson and A. W. Wilkie, of Toronto; R. E. Elmer, Kingston; Dr. T. W. Mills, Montreal, and Messrs. W. H. Middleton, J. Wolfred Wurtele, L. N. Bate, F. P. Robson, Dr. Hurdman, C. E. Living, Dr. S. S. Davidson, of Ottawa, and many others. Messrs. Ben and Joe Lewis, George Thomas, E. Booth, C. E. Fenton and J. J. Spracklin were all here with their strings. There were several sales made, the most important of which was Ben Lewis's purchase of Mr. Geddes's good young cocker Donovan, the winner of several prizes in the best company, at a stiff price.

POINTERS—*C. H. Corbett, Judge.*—The competitors were all at Kingston. Devon Nell was alone in the challenge class. Rock II. and Donovan were the competitors in the open class. Donovan is a poor specimen, with a bad head and a body to match. Rock II. is rather cheeky, very square at back of skull, heavy and coarse in head, very straight behind, coarse in tail and with foxhound rather than pointer character. He is a very strongly made dog, with lots of bone and muscle, and good legs and feet, but is withal a poor dog as a pointer. In the open bitch class the competitors were placed in this order, Chaira, Lord Graphic's Juno and Frivolity, which is correct. All have been referred to before.

ENGLISH SETTERS—*C. H. Corbett, Judge.*—Edgemark, alone in the challenge class, won. He does not improve in head, which lacks refinement. Sultan, now well known, won well in the open class for dogs. Ben Hur was second and Tony Gladstone, third, rather coarse in head, was placed over Kent's Rex, better in head, but out of condition. Locksley II. got hc. He is very coarse in head. In the bitch class Annie, good in bone, poor in head, long coupled, in poor condition, and knuckling over when walking, was placed over Forest Louise, light in bone and open in feet, but otherwise a nice bitch. This award might have been reversed.

IRISH SETTERS—*C. H. Corbett, Judge.*—These made the best showing yet seen at Ottawa; in fact, were a show in themselves. With the exception of two local dogs, there was not a poor one in the classes. The Oak Grove Kennels furnished five challenge dogs, and these, with Elfreda, made a grand lot. The judge selected Duke Elcho for first place, but it might better have fallen to Norna or Kildare, for Duke Elcho has become coarse in skull. The open class for dogs furnished two good ones in Pride of Patsey and Kildare Glenmore. Pride of Patsey won well. He is light in color, might be better sprung in ribs and carries his tail very high; but in all other respects he is such an one as is rarely met. His rival loses to him in head, depth of chest, outline, etc. Elfrin, reserve, and Elfrus, vhc., are still young and undeveloped. Bismark in open dogs and Mona among the bitches are very poor ones. Rose Sarsfield, first in bitches, wins well from Irene. She is beautiful in head and good generally, though rather straight behind and light in color. Irene loses in head, coat, outline and general quality. Pride of Patsey was given the special for the best of the breed. To place him over all the challenge dogs and bitches was a bold step, and only warranted after careful comparison.

GORDON SETTERS—*C. H. Corbett, Judge.*—With the exception of Royal Nibbs, a coarse and poor specimen, the dogs shown were seen at Toronto and Kingston, and were placed here in the same order. Leo B. and the Duchess of Waverly were given equal firsts, and Leo B. the special.

M.

SPANIELS—*Mr. Curtis, Judge.*—This breed shows quite a falling off compared with former years—77 in 1891, 33 in 1892—in fact the small entry in the spaniel classes is largely responsible for the reduction in the gross entry, when compared with that of last year. Various reasons have been assigned for this, but no satisfactory conclusion appears to have been reached. There is little doubt but the selections made by the judge at Toronto had a chilling effect upon spaniel breeders, which will require time and good work to overcome. The judging here was on nearly the same lines, only toys getting a look in. Thus does the evil that men do live after them, if it were interred with their bones, the coming year might be considered as "full of promise."

IRISH WATER SPANIELS had but one entry, Marguerite. She is well known, having made the entire Canadian circuit.

CLUMBERS.—Challenge class had but a single representative, champion Boss III., a wreck of his former greatness. In his present condition it would be unfair to this old veteran to make any comments. Darby was placed first in open class for dogs. He is wrong in head, eyes too large and full, nice bone, body and coat, a taking little dog, rightly placed. Quester, better in muzzle than the winner, eyes too light, loses in body and bone, also in movement, which is like that of a pacer.

FIELD SPANIELS.—In the open class for dogs Wonder, leggy and crooked in front legs, body not well ribbed up, eyes light, was placed over that good little dog Corktown Cupid, whose chief fault is in being rather small for the class, however he smothers his competitor in quality and ought to have been placed first. Bounce, third, a coarse-headed cocker with a white frill. In open bitches, Dot Smirle, the same good little one she always was, beat Queen, a very good type, eyes a shade light, out at elbows, and in poor condition. This should have been reversed, as Dot is but a cocker while Queen is a typical field spaniel.

COCKERS.—The challenge class had four entries, and champion Red Jacket won the coveted blue. He beats Fascination in head, the latter's being round in skull, too deep in stop, eyes prominent, and muzzle undershot; back of the head it is a near thing between the two. Red Roland, coarse in skull and muzzle, crooked in front, and the old veteran Brant were not "in it." The latter shows age. The open class for black bitches was a very good one. Troublesome, the Toronto winner, was selected for first, but objection being made on the ground that she was too small for the class, she was weighed by the committee, in the presence of the judge, and just tipped the beam at 16¾lbs. Notwithstanding this she was allowed by the judge to compete, and awarded first. Rideau Romola, head too much of the Fascination type, second; Molly Bawn, too light in eyes and coarse in head, third; a protest followed and the committee unanimously decided that Troublesome was not eligible to compete as a cocker, being under standard weight. This gave the others a move up all round. Volo, vhc., is sour in expression, pinched in muzzle, and shown in poor condition. Rideau Reine is a trifle cheeky, nice bone and feather, out of condition. Red Obo, ears set high and crooked front legs, was first in the open class for dogs other than black; Nerve, second, is a black and white, domy in skull, undershot, and does not stand straight in front. Vic, first in other than black bitches was obesity itself, bone not too heavy, expression not unlike that of a beagle, feet turn out. Cherry Ripe is a pretty little toy, not a cocker; Rideau Robina is a nice black and tan with a good head and expression, bone and coat A1, should have been first. Novice class for dogs had but two entries. Corktown Comet, first, a heavy-headed dog, immense bone, coat wavy. Nerve, second, described before. In the novice bitch class, Corktown Cleo, domy in skull, nice eyes, muzzle undershot, was placed over that good bitch Rideau Rhea, typical in head and character, good body, legs not exactly straight in front. Rideau Romo, wrong in head, ears rather short, did not show well.

### JUDGE'S REPORT—DR. WESLEY MILLS.

I HAVE at the outset to thank the superintendent, ring stewards and others for their courtesy and assistance, and the exhibitors for their readiness in placing and moving their dogs, thus assisting me to get at their real qualities. It was a pleasure to find the show so clean and sanitary in all respects.

MASTIFFS.—Mastiffs were not well represented, as only three specimens competed, not one of these being first-class or in thoroughly good condition. Eaufrid was the best of a medium pair in the open class. He has a bad right eye, a deformed skull, and is smutty in color in parts. His head and form generally are passably massive, his legs fair and

feet good. Hero, second, a young dog, is clearer in color, with a fairly good coat. Ears not black enough. He is much undershot, while the winner of first is level in jaws. At present he is light in build. Ealderman was absent. Attraction, the only bitch, was seen at Toronto and Kingston. She was shown very thin. Her muzzle is not right, but her color is fairly good and her mask excellent; feet and legs fair.

ST. BERNARDS.—St. Bernards were few, all from Col. Ruppert's kennel, but made the best show of this breed yet seen at Ottawa. They were well looked after by this kennel's competent and gentlemanly representative. Aristocrat, alone in challenge class, seems to bear the wear and tear well. He is too well known to need description. I preferred Lady Gladwyn, not in as good condition, for the special for the best of the breed. As at Kingston, Lady Gladwyn was placed over Miss Anne. The latter has a head of much quality and character, losing to Lady Gladwyn in squareness of muzzle, but superior in some respects, *e. g.*, ear; but in legs, feet, general build, massiveness, she is superior, and taking her as a whole I had no doubt about placing Lady Gladwyn first again. Both move well and are very fine bitches. Altonette is of a different stamp, too tall for her bulk and generally much behind these two.

NEWFOUNDLANDS.—A single dog represented this breed, and but for a curly coat and rather close hock movement he was not a bad one. In head, expression, color, texture of coat and eye he is a good one.

GREYHOUNDS.—Gem of the Season seen in better condition easily defeated Pious Pembroke and Bestwood Daisy, a beautiful animal, lacking in substance. Pious Pembroke competed for the first time in the challenge class. These are all so well known they do not need description. In the class for open dogs Justinian had an easy win. At first sight he is not a taking dog, wanting those curves which add so much to a greyhound's appearance. He bears examination well. His head is good, legs and feet excellent, front straight but might be a little narrower, shoulders well placed but with too much width between the blades, ribs well sprung, back straight and well muscled, loin rather flat but strong and quarters good with second thighs not equal to some other parts; hocks good. Gem of the Season easily beat him, however, for the special. Jack of Napanee, second, is weak in head with brow too marked, straight in shoulder, short coupled and in soft condition. In the open bitch class Lily of Gainsboro defeated Jetsam. The latter was shown fat and soft, which exaggerated her faults and possibly concealed her merits, for no man can tell what a fat animal may be when in proper condition. She has a very fine head, good legs, neck and feet, is strongly rather than gracefully made, and was rightly defeated by Lily that has both strength and grace. Jetsam is a poor mover, is flat in loin and rather straight in stifle. Lily is not so good in head, is narrower in front but moves in a way that raises a suspicion of weakness in front. She excels in chest and is good in loin and quarters; the arch in loin begins and ends too soon. Galatea is a poor one, very wide in chest and not straight in legs, rather low in the leg and flat in loin.

DEERHOUNDS.—Harvie, just a fair one all around, defeated a big, coarse specimen, Robin, shown grossly fat and with a doubtful movement behind.

FOXHOUNDS.—Only three good one shown in both classes. Mack, the winner in open class dogs, is not correct in head, especially skull, but back of the head he is a rare good one with lots of character as well as strength. Genius, not correct in head either, is showing age and was not in good condition. He toes in a little. The other three were poor ones. In the bitch class Vexation was absent. Rose is essentially a bad one, and I hope I may be forgiven for awarding her a second prize. The expression of dogs, like that of men, does not often belie them, and those that tried to get this bitch off the bench would probably appreciate "Uncle Dick's" advice: "Never have anything whatever to do with a dog with a yellow eye." Gyp is a nice hound of excellent head formation and expression, but in body and character as a whole she was surpassed by the winning dog for the special.

HARRIERS.—I would recommend to the executive to abolish this class until we get some real, undoubted harriers. Dogs and bitches competed together, three in all. Two of them arrived late, having been detained at the railroad station. But for his grossly fat condition, Dandy, one of the late arrivals, would have won outright. As it was he was given an equal first, the only dog, Hunter, having been judged before Dandy arrived. The bitch Daisy is light in body.

BEAGLES.—Not a good lot nor numerous. One dog, Bob Krueger, was the best of them—just a fair specimen. Butterfly was absent. Elfie, barring a weak muzzle, is good in head and expression and beagle character, was placed over. Snow, not the right stamp in head, though fairly good in body. Dot was a ball of fat, with a little beagle visible.

GREAT DANES.—Minerva's Faun scored her first win in the challenge class, being alone. In the open dog class Tonko defeated Don Cæsar, Jr. He is better in size, bone and Dane character, though he is wide in skull, too short in head, and is somewhat dish-faced. He is light in loin and not well developed in quarters and second thighs; does not move very well behind. Tail rather poor. Don Cæsar, Jr., is throaty, has a bad eye and expression, poor in color and ring-tailed. He is moderately good in body, and is more symmetrical, and moves better than his rival. In the open bitches Juna, alone, won. She is small and weak in head, but moves well, and is better put together than her larger kennel mate, the dog Tonko. As Dr. Mills's bitch was shown in the challenge class, Mr. Corbett was associated with him in the judging of Danes, the Doctor declining to judge his own dog. If there had been competition she would have been withdrawn.

COLLIES.—Ottawa is slow to get rid of poor collies. At the first show here in recent years all prizes were withheld, and if this year the same course had been followed, with the exception of the firsts, no injustice would have been done. McEwen & Gibson's Samson won in the open dog class. He is a very big dog, well and strongly made, with good coat, fair head and collie expression. He is without that full eye so foreign to true collie character, yet often seen in the winner of the present day, as, *e. g.*, in Samson's kennel mate, Dudley Chris. Jack Broman is not a collie in head at all and was passed over. Colie has a very bad light eye, and though he would not put up his ears in the ring I suspect they get beyond half prick at times. But for the very bad ones that have been shown here I would have withheld the prize. The dog is pretty fair in coat, body, legs and feet, and his head is not wholly wrong. In the bitch class Viola was absent and Dudley Chris won. A bitch of nice coat, head outline and quality, but with very light bone; could not stand work in rough country.

BULLDOGS.—Carisbrooke, well known, won, opposed only by a specimen of which it may be said, "Let him pass, he is a bulldog!" He is such an one as I can believe was seen in the long ago. Unfortunately Lady Venus, taken sick at Kingston, succumbed on the way to the Ottawa show. She was a taking little creature that I would have liked to see often.

BULL-TERRIERS.—With the exception of two local dogs, all wrong in type, the entries were good. Count II. was placed over Chatham Prince, which he excels in head, musclings, quality and character. This dog's muscles stand out in beautiful form, as they would on more dogs if they were in proper condition. Coming to the bitches, champion Starlight, though in whelp, on comparison was found to be much in advance of the others. Grove Duchess excels Loumont Kit in bone and strength generally. Kit is light in bone, otherwise not a bad one. Champion Starlight won the special.

FOX TERRIERS.—A great improvement over the past here in one respect—not many downright poor ones shown. Blemton Trump was alone in the challenge class and, of course, won. He wears pretty well. He was given the special for the best fox-terrier in the show, as he excels the winner in open class dogs in coat and eye. In the open class the winner of first, Tom Tom, might be better in head, has a rather light eye, not of the worst by any means, turns his feet in slightly and might be worse in coat; but he has excellent neck, body, legs, feet and stern, and shows much terrier character. Take him all in all, he wins well. Rideau Rivet and Calchas were placed equal second. But for cheekiness and defective movement I should have placed Rideau Rivet over Calchas, as he has an excellent coat, front and general make-up, with good, hard muscle. He has also very nice ears. Calchas might have a much better head and be narrower in front. He is well muscled and shows much character, combining activity, strength, etc. He looks a worker. My Fellow, third, I should be disposed to place very high in a puppy class. He is of a nice sort, with beautiful head, though his ears are rather thick and are not carried quite right. His feet are somewhat open and look large; coat abundant but not flat enough and rather soft. In an open class in comparison with old dogs he does not show enough character, strength and making; has not enough substance yet, but when he gets older he may turn the tables on some placed over him now. Seacroft Bourbon, reserve, has a good head including ears, though his eyes are bad, which show all the more on account of the head being so black; good legs and feet and nice front. But he is too high in the legs and too big, and on the whole he does not compare well with the others. Though his owner had a high opinion of Bob, the people could not see it in the same light and passed him by. In the bitch class there is not much to choose between first and second, as both have similar excellencies and defects. Both are wide in front, have fair heads and hard coats, but Grouse II. excels in bone. Damson is a very bad shower, but has some merit; head, front and coat good; legs and feet poor. It was difficult to judge of ears, body and character, she showed so badly. Seacroft Fuss, reserve, is rather wide in front and not quite straight; feet rather large and flat, head fair. Lady was scarcely worth notice. Clytie is not of the modern type. In the novice class the winners were the same mostly as in other classes.

A moderate wire haired one turned up; My Queen, reserve. She has a fair head, legs and feet, but coat is not hard enough and she did not show well. Pincher a poor one got c. For the best in the open classes the dog Tom Tom was preferred.

IRISH TERRIERS were much the same lot as was seen at Toronto. Boxer was alone in the challenge class. He is big enough, coat poor now, is rather wide in front and getting thick in skull. Jack Briggs, first in the open class dogs, has good legs, fair feet, moderate coat and color, and some character, but not enough. His head is decidedly good. He is, however, very light in body, lacking both breadth and depth, and seems to me to have been overpraised. Gallties, second, is rather wide in front and loaded in shoulders; good in expression, only moderate in coat, which shows silkiness on head. He has, however, so much character he gains on one the more he is studied. Hanover Boy, third, has a bad eye, is rather cheeky, and shows dark shadings about the head, otherwise he would have stood higher, for his character is not to be denied. Commissariat, uncropped, and with fairly good head and ears, was reserve. He abounds in true Irish character, has an excellent coat and is grandly muscled. He is much too big, but is not coarse, and I regretted exceedingly that so good a dog had to be put back for size simply; but if we have standards judges should keep to them. In the bitch class there were only two competitors, Salem Witch and Killarney Girl. The latter has the best head, and is the strongest and best muscled, but in all other respects Salem Witch excels her. The latter is a very poor shower, but in releasing her in the judging space in the yard and petting her to frisk about, her fine front action was evident, which was quite in keeping with beautifully placed shoulders. She was the best colored Irish terrier in the show, and has a first-rate coat, and as these two together count 25 per cent., she seemed to me to win easily, for her rival has but an indifferent coat. Jack Briggs won the special for the best Irish terrier.

BLACK AND TAN TERRIERS made good classes. Sir Wallace, alone in the challenge class, is wide in skull and rather cheeky, very wide in front and not quite straight. His tail is fair and tan and markings good. In open class dogs a very good and a very bad one came together. Salisbury, though not in the best condition, was still able to win the special for the best of the breed easily. He was, of course, first in the open class here. His competitor, Slick, is bad in tan and worse in temper; a coarse big one in bad condition, with but little to recommend him. In the bitch class there was plenty of competition. For first place the choice lay between English Lady and Louie. The former's tan and markings are fair, tail medium, head rather good, but she loses in this feature to Louie. The latter is rather wide and not perfectly straight in front and has wretched tan. Both are of good size and made well. Louie lost in condition so much that, all things considered, I thought Lady deserved first place. Unfortunately, all things were not considered. I made it a point to look at the teeth of every dog that came before me, and especially in the terrier classes; but in some unaccountable way I missed Lady, that is very defective in teeth. Had I seen her mouth I would certainly not have placed her over Louie, making all allowance for the latter's poor condition. Mona, third, is a daughter of Kaiser's, with many of that dog's excellencies. She is rather high on the leg and not yet deep enough in chest, but has a fine long, lean head and the best kind of an eye, correctly placed, good legs, coat and muscle, fairly good tail, excellent tan, but without the thumb mark. Her ears do not now stand well. Her condition was nearly perfect. Rosette was given reserve. Though large and rather wide in front, her formation is good, head fair, tan and markings and character first rate. Rochelle Topaz is a small uncropped bitch with ears good enough to make one wish that cropping were a thing of the past. She is good in tan and markings, in nice condition and of good size, but her head is a good deal spoiled by eyes wrong in color, shape and position, and overhung by brows, a feature foreign to this breed.

SKYE TERRIERS.—Sir Stafford readily won from Toodles, but a moderate specimen, while Jack is in coat much more like a Paisley terrier than a Skye. The bitch class contained two good ones, Islay and Endcliffe Maggie. Islay has a long coat of the proper texture, but it is not straight, and in front this gives the bitch an unkempt appearance that greatly detracts from her Skye character. On the other hand Endcliffe Maggie is thin in coat now, but one can judge of its texture. To the eye she shows much the most character, and excels her rival in head, loin and muscling generally. I had no doubt that she deserved the first position. Prairie Flower, straighter in coat than Islay, is inferior in other respects, while Scotch Rose is much behind in head, etc.

BEDLINGTON TERRIERS.—Sentinel II. was entered but did not appear, so that no prizes were awarded in this class.

DANDIE DINMONT TERRIERS.—Some good ones were on hand. Dogs and bitches competed together. King of the Heather, not first rate in color and unduly crooked in legs, but with a good head, strong and long body and lots of character, won from a nice bitch in Heather Madge, well ahead of Laird of the Heather. Amphion was absent.

YORKSHIRE TERRIERS.—Three rather nice specimens and one moderate one put in an appearance. Little Pop, though taller, excelled in coat and movement, but is too high on the leg. Baby Bunting was much the better of the two bitches and was given the special. Mrs. Pitt's specimens were better in body, color and tan than those usually seen.

PUGS.—Bob Ivy, alone in the challenge class, won. He is getting a little wide in front and off in front legs. On this occasion he carried one ear indifferently. The open class dogs comprised three fair specimens, a great improvement on what has been seen in Ottawa on former occasions. Meddler, just a moderate one, with neither great merit nor conspicuous faults, won from Jim, too large, rather harsh in coat, wide in front and light in bone, but with beautiful clear color, good mask and nice black ears. Trixie was smutty, quite as large and not so good in head color.

POODLES.—Biglow, a dog of moderate merit, was given the prize without competition.

POMERANIANS.—The owner of two local dogs, that had up till this year had it their own way, could not understand why they should not be at the head of affairs this year also; the fact was that a better one than either from Toronto turned up. Jumbo, first, is too large, but his coat is straight, his formation of body and movement good. The coats of the others are bad, and they have weeping eyes and only fair heads. The blue with which they had been rinsed was also evident enough. There was little between them and the smaller was chosen for second prize.

DACHSHUNDS.—Jessie Victoria, shown very thin, was clearly superior in head, coat, skin and general quality. Fritz is coarse all through.

Before closing I cannot but remark on two or three matters that impressed me unfavorably. At this show some six to eight dogs competed in wrong class, according to C. K. C. rules. As president of the club, I would have protested these dogs, but that I think exhibitors from the United States should have been warned through the press that challenge dogs cannot compete in open classes on this side.

Many of the dogs were greatly broken up from unpleasant little meetings among themselves. Who are to blame for this?

Not a few of the dogs had lost flesh and failed in condition generally more than they should since the circuit began. I fear that at some of the shows the dogs were insufficiently fed. In one at least the windows were kept open too much. There was no necessity for it. On the whole, the Ottawa show and the entire circuit was a success.

LIST OF AWARDS.

MASTIFFS.—*Dogs:* 1st, W. H. Middleton's Caufrid; 2d, A. E. Garrow's Hero. *Bitches:* 1st, H. Falconer's Attraction.

ST. BERNARDS.—CHALLENGE—1st, Col. Ruppert's Aristocrat. —OPEN—1st, 2d and 3d, Col. Ruppert's Lady Gladwyn, Miss Anne and Altonette.

NEWFOUNDLANDS.—1st, J. B. Souliere's Noble.

GREYHOUNDS.—CHALLENGE—1st and 2d, A. W. Purbeck's Gem of the Season and Pious Pembroke.—OPEN—*Dogs:* J. W. Wurtele's Justinian; 2d, J. Henderson's Jack of Napanee. *Bitches:* 1st, A. W. Purbeck's Lily of Gainsboro; 2d, J. W. Wurtele's Jetsam. Very high com., L. M. Bates's Galatea.

DEERHOUNDS.—1st, A. M. Lyon's Harvie; 2d, Col. Audet's Robin.

FOXHOUNDS.—*Dogs:* 1st, J. B. Dowler's Mack; 2d, J. Gibbs's Genius; 3d, Wm. Powell's King. High com. and com., S. Sherwood's Mat and Pat. *Bitches:* 1st, J. A. Spracklin's Gyp; 2d, J. P. Dunne's Rose.

HARRIERS.—Equal 1st, Wm. Powell's Hunter and F. L. Mabee's Dandy; 2d, F. L. Mabee's Daisy.

BEAGLES.—*Dogs:* 1st, F. B. Robson's Bob Krueger. *Bitches:* 1st and 3d, F. P. Robson's Elfie and Dot; 2d, A. Geddis's Snow.

GREAT DANES.—CHALLENGE—Mount Royal Kennels' Minerva's Fawn.—OPEN—*Dogs:* 1st, B. F. W. Hurdman's Tonko; 2d, Shirley Stewart's Don Cæsar, Jr. *Bitches:* 1st, B. F. W. Hurdman's Juno.

POINTERS.—CHALLENGE—*Dogs:* 1st, Mount Royal Kennels' Devon Nell.—OPEN—1st, Connell's Rock II; 2d, H. M. Graydon's Donovan. *Bitches:* 1st and 3d, Mount Royal Kennels' Chaira and Frivolity; 2d, G. O. Smith's Lord Graphic's Juno.

ENGLISH SETTERS.—CHALLENGE—1st, F. N. Brown's Edgemark.—OPEN—*Dogs:* 1st, E. J. Walsh's The Sultar; 2d, Pennsylvania Kennels' Ben Hur of Riverview; 3d, Joe Lewis's Tony Gladstone. Reserve, R. Rittvore's Kent's Rex. High com., H. M. Graydon's Locksley II. *Bitches:* 1st and 2d, Joe Lewis's Annie Frost and Forest Louise.

IRISH SETTERS.—CHALLENGE—1st, Oak Grove Kennels' Duke Elcho—six entries.—OPEN—*Dogs:* 1st, Seminole Kennels' Pride of Patsey; Oak Grove Kennels' Kildare Glenmore; 3d and reserve, Mount Royal Kennels' Elfrin and Elfrus. *Bitches:* 1st, Oak Grove Kennels' Rose Sarsfield; 2d, Douglas & Chambers's Irene.

GORDON SETTERS.—CHALLENGE—*Dogs:* Equal 1st, Dr. Dixon's Leo B. and Duchess of Waverly.—OPEN *Dogs:* 1st, Mount Royal Kennels' Rush; 2d, Dr. Dixon's Duke of Wellington. Very high com., Dr. S. S. Davidson's Royal Nibbs. *Bitches:* 1st, J. W. Graham's Lady Gordon; 2d, Dr. Dixon's Princess Louise; 3d and very high com, Mount Royal Kennels' Wanda and Floss.

IRISH WATER SPANIELS.—1st, J. C. Nichols's Marguerite.

CLUMBERS.—CHALLENGE—1st, W. H. Middleton's Boss III.—OPEN—*Dogs:* 1st, G. B. Smart's Darby; 2d, W. H. Middleton's Quester.

FIELD SPANIELS.—1st, H. M. Howe's Wonder; 2d, Corktown Kennels' Corktown Cupid; 3d, W. H. Morgan, Jr.'s Bounce.

COCKER SPANIELS.—CHALLENGE—1st, Brant Cocker Kennel's champion Brantford Red Jacket.—OPEN—*Dogs:* 1st, Geddes & Cunningham's Donovan; 2d, J. Kennedy's Jay Kay; 3d, Raglan Kennels' Dodo. *Bitches:* 1st and reserve, Rideau Kennels' Rideau Romola and Rideau Flossie; 2d, J. Kennedy's Molly Bawn; 3d, A. Laidlaw's Rideau Reine. Very high com., J. A. Spracklin's Volo. —OTHER THAN BLACK.—*Dogs:* 1st, J. A. Spracklin's Red Oak; 2d, Dr. S. S. Davidson's Nerve. *Bitches:* 1st, A. Laidlaw's Vic; 2d, Ancient & Modern Spaniel Kennels' Cherry Ripe; 3d, A. F. Grant's Rideau Robina.—NOVICE—*Dogs:* 1st, Corktown Kennels' Corktown Comet; 2d, Dr. S. S. Davidson's Nerve. *Bitches:* 1st, Dorktown Kennels' Corktown Cleo; 2d, Rideau Kennels' Rideau Rhea; 3d, A. F. Grant's Rideau Romo.

COLLIES.—*Dogs:* 1st, McEwen & Gibson's Samson; 2d, C. Scrim's Colie. *Bitches:* 1st, McEwen & Gibson's Dudley Chris.

BULLDOGS.—1st, Chas. A. Smith's Carisbrooke; 2d, A. P. Sherwood's Jack.

BULL-TERRIERS.—*Dogs:* 1st and 2d, Herbert M. Howe's Comet II. and Chatham Prince. *Bitches:* 1st, F. F. Dole's champion Starlight; 2d and 3d, Herbert M. Howe's Grove Duchess and Loumont Kit.

FOX-TERRIERS.—CHALLENGE—1st, A. A. McDonald's Blemton Triumph.—OPEN—*Dogs:* 1s, Clover Hill Kennels' Tom Tom; equal 2d, Rideau Kennels' Rideau Rivet and A. A. McDonald's Calchas; 3d, A. D. Stewart's My Fellow. Reserve, Chas. S. Hanks's Seacroft Bourbon. *Bitches:* 1st, 3d and reserve Chas. T. Hanks's Grouse II., Damson and Seacroft Fuss; 2d, A. D. Stewart's Hillside Baroness. Very high com., Rideau Kennels' Clytie. Com., Samuel Simmis's Lady.—NOVICE—1st, Clover Hill Kennels' Tom Tom; 2d, Rideau Kennels' Rideau Rivet; 3d and reserve, A. D. Stewart's My Fellow and My Queen. High com., H. S. Perley's Buck Shot. Com., J. L. Wills's Princess.

IRISH TERRIERS.—CHALLENGE—1st, Walter J. Comstock's Boxer IV.—OPEN—*Dogs:* 1st, Toon & Symonds's Jack Briggs; 2d, H. O'Connor's Galties; 3d, Walter J. Comstock's Hanover Boy. Reserve, W. H. Drummond's Commissariat. *Bitches:* 1st, Toon & Symonds's Salem Witch; 2d, T. Brown's Killarney Girl.

SKYE TERRIERS.—*Dogs:* 1st, C. A. Shinn's Sir Stafford; 2d, A. J. & H. L. Jeffrey's Toodles; 3d, W. Edmunds's Jack. *Bitches:* 1st, H. K. Cairter's Endcliffe Maggie; 2d and 3d, C. H. Smith's Islay and Prairie Flower. Reserve, C. H. Shinn's Scotch Rose.

DANDIE DINMONT TERRIERS.—1st, 2d and 3d, E. Brooks's King of the Heather, Heather Madge and Laird of the Heather.

BLACK AND TAN TERRIERS.—CHALLENGE—1st, A. E Elmer's Sir Wallace.—OPEN—*Dogs:* 1st, F. F. Dole's Salisbury; 2d, H. Walters's Slick. *Bitches:* 1st and very high com., Rochelle Kennels' English Lady and Rochelle Topaz; 2d, F. F. Dole's Louie; 3d, A. Geddes's Mona. Reserve, Toon & Symonds's Rosette. Very high com., A. E. Elmer's Lady Don.

YORKSHIRE TERRIERS.—*Dogs:* 1st and 2d, Mrs. J. A. Pitts's

Little Pop and Bill Nye. *Bitches:* 1st, Mrs. J. A. Pitts's Baby Bunting; 2d, Toon & Symonds's Jennie.

TOY SPANIELS.—*Dogs:* 1st, Central Kennels' Royal Roy; 2d and 3d, Allen Trebilcock's Royal Duke and Romeo. *Bitches:* 1st, Allen Trebilcock's Topsy.

PUGS.—CHALLENGE—1st, Dr. M. H. Cryer's Bob Ivy.—OPEN—*Dogs:* 1st, E. Adams's Meddler; 2d, Mrs. H. S. Perley's Jim; 3d, A. Hurdman's Trixie.

POODLES.—1st, B. F. Lewis's Biglow.

SPITZ.—1st, A. Trebilcock's Jumbo; 2d and 3d, Mrs. W. Roger's Beauty and Fred.

DACHSHUNDS.—1st, E. A. Manice's Jessie Victoria; 2d, L. O. Seidel's Fritz K.

SPECIALS.

Best St. Bernard, Col. Ruppert's Lady Gladwyn. Best greyhound dog, A. W. Purbeck's Gem of the Season: best bitch, A. W. Purbeck's Bestwood Daisy. Best foxhound, J. B. Dowler's Mack. Best beagle dog, F. P. Robson's Bob Krueger; best bitch, F. P. Robson's Elfie. Best pointer, Chas. Connell's Rock II. Best English setter, F. S. Brown's Edgemark. Best Irish setter, Seminole Kennels' Pride of Patsey. Best Gordon setter, Dr. Dixon's Leo B. Best Clumber spaniel, G. B. Smart's Darby. Best field spaniel, H. M. Howe's Wonder. Best cocker dog, Brant Cocker Kennels' Brantford Red Jacket; best bitch, Corktown Cocker Kennels' Cleo. Best collie, McEwen & Gibson's Samson. Best fox-terrier dog, A. A. MacDonald's Biemton Trump; best bitch, Chas. T. Hanks's Grouse II. Best Irish terrier, Toon & Symonds's Jack Briggs. Best black and tan terrier, F. F. Dole's Salisbury. Best Yorkshire terrier, Mrs. J. A. Pitts's Baby Bunting. Best toy spaniel, Allen Trebilcock's Topsy. Best pug, Dr. M. H. Cryer's Bob Ivy. Best dachshund, E. A. Manice's Jessie Victoria. Diploma for best in the above breeds, challenge dogs excluded: St. Bernard, Col. Ruppert's Lady Gladwyn; greyhound, J. W. Wurtele's Justinian; foxhound, J. B. Dowler's Mack; beagle, F. P. Robson's Bob Krueger; pointer, Chas. Connell's Rock II; English setter, E. J. Walsh's The Sultan; Irish setter, Seminole Kennels' Pride of Patsey; Gordon setter, Mount Royal Kennels' Rush; Clumber spaniel, G. B. Smart's Darby; field spaniel, H. M. Howe's Wonder; cocker spaniel, not decided; collie, McEwen & Gibson's Samson; fox-terrier, Clover Hill Kennels' Tom Tom: Irish terrier, Toon & Symonds's Jack Briggs; black and tan terrier, F. F. Dole's Salisbury; Yorkshire terrier, Mrs. J. A. Pitts's Baby Bunting; toy spaniel, Allen Trebilcock's Topsy; pug, E. Adams's Meddler; dachshund, E. A. Manice's Jessie Victoria. Special for dog with best movement, H. M. Howe's field spaniel Wonder. Best Canadian-bred dog under two years and over one year, any bred, Clover Hill Kennels' fox-terrier Tom Tom.

## SHEEPDOG TRIALS.

STAKES.—First prize, $100; second prize, $50; special puppy prize, diploma.

Entries.—Wallace, owned by Messrs. Edward H. Radel and Edwin H. Morris; Nantg-millt-lass II. (American name Nell), owned by Messrs. Edward H. Radel and Edwin H. Morris; Coll, owned by Mr. H. H. Miller, Tranquility Rock Farms, Allamuchy, N. J. Another entry was reserved for Mr. Barnes, Smithfield Flats, N. Y., but the dog did not compete.

Mr. Geo. Whitehead, an old Spaniel Club member, who has recently taken in hand working sheepdogs, very kindly consented to judge at the request of the league.

Pens of a singular pattern were provided at either end of the inclosure, but sheep did not materialize until Wednesday, and then three that were supposed to have hailed from the wild West, and were credited with spring enough to clear 10ft., were safely got into one of these, and the door securely fastened.

Wallace was selected for the initial event, and Mr. Morris, after explaining that the dog had only arrived from England a week before, that he had been used to the Welsh language, further that he himself was but an amateur shepherd, worked his dog. The sheep were liberated, and at the word cer-lawr-draw (far away wide) Wallace bounded in their direction, and with much caution rounded, and commenced to drive as directed by whistle and wave of hand. There was a fence around the track judge's box, with tents, trapeze, wood work and many other obstacles, and as Mr. Morris moved in that direction to prevent the entry of the sheep, Wallace instantly took that direction and the three sheep were safely penned and the dog at his master's feet for a pat, in return for his smart work, but instead he was ordered to fetch them out, which he did, not by entering where the sheep had, but by jumping the fence and getting behind them.

With all these obstacles and disadvantages, within two minutes the sheep were again in the inclosure, but they were perfectly wild, and now became stubborn, or bolted in turns. Soon one made a determined stand, while the other two went for the track. Wallace was then ordered to round and bring back these, but they had got on the track, and all he could do was to hold them on the other side. The dog afterward took them to the pen, and its construction formed another impediment, so that he had to bring them round the square box three or four times before they would enter the door. The dog was rammed against the side in this work and came out limping, but was ordered to fetch the other, now standing in a defiant attitude in the center of inclosure. Repeatedly did he try every maneuver taught by the Welsh or any other country, and though he pinched the sheep's legs it was of no avail, and it was evident the sheep had either been used to fight for his life against some such a dog or had never been rounded before except by a cowboy, or should it not be sheepboy. Experienced sheep rearers and cattlemen agreed that no dog living could make such a sheep budge, so Wallace was called off, and at the invitation of Mr. Morris, Mr. Miller was given an opportunity to snatch distinction from the renowned Wallace by the use of his Coll, but though he helped the pup the chance was entirely lost.

At this juncture a postponement was made in order to get other sheep, but as those on exhibition were for the judge's eye only, and the time was short, it was decided to simply allow the dogs to show their ability as best they could. Coll was the next one tried, and he proved that he could be useful in assisting his master in driving; he was obedient, anxious for work, and though he made one deliberate split, he afterward atoned for it by rounding and driving at command. The sheep soon became wild and uncontrollable. Nell was first put through her fancy work, and showed that she would go off, go wide, come on, answer whistle and take an opposite direction at the wave of the hat or hand, lie down, draw on cautiously, and when down creep up so as not to startle the sheep. When she was cast off she was remarkably quick and bright, found and rounded in an admirable manner. Her quickness alone kept the sheep together and enabled her to bring them some distance, but they headed for some trees at the edge of the fair ground, and though she got them back once after they had left the inclosure, a second attempt was frustrated by some one who was not aware of what was wanted. The sheep reached the trees, but Nell soon bunched them and had them again in the open, but at this moment a cur upset everything, and prevented the penning.

The judge considered that Wallace had shown cleverness, combined with great resolution and tact, and that Nell's brightness and thorough training might make her his equal, so the stakes were divided between them, and Coll was awarded the diploma for the promise he showed.

Wallace is a black and white dog, of good size, with the wicked look generally seen in the drover's dog or some bobtailed sheepdogs. He is rangy, strong and full of pluck. It is probable that he carries the blood of the old Welsh driving sheepdog as well as the Scotch collie. He should not only have their combined qualities, but should be able to protect his flock from night prowlers, which should alone make him "worth a flock of sheep," as one of the spectators remarked. He was imported by his owners because there was a doubt as to whether there would be entries for the trials which the League had determined to inaugurate. He is the winner of a number of prizes at some of the leading English trials and is about three years of age.

Nell is hardly two years. She is perhaps "just collie." Her size is below the average, and her color is black, white and tan. Some ten to fifteen years ago champion Bob was the terror of all sheepdog-trial competitors, just as his son champion Turk has been ever since. The latter has won quite a dozen first prizes at open-to-all trials, besides many at what are called local events. He also distinguished himself before Queen Victoria. Nell is the daughter of this dog, and Nantg-willt-lass, her dam, is also well known for her excellent field work.

Coll is a black and white Scotch collie, of little bench show prominence, but as she comes from a dam that is kept at Mr. Rutherford Stuyversant's stock farm for her utility, and the sire was chosen because he was a worker, there is good reason for the promise Coll shows.

There are at least eight sheep dogs that are to be prepared in view of future events, in the neighborhood of Trenton alone, so it is evident that it was only a start that was needed to produce a movement which shall help to provide useful dogs for the farmer in place of the almost worthless curs that are generally found round the farmyards in America.

When the first heat was called for on the second day there were 28,000 present, and as there were perhaps not more than 28 of these who had ever seen "the running dogs," as they were called, the enthusiasm is easily understood. Ferenzi and Turpin went to the post, the former a decided favorite. The start was a little in favor of Turpin, and he kept his place well until just at the finish, when his rival made a spurt, crossing the line a trifle ahead. The second heat was between Young Dick and Orphan Girl. It was a good contest throughout, with a finish slightly in favor of Dick.

Nellie and Rose came next. Rose was unknown, and it was hoped that Nellie would dispose of her, so that the final would be more certain, but as she flew down the track such hopes vanished, and when she crossed the line ahead, Rose was soon made the favorite for the final.

The fourth heat, between Nellie Bly and Bess, was a good one, the running was very close, and as Bess crossed the line, a few inches ahead, the audience acted as though a trotter had broken the record.

Rose, Ferenzi, Bess and Young Dick were then left in the final, which was to be run the following day, deciding which should get the stakes of $75, $40, $25 and $10.

At the earnest request of the managers, those representing the League arranged for two special races, to exclude the four winning dogs. They were given in two four-dog heats, in which Nellie and Lucy Glitters were the winners.

The political day at the Trenton fair is always a great occasion, but this year it eclipsed all former occasions, making a total entry of 45,000. Soon after the political celebrities had taken their seats on the grand stand, Mr. Taylor, who carried out the programme of events, asked for the "running dogs," when Rose, Ferenzi, Bess and Young Dick promptly went to the starting place, and were as promptly slipped. There was some difficulty at first with the crowd at this point, and as soon as the dogs were started the crowd gathered across the track to see the finish. It was a remarkably close race for all but Bess, she being destined for last money from the start. Rose led and won, closely followed by Ferenzi, whilst Dick made a good third.

Mr. Jas. White, the owner of Rose, wears glasses and would not be taken for a whippet racer. He was born in Yorkshire and that was a part of his inheritance. When visiting the old country a few months ago he was struck by a "little thing" that had won the Knights of Labor handicap when only 5 months old, and he had to get a pup from her or never return to America. He got the pup and Rose is her name, a "little thing" too, for she is got up in brindle and white, and only 16lbs. at that, but what muscle, what an expression. Her sire was Little Poor Boy from Bradford, Yorkshire, England, don't yer know. He came from Jim Syke's Duffer, and what do you want better than that. This was the sort of talk that followed congratulations, and Mr. James White, of Newark, N. J. was assuredly a proud man. Ferenzi, the second, holds the challenge collar and is a well-made, speedy dog. Young Dick and Bess are also good specimens, and were in splendid condition.

During the intervals between the trotting events three other races of heats with four dogs were given, for special purses presented by the league. In each case the contests were good and every one seemed to wish for more.

E. H. M.

## FLAPS FROM THE BEAVER'S TAIL.

TORONTO, Can.—The attendance at the Ottawa show last week was not as good as it should be, but well up to the average, and the show will turn out a success financially. Mr. Geddes had things well in hand, and many of the dogs looked better at the end of the three weeks' circuit than when they started out. All left for home on Friday afternoon. There appeared to be some trouble about the transportation charges of the dogs by the railway companies, they refusing to carry out the arrangements made, and the extra charges became rather a heavy tax on some of the handlers.

On Friday forenoon the superintendent was greatly concerned to find that Tom Tom, the winning fox-terrier in open dog class, had not been benched that day, and it was feared he had gone astray. However, it appeared that Mr. H. P. Thompson, Toronto, his owner, had removed him the previous night, and leaving for home, had taken the dog with him. Mr. Thompson ran the risk, under additional Rule 7, of forfeiting his prize money, but the committee in this case were lenient. Mr. Geddes had in this case foregone the usual deposit of $5. He won't do so again.

A protest has been lodged with the C. K. C. against the win at Toronto of the greyhound Echo, who was first in the open class. Mr. Wurtele, who lays the charge, claims the dog is none other than Pious Pembroke and was eligible for the challenge class. He was shown at Kingston in the open class and at Ottawa in the challenge class as Pious Pembroke. Geo. Thomas, who handled him for Mr. Purbeck, explains that his kennel name is Echo and that it was a mere slip of the pen in entering him under this name at Toronto. The charge will be brought up at the first meeting of the executive.

It looked at one time at Ottawa as if protests by the dozen were to be handed in against dogs winning in improper classes, but the C. K. C. rule on this point, being different from that of the A. K. C., and some of the dogs having been entered in the same classes at Toronto and Kingston, it was decided to let the matter go this year, as doubtless in most cases it was done in ignorance. It must be understood that all entries next year must be in strict accordance with the C. K. C. rules, or the wins, if any, will be protested.

I would urge on committees of Canadian bench shows the advisability of providing challenge classes, even if but one money prize—and that not a large one—for all breeds. The necessity for challenge classes in some breeds was not so great some two or three years ago as it now is, when we have dogs in this country of almost all breeds eligible for this class. In compliance with the C. K. C. rule, if no challenge class is provided challenge dogs are closed out altogether.

Mr. J. A. Spracklin has sold the cocker dog Red Obo (Red Roland—Devon Beauty), first Kingston, first Ottawa, 1892, to Mr. T. McK. Robertson, Kingston.

Joe Lewis made two purchases at Kingston, one the black cocker dog Donovan, who won first in the open class there. He is by old Obo, Jr. out of Woodstock Flirt, and is a little over two years old. The other is the beagle bitch Snow (champion Royal Krueger—Trissa W.), who was placed second in the open under 13in. class at Ottawa.

H. B. DONOVAN.

## POINTS AND FLUSHES.

### Mind in Animals.

CHICAGO, Oct. 1.—I received recently by mail several pamphlets from Dr. Wesley Mills, on comparative psychology, the phenomena of mind in the lower animals being specially and most interestingly presented. After reading Dr. Mills's writings on the subject, I felt an earnest wish that he would favor the readers of FOREST AND STREAM with some of the proofs of the existence of mind in the lower animals. Written in such a clear, logical and learned manner as Dr. Mills treats the subject, he could not fail to convince any fair-minded reader of the truth of his views.

The subject in most instances has been most unskilfully and superficially expounded in the kennel press by writers in past years, since all acts of the lower animals were considered instinctive. Nearly all such writers had a very imperfect knowledge of the subject, and their writings had their weight chiefly from bold assertion. They always assumed that every act in the lives of the lower animals was instinctive as a matter of course. They could not define instinct, nor could they define mind, nor could they tell where instinct ended and mind began, yet the palpable fact that such writers knew nothing of the subject never for a moment lessened the assurance of their statements.

To distinguish between instinctive acts and the phenomena of mind requires a most comprehensive special study of the treatises on psychology and close observation of the life and habits of the lower animals; then the student will comprehend how much he don't know. The subject is a most voluminous one, and has engaged the earnest efforts of some of the greatest minds that the world ever produced. Some of their conclusions were the result of years of profound study; yet I have known of a Tennessee farmer, in an interval between crops, write a summary settlement of a question of heredity, in a few brief words issued as *ex cathedra* from no other support than his inner consciousness.

The acts in the every-day life of the lower animals, which are the result of experience and knowledge, are not instinctive. Knowledge comes within the domain of mind. Knowledge presupposes mind. Instinct is entirely independent of knowledge or experience in its exercise. There is not an act in the life of the domesticated dog but what shows an intelligent perception of cause and effect. The dog has been kept beneath the true place he should hold in the estimation of man by the natural desire of the latter to exalt himself, and his intolerance of anything in common with the lower animals. Granting the existence of mind in the lower animals, it only serves to show the vast superiority of the mind of man, considering the matter from a comparative standpoint. It is to be hoped that Dr. Mills and others, who really know something about the subject, will claim for the dog his true place among the animals which reason, and prove it by the unlimited material available.

### Field Trial Echoes.

I have received from Mr. Thomas Johnson, secretary-treasurer of the Northwestern Field Trial Club, Winnipeg, Manitoba, a copy of a letter sent to the editor of the *American Field*, concerning the field trial report of Mr. W. A. Bruette, who did the reporting for the *Field* at both the field trials held in Manitoba last month. In support of Mr. Johnson's assertion it is only fair to say that Mr. Bruette repeatedly and openly asserted that he had an enmity against Mr. Johnson and Rev. Mr. Spence.

I thought at first that it would be better to withhold the letter published herewith till I could hear more fully and directly from Mr. Johnson on the matter, but on second thought I concluded that this letter was intended to set forth his version of it. It should be kept in mind that the letter is addressed to the aforesaid editor. It reads as follows:

WINNIPEG, Sept. 19.—*My Dear Doctor*—You are probably aware of the unpleasantness I had with W. A. Bruette when he was up here two years ago. This, no doubt, is the cause of the malicious and vicious attack on myself in his report of the Manitoba and Northwestern Field Trials Club's trials. I should be wanting in dignity and self-respect to answer an individual of Bruette's caliber. There is, however, one part of his report which I desire to draw your attention to, and that is his studiously-worded remark that I was expelled from the Manitoba Field Trials Club *in connection with my official position as secretary and treasurer.* The facts are, my books were audited and I handed the club my check for the balance on hand—some $8—*and resigned.* This was in August, 1891. In February, 1892, when the Manitoba Field Trials Club found I was taking an active part in organizing the Northwestern Field Trials Club, they sent me a bill for $46 which they had incurred for advertising, etc., to put the new club in shape, and wrote me that I had been the cause of their incurring this expense, and if I did not pay this amount they would reconsider my resignation and expel me. I did not deign them a reply to this, but told some of their members to go plump to Hades and expel me. Now, I think, for the interest I have always taken in the *American Field*, and your character for fairness, that you should not let this imputation go forth with your approval. I ask no favors; those who know me know I am incapable of the imputation made, and those who don't know me I don't give a darn for. I mentioned to you when up here that I intended resigning and relinquishing all interest in dog trials, but the vindictive spirit of the other organization is of such a nature I shall now go ahead and show them they cannot suppress either me or the Northwestern Field Trials Club. I would like also to say that you know all about running a newspaper, but I know also that the *American Field* adds nothing to its prestige by employing a man with Bruette's reputation as reporter. I am, my dear Doctor, very faithfully yours,

THOS. JOHNSON.

One paragraph, stating that Mr. Johnson kicked Mr. Bruette out of his place and containing a very grave charge, has been cut out, as it is a matter between the gentlemen themselves as it stands at present.

The acts of Mr. Johnson in connection with field trial affairs in Manitoba were set forth in FOREST AND STREAM of Sept. 8 in Points and Flushes, the statements being founded directly on the official minutes of the proceedings of the Manitoba Field Trial Club's meetings and its official correspondence. It is due to Mr. Johnson that he be heard in the matter, therefore his letter is published. It is also only fair to state that the publication of the matter in FOREST AND STREAM was done in a purely journalistic way. It was common gossip among field trial men in Manitoba, and there was a great deal of factional feeling here and there among a few. The best way to deal with such matters is to do so squarely. Many gossippy tales were afloat which were entirely ignored, and the matter presented was confined entirely to it as embodied in the club records. The increase of clubs and genuine sportsmanship is a cause for all true sportsmen to rejoice. That Mr. Johnson has resolved to go on with the good work is most gratifying. However, it was due Mr. Johnson and the harmony of field trials, that the public, injurious gossip be met by an explanation.

### The Grand Rapids Show.

A mistake was made in the report last week in publishing the name of one of the managers of the show, the genial Mr. Charles K. Farmer. It was erroneously printed as Chas. K. Turner.

A most enjoyable two hours were passed in an informal gathering of the club members, the press correspondents, the judges and a few of the exhibitors in the club room at Sweet's Hotel after the club's regular meeting. The subject of field trials holding the members' greatest interest, it being most interesting to them, as it naturally would be, in view of the fact that the club holds its inaugural field trial this fall. Mr. John Davidson made a most favorable impression by his broad grasp of the principles of field-trial competition and his sound, common-sense manner of expressing his views.

### The Coursing Meeting.

The Executive Committee of the American Coursing Club have engaged a judge who holds the esteem and confidence of all dog men, Mr. Roger D. Williams, of Lexington, Ky. His great popularity and acknowledged ability will doubtlessly add largely to the success of the trials. He judged at Great Bend in 1888 with satisfaction to all concerned, a feat not easily accomplished. B. WATERS.

## DOG CHAT.

### Rochester Show.

The ring at Rochester was quite *al fresco* and a pleasant change from the usual sawdust arrangement. The club, however, might just as well have staked off a small portion of ground with ropes or boxes. Although there was ample room to run the dogs 100yds., if requisite, one of the judges did not move the dogs a little bit. Mr. Fellows was not the delinquent, for he moved his dogs well, when requisite. The competition between Scottish Leader and Melrose was very keen, but they did not move a yard, and action is one of Melrose's strong points. As Arthur remarked, the fair owner of the Swiss Mountain Kennel "caught him napping this time, but—" and his face took on that quiet smile of his that foretells trouble in the future. Mrs. Smyth's three winners made a very pretty display.

The feeding was fairly good, Austin's biscuit, being the medium, but they were hardly prepared in an efficient manner, so we were told. The disinfecting was good, "Sanitas" sawdust being liberally used. "Uncle Dick" was attentive to his duties as superintendent and "always there," though he might have made the attendants clean up the aisles a little better, but then probably the crowd interfered.

There were several visitors. Among them I noticed Mrs. Smyth, Mrs. Meacham and Mrs. Hughes; Messrs. Clarence Rathbone and two friends from Albany; John Moorehead, Jr., from Pittsburgh, Pa.; C. C. M. Hunt, Palmyra; J. T. Francis, Warham Whitney, E. D. Wilbur, W. J. Higginson, E. Bardoe Elliott, W. Tallman, German Hopkins, C. E. Connors, Arthur Trickett, A. M. Hughes, and the judges, of course. The show was slow, very slow, and outside of Warham Whitney, J. R. Fanning and Dr. O. S. Bamber, the secretary, we did not see another member of the club at the show. Mr. Geo. Peer, the treasurer, was busy among the cocks and hens and he steered clear of the dogs. The Fair people helped the club with a certain amount of money and a roof to cover the dogs. But now that they realize what an attraction to the public the dogs were—in fact, the aisles were crowded most of the time—it is expected that a bigger effort will be made next year and a first-class show held, coming in just after the Canadian circuit. Dr. Bamber was an attentive secretary, and told us that he shut down to the hour and so had to refuse about 70 late entries.

The only thing to mar the pleasant reunion was the feeling occasioned by Mr. John Moorehead's action in taking his dog, Streatham Monarch from the show on the second day. This was protested by another bull-terrier exhibitor, under additional rule XI., which says: "No dog can be permanently removed from the building until 6 o'clock on Friday night, Sept. 30, except by consent of the manager or superintendent. Mr. Moorehead did not obtain this consent, and the owner is liable to disqualification for his hasty action. The rules of the smallest member of the A. K. C. must be lived up to and this is one of the most important. We notice a feeling among new comers at the business to slight this rule, but every one, in justice to the public, should be made to adhere to it. In this case there was no excuse as the dog was well and the stalls were comfortable and dry. The protest was handed to Dr. Bamber, but we are afraid there would be difficulty in getting a meeting of the committee, anyhow we hope to give the result before going to press.

### Brooklyn Dog Show.

For fear that some exhibitors may think that the show held by the National Greyhound Club in Brooklyn next November is for greyhounds alone, we wish to disabuse them of that idea. The show is open to the world and every breed of dog. The club has upward of forty handsome specials already donated and others are promised, and with these they expect to make the premium list a very attractive one. The list will be ready by Oct. 8. We do not know what the entry fee has been fixed at, but it was rumored that $5 was to be the figure. On this basis there was considerable grumbling among the men who control some of the best dogs at the shows, and if the fee was fixed at that sum they would not fall in line. While New York could probably charge $10 and get a big show, we do not think it good policy on the part of other clubs to try $5, and especially at this time of the year and so close to the New York show.

### Great Danes at Ottawa.

We are surprised that Dr. Mills should have even entered his great Dane, when he was down to judge those classes at Ottawa, excepting with the proviso "N. F. C., etc." The fact of Mr. Corbett being called in to judge the challenge class does not alter the aspect of the case whatever, the fact remains that the great Dane Minerva's Fawn wins a challenge prize in the show in which her owner judges great Danes. This does not look well.

### Death of Lady Venus.

Mr. Frank Dole is having his share of the misfortunes that too often beset the faucier. At Kingston show his bull bitch Lady Venus, quite a smart one, too, was taken sick and died on the way to Ottawa show. She was only about 20 months old, and was one of the new importations Mr. Dole made lately. Lady Venus was by Rustic Swell out of champion Rustic Lass. Mr. Dole has our sincere sympathy.

### Correction.

The name of one of Dr. Jarvis's Derby entries in the Irish Setter Trials should be Oline instead of Gine.

George Thomas will return to England this month on the lookout for something serviceable for the next circuit. The Sheffield-Salem Kennel will probably shake us up a little with black and tan terriers if the gods and prices are propitious.

Mr. E. O. Damon has, we find, sought the advantages of our business columns now that he feels that he has a kennel that can offer the very best bench and field trial blood. The Meadow City Kennel, a picture of which the owner sends, seems to be beautifully situated, and the kennels are built on the isolation principle; a number of kennels rather than one or two large buildings, and this is a wise plan. Having had the services of such an old and astute breeder as Mr. P. H. Bryson to guide in the selection of stock the inmates of this kennel show at once that the right stuff is there. Among the stud dogs are the Corsair, noted both on field and bench, and Rod's Whim, that earned his spurs at Assonet, Mass., last year. These are by Count Noble ex Gladstone's Girl. Among the bitches are Rod's Mirth, Rod's Chaff and the Laggard, by Roderigo ex Gladstone's Girl; Mary Murnan—(Count Noble ex Florence) and Jennie Stevenson (Fred ex May). Several of these will run at the New England, United States and the Southern trials this year.

The steamer Nomadic, White Star Line, arrived at Pier 44, North River, New York city, Sept. 27, having on board a fox-terrier dog consigned to Mr. E. H. Goodwin, New York. This company brings a dog or two nearly every week on one or the other of its ships, and seems to be a favorite line. The steamer Naronic arrived Oct. 3 with one bull-terrier bitch for Mr. J. L. Dever, Great Western Distillery, Peoria, Ill., and one pug bitch consigned to W. H. Dumont & Co., 16 Exchange Place, New York.

Mr. Chapman writes us that while we were right about the prospective Mississippi Beagle Club he does not feel like assuming the duties of secretary again, although willing to help in every other way. He adds: "There is really no reason why this new club should not be as successful in every way as the National Beagle Club has been, and as president of the latter club I bid them welcome and wish them well and I believe that with a little push they could hold a trial some time in January, and not only catch all of the local entries, but many from the East and West as well. The rapid strides of the N. B. C. should serve to encourage them, and I think they can depend on a majority of the members of the older club to stretch forth the hand of good fellowship in a sportsmanlike fashion and aid them with members, money and entries. In like ratio as there are field trials held will good field beagles abound.

We have received the constitution and by-laws of the Pacific Coast St. Bernard Club, organized Aug. 17, 1892. The dues are $6 per annum and we hear the club has already quite a goodly number of members. We may remind our many readers on the Pacific slope who may wish to aid the cause of the Holy breed that Mr. H. J. Summerhayes is the secretary, 152 Market street, San Francisco, Cal.

In our business columns we find the sale notice of a capital wire-haired dog, Jack Prompter, who was a winner at the Rochester show last week. His sire, ch. Prompter, won the 50-guinea challenge cup twice in England.

Mr. A. R. Kyle has sold to the Chestnut Hill Kennels, Wellesbourne Kyle and two other young collies, but Scotsman, as he is, he has still a brace up his sleeve that he thinks can beat these and any others. We should like to see Mr. Kyle and all the old collie breeders once more in an active state. The breed needs a little shaking up.

A similar case to the "puppy packing" at Toronto show has just occurred in England, where two sailors shipped six puppies in an ordinary wine box, 2lin. by 7 by 15, and at the journey's end the pups were found suffocated. The difference between the Canadian and the English case is that in the latter the culprits were fined $25.

We regret to hear of the death of Mrs. Wheatleigh, president of the American Pet Dog Club, which occurred Sept. 23. Mrs. Wheatleigh had been for years quite a prominent pug exhibitor and breeder, and was a familiar figure at New York shows for years past. She was very active in the councils of the Pet Dog Club, and will, we are sure, be greatly missed by the members of that body.

Death has claimed another old fancier, an Englishman this time, Mr. S. W. Smith, or "Big Smith" in the old days, and "Old Turk" in a literary sense. His reminiscences of fox-terrier lore in the *Fanciers' Gazette* were very interesting.

Mr. George Jarvis has now been ruffled out of the even tenor of his way, and all on account of the A. K. C. It seems he claimed the prefix Kent for his kennel, and paid the customary $3 for the privilege and in due course, August issue of the *Kennel Gazette*, the claim was published. The notice at the heading of prefixes says that objections must be made with the secretary within 14 days after publication. On Sept. 27 objection was made to the prefix, but Mr. Jarvis claims this was over date, and now the case has gone to the advisory committee. The excuse offered for the objection is that there are so many "Kents" among the pointers. At the same time, if any one has a right to the prefix Mr. Jarvis has. He comes from Kent, England, and was the first to use "Kent" in pointers' names over here. It looks rather small to the man on the fence, anyhow.

Exhibitors say that if Mount Holly holds another show they want a new "Diehl" in judges. The connection between buff Cochins and pointers is not apparent to the naked eye, but they say Brother Winslow (that's the correct term, we believe in feathered parlance) can see it at a glance. Probably through inspiration.

Mr. A. H. Moore, the well known fancier of setters and St. Bernards, has just lost his young trotter, Evangeline, for which he gave $18,000 in the spring and which was valued at $30,000 at the time of her death.

There is an inclination among some breeders to hold a terrier show in Boston this fall. They think that in connection with the Mechanics' Fair it could be made to pay, many people being attracted into town by that exhibition. Whether this will be the case will depend somewhat on the wishes of the Massschusetts Kennel Club; if an M. K. C. show is to be held next spring those who are behind the terrier movement will not hold their exhibition.

Mr. W. W. Thompson writes to the English *Stock-Keeper* correcting the impression that Messrs. Radels and Morris's pair of working sheepdogs, are the first to be imported to this country. The former gentleman says that he sent Mr. Downey, of New York, proably Dr. Downey, who was an active fancier in the early 80's, one of the best workers in North Wales, and then adds that this dog won several good stakes as a worker in the States. We knew that there had been several attempts at sheepdog trials in this country, but did not believe they had been successfully carried out.

From *Stock Keeper* we learn that Mr. E. H. Clarke, of the Iolanthe Kennels, has purchased the well-known winning black and tan terrier, Lady Salisbury. In her time she has won over twenty first prizes.

We draw attention to our kennel columns in the business department. Among those who have dogs for sale are W. P. Fraser, high class Scotch terriers; W. C. Newell, rough St. Bernard pups; James McAleer, well bred field trial pointers; H. V. Jamieson, trained beagles; J. Hope, rabbit hounds, guaranteed broken; E. C. Dodd, Gordon setter dogs; S. C. Graff, two broken beagles; C. L. A. Whitney, wire-hair Jack Prompter; G. I. Hodgson, trained Irish setter; J. A. Smithers, black pointer; P. H. Coombs, Yorkshire terriers by champion Bradford Harry, C. F. Lambert, pointer Derby entries. We draw particular attention to the new advertisement of Mr. Henry Brooks's Scotch terriers Kilroy, Kilcree and Kilbar, for they make an array of quality in this breed hard to beat; the Meadow City Kennels have English setters, The Corsair and Rod's Whim, and Dutchess Kennels change their ad. and have some good pups for sale.

Mr. Harry Twyford seems to have landed with "both feet" on the other side. Now we hear of him acting as chairman at a meeting that formed the West London Canine Society, or was it at the convivial gathering that followed that event, probably the latter, and "Brockenhurst" no doubt would tell them all about how "the world goes round." He must remember, however, that Oct. 24 is the date of the beagle trials.

We are told by the *Stock-Keeper* that Mr. Sam Woodiwiss will attend the World's Fair show with his team of bulldogs. There is little doubt but that, if properly worked, a number of representative kennels from across the water would attend and make the show the international gathering it should be.

The same journal tells us that it is very likely the fox-terrier Ripon Stormer will come to America. An American buyer, probably Mr. Rutherfurd or Harry Twyford for some one over here, has offered a long price for the dog, but the owner is not yet willing to part.

A peculiar anomaly has just occurred in connection with Irish terriers at the Scottish Kennel Club show that comes off soon at Edinburgh, Scotland. Although the show is under English Kennel Club rules, the Irish Terrier Club has had to withdraw its promised specials on account of the club refusing to adopt the non-cropping resolution in force since December 31, 1891.

### SALE OF W. K. C. POINTERS.

THE most important auction sale of pointers ever held in this country took place Thursday afternoon, Sept. 29, at the American Horse Exchange, New York city. When one considers the breeding of the dogs offered, especially the young stock, the prices realized must have fallen far below expectations. The W. K. C. does not intend to breed pointers on such a large scale as formerly though they have reserved their stud dogs, which will still remain at the service of the public. There was quite a goodly crowd of people assembled, among them several ladies. Several well known dogmen were on hand, among them Dr. Mora, Jas. Mortimer, the former superintendent of the club, Frank Windholz, Geo. Jarvis, Chas. Heath, Jacob Pentz, Phil. Daly, Jr., F. R. Hitchcock, John Brett, and Fred Gebhard was also a purchaser. Lass of Bow was getting on in years, and it was thought would probably not breed again, so she went for the comparatively low sum of $125. But we certainly expected Westminster Ralph, one of the best pups the club has raised in some years and a winner at Washington this year, to have brought more than $85. This dog, if lucky, is a bargain. The amounts the principal dogs brought were as follows:

| | |
|---|---|
| Westminster Baldface, M. Stamen | $ 6 00 |
| Westminster Dick, C. Page | 165 00 |
| Westminster Pete, C. Heath | 16 00 |
| Westminster Ralph, winner of first prize (puppy), Washington, 1892, G. H. Cooke | 85 00 |
| Liver and white dog, R. R. Moore | 12 50 |
| Liver and white dog, J. C. Patterson | 35 00 |
| Liver and white dog, F. J. Moore | 72 50 |
| Liver and white bitch, Phil Daly, Jr. | 17 50 |
| Liver and white bitch, Phil Daly, Jr. | 27 50 |
| Liver and white bitch, N. Sidwell | 30 00 |
| Liver and white bitch, W. C. Weatherbee | 20 00 |
| Champion Lass of Bow, liver and white bitch, March 19, 1884 (Graphic—Climax), J. C. Smith | 125 00 |
| Glauca, liver and white bitch, Feb 25, 1884 (Fluke—Glee), Forrester Kennels | 20 00 |
| Westminster Sal, liver and white bitch, Jan. 1, 1887 (Naso of Kippen—Madstone), C. Heath | 10 00 |
| Westminster Ina, A. H. Dyett | 40 00 |
| Westminster Gladys, liver and white bitch, July 3, 1887 (Naso of Kippen—Glauca), Phil Daly, Jr. | 75 00 |
| Westminster Nan, lemon and white bitch, September, 1889 (Westminster Cato—Nancy), J. C. Henn | 40 00 |
| Spinaway III., liver and white bitch, June 25, 1887 (Naso of Kippen—Spinaway), R. R. Moore | 10 00 |
| Spinaway IV., liver and white bitch, June, 1890 (Lad of Bow—Spinaway III.), Phil Daly, Jr. | 57 50 |
| Spinett, liver and white bitch, litter sister to Spinaway IV., A. H. Dyett | 12 50 |
| Westminster Kate, liver and white bitch, and four pups; litter sister to Westminster Ralph, R. R. Moore | 20 00 |
| Westminster Blanche, liver and white bitch, July 14, 1891 (King of Kent—Westminster Sal), J. C. Smith | 40 00 |
| Liver and white dog, June 23, 1892 (King of Kent—Westminster Ina), C. Sackett | 15 00 |
| Liver and white dog, B. Mann | 20 00 |
| Liver and white dog, C. Sackett | 25 00 |
| Liver and white bitch, Reynard Pointer Kennels | 15 00 |
| Liver and white bitch, Mr. Hitchcock | 22 50 |
| Liver and white bitch, Fred Gebhard | 10 00 |
| Liver and white bitch, C. Sackett | 17 50 |
| Liver and white bitch, M. Baker | 22 50 |
| Liver and white bitch, June 26, 1892 (King of Kent—Spinaway III.), J. Brett | 22 50 |
| Liver and white bitch, July 7, 1892 (King of Kent—Spinett), Phil Daly, Jr. | 17 50 |
| Liver and white bitch, G. Hoppens | 9 00 |
| Liver and white bitch, H. Ellsworth | 6 00 |
| Liver and white dog, G. Hopkins | 5 00 |
| Total | $1,154 50 |

An average of about $83 apiece.

### DANBURY DOG SHOW.

DANBURY, Conn., Oct. 5.—*Special to Forest and Stream.*—There are over 200 entries for this show. Many of the best kennels represented; Seminole, Rochelle, Symonds, Timan, Ben Lewis, Geo. Thomas, etc. Mr. James Watson commences judging to-day. E. H. M.

"ALL ABOUT FERRETS AND RATS" is the title of a little twenty-five cent pamphlet published by Adolph Isaacsen, of 92 Fulton street. It has been prepared, the author says, from his thirty years' practical experience as a sure pop rat exterminator.

## Yachting.

### FIXTURES.

OCTOBER.

9. Jersey City, Ladies' Day, New York Bay.
15. Buffalo, Closing Cruise.

### Seawanhaka Cor. Y. C., Osborn Cup.

THE race for the cup presented by Mr. R. A. Osborn, of the cutter Clara, was sailed on Oct. 1, the course being 6½ miles to windward and return. Start 12:10. The times were:

| | Finish. | Elapsed. |
|---|---|---|
| El Chico | 2 43 28 | 2 33 28 |
| Fyxie | 2 50 10 | 3 40 10 |
| Nameless | withdrew. | |
| Nemadji | disabled. | |

The Oyster Bay club house closed on Oct. 1, and the city house, at 7 East Thirty-second street, re-opened on Oct. 3 for the winter season.

Admiral Montague, owner of the 40-rater Corsair, has placed an order with Mr. Arthur E. Payne for a new yacht of the same class,

SAIL PLAN OF FISHING SCHOONER.

## The Dismasting of the Truant.

*Editor Forest and Stream:*

In your issue of Sept. 15 I notice you have inserted a portion of an article from a San Francisco paper referring to a cruise of the Corinthian Y. C. and the loss of the mast of the cat sloop Truant, which is quite misleading and if unexplained would surely be considered as not very complimentary to the designer, Mr. W. D. Bacon, of Barnstable, Mass. On the trip referred to several of our fleet came to grief, owing to a strong breeze and heavy sea, but in reading the article one might infer that the Truant had met with a "series of disasters," and that her rig led to this result.

At the time the contract was given to build the boat a cedar stick was ordered from Washington Ter., having been unable to find one hereabouts of the required dimensions. Upon its arrival it was found badly twisted and was condemned by the builder and a spruce stick used, the builder remarking at the time that "it was not suitable but would answer for a season or two." For a socket for the spinaker boom a band was made reaching one-half way around the mast, fitted about 8in. above the deck, and held in place by six 2½in. screws. After sailing the boat for over fifteen months the mast "went by the board," breaking short off at the point where the screws had weakened the stick. No shrouds were used, as mentioned in the article, but the mast was stepped as designed and as is customary with this type of boat on the Atlantic coast. In my opinion it was not the fault of the rig, but because a suitable stick could not be had, and the mistake of weakening the mast by using the screws at a point where most of the strain came. Mr. Bacon made no objection to reducing the canvas, other than advising me that I must not expect the boat to sail very fast in light weather. I think it is the experience of every one in building a boat to find that it is impossible to obtain a perfect type suitable for all purposes, cruising, racing, deep and shallow water and all kinds of weather. It is not claimed that the catboat comes up to all of these requirements. The type has its faults as well as the deep draft, heavily-weighted keel boats. For an all around boat suitable for San Francisco Bay, with its variable winds and shallow waters, I have found the Truant all that could be asked for. She is an able sea boat, stands up well under her canvas, and experience has proven that she is the fastest boat of her inches, "blow high or low," ever launched in these waters. I can understand why the writer of the article, with no love for the rig, should make such a circumstance of the loss of the mast, but if he will take "pot luck" with me whenever it suits his convenience, I am quite sure he will return home satisfied that the Truant is as good, if not a superior, sea boat to other yachts hereabouts.

San Francisco, Cal., Sept. 28. J. W. Pew.

## Anchors for Small Yachts.

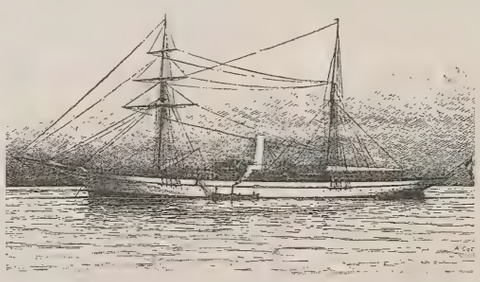
*Editor Forest and Stream:*

Perhaps some of your correspondents will give us their views on the subject of anchors, the best kind and the best method of stowing, on small boats, say 40-footers and smaller.

The "Chester" anchor with several flukes, which when not in use shut up and are held by a guard ring, appears to be deficient in holding capacity, and in the course of some experiments in which the writer recently assisted the reason of this incapacity appeared to be that it always presented two flukes to the mud and at the unfortunate angle represented by the feet of the letter "A" *i. e.* not vertical as in the case of the single flukes of a regular fisherman's anchor. With the same amount of scope it was easy to drag it over a bottom marked "silky" and consisting of mud and long grass, while the fisherman's anchor sank deep into the mud and could not be started. If a man wished to avoid sinking into a marsh he could not while standing do better than copy the letter "A." If he wished to sink in he would stand on one foot.

What must be the temper of one whose duty it is to haul up and stow a big fisherman's anchor in the cramped space forward on a six beam 30ft. outer midst the thrashing of both staysail and jibsheets, and the bellowing of the man at the wheel. Job's reputation for patience is not safe unless it can be ascertained whether he was a sailor, and whether he had been through this mill. Or perhaps he was a land lubber and had been through this mill, unlike the writer continuing at it day by day in silence, then surely nothing could defeat his title.

I am told that the Trinity Corporation, which looks after light houses on the coast of England, uses an anchor of the regulation shape but with one fluke. This leaves nothing above ground to foul the warp and weights or balances the anchor when dropped, so that it strikes bottom fluke down. One less fluke on deck for Job to stub his toe on is a consideration not beneath notice.



Are there any disadvantages or dangers in using such an anchor?

R. W. G. W.

The Seawanhaka-Corinthian Y. C. has secured the steamer Albertina for the use of the members of the club on Oct. 11, and tickets may be had of the steward at the club house.

## Semiramis.

We are indebted to *Le Yacht* for the above cut of the steam yacht Semiramis, whose plans appeared in the Forest and Stream of

May 7, 1891. The yacht, which was designed by Mr. Alfred H. Brown, has recently been sold to a French lady: Mme. Lebaudy, and will sail under the French flag.

## The New Carroll Yacht.

The Boston *Herald* is responsible for a sensational story concerning the large racing yacht now building at Herreshoff's, its leading features being the ownership of the new yacht by Mr. Archibald Rogers, the naturalization of Capt. Chas. Barr, with the assistance of the *Herald* reporter, in order that she may be sailed by an american skipper, and the despatch of Mr. Royal Phelps Carroll to England to arrange matches for the Cape May and Brenton Reef cups. As a matter of fact, Mr. Rogers and Capt. Barr have nothing to do with the new yacht, and her owner, Mr. Carroll, is now in Newport; but there is one item of truth in the story. The yacht, which has been announced as a 90ft. schooner, will be of only 84ft. l.w.l., and will come out as a cutter, though provision will be made in building for a conversion to the schooner rig at any time.

As was announced some time since, Mr. Carroll is carrying out the idea which he has entertained for several years, of taking an American yacht across the Atlantic both for the regular racing of the British fleet and to challenge for the two American cups now held abroad.

Nearly a year ago the Forest and Stream suggested such an expedition by an American yachtsman as not only a suitable return for the many visits made by British yachts to this side, but as one likely to afford plenty of sport and to result very successfully.

The rules and restrictions which once prevented American yachts from racing in British waters have some time since been removed, and there is no reason why an American yachtsman should not look for fair and courteous treatment.

At the same time there never was a better chance of succes than now, when the Herreshoff craft have won on both sides of the Atlantic. The two existing racers of the larger size, Iverna and Meteor, are by no means up to the present standard, and would have a very poor show beside a new boat by Herreshoff, Watson, Payne or Fife. As to the new British yachts, the largest are but 40-rating, 59ft. l.w.l. by 14 to 16ft. beam, and not likely to save their time from a newer and larger craft.

In all probability the new yacht will be met with something near her size, although the tendency abroad, as with us, has been toward smaller yachts for racing. Neither Iverna nor Meteor are likely to be in the racing next year should anything new be built during the winter, and it is not improbable that their owners, both keen yachtsmen, may build. In any event, Mr. Carroll's venture, if carried out, is likely to cause a more or less brief revival of the larger racing class, and to afford good sport next season.

## The America Cup.

A letter from Lord Dunraven is now in the hands of the New York Y. C., and though its contents will not be made public until after the next meeting of the club, it is known that it contains a notification of an intention to challenge for the America Cup, provided the present terms are changed. A special meeting of the club will be held on Monday next to consider the matter.

## Rhode Island Y. C.

The Rhode Island Y. C. is making preparations for an elaborate ending of the season, as told in the following general orders:

Flagship Verena,
Off Club House, Pawtuxet, Sept. 26, 1892.

General Orers No 3.

In accordance with the quite general sentiment of the captains and club members, the fleet is requested to rendezvous off the club house, Pawtuxet, on the morning of Friday, Oct. 7, to participate in a short cruise, regatta and clambake, to "wind up" the season.

The starting gun will be fired promptly at 12 o'clock noon, and a run made to Potter's Cove. A trophy for winner of the run is offered.

Saturday, Oct. 8, there will be a regatta over the Potter's Cove course, with prizes for all classes.

Sunday, Oct. 9, the club will be delivered into the hands of the "Potter's Cove Committee," who will undertake to break all previous records in the matter of a clambake.

The Full Moon, which has heretofore graced the club's occasions with her presence, will again contribute to the general joy.

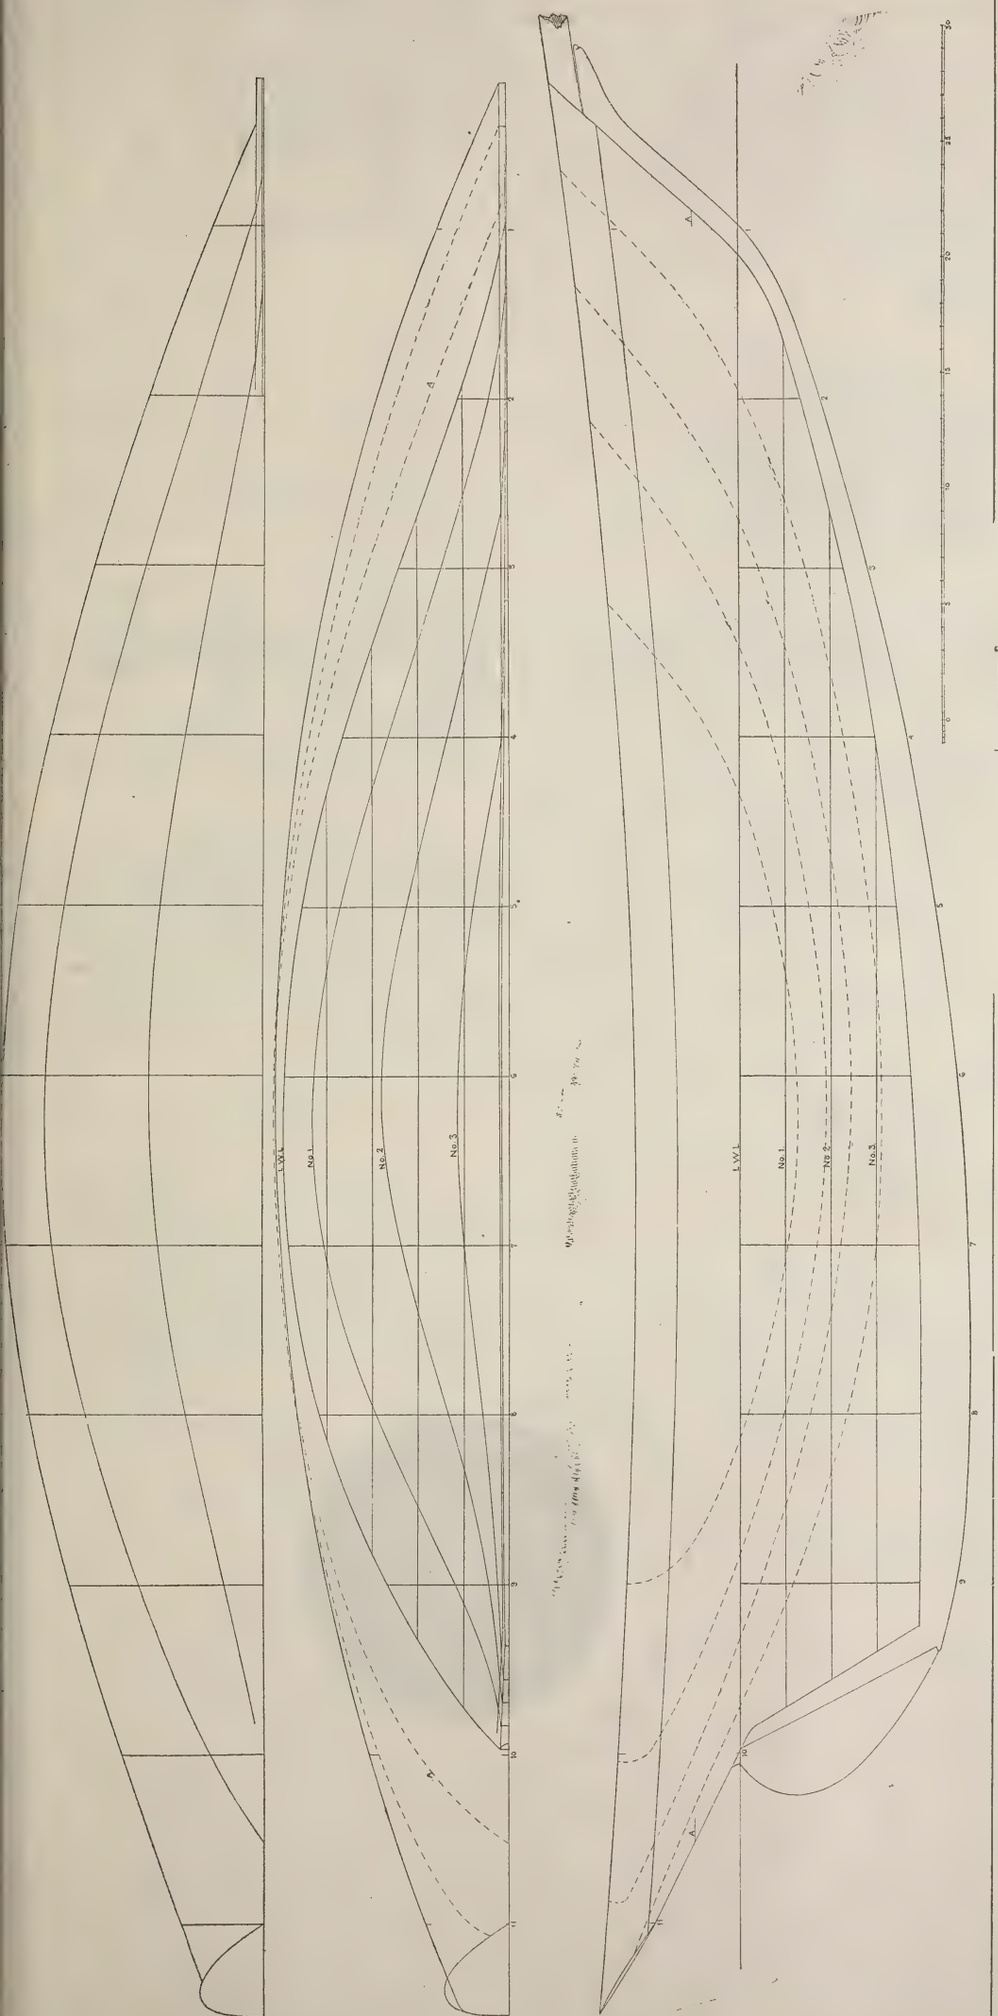
The Commodore takes this opportunity to congratulate the club on this most successful season, and to express his personal appreciation of the assistance given him by captains and members generally in the performance of the duties of the office with which he has been honored. He hopes to meet all hands on board the flagship at Potter's Cove, Friday evening, Oct. 7.

By order of Commodore Austin.
Charles H. Howland, Fleet Captain.

## Olympic Y. C., Sept. 24.

South Brooklyn—New York Bay.

The second annual regatta of the Olympic Y.C. was sailed on Sept. 24, the times being:



| | Start. | Finished. | Elapsed. |
|---|---|---|---|
| **Class A—Cabin Sloops.** | | | |
| Sadie Brown | 12 28 00 | Withdrew. | |
| Nellie W | 12 32 00 | 6 01 00 | 5 29 00 |
| Black Jack | 12 31 40 | 5 37 30 | 5 05 50 |
| **Class B—Cabin Sloops.** | | | |
| Little Edgeete | 12 28 50 | 5 21 50 | 4 53 00 |
| Rene Louise | 12 32 10 | 5 58 45 | 4 26 35 |
| Swallow | 12 29 50 | 5 38 45 | 5 08 55 |
| Cricket | 12 32 45 | 5 25 45 | 4 53 00 |
| Fanny K | 12 31 00 | 5 22 45 | 4 51 45 |
| **Class C—Cats.** | | | |
| Colombo | 12 39 25 | 4 53 10 | 4 13 45 |
| Village Bell | 12 38 10 | 4 52 45 | 4 13 35 |
| Jessie H | 12 38 45 | 5 27 43 | 4 46 58 |
| **Class D—Sloops.** | | | |
| Margaretta C | 12 48 25 | 5 41 25 | 4 35 00 |
| Lady Ella | 12 49 20 | 5 42 55 | 4 53 35 |
| **Class E—Cats.** | | | |
| Bye-Bye | 1 01 45 | 3 42 45 | 2 41 00 |
| Ajax | 12 59 40 | 4 54 45 | 3 54 47 |
| Dimple | 1 02 20 | 3 56 30 | 2 53 52 |
| Katie F | 12 58 30 | Did not finish. | |
| Goodenough | 12 59 10 | Did not finish. | |

The regatta committee were Messrs. Owen Fay, A. Muller, Robert Orr, Paul Steeley and J. R. Sipp.

## Alva.

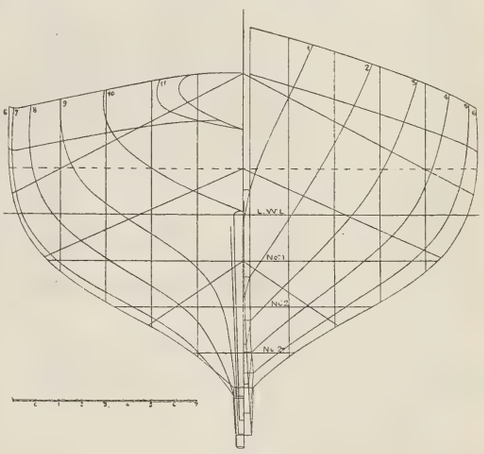
The recent storms have damaged the wrecked Alva so badly, heeling her on to her starboard side and smashing her keel and deck, that the wreckers have decided to abandon the work, and the wreck will probably be destroyed by the Government, as it is in a very dangerous position. The local inspectors have rendered a decision adverse to Capt. Morrison.

The Customs authorities of Chicago have discovered that they had no authority for their threat to inflict a fine on the steam yacht Lurline because of the absence of her name in 4in. letters on each bow, and the matter has been dropped. The over-officious captain of the revenue cutter Andy Johnson is evidently unaware of the failure of the attempt of ex-Commissioner of Navigation Bates to apply to pleasure craft all the restrictions imposed by law on merchant vessels, including the painting of the name on each bow. As a matter of justice to yachtsmen in all places, the officers to whom are intrusted the enforcement of the laws should be compelled to fully post themselves as to the exact nature of their duties.

DIAGONAL LINES.

MODEL FISHING SCHOONER. DESIGNED BY CAPT. J. W. COLLINS, 1892.

## New Utrecht Navy, Sept. 24.



BATH BEACH—GRAVESEND BAY.

THE opening regatta of the newly organized New Utrecht Navy, a part of the New Utrecht Club, of Bath Beach, was held on Sept. 24, the courses being from off the club house on Gravesend Bay around Buoy 11 and a stakeboat inside of Norton's Point for Class A, and around a stakeboat off Fort Hamilton and the stakeboat off Norton's Point, two rounds, for Classes B and C. The severe storm preceding the race had disabled a number of yachts and lessened the starters. In Class A Coquette mistook the course and rounded the wrong buoy, being disqualified. The times were:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| **CLASS A.** | | | | |
| Coquette | 3 29 16 | Disqualified. | | |
| Iroquois | 3 25 24 | 5 00 32 | 1 35 08 | 1 35 08 |
| Ida | 2 25 42 | 5 09 01 | 1 43 19 | 1 41 1: |
| **CLASS B.** | | | | |
| Elda D | 3 41 10 | 5 11 10 | 1 30 06 | 1 26 41 |
| Ariel | 3 39 43 | 5 09 51 | 1 30 08 | 1 30 08 |
| Willie T | 3 41 24 | 5 20 08 | 1 38 44 | 1 35 24 |
| **CLASS C.** | | | | |
| Homing | 3 33 44 | 5 01 48 | 1 28 04 | 1 27 29 |
| Juanita | 3 33 25 | 5 02 40 | 1 29 15 | 1 29 15 |

## A Model Fishing Schooner.

THE accompanying designs for a model fishing schooner are the work of Capt. J. W. Collins, of the United States Fish Commission, who has charge of the Commission's exhibit at the World's Fair. Captain Collins is the designer of the very successful schooner Grampus, built for the work of the Commission some years since, and illustrated in the FOREST AND STREAM of Jan. 13-20, 1887. A fully rigged model of the new schooner has been made for exhibition at Chicago. The design is intended for a vessel of moderate size, such as are engaged in the market fishery from New England, New York, Savannah and Pensacola. Schooners of this class are expected to carry their fares of fish to market in a fresh condition, and, with perishable cargoes, it is scarcely necessary to say that speed is an important requisite. With this, also, there is a demand for the best sea-going qualities and considerable sail-carrying power. The matter of capacity is a secondary one, and the attempt has therefore been made in the design to combine seaworthiness and speed in as high a degree as practicable for a vessel carrying inside ballast, and,

BODY PLAN.

at the same time, to produce a schooner which will work quickly and that will have no great amount of extra surface friction.

Considerable drag has been given in order that the bowsprit may be kept within reasonable limits, and that a comparatively large mainsail can be carried.

The sail plan is in accordance with the most modern ideas on yachts and fishing vessels.

The following are the dimensions of the design:

| | |
|---|---|
| Length over all | 83ft. 6 in. |
| l.w.l. | 66ft. |
| Beam, extreme | 20ft. 6 in. |
| l.w.l. | 19ft. 7½in. |
| Draft, extreme | 10ft. 1½in. |
| Mainmast, deck to hounds | 49ft. |
| head | 8ft. 6 in. |
| Maintopmast, heel to truck | 34ft. 6 in. |
| Foremast, deck to hounds | 42ft. 2 in. |
| head | 7ft. 6 in. |
| Foretopmast, heel to truck | 29ft. 6 in. |
| Bowsprit, outside | 24ft. |
| Mainboom | 54ft. 6 in. |
| Maingaff | 32ft. |
| Foreboom | 20ft. |
| Foregaff | 22ft. 6 in. |

## YACHT NEWS NOTES.

ON Sept. 30 a meeting of the representatives of the yachting and boating interests of Chicago, to the number of 100, was held at the Sherman House, with Mr George Warrington in the chair. After discussion, the following resolution was adopted: "Whereas, An association of all persons interested in aquatic sports is deemed advisable for the purpose of bettering the facilities in Chicago for such sport, be it resolved, that an association be formed to be called the Chicago Yachting and Boating Association. That all persons interested in such sports for pleasure be invited to become members, and that an initiation fee of $2 be paid by all members, and annual dues be less than $6 a year, payable quarterly. That the object of the said association be to provide suitable facilities for said sport, and to forward, foster and protect the interests of all members of the said association." The following members were enrolled: M. D. Wilber, W. A. Paulsen, W. G. Clark, F. D. Simmons, George Warrington, E. P. Jaquith, C. G. Norton, W. H. V. Rosing, H. E. O. Heinneman, P. D. Dutton, J. H. Randle, George Randle, D. G. De La Fontaine, C. C. Andrews, Arthur R. Clark, J. D. Dunham, F. H. Ray, Thomas Boyle, Oliver Sollitt, F. J. Dagget, W. D. Payne, John George, Allison V. Armour. Committees were named as follows: By-Laws and Constitution—Commodore W. B. V. Rosing, E. P. Warner, Frank Morris, M. D. Wilber. Harbor Facilities—Capt. James Dunham, Charles Norton, Col. Robert Rae, Capt John Prindiville, Frank H. Ray, F. H. Watress. Winter Quarters—George Warrington, W. A. Paulsen, F. O. Heilman. Club-Room—H. J. Carr, E. P. Jaquith, Wallace Clark. The first object of the new association is to secure proper harbor and anchorage facilities, not only for the home fleet, but for the large number of visiting yachts expected next season.

Herr F. Schichau, of Elbing, has attained an unprecedentedly high speed in one of several torpedo boats he is building for the Italian and Russian Governments, having got as a mean of one hour's continuous run in the open sea 27.4 knots. The dimensions are: Length, 152ft. 6in.; beam, 17ft. 5in.; displacement, 130 tons; bunker capacity 40 tons. Each boat has two round-crowned locomotive boilers which are protected by the coal bunkers. The working pressures is 13 atmospheres (105lbs.). At the trials, the weights on board, in addition to 20 tons of coal, were—torpedo armament, 6 tons; guns, 2½ tons; crew (24 men), provisions, stores and firearms, 4½ tons; drinking water, 2½ tons; engine reserve parts and engineer's stores, 2 tons; ship's and boatswain's stores, 2½ tons—total, 40 tons. The guaranteed speed of 26.5 knots during a two hours' open sea continuous trial was easily obtained, and during one hour's open sea continuous run the speed was 27.4 knots. The number of revolutions was 325. The maximum thickness of the deck and hull plates of these boats is .226in. This is slightly diminished toward bow and stern. The results obtained have been surpassed by some of Herr Schichau's boats, which, we understand, have not yet been delivered. The new British 200-ton boats ought, on account of their superior size, to be even faster.—*Engineering*

On the evening of Sept. 25 the steamer Rosedale, a small passenger boat bound from Coney Island to Bridgeport, was in collision off Glen Cove with the schooner yacht Una, the yacht striking the steamer on the port bow. The steamer was considerably damaged, while the yacht lost her bowsprit and foremast, her hull leaking

badly. When the two came together a fireman, Robert Norton, who had just come from the fire room and stood at an open window, was struck by the jibboom and killed, his body being buried beneath the falling spars on the steamer's deck. At the same time one of the schooner's crew, who was at the bowsprit end, was thrown into the water and drowned. D. T. Gregory, of Bridgeport, was very seriously injured; Thos. McCarthy, a fireman, was burned and cut, and Patrick Ellis was injured internally and his arm was broken; Mrs. Nora Sheeler, of Bridgeport, also had an arm and leg broken. The schooner was towed by the steamer into Glen Cove; from all accounts she was responsible for the collision.

The steam yacht designed by J. Beavor Webb for Lloyd Phœnix, will bear the name of Mr. Phœnix's old schooner Intrepid. She will be launched to-day at Neafie & Levy's yard, Philadelphia. Her dimensions are: Over all, 163ft. 6in; l.w.l., 132ft.; beam, moulded, 27ft.; draft, 13ft. 6in. Her engines will be 9½, 14 and 23½ by 19in. The boiler will be 10ft. 3in. in diameter and 8ft. 6in. long, return tubular.

As the result of a good deal of talk, the schooner Shamrock, though once laid up, was fitted out and under way on Saturday last off Bay Ridge, to sail a special match with the schooner Comet. The latter, however, did not put in an appearance, and no race resulted.

The New York Y. C. has secured the steamer William C. Egerton for the use of members of the club on the occasion of the naval parade on Oct. 11, the price of tickets being $2, to be obtained of the superintendent at the club house prior to Oct. 6.

Gladys, the 30ft. cutter designed by Mr. Burgess for Cornelius Vanderbilt, and built by Lawley, has been sold through Stewart & Binney to W. P. Fowle, owner of Sirocco.

Messrs. Stewart & Binney's latest fisherman, the Arthur Birnie, to be launched at Essex next week, is 115ft. over all, 90ft. l.w.l., 25ft. beam, and 13ft. draft.

James Johnson, age 16, was recently arrested in New York and taken to Whitestone to answer the charge of stealing from a number of yachts at that place.

Rajah, yawl, has been sold by H. W. Eaton to W. C. Hubbard.

# Canoeing.

### Two Canoe Cruises.

Good canoe cruises are so scarce that even the most active canoeists are in danger of forgetting that the original and most important use of the modern decked canoe was as a means of travel in localities otherwise inaccessible, and that for those who have the leisure there is more of pleasure in this work than in any other branch of the sport. That canoe cruising is by no means extinct, in spite of the present rage for racing craft and sliding seats, is shown by two widely different volumes just issued by Harper & Bros., New York, "The Danube, from the Black Forest to the Black Sea," by F. D. Millet, and "A Family Canoe Trip," by Florence Watters Snedeker. Different as they are, each has a distinct charm of its own, the larger and more pretentious volume dealing with the more stirring and adventurous side of canoe cruising, while the smaller reflects with equal fidelity the peaceful and pastoral pleasures of a family canoe voyage in home waters.

The Danube cruise was planned several years since by Mr. Poultney Bigelow, of the New York C. C., after his return from a cruise in the West Indies, and the practical management of the journey was carried out by him. His companions were F. D. Millet, the author of the book, and Alfred Parsons, both artists.

The cruise was begun on June 23 at Donaueschingen, in Baden, the head of the river, and ended on Sept. 10 at the Black Sea, its course of 1,775 miles leading through Germany, Austria, Hungary, Servia, Bulgaria, Roumania and Russia.

The wonderful panorama of places and people which the length of the Danube displays would appeal to the most prosaic, and to a party like this, of artists and writers, it furnishes a wealth of material for the pen and pencil. Apart from the story of the cruise itself, the descriptions of the scenery, the river and its many strange craft and the dwellers beside it are specially interesting. The illustrations are numerous and very good.

The neat little pocket volume which forms the sixth of Harper's "Black and White" series, tells the simple story of a canoe trip made by three members of the same family, father, mother, and a small boy, up the Hudson and through the canal and Lake Champlain to the A. C. A. meet of 1891. Devoid of wreck or rapid, with no more stirring incident than the fall of a tent or the capsize of a coffee-pot, it is nevertheless a book that every canoeist will read with pleasure, recognizing the author as a true member of the craft and disciple of "Rob Boy" MacGregor. From cover to cover the book is full of the charm of canoeing and of camp life, and the reader is infused with all the fresh enthusiasm of the writer. The description of the A. C. A. meet and camp is particularly good.

## CANOE NEWS NOTES.

The racing times made in some of the races at the A. C. A. meet were certainly very fast. Glenwood covered the 6 mile triangular course in 57m. 45s., the average best for the 1½ mile triangle being reported by Forest and Stream at 15m. This speed is on a lake, *i. e.* without any current, and probably on accurately measured courses, the craft being 16ft. in length, 30in. beam and with from 120 to 150 square feet of sail. The official times recorded in England for the Royal C. C. Cup race give, on the breezy day we had, and on a lake without current, an average of 27m. 7s. for the 2-mile triangle; or taking the 6 miles of the three best rounds a time of 78m. 45s., *i. e.*, 21m. behind the American time. There may, indeed must, be some mistake or difference in the measurement of the course or in timing, for the boats are very similar; the wind in each case was strong. There is, however, also a strong factor to be borne in mind, viz., the American races are sailed with sliding seats and some 30 to 40ft. more sail area. This difference may also be viewed under the fact that a canoe of American build and fitment, sailed with large bat-wing batter sails, was sailing in many of our races quite as many minutes astern of our leading craft when she sailed without using her sliding seat and large non-houseable centre-plate. So therefore a true comparison can hardly be made unless the rules of both countries are brought into accord.—*Field, Sept. 26.*

The annual regatta of the Lawrence (Mass.) C. C. was held on Sept. 23, the events and winners being as follows: Double blade paddling, mile, W. O. Russell; Adirondack boat, mile, B. F. Robinson; hand-paddling canoe, 100yds, Straightaway, F. D. Lincoln; single-blade paddling, half-mile, F. G. Dyer; Adirondack boat for doctors, half-mile, Dr. O. F. Howe; tandem paddling, members, mile, Perry C. Wiggin and W. C. Murphy; standing paddle, 100yds, straightaway, F. G. Dyer; four-paddle canoe, mile, Lincoln, Graf, Fuller and Jealous; double-oared Adirondack boat, half-mile, M. Butler and R. T. Needham; three-paddle canoe, half mile, Graf, Lincoln and Jealous; tandem canoe, mile, Drake and Burrage, Newton Boat and Canoe Club; swimming, 100yds., Graf. W. R. Perkins, the winner last year of the silver paddling trophy, was not present, and W. O. Russell won the prize.

The latest novelty in the racing line is a new Ruggles racer lately shipped to Bensonhurst for Mr. H. C. Ward, of the New York C. C. The lower edge of the brass centerboard carries a cigar-shaped mass of lead, pivoted to a corner of the board and lying in a horizontal position when lowered. The canoe is a racer, in model and fittings throughout.

A canoe club is likely to be formed this winter at Madison, Wis., partly as the result of the meet of the W. C. A. in that vicinity last summer.

Messrs. S. D Stoddart and R. B. Burchard have lately returned from a trip to Alaska.

### A. C. A. Membership.

The following gentlemen have applied for membership in the Northern Division: W. Clouston and E S. Clouston, Montreal, Can.

### Franklin's Twenty-fifth Annual.

Hartford, Conn., Oct. 1.—The Franklin Rifle Club held its twenty-fifth annual prize shoot at Union Grove on Oct. 1. The prizes offered amounted to over $100. The winners of the special prizes were as follows: W. Tucker, $1 for first bullseye; S. F. Lyons, $2 for the largest number of bullseyes, the next largest number being won by several members, the prize was divided; H. M. Pope, $1 for making last bullseye. Following is a list of the winners of the special money prizes, with score and prize: D. J. Lyon 206, $20; D. S. Seymour 205, $15; H. M. Pope 201, $12; F. K. Rand 197, $10; Z. C. Talbut 193, $9; H. Andrus 192, $8; H. W. Tucker 192, $7; E H. Williams 188, $6; T. H. Britton 185, $5; J. W. Foote, Jr., 183, $4; W. J. Dunbar 182, $3; E. J. Hale 167, $2; J. E. Root 157, $1. Several other shooters also won prizes presented by friends of the club.

George C. Mason.

# Rifle Range and Gallery.

### Revolver Championship at the South London Rifle Club.

The weekly competitions of the South London Rifle Club took place at Staines on Sept. 15. It being a fine day a number of members were present, but the wind was too gusty for good revolver shooting.

Mr. Walter Winans won first prize in both the revolver competitions, making 39 at the disappearing target.

At the stationary target he made top score with a 39, but wishing to have a higher score toward the revolver championship aggregate he continued shooting, making four scores of 40, and finishing with a score of 41 out of a possible 42. He has now shot on the five days necessary to qualify for the revolver championship (the aggregate of the top scores made on five different days counting for the championship.

He has a big lead of the other members, and his total is within one point of what he won the revolver championship with last year; but as there are six more weekly shoots, if it is very calm on one or two of the days he may try to add a point or two over his two scores of 40:

| | | | | | |
|---|---|---|---|---|---|
| Walter Winans | 42 | 41 | 41 | 40 | 40—204 |
| H Andrews | 39 | 38 | 38 | 38 | 37—190 |
| Major B McKerrel | 41 | 37 | 36 | 36 | 36—183 |
| C F Lowe | 36 | 46 | 36 | 36 | 29—173 |

*Sept. 22.*—In spite of a wretched rainy day the revolver members of the South London Rifle Club had a further struggle for the championship of the club.

There was one spoon competition, the scores to count toward the aggregate for the revolver championship of the club. Mr. Walter Winans made top score of 41, making a run of nine bullseyes in succession on the 2in. bullseye at 20yds., which is the best yet done in England.

He added one point by this 41 score to his aggregate, the scores for the championship of the club standing now:

| | | | |
|---|---|---|---|
| W Winans | 42 41 41 41 40—205 | F E Varley | 37 36 .. .. ..— 73 |
| H Andrews | 39 38 38 38 37—190 | D Hunt | 32 26 .. .. ..— 58 |
| R Mackerrell | 41 37 36 36 36—186 | A W Carter | 27 23 .. .. ..— 50 |
| C F Lowe | 36 36 36 36 36—180 | E Howe | 35 .. .. .. ..— 35 |
| T W Heath | 37 35 33 31 27—164 | E W Keen | 28 .. .. .. ..— 28 |
| Mortimer | 34 34 25 25 ..—118 | Ayers | 26 .. .. .. ..— 26 |
| T Collman | 37 36 36 .. ..—109 | Malshinger | 8 .. .. .. ..— 8 |
| T P Hope | 31 26 25 .. ..— 82 | | |

### Chicago Rifles.

Chicago, Ill., Sept. 21.—The Garden City Rifle team met for their weekly shoot last evening at Messrs. Burley & Erickson's gallery, No. 146 South Halsted street. Conditions and scores as follows: 25yds, off-hand, .22cal. rifles, 25 shots each, Massachusetts paper target. In shooting under the above conditions the members were divided into two teams, sides being choosen by Capt. C. A. Hankle and Lieut. W. J. Gibbs. Team scores:

| | | | |
|---|---|---|---|
| C A Hankle | 259 | W J Gibbs | 253 |
| A Sorensen | 262 | H S Burley | 276 |
| A McBean | 261 | G O Nisja | 264 |
| F Erickson | 258 | J C Martin | 251 |
| R McBean | 255 | J Polites | 249 |
| J Hosie | 242 | M Tatro | 249 |
| T Ford | 240—1777 | Mrs Thornton | 226—1774 |

It will be seen by the scores that the Captain's team won the shoot by three points. The regular shoot is as follows:

| | | | |
|---|---|---|---|
| H S Burley | 276 | W J Gibbs | 259 |
| G O Nisja | 264 | F Erickson | 258 |
| A Sorensen | 262 | R McBean | 255 |
| A McBean | 261 | J C Martin | 251 |
| C A Hankle | 259 | J Politis | 249 |
| M Tatro | 249 | | |
| J Hosie | 242 | | |
| T Ford | 240 | | |
| Mrs Thornton | 226 | | |

In the sweepstake that followed Mr. Al Sorensen won by a score of 108 possible 120 points.

*Sept. 27.*—The scores this evening were:

| | | | |
|---|---|---|---|
| H S Burley | 269 | Al Sorensen | 263 |
| G O Nisja | 269 | Mrs T Thornton | 258 |
| A McBean | 266 | C A Hankle | 253 |
| W J Gibbs | 263 | John Politis | 255 |
| J C Martin | 254 | | |
| R McBean | 252 | | |
| A J Trisbie | 250 | | |
| J Erickson | 250 | | |

After the shoot a sweepstake was shot for and won by A. McBean by a score of 109 out of a possible 120.

### Port Chester Rifle Club.

Port Chester, N. Y., Sept. 26.—The following scores were made by members of the Port Chester Rifle Club on Saturday, Sept. 24; 200yds., off-hand, standard American target:

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| R Rudd | 8 | 9 | 5 | 8 | 6 | 8 | 7 | 6 | 5 | 3 | —65 |
| | 8 | 9 | 9 | 5 | 4 | 10 | 6 | 5 | 7 | 6 | —69—134 |

| | 2 | 5 | 2 | 2 | 3 | 3 | 6 | 2 | 5 | 6 | —35— 69 |

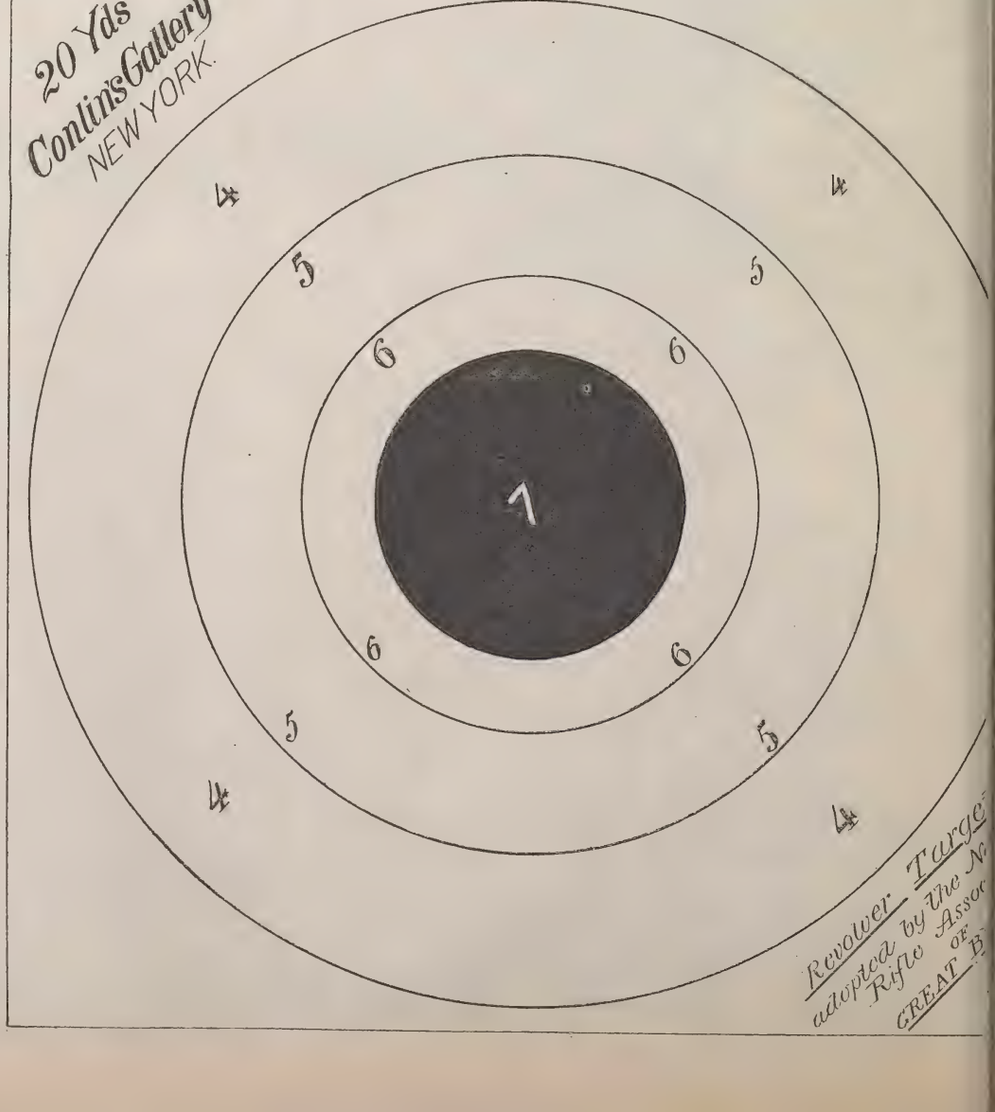
R. McNeil, Jr., Secretary.

### Very Rapid Work with a Revolver.

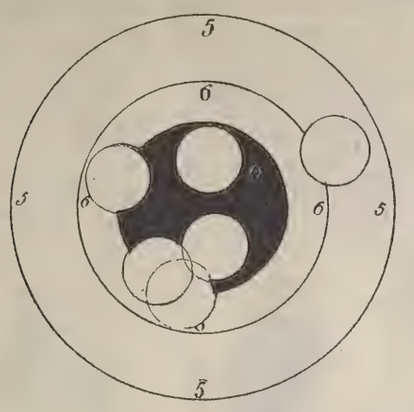
As the readers of Forest and Stream know, Mr. Walter Winans holds the record for six shots in twelve seconds at 20yds., both at a 3 inch bullseye with 2-inch carton (made at Bisley in 1891), and at a 2-inch bullseye at 20yds., made at Bisley the present year.

Although Mr. Winans won first prize both years, he labored under a disadvantage from not being able to practice at this style of shooting before competing in 1891, and this year also before Bisley for several reasons he was unable to devote much practice to it.

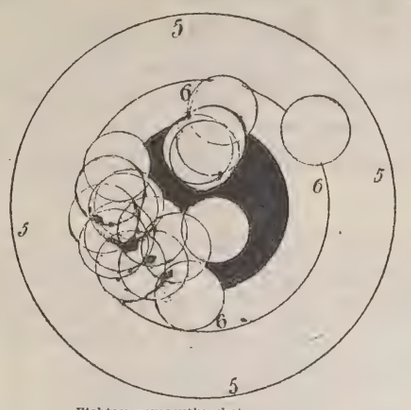
Since the Bisley meeting he has been experimenting at this style of shooting, and on Sept. 6 he made a score of 41 out of a possible 42 on the 2-inch bullseye (three points better than his best on record for a 2-inch bullseye and two points better than his 3-inch bull-eye record).



This being such an exceptionally good target may interest readers, although it being only made in practice prevents its being a "record."



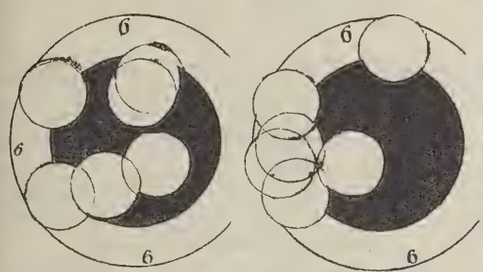
It must be remembered that the trigger pull had to be 4½lbs. (Bisley rules), which is an enormous handicap in rapid firing, and that the six shots have to be got off in twelve seconds, giving only two seconds to cock and fire. (The pistol was a single action S. & W., English army ammunition, .45cal.)



### Hudson Rifle Club.

The fourth annual prize shooting festival of the Hudson Rifle Club, Captain H. L. Hansen, of Jersey City Heights, N. J., will be held at their ranges, 35 Giles avenue, Tuesday, Wednesday, Thursday, Oct. 25, 26 and 27. Shooting from 7 to 12 P. M. each evening. German 25-ring target, open to all comers, any .22cal. rifle, tickets (3 shots) 50 cents. Target of honor, open to members of Hudson Rifle Club only. Well-known shooting rules to govern. Shooting Committee—H. L. Hansen, Captain; Chas. E. Bird, Secretary; T. A. Reynolds, H. Boddey, John Rebhan. Visiting riflemen will be met at Marion Station, P. R. R., on the 7 and 7:30 P. M. trains from New York, and 7:42 and 7:53 P. M. trains from Market street, Newark.

The Committee.



Eighteen consecutive shots.

REVOLVER TARGETS BY W. E. CARLIN.

### Conlin's Gallery.

MR. CONLIN announces during the fall and winter season of his twenty-eighth year, new matches, firearms, targets, prizes and records from England and France. During the month of October a medal will be awarded to the best record of three scores on British target at 20yds. with revolver. The gallery is at 1255 Broadway.

The opening revolver match of the season commenced Sept. 12 and closed Sept. 24. The new British revolver target reduced was

REVOLVER TATGETS BY W. E. CARLIN.

used. 12yds., off-hand, trigger pull, 3lbs. The match was won by W. E. Carlin with a score of 125 in a possible 126. Conditions were the three best targets, not necessarily consecutive. The revolver used was a Smith & Wesson .44cal., round ball and 6grs. powder. A continuous revolver match will commence Oct. 1 and end Oct. 31. A handsome gold medal will be awarded to the contestant making the three best scores on the new British target at 20yds., off-hand.

### Abesser, Suscomb and Millow.

RIDGEWOOD, N. J., Oct. 1.—A very interesting rifle match between Captain Robert M. Abesser and John B. Suscomb took place here to-day, at 200yds., Creedmoor target, military rifle, open sights:

Suscomb.....3344544453455545454554455—108
Abesser.....4455555455454454455555555—118

Another match was decided between Abesser and M. D. Millow, 200yds., bullseye only to count, size of bullseye 14in. diameter, five rings, counting 1, 2, 3, 4 and 5 respectively:

Abesser.....4544455445—44 Millow.....2345445325—37

T. M. CONNELY, Scorer.

### New Rifle Club in Jersey.

NEWARK, N. J., Oct. 1.—An organization known as the First Brigade Rifle Association has been formed in Newark, N. J., the outcome of the meeting of the New Jersey Rifle Association at Sea Girt during the week of Sept. 20-25. The officers are, President, Capt. Wm. H. Howard, First Regiment; Vice-President, Lieut. Henry Allers, First Regiment; Secretary, Capt. H. B. Schureman, First Regiment; Quartermaster, Capt. G.W. Church, First Regiment; Capt. of Association Team, Maj. David L. Wallace, First Regiment, and Surgeon, Lieut.-Col. A. K. Baldwin, First Brigade. The initial shoot of the association was held at the Shooting Park, Newark, on Saturday, Oct; 1, and the following scores were made, 10 shots each, at 200yds., Creedmoor targets:

Lieut-Col A K Baldwin.....5453434554—42
Maj David L Wallace.....4445343545—41
Lieut Henry Allers.....4554434453—39
Capt H B Schureman.....4334543454—39
Capt G W Church.....3435534334—37
Capt W H Howard.....4334453343—35

It is the intention of the association to shoot every Saturday afternoon until the close of the season.

## Trap Shooting.

All ties divided unless otherwise reported.

### FIXTURES.

If you want your shoot to be announced here send in notice like the following:

Oct. 5-6.—West End Gun Club tournament, at Ottumwa, Iowa.
Oct. 4-7.—Chas. Polster's tournament, Indianapolis, Ind.
Oct. 5-7.—First annual tournament of the Riverside Gun Club, at Red Bank, N. J. First two days targets, last day live birds John P. Cooper, Sec'y.
Oct. 6 7.—Cortland County Sportsmen's Club tournament, at Cortland, N. Y.
Oct. 11.—Eastern New York League kingbird tournament, with Cruttendens & Cords new trap and pull, at Canajoharie, N. Y. T. C. Pegnim, Sec'y.
Oct. —.—Amsterdam (N. Y.) Gun Club tournament.
Oct. 11-12.—Syracuse (N. Y.) Gun Club opening tournament, on Croton street grounds.
Oct. 12 13.—Frankfort Gun Club tournament, at Frankfort, Kan.
Oct. 12-14.—Wilmington (Del.) Rod and Gun Club tournament.
Oct. 15.—East Side-Mutual Gun Club tournament and ninth monthly team contest of N. J. Trap-Shooters' League, Weidenmeyer's Grove, Hamburg place, Newark, N. J.
Oct. 18.—Newton (N. J.) Gun Club tournament.
Oct. 18-19.—Martinsburg (Va.) tournament, under auspices of eight club's, $200 added money.
Oct. 18-20.—Highland Gun Club annual fall tournament, at Des Moines, Iowa.
Oct. 19-20.—Somerville Gun Club tournament, Somerville, N. J.
Oct. 21.—New Jersey Shooting Club tournament, at Claremont, N. J.
Oct. 25-26.—Interstate Manufacturers' and Dealers' tournament, at Meriden, Conn.
Oct. 26-28.—Omaha (Neb.) tournament.
Nov. 23-26.—Milwaukee (Wis.) tournament, targets and live birds.
May 23-25, 1893.—Knoxville Gun Club tournament, $1,000 added to purses. Also valuable merchandise prizes.

## DRIVERS AND TWISTERS.

There is a great diversity of opinion among the exponents of live bird shooting as to the policy of running, during tournaments, sweepstakes at 4 birds per man, $3 entry, or even 5 or 7 birds per man, with the entrance fee at from $5 to $7. Some prefer the smaller sweepstakes, while others claim, and justly, it would seem, that they are the most expensive style of shooting that can be indulged in, and they object to entering shoots where a man is allowed less than from 10 to 15 birds, with the entrance fee $1 a bird. These men claim that whereas there are hundreds of men who can "hold up" and kill from 4 to 7 birds straight, no one is able to get anywhere near his entrance money back in such contests even though he "kills straight" all day. Shooting at from 10 to 15 or 20 birds is more of a strain on the nerves, and the man who is able to hold himself together and get in first or second place usually gets his entrance money if no more, when the money is awarded, and this is more satisfactory than to bang away all day at small sweeps where a man is usually out of pocket no matter how well he shoots. The same rule applies to target-shooting. In the majority of the tournaments as at present arranged the bulk of the contests are at 10 targets per man, $1 entry. Deducting the usual fee of 3 cents each per target there is left in the pot 70 cents per man. In contests of this kind a man may break straight in a day's programme and still be a loser. Of course there are exceptions to this rule as to all others, but in the long run the above obtains.

The Newtown (N. J.) Gun Club has come to the front with a programme of a blue rock target tournament to be held on October 18. The club has well equipped grounds within a few minutes' walk from the depot and will accord a hearty welcome to all comers. The shoot will be under the management of E. L. Decker, A. B. Brickner and L. M. Morford, all of whom are well-known to the shooters of this section. The programme will comprise four 10-target events $1 entry, two 15-target events $1.50 entry; one 20-target event $1.50 entry and a race for teams of two men from any club, 20 targets per man, $4 entry per team. The proprietor of the Cochran House will give a supper and a bottle of wine to the shooter making the highest score in the 20 target event. Targets will be charged for at the rate of two cents each. The shoot will be held on the fair grounds where the club has a flue house. Shooters can leave New York via the D. L. & W. R. R. at 7:30, Newark at 7:53, arriving at Newton at 10:25 A. M.

The following letter has been received from Jas. W. Clinton, secretary of the Standard-Keystone Target and Trap Company, of New London, Conn.: "During our annual tournament we offered to give a two-day State team tournament here this fall and add $100 to the purse. We are ready to make good that offer and will hold a two day shoot any time during October or November that the teams may determine upon, except Oct. 25 and 26, which are the dates for the Moodus interstate tournament. The team race to be held on the second day and open to one team of 10 men from any State, to determine which State has the champion target team of America. The conditions of the race to be decided upon by the captains of the teams, but each man must shoot at not less than 50 targets. There are at least twelve States that could furnish first class teams, and we shall be pleased to hear from all of them." Now let the different States nominate their dates and make a big success of the race.

From time to time we receive letters from club secretaries requesting us to give them a "write up" on coming tournaments, but in a great many cases the said secretaries neglect or forget to send up programmes in time to be noticed. Take, for instance, the tournament of the Riverside Gun Club, of Red Bank, N. J., which began on Wednesday, the 12th. Up to 3 P. M. on the previous Wednesday, when our forms were locked up, we had received no programme of this shoot. We are willing to do all in our power, Messrs. Secretaries, to "boom" your shoots, but can not do so to good advantage unless we know something of the details.

The members of the Syracuse Gun Club should have good support from the trap-shooters of their section, as their programme is one of the best published this season. The club charges only 2 cents each for targets, and this of itself is a decided innovation for the section. Then again the entrance fees to the various events are such as to insure good returns to those who shoot in good form. The shoot will be held on next Tuesday and Wednesday, on the new Croton street grounds of the club. The main event will be a sweepstake at 20 targets, $3.50 entry with a guaranteed purse of $50.

The Cedar Island Gun Club, of Babylon, L. I., has elected these officers: President, Frank Fitzsimmons; Secretary, Frank Berry; Treasurer, Edward Pettit; Gunning Committee—Stephen Duryea, Thomas Farrell, Edward Pettit; Chief Cook, Richard Bailey; Sergeant at Arms, Jack Briscoe. The club membership is limited to fifteen, the object being to gun and fish in the Great South Bay. The club house, recently built, occupies a knoll in the center of Cedar Island, and is fitted with cooking, sleeping and eating apartments, and a drawing room.

A jolly party assembled at Frank Class's Morristown (N. J.) shooting grounds on September 28, to try their skill at smashing blue rock targets. In all eleven sweeps were shot at 10 targets each, the number broken and lost by each contestant being as follows. Fred. Piper 92-12, Jennie Smith 91-19, Manon 90-20, Reilly 89-21, Timmons 85-25, Riggott 82-28, Hathaway 75-35, Frank Class 70-40, Budd 62-48, Tenard 50 60. The e shoots are held every Wednesday afternoon and everybody is welcome to take part.

What promises to be one of the biggest shoots ever held in Virginia will take place at Martinsburg on Oct. 18 and 19 under the combined auspices of the Martinsburg, Winchester, Staunton, Tuscarora, Hagerstown, Shepherdstown, Plainsfield and Charlestown gun clubs. Over $200 in cash will be added to the purses, and there will also be a big list of valuable merchandise prizes. With eight different localities interested this should be a record breaking affair as far as attendance goes.

Robert Cox, who for a long time has been in the pigeon purveying business in West Washington Market, has disposed of his business and on Monday started for Chicago. He will probably locate in that city or in St. Louis and will handle live pigeons and game for the market. "Bob" is a genial chap and carries with him the good wishes of a host of friend.

On the morning of the live bird day at Peekskill a little race at 10 birds each for a bottle of "Mum" took place between Ben Everingham of the local club and Fred. S. Moore of the New Jersey Shooting Club of Claremont, N. J. The score.

Moore.....1102112221—9 Everinghim.....0011220102—6

Frank Class, of Morristown and John Riggott, of Rockaway, will shoot their return match at Dexter Park, L. I., on Tuesday, Oct. 11. The conditions will be 100 live birds per man, 12-bore guns, 30yds. rise for a purse of $500. The last match was won by Riggott who killed 95 to Class's 94. A big crowd will witness the match.

What a contest there will be at Wilmington next Thursday if the New Jersey, Delaware, Maryland, Pennsylvania and District of Columbia "Big Sixes" come together! Either State should be able to put in a team to break close to 140 out of 150 targets.

Landlord Mousarrat of the Eagle Hotel, Peekskill, is mourning the loss of a valuable cocker spaniel. It was stolen from his place last week.

George Mosher will attend the Syracuse tournament on Tuesday and Wednesday and then trit down to Wilmington.

The programme of the Syracuse Gun Club is pronounced one of the best of the season.

Peekskill will give a big tournament at live birds and targets next spring.

"Tee Kay" Keller will captain the Jersey team at Wilmington.

Al. Spangler is just recovering from a severe illness.

C. H. TOWNSEND.

### Pittsburgh Gun Club Tournament.

PITTSBURGH, Pa., Sept. 30.—The shoot at Salt Works Station, under the auspices of the Pittsburgh Gun Club and the direct management of Messrs. Elmer E. Shaner, "Jim Crow" and "Old Hoss," was a great success. The shooting was good and the attendance large. There was not a hitch in the proceedings and great credit is due the managers.

The shooting was at live birds and Keystone targets. The birds were first-class and very difficult to kill. Following are the scores:

No. 1, 12 Keystones, entrance $1: Shaner 10, Atwood 10, England 8, H. Gibson 8, Old Hoss 9, A. H. King 11, Oney 12, Mack 9, Crow 12. Vance 11.

No. 2, 12 Keystones, entrance $1: Shaaer 9, Old Hoss 10, Mack 11, England 12. Atwood 8, Oney 10, Vance 10, H. Gibson 5, A. H. King 12, Crow 10.

No. 3, 18 keystones, $1.35 entrance:

### Lynchburg Gun Club.

LYNCHBURG, Va., Sept. 28.—At the Lynchburg Club shoot yesterday the following scores were made:

Club team shoot, 50 bluerocks each man, 5 traps:

| Team No. 1. | | Team No. 2. | |
|---|---|---|---|
| Wilson | 38 | Cleland | 30 |
| Terry | 33 | Withers | 25 |
| Dornin | 44 | Christian | 25 |
| Durphy | 31 | Clark | 28 |
| Smith | 25—171 | Stearns | 31—154 |

Dornin made 34 straigh, winning clean score badge for 25, and Silverthorn medal for highest score in team shoot.

Nine singles and three pairs each man, known traps, unknown angles:

| | | | |
|---|---|---|---|
| Nelson | 12 | Durphy | 9 |
| Terry | 12 | Cleland | 10 |
| Dornin | 12 | Withers | 9 |
| Smith | 10 | | |
| Christian | 8 |
| Clark | 10 |
| Stearns | 11 |

### Fulford Gun Club Shoot.

HUMMELSTOWN, Pa., Sept. 27.—Inclosed find scores of the badge shoot held at the Fulford grounds to-day. This club has a membership of sixty-six, mostly members who enjoy seeing the sport without taking any active part. However, a few of the old 76'ers are left who occasionally do some shooting.

The following members participated in badge shoot, 25 targets: J. Wikle 15, D. B. Cassel 16, D. Z. Bolton 13, W. H. Ettele 14, J. J. Bolton 18. J. J. Bolton winning the badge.

After the badge shoot a few live birds were shot:

J J Bolton.....1111111111—10 D B Cassel... .....0112211100— 7
W H Ettele,.....0121110111— 8

The club is in a flourishing condition both in membership and financials, and it is the only club within the United States which can boast of two expert one-armed shooters: W. S. Canon and J. J. Bolton.

J. J. BOLTON, Sec'y.

### Wilkesbarre Gun Club.

WILKESBARRE, Pa., Sept. 24.—A few members put in an appearance to-day for a crack at the targets. The birds flew nicely and broke easily, and some of the amateurs are beginning to show a good improvement; 25 single keystones, known angles:

Crone.....1110111011111111111111101111—22

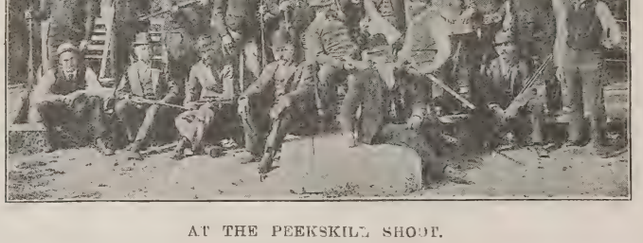
W. BARRE.



## Pigeons and Targets at Peekskill.

ONE of the most enjoyable tournaments of the season was the one held by the Peekskill (N. Y.) Gun Club, on Sept 29 to Oct. 1 inclusive. The attendance was by no means what was hoped for, but the party was such a jolly one that the absence of a crowd was not regretted. To have a jolly time was the predominant idea with each man, and it is safe to say that each and every one achieved his desire. The shooting on the first and second days was at bluerock targets, thrown from expert traps, the electric pull being used. The North handicap was enforced, the shooting being done in squads of six, under the rapid-firing system.

The Peekskill Gun Club has about twenty-five members on its roll, about one-third of these being active shooters. The club has grounds about a mile from the center of the city, the property being owned in fee simple by the club. The grounds are situated in a clearing in a heavily-wooded tract, the land sloping upward in every direction from the club house. The sloping ground and the foreground of heavy woods, with the variations of color of foliage, make these hard grounds for target shooting, and high averages are an exception. The grounds are at least five per cent. harder than those with a level field and clear foreground. The club has a neat one-story club house, 30×15, with a 12ft. verandah and a well-appointed secretary's office. The scoring is done from a "cage" built even with the roof of the verandah, as shown in the picture. The trap pulls for target shooting are also in the cage. A restaurant tent stood to the right of the club house, while on the opposite flank was a reception tent.

The opening day was a very quiet one in Peekskill, all the business houses being closed in honor of the memory of Gen. Husted, "the Bald Eagle of Westchester county," who was buried on that day. Republican or Democrat, Mugwump or Prohibition, it mattered not on this occasion what a man's politics might be, all united in honoring the memory of Peekskill's most honored citizen. The attendance at the tournament was much decreased by the funeral. Still there were enough on hand to make some interesting contests. Among the visitors were W. R. Hobart, of Newark, N. J.; George Mosher, of Fulton, N. Y.; W. M. Thomas, of Bridgeport, Conn.; S. W. Smith, of Orange; Neaf Angar, Chas. Smith and T. H. Keller, of Plainfield, N. J.; W. Fred. Quimby, of New York, and S. W. Lyon, of Brooklyn. The shooting lasted up to about 5 P. M., nearly 3,000 targets being thrown. The weather was fine up to the finish.

In the evening after supper had been discussed a party of club members invaded the Eagle Hotel, where the visitors were quartered, and while one party took possession of Fred. Quimby's room, another party, guided by genial Ben Everingham, of *Life*, visited the truck house and gymnasium of Cortlandt Truck Company, where they were accorded a warm welcome from the fire laddies. This company has 100 members, comprising nearly all the professional and substantial business men in the town. It occupies part of the first and second floors and the entire third floor of a building in which are also quartered two hose companies. The third floor is occupied as a gymnasium, which is equipped with everything needed for physical culture. Quite a number of the boys were in the place, one pair being busily engaged in punching the bag, while others amused themselves in various ways with the apparatus. The members of the company were busily engaged in getting ready for the firemen's parade held on Oct 4, and were being put through a drill by their foreman. Over 60 men took part in the drill, all in the regulation uniform, comprising a double-breasted frock coat of gray cloth, with trousers and cap of the same color.

AT THE PEEKSKILL SHOOT.

After inspecting the truck-house the party went back to the hotel where they joined forces with the party in Fred Quimby's room where a jollification was being held. "Dutchy" Smith, "Tee Kay" Keller, Quimby, Thomas, Hobart, Apgar and Mosher of the visitors were there and all were being royally entertained by Messrs. Robertson, Wygant, Richmond, Halstead, Hall and other members of the local club. The seance lasted until midnight when the party dispersed for rest.

About 11 o'clock, while seated in Mr. Quimby's room the party was startled by a sound which appeared to be a combination formed buzz-saws, screech-owls, fog-syrens, weazened locomotive whistles and a thousand and one other discords. This we were informed was the "mocking bird" fire alarm, the effect of which on tired nerves is startling to say the least. The alarm was sounded in response to a call for help received from Sing Sing, where a fierce fire was raging. The call was responded to by the truck company and one of the hose companies.

Below are the scores of the first day's shoot, the events in order being as follows:

Match No. 1, 10 bluerocks, entrance $1; No. 2, 10 bluerocks, $1; No. 3, 15 bluerocks, $1 50; No. 4, 20 bluerocks, $2; No. 5, 10 bluerocks, $1; No. 6, 15 bluerocks, unknown angles and known traps, $1.50; No. 7, 10 bluerocks, $1; No. 8, 20 bluerocks, $2; No. 9, 10 single bluerocks, 3 pair doubles, $1.50; No. 10, 10 bluerocks, $1.

No. 1: Smith 10, Mosher 8, Olcott 5, Thomas 3, Hobart 10, Lyon 5, Vail 7, Wygant 0, Keller 7, Dutchy 8, Apgar 9, Gettle 7.

No 2: Mosher 7, Keller 8, Thomas 9, Lyon 9, Gettle 9, Olcott 7, Vail 7, Quimby 6, Smith 6, Hobart 8, Dutchy 9, Apgar 9.

*The Second Day*

was cool and clear, with a fairly strong breeze from the left. The party was no larger than on the opening day. Some of the shooters had left for home on the previous evening, while the only newcomers were M. F. Lindsley, of Hoboken, N. J; Dr. R. J. Carroll, of Red Hook, N. Y.; Jas. Baker, of Ridgefield, N. J.; W. R. Creveling, of Jersey City, N. J.; F. G. Moore, of New York, and Ed Collins, of West Hoboken, N. J. During the afternoon quite a number of spectators came to the grounds, among them being several ladies. The background bothered the shooters considerably and high averages did not obtain.

Below are the scores, the events being as follows: Match No. 1, 10 bluerocks, entrance $1. No. 2, 10 bluerocks, unknown angles, known traps $1. No. 3, 15 bluerocks, $1.50. No. 4, 10 bluerocks, $1. No. 5. 20 bluerocks, $2. No. 6 10 bluerocks, $1. No. 7, 15 bluerocks, $1.50. No. 8, 20 bluerocks, $2 50. No. 9, team shoot, any three men to constitute a team, 10 bluerocks, entrance per team $3. No. 10, 10 bluerocks, $1. No. 11, 25 bluerocks, $2.

In the team match the team of the Interstate Gun Club secured first honors, they having tied, according to the score, with the Peekskill team, and winning on the shoot-off. In this match all agreed that Halstead, of the Peekskill team, broke 9 birds, but as the score showed only 8 breaks, it was allowed to go as a tie.

*Saturday, the Final Day,*

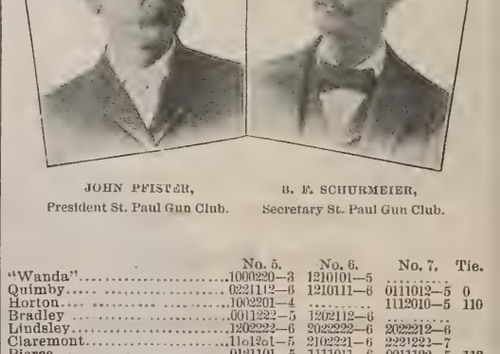
was devoted to live bird shooting, and 600 birds were on hand. The weather was clear all day, and up to noon there was a moderate breeze from the left. After dinner, however, the breeze gradually strengthened until it had become a gale. The birds, without exception, were as fine a lot as have been trapped during a tournament for many a month, good enough in fact to be classed as match birds. Of the 600 birds not over a dozen refused flight when the traps were sprung, and the majority of these proved to be good flyers once they caught their wings. Of the others some few were slow flyers, a large number were veritable "screamers," while the rest were better than the average. Of course a thirty-mile wind has a tendency to make almost any bird fly well, but in this case the birds trapped when the breeze was only moderate also puzzled the shooters.

On the previous evening the most of the Jerseymen, along with Geo. Mosher, Dr. Carroll and W. M. Thomas had started for home, and the only new comer was Mrs. M. F. Lindsley, "Wanda."

The sport opened at 9:30, and at 5 P. M. the last bird was trapped. During the early part of the day the retrieving was done by a couple of small boys, but after noon it was attended to by Turk, a pointer belonging to Mr. Raymond, of the Peekskill Gun Club. Turk proved to be a master at the business, not a bird escaping him during the day. Some of his catches of birds

J. P. BURKHARD, Director St. Paul Gun Club.

R. G. KENNEDY, Treasurer St. Saul Gun Club.



on the wing showed wonderful sagacity. On one occasion he jumped fully 5ft. and caught a bird that was within an ace of crossing the boundary. Another bird was caught by him when it was within 6in. of the line. This dog was purchased by Mr. Raymond a short time previous to the tournament, its former owner not being satisfied with its field work. The price paid was the enormous one of $3, and it is safe to say that the money was well spent.

The shooting was extremely difficult, not only from the fact that the birds were fast and the wind strong, but also for the reason that the upward slope of the ground from the traps to the outer boundary made the flight of a low-lying bird very deceptive, these being frequently undershot. As a result, the scores were low in some of the events, where the majority of the birds persisted in keeping close to mother earth.

A couple of hundred spectators were on hand in the afternoon, about a score of ladies being included, these being attracted by the announcement that Mrs Lindsley would take part in the shooting. The sight of a lady manipulating a shotgun was a novelty to the Peekskill people, and every kill made by "Wanda" was generously applauded.

Below are the scores made during the day. Nos. 1, 2 and 3 were at 5 birds each, $5 entry; No. 4, at 7 birds, $7; No. 5, 6 and 7 at 7 birds, $5 entry. There were four moneys in each event. The shooting was done under American Shooting Association rules, except that the boundary was 65yds. from the center trap; five traps were used.

C. H. TOWNSEND.

## St. Louis Trap-Shooting Tournament.

AFTER a close and exciting struggle N. O. Meade won the fourth annual contest for the target-shooting championship of St. Louis city and county. The contest was for a handsome diamond badge offered by Rawlings Bros., of St. Louis, and the conditions were 100 single artificial targets, 5 traps, rapid-firing system, all contestants to use shells loaded by the donors. Mr. Meade made a score of 94 and was closely followed by Mr. P. M. Kling, with a score of 92. The contest was witnessed by an audience of about 1 000 spectators, and took place on the grounds of the Independent Gun Club Sept. 25. The wind blew strongly across the traps from right to left, and the shooting was very difficult. Following are the scores:

| | | | |
|---|---|---|---|
| N O Meade | 94 | Sam Hill | 80 |
| P M Kling | 92 | L E Denig | 74 |
| W H Cotton | 86 | G C Weaver | 60 |
| Joseph Lenbarth | 84 | Jule Selzer | 79 |

G. H. RAWLINGS.

### Dexter Park Trap-Shooting League.

THE fourth of the series of shoots in the Dexter Park Trap-Shooting League was held at Dexter Park, L. I., on Friday, Sept. 30. Out of the original seven clubs entered the Wauregan and Crescents withdrew, leaving the Unknown, Glenmore, Parkway, Linden Grove and Emerald Gun clubs to compete for the two silver cups given by Louis Miller, the proprietor of the grounds, for the first and second best scores at the close of the five shoots in the series. The shooting was not up to that made at the last contest, except by the Unknowns, who tied their score of 84, the Emeralds dropping from second place to third, three points behind the Glenmores and two ahead of the Parkways. Straight scores of 10 were made by D. Monsees, C. Plate and C. Detlefsen for the Unknowns; J. A. Eppig, C. Furgueson, Jr. and R. Phister, Jr., for the Glenmores; Col. J. H. Voss was the only one on the Emerald team. The birds were a fine lot and got away very fast. The weather was delightful, with a light southwest breeze, and all present had an enjoyable day's sport. The time of the shoot was 5 hours and 45 minutes. The scores:

| Unknown Gun Club. | | Linden Grove Gun Club. | |

The birds gave out and the ties left were div.

### New York German Gun Club.

THE attendance of members at the regular monthly bluerock shoot of the New York German Gun Club was very small on Thursday, Sept. 29, at Dexter Park. Six members competed at 20 birds each, 18yds. rise. P. Garms, Jr., won with a score of 18. A small team shoot followed. The scores:

| | | | |
|---|---|---|---|
| Dannefelser | 10111111011001100000—11 | Garms, Jr. | 11111111011111111101—18 |
| Weadmann | 11111011100111100000-12 | Frazier | 00111111000010111111—13 |
| Lemone | 00010111100011111100—11 | Tomford | 10010110011101111001—12 |

Team shoot, losing side to pay:

| | | | |
|---|---|---|---|
| P Garms, Jr. | 111 | J Dannefelser | 011 |
| J Frazier | 111 | C Lemone | 110 |
| W Tomford | 111 | G Weadmann | 011 |
| F Sauter | 111—12 | P Garms, Sr. | 110— 8 |

### Chicago Traps.

CHICAGO, Ill., Sept. 29.—Cumberland Gun Club held a big clam bake and pigeon shoot last Saturday at the lodge near Lowell, Ind. More than 400 birds were shot and fully that many clams disposed of. The birds came from Chicago, and the clams from Baltimore.

To-morrow evening Garfield Club will hold its semi-annual meeting at the Sherman House. Business of importance will be taken up and some changes in the by-laws proposed. It is also proposed to have a series of live-bird shoots for a diamond medal or badge, to be shot for once a month in November, December, January, February, March and April, at 20 birds each. The man winning the trophy the greatest number of times in the six shoots retains it as personal property. Subscriptions to this medal fund are $5 each. No entries will be received after Oct. 1. These matches are entirely independent of the usual holiday shoots, and all expenses will be paid by the medal contestants.

Charlie Budd is beginning to pester again, and writes as follows from Des Moines under date of Sept. 25:

"You may think I am not in shooting matters, but I am, just the same. I will be in Chicago about February ready to battle with some of the record breakers, and be in condition to do some shooting, I hope. How do the boys take to the new park? I am in hopes it will be a fast ground and as lucky for me as the old one. I shall surely be on hand during the World's Fair series, but am sorry the shooting could not take place during the cold weather, as the birds would be much better and it would put more life in the work.

"I see Jack the Giant Killer is still killing 'em by the hundreds. Does E. D. Fulford still hanker after my scalp?

"I am going to do considerable field shooting this fall, and run about 30lbs. weight off me, as I now weigh 190.

"Kindly remember me to all the boys."

E. D. Fulford is in Chicago. E. HOUGH.

### The Glenmore Rod and Gun Club.

THE second regular monthly shoot of the season by the members of the Glenmore Rod and Gun Club, for the H. Claus diamond badge, took place at Dexter Park, L. I., on Wednesday, Sept. 28. There being 24 members present, they were divided into teams of 12 each, representing the Twenty-sixth and Twenty-seventh Wards. The latter team won by 5 birds, W. Levens and G. Pfohlman tied with 7 each for the badge; the former won on the shoot-off. The club has three members' prizes for the best scores in classes every three months. R. Phister, Jr., won a silver stand in Class A; F. Maier beat C. Englebrecht in Class B, for a dozen silver-plated knives; and W. Livingston won a solid leather shell case in Class C. The scores for diamond badge:

| 26th Ward Team. | | 27th Ward Team. | |
|---|---|---|---|
| J Young | 2001102—4 | T T Edgerton | 1001020—3 |
| R Phister | 2112210—6 | W Levens | 1221211—7 |
| E Eppig | 2200102—4 | Dr. Boehms | 1111012—6 |
| C Engelbrecht | 1010121—5 | J Schlieman | 1120112—6 |
| F Thompson | 0121100—4 | P Sutter | 0011122—5 |
| L Eppig | 2002012—4 | J Shevlin | 1100000—2 |
| F Maier | 1002211—5 | W Livingston | 2012222—6 |
| J Gasterger | 2200221—5 | W Vorbach | 1112101—6 |
| C Hubbell | 1111111—7 | W Hartye | 2110222—6 |
| J A Still | 0102211—5 | P Eppig | 0102101—4 |
| C Vincent | 1101012—5 | G Pfohlman | 2211111—7 |
| P Quinn | 0010211—4—58 | D T Donovan | 0011121—5—63 |

Sweepstake, $1 entry, 2 moneys:

| | | | |
|---|---|---|---|
| J A Still | 011—2 | L Epp'g | 120—2 |
| Vincent | 001—1 | Houseman | 001—1 |
| Hubbell | 111—3 | Pfohlman | 121—3 |
| Schleiman | 111—3 | Thompson | 101—2 |

Still second money on shoot-off.

### Live Birds at Claremont.

FOR a long time some of the more liberal members of the New Jersey Shooting Club have been agitating a movement in favor of having live bird shoots on their Claremont grounds, which are now in fair shape for that sport. They have not as yet succeeded in having live bird contests officially sanctioned by the club, but still have been allowed to put out traps, establish a 21yds. boundary and enjoy the sport whenever they chose. The grounds have been filled in as far as the boundary fence, which is 18in. high and 21yds. from the center traps. One of the prime movers in the pigeon shooting agitation is Fred G. Moore, who is one of the most enthusiastic shooters in this vicinity, and it is hoped that he will finally succeed in securing the club's permission to run a series of regular Wednesday afternoon invitation shoots, open to members and invited guests. The grounds are to be given a few more loads of filling, after which they will be equal to any in this section. On Wednesday, Sept. 28, Mr. Moore, I. H. Richmond, H. E. Smith J. R. Sunderman and Messrs. "Edwards" and "Meadows" went to the grounds and in a quiet way enjoyed half a day's sport with about a couple of hundred rattling good birds. All stood at 30yds., the events being at ten birds each and the entry fee nominal. The scores for:

| | | | |
|---|---|---|---|
| "Edwards" | 10002102o1—5 | 1010000220—4 | 0202112212—8 1122222020— 8 |
| "Meadows" | 2002111o02—6 | 0122111110—8 | 0002011011—5 0111102211— 8 |
| Smith | 221211o112—9 | 0011111111—8 | 0211121110—8 2111111111—10 |
| Moore | 1111212212o—9 | 1111222021—9 | 1011221221—9 1211221110— 9 |
| Richmond | | 1111012010—7 | |
| Sunderman | | 222o200212—7 | 1010122112—8 1011100212— 7 |

Mr. Richmond shot away below his usual form from the fact that he used a gun that was strange to him and not at all a good fit.

### Shooting in Vermont.

PUTNEY, Vt., Sept. 26.—The third match between the Putney and Holyoke Gun Clubs was shot at Putney Saturday afternoon, Sept. 24. The Putney Club placed two teams of three men in the field and Holyoke one. The entrance was $25 per team and each man shot at 25 Boston targets. The contest was very close throughout, the Holyokes gaining a lead of one bird in the first round and neither gaining or losing for the next three rounds. In the final round the Putney team No. 1 succeeded in gaining four birds on their opponents and captured first money, $22.50 with 51 breaks out of 75 birds. Holyokes won second, $15, with 48 breaks, and Putney No. 2 captured third, $7.50, with 40 breaks. Sweepstakes were shot before and after the team match until darkness put a stop to the sport. At 8 o'clock twenty-seven members and friends of the club adjourned to the Kendrick House where they found a fine game supper awaiting to which they did full justice.

The day was all that could be desired and the shoot was a grand success. Below are the scores:

Putney Team No. 1.

| | |
|---|---|
| Crosby | 1100110101111101011001101—17 |
| Ayer | 1111111111101101111001101—19 |
| Warren | 0101101001010110110101111—15—51 |

Holyoke, Mass., Team.

| | |
|---|---|
| Bolt | 1011111101100111100100011—16 |
| Blamey | 0111110111111001000100110—15 |
| Whitcomb | 1111101001111010111111010—17—48 |

Putney Team No. 2.

| | |
|---|---|
| Bailey | 0100010101010101001001111—12 |
| Hooper | 0010100110111111110010111—16 |
| Robertson | 0160011100010011001011011—12—40 |

Before and after the match the following scores were made in sweepstakes; Nos. 1, 2, 3 and 4 were at 5 birds, 50 cents entrance:

| | No. 1. | No. 2. | No. 3. | No. 4. |
|---|---|---|---|---|
| Ayer | 10100—2 | 11111—5 | 01101—3 | 11111—5 |
| Bolt | 11010—3 | 10101—3 | 11110—4 | 11100—3 |
| Blaney | 11111—5 | 10111—4 | 01011—3 | 00100—1 |

| Willard | | | 10101—3 | 00010—1 |
| Robertson | | | 01111—4 | |

No. 6, 10 birds, for purse of $10. Aug. 8: Warren. Crosby and Hooper 7 each. Blamey and Bailey 6 each, Bolt and Prouty 5 each, Willard and Robertson 4 each. W. E. AYER, Sec'y.

### The Atlantic Rod and Gun Club.

THE Atlantic Rod and Gun Club held its regular monthly shoot for the Newton diamond badge at the West End grounds, Coney Island, on Thursday, Sept. 29. Some good shooting was witnessed, especially in the race for the badge and first money between C. E. Morris, the president of the club, and Judge C. Furguesen, Jr., who tied with 10 straight. The latter won, killing 29 more straight to Morris's 28. The club shoots under modified Hurlingham rules, 5 unknown traps. Four extra prizes were added. C. M. Myer won the second. The third was divided, and R. Dwyer won the fourth. The birds were good, strong ones, and the weather was bright and warm. The scores:

| | | Ties. | |
|---|---|---|---|
| C E Morris (30) | 2222112122—10 | 1222211121122121211121111120 | |
| C Ferguson (28) | 2111212111—10 | 2122221212111111212121211112 | |
| J B Voorhees | 0112210121—8 | A Boyle | 1111101111—9 |
| H P Donnelly | 1010100200—4 | M Bonden | 2011010101—6 |
| W Boyle | 2010011200—5 | R Dwyer | 2122022021—7 |
| W F Sykes | 2122012221—9 | C M Meyer | 0211222121—9 |
| T Buckley | 2010222200—6 | G W Roderick | 2010112110—7 |
| H Kronika | 0111211210—8 | W Weber | 2112221002—8 |
| D Monsees | 2210112221—9 | | |

Sweepstake, $2 entrance, 3 moneys, 5 birds, 30yds:

| | | | |
|---|---|---|---|
| W F Sykes | 11012—4 | C Furguesen, Jr. | 10111—4 |
| C M Meyer | 12121—5 | D Monsees | 11010—3 |
| J B Voorhees | 11011—4 | R Dwyer | 12221—5 |

Referee and scorer, C. A. Dellar.

### On the Old Stone House Grounds.

A FINE lot of birds were furnished for the shooters who visited the "Old Stone House" grounds on Saturday last. The day was clear and cool and in the afternoon a heavy breeze made the birds feel like crossing the fence, which a number of them succeeded in doing. The main event of the day was a match at 25 live birds each, between John Erb and Henry Newhouse, for a stake of $25 a side, Hurlingham rules to govern. The old veteran Samuel Castle officiated as referee. This lot of birds were "corkers" and three of those shot at by Newhouse carried their loads of shot over the fence and died just outside. The score:

| | |
|---|---|
| Erb | 1222121222110000101211111—20 |
| Newhouse | 0010122202002220011100111—14 |

The following scores were made in a series of sweeps which followed; the conditions being, 4 birds per man, $3 entry, two moneys. In No. 7, one barrel only was used:

| | No. 1 | No. 2 | No. 3 | No. 4 | No. 5 | No. 6 | No. 7. | |
|---|---|---|---|---|---|---|---|---|
| Castle | 1211 | 1102 | 1111 | 1120 | 2111 | 1121 | 1101 | —25 |
| Smith | 2210 | 1110 | 1012 | 1112 | 1220 | 1111 | 1111 | —24 |
| Baldwin | 1111 | 1221 | 2212 | 1111 | 2211 | 1210 | 1110 | —26 |
| Erb | 1111 | 1122 | 2111 | 1202 | 1110 | 1220 | 1101 | —24 |
| Newhouse | 1221 | .... | .... | ... | .... | .... | ... | — 4 |

### Fred Van Dyke the Winner.

THE Myrtle Gun Club held an open tournament at Irvington, N. J., on Oct. 1, the main event being a 50 target event with $25 added to the purse. Fred Van Dyke, of Newark won first money, the scores being as appended:

| | |
|---|---|
| Breintnall | 1110101111111101111111111101111111111101111111111—45 |

### *OUR COLUMBUS NUMBER.*

OWING to pressure of news at this season, the special "Columbus Number" of the FOREST AND STREAM has of necessity been deferred. The date will be announced in due season.

### *WITH A FLY-ROD.*

IT will not be many weeks before the season will come for the appearance in our advertising pages of announcements by our fishing tackle friends of this tenor: "Trout and bass rods make excellent Christmas presents." And it is just as certain that many a fortunate fisherman, his father or mother, or wife or daughter, or son or cousin, or angling friend, having noted the suggestion in the FOREST AND STREAM, will be given a fly-rod for Christmas, and with it a presentation note of affection and well-wishing.

Now, if you were going to give such a holiday gift yourself, what would be your note to go with it?

A sentiment to accompany a fly-rod, what should it be?

The FOREST AND STREAM believes that suggestions in this line would prove timely and acceptable, and that a column in its angling pages made up of such notes would be capital reading. They are invited.

### *BOIS DE VACHES.*

THIS is what the old French trappers called it—cow wood. The phrase is expressive, and the plains men of more recent times roughly translated the term when they called it the "buffalo chip."

No object seen by the traveler over the plains is more humble and more unobtrusive than the buffalo chip. Its creator was the greatest, the most striking feature of the old prairie, but the relic which he left behind, and which has so long survived him, is the least. It is dull in color, and inconspicuous in size and shape. Like the violet, it is modest and hides itself beneath its taller neighbors, the tufts of bunch grass or the scraggy sage brush. It shuns observation, simulating the stones, bits of wood and lumps of dirt which surround it. No one would suspect that so inconspicuous an object has been a benefactor to humanity. Yet it has saved many a life, has given food and warmth, sustenance and strength to many a suffering mortal. This it has done modestly, quietly. The buffalo chip makes no boasts, but in time of need its lovely qualities shine forth like a good deed in a naughty world.

The buffalo chip has done much good, yet it cannot always be relied on to exert its beneficent powers for the suffering and the sorry. Meteorological conditions appear to affect its willingness or its powers for good, and it may safely be predicated of the chip that after a week of rain or the melting of a heavy snowfall, all effort to induce it to aid man—no matter how wretched his condition—will be vain. On the other hand, when the fierce sun of summer blazes down upon the plains, when the water in the old wallows is dried up, when the withered herbage rattles above the parched soil, and stones are hot to the touch, when the heated air rising from the ground quivers and dances, then the buffalo chip is a power. Or when the blasts of winter whirl over the plain, ruffling the coat of the prowling wolf, tossing the sand into air, chasing the tumble weeds mile after mile, and even picking up pebbles and carrying them on their strong wings, then too the chip does good work.

In the bitterest hours of a biting blizzard, at the bottom of a deep ravine partly sheltered from the wind, we have looked on a curious spectacle. Three shapeless, hide-covered lumps rested upon the ground, and from the top of each lump curled a little smoke. They were strange objects, not natural, yet unlike anything artificial. They looked like three hybrids between a tiny lodge and a tiny sweat house. They were like neither, yet the smoke suggested humanity. A nearer view solved the mystery. These lumps were men seated on the ground, covered with their robes, hair side in. Between the legs of each man burned a fire of buffalo chips which they and their robes completely covered. It was as if each one sat in a tiny lodge with his head sticking out of the smoke hole. And the buffalo chips were keeping them from freezing to death. Composed of the finely divided woody fibre of the prairie grass, they made the best of fuel.

A well-known naturalist has studied the history of the buffalo chip, and his graceful pen has recorded his observations and reflections. It is fortunate that this history has been written, for like the great beast which preceded it, the chip is passing away. Grand is the struggle which it has made against the disintegrating forces of almighty Nature, but the contest was too unequal. Its issue cannot be doubtful. The buffalo chip must yield, must be vanquished and disappear; but at least we can say that the human race is better for having known it.

### *MAINTAINING THE AFFIRMATIVE.*

"*Resolved*, That anticipation is better than realization."

THAT was the question of debate. And do you not recall it now, clearly and vividly as all those long years ago—The snowy, blustering night, the little red school house shaken of the winds, and your own knees shaken of a nameless trepidation as you stood forth courageously to maintain the affirmative; and did maintain it, too?

How many times since then, in life's succession of anticipation and realization and disappointment, and striving and triumph and defeat, have your eyes beheld once more that scene in the old debating society, and your lips parted in a grim smile as you have summoned all your resolution again to maintain the affirmative. You know more about it now. The proposition you defended in the debating society has come to be the accepted philosophy of life, and there is comfort in it, and balm.

It is the right philosophy to have in the house, along with a fishing rod and trout flies—the flies one sends off to a FOREST AND STREAM advertiser for before spring has come; and looks over again and again, and sorts out, and plans the campaign over. This one for the favorite pool just below the big rock; that one for the swirl by the stump; one for this and another for that; and with every one a trout. They are wonderful dream makers, these dainty bits of feather and tinsel, each one a parti-colored talisman by whose magic your room is flooded with the glory of Adirondack sunlight; the walls stretch away to mountain slopes; the rumble of the street becomes the rush and tumble and roar of woodland waters; your eye catches the elusive iridescence of the spray, and your heart jumps at the gleam of a living iridescence in the foam. Yes, a wonderful thing to dream over—to gild the joys of anticipation is one's fly-book.

But as you dream the days go by, and the weeks run into months; and then before you know it the summer has passed away, and the trout flies lie all unruffled and unwet, as fresh and as new and unused as when they came from the maker. They are phantom flies of phantom fish. Then all of a sudden you realize that vacation time has passed; there is no longer anything to dream of—and straightway you are in the little red school house once more, defending the old familiar affirmative.

It is not all of fishing to fish, say you. Sometimes there is more in the anticipation of fishing. You have proved it so for 1892, and in your philosophy has been found the comfort of the reflection that it is better to have had your dreams of fishing without the fishing, than to have had neither the anticipation nor the realization.

That is good philosophy for a disappointed, stay-at-home, chained-to-business fisherman. Is it not good philosophy for all of us, and in other things than fishing?

As the years shall bring the silver to the hair, the well defined and growing deliberation as to flights of stairs, the inclination to fish the pools nearest camp, and the preference for the large type in FOREST AND STREAM, time bring to you with these, if not fewer occasions for maintaining the affirmative, a fuller faith and a stouter heart to maintain it with fortitude and grace and serenity.

### *THE YELLOWSTONE PARK REPORT.*

THE report of the superintendent of the Yellowstone National Park, which we print elsewhere, is an admirable document, comprehensive yet concise. Capt. Anderson's management of the Park has been characterized by energy and force, and he has infused the heedless, happy-go-lucky tourists who desire to carry away everything they see, with a wholesome respect for the law, while the deliberate law-breaker is mightily afraid. As has been the case ever since the Park was established, the fact that there is no law providing for the punishment of offenders within the Park ties the hands of the officers of the law, and evil-doers can laugh at the Government, which has the power only to expel offenders from the reservation, and not to punish their crimes.

It is interesting to note that Capt. Anderson's estimate of the number of buffalo in the Park agrees closely with that made by persons who have for years devoted much attention to the subject of the increase of these protected buffalo. The buffalo are doing well, and are seldom disturbed, and the same is true of all other species of wild animals.

The proposition, so often repeated, to cut down the Park on the northeast, would cut off a considerable part of the wintering range of antelope, mountain sheep and black-tail deer, and would thus prove a grave injury to the reservation. It is only to be considered as the lesser of two evils. To have Congress authorize railways to pass through the Park would be worse than to lose much of its game. The preservation of its forests is of more importance to the country at large than conserving its game supply.

### *COLUMBIA RIVER INVESTIGATIONS.*

THE exploration of Clark's Fork and other tributaries of the Columbia River, by a party sent out by the U. S. Fish Commission, is completed for the season. Dr. Gorham, who has charge of the expedition, after a visit to the portion of the Pend d'Oreille lying in British Columbia, went to Newport, Washington, to see the Albany Falls, of the same stream. Mr. B. A. Bean obtained some good photographs of the falls, which are not a barrier to the ascent of fish. Prof. Woolman was obliged to return to his university at the end of September, and the work of collecting fish and other aquatic animals was continued by Mr. Bean.

From Newport, Dr. Gorham started down the Pend d'Oreille to look at Box Cañon, which contains the great falls in the United States near the British line. The little steamer which had been running between Newport and the falls having been laid up for repairs, the Doctor was obliged to make the voyage of fifty miles in a rowboat. As the distance includes fifteen miles of rapids, the labor involved in the return trip was very great.

In the meantime Mr. Bean was engaged in river seining at Newport, Chattaroy and Spokane.

The investigation of the Columbia is being carried on with a view of determining its needs and possibilities for fishcultural operations.

WE are pained to learn of the death of Mr. George H. Wyman, of Boise City, Idaho, known to readers of this journal as a frequent and valued contributor, in particular to the natural history columns. For many years one of the foremost members of the Cleveland bar, then seeking restoration of health in the far West, and after the working years of a useful life finding well earned leisure to devote to the pursuits of the field and study of Nature's page, Mr. Wyman was a type of the best class of American sportsmen.

# The Sportsman Tourist.

## TROUTING IN THE COAST RANGE.—I.

### The Nehalem Country.

Less probably is known of the Coast Range than of the Cascade. The Cascades are between us and the great world, while the Coast Range is between us and that great, dreary waste of waters where none care to go except those "who go down to the sea in ships." Naturally enough, therefore, the disposition of man to communicate with his fellow man, and the necessary pilgrimages to that end across the mountains and through the trackless forests separating the West from the East have made it possible to gather a very pretty thorough knowledge of such ranges as the Rockies and the Cascades. But on to the further West there are no incentives to pilgrimages except those of a premeditated character in search of fish, game and minerals. Therefore, we find such ranges as the Coast and Olympic almost *terra incognita*. The Coast Range is comparatively narrow and cramped, as if forced back upon itself by the Pacific while being crowded westward by the continent, and its streams as a matter of course are short and furious. The Cascade Range, on the contrary, is broader, and melts gradually away on either flank until it becomes difficult to say where mountains cease and valleys begin, and naturally its streams are longer and not so impetuous. The trout of the Coast Range are, as a rule, much larger than the trout of the Cascades, probably in consequence of the fact that they are not required to make such long trips from the rich, natural feeding grounds of the ocean. The trout of the larger streams of the Coast Range are not weighed by the ounce, as you will find if you go into that country with light tackle, as I did.

A friend of mine, Dr. Wood, of St. Paul, bantered me to take a trip with him to the Nehalem country in the Coast Range (just a simple investigating tour, you know) and as I seldom take water on such a proposition we soon had our supplies and accoutrements on board the Geo. W. Shaver, bound for the Claskanie. Although the Claskanie was at least twenty-five miles short of our destination it was the nearest point reached by boat or conveyance of any kind, and as we were to take our time we didn't much mind the prospect of so long a tramp. We left Portland in the morning, but as the Shaver was a trading boat it was plump night when we reached Claskanie City, which is located on the west bank of the Claskanie River, some four of five miles from its mouth.

Claskanie City, as its name would imply, is a place of some pretensions. It has a church, a saloon, a general merchandise store and four or five modest dwelling houses, and the whole city is painted with the best quality of hope, tinted with anticipation. The youthful ambition and springlike hopefulness of some of these little frontier towns is truly exhilarating. After listening a whole evening to the praises sung of Claskanie City by its modest citizens I am pleased to say that there is not a mossback or pessimist within its limits, and if courage, concert of action and talk is what builds great cities, the metropolis of the Northwest will some day be on the banks of Claskanie River.

By the way, the Claskanie affords fine fishing, but as we were on a trip of discovery (an investigating tour as it were), we wasted no time on these comparatively known waters. Now a twenty-five mile tramp across a mountainous country with heavy packs on dim trails may be entertaining enough, but I assure you it is no picnic, and you can imagine how fatigued we were before we reached the Nehalem Valley.

The "divide" between the Claskanie and the Nehalem is a broken piece of country and every foot of it is covered with as fine evergreen timber as ever a lumberman's eyes feasted upon. Much of the timber is cedar, but there is a generous mixture of pine, spruce, yellow and white fir, and between the two rivers we saw no burns, so it is not surprising that lumbermen talk a great deal about the Nehalem country.

Our heavy packs and the blazing sun made our trip a weary one indeed; but the trail was well shaded, and we found numerous springs of the purest water, many of which poured out of holes in the solid rock. One of these springs seemed almost artificial in its construction. Five or six feet above the trail in the solid rock was a basin half as large as an ordinary washtub and probably a foot deep, brim-full of the purest, coldest water, and which seemed to have been placed there by kind nature for the special delectation of such poor wayfarers as the Doctor and I.

How we did bathe the inner and outer man with its sparkling nectar.

The water of that country is the finest I ever saw. There is a slight mineral smack to it, not the least unpleasant to the taste, but which seems to give it sparkling brilliancy. About 3 o'clock in the afternoon we struck the Nehalem Valley to the southeast of Saddle Mountain and probably twenty-five miles from the ocean as the crow flies, but at least forty miles from the mouth of the river as the stream runs. We followed the river down to Vesper City Post-Office, situated at the pass of the river through the Coast Range. Vesper, like Claskanie, is a city of gigantic aspirations, but has fewer inhabitants to extol the many points of vantage it possesses as the prospective metropolis of the Northwest.

The city, at present, consists of one house, of small dimensions it is true, but in architectural design much resembling a modern hen house. But this structure answers very well, for the present, the many purposes of post-office, city hall, church, school house and residence for the worthy P. M. with his wife and numerous progeny, so numerous, in fact, that the Doctor and I, for lack of room in the house, had to seek refuge for the night under a tree. All the inhabitants turned out to entertain us in the evening, which they succeeded in doing right royally, for the postmaster was a good talker, and talk was what we wanted. We wanted him to talk exclusively about the country and the mountains, the streams, elk, deer, cougar, wildcat, black wolves and black bear, but he had a faculty of winding down to every period with something about the future of Vesper City. Notwithstanding his old "chestnuts" and Vesper City prophecies we succeeded in worming out of him considerable information, so that by bed time we knew all about Frank Lusignaut, the guide and elk hunter, who lived three miles below, and who could, by lying flat on the ground and smelling of an elk track, tell when it was made and about where in the mountains his elkship could be found. We knew about the terrible elk wolf, the most dangerous of all the beasts of the Coast Range, and the only one that will attack man without first being attacked. We knew about 14-year-old Johnny Turpin across the river, who, with an old muzzleloading rifle and his faithful but bloodthirsty Towser had killed twenty wildcats the past spring in the swamp along Deep Creek. We knew, too, that an Indian had never been seen by the whites in the lovely Nehalem Valley, and we knew that the reason of it was that the Indians entertained a superstitious dread of the valley on account of some direful thing that had happened there countless years before Capt. Gray discovered the mouth of the Columbia.

But we knew so much more than we did before we struck Vesper City, that I will not attempt to give the readers of Forest and Stream full particulars. Suffice it to say that when we slept, our dreams were full of black wolves and ghostly horrors, clouds of wildcats and great herds of whistling elk hounded by a tireless dragon whose sense of smell and instinct for blood were unerring, but all within the shadow of a great city on the banks of the Nehalem River, called Vesper.
